Committee Comments or Notations: none

Approach: SCIENCE, Florida Edition, by Harcourt School Publishers, is a comprehensive science program explicitly designed for Florida's elementary school students. SCIENCE ©2007 provides systematic instruction, assessment, and remediation in a complete science curriculum for Florida students and teachers, kindergarten through grade 5. The program specifically provides thorough coverage of all Florida's Sunshine State Standards, Benchmarks, and Grade Level Expectations (GLEs) through sequential, in-depth development of concepts within the following strands of science: A) The Nature of Matter; B) Energy; C) Force and Motion; D) Processes That Shape the Earth; E) Earth and Space; F) Processes of Life; G) How Living Things Interact with Their Environment; and H) The Nature of Science. Strand H, The Nature of Science, is woven through the entire program. An introductory chapter at the beginning of the Student Edition prepares students to effectively use the tools, scientific processes, and methods of scientific inquiry to learn about the natural world. Students have many opportunities to use the tools and apply the skills and methods in the Strand Experiments, Investigate, Investigate Further, and Projects for Home or School. The Technology features, appearing at the end of every chapter, demonstrate the interdependence of technology and society. Program Organization: SCIENCE has a unique organization that clearly shows alignment with the Sunshine State Standards. At each grade level, the content follows the same sequence as the Science Strands. Chapters within each Strand focus on the Standards, Benchmarks, and Grade Level Expectations that fall within the strand. This organization enables teachers to clearly focus instruction on the required knowledge and skills and to assess and track students' mastery. Inquiry SCIENCE has many opportunities for structured, guided, and student-initiated independent inquiry. Every book includes an introductory chapter that prepares students to effectively use the tools, skills, and methods of scientific inquiry to explore about the natural world. Experiment, at the beginning of every strand, provides an opportunity for students to engage in a long-term investigation in which they apply the tools, skills, and methods of scientific inquiry. The hands-on Investigate at the beginning of every lesson forms the basis for concept development. The content is expanded through prompts in Investigate Further that provide scaffolding to an independent inquiry. The Projects for Home or School at the end of the chapters provide opportunities for students to design their own experiments or even prepare projects for a science fair. The Teacher Edition provides extensive support for developing inquiry. Strand Experiments, appearing in the Teacher Edition, at the beginning of every strand, are long-term investigations. Detailed plans, supporting transparencies and lab manual pages help teachers scaffold students from structured to guided to independent inquiry as they progress through the year. For the Investigates, the Teacher Edition presents Inquiry Skill Mini-Lessons which provide focused instruction on inquiry skills to help students develop and maintain essential skills that form the basis of scientific inquiry. In addition, prompts throughout the Teacher Edition provide even more opportunities to develop inquiry skills. Reading Support SCIENCE infuses support for content area reading in daily instruction. At the beginning of each lesson, a Reading Focus Skill is identified. Lesson content is organized to provide signal words and text structure consistent with the reading skill to aid comprehension. The Focus Skills are Identify Main Idea and Details, Compare and Contrast, Cause and Effect, and Sequence. Students Draw Conclusions and Summarize at the end of every lesson. Each lesson's reading focus skill is introduced with a graphic organizer at the beginning of the Reading in Science section of the lesson. Throughout the lesson, the Focus Skill icon alerts students to each opportunity for practicing and applying the skill. A question appearing the end of each short segment of text supports the use of the lesson's Reading Focus Skill and helps students monitor their understanding before moving on. The Reading Focus Skill's graphic organizer also appears in the Reading Review at the end of each lesson. Students complete the organizer to summarize the lesson, helping them to internalize what they have learned. In addition, the Reading in Science Handbook in the back of each Student Edition provides detailed, student-friendly information about effective use of Reading Focus Skill. The Teacher Edition's, Reading Skill Mini-Lessons provide focused instruction on reading skills. The program also includes Leveled Readers, one per chapter, that offer additional opportunities for reading in the science content area. The readers reinforce chapter reading skills and vocabulary and enrich and extend chapter concepts. SCIENCE focuses on developing FCAT-tested vocabulary and other key science terms. FCAT-tested terms are listed in the Student Edition at the beginning of each chapter and are indicated in the Teacher Edition Lesson Planners by asterisks. Vocabulary is also highlighted in yellow in the Student Edition where they are defined in context. Develop Science Vocabulary, appearing at point of use in the Teacher Edition, reinforces highlighted vocabulary. Together these features offer opportunities and suggestions for helping students understand the language of science. The Reading Support and Homework book also provides extensive support for developing vocabulary. The Vocabulary Power worksheets, vocabulary sections on the Lesson Quick Study pages, and Vocabulary Cards and activities reinforce FCAT-tested vocabulary as well as other key science terms. Reaching All Learners: SCIENCE offers an array of components, strategies, and activities that allow teachers to differentiate instruction to ensure that all students succeed. Throughout the Teacher Edition, point-of use strategies under Reaching All Learners (ESL/ESOL, Intervention, Enrichment, and Challenge strategies) provide leveled activities for addressing language needs. These strategies also help students having difficulty grasping concepts, reinforce tested content objectives, and further challenge students. At the beginning of every chapter in the Teacher Edition, lists of Spanish cognates are provided to help Spanish-speaking students understand new vocabulary. Further, at the lesson level, ESL/ESOL Support includes leveled activities, addressing comprehensible input, language and vocabulary, and background experiences. Additional support is provided in the ESL Support book. It includes multilevel strategies that modify instruction to meet student's diverse language needs. The ESL Support book also provides strategies for pre-teaching vocabulary and building fluency, as well as parallel scaffolded instruction for the Student Edition. Mini-assessments are also included with each lesson. A reproducible student page is provided for each lesson to help students summarize lesson concepts. In addition to the Teacher Edition's Intervention, Enrichment, and Challenge activities, the program includes Leveled Readers. These readers address three different reading levels: Below-Level/Intervention, On-Level/Enrichment, and Above-Level/Challenge. The readers enable teachers to reinforce content at a level commensurate with a child's reading ability. To further assist the struggling reader, Audio-Text CDs are available. Comprehensive Assessment SCIENCE provides a comprehensive, multidimensional assessment program aligned with instruction. The assessment program includes many assessment options: frequent mini-assessment within each lesson, formal reviews and tests for each chapter and unit, FCAT Practice, Performance Assessment with scoring rubrics, Portfolio Assessment, and Student Self-Assessment. Chapter tests can be taken with pencil and paper or online through Harcourt School Publishers Online Assessment (HSPOA). For each chapter's Review and FCAT Preparation in the Student Edition, the Teacher Edition provides an item analysis to help teachers determine which Florida Benchmarks/Grade Level Expectations and FCAT-Tested Science Terms need additional review. Additionally, HSPOA provides prescriptive reports and a list of intervention resources for every Grade Level Expectation. This information enables teachers to make sound instructional decisions. Technology

K-5 Science

Harcourt School Publishers

Science

Frank, Jones et al

2007 First

SCIENCE includes an array of technology components that support instruction with easy-to use electronic tools for students and teachers. The Science Up Close and Enrichment Activities CD-ROM and the science section of the Harcourt web site, www.hspscience.com, offer hundreds of high-interest, interactive activities that reinforce or extend science concepts. Planning tools for teachers, such as the ePlanner and the All-in-One CD-ROM for Planning, make preparing science lessons easy from home or at school. Activity Video DVDs provide background information, previews of investigations, effective classroom management techniques, and expected results to help teacher conduct successful hands-on investigations. Harcourt School Publishers Online Assessment (HSPOA) provides electronic test-taking with automatic scoring for multiple-choice items, prescriptive reports that identify intervention resources within SCIENCE, and capabilities that enable districts to aggregate and disaggregate data for specific reports. HSPOA also enables teachers to create their own tests by Benchmark/GLE.

Recommended for: SCIENCE ©2007, by Harcourt School Publishers, is written for all Florida K-5 students. SCIENCE offers learning opportunities for all students through various instructional activities. Teachers are provided a wealth of suggestions to differentiate instruction so that all students have access to the rich science content. Because of diverse student needs, SCIENCE makes science concepts accessible to any ability level through resources and strategies for remediating, enriching, and challenging all students. SCIENCE serves the needs of ESL students and of students who are struggling readers, without lowering academic expectations. ESL and reading support resources, as well as resources for enriching and challenging, ensure that Florida students' needs are met.

Suggested Instructional Time: 1 year/grade

Consultant Service: Harcourt School Publishers offers a comprehensive, system-wide, and school-based professional staff development program that includes initial and continuing staff development for the life of the adoption. The goals of Harcourt's staff development are to: acquaint the staff with the purpose and use of all materials provide assistance for improving the quality of science instruction for implementing the Continuous Improvement Model, help administrators and teachers become more effective instructional leaders Harcourt School Publishers commits to participating in planning meetings with district staff to implement an effective staff development program that includes district administrators, school administrators, grade-level teachers, special needs teachers, and designated district personnel.
