Explanation of Courses for Students with Exceptionalities

This section of the directory contains course titles that are available for students with exceptionalities. This section lists only those courses that are different in content from those listed in other sections of this directory. In addition to the courses listed in this section of the Course Code Directory, students with exceptionalities may be enrolled in basic or career and technical courses. The courses for grades 9-12 in this section may be used for elective credit towards a standard diploma or for credit towards a special diploma. Other courses appropriate for students with exceptionalities may be selected from those in basic and career and technical education and may be modified as indicated in Rule 6A-6.0312, FAC. Modifications to basic courses shall not include modifications to the curriculum frameworks or student performance standards.

Special Programs for students with exceptionalities encompass instructional and related services that provide significant adaptations in curriculum, methodology, materials, equipment, or the environment (Rule 6A-6.0311, FAC). The courses listed in section 4, Exceptional Student Education, of this directory represent the content of instruction and do not indicate the variety of appropriate instructional strategies that should be used with students with exceptionalities. All courses for grades 6-8 and 9-12 in section 4 include a range of intended student outcomes and may be repeated. Students may earn multiple credits in courses for grades 9-12. When using multiple credit courses, the particular course requirements and course performance objectives must be specified on an individual basis for each credit earned.

In grades 9-12, students with a disability may access different courses at different levels of functioning, (i.e., Independent, Supported, Participatory) depending on their individual needs and abilities. The courses under Academics-Subject Areas are designed for all students with mild disabilities. Reading: 9-12, English: 9-12, Math: 9-12, Science 9-12, and Social Studies 9-12 are for students with mild disabilities and are designed as higher level courses.

- The courses listed under **Supported Levels: 9-12** are designed for students with moderate disabilities.
- The courses listed under **Participatory Levels: 9-12** are designed for students with severe or profound disabilities.
(It is important to note that students are not limited to one level of instructional complexity when assigned the courses.)
- The courses listed under **Special Skills Courses** are designed to meet the specialized needs of students with exceptionalities. Some courses are tailored to meet the specific needs of a particular category of exceptionality. Other courses in this section may be used to meet the individual needs of any student with exceptionalities.
- The courses listed under **Miscellaneous** are designed to meet the needs of students with exceptionalities who need to learn special content or skills in these areas. The content of these courses is different from basic education courses in the same areas.
- The courses listed under **Therapy** are designed to meet the needs of students with disabilities who need to receive specialized services in identified areas. Typically these courses are not offered for class credit.

- The titles listed under **Non-Credit** represent instructional settings and are included only for the purposes of funding. The specific content of instruction is determined by the specific courses being taken.
- The courses listed under **Career and Technical Education** for Students with Disabilities are designed to meet the career and technical skill needs of students with disabilities. These courses are appropriate when it has been determined that modifications or the use of modified occupational completion points are not sufficient for the successful mastery of regular career and technical courses.
- The courses listed under **Gifted** are designed to meet the needs of students identified as gifted. The content of these courses is different from basic education courses in the same areas.

Certification/Highly Qualified:

General Education Courses

For co-teaching as defined in s. 1003.03(5)(c), Florida Statutes, both teachers must meet the highly qualified teacher (HQT) requirements for the appropriate core academic subjects and the certification requirements that apply to the basic education course number used.

In circumstances when the general education teacher has a class comprised of students enrolled in a basic education course and ESE students who are enrolled in an ESE course, the general education teacher is not out-of-field for the ESE course if an ESE certified teacher is providing support services.

If ESE teachers are providing support to students with disabilities, through models such as in-class one-on-one (as defined in Student Information System as a model where a teacher meets with an individual student or small group of students on an individualized basis within a traditional classroom but not as a co-teacher) or consultation, and the general education teacher is responsible for the core academic subject content, the ESE teachers are required to have an ESE certification in accordance to the ESE certification table, but are not required to meet HQT requirements. ESE teachers providing support to students who are gifted are required to have the gifted endorsement coverage.

For basic education courses in physical education certification may either be in accordance with basic education requirements or with the Exceptional Education table. Due to NCLB highly qualified personnel requirements, basic education courses in art and music require certification to be in accordance with basic education requirements.

Exceptional Education Courses

The required certification for the exceptional student education courses listed in section 4, course listings, is addressed in the certification column adjacent to the particular course.

Five endorsement areas are provided in exceptional student education – gifted, severe or profound disabilities, mobility skills for visually impaired, prekindergarten disabilities, and autism. The gifted and orientation and mobility endorsements are currently required. Endorsement in the areas of severe or profound disabilities, prekindergarten disabilities, and autism will be required by July 1, 2011.

Career and Technical Education Courses (Regular and ESE): Students with exceptionalities may enroll in regular or ESE career and technical courses. Districts are encouraged to use allowable accommodations and modifications or modified occupational completion points (MOCPs) to enable ESE students to participate in regular career and technical programs. Required certification for specific career and technical courses in which students enroll is listed in the certification column adjacent to the particular course.

Exceptional Education Table - Required Certification

This table shows the required teacher certification when all of the students are identified as exceptional students. For help with symbols, refer to the section titled Explanation of Symbols.
