

Appendix III: List of Cards and/or Strips and Teacher-Gathered Materials by Item

Below is a list of any cards and/or strips that will be provided in the Cards Packet and Strips Packet by grade level, content area, and item number. Also provided are any teacher-gathered materials required by item. Please use this list to prepare for administration of the assessment. An “X” indicates that precut cards/strips are required to administer the question.

- Reminder: Calculators, number lines and/or generic counters may be set out on the work surface for the student who uses them during daily instruction in Mathematics. Teachers should remind students that they may use the tools to answer the question. However, the use of a tool is required in some items (see list below). When the calculator, number line and/or generic counter is designated in the **Materials** section, all students must be provided the tool to use to assist them in solving the problem.
 - Refer to the Content-Specific Administration Directions for more details.
- The Writing materials at grades 4, 8, and 10 are provided in the Cards Packet and Strips Packets and are, therefore, not listed below.
