Pearson Education Inc., publishing as Pearson AGS Globe

#### General Science

Marshall et. al. 2005

**Committee Comments or Notations:** none

**Approach:** AGS Publishing's General Science textbook is written for middle school students reading below grade level or those who need a diverse learning approach to master skills. The text is comprehensive in content and closely follows the National Science Education Standards and strongly aligns to both the Florida Curriculum Framework for Science and the Sunshine State Standards for Science. Reading level averages upper third grade, with content both appropriate and adaptable to those of varying abilities and background. This text presents general science in a straightforward, accessible manner. Explanations are clear, and students are given many examples and shown the many ways science affects their daily lives. Language is used that students can understand and relate to. The text is student centered, with issues and examples selected to maximize student interest, understanding, and relevance. Lessons are short and concise, making it easy for readers to grasp facts and gain perspective. Graphic additions, such as photos, graphs, charts, and illustrations, help students visualize information. Special features throughout make science relevant to today's students and encourage them to develop critical thinking, vocabulary, writing, and test-taking skills.

**Recommended for:** Middle school students with below-level reading skills or who need a diverse learning approach in order to master concepts. This text may be used with a wide range of students within the population of students with disabilities. The mid – to upper – third grade reading level allows students who experience difficulty in reading to focus on learning the content.

**Suggested Instructional Time:** 3 school years

**Consultant Service:** Inservice or teacher training sessions may be arranged at no charge by contacting AGS Publishing. Inservice/training sessions may consist of a variety of topics including Materials Overview, Features and Use; Implementation Strategies; and Professional Development. Examples of Professional Development training sessions may include Learning Styles and Adaptive Techniques; Inclusion, FCAT; Alternate Assessment; or Implementation Strategies, especially useful for new and out-of-field teachers.

**Adopted:** 2006 - 2009

**Contract Extended:** 2009-2011

# 6-8 Science

## Exceptional Student Education - Science: 6-8

Pearson Education, Inc., publishing as Globe Fearon

### *Pacemaker General Science*

Editorial Staff 2001 3rd

**Committee Comments or Notations:** Content may not be sufficient to sustain a 3 year course of study.

**Approach:** Pacemaker® General Science is designed so that students can learn best at a pace that is right for them. This program is intended to support exceptional students of all abilities in meeting academic content standards and graduation requirements. General Science supplies educators and students with materials that are accessible, predictable, age-appropriate, and relevant. The program meets the needs of exceptional students, below-average students, struggling readers, and English language learners of varied ability levels. The success of the Pacemaker curriculum is based solidly in research on the characteristics of instructional design, language, presentation, and subject matter. This Pacemaker program offers the instructional materials needed to enable students to acquire the skills and knowledge that are assessed on standardized tests, and help students make adequate yearly progress. Designed to help students understand and master required content and skills, this program makes content accessible through Controlled reading level, Strong vocabulary instruction, Extensive practice and review, Frequent opportunities for assessment.

**Recommended for:** The submission is intended to meet the needs of exceptional students in grades 6-8.

**Suggested Instructional Time:** 1 year

**Consultant Service:** The Pearson Learning Group staff of consultants is available for in-service training. Pearson Learning Group uses a combination of staff development models. The company's national science consultant can visit school districts to offer face-to-face training with teachers, science leaders, and coaches or science mentors. One option is for the consultant to provide turnkey training to small groups of teacher leaders who would then be able to deliver training to larger groups of teachers.

**Adopted:** 2006 - 2009

**Contract Extended:** 2009-2011

Grade: 6-8

# 6-8 Science

## M/J Comprehensive Science 1, 2 & 3

Glencoe/McGraw-Hill

*Glencoe Florida Science Grades 6, 7 & 8 ©2006*

Biggs et al

2006 1st

**Committee Comments or Notations:** When used as a series, all curriculum content will be met.

**Approach:** Glencoe's Florida Science Grade 6 Student Edition was developed to align with the Sunshine State Standards for Science and implements a variety of research-based pedagogical strategies. Consistent with the Florida Continuous Improvement Model, Florida Science provides teachers with tools and resources to implement each of the eight steps of the process. This will improve student mastery of the Sunshine State Standards and aid in student preparation for the FCAT. Additionally, the program is designed to allow teachers to differentiate instruction through diverse and varied learning strategies. The pedagogical approach is founded on learning through hands-on experiences combined with solid content support. Intended for use in a Comprehensive Science 1 course, Glencoe Florida Science Grade 6 is part of a three-year program. Each course addresses all of the Benchmarks of the Florida Sunshine State Standards for Science with an emphasis on the Annually Assessed standards. As specific Benchmarks within each standard are addressed in the three-year scope and sequence, students build upon prior knowledge and gain an understanding of how the concepts are related. The Student Edition supports readers of all abilities with considerate text, Foldables: interactive graphic organizers, clear visual graphics with Concepts in Motion animated illustrations, and a thoughtful presentation of the key concepts. Engaging features provide students with a deep understanding of the concepts by exposing students to issues through real world perspectives. FCAT vocabulary is identified in the text to familiarize students with words that they will encounter. Additionally, students will be accustomed to the FCAT question formats through the FCAT Practice pages found in each chapter. The StudentWorks Plus CD-ROM is an alternative format to the Student Edition with several additional resources. To support struggling readers and ESOL students, there is a complete audio reading on the CD along with Spanish and Haitian-Creole summaries. This allows students to read the text on screen and listen to the audio reading at the same time. For convenience, students also have access to all of the student worksheets. The Teacher Wraparound Edition is an invaluable resource, filled with strategies for inquiry-based learning, differentiating instruction, ongoing assessment, reading support, and FCAT preparation. With myriad strategies included at point-of-use, teachers can incorporate additional labs and demonstrations, CRISS strategies, and more. Additionally, teachers have support with diagnosing and countering misconceptions. The Teacher Wraparound Edition also guides teachers through the program resources needed to implement the Florida Continuous Improvement Model.

**Recommended for:** Intended for use by students in grades 6-8

**Suggested Instructional Time:** 1 year per book.
