State Committee recommended notations: None

Approach: Interpretation of the mathematical formulas is emphasized over simple "plug and chug." This text contains many open-ended questions, and gives equal weight to three methods of describing functions: graphical, numerical, and algebraic.

Recommended for: advanced students in grades 9-12

Suggested instructional time: one year

Consultant services: To be determined

Adopted: 2004-2010

| 1559533358 | Instructors' Guide Vol. 1 | * 39.95 |
| 155953334X | Instructors' Guide Vol. 2 | * 39.95 |

State Committee recommended notations: None
Approach: This text is a modern data-analytic approach that allows students to uncover, display, and explore patterns in data. The curriculum offers a balance of meaningful activities and direct instruction. The text relies on technology and it shifts from memorizing formulas to learning concepts fir through activities, then through an informal graphical approach, and then via more formal definitions.
Recommended for: advanced students in grades 9-12
Suggested instructional time: one year
Consultant services: Comprehensive, full-day implementation inservice is available at no cost, upon request at mutually agreed upon dates and locations.
Adopted: 2004-2010

State Committee recommended notations: None
Approach: The authors emphasize several themes throughout the book. The mantra of Think, Show, and Tell is repeated in every chapter. It emphasizes the importance of thinking about a statistics question and reporting our findings. The authors also emphasize the fundamental concept of models.
Recommended for: advanced students in grades 10-12
Suggested instructional time: one year
Consultant services: Consultant services will be available for inservice training as needed for the duration of the contract – no charge.
Adopted: 2004-2010

State Committee recommended notations: Staff development is highly recommended for successful implementation of this investigative approach.

Approach: This text provides investigations that are structured to enable students to conduct them with minimal direction and intervention. The investigative process encourages the use of multiple representations – numerical, graphic, symbolic, and verbal -to deepen understanding for all students and to serve a variety of learning styles.

Recommended for: Students in grades 9-12

Suggested instructional time: one year

Consultant services: Comprehensive, full-day implementation in-service is available at no cost upon request. (800) 995-6824

Adopted: 2004-2010

State Committee recommended notations: None
Approach: With an emphasis on modeling, this text organizes content so that students make connections between algebraic equations, their graphs, and applications of the mathematics to the world around them. Early in the text, students are presented with the "Verbal Model for Algebraic Problem Solving."
Recommended for: Students in grades 9-12
Suggested instructional time: one year
Consultant services: Available at no charge upon request (800) 323-5437

State Committee recommended notations: This program is recommended for struggling students reading below grade level, ESE, Title 1, ESOL, etc.

Approach: This program presents a multi-faceted approach to problem solving based in real-world applications. Individual lessons present a variety of teaching, practice, and assessment strategies to maximize student outreach. Lessons include pictorial and abstract representations of concepts.

Recommended for: students in grades 9-12 who read or work below grade level or who need extra help grasping new concepts.

Suggested instructional time: two years

Consultant services: Available at no charge upon request **Adopted:** 2004-2010

State Committee recommended notations: None

Approach: This program uses contextual teaching strategies: Rating, Experiencing, Applying, Cooperating, and Transferring. These strategies focus on teaching and learning in context – a fundamental principle of constructivism.

Recommended for: students in grades 8-12 who must be actively involved to learn

Suggested instructional time: two years

Consultant services: Available upon request. Cost depends on the number of books ordered and/or the length of the inservice desired.

State Committee recommended notations: Staff development is highly recommended for successful implementation of this program.

Approach: The investigations allow student opportunities to experiment, hypothesize, measure, analyze, test, discuss, write, explain, and justify their ideas. A combination of projects, real-world applications, and appropriate problems emphasizes making sense of numbers, variables, expressions, equations, and algebraic "laws" in contextual situations with real data.

State Committee recommended notations: Good preparation for AP Calculus BC

Approach: This text serves as a comprehensive teaching and learning resource to introduce calculus to a wider variety of high school students. The text begins with three chapters of pre-calculus, and then moves right into first semester calculus. It is ideal for courses that wish to reinforce algebraic skills with pre-calculus and then successfully transition students into calculus itself.

Recommended for: students in grades 9-12

Suggested instructional time: one year

Consultant services: Consultant services and staff development may be arranged on a mutually convenient basis at no cost to the local school district.

State Committee recommended notations: Recommended for all levels of calculus.

Approach: This text completely supports the content, goals, and philosophy of the advanced placement calculus course description. The text explores calculus through the interpretation of graphs and tables as well as analytic methods. Students are expected to use a multirepresentational approach to investigate and solve problems, to write about their conclusions, and often to work in groups to communicate mathematics orally.

Recommended for: average to advanced students in grades 11-12

Suggested instructional time: one year

Consultant services: Consultant services will be available for in-service training as needed for the duration of the contract.

Adopted: 2004-2010

State Committee recommended notations: Staff development is highly recommended for successful implementation of this investigative approach.

Approach: This program utilizes an activity based approach that allows students to understand geometry ideas, developing their appreciation for the need for justification of relationships and improving their reasoning skills. This approach is supported by the van Hiele model of how students best learn geometric concepts.

Recommended for: students in grades 9-12

Suggested instructional time: one year

Consultant services: Comprehensive, full-day implementation inservice is available at no cost, upon request, at mutually agreed upon dates and locations.

State Committee recommended notations: Staff development is highly recommended for successful implementation of this program.

Approach: This program engages students in investigation-based multi-day lessons organized around big ideas. It was developed by the CORE-Plus Math Project at Western Michigan University with funding from the National Science Foundation.

Recommended for: students in grades 9-12

Suggested instructional time: three years

Consultant services: available at no charge upon request

Adopted: 2004-2010

State Committee recommended notations: None
Approach: This program is built on the idea that students develop better conceptual understanding of mathematics and stronger problem solving skills when they (1) see connections among different branches of mathematics, (2) are actively involved in the learning process, and (3) study mathematics that is meaningful. The series is designed to make mathematics accessible and inviting by incorporating a variety of strategies, including real-life applications; exploratory activities, visual approaches, and projects.
Recommended for: students in grades 9-12
Suggested instructional time: three years
Consultant services: Consultant services and staff development may be arranged on a mutually convenient basis at no cost to the local school district.
Adopted: 2004-2010

State Committee recommended notations: None

Approach: This text integrates graphing technology into the course without losing the importance of the underlying mathematics. Either a graphing calculator or a computer with graphing software is required

Recommended for: students in grades 9-12

Suggested instructional time: one year

Consultant services: Consultant services are available at no charge to adopting schools. Requests should be submitted in writing with as much advance notice as possible, indicating preferred and alternate dates.

Adopted: 2004-2010

State Committee recommended notations: None

Approach: The text is based on the premise that in order to success in calculus, students must understand the idea that variables really vary, not simply stand for unknown constants. To achieve this knowledge, students use functions as mathematical models of real-world phenomena.

Recommended for: students in grades 10-12

Suggested instructional time: one year

Consultant services: Comprehensive, full-day implementation

inservice is available at no cost, upon request, at mutually agreed upon dates and locations, to county school districts adopting and implementing the program.

State Committee recommended notations: This text is also appropriate for Analysis of Functions.

Approach: The text thoroughly explores topics in algebra, trigonometry, analytic geometry, and all the examples, applications, and exercises have been selected for their relevance to calculus. The trigonometric functions are introduced first in terms of the unit circle approach and then using right triangles.

Recommended for: students in grades 11-12

Suggested instructional time: one year

Consultant services: Consultant services and staff development may be arranged on a mutually convenient basis at no cost to the school district.

State Committee recommended notations: None

Approach: This text, intended for a graphing calculator required Precalculus course, shows students when and how to use concepts, and promotes real understanding, not just rote memorization. The book reflects NCTM guidelines, and makes use of real world data in presenting a balanced algebraic and graphical approach to understanding Precalculus concepts.

Recommended for: average students in grades 10-12

Suggested instructional time: one year

Consultant services: Consultant services and staff development may be arranged on a mutually convenient basis at no cost to the school district.
