

Accountability

The School Code Rewrite Workgroup has formed a subcommittee to coordinate and make recommendations on statutes pertaining to Florida's K-20 education performance accountability system with specific tasks as follows:

1. Identify all statutes pertaining to education performance accountability.
2. Identify instances of overlap and duplication of education accountability system responsibilities between and among government agencies and recommend language to reduce the overlap and eliminate the duplication.
3. Organize the statutes as revised in #1 and #2 into a new chapter on education performance accountability.
4. Identify the appropriate levels of statutory requirement to ensure the assessment of quality as a major component of the education accountability system.
