6A-6.0253 Diabetes Management.

(1) Definitions.

(a) through (c) No change.

(d) Individualized HealthCare Plan (IHP). An IHP is a written plan of care developed at the local level to outline the provision of student healthcare services intended to achieve specific student outcomes. The IHP is part of the nursing process that is detailed in the National Association of School Nurses Position Statement: Use of Individualized Healthcare Plans to Support School Health Services (2020) Individualized Healthcare Plans, The Role of the School Nurse (2015) (https://www.nasn.org/nasn/advocacy/professional-practice-documentsx/position-statements/ps-ihps), which is hereby incorporated by reference and available online at https://www.nasn.org/nasn/advocacy/professional-practice-documentsx/position-statements/ps-ihps. A hard copy may be obtained by contacting Student Support Services, Turlington Building, 325 West Gaines Street, Suite 644, Tallahassee, Florida 32399. The IHP is developed from the DMMP by a registered nurse (RN) in collaboration with the family, student’s healthcare providers, and school personnel for the management of diabetes while in school, participating in school-sponsored activities, and in transit to or from school or school-sponsored activities. The IHP is child-specific and includes a written format for nursing assessment (health status, risks, concerns, and strengths), nursing diagnoses, interventions, delegation, training, expected outcomes, and goals to meet the healthcare needs of a student with diabetes and to protect the safety of all students from the misuse or abuse of medication, supplies, and equipment.

(e) No change.
