

**FLORIDA'S ANNUAL
APPRENTICESHIP AND PREAPPRENTICESHIP REPORT
PROGRAM YEAR 2018-2019**

FLORIDA'S ANNUAL APPRENTICESHIP AND PREAPPRENTICESHIP REPORT FOR PROGRAM YEAR 2018-2019

In January 2019, Governor Ron DeSantis issued Executive Order 19-31 to chart a course for Florida to become number 1 in the nation for workforce education by 2030. Registered apprenticeship and preapprenticeship training programs are a key component of Florida's vision to ensure Florida has the best, most qualified workforce and that Florida's students have the opportunity to gain advanced skills and knowledge to find meaningful work and enjoy productive careers.

On the heels of that historic executive order, the Florida Legislature enhanced statutes governing registered apprenticeship with the passage of House Bill 7071. It included a provision that, by September 1 of each year, the FDOE publish an annual report on key fiscal, enrollment and programmatic aspects of Florida's registered apprenticeship and preapprenticeship programs. This report provides a retrospective look at the 2018-2019 program year and details key accomplishments related to participation and outcomes and federal and state investments in registered apprenticeship and preapprenticeship programs.

An Overview of Registered Apprenticeship and Preapprenticeship in Florida

Registered Apprenticeship

Registered Apprenticeship is an employer-driven, on-the-job workforce educational training program that connects job seekers looking to learn new skills and career opportunities with employers looking to create a pipeline of highly skilled individuals for their workforce. Through the implementation of a registered apprenticeship training and education model, employers can apply nationally recognized industry standards for apprentices, resulting in increased productivity, improving the quality of their workforce, retention of company knowledge, and reduction in turnover.

The key components of a Florida registered apprenticeship program are as follows:

- Registration of program standards of apprenticeship with the FDOE for federal purposes;
- Business Involvement – employers are the foundation of every Florida-registered apprenticeship program;
- Structured on-the-job training (OJT) - Apprentices receive OJT from an experienced journeyworker/mentor;
- Related technical instruction (RTI) - Apprentices combine OJT learning with RTI at Florida College System (FCS) institutions, school district technical colleges, apprenticeship training schools, union training facilities, or at the employer's facility and can be delivered in a classroom, on-line, correspondence, or any combination thereof;
- Guaranteed wage structure – Apprentices receive increases in wages as their skill levels and knowledge increase;

- Nationally recognized occupational credential – The successful completion of a registered apprenticeship program results in a nationally recognized credential issued by the FDOE, which confirms for potential future employers that the apprentice is fully qualified for the job; and
- Apprentices who complete a Florida-registered apprenticeship program may be accepted by their respective industry as a journey worker.

The key roles of those participating in a registered apprenticeship program are clearly defined and consist of the following:

Program sponsors – Sponsors are responsible for the administration of all aspects of a registered apprenticeship program. This can include, but is not limited to: administrative, outreach, education liaison, registrar, records management, apprenticeship committee administrator, compliance and quality assurance, complaints, etc. The following are examples of entities that may serve in the role of a program sponsor:

- Single employer;
- Trade association;
- Group of employers;
- Local workforce board;
- A public or private education provider;
- Community or faith-based organization; or
- Any other entity that complies with federal and state regulations.

Employers - These are the drivers of registered apprenticeship and are actively engaged by and through its own employees in the actual work of the occupation being apprenticed. The responsibility to hire, employ, and pay the progressive wage structure of the apprentice and the wages of the journeyworker/mentor training the apprentice rests with the employer. Employers also determine how the required RTI will be delivered and by whom. For some employers, starting a registered apprenticeship program may not be the best option. Instead, it may make sense to join an existing registered apprenticeship program as a participating employer. All it takes is for an employer to execute a single-page “Participating Employer Agreement” with the program sponsor and agree to abide by the training expectations set by the program sponsor for the apprentices. Participating employers benefit because all the paperwork and administrative duties are taken care of by the program sponsor. To become a participating employer in an existing registered apprenticeship program, employers should contact the apprenticeship training representative in their region for additional information and help determine which registered apprenticeship program best fits their particular occupation and training needs. (See the *FDOE Resource Summary for Registered Apprenticeship* section for more information on assistance and support provided by the FDOE.)

Apprentices - These are individuals who are at least 16 years of age and who have entered into an apprenticeship agreement with a registered apprenticeship sponsor. They are a hired employee of the participating employer in an “earn while you learn” model and engaged in learning the apprenticeable occupation through actual supervised work experience.

Apprentices enjoy the benefit of obtaining tangible, marketable skills through the tutelage of qualified journeyworkers/mentors in their field and working for an employer who has already invested in their success.

Every apprenticeship program registered with the FDOE is automatically recognized by the U.S. Department of Labor (USDOL) for federal purposes. This provides apprentices with credibility and marketability when they successfully complete their registered apprenticeship program from a nationally recognized program with a nationally recognized credential. This also gives registered apprentices the opportunity for mobility. According to the USDOL, Florida is ranked 10th amongst all the states and territories for the number of new apprentices, 13th for the total number of apprentices, and 15th for the number of successful completers.

Registered Preapprenticeship

Preapprenticeship is designed to prepare individuals to enter and succeed in a registered apprenticeship program. These programs promote a diverse and skilled workforce and prepare participants to meet the basic qualifications for entry into a registered apprenticeship program, through:

- An approved training curriculum based on industry standards,
- Academic and technical instruction and career services,
- Hands-on training in a simulated lab experience or through volunteer opportunities, and
- Assistance in applying to registered apprenticeship programs.

Registered preapprenticeship is authorized in section 446.052 Florida Statutes and Rule 6A-23.010, Florida Administrative Code and defined as an organized program of instruction offered in a public school system or elsewhere and is designed to prepare a person 16 years of age or older to become an apprentice. Preapprenticeship programs are registered with the FDOE and sponsored by a registered apprenticeship program. The program sponsors determine the length and breadth of knowledge needed to properly prepare individuals for becoming apprentices. Some programs incorporate OJT into the program while others focus on RTI delivered in a classroom or laboratory setting. These programs function as a pathway into registered apprenticeship. (See the *Pathways to Apprenticeship* section.)

Management and Oversight of Registered Apprenticeship and Preapprenticeship

The USDOL recognizes the FDOE as the authorized registration agency of apprenticeship programs and apprentices for federal purposes as found in Federal Regulation 29-CFR-29.13 – *Recognition of State Apprenticeship Agencies*. The Division of Career and Adult Education, Apprenticeship Section oversees the day-to-day management of Florida’s registered apprenticeship programs in compliance with federal regulations 29-CFR Part-29 - *Labor*

Standards for The Registration of Apprenticeship Programs, and 29-CFR Part-30 - Equal Employment Opportunity In Apprenticeship, as well as sections 446.011-092, Florida Statutes, and Rules 6A.23-001-011, Florida Administrative Codes.

The USDOL does not oversee preapprenticeship programs. Therefore, the FDOE is the authorized registration agency for registering, servicing, and providing technical assistance for preapprenticeship programs and preapprentices in Florida.

Current Program Status and Outcomes

As Florida's economy has strengthened over the past several years, the number of registered apprentices and programs has dramatically increased. Between July 1, 2018 and June 30, 2019, the FDOE had 228 registered apprenticeship programs and 15,721 active apprentices during this same period¹. Between July 1, 2018 through June 30, 2019, 1,699 apprentices successfully completed their respective programs. Currently, there are over 4,500 participating employers training in 568 apprenticeable occupations.

Although white individuals make up the largest proportion of registered apprentices (54%), Hispanic and African American individuals comprise a sizeable portion of total registered apprentices participating in registered apprenticeship programs (43%).

Individuals participating in a registered apprenticeship program have an opportunity to attain a career in a profession that pays well throughout the registered apprenticeship process and even better upon successful completion. According to research conducted by USDOL, some registered apprenticeship completers enter a career and may begin earning an average salary of more than \$50,000 – in addition to potentially avoiding student loan debt.

Registered apprentices are set up with an excellent foundation to succeed and grow within their chosen careers in the future. It truly is a win-win situation for both the participating employers and the registered apprentices who choose to participate in a Florida-registered apprenticeship program.

Partnerships between Registered Apprenticeship Programs and Florida's Public Educational Providers

Many registered apprenticeship programs partner with school districts and FCS institutions to provide the RTI for their programs. It is important to understand that it is not a requirement for registered apprenticeship and preapprenticeship programs to partner with a public educational provider to deliver RTI. (See *Florida's Apprenticeship and Preapprenticeship Participation and Outcomes* section and Appendix D for additional information.)

¹ Based on data reported in the U.S. Department of Labor RAPIDS Registration system. This number includes apprentices who were active in the year but exited before June 30, 2019. See Appendix E-2 for detailed information.

Pathways into Apprenticeship

The most common pipeline of individuals into registered apprenticeship is through recruitment and outreach campaigns conducted by existing registered apprenticeship program sponsors, both joint (those who engage in collective bargaining) and non-joint (those who do not engage in collective bargaining) programs. Pathways into registered apprenticeship predominately include educational institutions, local workforce boards, and preapprenticeship programs. The preapprenticeship pathway model affords an individual the best opportunity to move into a registered apprenticeship program. Preapprenticeship programs are specifically designed and developed to provide additional workforce readiness skills for individuals who need additional skillsets in order to qualify and be selected into a registered apprenticeship program. Individuals who successfully complete a registered preapprenticeship program earn a preapprenticeship certificate issued by the FDOE and are afforded the same consideration as a military veteran during the registered apprenticeship program selection process. Registered preapprenticeship programs can be no less than six (6) months and no more than twenty-four (24) months in length.

In order to maintain a clear pathway from preapprenticeship to apprenticeship, all registered preapprenticeship programs must be sponsored by one or more registered apprenticeship programs in the same occupations. The minimum age to participate in a registered preapprenticeship program is 16 years of age. Registered preapprenticeship programs can be designed for high school students (typically juniors and seniors), out-of-school youth (ages 16 – 24), and adult (ages 25 and up).

In order to enhance pathways into apprenticeship, the FDOE created two new high school programs with associated courses (High School Apprenticeship and High School Preapprenticeship) in response to legislation that passed in 2018. These programs can be offered by any school district to high school students if they qualify for entry into a registered apprenticeship or preapprenticeship program. School districts enrolling students using either of these programs must ensure that the students and parents are fully aware of any and all federal and state regulations related to registered apprenticeship and preapprenticeship requirements. Students who complete courses in either program receive credit to satisfy the electives credit requirement for a standard high school diploma. The most recent program descriptions for the 2019-2020 school year may be accessed [here](#).

Key Initiatives in 2018-2019

The FDOE has been focused in the past year on initiatives to promote the value of registered apprenticeship, expand registered apprenticeship and preapprenticeship opportunities, and streamline the approval process for entities seeking to create new programs. In addition, barriers to registered apprenticeship in certain occupational areas were removed with the

passage of House Bill 7071. The following achievements represent the results of this focus on registered apprenticeship and preapprenticeship.

Reducing Barriers and Bureaucracy

The FDOE has reduced barriers to starting new registered apprenticeship and preapprenticeship programs by streamlining the approval process for programs. By reducing barriers and eliminating unnecessary bureaucratic processes, it is now easier and more efficient to register a program.

In the past, the department, on average, registered seven to nine new apprenticeship programs per year, with an average of nine to 12 months to complete the process. In 2018-2019, the Apprenticeship Section registered 24 new programs with an average registration time of three weeks. Some strategies that contributed to this improvement include the use of electronic documentation, elimination of redundant paperwork, and redesign of the Florida Standards of Apprenticeship documents to incorporate multiple occupations easier. Additionally, the Apprenticeship Section team provides extensive technical support to employers who are interested in starting a new program. Understanding the time constraints placed upon employers, works steadfastly to assist the employer with a seamless process, the success of which is evidenced by the metrics-based outcomes.

Diversification and Expansion in Non-Traditional Industry Sectors

The recent growth of registered apprenticeship includes the diversification and expansion into non-traditional industry sectors such as healthcare, manufacturing, aviation, and information technology that have typically not embraced registered apprenticeship as a viable workforce education solution. These sectors are now represented and serving as a model for other Florida employers. The following new programs represent the results of these ground-breaking efforts:

- CVS Pharmacy - The first statewide expansion of a registered apprenticeship program in the healthcare sector with the occupation of Lead Pharmacy Technician at CVS pharmacies throughout the state.
- Avocet Aviation (Orlando) - Florida's first Airframe and Powerplant Technician registered apprenticeship program, which has also been recognized by the Federal Aviation Administration.
- Sunshine Boats and Motors (Tallahassee) - The first Marine Service Technician registered apprenticeship program. Upon successful completion of the program, apprentices will receive a certificate of completion from the FDOE based on successful mastery of Yamaha's National Guidelines Standards.
- Piper Aircraft (Vero Beach) - In order to meet their specific workforce needs, Piper Aircraft developed one of the first cross-functional apprenticeable occupations (Aircraft Structure, Surfaces, Rigging, and Systems Assemblers) in Florida. In year one, apprentices receive foundational training in three manufacturing disciplines: CNC machining, sheet metal

fabrication, and mechatronics. During year two, apprentices identify one of the three manufacturing disciplines in which they receive advanced specialized training and instruction.

- Lively Technical College (Tallahassee) - The second Florida school district technical college to register as a sponsor, Lively Technical College, is operated by Leon County Public Schools and is a shining example of a public education provider championing the registered apprenticeship training model in their local community. The technical college serves as the program sponsor and administers the program on behalf of its participating employer partners (a local automotive dealership and a local technology firm). The occupations the apprentices are training for are Senior IT Network Consultant with 14 potential industry certifications structured within program, and Automotive Service Mechanic, including nine Automotive Service Excellence (ASE) industry certifications.
- Broward College (Fort Lauderdale) - Broward College became the third FCS institution to register as a program sponsor. Its participating employer partners include Wheelhouse IT and Hotwire Communications. The apprenticeable occupations include Information Technology Specialist and Telecommunications Technician.

Advancement efforts to diversify and expand registered apprenticeship were strengthened during the 2019 legislative session with the passage of House Bill 7071, which removed long-standing occupational prohibitions that restricted apprenticeship for occupations in three areas:

- 1) Selling, retailing, or similar occupations in the distributive field;
- 2) Managerial occupations; and
- 3) Professional and scientific vocations for which entrance requirements customarily require an academic degree.

The removal of these barriers is significant in that it opened doors for many more industries and occupations that can employ and use the registered apprenticeship training model to recruit, train, and retain a skilled workforce.

Integration into Florida's Workforce Development System

For the past three years, FDOE has worked closely with CareerSource Florida, Inc. (the state's Workforce Development Board) and the Department of Economic Opportunity to promote, expand and diversify registered apprenticeship. In February 2019, the CareerSource Florida Board of Directors adopted strategic policy 2019.02.13.A.1 that recognized registered apprenticeship as one of two viable sector strategies. The policy applies to CareerSource Florida, the Department of Economic Opportunity and all 24 local workforce development boards. As such, local workforce development boards are required to describe their approach to establishing, implementing and sustaining effective sector strategies, including registered apprenticeship expansion opportunities, in their local workforce development plans and should identify opportunities for new or expanded registered apprenticeships in targeted sectors.

Another highlight resulting from this partnership is the lead role local workforce development boards are taking by serving as a registered apprenticeship program sponsor on behalf of a group of local participating employers. This model will likely expand in the 2019-2020 year as it is replicated around the state.

State and Federal Grant Support for Program Development and Expansion

Executive Order 19-31 included a directive to the Commissioner of Education to secure \$10 million for the *Pathways to Career Opportunities Grant*. Thanks to the support of the Florida Legislature, the funding was allocated, and the Department will select proposals from high schools, school district career centers, charter technical career centers, FCS institutions, and other entities authorized to sponsor programs. Funds must be used for the creation of new or expansion of existing Florida registered apprenticeship or Florida registered preapprenticeship programs.

On May 3rd, 2019, USDOL announced the availability of funding for the Apprenticeship State Expansion grant program. Florida was awarded \$3,078,257, with a 36-month period of performance to commence July 1, 2019. These funds will be used to achieve the following goals:

1. Support the expansion of new and existing registered apprenticeship programs in all industry sectors;
2. Support the expansion of new registered apprentices in all registered apprenticeship programs;
3. Support and strongly encourage the diversity of registered apprentices from traditionally underrepresented populations (women, minorities, disabled, veterans, etc.) in new or expanding registered apprenticeship programs; and
4. Continue to build on previous successes with state partners such as CareerSource Florida, Department of Economic Opportunity, or any other Florida state agency in developing education and economic development strategies to ensure that the Florida registered apprenticeship system is a viable career path for Florida's citizens, as well as a valuable workforce development strategy for employers.

These new state and federal funds will help to expand opportunities for registered apprenticeship training for Floridians and provide a financial boost to help fill the demand for skilled workers for Florida's economy.

FDOE Resource Summary for Registered Apprenticeship

State Capacity and Structure

The Apprenticeship Section is comprised of eight positions, which are funded annually through the General Appropriations Act and then apportioned within the FDOE to fund the operation (salaries and expenses) of the Apprenticeship Section. Staff are located in Tallahassee and

strategically throughout the state to better serve current and future programs at a local level. The state director, government operations consultant I, and apprenticeship and training representative (ATR) that services Region 1B (ranging from Leon County to Escambia County) are based in Tallahassee at FDOE headquarters. The state is divided into six geographic regions with a local ATR who is responsible for the day-to-day management of servicing and providing technical assistance for existing apprenticeship and preapprenticeship programs, registration of new apprenticeship and preapprenticeship programs, as well as registration, completion and on occasion, cancellation of programs and apprentices in the USDOL Registered Apprenticeship Program Information Data System (RAPIDS). See **Appendix A** for state and regional program contact information for the Apprenticeship Section team.

Onboarding and Technical Support

The mission of Florida’s Apprenticeship Section is to advance registered apprenticeship and preapprenticeship as a workforce solution strategy. The regional ATRs function as a one-stop source for all-things apprenticeship—from assisting with basic inquiries to helping with new program creation to running a program – all requests are addressed and supported in each of the six regions. As a result, the team is ready to help potential program sponsors navigate the national and Florida-registered apprenticeship systems.

Since Florida’s registered apprenticeship and preapprenticeship programs serve both program sponsors and individuals participating in a program, the information and resources must be customized based on the roles of those participating in a registered program. Employers or other potentially eligible sponsors are looking for information on how to be involved in the registered apprenticeship system. Individuals are interested in potential employment opportunities. Sponsoring a registered apprenticeship or preapprenticeship program starts with a phone call or an e-mail inquiry to the Apprenticeship Section office in Tallahassee or through any one of the six regional ATR’s.

Recruitment and Outreach Efforts

All of the ATRs work, in varying capacities, with local workforce boards, community partners, veterans’ advocacy groups and with public and private education providers to bring awareness about registered apprenticeship and preapprenticeship programs. A large part of the responsibilities of the ATRs is to conduct and participate in various recruitment and outreach activities. These can range from presenting to groups of employers, participating in job fairs, providing information to local workforce boards, attending graduation and completion ceremonies, speaking at various annual conferences, etc. Emphasis is placed upon outreach efforts to attract diverse apprenticeship candidates from traditionally underrepresented populations (women, veterans, minorities, persons with disabilities) in order to help employers reach a larger and more diverse pool of candidates.

A further enhancement to existing recruitment and outreach efforts was created during the 2019 legislative session with the passage of House Bill 7071, requiring the FDOE to provide assistance to district school boards, FCS institution boards of trustees, program sponsors, and local workforce development boards in notifying students, parents, and members of the community of the availability of apprenticeship and preapprenticeship opportunities, including data provided in the economic security report pursuant to section 445.07. 260 (4)(2) Florida Statute. See **Appendix B** for a summary by region of the specific outreach activities and events conducted in 2018-2019.

Florida's Apprenticeship and Preapprenticeship Participation and Outcomes

The following provides an at-a-glance summary of the 2018-2019 activity in registered apprenticeship and preapprenticeship programs with detailed information provided in the appendices section.

Registered Programs and Public Educational Partnerships

In 2018-2019,² FDOE had a total of 259 registered programs, of which 228 were registered apprenticeship programs and 31 were registered preapprenticeship programs. **Appendix D** is a registry of these programs and any affiliated partnerships with school districts or FCS institutions. The table is sorted by the educational provider of the RTI if applicable. The term educational provider is synonymous with the term local education agency (LEA), as used in **Appendix D**.

For the 259 registered programs with a registration at any time during the year:

- 115 programs were partnered with a school district or FCS institution for the RTI, 44% of total registered programs;
- 93 programs partnered exclusively with school districts for the RTI, 36% of total registered programs;
- 15 programs partnered exclusively with FCS institutions for the RTI, 6% of total registered programs; and
- 7 programs partnered with both school districts and FCS institutions for the RTI, 3% of total registered programs.

Program Participation

There are two methods for collection of statewide data by trade and occupation available for registered apprenticeship and preapprenticeship. The first method considers when registered apprenticeship and preapprenticeship is offered in partnership with a school district or FCS institution for RTI, the enrollment activity is reported to the FDOE for accountability and

² From July 1, 2018 to June 30, 2019

funding purposes by program.³ **Appendix E-1** provides enrollment by program for 2018-2019. The programs with the most enrollment was the following:

- Electrician
- Plumbing Technology
- Air Conditioning, Refrigeration and Heating Technology
- Early Childhood Education
- Preapprenticeships training for construction-related occupations

These programs represent seventy percent of total program enrollment. The limitation of this data source is that it does not capture all participation in registered apprenticeship and preapprenticeship, where the program sponsor is providing all of the RTI.

The second method of capturing program participation is to look at all apprentices registered in the program over a period of time. **Appendix E-2** provides the number of registered apprentices participating by trade and occupation. Between July 1, 2018 and June 30, 2019, there were 15,721 active apprentices in registered programs. This data does not include preapprenticeship information which is not captured in the federal data system (RAPIDS). Total preapprenticeship program participation, where RTI is being provided by the program sponsor, is only available through supplemental data collection and is not reported by trade and occupation. The occupations with the most associated registered apprenticeships was the following:

- Electrician
- Plumber & Pipe Fitter
- Heating & Air Conditioning Mechanic & Installer
- Child Care Development Specialist
- Elevator Constructor

These occupations represent seventy-five % of total participation in registered apprenticeship.

Program Outcomes

During the 2018-2019 program year, 1,699 apprentices completed their program and received an apprenticeship certificate. Of those completing, 855 apprentices (50.3%) completed their program during the appropriate timeframe.

In 2018-2019, there were 885 preapprentices who exited their programs. Of those, 600 completed the program for a 68% completion rate. Information on whether the preapprentice completed on-time was not available for the reporting year.

State Investments in Registered Apprenticeship and Preapprenticeship Training

³ Program names are based on occupations.

Workforce education programs are defined in Florida Statutes to include registered apprenticeship and preapprenticeship programs as defined in s. 446.021.⁴ This provides school districts and FCS institutions authority to offer registered apprenticeship through their educational programs and to spend their state operating funds for the support of these programs.

School district operating funds are provided to 57 districts in the General Appropriations Act through the Workforce Development Funds category. FCS institution operating funds are provided annually to 28 colleges in the FCS Program fund category. Unlike other postsecondary programs, students participating in registered apprenticeship training through a district or FCS institution are exempt from the payment of tuition and fees for the RTI component of their registered apprenticeship program.⁵ The operating funds provided to district and FCS institutions may be used for the support of registered apprenticeship, but this is not a required expenditure of funds. As such, districts and colleges are not allocated a specific amount of funds that must be spent for the support of this type of program. Based on local demands and current resources, districts and college will enter into local agreements with the registered apprenticeship program sponsor. These agreements are not standardized statewide and will reflect the contributions of the district or college and the program sponsor toward the costs of supporting the program.

If a school district or FCS institution partners for the registered apprenticeship program, they are mandated to report the total amount of funds expended for that program in their annual cost reports. **Appendix C** provides the most recently available financial data on expenditures for registered apprenticeship and preapprenticeship programs for the 2017-2018 fiscal year. The total state expenditures for both school districts and FCS institutions was about \$22.8 million.

Conclusion: The Value of Apprenticeship and Preapprenticeship

The Value for Employers

Registered apprenticeship and preapprenticeship helps Florida employers develop highly-skilled employees. This training method is associated with a reduction turnover rates and associated costs, increased productivity and lower costs of recruitment.

Additional benefits include:

- **Customized training** that meets industry standards, tailored to the specific needs of employers, resulting in highly-skilled employees.
- **Increased knowledge** transfer through OJT from an experienced journeyworker/mentor, combined with RTI courses to support work-based learning.
- **Enhanced employee retention:** According to the USDOL, approximately 91% of apprentices that complete a registered apprenticeship program are still employed nine months later.

⁴ s. 1011.80(1), F.S.

⁵ s. 1009.25(1(b)), F.S.

- **A safer workplace** that may reduce worker compensation costs, due to the program's emphasis on safety training.
- **A stable and reliable pipeline** of qualified workers.
- **A systematic approach to training** that ensures employees are trained and certified to produce at the highest skill levels required for the occupation.

The Value for Apprentices and Preapprentices

Registered apprenticeship and preapprenticeship helps individuals seeking employment and training the opportunity to participate in a structured training program. Registered preapprentices have a pathway into registered apprenticeship and have received academic and technical instruction and in some cases, OJT making them highly competitive. Registered apprentices earn a paycheck from day one on the job that is guaranteed to increase as their training progresses. Registered apprentices also complete a combination of job-related instruction and hands-on training at the job site leading to a nationally-recognized, portable credential. Other benefits include:

Hands-on career training: Apprentices receive practical on-the-job training in a wide variety of occupations and industries, such as health care, construction, information technology, transportation, energy, and advanced manufacturing.

An education: Apprentices receive hands-on training resulting in improved skills and competencies as well as the potential to earn postsecondary credit toward a certificate or degree.

A career: Once the apprenticeship is complete, workers are on their way to a successful long-term career with a competitive salary and little or no student loan debt.

National credential: When an apprentice graduates from a registered program, he or she earns a certified portable credential accepted by industries and employers across the U.S.

The Value to the Workforce System

Connecting registered apprenticeship and preapprenticeship to Florida's state and local workforce systems is a win-win partnership. The strategy helps Florida employers thrive by building a highly-skilled, highly-productive workforce, and it helps job seekers access and maintain stable careers with good wages.

By using registered apprenticeship as a talent development strategy, the workforce system can increase worker skills, meet employer needs, and enhance performance outcomes. Additionally, under the Workforce Innovation and Opportunity Act of 2014, registered apprenticeship is identified as a training strategy to assist individuals with barriers to employment. As such, registered apprenticeship programs are given automatic approval status

on a local workforce development board's eligible training provider list. Registered apprenticeship contributes to positive outcomes in the state and local workforce development system's WIOA performance measures:

Employment: Registered apprenticeship is a job. All registered apprentices enter employment with guaranteed wages when they begin an apprenticeship program.

Retention: Registered apprenticeship programs have high retention rates.

Earnings: Apprentices have progressive wage increases as they advance in skills and knowledge in the program

Credential Attainment: All registered apprenticeship graduates earn a national, industry-recognized credential.

In summary, the value of registered apprenticeship and preapprenticeship to Florida's employers, individuals seeking employment, the workforce development system and the economy cannot be overstated. It is an industry-driven, high quality career pathway where employers can develop and prepare their future workforce, and individuals can obtain paid work experience, classroom instruction and a portable, nationally-recognized credential of value.

Map of Apprenticeship Regions and Corresponding Counties

APPENDIX B

State Apprenticeship Program Activities Overview

The following activities were conducted by the FDOE Apprenticeship Section team responsible for the administration of registered apprenticeship and preapprenticeship programs in Florida during the 2018-19 program year.

Region 1A

- NE Florida Economic Development Roundtable – Strengthening Career Pathways Resource Fair
- College of Central Florida – 2018 Marion County Public Schools Careers & Colleges Expo
- Clay High School – 2018 Clay County College & Career Night
- CareerSource Northeast – Paycheck for Patriots Hiring Event/Fair
- North East Florida Builders Association – Pre-Apprenticeship Kick-Off event / National Apprenticeship Week
- Junior Achievement of North Florida – Ribault High School Career Fair
- Philip Randolph Academies Pre-apprenticeship – Construction academy advisory meeting
- Jacksonville Plumbers and Pipefitters JATT – 3rd Annual Union Career Fair
- Florida Youth Challenge Academy – 2018 College & Career Fair
- 70th Annual JGAA Graduation – Attended and participated in the nation’s largest and longest continuously running Apprenticeship Graduation and Awards Ceremony

Region 1B

- Leon Works – 2018 Annual College & Career Fair for all Leon County High Schools
- North West Florida Construction Career Day
- CareerSource Escarosa – Board Meetings
- CareerSource Okaloosa-Walton – Board Meetings and staff presentations
- CareerSource Gulf Coast – Board Meetings and staff presentations
- CareerSource Chipola – Board Meetings and staff presentations
- CareerSource Capital – Board Meetings and staff presentations
- Godby High School – Presentation on welding apprenticeship opportunities
- ACE Leon County – Presentation to adult high school students
- Vocational Rehabilitation – Fort Walton office meeting and presentation
- Big Bend Human Resource Management Conference – Exhibit booth
- Office of Indian Affairs – Meeting and presentation
- Minority Chamber of Commerce – Meeting and presentation

Region 2

- Orange County Public Schools – Implement Roofing Apprenticeship in various Orange County high schools
- CareerSource Central Florida – Meeting and presentation
- Orange County Public Schools – Presentation to high school seniors
- Northrup Grumman – Meeting and presentation
- ESSEI Conference – Presentation and break-out
- Orange County Public Schools – Presentation to high school counselors.
- FAAA Conference – Guest speaker
- Lockheed Martin and Orange County Public Schools – Meeting and presentation
- Guidance Counselors of Central Florida – Meeting and presentation
- Construction Career Days - Presentation

- 2019 STEM Expo - Presentation
- 2019 Job Fair Central Florida High Schools – Exhibit booth and presentation
- Osceola County Public Schools - High School Job Fair
- 2019 Apprenticeship Day on the Hill – Exhibit booth
- Orange County Technical College Directors – Information meeting and presentation
- Wildwood Florida Machinists – Meeting and presentation
- CareerSource Brevard – Information meeting and presentation
- Florida Apprenticeship Administrators Conference – Guest speaker, presenter
- Space Coast Consortium Apprenticeship Program – Signing Ceremony with Governor

Region 3

- Our Mothers House – Meeting and presentation
- Manufacturing Summit at Valuepak – Part of National Apprenticeship Week, presentation and panel
- CareerSource Suncoast – PGT Career Day, Presentation
- Career Edge Manufacturing Collaborative Summit – Presentation on starting apprenticeship program
- Forum on Engineering Technology – Presentation
- Farmworker Career Development Advisory Committee – PreApprenticeship presentation
- Hillsborough County Public Schools’ Career Counselor In-Service – Presentation, “The Apprenticeship Alternative”
- Florida Swimming Pool Association – Meeting and presentation
- Manasota PHCC Plumbing Graduation – Presentation and Ceremony
- American Mold Incorporated – Meeting and presentation
- Service Contracting Solutions – Meeting and presentation
- Toyota Dealers Association – Meeting and presentation
- Second Chance Tiny Homes – Apprenticeship presentation (second chance offenders program)
- RND CareerSource Business Development – Automation, presentation
- ABC Orientation at Suncoast Technical College – Presentation at orientation
- ACF Culinary endorsement meeting – ACF affiliation review

Region 4

- Miami-Dade County Public Schools – Career Day
- Innovative Holistic Public Housing – Meeting and presentation
- Florida Department of Veterans Affairs – Veterans Job Fair
- Miami Job Corp – Meeting and presentation
- CareerSource Florida – Apprenticeship Summit
- Marine Industries Association of South Florida – Joint meeting with Region 5 and Atlantic Tech College
- CareerSource Research Coast – Meetings and presentation regarding CVS Pharmacy Tech program
- Gang Alternative – Meetings and presentation

Region 5

- CareerSource Broward – Meeting and presentation
- The Idea, Inc. – Informational meeting
- Stemtide Solutions – Meeting and presentation at FAU

- Al Hendrick Toyota – Informational meeting
- Cooper City High School – Job Fair
- Broward College – Meeting and presentation
- Coast Line Marine – Informational meeting
- City of Miramar – Meeting and presentation
- Marine Industries Association of South Florida – Joint meeting with Region 4 and Atlantic Tech College
- Broward Housing & Community Development Task Summit – Meeting and presentation
- CareerSource Broward – Job Fair
- National Apprenticeship Week Activities – ABC Institute, Atlantic Technical College

Appendix C

Summary of Fiscal Information for Registered Apprenticeship Programs in School Districts and Florida College System (FCS) Institutions, 2017-18

Type of Agency	Agency Name	Total Costs ¹	Instructional Costs ²	Administrative Costs ³
District	Broward	\$ 1,472,645	\$ 1,450,394	\$ 22,251
District	Collier	15,731	15,570	161
District	Escambia	77,619	73,399	4,220
District	Flagler	213,168	183,110	30,058
District	Hillsborough	3,201,390	3,153,584	47,806
District	Lee	72,545	68,260	4,285

FCS	Seminole State College	835,052	694,813	140,239
FCS	South Florida State College	94,345	72,352	21,993
DISTRICT TOTAL		\$ 16,206,194	\$ 15,446,636	\$ 759,558
FCS TOTAL		\$ 6,593,773	\$ 5,574,125	\$ 1,019,648
STATE TOTAL		\$ 22,799,967	\$ 21,020,761	\$ 1,779,206

Notes:

Source for district data is the annual cost report and for colleges is the annual cost analysis (detailed reports).

¹ District total costs are total program costs. College total costs are total instruction costs.

² District Instructional costs are the sum of direct costs and school costs. College instructional costs are the sum of total direct instruction and allocated instructional support costs.

³ District administrative costs are district indirect costs. College administrative costs are collegewide instructional support costs.
