ALLEN & COMPANY LLC

What is computer science?

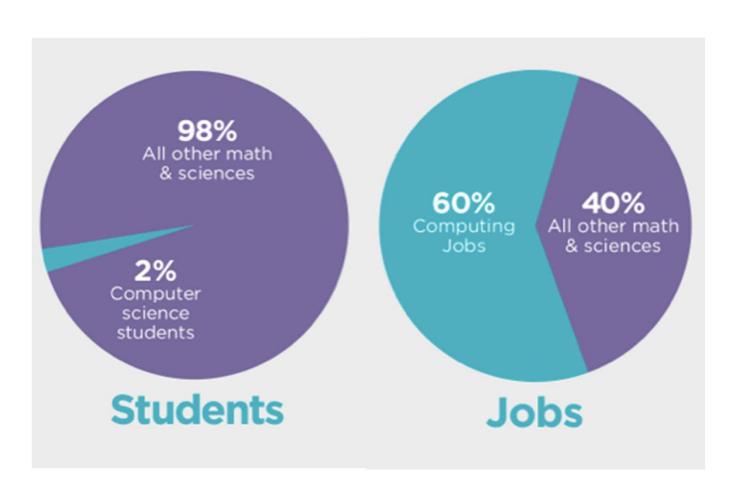

These jobs are in every state, in every industry.

Only 1/3 of these jobs are at tech companies. The rest are in banking, manufacturing, government, retail, etc

The most important thing to remember from today:

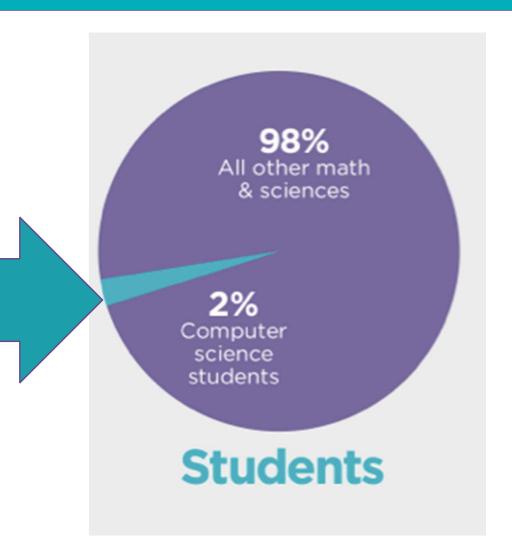

Why are there so few students in computer science?

Because 90% of schools don't even teach it!!

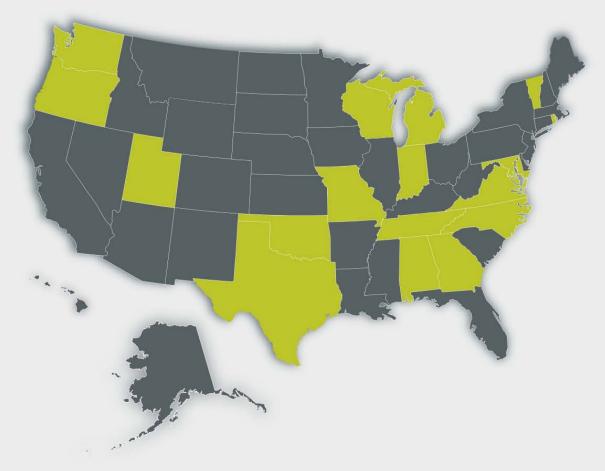

Of this tiny sliver, only 15% are women.

Only 8% are Hispanic Americans or African Americans.

Computer science in America

in 33 of 50 states, computer science doesn't even count towards high school graduation math or science requirements.

Computer Science in FL

20,384 open computing jobs (growing 3.6x state average)

1,833 computer science graduates (BA or better)

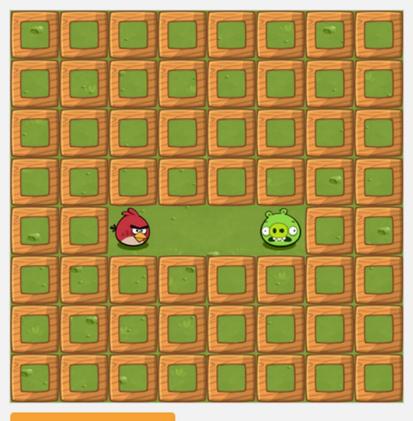

125 schools teach computer science (K-12)

1,521 students took AP Computer Science in 2013. 306 were girls. 83 African American. 269 Hispanic American

Can our students learn this? Can our teachers teach it?

(Why not focus on basic math which we're already failing at?)

The Hour of Code 2013

Kicked off by President Obama, House Majority Leader Eric Cantor, Senator Cory Booker, and Newt Gingrich

- 20 million students participated, worldwide
- 17 million in the USA
- 1 of every 4 K-12 students in US schools
- Half were girls
- Broward County was the largest participant

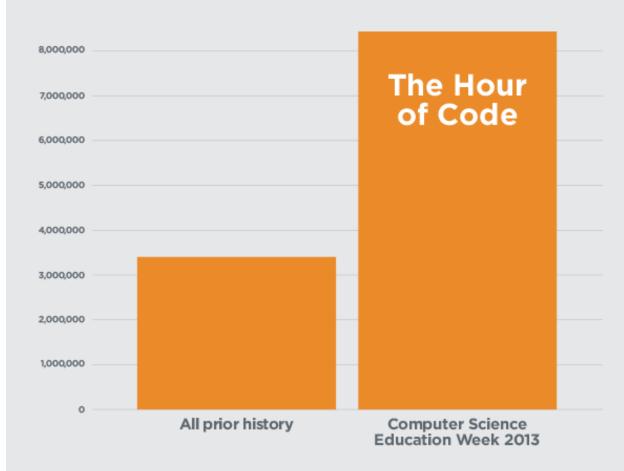

To put this into context:

Program	Students
College Board AP Computer Science exam	32,000
College Board AP Calculus	256,000
US First Robotics clubs	350,000
College Board – ALL STEM categories	1,280,000
Math SAT exam	1,700,000
Hour of Code (US participants)	17,000,000

In 7 days...

#HourOfCode

More students tried computer science in US schools in one week than in all prior history.

I need to say thank you. My nine year old struggles with math and reading because of dyslexia. She thinks she isn't smart, no matter what we tell her or her teachers tell her. During the hour of code, she was sure she'd fail. But she didn't! She not only flew through the first hour, she has chosen to continue on and do your K-8 programand is LOVING it! She is learning sequencing, if/then and other fantastic concepts that kids with visual processing issues often struggle with. From the bottom of my heart, thank you!

convos are crazy: i in so doing this more often, #nourOfCode

Expanding CS in Florida

- Partnership with Broward County School District
 - 25 High Schools, 25 Middle Schools in pilot
- Our Program
 - **K-8**
 - K-2 and 3-5 blended learning 20-hour lesson sets
 - Middle School courses aligned to Common Core Math and Next Generation Science Standards
 - 9-12
 - Exploring Computer Science
 - AP Computer Science Principles*
- All teacher stipends paid by Code.org

What can Florida do?

- Make CS count toward core HS graduation credits
 - In 2013, AL, MD, TN, WA & WI changed policy to make it count
- Clarify CS curriculum standards
- Implement clear certification pathways for CS teachers
- Allocate appropriate funding for rigorous CS courses
- Establish position in FL DOE to oversee CS & support districts

Thank you
