Fast Facts Student Success Series # 2007-06 Dual Enrollment Penetration Study

Jeanine Blomberg, Commissioner

July, 2007

Topic: A comparison of the Dual Enrollment penetration rates for White, African American, and Hispanic students is one way to measure a college's effectiveness in attracting Dual Enrollment students across racial/ethnic groups.

Methodology: A simple penetration rate was calculated for White, African American, and Hispanic students using the 2005-06 Dual Enrollment student headcount as the numerator and the fall 2005 public school student enrollment in grades 11 and 12 as the denominator.

Highlights at the State Level:

- Systemwide, the overall Dual Enrollment penetration rate was 9.69% in 2005-06. This means that
 the number of Dual Enrollment students in 2005-06 represents nearly 10% of the 11th and 12th
 grade public school population.
- There are substantial differences in the systemwide penetration rates by race/ethnicity.
 - a) The Dual Enrollment penetration rate for White students was 13.56%,
 - b) The Dual Enrollment penetration for African Americans was 3.70%, and
 - c) The Dual Enrollment penetration for Hispanics was 4.80%.

Highlights at the Institution Level:

- There are substantial differences in overall Dual Enrollment penetration rates among the colleges, ranging from a low of 3.5% to a high of 49%. There are similar variations among colleges for penetration rates by race/ethnicity.
- At each community college, the Dual Enrollment penetration rate for African American students is less than the Dual Enrollment penetration rate for White students.
- For 27 of the colleges, the Dual Enrollment penetration rate for Hispanic students is less the Dual Enrollment penetration rate for White students.

Strategies to Consider:

- Meet with district staff and high school administrators to inform them about the advantages of the program and to provide them with data about the program.
- Dual Enrollment should be addressed in the inter-institutional articulation agreement which should include the new Statement of Standards of Rigor for Dual Enrollment/Early College.
- Colleges should provide feedback to districts about student success in Dual Enrollment. See Fast Facts #79.
- Make sure private school and home-school students as well as public school students are aware of the Dual Enrollment program.

DENOMINATOR=Public school membership by race/ethnicity in grades 11 and 12, Fall 2005, Education Information and Accountability Services

Information Necessary to Replicate Data:

- The Dual Enrollment student headcount information was obtained from the Florida Community College Student Data Base, 2005-06
- Community College data element 3004 was used to identify a Dual Enrollment student; Codes DA (Dual Enrollment applicable to an AA or AS degree); DV (Dual Enrollment applicable toward a vocational certificate); EA (Early Admission, College Credit); and EV (Early Admission, Non-Credit)
- Membership in grades 11 and 12 was obtained from the Survey 2, Automated Student Data Base, Education Information and Accountability Services, October 2005 reporting date
