- Try to vary what you are reading between fiction and non-fiction. Consider starting a virtual book club. Read something just for fun to a younger sibling. Have discussions about what you read; either with others who have read it or explain the content to a parent or younger sibling. Ask about the content, concepts, or outcomes. Make sure you stay connected with your teacher regarding any questions you have.
- When you come across a word in text that you don’t know, look it up! Keep a log of unknown words to create a personal glossary. See if you can stump a family member and see if they know the word!

**RESOURCES**

**NOW, LET’S WRITE!**

- Write about an important adult in your life. Think about how they have influenced you. If possible, consider asking them who influenced their life.
- Watch a TV show or TikTok. Afterward, write about the part you liked the best and why. Challenge your parents to the same and compare your answers.
- Keep a journal detailing what your days look like while you are practicing distance learning. What do you like? What is easier? What is more difficult? What is the most boring?
