

APPENDIX C

Edits Provided by Office of School Support (OSS)

The names of programs and jobs used to perform initial edits are listed in this appendix. The source code, job control language and formats of files used in the programs are stored respectively in:

DPS.DISTRICT.SOURCE.Yyyyy
DPS.DISTRICT.JCL.Yyyyy
DPS.DISTRICT.FORMAT.Yyyyy

The Source Library has a member named INDEX. Each time a change is made to a Source Library member, the change is recorded in the INDEX.

An 'R' in the program name refers to the Revision number (version number) these are the older versions of the programs. The program without an 'R' is always the most current (latest version). The numbers after the 'R' refer to the order in which the programs were placed in the DPS.DISTRICT.SOURCE.Yyyyy library.

For example:

- PSGQ01 is the most current version of the program having no R on the end. This is the latest version and, thus, the one for districts to download.
- PSGQ01R2 is the second version of the program. This is older than the current version but more recent than R1.
- PSGQ01R1 is the first version (oldest) of the programs.

A library that has changed code for programs that have been updated is named DPS.DISTRICT.CHANGES.Yyyyy. The member names are the same as those listed in this appendix except that the letter "C" is appended to the program name. For example, PSGQ01 is PSGQ01C in this library.
