

APPENDIX S

Staff Survey Checklists

Purpose and Use: The checklists in this appendix are for each of the staff surveys, and are intended for school district use in the preparation, processing, verification and update of each DOE Information Data Base staff survey. They have been designed to assist the district MIS and data processing staff in determining that no important step has been omitted in the process, all data have been submitted, errors have been corrected and the expected results for the survey have been achieved. Some districts may have created their own checklists. If this is the case, additional items may be found in this appendix that can be used to update existing checklists. Other districts are urged to use these checklists or to customize them to suit the needs of the district.

The following is an explanation of each of the major headings on the checklists:

Timeline: Appendix B of this manual lists the timelines for each staff survey. These timelines include the survey dates, due date, state processing window, and last day of the update window.

Record Formats: The record formats listed are the ones to be reported for the survey. It is essential that the district staff determine that the latest version of the format for the reporting year is being used. It is also essential that district staff study the record formats to determine which staff members and which data elements are to be reported for the survey. Useful information can be found on the cover pages of each record format.

Select Data Elements by Record Format: The district needs to pay close attention to the data elements listed in this section. They are not listed because they are the most important for the survey. They are listed because they have been problematic in the past as far as quality and accuracy of reporting are concerned. The district needs to be certain that these elements are accurate for each staff member reported in the survey. Remember, after the close of the state processing window for each survey, reports/files are generated to fill requests and to create publications. Consequently, it is essential that reported data are accurate.

Datasets Loaded to Data Base: District MIS and data processing staff must check initial edit reports and/or the Edit Status Tables of the on-line programs to be certain that all initial datasets submitted by the district have loaded to the data base. Making this determination can save valuable time in the long run.

Validation/Exception Reports: These reports must be requested by the district after appropriate datasets have been loaded to the database. They are not automatically produced by EDS. The requests should be made as early in the survey as possible to allow ample time for corrections to be made.

Staff Survey Checklists

Reports Helpful for Reviewing Data Submitted: Once datasets have been submitted, these reports will give the district a view of certain kinds of information. They can be used to determine whether the data submitted have produced the expected results. In some instances, these reports will point out data problems. If requested during the state processing window, these reports can lead to the identification of data problems that can be corrected prior to the close of the processing window. Those reports that are produced by school can be shared with school level staff for data verification.
