

Marion County paperwork Reduction Report

Marion County has selected me as the classroom teacher liaison for the state taskforce on paperwork reduction. I have compiled a list of the following steps our county has taken in order to reduce the amount of paperwork that teachers are responsible for. Including:

- Online grade book - allowing teachers to input grades at home
- Data collection online for focus assessments
- Email as main communication method
- ESE staffing input done through online forms
- Elimination of the AIP; instead using electronic means for progress monitoring
- Students/parents can access lunch accounts online and pay for school lunches
- Substitutes can be secured online
- Newsletters to parents available online through the web and email
- Attendance procedures online
