

# *Voices from the Field:* Working Together for Safe and Secure Schools

## FLORIDA DEPARTMENT OF EDUCATION

**CHARLIE CRIST**  
COMMISSIONER

August 26, 2002

Ensuring that our children learn in a safe and secure environment is my number one priority as Commissioner of Education. Nothing is more important than keeping our precious children and teachers safe.

Schools and communities must take a comprehensive approach to school safety and education. In the past, much attention has been paid to intervention strategies; however, recent events have turned our attention to the need for preventative strategies and increased awareness. While we have accomplished much, there is still work to be done.

In a continuing effort to provide the safest, most secure learning environment possible for Florida's students, the Department of Education hosted a series of eight regional Summits on Safety and Security throughout the state last fall. These summits brought together educators, law enforcement officials, legislators, parents, students, and the general public in an open forum to discuss the issues plaguing schools today in terms of safety and security.

The enclosed report highlights the key issues addressed at each summit as expressed by local leaders in each area.

I commend those individuals who participated in the regional summits and shared their concerns and suggestions. Discussions such as these provide yet another step toward ensuring that every child receives what they so richly deserve – safe passage through our schools.

Your Friend,

Charlie Crist  
Commissioner of Education

## *Executive Summary*

A top priority of the Department of Education is to provide a safe, secure, and supportive learning environment for every student in Florida. Such an environment is essential if students are to achieve the high academic expectations held for them by their families and their communities, as well as by the students themselves. Simply put, students must feel safe and secure in their schools in order to learn.

To be effective, the development of a safe learning environment must be school wide and must be comprehensive. It must include curricula, be part of the total school culture, and involve the entire community in which the school exists. Students, families, school staff, school administrators, law enforcement, fire service, emergency response personnel, and other members of the community must all work cooperatively in the pursuit of this goal.

To help ensure that every child has a safe learning environment, the Department of Education was instrumental in assisting the Florida Legislature in passing the Safe Passage Act of 2001. This legislation requires each school district to conduct a self-assessment of its current safety and security practices and to identify strategies and activities to improve school safety and security. School districts are required to provide the self-assessment results at a publicly noticed school board meeting, allowing the public to hear and take action on assessment findings. Each district superintendent is responsible for reporting self-assessment results to the Commissioner of Education within 30 days following the school board meeting.

Public attention has recently focused on several national and local school tragedies. Despite these isolated incidents, schools have been and remain some of the safest of places for our children. In fact, serious violent incidents in Florida public schools have actually decreased over the last three years as reported in the Statewide Report on School Safety and Discipline Data. Yet, the level of crime and violence in Florida's schools can be improved. We must continue to ask an important question, "What can we do to ensure that all students are able to participate and advance in a learning environment in which they feel safe?"

To address this question and engage the public in dialogue, Commissioner of Education Charlie Crist conducted eight regional Summits on School Safety and Security during the summer and fall of 2001. The purpose of the Summits was to explore safety issues faced by districts and schools, share best safety practices, and generate local discussion on matters related to school safety and security.

Each Summit consisted of a roundtable meeting for partners who have a key role in school safety, a school site visit, and a town hall meeting held in the evening to encourage greater public participation. The meetings were well attended by local law enforcement officials, district school superintendents, school board members, school administrators, teachers, students, legislators, public defenders, state attorneys, local citizens, members of the media, other government officials, and members of the Partnership for School Safety and Security.

Many incidents of school violence are unique to individual neighborhoods and require local participation in the development of solutions. By sharing their local experiences, Summit participants identified several key school safety and security issues that all districts and schools must address. These issues included:

- Using input from all appropriate partners to develop crisis plans;
- Developing plans that include scheduled revisions, training updates, and regular drills;

*A top priority of the Department of Education is to provide a safe, secure, and supportive learning environment for every student in Florida.*

- Developing plans for effective internal and external communication;
- Providing accurate school site plans to law enforcement and emergency response agencies;
- Developing strategies and techniques to break the “code of silence” among students;
- Listening to and acting upon students’ ideas and perceptions on school safety issues; and
- Providing additional school resource officers at all levels – elementary, middle, and high school.

This report examines issues that participants mentioned repeatedly at the eight Safety Summits as having the greatest impact on keeping students safe in Florida’s schools. Specific recommendations and successful practices surrounding planning for school safety, training, communications, and school resource officers are described. The report also highlights safety initiatives already in place that participants agreed are having a positive impact on school safety and security in Florida.

## Recommendations

Florida's children and youth are its future and most precious resource. Therefore, it is essential that we maintain education as the state's top priority. An important component of ensuring high student achievement is creating safe school environments. Findings from the Commissioner's Safety Summits confirmed that Florida's schools and districts are working hard to ensure that every child is safe in school. However, we are challenged to improve. The following recommendations reflect issues identified by Summit participants as key to maintaining safe and secure schools.

- **Include all appropriate partners in developing operative crisis plans that specify a schedule for plan revision, training updates, and regular drills.**

The development of inclusive, effective crisis plans is essential in ensuring the safety and security of Florida's students and teachers. However, it is imperative for these plans to be functional documents that are reviewed and practiced on a regular basis. Without continuous training and drills, there will not be the knowledge or confidence that the procedures in place will be effective during times of crisis. The Department of Education provides training and information on the development of crisis and emergency plans and assists school communities in developing or improving current safety and security procedures. School safety begins with the development of crisis plans, and their completion is the job of the entire community: students, teachers, school administrators, school board members, law enforcement, fire service, emergency response personnel, and members of the community.

- **Establish and maintain effective internal and external communication to ensure emergency procedures are efficiently and effectively followed.**

It is essential that schools and school districts develop effective, functioning internal communication systems and tools to communicate with all emergency response personnel. Local districts must also incorporate plans by which to communicate with the media during times of crisis.

- **Ensure that accurate facility site plans for every school are provided to local law enforcement and emergency response agencies.**

Florida Statutes require school districts to provide floor plans to emergency responders in their area. This can be accomplished through CD-ROM or hard copies.

- **Employ strategies and techniques to break the "code of silence" among students.**

There are many programs in Florida that are helping to break the "code of silence" and open lines of communication among students, school administrators, and law enforcement personnel. For these programs to continue to be successful, cooperation and ongoing involvement of the entire school, along with law enforcement personnel and the local community, is necessary. Students will open lines of communication only if they develop a relationship of trust with administrators, teachers, and law enforcement personnel. A national three-year study by the U.S. Department of Education and the U. S. Secret Service reported that acts of school violence are usually communicated to someone prior to the actual incident. With this fact in mind, educators, community leaders, parents, and students must continue to develop and improve strategies that

*Florida's schools and districts are working hard to ensure that every child is safe in school.*

increase communication and break down barriers in the school environment that may prevent students from coming forward with information about a potentially dangerous situation.

- **Listen to and implement students' ideas and perceptions on school safety issues.**

It is imperative that students are heard and that they are involved in helping educators, parents, and community members create a safe school environment. A key student issue expressed at the Summits was that students must be included in the process of making their schools safer and more secure. They must establish positive relationships with the administration, staff, and school resource officers, and they should participate in emergency drills on a regular basis so that they become familiar with their roles in the event of an emergency. Florida is making strides in the development and implementation of student-led programs, and the continuance of such programs can only enhance school safety and open lines of communication among students, parents, and administrators.

- **Provide additional school resource officers at all levels—elementary, middle, and high school.**

The Department of Education recognizes the importance of the presence and responsibilities of school resource officers in Florida's schools. Many Summit participants expressed dedication to pursuing an increase in available resources. Through discussions with students, teachers, and administrators, it is evident that school resource officers play a key role in ensuring the safety and security of schools. At the present time, it is important for districts to explore law enforcement volunteer programs as well as opportunities to obtain grants to supplement school resource officer funding and assist in their placement in elementary schools.

The Commissioner's Safety Summits represented one of several statewide initiatives to raise awareness and focus attention on school safety and security issues. Florida must continue to provide opportunities for school safety dialogue with key partners, further the creation of community collaborations, and motivate and empower audiences to become more active in maintaining safe schools. We must be insistent in meeting our challenge to keep all students safe in school.

## *Planning for School Safety and Security*

The Commissioner's Summits on School Safety and Security identified several important aspects regarding the development, implementation, and continuous improvement of school crisis response plans. At each Summit, participants discussed the critical features involved in developing and maintaining crisis response plans. While recognizing that every Florida school district currently has a plan in place, participants shared information on what has been particularly useful in their districts and offered suggestions for improving current plans.

Crisis situations in or around schools, such as bomb threats or explosions, weapon use, and natural disasters, require plans for immediate action. It is essential for schools to formulate emergency or crisis plans to prepare for such contingencies. The development of crisis plans and subsequent training will likely reduce chaos and trauma during these unforeseen events. Throughout the Summits, several issues were identified in the discussion of crisis plans:

- Involvement of all key school, emergency response, and community officials in the development of the crisis plan;
- Importance of varied and continuous training;
- Availability of school site plans to law enforcement, fire service, and emergency response units.

### **DEVELOPING CRISIS PLANS**

Florida Statutes require the development of a crisis plan. Creating a sound crisis plan requires strong leadership and input from school administrators, teachers, students, parents, non-instructional school staff, transportation personnel, law enforcement, fire service, emergency medical service, emergency management, school mental health staff, media representatives, community leaders, and other emergency response personnel. To elicit the most comprehensive results, it is essential that the final plan be the result of collective ideas from all involved professions and be tailored to individual schools. If administrators impose programs without the involvement and consent of all partners, those plans will likely fail.

The Summits revealed that many districts in Florida create their crisis plans through the development of crisis teams. These crisis teams often include the individual professions and groups listed above and are utilized to create, evaluate, and implement comprehensive plans incorporating all possible incidents that could occur at a school. Summit participants emphasized the importance of involving affected partners in the creation of crisis plans, suggesting that most districts developed their plans with input from involved groups. It is also important to consult with these groups prior to constructing new schools and on an ongoing basis to keep the plan current.

### **SCHOOL SITE PLANS**

Another important aspect in the development of school crisis plans is the availability of school site plans or blueprints to responding emergency personnel. These documents provide arriving law enforcement, fire service, and other emergency responders knowledge of the school buildings during times of crisis. This information is extremely useful in identifying areas where a possible intruder may be located or where a critical incident may have occurred. Florida Statutes require school districts to provide these floor plans to emergency responders in their area.

### *From the Field...*

*Principals in Volusia County are evaluated on the effectiveness of their schools' crisis plans and are required to meet minimum standards to fulfill their evaluations.*

The participants of the Safety Summits identified several ways in which school site plans can be provided. In some districts, site plans are provided on a CD-ROM to all potential responding personnel. In many other districts, the emergency responders are provided hard copies of the site plans for schools. Regardless of the delivery mechanism, these plans are essential for appropriate response and should be an integral part of any school crisis plan.

**DEPARTMENT OF EDUCATION PROGRAMS AND ACTIVITIES:  
SCHOOL EMERGENCY/CRISIS MANAGEMENT PLANS**

The Department of Education has been and will continue to be proactive in assisting school districts prepare for disasters and crisis. The Department provides technical assistance and training to school districts in the development or enhancement of School Emergency/Crisis Management plans so that all schools are prepared in the event of a natural or manmade disaster.

***From the Field...***

*Escambia County has developed both emergency medical guidelines and crisis management guidelines. In the process of producing these guidelines, the district has created teams involving medical services, law enforcement, emergency response personnel, and members of emergency management teams.*

## Training

The U. S. Department of Education has identified the fundamentals of a safe and responsive school. One of the most essential fundamentals is for staff to be provided with training and support to implement programs and procedures. Summit participants agreed that training is an essential mechanism by which to ensure and increase awareness. As districts and schools create and develop crisis plans, it is essential that these plans be evaluated on a regular and continuous basis. This can be accomplished through training exercises and drills. The value of performing such exercises is that plans can be easily evaluated and analyzed, identifying potential problem areas. The development, evaluation, and revision of safety procedures and programs are part of a continuous process that requires dedication, creativity, and mutual understanding among the participants.

School safety programs should include training for staff, students, and other involved agencies. Training should include periodic, goal-oriented emergency response exercises. The best-developed plans are of little value if faculty, students, and response units are not well aware of the procedures through training and drills. Students and staff will feel safe and secure knowing that there is an effective plan in place and knowing what to do in the case of an emergency. Districts and schools should also implement initiatives to increase parent involvement and awareness.

A final important aspect of training is how to incorporate these ideas into the many rural areas of Florida. Frequently, rural areas do not have the staff or resources available to provide the appropriate services in the case of an emergency. Several Summit participants from rural areas suggested the creation of multi-jurisdictional responses to crisis situations. In these cases, it would be essential for the agencies to develop training programs on how to respond to potential events. For example, a police department in a rural area may only have a few members on the police force. In this situation, the local police department could interact with the county sheriff's department and state law enforcement agencies to assist in responding to a crisis. This would require extensive training and communication among the various agencies to ensure proper response.

Active training and drills are essential elements to any effective crisis plan and safety programs and procedures. These exercises will drastically reduce panic and delay during an unexpected natural or man-made disaster. Participants of the Safety Summits strongly encouraged schools to develop training and drills that are appropriate to their needs and perform these exercises on a regular basis. It was also noted that there is a need for increased training for all partners, including those outside of the school and emergency services, specifically parents and members of the community.

### *From the Field...*

*Part of the implementation of crisis plans in Palm Beach County was accomplished through training and staging incidents.*

---

*From the Field...*

*An example of training resulting in the safe resolution of a potentially traumatic event occurred in Escambia County. The schools observed School Safety Week, in which they practiced one threat a day for one week (including a bomb drill, fire drill, bus safety drill, tornado drill, intruder drill, etc.). This extensive training paid off during a shooting incident at A.J. Sutter Elementary School. The event involved a domestic dispute in which a man fired shots at his ex-wife and subsequently committed suicide. During the event, a lockdown was implemented, and there were no injuries to students, staff, or responding personnel. Due to the extensive training, the procedures in place for such an incident were applied without panic or deliberation. In fact, because the school implemented the lockdown with such precision, students, parents, and teachers said they felt safer after the event.*

---

## Communications

An essential element in the building of safe school environments is the establishment of open lines of communication. Discussions regarding communication must include the development of communication tools within schools, systems by which schools can communicate with local law enforcement and emergency response personnel, and mechanisms by which to communicate with the media, parents, and community. It is also essential to increase communication between students and all administrative personnel, including principals, teachers, parents, and law enforcement.

### DEVELOPING EFFECTIVE COMMUNICATION SYSTEMS

All schools and school districts should incorporate an effective communication system, specifically: internal communications among school staff and emergency response personnel and external communications or public information. Summit participants stressed the need to include effective communication systems within the schools. Participants reported that nearly all emergency exercises revealed weaknesses in internal communications: responders' radios not working in schools buildings, lack of common frequencies to communicate among different agencies, cellular service overwhelmed by heavy call traffic, or communications equipment failure (dead batteries, obsolete equipment, etc.).

Technology provides solutions to some of these concerns, but often the solutions are expensive. By partnering with local emergency responders, schools may obtain second-hand radio systems at no cost. Also, new technologies include limited-range cellular service—wireless telephones that work only on campus and allow text-messaging, voice mail, and call transfers. Public address systems are sometimes the primary method of communicating emergency information; if codes are used, they should be thoroughly communicated to staff, students, and volunteers.

Many Summit participants reported that their districts are now using “plain English” in lieu of codes to avoid confusion: “lockdown,” “evacuate,” and “shelter in place” are terms that are nationally accepted and quickly convey the need to take specific actions. There should also be back-up communication mechanisms such as bullhorns, air horns, and pagers in the event that other systems fail. This must also be included in all training exercises and drills to ensure that communication devices are in proper working order.

External communications or conveying information to the public through the media is another key element in a school's safety policy. Safety Summit participants indicated that it is essential to incorporate a plan for dealing with the media during times of crisis. This can be accomplished through involving a media specialist in the development of the plan or utilizing the media contacts within local emergency response agencies. Responding effectively includes having procedures in place that will allow for the expeditious supply of information to staff, parents, community, and media. Lack of an effective communications plan can create a disaster within a disaster.

### THE “CODE OF SILENCE”

In each incident of tragic school violence—Paducah, Jonesboro, Columbine, Pearl—there was a thread that seldom varied: someone usually knew what was about to happen. It might have been a friend or a group of students in whom the perpetrator confided. Therefore, it came as no surprise that a key issue on the minds of participants in the eight Safety Summits was how to break the “code of

### From the Field...

*First-hand experience with the “code of silence” occurred in Palm Beach County on the last day of the 1999-2000 school year. On May 26, a student shot and killed an English teacher at Lake Worth Community Middle School. Prior to the shooting, the student had informed some of his peers at the school that he was in possession of a gun.*

*Jorge Merrora, Major with State Division of Alcoholic Beverages and Tobacco; Raul Martinez, Chief, Miami Police Department; Charlie Crist, Commissioner of Education; Luis Sabines, Latin Chamber of Commerce President; Roger Cuevas, Miami-Dade Superintendent.*

*From the Field...*

*The sheriff in Holmes County visits each school in the district to provide information regarding the “Be Brave Hotline.” During these visits, flyers, pencils, magnets, and wallet cards with the hotline number printed on them are given out. Sheriff’s deputies in Collier County conduct presentations and place the anonymous hotline numbers on patrol cars and school buses to ensure that students are aware of the service.*

silence” that exists among students. This misplaced allegiance enables students to commit violent acts on other students or on teachers, even though there may be dozens of students who know that a potentially high-risk situation exists in a school. This unwritten “code” has long been a part of student culture that causes students not to communicate potential problems to those in authority.

According to the U.S. Secret Service report, *“U.S.S.S. Safe School Initiative: An Interim Report on the Prevention of Targeted Violence in Schools,”* in over three-fourths of 37 targeted school violence incidents that were analyzed, someone had been informed of the perpetrator’s intentions prior to the incident. The report further indicated that incidents of targeted violence in schools are rarely impulsive and that the attacks are typically the end result of an understandable and identifiable process of thinking and behavior. The Secret Service report indicates that this kind of event is preventable if students are willing to provide information to appropriate personnel before an incident occurs. To address this issue, law enforcement officers, school administrators, teachers, parents, and students must devise strategies that provide the means for students to disclose information that may thwart violent acts.

Safety Summit roundtable discussions indicated that school districts throughout the state continue to develop creative ways to encourage students to come forward with information. These include anonymous hotlines, public service announcements, dramatic presentations, art/slogan competitions, student-led initiatives, and student anti-violence advisory groups. In each instance, partners first determine the barriers faced by students who have failed to come forward when they have information about a potential incident. They then develop strategies that provide ways around these barriers. For example, students are often reluctant to inform adults of an impending incident out of fear that the student(s) making the threat will retaliate against the informant. An anonymous hotline is often the answer in such a situation.

Many districts and law enforcement agencies in Florida have created anonymous hotlines for reporting potential problems. Hotlines allow students to report information to appropriate authorities without the fear of repercussions. One important aspect of the hotlines is advertising to the students that the hotline exists. In many school districts, the numbers for hotlines are distributed through flyers, stickers, presentations, and other means to increase student awareness of the service. It is imperative that this information is provided to students and that they are aware of the hotline number in their district. It is also important to involve parents by increasing their knowledge of the hotlines and by providing parent training to improve awareness of potential warning signs.

Sadly, potential threats made by students are sometimes ignored by staff, other students, and parents. If adults or friends have not been trained to recognize the cues that may be afforded them, they may not perceive a potentially tragic situation to be serious.

Participants from a majority of the districts represented at the Summits emphasized the importance of using and involving students in disseminating information to encourage other students to speak out if they are aware of a problem. Public service announcements featuring student spokespersons have been found to be effective in some districts. Other districts have established student advisory groups that meet with adults to discuss school safety issues. These advisory groups have proven to be beneficial in many ways, including developing a level of trust between the students and adults, thus making it more comfortable to speak out if there is a problem. Several unique programs have been implemented that encourage students to take the responsibility to immediately report weapons or potential violence. Students should take this responsibility because it is their friends, teachers, and campus that will be affected if problems are not reported.

## DEPARTMENT OF EDUCATION INITIATIVES: COMMUNICATIONS PROGRAMS AND ACTIVITIES TO ASSIST SCHOOL DISTRICTS

### *“Silence Hurts” Campaign*

On October 22-23, 2001, Florida’s “Silence Hurts” Campaign was launched at the Youth Summit on School Safety. The mission of the “Silence Hurts” Campaign, conducted by the Sunshine State School Public Relations Association, is to create a culture for students that fosters positive behavior and open communication in an environment that results in safe and nurturing schools. The target audience of “Silence Hurts” is middle and high school students with a secondary audience of adults, such as parents, teachers, principals, and business and community leaders. This campaign has now been launched nationwide.

The Department of Education supported this important project by providing \$100,000 in funding to assist Youth Crime Watch of America with the production of the Youth Summit. The gathering provided a forum for students to speak out about violence and also allowed for the collection of data that can be utilized by school districts and other organizations to formulate prevention plans (see Appendix E). Leaders at the Summit challenged students to be active participants and take the knowledge gained at the Summit back to their schools.

### *“Be Brave” School Safety Hotline*

A school safety hotline is a vital tool that students can use to anonymously report crime that is happening on their school campuses. The Department of Education supports the development of school safety hotlines by providing funding to the “Be Brave” School Safety Hotline, which is implemented through the Florida Sheriff’s Task Force. In its fourth year of funding, the Department authorized \$200,000 of Title VI funds to assist in implementing a no-cost hotline in Florida school districts. As authorized by Section 230.23185, F.S., the “Be Brave” School Safety Hotline provides an avenue for an anonymous reporting system that is answered 24-hours a day, seven days a week, and which provides no monetary reward to those who report criminal activity that is occurring on their school campuses.

## STUDENT IDEAS AND PERCEPTIONS

Students were among the most important participants of the Commissioner’s Summits on School Safety and Security. Their ideas and experiences provided critical information about the real world of school safety and related issues. Throughout the Summits, students contributed valuable information about their perceptions of school safety problems and of possible solutions that could be explored.

Clearly, students want and need to be included in the planning and implementation of most aspects of school safety. At the Summits, student participants made it clear that they want a clean, safe, and drug-free campus. They indicated that they feel safe at school and listed a variety of reasons for that feeling. Several factors contribute to students’ perception of school as a safe place: the presence of school resource officers, the periodic exercise of school-wide safety drills, the availability of safety and security equipment, and the perception that school administrators and teachers care about them as individuals. A safe learning environment for both students and staff provides a sense of confidence and security to students and enables them to improve their academic achievement.

Students at the Summits also spoke about areas of concern, and they generally expressed a belief that increased supervision leads to safer schools. Students were troubled over the lack of hall monitors and indicated that their primary concern was with day-to-day problems such as fights and bullying. They advised that they want supervision, whether through school resource officers, hall monitors, or

### *From the Field...*

*One program conducted in Lee County entitled “Child Watch” is an awareness program designed for parents. It teaches parents to listen to their children and their children’s peers. “Child Watch” also informs parents of other available awareness programs.*

*Commissioner Crist discussing school safety with constituents during a Town Hall meeting at Terry Parker High School in Jacksonville.*

***From the Field...***

*Schools in Broward County use public service announcements in which students encourage and stress the importance of reporting potential dangers. Sarasota and Escambia Counties have established student advisory groups that meet with adults to discuss a broad range of issues. The advisory groups are beneficial in many ways, including developing a level of trust between the students and adults.*

surveillance equipment. Limited resources have made it necessary for districts to explore creative ways to provide monitors for increased supervision.

Student participants also showed concern over what they felt was the “lack of respect” that exists in schools. Summit participants recognized character education as a valuable tool, emphasizing that such programs need to be ongoing throughout the school year and introduced at the elementary school level.

Another issue discussed by students and other Summit participants was whether school campuses should be “open” or “closed.” Should visitors be allowed free access to the school, and should students be permitted to leave campus for lunch if they wish? Most participants agreed that the campus should be closed. Many also agreed that entry points to the schools must be controlled. School administrators and school resource officers alike indicated that there were too many negatives associated with students leaving campus for lunch.

Throughout Florida, students are promoting awareness of school safety issues and non-violence through student-led organizations. In many instances, students are the most influential people on the campus and can demand a high level of respect and attention among their peers, as well as from the staff. Summit participants have found that it is extremely important to involve students in the safety equation through effective student-led programs and activities.

#### **CURRENT PROGRAMS AND ACTIVITIES: STUDENT INVOLVEMENT INITIATIVES**

##### ***Youth Crime Watch of Florida***

Youth involvement is the vital component to any youth crime watch program. During the 2001 legislative session, the state confirmed its support of youth involvement programming by allocating \$175,000 in general appropriation funding to Youth Crime Watch of Florida (YCWF). YCWF is a multi-faceted program that relies on the principle of good citizenship, where youth take an active role in addressing the problems that surround them. The program utilizes nine components that stress the philosophy that since youth play an important role in their communities, they must be a part of the solution to best meet the needs of their schools and communities.

The program provides students with the tools, guidance, and self-confidence to prevent crime, violence, and drug abuse by:

- Demonstrating that togetherness, affiliation, and partnerships are more powerful responses to threats that require more than individual action;
- Building upon positive values and motivating youth toward responsible action through an array of youth-led activities; and
- Helping young people to capitalize on their inherent desire to do well in school, to be respected, and to succeed in life.

The “Silence Hurts” Campaign and school safety hotlines play an important role in all Youth Crime Watch programs. As discussed in the previous section, these safety initiatives provide additional avenues that empower students to play an active role in keeping their school campuses safe and drug-free.

##### ***“Help! Anonymous” Sticker Program***

This captioned program is intended to provide a means for middle and high school students to anonymously report potential issues of violence or drug use on their school campuses. The program provides students an additional avenue to report crime by using stickers that contain the reporter’s student identification number, which provides for immediate reporting of a situation while maintaining student anonymity.

## School Resource Officers

### From the Field...

Participants at the Commissioner’s School Safety and Security Summits examined the impact that school resource officers have on Florida schools and students. School resource officers mitigate the incidents of school violence, establish positive relationships with students and educators, are dedicated to the youth of Florida, promote a safe school environment, promote a better understanding of our laws, and provide a positive image of law enforcement. The resource officers also teach law enforcement topics, counsel, coach, and serve as club advisors. This daily contact puts the officers on the front line of school safety.

A key focus of the Safety Summits was the lack of resources to incorporate school resource officers at all school levels. Most funding provides for resource officers at the middle and high school levels, while elementary schools typically share them on a rotating basis. Many Summit participants focused on the need to increase the number of school resource officers at all levels, specifically their availability to elementary schools.

School resource officers are identified as critical to ensuring a safe school environment. According to students who participated in the Safety Summits, establishing and maintaining relationships with school resource officers is a primary factor in feeling safe at school. There is a great deal of trust that exists between students and the officers. At the Youth Safety Summit, students overwhelmingly indicated that they would go to a school resource officer with a problem. The dedication and positive presence of school resource officers in Florida schools is essential to school safety and security.

Some districts in Florida are utilizing volunteers and grant money to supplement and assist school resource officers. These volunteers also wear uniforms and promote good behavior and respect. They also act as hall and parking lot monitors. Summit participants described numerous examples of the community and law enforcement coming together to ensure that Florida’s students are learning in the safest possible environment. These programs provide evidence of the dedication and willingness of the law enforcement community to involve themselves in educating and protecting children.

### DEPARTMENT OF EDUCATION PROGRAMS AND ACTIVITIES: SCHOOL RESOURCE OFFICERS

During the 2001 legislative session, the Florida Legislature appropriated \$75,350,000 to school districts to invest in ensuring a safe learning environment. Districts may spend these dollars on activities that include funding school resource officer programs. Additionally, the Department of Education coordinates with the Office of the Attorney General, Bureau of Criminal Justice Programs, State of Florida and the Florida Association of Schools Resource Officers to provide school resource officer training. Some of the training offered through the Office of the Attorney General includes School Resource Officer Training and School Resource Officer Practitioner Designation Requirements—courses designed for school resource and crime prevention officers, school administrative staff, teachers, and other professionals who work with students. The objective is to enhance the skills of school-based professionals who deal with juvenile issues on a daily basis. The topics include a spectrum of juvenile-related topics such as weapons and drugs on campus, gangs, diversity issues, dealing with disruptive students, preparing for potentially violent situations, and information sharing. The School Resource Officer Practitioner designation documents successful completion of a series of school resource officer training courses.

*A program identified at the safety summit held in Orlando promotes a unique way in which to involve students in a campaign. The program is a student-led initiative involving students from Flagler, St. Johns, Putnam, and Volusia counties, and is a “Break the Silence, Stop the Violence” poster contest. The posters are designed to communicate school safety issues to peers and to spread the message of breaking the code of silence. The campaign originated with John Tanner, State Attorney of the 7th Judicial Circuit, with cooperation and assistance from Crime Stoppers. The contest is held at all levels—elementary, middle, and high school—and is helping affect the student culture so that reporting information is seen as an acceptable behavior. The winning posters are distributed to all four counties and posted throughout the schools. They contain program information, including anonymous hotline numbers.*

*From the Field...*

*Some districts are addressing the lack of resources to fund monitors through volunteerism. For example, Pinellas County Parent/Teacher Association Volunteers monitor hallways and provide supervision between classes and at other times during the school day.*

---

## Appendix A

### SAFETY SUMMIT ROUNDTABLE PARTICIPANTS

#### *Ft. Lauderdale Summit—July 19, 2001*

Name	Organization	City
Roy Arigo	Chief of Police, Coral Springs	Coral Springs
David Boyett	Chief of Police, Sunrise	Sunrise
Lou Chamberlain	Margate Police Department	Margate
Ed Costello	Wilton Manors Police Department, School Resource Officer	Wilton Manors
Vicki Davis	Martin County School Board	Stuart
Michael English	Hallandale Police Department	Hallandale
Verda Farrell	Broward County Area Superintendent	Ft. Lauderdale
Marshal Gage	Chief of Police, Boynton Beach	Boynton Beach
John George	Chief of Police, Davie	Davie
Linda Green	School Advisory Council	(not provided)
Pam Hackett	Office of Representative Bill Andrews	Delray Beach
Rodney Hailey	Sunrise Police Department	Sunrise
Scott Henderson	Office of Representative Connie Mack	Ft. Lauderdale
Latha Kryshnaiyer	Parent/Teacher Association	(not provided)
John Labandera	Ft. Lauderdale Police Department	Ft. Lauderdale
James Lind	Miramar Police Department	Miramar
Stever Merlin	Coconut Creek Police Department	Coconut Creek
Keith Palant	Pembroke Pines Police Department	Pembroke Pines
Paul Robert	Hallandale Police Department	Hallandale
James Scarberry	Chief of Police, Hollywood	Hollywood
Maria Schneider	Assistant State Attorney, Broward County	Ft. Lauderdale
Bill Smith	Chief of Police, Lake Worth	Lake Worth
Dan Smith	Palm Beach County Sheriff's Office	West Palm Beach
William Smith	Lake Clarke Shore Police Department	West Palm Beach
Meg Stanley	Chief of Police, Miramar	Miramar
Craig Stevens	Chief of Police, Parkland	Parkland
Frank Till, Jr.	Superintendent, Broward County	Ft. Lauderdale
Edward Werder	Chief of Police, Cooper City	Cooper City
Richard Wierzbicki	Chief of Police, Wilton Manors	Wilton Manors

#### *From the Field...*

*Pinellas County and the University of South Florida have developed a program called "Commitment to Character" that focuses on teaching the values of respect, responsibility, honesty, and motivation. This program is incorporated into day-to-day curriculum through "teachable moments" and through school-wide activities.*

*Pensacola Summit—August 1, 2001**From the Field...*

*A student participant at the Orlando Safety Summit spoke of “Students Against Violence Everywhere” (SAVE), a student-led organization that promotes non-violence through a variety of strategies: presentations, plays, peer mediation, conflict resolution, and mentoring programs for elementary and middle school students. SAVE students have taken the initiative and provided an outlet for other students to discuss their problems.*

Name	Organization	City
Rachel Andrews	Student, Escambia County	Pensacola
Ronnie Arnold	Escambia County Schools	Pensacola
Anthony Bast	Student, Escambia County	Pensacola
Joe Bernand	Escambia County Schools	Pensacola
Randy Blake	Escambia County Sheriff’s Office	Pensacola
Mike Burns	Escambia County Schools	Pensacola
Jan Corbett	Edgewater Elementary School	Pensacola
Sheryl Cox	Principal, Escambia County Schools	Century
John DeWitt	Escambia County School Board	Pensacola
Linda Finklestein	Escambia County School Board	Pensacola
Don Fountain	School Resource Officer Coordinator, Okaloosa County Schools	Crestview
Blair Fowler	Student, Escambia County	Pensacola
Yvonne Gary	Escambia County Schools	Pensacola

<b>November 13, 2001</b>	<b>St. Petersburg</b> TOWN HALL MEETING: Plant High School 2415 South Himes Avenue Tampa, FL	Eric Bergholm

## Appendix E

### FINDINGS AND DATA FROM YOUTH SUMMIT ON SCHOOL SAFETY

The information below provides the key findings of the Youth Summit on School Safety. The summary of the proceedings was prepared by Dr. Sherri Zimmerman, University of West Florida, Project Evaluation Team. Findings may not equal 100% due to rounding.

#### Key Findings

- Students believe that they are the best method of prevention in school violence.
- Students don't speak up and tell about possible acts of violence because they are afraid of retaliation.
- Students overwhelmingly will tell a trusted adult on campus about a possible threat rather than a parent.
- Overall, students feel safe on their school campuses.
- Students believe they are the best source to persuade their peers to speak up when there is a possibility of violence. Teenagers believe they are more effective than nationally known performers, athletes, and other individuals.
- The predominant reason for students to speak up is if they believe there is an imminent and certain threat of someone being seriously hurt.
- Students believe adults must be ready to receive information about possible destructive acts.
- Students largely agree they have a responsibility to help make their schools a safer place.
- During small group discussions, the overarching theme appeared that students should organize themselves to orchestrate a Silence Hurts campaign on their school campus.

#### Survey

A total of 425 students participated in the survey with participant levels per question as follows:

1. How are you feeling?	388
2. Are you a male or female student?	413
3. What grade are you in?	234
4. Why do you think you were chosen to attend?	425
5. What is the strongest feeling this video created in you?	414
6. How do you think people are most likely to feel when they believe a weapon is on campus?	415

#### From the Field...

*Students believe they are the best source to persuade their peers to speak up when there is a possibility of violence. Teenagers believe they are more effective than nationally known performers, athletes, and other individuals.*

7. What is the main reason students don't tell when they hear bad things are going to happen?	409
8. Who would you most likely tell if you knew someone had a weapon on campus?	416
9. What is the biggest reason you would be willing to tell an adult, or someone in authority, that there is a weapon on campus at your school?	414
10. Who would be the best person to convince teenagers to speak up about violence?	413
11. How much has this session encouraged you to speak up when you know something violent is going to happen at your school?	292

Of 388 students responding to the first question, 64% indicated they were excited and ready to talk. Nearly twice as many females as males participated in this survey with the largest percentage (25%) being eighth-graders. Middle school students comprised 55% of the total population responding.

Responses indicated that 78% of the students surveyed believed they were chosen to attend the Summit either because they were a leader or because the person who selected them thought they would represent their school well. When asked to describe how a video shown during the morning session made them feel, 55% reported being motivated to do something. Even after viewing the video which stressed the importance of speaking out to prevent violence, 45% of students reported they believe most people would feel nervous if they believed a weapon were on campus but would still conceal that knowledge. Only 21% reported feeling that others would want to do something about it. Another 15% believed people are apathetic, feeling that's "just the way it is" and "I can't change it." Over one third of respondents cited fear of retaliation as the main reason students don't tell when they hear bad things are going to happen. Seventy-eight percent (78%) reported either fear of retaliation, being labeled a snitch, or loyalty to friends as the main deterrents to speaking out against violence.

Clearly students are more likely to tell a trusted adult at school than a parent or peer. Eighty percent (80%) would tell a teacher, school administrator, or school resource officer. The main motivation to tell was a belief that someone was going to get hurt (79%). The students attending the conference reaffirmed the premise for the conference by reporting that 62% believed fellow teenagers, their peers, would be the best people to convince other teenagers to speak up about violence a distant 15%. Ninety-one percent (91%) of respondents agree toward speaking up when you know something is going on at school.

## Telephone Surveys

A much larger sample size was achieved with the telephone surveys with 1,083 students and adults participating.

1. Which describes you?	
Middle school student	38%
High school student	35%
Adult-work at school	20%
Adult-other educator	8%
Other adult	4%
2. What is your gender?	
Female student	46%
Male student	27%
Female adult	19%
Male adult	8%
3. Where is your school located?	
Rural	22%
Small city	39%
Medium-large city	39%
4. Do you believe violence is a problem at your school?	
Yes	37%
No	63%
5. Do you feel safe on a regular basis while in school?	
Yes	86%
No	14%
6. Has your feeling of safety at school changed due to recent school tragedies?	
Yes	41%
No	59%
7. Students at my school can get help from adults for all sorts of problems when they need it.	
Strongly disagree	8%
Disagree	6%
Slightly disagree	8%
Slightly agree	20%
Agree	31%
Strongly agree	27%
8. People really listen to each other at my school.	
Strongly disagree	10%
Disagree	13%
Slightly disagree	17%
Slightly agree	29%
Agree	23%
Strongly agree	9%
9. People respect the rules at my school.	
Strongly disagree	14%
Disagree	16%
Slightly disagree	18%
Slightly agree	28%
Agree	18%
Strongly agree	6%

10.	I believe my school is working hard to prevent violence from happening.	
	Strongly disagree	6%
	Disagree	5%
	Slightly disagree	10%
	Slightly agree	19%
	Agree	29%
	Strongly agree	31%
11.	I believe students in my school accept responsibility to speak up about violence.	
	Strongly disagree	13%
	Disagree	14%
	Slightly disagree	18%
	Slight agree	29%
	Agree	16%
	Strongly agree	10%
12.	Students at my school take responsibility for themselves rather than always relying on others for answers.	
	Strongly disagree	12%
	Disagree	14%
	Slightly disagree	22%
	Slight agree	26%
	Agree	18%
	Strongly agree	9%
13.	Do you ever hear a student threatening to physically harm someone else at school?	
	No	30%
	Yes—One time	25%
	Yes—Once or twice a month	19%
	Yes—Once or twice a week	14%
	Yes—Every day	12%
14.	How often do people bring weapons on campus?	
	Never	32%
	Hardly ever	38%
	Sometimes	18%
	Frequently	3%
	Very often	1%
	Unsure	8%
15.	If you saw or heard about someone carrying a gun or knife as a weapon to school, would you report it?	
	Yes	89%
	No	4%
	Unsure	7%
16.	If you heard someone threaten to physically harm someone else or seriously bullying an innocent victim at school, would you report it?	
	Yes	81%
	No	5%
	Unsure	13%

17. What happens when an adult finds out that a student is planning to bring a weapon on campus?	
Gets help—from adult	41%
No help—suspension	29%
Information ignored	2%
Parents notified—no school punishment	3%
Other	9%
Unsure	15%
18. What do you think happens if someone gets convicted of bringing a weapon on campus?	
Expelled for a year	43%
Jail	22%
No military or vote	1%
Not hired for jobs	1%
All of the above	17%
Other	6%
Unsure	9%
19. Which do you think is best method to create a safe school?	
Metal detectors	26%
Rules and punishment	23%
Students accept responsibility	40%
More police	5%
Do nothing	6%
Other	3%
Unsure	4%
20. What is the best way to convince students to speak up?	
Cash reward	24%
Strict punishment for not telling	8%
Show graphic consequences	32%
Praise and recognition	16%
Other	4%
Unsure	8%

When comparing variables among questions, some interesting information emerged.

- There was no significant difference in the perception of violence being a problem at school among students who lived in rural areas, small cities, and large cities.
- Of the 14% of students reporting they did not feel safe at school, 40% were from large cities, 33% were from small cities, and 27% were from rural areas.
- Even though 69% of respondents did not believe violence was a problem at their school, 71% of those were adults, while only 30% were students. Conversely, of the 37% who believe that violence is a problem at their school, 70% were students, while only 30% of adults responded they believed violence was a problem.
- No significant difference was noted in feelings of safety changing due to recent school tragedies in students from large cities, small cities, or rural areas.
- Of respondents reporting that people sometimes bring weapons on campus, 67% were students, and only 33% were adults.

- When asked what is the best method to create a safe school, middle school students favored metal detectors and rules and punishments. High school students suggested more police or resource officer presence in the schools. Adults believed students must accept more responsibility.

### *Discussion Group Highlights*

Two themes emerged from the discussion groups. Most of the suggestions from students in regard to how they could take this message back to their schools were related to improved or intentional communication. The second theme reflected the action component.

#### **Communication Ideas:**

Plaster logo all over  
 Banners  
 T-shirts  
 Posters  
 Book covers  
 Bookmarks  
 Stress balls with logo  
 Buttons, key chains with logo  
 Use as fund-raisers  
 Page in yearbook  
 Wear shirt and use as springboard to explain  
 Bring back-stories  
 Create culture through everyday conversations  
 Must show graphic consequences  
 Battle of bands with anti-violence message  
 Slogan competition  
 Peer mediation  
 Chat sessions  
 Victims Speaker's Bureau  
 Videos  
 Public Service Announcements (Spas)  
 Morning announcements  
 Mini-campaign on campus  
 Mini-Summits with district schools  
 Schools write and perform commercials  
 Students write letters to the editor  
 Form organizations  
 Pep rallies  
 Use real-life stories

#### **Action Ideas:**

Get help rather than strict discipline  
 Role play scenarios  
 Train teachers on how to hear  
 Educate student body on who to talk to  
 Listen to people if they need to talk  
 Start a club  
 Form committee led by students with adult support for "Silence Hurts"  
 Get administration to embrace it  
 Respect student opinions  
 Make kids fit in (that don't)  
 Conduct school-wide pledge card signing ceremony

## *Next Steps*

The purpose of the Youth Summit on School Safety was to listen to the students and let them shape the “Silence Hurts” campaign. They expressed their beliefs, concerns, and ideas in a variety of ways. The list of “next steps” below came from the Youth Summit and is intended to help students and adults organize themselves to implement the Silence Hurts campaign on their campuses.

### **Next Steps for Students:**

- Meet with your school administration; ask your chaperone(s) to join you. Share what you learned at the Youth Summit, using the enclosed report on the Youth Summit updates on the web site. Prepare an outline describing what you would like to do at your school. Ask the administrators how your school can support the effort.
- Develop a clear plan of action with dates, activities, and responsibilities to implement “Silence Hurts” in your school. This action plan should be kept updated and revised as needed. It may include your first meeting, a pep rally, fund-raising efforts, soliciting media support, and other activities. Use the Youth Summit report as a “prompter” for discussion ideas.
- Recruit other students to an initial charter meeting of “Silence Hurts” at your school.
- Ask your school resource officer to assist you.
- Ask your School Advisory Council, PTO, and businesses to help sponsor “Silence Hurts” on your campus.
- Visit [www.silencehurts.com](http://www.silencehurts.com) to obtain information, materials, and updates.
- Order materials, such as T-shirts, banners, specialty items, and hats for fund-raising and visibility.
- Get public service announcement from your principal, public information office, or SUNSPRA member, and ask TV stations to play it. Play the two-minute video that you saw at the Summit on your school’s TV announcements.
- Advertise your meeting on your school’s news show and daily announcements. Create posters and fliers to put up in your school giving students information about the meeting. Be creative!
- Use the same style of small group discussions from the Youth Summit to determine how your peers want to implement “Silence Hurts” on their campus.
- Stock your school stores with “Silence Hurts” materials and sell them to students.
- Organize your group to plan a pep rally or kick-off at your school.
- As you meet and plan to launch “Silence Hurts” at your school, keep your administrators and other adults informed so they can provide the necessary support and assistance you will need to sustain the campaign.
- Contact your local media and share your plans with them.
- Ask your district’s public information office to assist your school.

*Next Steps for Adults:*

- Arrange a meeting with the students and adult chaperones that attended the Youth Summit on School Safety. This can be done at the school or district level. Many districts are hosting “reunion” planning meetings.
- Offer support as students implement the “Silence Hurts” campaign. Use the Summit report as a “prompter” for discussions with students.
- Share the plans with your faculty.
- Prepare your school for the climate and culture of a student body that is willing to break the “code of silence.”
- Determine how and when to train adults about receiving information regarding a possible harmful act.
- Review any procedures regarding reporting potential dangerous incidents with faculty and staff.
- Help students find resources to offset costs of launching “Silence Hurts” or to pay the “wholesale” costs of materials that they will sell at retail for fund-raisers.
- Provide school resource officer with support to assist students with their campaign effort.
- Help with soliciting support from the school’s School Advisory Council, Parent Teacher Organization, Student Government Association, and other school groups.
- Be a cheerleader for their efforts and help them succeed.
- Help students obtain appropriate media coverage for their campaign.
- Seek the assistance of your district public information office to help launch “Silence Hurts” at your school.

## Appendix F—Resources

### PLANNING FOR SCHOOL SAFETY AND SECURITY

#### *Relevant Florida Statutes:*

- Section 230.23(6)(f), F.S., Emergency drills; emergency procedures
- Section 229.8348, F.S., Safety and Security Best Practices; review; self-assessment; recommendations; Report
- Section 235.192, F.S., Coordination of school safety information; construction design documents

#### *Critical Incident/Emergency Planning for Florida's Schools Web Page:*

[www.firn.edu/doe/bin00013/em\\_plan/emerg\\_plan.htm](http://www.firn.edu/doe/bin00013/em_plan/emerg_plan.htm)

This site includes best practices; links for administrators, teachers, and students, training opportunities; and electronic mail links to staff and legislative updates. Contact the Office of Safe Schools at (850) 410-1667 for additional information.

#### *Office of Safe Schools Web Page:*

[www.firn.edu/doe/besss/safehome.htm](http://www.firn.edu/doe/besss/safehome.htm)

The Safe Schools web page includes links to Florida's Safe and Drug-Free Schools, School Environmental Safety Incident Report (SESIR), and Emergency/Crisis Planning for Schools programs. The site also includes staff contact information and Department of Education publications related to safety. Contact the Office of Safe Schools at (850) 410-1667.

#### *Department of Education Web Page:*

[www.myfloridaeducation.com](http://www.myfloridaeducation.com)

The Department's home page has information on School Security Assessments as well as links to the Clearinghouse for the Partnership for School Safety and Security.

### TRAINING

#### *Critical Incident/Emergency Planning for Florida's Schools - Training Web Page:*

[www.firn.edu/doe/bin00013/em\\_plan/training.htm](http://www.firn.edu/doe/bin00013/em_plan/training.htm)

This site includes course descriptions and training schedules for several school safety-related courses such as *Multi-Hazard Planning for Florida's Schools*, School Resource Officer Training, and Crime Prevention Through Environmental Design Courses. Contact the Office of Safe Schools at (850) 410-1667 for additional information.

#### *School Site Plans:*

Training was held over the summer of 2001 on how districts could convert photographs and school floor plans into an interactive compact disc (CD) for use by first responders in an emergency. A CD tutorial was created that outlines all of the steps necessary to create a school safety CD and is available from the Office of Safe Schools. Contact the Office of Safe Schools at (850) 410-1667 for a copy of the tutorial CD.

***School Crime Operations Package:***

[www.schoolcopsoftware.com/](http://www.schoolcopsoftware.com/)

The School Crime Operations Package (*School COP*) is a FREE software application for entering, analyzing, and mapping incidents that occur in and around schools. Abt Associates ([www.abtassociates.com/](http://www.abtassociates.com/)) developed *School COP* under a contract from the National Institute of Justice. ([www.ojp.usdoj.gov/nij/](http://www.ojp.usdoj.gov/nij/))

The Bureau of Criminal Justice Programs in the Division of Victim Services and Criminal Justice Programs provides statewide public education and training programs for law enforcement personnel, school resource officers, victim advocates, and other interested persons on crime prevention initiatives, school-based officer programs, victim advocacy, and related criminal justice areas. The Florida Crime Prevention Training Institute (FCPTI) in the Office of the Attorney General provides crime prevention training to Florida's law enforcement community and other interested citizens. Contact the Office of the Attorney General, Bureau of Criminal Justice Programs, at PL01, The Capitol, Tallahassee, FL 32399-1050 or call 850-414-3360

## Appendix G

### PROVEN AND PROMISING PROGRAMS

The *Program Inventory* is a list of proven and promising programs that appear to meet the United States Department of Education's Principles of Effectiveness requirements for the Safe and Drug-Free Schools and Communities Act (SDFSCA). When applied, the principles assure that programs used in schools have the best chance of success in reducing or preventing substance use and violence. Consistent with Florida's policy of local control, decisions regarding the selection and use of programs, strategies, and curricula are at the discretion of local education agencies.

The *Program Inventory* is not intended to be comprehensive; rather, it is a compilation of the results of several major reviews by qualified institutions. Other programs exist that have been shown to reduce violence or substance abuse.

The programs are divided into several different sections. Many fall into more than one category and are included in the area that appears to be the main focus of the program. Following is an alphabetical list of Proven and Promising Prevention Programs identified by the Florida Department of Education. Specific information on the programs, the Principles of Effectiveness, and the reviewing institutions can be found at [www.unf.edu/dept/fie/sdfs/program\\_inventory](http://www.unf.edu/dept/fie/sdfs/program_inventory).
