Recommendation

Yes

Comments: I thought this curriculum was well organized and appropriate for a regular 8th grade class. There we numerous modalities to every unit with engaging videos and real life discussions. I did think that the section on stars needed to use an Hertzsprung-Russell Diagram, otherwise it was a strong curriculum. It included numerous UDL aspects including the text notations, videos, audio, color, etc.

When looking at standards alignment reviewers should consider not only the robustness of the standard coverage but also the content complexity (depth of knowledge level) if appropriate. More information on content complexity as it relates to Florida standards can be found at: http://www.cpalms.org/Uploads/docs/CPALMS/initiatives/contentcomplexity/CPALMS_ccdefinitions_140711.pdf

For example, if the standard is marked as a level 3 (strategic reasoning and complex thinking) then the materials coverage should reflect this. If the materials coverage is only sufficient to allow for recall (level 1) then this should be reflected in the points assigned.
