Music Education

Effective November 2021 Rule 6A-1.09412, F.A.C.

# Elementary Chorus (#5013010) 2015 - 2022 (current)

| Name                    | Description  |
|-------------------------|--|
|                         | Describe listening skills and how they support appreciation of musical works.  |
| MU.3.C.1.1:             | Clarifications:  |
|                         | e.g., focus: form, instrumentation, tempo, dynamics; organize: listening maps, active listening, checklists  |
|                         | Respond to a musical work in a variety of ways and compare individual interpretations.   |
| MIL 3 C 1 2.            |  |
| 1010101121              | e.g., move, draw, sing, play, gesture, conduct   |
| MU 3 C 1 4·             | Discriminate between unison and two-part singing   |
| MU.3.C.2.1:             | Evaluate performances of familiar music using teacher-established criteria.  |
|                         | Identify musical characteristics and elements within a piece of music when discussing the value of the work.   |
| MU.3.C.3.1:             | Clarifications:  |
|                         | e.g., tempo, rhythm, timbre, form, instrumentation, texture  |
|                         | Identify musicians in the school, community, and media.  |
| MU 3 F 2 1 <sup>.</sup> | Clarifications:  |
|                         | e.g., band, chorus, and/or orchestra member; music teacher; cantor, choir director, or song leader in religious services   |
|                         | Describe opportunities for personal music-making   |
| MILSEDD.                | e.g., tempo, rhythm, timbre, form, instrumentation, texture         identify musiclans in the school, community, and media.         Clariffcations:       e.g., band, chorus, and/or orchestra member; music teacher; cantor, choir director, or song leader in religious services         Describe opportunities for personal music-making.         Clariffcations:       e.g., performing ensembles, individual lessons, community and church music groups, family, playground, computer-generated music         Collaborate with others to create a musical presentation and acknowledge individual contributions as an integral part of the whole.         Clariffcations:       e.g., work together, communicate effectively, share tasks and responsibilities, work well in cooperative learning groups         2:       Identify significant information about specified composers and one or more of their musical works.         Experience and discuss, using correct music and other relevant content-area vocabulary, similarities in the use of pattern, line, and form in musical vork.         1:       Clariffcations:         e.g., in dance, visual art, language arts, pulse, rhythm, fluency         2:       Identify, using correct music vocabulary, the elements in a musical work.         1:       Clariffcations:         e.g., hythm, pitch, timbre, form         2:       Clariffcations:         e.g., hythm, pitch, timbre, form         1:       Describe how tempo and dynamics can change the mood or emotion of a piece of music. |
| 10131112121             | e.g., performing ensembles, individual lessons, community and church music groups, family, playground, computer-generated music  |
|                         | Collaborate with others to create a musical presentation and acknowledge individual contributions as an integral part of the whole   |
| MIL2E21.                | Clarifications:  |
| WU.S.F.S.T.             | e.g., work together, communicate effectively, share tasks and responsibilities, work well in cooperative learning groups   |
|                         | Identify significant information about specified composers and one or more of their musical works  |
| 10.3.11.1.2.            | Experience and discuss using correct music and other relevant content-area vocabulary similarities in the use of pattern, line, and form in music and  |
|                         | other teacher-selected contexts.   |
| MU.3.H.3.1:             | Clarifications:  |
|                         | e.g., in dance, visual art, language arts, pulse, rhythm, fluency  |
|                         | Identify, using correct music vocabulary, the elements in a musical work.  |
| MU.3.0.1.1:             | Clarifications:  |
|                         | e.g., rhythm, pitch, timbre, form  |
|                         | Identify and describe the musical form of a familiar song.   |
| MU.3.0.1.2:             | Clarifications:  |
|                         | e.g., AB, ABA, ABABA, call-and-response, verse/refrain, rondo, intro, coda   |
| MU.3.0.3.1:             | Describe how tempo and dynamics can change the mood or emotion of a piece of music.  |
|                         | Identify patterns in songs to aid the development of sequencing and memorization skills.   |
| MU.3.S.2.1:             | Clarifications:  |
|                         | e.g., parts of a round, parts of a layered work  |
| MU.3.S.3.1:             | Sing rounds, canons, or ostinati in an appropriate range, using head voice and maintaining pitch.  |
|                         | ntify, using correct music vocabulary, the elements in a musical work.  rifications: ., rhythm, pitch, timbre, form  ntify and describe the musical form of a familiar song.  rifications: ., AB, ABA, ABABA, call-and-response, verse/refrain, rondo, intro, coda cribe how tempo and dynamics can change the mood or emotion of a piece of music.  ntify patterns in songs to aid the development of sequencing and memorization skills.  rifications: ., parts of a round, parts of a layered work g rounds, canons, or ostinati in an appropriate range, using head voice and maintaining pitch. g simple la-sol-mi-re-do patterns at sight.  rifications: ., reading from hand signs; reading from nontraditional or traditional notation   |
| MU.3.S.3.3:             | Clarifications:  |
|                         | e.g., reading from hand signs; reading from nontraditional or traditional notation   |
|                         | Develop effective listening strategies and describe how they can support appreciation of musical works.  |
|                         | Clarifications:  |
| MU.4.C.1.1:             | e.g., listen for form, instrumentation, tempo, dynamics, melodic line, rhythm patterns; organize thoughts using listening maps, active listening,  |
|                         | checklists   |
|                         | Describe, using correct music vocabulary, what is heard in a specific musical work.  |
| MU.4.C.1.2:             | Clarifications:  |
|                         | e.g., movement of melodic line, tempo, repeated and contrasting patterns   |
| MU.4.C.1.4:             | Identify and describe the four primary voice parts, i.e., soprano, alto, tenor, bass.  |
|                         | Identify and describe basic music performance techniques to provide a foundation for critiquing one's self and others.   |
| MU.4.C.2.1:             | Clarifications:  |
|                         | e.g., intonation, balance, blend, timbre, posture, breath support  |
| MU.4.C.2.2:             | Critique specific techniques in one's own and others performances using teacher-established criteria.  |
|                         | Describe characteristics that make various musical works appealing.  |
| MU.4.C.3.1:             | Clarifications:  |
|                         | e.g., tempo, rhythm, dynamics, blend, timbre, form, texture, instrumentation   |

|             | Describe roles and careers of selected musicians.   |
|-------------|---|
| MU.4.F.2.1: | Clarifications:   |
|             | e.g., teacher, conductor, composer, studio musician, recording technician, sound engineer, entertainer  |
|             | Identify the characteristics and behaviors displayed by successful student musicians, and discuss how these qualities will contribute to success beyond the music classroom |
| MU.4.F.3.1: | Clarifications:   |
|             | e.g., punctual, prepared, dependable, self-disciplined, solutions-oriented, shows initiative, uses time wisely  |
| MU.4.H.1.2: | Describe the influence of selected composers on the musical works and practices or traditions of their time.  |
|             | Identify connections among music and other contexts, using correct music and other relevant content-area vocabulary, and explore how learning in                            |
| MU.4.H.3.1: |   |
|             | e.g., movement, form, repetition, rhythmic patterns/numeric patterns, fractions, vibrations/sound waves   |
|             | Compare musical elements in different types of music, using correct music vocabulary, as a foundation for understanding the structural conventions of                       |
| MU.4.0.1.1: | specific styles.  |
|             | Clarifications:   |
|             | Identify how expressive elements and lyrics affect the mood or emotion of a song  |
| MU.4.0.3.1: | Clarifications:   |
|             | e.g., tempo, dynamics, phrasing, articulation   |
| MU.4.0.3.2: | Apply expressive elements to a vocal or instrumental piece and, using correct music vocabulary, explain one's choices.  |
|             | Arrange a familiar song for voices or instruments by manipulating form.   |
| MU.4.S.1.3: | Clarifications:<br>e.a., introduction, interlude/bridge, coda, ABA, rondo   |
| MU.4.S.2.1: | Apply knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsal and performance.   |
| MU.4.S.3.1: | Sing rounds, canons, and/or partner songs in an appropriate range, using proper vocal technique and maintaining pitch.  |
|             | Perform extended pentatonic melodies at sight.  |
| MU.4.S.3.3: | Clarifications:   |
|             | Discuss and apply listening strategies to support appreciation of musical works   |
|             | Clarifications:   |
| MU.5.C.1.1: | e.g., focus: structure, instrumentation, tempo, dynamics, melodic line, rhythm patterns, style/genre; organize: listening maps, active listening, checklists                |
|             | Hypothesize and discuss, using correct music vocabulary, the composer's intent for a specific musical work.   |
| MU.5.C.1.2: | Clarifications:   |
|             | e.g., ittle, historical notes, quality recordings, instrumentation, expressive elements   |
| 10.5.6.1.4. | Define criteria, using correct music vocebulary, to critique one's own and others performance.  |
| MU.5.C.2.1: | Clarifications:   |
|             | e.g., intonation, balance, blend, timbre  |
| MU.5.C.2.2: | Describe changes, using correct music vocabulary, in one's own and/or others performance over time.   |
| MU.5.C.3.T: | Describe jobs associated with various types of concert venues and performing arts centers.  |
| MU.5.F.2.1: | Clarifications:   |
|             | e.g., music merchant, ticket agent, marketer, agent, security guard, food-and-beverage merchant   |
| MU.5.F.2.2: | Explain why live performances are important to the career of the artist and the success of performance venues.  |
|             | Examine and discuss the characteristics and behaviors displayed by successful student musicians that can be applied outside the music classroom.                            |
| MU.5.F.3.T: | e.g., dedicated, works toward mastery, punctual, prepared, dependable, self-disciplined, solutions-oriented   |
| MU.5.H.1.2: | Compare and describe the compositional characteristics used by two or more composers whose works are studied in class.  |
|             | Examine critical-thinking processes in music and describe how they can be transferred to other disciplines.   |
| MU.5.H.3.1: | Clarifications:   |
|             | e.g., reading, whiting, observing, listening, evaluating, embellishing, revising  |
| MU 5 0 1 1  | Allaryze, using correct music vocabulary, the use of musical elements in various styles of music as a roundation for understanding the creative process.                    |
|             | e.g., rhythm patterns, melody, timbre, form, tonality, harmony, meter, key; styles: Classical, Baroque, Romantic, nationalistic, jazz                                       |
|             | Examine and explain how expressive elements, when used in a selected musical work, affect personal response.  |
| MU.5.0.3.1: | Clarifications:   |
|             | e.g., tempo, dynamics, timbre, texture, phrasing, articulation  |
| MU.5.0.3.2: | Perform expressive elements in a vocal or instrumental piece as indicated by the score and/or conductor.  |
| MU.5.S.1.3: | Clarifications:   |
|             | e.g., dynamics, tempo, lyrics, form, rhythm, instrumentation  |
| MU.5.S.1.4: | Sing or play simple melodic patterns by ear with support from the teacher.  |

| MU.5.S.2.1:      | Use expressive elements and knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsals and performance.  |
|------------------|---|
| MU.5.S.2.2:      | Apply performance techniques to familiar music.   |
| MU.5.S.3.1:      | Sing part songs in an appropriate range, using proper vocal technique and maintaining pitch.  |
|                  | Perform simple diatonic melodies at sight.  |
| MU.5.S.3.3:      | Clarifications:<br>e.g., vocal and/or instrumental  |
| LAFS.3.RI.2.4:   | Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 3 topic or subject area.  |
|                  | <ul> <li>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 3 topics and texts, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion.</li> </ul>   |
| LAFS.3.SL.1.1:   | <ul><li>b. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the topics and texts under discussion).</li><li>c. Ask questions to check understanding of information presented, stay on topic, and link their comments to the remarks of others.</li><li>d. Explain their own ideas and understanding in light of the discussion.</li></ul>  |
|                  | Standard Relation to Course: Supporting   |
| LAFS.3.SL.1.2:   | Determine the main ideas and supporting details of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.   |
| LAFS.3.SL.1.3:   | Ask and answer questions about information from a speaker, offering appropriate elaboration and detail.   |
| LAFS.4.RI.2.4:   | Determine the meaning of general academic and domain-specific words or phrases in a text relevant to a grade 4 topic or subject area.   |
| LAFS.4.SL.1.1:   | <ul> <li>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 4 topics and texts, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion.</li> <li>b. Follow agreed-upon rules for discussions and carry out assigned roles.</li> <li>c. Pose and respond to specific questions to clarify or follow up on information, and make comments that contribute to the discussion and link to the remarks of others.</li> <li>d. Review the key ideas expressed and explain their own ideas and understanding in light of the discussion.</li> </ul>   |
|                  | Standard Relation to Course: Supporting   |
| LAFS.4.SL.1.2:   | Paraphrase portions of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.   |
| LAFS.4.SL.1.3:   | Identify the reasons and evidence a speaker provides to support particular points.  |
| LAFS.5.RI.2.4:   | Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 5 topic or subject area.  |
| LAFS.5.SL.1.1:   | <ul> <li>building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion.</li> <li>b. Follow agreed-upon rules for discussions and carry out assigned roles.</li> <li>c. Pose and respond to specific questions by making comments that contribute to the discussion and elaborate on the remarks of others.</li> <li>d. Review the key ideas expressed and draw conclusions in light of information and knowledge gained from the discussions.</li> </ul>  |
| LAFS.5.SL.1.2:   | Summarize a written text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.  |
| LAFS.5.SL.1.3:   | Summarize the points a speaker makes and explain how each claim is supported by reasons and evidence.   |
| MAFS.K12.MP.5.1: | Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. Standard Relation to Course: Supporting |
|                  | אננפווע נט פרפטואטוו.   |
| MAFS.K12.MP.6.1: | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                  | Standard Relation to Course: Supporting Look for and make use of structure.   |
| MAFS.K12.MP.7.1: | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see $7 \times 8$ equals the well remembered $7 \times 5 + 7 \times 3$ , in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as $2 \times 7$ and the 9 as $2 + 7$ . They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x)$  |

## VERSION DESCRIPTION

Students who have varying levels of experience in chorus develop beginning vocal technique and skills, notational literacy and fluency, expressive and stylistic interpretation, part-singing, critical and creative thinking skills, and an appreciation of music from around the world and throughout history. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## **GENERAL NOTES**

The course descriptions for Elementary Music Electives have been designed to accommodate the mixing of grade levels, experience, and abilities within the same ensemble. Music teachers for elementary music electives should select the most appropriate set of grade-specific benchmarks based on each student's experience, music literacy, and available instruction time. Once an elementary student has entered a course at a specific level of benchmarks, he or she should progress to the next set of grade-specific benchmarks in the sequence for purposes of assessment. If a student reaches the Grade 5 level prior to 5th grade, he or she may continue to participate in the ensemble; the teacher is responsible for designating an appropriate means of increasing the rigor for the student in each subsequent year.

#### Examples:

- A 3rd grade student beginning in Elementary Band may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 2nd grade student who has taken violin lessons for several years and who is musically literate may receive instruction in Elementary Orchestra and be assessed according to the Grade 5 benchmarks, repeating use of these benchmarks with increased rigor in each subsequent year.
- A 5th grader singing in Elementary Chorus for the first time may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 4th grader in Handbell Ensemble (Special Ensemble) for the first time may receive instruction and be assessed according to the Grade 3 benchmarks. The same student, in Orff Ensemble (Special Ensemble) for the second year, may receive instruction and be assessed according to the Grade 4 benchmarks.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

Course Number: 5013010
Course Solution: Grades PreK to 12 Education
Courses > Grade Group: Grades PreK to 5 Education
Courses > Subject: Music Education > SubSubject:
General >
Abbreviated Title: ELEM CHORUS
Course Status: Course Approved
Course Status: Course Approved

Grade Level(s): K,1,2,3,4,5,PreK

## Educator Certifications

Music Education (Elementary Grades 1-6) Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12)

# Elementary Chorus (#5013010) 2022 - And Beyond

| Name           | Description   |
|----------------|---|
|                | Describe listening skills and how they support appreciation of musical works.   |
| MU.3.C.1.1:    | Clarifications:   |
|                | e.g., focus: form, instrumentation, tempo, dynamics; organize: listening maps, active listening, checklists   |
|                | Respond to a musical work in a variety of ways and compare individual interpretations.  |
| MU.3.C.1.2:    | Clarifications:   |
|                | e.g., move, draw, sing, play, gesture, conduct  |
| MU.3.C.1.4:    | Discriminate between unison and two-part singing.   |
| MU.3.C.2.1:    | Evaluate performances of familiar music using teacher-established criteria.   |
|                | Identify musical characteristics and elements within a piece of music when discussing the value of the work.  |
| MU.3.C.3.1:    | Clarifications:   |
|                | e.g., tempo, rhythm, timbre, form, instrumentation, texture   |
|                | Identify musicians in the school, community, and media.   |
| MIL3 F 2 1·    | Clarifications  |
| 10.011.2.11    | e.g., band, chorus, and/or orchestra member; music teacher; cantor, choir director, or song leader in religious services  |
|                | Describe opportunities for personal music-making  |
| MILLA F. D. D. |   |
| IVIU.3.F.2.2.  | e.g., performing ensembles, individual lessons, community and church music groups, family, playground, computer-generated music   |
|                | Collaborate with others to proste a musical presentation and caluse window individual contributions as an integral part of the whole  |
|                |   |
| MU.3.F.3.1:    | Clarifications:   |
|                | e.g., work together, communicate enectively, share tasks and responsibilities, work wer in cooperative rearning groups  |
| MU.3.H.1.2:    | Identify significant information about specified composers and one or more of their musical works.  |
|                | Experience and discuss, using correct music and other relevant content-area vocabulary, similarities in the use of pattern, line, and form in music and other teacher-selected contexts |
| MU.3.H.3.1:    |   |
|                | e a lin dance visual art language arts pulse rhythm fluency   |
|                |   |
|                |   |
| MU.3.0.1.1:    | Clarifications:   |
|                |   |
|                | Identify and describe the musical form of a familiar song.  |
| MU.3.0.1.2:    | Clarifications:   |
|                |   |
| MU.3.0.3.1:    | Describe how tempo and dynamics can change the mood or emotion of a piece of music.   |
|                | identify patterns in songs to aid the development of sequencing and memorization skills.  |
| MU.3.S.2.1:    | Clarifications:   |
|                |   |
| MU.3.S.3.1:    | Sing rounds, canons, or ostinati in an appropriate range, using head voice and maintaining pitch.   |
|                | Sing simple la-sol-mi-re-do patterns at sight.  |
| MU.3.S.3.3:    | Clarifications:   |
|                |   |
|                | Develop effective listening strategies and describe how they can support appreciation of musical works.   |
| MU.4.C.1.1:    | Clarifications:   |
|                | e.g., listen for form, instrumentation, tempo, dynamics, melodic line, rhythm patterns; organize thoughts using listening maps, active listening,                                       |
|                |   |
|                | Describe, using correct music vocabulary, what is heard in a specific musical work.   |
| MU.4.C.1.2:    | Clarifications:   |
|                | e.g., movement of melodic line, tempo, repeated and contrasting patterns  |
| MU.4.C.1.4:    | Identify and describe the four primary voice parts, i.e., soprano, alto, tenor, bass.   |
|                | Identity and describe basic music performance techniques to provide a foundation for critiquing one's self and others.  |
| MU.4.C.2.1:    | Clarifications:   |
|                | e.g., intonation, balance, biend, timbre, posture, breath support   |
| MU.4.C.2.2:    | Critique specific techniques in one's own and others performances using teacher-established criteria.   |
|                | Describe characteristics that make various musical works appealing.   |
| MU.4.C.3.1:    | Clarifications:   |
|                | e.g., tempo, rnytnm, dynamics, blend, timbre, form, texture, instrumentation  |

|             | Describe roles and careers of selected musicians.   |
|-------------|---|
| MU.4.F.2.1: | Clarifications:<br>e.g., teacher, conductor, composer, studio musician, recording technician, sound engineer, entertainer   |
|             | Identify the characteristics and behaviors displayed by successful student musicians, and discuss how these qualities will contribute to success beyond the music classroom.  |
| MU.4.F.3.1: | Clarifications:<br>e.g., punctual, prepared, dependable, self-disciplined, solutions-oriented, shows initiative, uses time wisely   |
| MU.4.H.1.2: | Describe the influence of selected composers on the musical works and practices or traditions of their time.  |
| MU.4.H.3.1: | Identify connections among music and other contexts, using correct music and other relevant content-area vocabulary, and explore how learning in one academic area can help with knowledge or skill acquisition in a different academic area. |
|             | e.g., movement, form, repetition, rhythmic patterns/numeric patterns, fractions, vibrations/sound waves   |
|             | Compare musical elements in different types of music, using correct music vocabulary, as a foundation for understanding the structural conventions of specific styles.  |
| MU.4.O.1.1: | Clarifications:<br>e.g., rules of rhythm, melody, timbre, form, tonality, harmony, meter; styles: Classical, Baroque  |
|             | Identify how expressive elements and lyrics affect the mood or emotion of a song.   |
| MU.4.O.3.1: | Clarifications:<br>e.g., tempo, dynamics, phrasing, articulation  |
| MU.4.0.3.2: | Apply expressive elements to a vocal or instrumental piece and, using correct music vocabulary, explain one's choices.<br>Arrange a familiar song for voices or instruments by manipulating form.   |
| MU.4.S.1.3: | Clarifications:<br>e.g., introduction, interlude/bridge, coda, ABA, rondo   |
| MU.4.S.2.1: | Apply knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsal and performance.   |
| MU.4.S.3.1: | Sing rounds, canons, and/or partner songs in an appropriate range, using proper vocal technique and maintaining pitch.  |
| MU.4.S.3.3: | Clarifications:         e.g., high do, low sol, low la; vocal and/or instrumental   |
|             | Discuss and apply listening strategies to support appreciation of musical works.  |
| MU.5.C.1.1: | Clarifications:<br>e.g., focus: structure, instrumentation, tempo, dynamics, melodic line, rhythm patterns, style/genre; organize: listening maps, active listening,<br>checklists  |
| MU.5.C.1.2: | Hypothesize and discuss, using correct music vocabulary, the composer's intent for a specific musical work. Clarifications: e.g., title, historical notes, quality recordings, instrumentation, expressive elements                           |
| MU.5.C.1.4: | Identify, aurally, the four primary voice parts, i.e., soprano, alto, tenor, bass, of a mixed choir.  |
|             | Define criteria, using correct music vocabulary, to critique one's own and others performance.  |
| MU.5.C.2.1: | Clarifications:<br>e.g., intonation, balance, blend, timbre   |
| MU.5.C.2.2: | Describe changes, using correct music vocabulary, in one's own and/or others performance over time.   |
| MU.5.C.3.1: | Develop criteria to evaluate an exemplary musical work from a specific period or genre.   |
| MU.5.F.2.1: | Clarifications:<br>e.g., music merchant, ticket agent, marketer, agent, security guard, food-and-beverage merchant  |
| MU.5.F.2.2: | Explain why live performances are important to the career of the artist and the success of performance venues.  |
|             | Examine and discuss the characteristics and behaviors displayed by successful student musicians that can be applied outside the music classroom.  |
| MU.5.F.3.1: | Clarifications:<br>e.g., dedicated, works toward mastery, punctual, prepared, dependable, self-disciplined, solutions-oriented  |
| MU.5.H.1.2: | Compare and describe the compositional characteristics used by two or more composers whose works are studied in class.  |
| MU.5.H.3.1: | Examine critical-thinking processes in music and describe how they can be transferred to other disciplines.  Clarifications:  |
|             | e.g., reading, writing, observing, listening, evaluating, embellishing, revising  |
| MU 5 O 1 1  | Analyze, using correct music vocabulary, the use of musical elements in various styles of music as a foundation for understanding the creative process.   |
| WU.5.0.1.1: | e.g., rhythm patterns, melody, timbre, form, tonality, harmony, meter, key; styles: Classical, Baroque, Romantic, nationalistic, jazz   |
|             | Examine and explain how expressive elements, when used in a selected musical work, affect personal response.  |
| MU.5.O.3.1: | Clarifications:<br>e.g., tempo, dynamics, timbre, texture, phrasing, articulation   |
| MU.5.0.3.2: | Perform expressive elements in a vocal or instrumental piece as indicated by the score and/or conductor.<br>Arrange a familiar song by manipulating specified aspects of music  |
| MU.5.S.1.3: | Clarifications:<br>e.g., dynamics, tempo, lyrics, form, rhythm, instrumentation   |
| MU.5.S.1.4: | Sing or play simple melodic patterns by ear with support from the teacher.  |

| MU.5.S.2.1:     | Use expressive elements and knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsals and performance.   |
|-----------------|--|
| MU.5.S.2.2:     | Apply performance techniques to familiar music.  |
| MU.5.S.3.1:     | Sing part songs in an appropriate range, using proper vocal technique and maintaining pitch.   |
| MU.5.S.3.3:     | Perform simple diatonic melodies at sight.  Clarifications: e.g., vocal and/or instrumental  |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>• Select efficient and appropriate methods for solving problems within the given context.<br>• Maintain flexibility and accuracy while performing procedures and mental calculations.<br>• Complete tasks accurately and with confidence.<br>• Adapt procedures to apply them to a new context.<br>• Use feedback to improve efficiency when performing calculations.<br><b>Clarifications:</b><br>Teachers who encourage students to complete tasks with mathematical fluency:<br>• Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>• Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.  |

|                      | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.   |
|----------------------|---|
|                      | Assess the reasonableness of solutions.   |
| MA.K12.MTR.6.1:      | <ul> <li>Mathematicians who assess the reasonableness of solutions:</li> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to varify colutions through instifications:</li> </ul>         |
|                      | Apply mathematics to real-world contexts  |
| MA K12 MTD 7 1-      | <ul> <li>Apply indificient to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.   <ul> <li>Redesign models and methods to improve accuracy or efficiency</li> </ul> </li> </ul>   |
| MIA.K 12.1011 N.7.1. | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>  |
| ELA.K12.EE.1.1:      | Cite evidence to explain and justify reasoning.  Clarifications:  K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.  4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide |
|                      | referenced by the instructor.<br>6-8 Students continue with previous skills and use a style guide to create a proper citation.<br>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                      | Read and comprehend grade-level complex texts proficiently  |
| ELA.K12.EE.2.1:      | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                      | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:      | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
| ELA.K12.EE.4.1:      | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
| ELA.K12.EE.5.1:      | Use the accepted rules governing a specific format to create quality work.<br>Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                      | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:      | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends   |

## VERSION DESCRIPTION

Students who have varying levels of experience in chorus develop beginning vocal technique and skills, notational literacy and fluency, expressive and stylistic interpretation, part-singing, critical and creative thinking skills, and an appreciation of music from around the world and throughout history. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## GENERAL NOTES

The course descriptions for Elementary Music Electives have been designed to accommodate the mixing of grade levels, experience, and abilities within the same ensemble. Music teachers for elementary music electives should select the most appropriate set of grade-specific benchmarks based on each student's experience, music literacy, and available instruction time. Once an elementary student has entered a course at a specific level of benchmarks, he or she should progress to the next set of grade-specific benchmarks in the sequence for purposes of assessment. If a student reaches the Grade 5 level prior to 5th grade, he or she may continue to participate in the ensemble; the teacher is responsible for designating an appropriate means of increasing the rigor for the student in each subsequent year.

#### Examples:

- A 3rd grade student beginning in Elementary Band may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 2nd grade student who has taken violin lessons for several years and who is musically literate may receive instruction in Elementary Orchestra and be assessed according to the Grade 5 benchmarks, repeating use of these benchmarks with increased rigor in each subsequent year.
- A 5th grader singing in Elementary Chorus for the first time may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 4th grader in Handbell Ensemble (Special Ensemble) for the first time may receive instruction and be assessed according to the Grade 3 benchmarks. The same student, in Orff Ensemble (Special Ensemble) for the second year, may receive instruction and be assessed according to the Grade 4 benchmarks.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### **Educator Certifications**

| Music Education (Elementary Grades 1-6)            |
|--|
| Music (Elementary and Secondary Grades K-12)       |
| Vocal Music (Elementary and Secondary Grades K-12) |

| Name        | Description   |
|-------------|---|
|             | Describe listening skills and how they support appreciation of musical works.   |
| MU.3.C.1.1: | Clarifications:   |
|             | e.g., focus: form, instrumentation, tempo, dynamics; organize: listening maps, active listening, checklists   |
|             | Respond to a musical work in a variety of ways and compare individual interpretations.  |
| MU.3.C.1.2: | Clarifications:   |
|             | e.g., move, draw, sing, play, gesture, conduct  |
|             | Identify families of orchestral and band instruments.   |
| MU.3.C.1.3: | Clarifications:   |
|             | e.g., strings, woodwinds, brass, percussion, keyboards  |
| MU.3.C.2.1: | Evaluate performances of familiar music using teacher-established criteria.   |
|             | Identify musical characteristics and elements within a piece of music when discussing the value of the work.  |
| MU.3.C.3.1: | Clarifications:   |
|             | e.g., tempo, rhythm, timbre, form, instrumentation, texture   |
|             | Identify musicians in the school, community, and media.   |
| MU.3.F.2.1: | Clarifications:   |
|             | e.g., band, chorus, and/or orchestra member; music teacher; cantor, choir director, or song leader in religious services                                |
|             | Describe opportunities for personal music-making.   |
| MU.3.F.2.2: | Clarifications:   |
|             | e.g., performing ensembles, individual lessons, community and church music groups, family, playground, computer-generated music                         |
|             | Collaborate with others to create a musical presentation and acknowledge individual contributions as an integral part of the whole.                     |
| MU.3.F.3.1: | Clarifications:   |
|             | e.g., work together, communicate effectively, share tasks and responsibilities, work well in cooperative learning groups                                |
| MU.3.H.1.2: | Identify significant information about specified composers and one or more of their musical works.  |
|             | Experience and discuss, using correct music and other relevant content-area vocabulary, similarities in the use of pattern, line, and form in music and |
| MU.3.H.3.1: |   |
|             | e.g., in dance, visual art, language arts, pulse, rhythm, fluency   |
|             | Identify using correct music vocabulary, the elements in a musical work   |
| MU 2 O 1 1. |   |
| 10.3.0.1.1. | e.g., rhythm, pitch, timbre, form   |
|             | Identify and describe the musical form of a familiar song   |
| MU 3 ∩ 1 2· |   |
| 10.3.0.1.2. | e.g., AB, ABA, ABABA, call-and-response, verse/refrain, rondo, intro, coda  |
| MU.3.0.3.1: | Describe how tempo and dynamics can change the mood or emotion of a piece of music.   |
|             | Identify patterns in songs to aid the development of sequencing and memorization skills.  |
| MU.3.S.2.1: | Clarifications:   |
|             | e.g., parts of a round, parts of a layered work   |
|             | Sing simple la-sol-mi-re-do patterns at sight.  |
| MU.3.S.3.3: | Clarifications:   |
|             | e.g., reading from hand signs; reading from nontraditional or traditional notation  |
|             | Develop effective listening strategies and describe how they can support appreciation of musical works.   |
|             | Clarifications:   |
| MU.4.C.1.1: | e.g., listen for form, instrumentation, tempo, dynamics, melodic line, rhythm patterns; organize thoughts using listening maps, active listening,       |
|             | checklists  |
|             | Describe, using correct music vocabulary, what is heard in a specific musical work.   |
| MU.4.C.1.2: | Clarifications:   |
|             | e.g., movement of melodic line, tempo, repeated and contrasting patterns  |
| MU.4.C.1.3: | Classify orchestral and band instruments as strings, woodwinds, brass, percussion, or keyboard.   |
|             | Identify and describe basic music performance techniques to provide a foundation for critiquing one's self and others.                                  |
| MU.4.C.2.1: | Clarifications:   |
|             | e.g., intonation, balance, blend, timbre, posture, breath support   |
| MU.4.C.2.2: | Critique specific techniques in one's own and others performances using teacher-established criteria.   |
|             | Describe characteristics that make various musical works appealing.   |
| MU.4.C.3.1: | Clarifications:   |

|              | e.g., tempo, rhythm, dynamics, blend, timbre, form, texture, instrumentation  |
|--------------|---|
|              | Describe roles and careers of selected musicians.   |
| MU.4.F.2.1:  | Clarifications:   |
|              | e.g., teacher, conductor, composer, studio musician, recording technician, sound engineer, entertainer  |
| MU.4.F.3.1:  | Identify the characteristics and behaviors displayed by successful student musicians, and discuss how these qualities will contribute to success beyond the music classroom |
|              | Clarifications:   |
|              | e.g., punctual, prepared, dependable, self-disciplined, solutions-oriented, shows initiative, uses time wisely  |
|              | Discuss the safe, legal way to download songs and other media.  |
| MU.4.F.3.2:  | Clarifications:   |
|              | e.g., sharing personal and financial information, copying and sharing music   |
| MU.4.H.1.2:  | Describe the influence of selected composers on the musical works and practices or traditions of their time.  |
|              | Identify connections among music and other contexts, using correct music and other relevant content-area vocabulary, and explore how learning in                            |
| MU.4.H.3.1:  |   |
|              | e.g., movement, form, repetition, rhythmic patterns/numeric patterns, fractions, vibrations/sound waves   |
|              | Compare musical elements in different types of music, using correct music vocabulary, as a foundation for understanding the structural conventions of                       |
|              | specific styles.  |
| MU.4.O.1.1:  | Clarifications:   |
|              | e.g., rules of rhythm, melody, timbre, form, tonality, harmony, meter; styles: Classical, Baroque   |
|              | Identify how expressive elements and lyrics affect the mood or emotion of a song.   |
| MU.4.0.3.1:  | Clarifications:   |
|              | e.g., tempo, dynamics, prrasing, articulation   |
| MU.4.0.3.2:  | Apply expressive elements to a vocal or instrumental piece and, using correct music vocabulary, explain one's choices.  |
| MIL / S 1 3· |   |
| 10.4.3.1.3.  | e.g., introduction, interlude/bridge, coda, ABA, rondo  |
| MU.4.S.2.1:  | Apply knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsal and performance.   |
|              | Perform extended pentatonic melodies at sight.  |
| MU.4.S.3.3:  | Clarifications:   |
|              | e.g., high do, low sol, low la; vocal and/or instrumental   |
|              | Discuss and apply listening strategies to support appreciation of musical works.  |
| MU.5.C.1.1:  | Clarifications:   |
|              | e.g., focus: structure, instrumentation, tempo, dynamics, melodic line, rhythm patterns, style/genre; organize: listening maps, active listening, ichecklists               |
|              | Hypothesize and discuss, using correct music vocabulary, the composer's intent for a specific musical work.   |
| MU.5.C.1.2:  | Clarifications:   |
|              | e.g., title, historical notes, quality recordings, instrumentation, expressive elements   |
|              | Identify, aurally, selected instruments of the band and orchestra.  |
| MU 5 C 1 2   | Clarifications:   |
| 10.5.0.1.5.  | e.g., violin, cello, string bass, flute, clarinet, oboe, bassoon, trumpet, trombone, tuba, French horn, bass drum, snare drum, xylophone, chimes,                           |
|              |   |
|              | Define criteria, using correct music vocabulary, to critique one's own and others performance.  |
| MU.5.C.2.1:  | Clarifications:   |
| MU 5 C 2 2   | Describe changes, using correct music vocabulary, in one's own and/or others performance over time  |
| MU.5.C.3.1:  | Develop criteria to evaluate an exemplary musical work from a specific period or genre.   |
|              | Describe jobs associated with various types of concert venues and performing arts centers.  |
| MU.5.F.2.1:  | Clarifications:   |
|              | e.g., music merchant, ticket agent, marketer, agent, security guard, food-and-beverage merchant   |
| MU.5.F.2.2:  | Explain why live performances are important to the career of the artist and the success of performance venues.  |
|              | Examine and discuss the characteristics and behaviors displayed by successful student musicians that can be applied outside the music classroom.                            |
| MU.5.F.3.1:  | Clarifications:   |
|              | e.g., deucated, works toward mastery, punctual, prepared, dependable, sen-disciplined, solutions-onented  |
|              | Clarificatione:   |
| WU.5.F.3.2:  | e.g., downloading music and other digital media, sharing personal and financial information. copying music  |
| MU 5 H 1 2   | Compare and describe the compositional characteristics used by two or more composers whose works are studied in class   |
|              | Examine critical-thinking processes in music and describe how they can be transferred to other disciplines.   |
| MU.5.H.3.1:  | Clarifications:   |
|              | e.g., reading, writing, observing, listening, evaluating, embellishing, revising  |
|              | Analyze, using correct music vocabulary, the use of musical elements in various styles of music as a foundation for understanding the creative process                      |
| MU.5.0.1.1:  | Clarifications:   |

|                  | Examine and explain how expressive elements, when used in a selected musical work, affect personal response.   |
|------------------|--|
| MU.5.0.3.1:      | Clarifications:  |
|                  | e.g., tempo, dynamics, timbre, texture, phrasing, articulation   |
| 1U.5.0.3.2:      | Perform expressive elements in a vocal or instrumental piece as indicated by the score and/or conductor.   |
|                  | Arrange a familiar song by manipulating specified aspects of music.  |
| MU.5.S.1.3:      | Clarifications:  |
|                  | e.g., dynamics, tempo, lyrics, form, rhythm, instrumentation   |
| MU.5.S.1.4:      | Sing or play simple melodic patterns by ear with support from the teacher.   |
|                  | Use expressive elements and knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsals and  |
| WU.5.S.2.1:      | performance.   |
| MU.5.S.2.2:      | Apply performance techniques to familiar music.  |
|                  | Perform simple diatonic melodies at sight.   |
| MU.5.S.3.3:      | Clarifications:  |
|                  | e.g., vocal and/or instrumental  |
| LAFS.3.RI.2.4:   | Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 3 topic or subject area.   |
|                  | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 3 topics and texts,   |
|                  | building on others' ideas and expressing their own clearly.  |
|                  | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the table to explore ideas under discussion.  |
|                  | <ul> <li>b. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the</li> </ul>   |
| LAFS.3.SL.1.1:   | topics and texts under discussion).  |
|                  | c. Ask guestions to check understanding of information presented, stay on topic, and link their comments to the remarks of others.   |
|                  | d. Explain their own ideas and understanding in light of the discussion.   |
|                  |  |
|                  | Standard Relation to Course: Supporting  |
| LAFS.3.SL.1.2:   | quantitatively, and orally.  |
| LAFS.3.SL.1.3:   | Ask and answer questions about information from a speaker, offering appropriate elaboration and detail.  |
| LAFS.4.RI.2.4:   | Determine the meaning of general academic and domain-specific words or phrases in a text relevant to a grade 4 topic or subject area.  |
|                  | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 4 topics and texts,   |
|                  | building on others' ideas and expressing their own clearly.  |
|                  | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about   |
|                  | the topic to explore ideas under discussion.   |
| LAFS.4.SL.1.1:   | b. Follow agreed-upon rules for discussions and carry out assigned roles.  |
|                  | c. Pose and respond to specific questions to clarify or follow up on information, and make comments that contribute to the discussion and link to  |
|                  | the remarks of others.   |
|                  | d. Review the key ideas expressed and explain their own ideas and understanding in light of the discussion.  |
|                  | Standard Relation to Course: Supporting  |
| LAFS.4.SL.1.2:   | Paraphrase portions of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.  |
| LAFS.4.SL.1.3:   | Identify the reasons and evidence a speaker provides to support particular points.   |
| LAFS.5.R1.2.4:   | Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 5 topic or subject area.   |
|                  | Engage enectively in a range of collaborative discussions (one-on-one, in groups, and teacher-red) with diverse partners on grade 5 topics and texts, building on others' ideas and expressing their own clearly.  |
|                  | a. Come to discussions prepared, having read or studied required material: explicitly draw on that preparation and other information known about   |
|                  | the topic to explore ideas under discussion.   |
| LAFS.5.SL.1.1:   | b. Follow agreed-upon rules for discussions and carry out assigned roles.  |
|                  | c. Pose and respond to specific questions by making comments that contribute to the discussion and elaborate on the remarks of others.   |
|                  | d. Review the key ideas expressed and draw conclusions in light of information and knowledge gained from the discussions.  |
|                  | Standard Relation to Course: Supporting  |
| LAFS.5.SL.1.2:   | Summarize a written text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.   |
| LAFS.5.SL.1.3:   | Summarize the points a speaker makes and explain how each claim is supported by reasons and evidence.  |
|                  | Use appropriate tools strategically.   |
|                  |  |
|                  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,   |
|                  | Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools  |
|                  | might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze   |
| MAFS.K12.MP.5.1: | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other   |
|                  | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying   |
|                  | assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify  |
|                  | relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to us  |
|                  | Standard Relation to Course: Supporting  |
|                  | Attend to precision.   |
|                  |  |
|                  | ment of the standard standar |
|                  | mathematically proticient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose including using the equal size consistently and appropriately. They are careful about   |
| MAFS.K12.MP.6.1: | reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with guantities in a problem. They calculate accurately and efficiently   |

|                   | formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|-------------------|--|
|                   | Standard Relation to Course: Supporting  |
|                   | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. |
|                   | Standard Relation to Course: Supporting  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students who have varying levels of experience on a band instrument to explore high-quality beginning band music. They develop foundational instrumental techniques, skills, and music literacy. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## **GENERAL NOTES**

The course descriptions for Elementary Music Electives have been designed to accommodate the mixing of grade levels, experience, and abilities within the same ensemble. Music teachers for elementary music electives should select the most appropriate set of grade-specific benchmarks based on each student's experience, music literacy, and available instruction time. Once an elementary student has entered a course at a specific level of benchmarks, he or she should progress to the next set of grade-specific benchmarks in the sequence for purposes of assessment. If a student reaches the Grade 5 level prior to 5th grade, he or she may continue to participate in the ensemble; the teacher is responsible for designating an appropriate means of increasing the rigor for the student in each subsequent year.

#### Examples:

- A 3rd grade student beginning in Elementary Band may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 2nd grade student who has taken violin lessons for several years and who is musically literate may receive instruction in Elementary Orchestra and be assessed according to the Grade 5 benchmarks, repeating use of these benchmarks with increased rigor in each subsequent year.
- A 5th grader singing in Elementary Chorus for the first time may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 4th grader in Handbell Ensemble (Special Ensemble) for the first time may receive instruction and be assessed according to the Grade 3 benchmarks. The same student, in Orff Ensemble (Special Ensemble) for the second year, may receive instruction and be assessed according to the Grade 4 benchmarks.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

Course Number: 5013020

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades PreK to 5 Education Courses > Subject: Music Education > SubSubject: General > Abbreviated Title: ELEM BAND Course Length: Year (Y)

Course Status: Course Approved Grade Level(s): K,1,2,3,4,5,PreK

## **Educator Certifications**

| Music Education (Elementary Grades 1-6)      |  |
|--|--|
| Music (Elementary and Secondary Grades K-12) |  |
|  |  |

| Name        | Description   |
|-------------|---|
|             | Describe listening skills and how they support appreciation of musical works.   |
| MU.3.C.1.1: | Clarifications:   |
|             | e.g., focus: form, instrumentation, tempo, dynamics; organize: listening maps, active listening, checklists   |
|             | Respond to a musical work in a variety of ways and compare individual interpretations.  |
| MU.3.C.1.2: | Clarifications:   |
|             | e.g., move, draw, sing, play, gesture, conduct  |
|             | Identify families of orchestral and band instruments.   |
| MU.3.C.1.3: | Clarifications:   |
|             | e.g., strings, woodwinds, brass, percussion, keyboards  |
| MU.3.C.2.1: | Evaluate performances of familiar music using teacher-established criteria.   |
|             | Identify musical characteristics and elements within a piece of music when discussing the value of the work.  |
| MU.3.C.3.1: | Clarifications:   |
|             | e.g., tempo, rhythm, timbre, form, instrumentation, texture   |
|             | Identify musicians in the school, community, and media.   |
| MU.3.F.2.1: | Clarifications:   |
|             | e.g., band, chorus, and/or orchestra member; music teacher; cantor, choir director, or song leader in religious services                                |
|             | Describe opportunities for personal music-making.   |
| MU.3.F.2.2: | Clarifications:   |
|             | e.g., performing ensembles, individual lessons, community and church music groups, family, playground, computer-generated music                         |
|             | Collaborate with others to create a musical presentation and acknowledge individual contributions as an integral part of the whole.                     |
| MU.3.F.3.1: | Clarifications:   |
|             | e.g., work together, communicate effectively, share tasks and responsibilities, work well in cooperative learning groups                                |
| MU.3.H.1.2: | Identify significant information about specified composers and one or more of their musical works.  |
|             | Experience and discuss, using correct music and other relevant content-area vocabulary, similarities in the use of pattern, line, and form in music and |
|             | other teacher-selected contexts.  |
| MU.3.H.3.1: | Clarifications:   |
|             | e.g., in dance, visual art, language arts, pulse, rhythm, fluency   |
|             | Identify, using correct music vocabulary, the elements in a musical work.   |
| MU.3.0.1.1: | Clarifications:   |
|             | e.g., rhythm, pitch, timbre, form   |
|             | Identify and describe the musical form of a familiar song.  |
| MU.3.0.1.2: | Clarifications:   |
|             | e.g., AB, ABA, ABABA, call-and-response, verse/refrain, rondo, intro, coda  |
| MU.3.O.3.1: | Describe how tempo and dynamics can change the mood or emotion of a piece of music.   |
|             | Identify patterns in songs to aid the development of sequencing and memorization skills.  |
| MU.3.S.2.1: | Clarifications:   |
|             | e.g., parts of a round, parts of a layered work   |
|             | Sing simple la-sol-mi-re-do patterns at sight.  |
| MU.3.S.3.3: | Clarifications:   |
|             | e.g., reading from hand signs; reading from nontraditional or traditional notation  |
|             | Develop effective listening strategies and describe how they can support appreciation of musical works.   |
| MU 4 C 1 1· | Clarifications:   |
|             | e.g., listen for form, instrumentation, tempo, dynamics, melodic line, rhythm patterns; organize thoughts using listening maps, active listening,       |
|             | checklists  |
|             | Describe, using correct music vocabulary, what is heard in a specific musical work.   |
| MU.4.C.1.2: | Clarifications:   |
|             | e.g., movement of melodic line, tempo, repeated and contrasting patterns  |
| MU.4.C.1.3: | Classify orchestral and band instruments as strings, woodwinds, brass, percussion, or keyboard.   |
|             | Identify and describe basic music performance techniques to provide a foundation for critiquing one's self and others.                                  |
| MU.4.C.2.1: | Clarifications:   |
|             | e.g., intonation, balance, blend, timbre, posture, breath support   |
| MU.4.C.2.2: | Critique specific techniques in one's own and others performances using teacher-established criteria.   |
|             | Describe characteristics that make various musical works appealing.   |
| MU.4.C.3.1: | Clarifications:   |

|              | e.g., tempo, rhythm, dynamics, blend, timbre, form, texture, instrumentation  |
|--------------|---|
|              | Describe roles and careers of selected musicians.   |
| MU.4.F.2.1:  | Clarifications:   |
|              | e.g., teacher, conductor, composer, studio musician, recording technician, sound engineer, entertainer  |
|              | Identify the characteristics and behaviors displayed by successful student musicians, and discuss how these qualities will contribute to success beyond the music classroom.  |
| MU.4.F.3.1:  | Clarifications:   |
|              | e.g., punctual, prepared, dependable, self-disciplined, solutions-oriented, shows initiative, uses time wisely  |
|              | Discuss the safe, legal way to download songs and other media.  |
| MU.4.F.3.2:  | Clarifications:<br>e.g., sharing personal and financial information, copying and sharing music  |
| MU.4.H.1.2:  | Describe the influence of selected composers on the musical works and practices or traditions of their time.  |
|              | Identify connections among music and other contexts, using correct music and other relevant content-area vocabulary, and explore how learning in one academic area can help with knowledge or skill acquisition in a different academic area. |
| MU.4.H.3.1:  | Clarifications:<br>e.g., movement, form, repetition, rhythmic patterns/numeric patterns, fractions, vibrations/sound waves  |
|              | Compare musical elements in different types of music, using correct music vocabulary, as a foundation for understanding the structural conventions o specific styles.   |
| MU.4.O.1.1:  | Clarifications:<br>e.g., rules of rhythm, melody, timbre, form, tonality, harmony, meter; styles: Classical, Baroque  |
|              | Identify how expressive elements and lyrics affect the mood or emotion of a song.   |
| MU.4.0.3.1:  | Clarifications:   |
|              | e.g., tempo, dynamics, phrasing, articulation   |
| MU.4.0.3.2:  | Apply expressive elements to a vocal or instrumental piece and, using correct music vocabulary, explain one's choices.  |
|              | Arrange a familiar song for voices or instruments by manipulating form.   |
| WIU.4.5.1.3: | e.g., introduction, interlude/bridge, coda, ABA, rondo  |
| MU.4.S.2.1:  | Apply knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsal and performance.<br>Perform extended pentatonic melodies at sight.   |
| MU.4.S.3.3:  | Clarifications:<br>e.g., high do, low sol, low la; vocal and/or instrumental  |
|              | Discuss and apply listening strategies to support appreciation of musical works.  |
| MU.5.C.1.1:  | Clarifications:<br>e.g., focus: structure, instrumentation, tempo, dynamics, melodic line, rhythm patterns, style/genre; organize: listening maps, active listening,<br>checklists  |
|              | Hypothesize and discuss, using correct music vocabulary, the composer's intent for a specific musical work.   |
| MU.5.C.1.2:  | Clarifications:<br>e.g., title, historical notes, quality recordings, instrumentation, expressive elements  |
|              | Identify, aurally, selected instruments of the band and orchestra.  |
| MU.5.C.1.3:  | Clarifications:<br>e.g., violin, cello, string bass, flute, clarinet, oboe, bassoon, trumpet, trombone, tuba, French horn, bass drum, snare drum, xylophone, chimes,<br>piano, harpsichord  |
|              | Define criteria, using correct music vocabulary, to critique one's own and others performance.  |
| MU.5.C.2.1:  | Clarifications:<br>e.g., intonation, balance, blend, timbre   |
| MU.5.C.2.2:  | Describe changes, using correct music vocabulary, in one's own and/or others performance over time.   |
| MU.5.C.3.1:  | Develop criteria to evaluate an exemplary musical work from a specific period or genre.   |
|              | Describe jobs associated with various types of concert venues and performing arts centers.  |
| MU.5.F.2.1:  | Clarifications:<br>e.g., music merchant, ticket agent, marketer, agent, security guard, food-and-beverage merchant  |
| MU.5.F.2.2:  | Explain why live performances are important to the career of the artist and the success of performance venues.  |
|              | Examine and discuss the characteristics and behaviors displayed by successful student musicians that can be applied outside the music classroom.  |
| MU.5.F.3.1:  | Clarifications:<br>e.g., dedicated, works toward mastery, punctual, prepared, dependable, self-disciplined, solutions-oriented  |
| MU.5.F.3.2:  | Practice safe, legal, and responsible acquisition and use of music media, and describe why it is important to do so.  |
|              | Clarifications:<br>e.g., downloading music and other digital media, sharing personal and financial information, copying music   |
| MU.5.H.1.2:  | Compare and describe the compositional characteristics used by two or more composers whose works are studied in class.  |
|              | Examine critical-thinking processes in music and describe how they can be transferred to other disciplines.   |
| MU.5.H.3.1:  | Clarifications:<br>e.g., reading, writing, observing, listening, evaluating, embellishing, revising   |
|              | Analyze, using correct music vocabulary, the use of musical elements in various styles of music as a foundation for understanding the creative process  |
| MU.5.0.1.1:  | Clarifications:   |

|                 | e.g., rhythm patterns, melody, timbre, form, tonality, harmony, meter, key; styles: Classical, Baroque, Romantic, nationalistic, jazz   |
|-----------------|---|
|                 | Examine and explain how expressive elements, when used in a selected musical work, affect personal response.  |
| MU.5.O.3.1:     | Clarifications:<br>e.g., tempo, dynamics, timbre, texture, phrasing, articulation   |
| MU.5.O.3.2:     | Perform expressive elements in a vocal or instrumental piece as indicated by the score and/or conductor.  |
|                 | Arrange a familiar song by manipulating specified aspects of music.   |
| MU.5.S.1.3:     | Clarifications:<br>e.g., dynamics, tempo, lyrics, form, rhythm, instrumentation   |
| MU.5.S.1.4:     | Sing or play simple melodic patterns by ear with support from the teacher.  |
| MU.5.S.2.1:     | Use expressive elements and knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsals and performance.  |
| MU.5.S.2.2:     | Apply performance techniques to familiar music.   |
| MU.5.S.3.3:     | Perform simple diatonic melodies at sight.  Clarifications:  e.g., vocal and/or instrumental  |
|                 | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>  |
| MA.K12.MTR.1.1: | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>   |
| MA.K12.MTR.2.1: | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:<br>• Build understanding through modeling and using manipulatives.<br>• Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.<br>• Progress from modeling problems with objects and drawings to using algorithms and equations.<br>• Express connections between concepts and representations.<br>• Choose a representation based on the given context or purpose.<br>Clarifications:<br>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:<br>• Help students make connections between concepts and representations.  |
| MA.K12.MTR.3.1: | <ul> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use faredback to improve officiency when performing encloyations.</li> </ul>  |
|                 | <ul> <li>Use readback to improve efficiency when performing calculations.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul> </li> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> </ul>  |
| MA.K12.MTR.4.1: | <ul> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> </ul> |

| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>Focus on relevant details within a problem.<br>Create plans and procedures to logically order events, steps or ideas to solve problems.<br>Decompose a complex problem into manageable parts.<br>Relate previously learned concepts to new concepts.<br>Look for similarities among problems.<br>Connect solutions of problems to more complicated large-scale situations.<br>Clarifications:<br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>Support students to develop generalizations based on the similarities found among problems.<br>Provide opportunities for students to create plans and procedures to solve problems.  |
|-----------------|---|
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.   |
|                 | <ul> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.  Clarifications:  K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.  4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  6-8 Students continue with previous skills and use a style guide to create a proper citation.  9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently.         Clarifications:         See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.3.1: | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
| ELA.K12.EE.4.1: | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.  In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |

|                   | Use the accepted rules governing a specific format to create quality work.   |
|-------------------|--|
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students who have varying levels of experience on a band instrument to explore high-quality beginning band music. They develop foundational instrumental techniques, skills, and music literacy. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## **GENERAL NOTES**

The course descriptions for Elementary Music Electives have been designed to accommodate the mixing of grade levels, experience, and abilities within the same ensemble. Music teachers for elementary music electives should select the most appropriate set of grade-specific benchmarks based on each student's experience, music literacy, and available instruction time. Once an elementary student has entered a course at a specific level of benchmarks, he or she should progress to the next set of grade-specific benchmarks in the sequence for purposes of assessment. If a student reaches the Grade 5 level prior to 5th grade, he or she may continue to participate in the ensemble; the teacher is responsible for designating an appropriate means of increasing the rigor for the student in each subsequent year.

#### Examples:

- A 3rd grade student beginning in Elementary Band may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 2nd grade student who has taken violin lessons for several years and who is musically literate may receive instruction in Elementary Orchestra and be assessed according to the Grade 5 benchmarks, repeating use of these benchmarks with increased rigor in each subsequent year.
- A 5th grader singing in Elementary Chorus for the first time may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 4th grader in Handbell Ensemble (Special Ensemble) for the first time may receive instruction and be assessed according to the Grade 3 benchmarks. The same student, in Orff Ensemble (Special Ensemble) for the second year, may receive instruction and be assessed according to the Grade 4 benchmarks.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 5013020

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades PreK to 5 Education Courses > Subject: Music Education > SubSubject: General > Abbreviated Title: ELEM BAND Course Length: Year (Y)

Course Status: State Board Approved Grade Level(s): K,1,2,3,4,5,PreK Music Education (Elementary Grades 1-6)

Music (Elementary and Secondary Grades K-12)

Instrumental Music (Elementary and Secondary Grades K-12)

# Elementary Orchestra (#5013030) 2015 - 2022 (current)

| Name         | Description   |
|--------------|---|
|              | Describe listening skills and how they support appreciation of musical works.   |
| MU.3.C.1.1:  | Clarifications:   |
|              | e.g., focus: form, instrumentation, tempo, dynamics; organize: listening maps, active listening, checklists   |
|              | Respond to a musical work in a variety of ways and compare individual interpretations.  |
| MU.3.C.1.2:  | Clarifications:   |
|              | e.g., move, draw, sing, play, gesture, conduct  |
|              | Identify families of orchestral and band instruments.   |
| MU.3.C.1.3:  | Clarifications:   |
|              | e.g., strings, woodwinds, brass, percussion, keyboards  |
| MU.3.C.2.1:  | Evaluate performances of familiar music using teacher-established criteria.   |
|              | Identify musical characteristics and elements within a piece of music when discussing the value of the work.  |
| MU.3.C.3.1:  | Clarifications:   |
|              | e.g., tempo, mythin, timbre, form, instrumentation, texture   |
|              | Identify musicians in the school, community, and media.   |
| MU.3.F.2.1:  | Clarifications:   |
|              |   |
|              |   |
| MU.3.F.2.2:  | Clarifications:   |
|              | Collaborate with others to create a musical presentation and acknowledge individual contributions as an integral part of the whole                      |
| МП 2 Г 2 1.  |   |
| WIU.3.F.3.1: | e.g., work together, communicate effectively, share tasks and responsibilities, work well in cooperative learning groups                                |
| MIL 3 H 1 2· | Identify significant information about specified composers and one or more of their musical works   |
| 10.3.11.1.2. | Experience and discuss, using correct music and other relevant content-area vocabulary, similarities in the use of pattern, line, and form in music and |
|              | other teacher-selected contexts.  |
| MU.3.H.3.1:  | Clarifications:   |
|              | e.g., in dance, visual art, language arts, pulse, rhythm, fluency   |
|              | Identify, using correct music vocabulary, the elements in a musical work.   |
| MU.3.0.1.1:  | Clarifications:   |
|              | e.g., rhythm, pitch, timbre, form   |
|              | Identify and describe the musical form of a familiar song.  |
| MU.3.0.1.2:  | Clarifications:   |
|              | e.g., AB, ABA, ABABA, call-and-response, verse/refrain, rondo, intro, coda  |
| MU.3.0.3.1:  | Describe how tempo and dynamics can change the mood or emotion of a piece of music.   |
|              | identify patterns in songs to aid the development of sequencing and memorization skills.  |
| MU.3.5.2.1:  | clarifications:   |
|              | Sing simple la sol mi re do patterns at sight   |
| MILOCOO.     |   |
| 10.3.3.3.3.  | e.g., reading from hand signs; reading from nontraditional or traditional notation  |
|              | Develop effective listening strategies and describe how they can support appreciation of musical works.   |
|              | Clarifications:   |
| MU.4.C.1.1:  | e.g., listen for form, instrumentation, tempo, dynamics, melodic line, rhythm patterns; organize thoughts using listening maps, active listening,       |
|              | checklists  |
|              | Describe, using correct music vocabulary, what is heard in a specific musical work.   |
| MU.4.C.1.2:  | Clarifications:   |
|              | e.g., movement of melodic line, tempo, repeated and contrasting patterns  |
| MU.4.C.1.3:  | Classify orchestral and band instruments as strings, woodwinds, brass, percussion, or keyboard.   |
|              | Identify and describe basic music performance techniques to provide a foundation for critiquing one's self and others.                                  |
| MU.4.C.2.1:  | Clarifications:   |
|              | e.g., Intonation, balance, blend, timbre, posture, breath support   |
| MU.4.C.2.2:  | Critique specific techniques in one's own and others performances using teacher-established criteria.   |
|              |   |
| WU.4.C.3.1:  | Clarifications:   |

|              | e.g., tempo, rhythm, dynamics, blend, timbre, form, texture, instrumentation  |
|--------------|---|
|              | Describe roles and careers of selected musicians.   |
| MU.4.F.2.1:  | Clarifications:   |
|              | e.g., teacher, conductor, composer, studio musician, recording technician, sound engineer, entertainer  |
|              | Identify the characteristics and behaviors displayed by successful student musicians, and discuss how these qualities will contribute to success beyond the music classroom.  |
| MU.4.F.3.1:  | Clarifications:   |
|              | e.g., punctual, prepared, dependable, self-disciplined, solutions-oriented, shows initiative, uses time wisely  |
|              | Discuss the safe, legal way to download songs and other media.  |
| MU.4.F.3.2:  | Clarifications:<br>e.g., sharing personal and financial information, copying and sharing music  |
| MU.4.H.1.2:  | Describe the influence of selected composers on the musical works and practices or traditions of their time.  |
|              | Identify connections among music and other contexts, using correct music and other relevant content-area vocabulary, and explore how learning in one academic area can help with knowledge or skill acquisition in a different academic area. |
| MU.4.H.3.1:  | Clarifications:<br>e.g., movement, form, repetition, rhythmic patterns/numeric patterns, fractions, vibrations/sound waves  |
|              | Compare musical elements in different types of music, using correct music vocabulary, as a foundation for understanding the structural conventions o specific styles.   |
| MU.4.0.1.1:  | Clarifications:<br>e.g., rules of rhythm, melody, timbre, form, tonality, harmony, meter; styles: Classical, Baroque  |
|              | Identify how expressive elements and lyrics affect the mood or emotion of a song.   |
| MU.4.0.3.1:  | Clarifications:   |
|              |   |
| MU.4.0.3.2:  | Apply expressive elements to a vocal or instrumental piece and, using correct music vocabulary, explain one's choices.  |
| MIL / S 1 3· |   |
| W0.4.3.1.3.  | e.g., introduction, interlude/bridge, coda, ABA, rondo  |
| MU.4.S.2.1:  | Apply knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsal and performance.<br>Perform extended pentatonic melodies at sight.   |
| MU.4.S.3.3:  | Clarifications:   |
|              | Discuss and apply listening strategies to support appreciation of musical works   |
| MU.5.C.1.1:  | Clarifications:<br>e.g., focus: structure, instrumentation, tempo, dynamics, melodic line, rhythm patterns, style/genre; organize: listening maps, active listening, checklists   |
|              | Hypothesize and discuss, using correct music vocabulary, the composer's intent for a specific musical work.   |
| MU.5.C.1.2:  | Clarifications:<br>e.g., title, historical notes, quality recordings, instrumentation, expressive elements  |
|              | Identify, aurally, selected instruments of the band and orchestra.  |
| MU.5.C.1.3:  | Clarifications:<br>e.g., violin, cello, string bass, flute, clarinet, oboe, bassoon, trumpet, trombone, tuba, French horn, bass drum, snare drum, xylophone, chimes,<br>piano, harpsichord  |
|              | Define criteria, using correct music vocabulary, to critique one's own and others performance.  |
| MU.5.C.2.1:  | Clarifications:<br>e.g., intonation, balance, blend, timbre   |
| MU.5.C.2.2:  | Describe changes, using correct music vocabulary, in one's own and/or others performance over time.   |
| MU.5.C.3.1:  | Develop criteria to evaluate an exemplary musical work from a specific period or genre.   |
|              | Describe jobs associated with various types of concert venues and performing arts centers.  |
| MU.5.F.2.1:  | Clarifications:<br>e.g., music merchant, ticket agent, marketer, agent, security guard, food-and-beverage merchant  |
| MU.5.F.2.2:  | Explain why live performances are important to the career of the artist and the success of performance venues.  |
|              | Examine and discuss the characteristics and behaviors displayed by successful student musicians that can be applied outside the music classroom.  |
| MU.5.F.3.1:  | Clarifications:<br>e.g., dedicated, works toward mastery, punctual, prepared, dependable, self-disciplined, solutions-oriented  |
|              | Practice safe, legal, and responsible acquisition and use of music media, and describe why it is important to do so.  |
| MU.5.F.3.2:  | Clarifications:<br>e.g., downloading music and other digital media, sharing personal and financial information, copying music   |
| MU.5.H.1.2:  | Compare and describe the compositional characteristics used by two or more composers whose works are studied in class.  |
|              | Examine critical-thinking processes in music and describe how they can be transferred to other disciplines.   |
| MU.5.H.3.1:  | Clarifications:<br>e.g., reading, writing, observing, listening, evaluating, embellishing, revising   |
|              | Analyze, using correct music vocabulary, the use of musical elements in various styles of music as a foundation for understanding the creative process  |
| MU.5.0.1.1:  | Clarifications:   |

|                       | Examine and explain how expressive elements, when used in a selected musical work, affect personal response   |
|-----------------------|---|
| 1115021.              |   |
| 10.5.0.3.1:           | e.g., tempo, dynamics, timbre, texture, phrasing, articulation  |
| MU 5 0 3 2·           | Derform expressive elements in a vocal or instrumental niece as indicated by the score and/or conductor   |
| 10.5.0.3.2.           | Arrange a familiar song by manipulating specified aspects of music  |
| 445612.               |   |
| /10.5.5.1.5.          | e.g., dynamics, tempo, lyrics, form, rhythm, instrumentation  |
|                       | Cing or play simple meladic potterns by convert from the teacher  |
| vi0.5.5.1.4.          | Sing of play simple melodic patients by ear with support nom the teacher.   |
| MU.5.S.2.1:           | performance.  |
| MU.5.S.2.2:           | Apply performance techniques to familiar music.   |
|                       | Perform simple diatonic melodies at sight.  |
| MU.5.S.3.3:           | Clarifications:   |
|                       | e.g., vocal and/or instrumental   |
| LAFS.3.RI.2.4:        | Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 3 topic or subject area.  |
|                       | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 3 topics and texts,  |
|                       | building on others' ideas and expressing their own clearly.   |
|                       | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about  |
|                       | the topic to explore ideas under discussion.  |
| LAFS.3.SL.1.1:        | b. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the second |
|                       | topics and texts under discussion).   |
|                       | <ul> <li>Ask questions to check understanding or information presented, stay on topic, and link their comments to the remarks or others.</li> <li>d Explain their own ideas and understanding in light of the discussion.</li> </ul>  |
|                       | a. Explain their own deas and understanding in ight of the discussion.  |
|                       | Standard Relation to Course: Supporting   |
| LAFS.3.SL.1.2:        | Determine the main ideas and supporting details of a text read aloud or information presented in diverse media and formats, including visually,   |
| LAFS 3 SL 1 3.        | quantitativery, and orany.<br>Ask and answer questions about information from a speaker, offering appropriate elaboration and detail  |
| LAFS.4.RL2.4:         | Determine the meaning of general academic and domain-specific words or phrases in a text relevant to a grade 4 topic or subject area.   |
|                       | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 4 topics and texts,  |
|                       | building on others' ideas and expressing their own clearly.   |
|                       | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about  |
|                       | the topic to explore ideas under discussion.  |
| LAFS.4.SL.1.1:        | b. Follow agreed-upon rules for discussions and carry out assigned roles.   |
|                       | c. Pose and respond to specific questions to clarify or follow up on information, and make comments that contribute to the discussion and link to   |
|                       | the remarks of others.  |
|                       | d. Review the key ideas expressed and explain their own ideas and understanding in light of the discussion.   |
|                       | Standard Relation to Course: Supporting   |
| LAFS.4.SL.1.2:        | Paraphrase portions of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.   |
| LAFS.4.SL.1.3:        | Identify the reasons and evidence a speaker provides to support particular points.  |
| LAFS.5.RI.2.4:        | Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 5 topic or subject area.  |
|                       | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 5 topics and texts,  |
|                       | building on others' ideas and expressing their own clearly.   |
|                       | a. Come to discussions prepared, naving read of studied required material, explicitly draw on that preparation and other information known about the tonic to explore ideas under discussion.   |
| LAFS.5.SL.1.1:        | h Follow agreed-upon rules for discussions and carry out assigned roles   |
|                       | c. Pose and respond to specific questions by making comments that contribute to the discussion and elaborate on the remarks of others.  |
|                       | d. Review the key ideas expressed and draw conclusions in light of information and knowledge gained from the discussions.   |
|                       | Chandrad Delation to Course the   |
| AES 5 SL 1 2.         | Standard Relation to Course: Supporting   |
| LAFS 5 SL 1 3         | Summarize the points a speaker makes and explain how each claim is supported by reasons and evidence.   |
|                       | Use appropriate tools strategically.  |
|                       |   |
|                       | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,  |
|                       | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.  |
|                       | Proticient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be beingul, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze  |
| MAFS.K12.MP.5.1:      | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other  |
|                       | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying  |
|                       | assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify   |
|                       | relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use  |
|                       | technological tools to explore and deepen their understanding of concepts.  |
|                       | Standard Relation to Course: Supporting   |
|                       | Attenu to precision.  |
|                       | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own   |
| MAES K12 MD / 1.      | reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about   |
| WIMES. NIZ. WIP. 0.1: | spearing units or measure, and tabeling axes to claring the correspondence with quantities in a problem. They calculate accurately and efficiently,   |
|                       |   |

|                   | formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|-------------------|--|
|                   | Standard Relation to Course: Supporting  |
|                   | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. |
|                   | Standard Relation to Course: Supporting  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |
| SC.4.P.10.3:      | Investigate and explain that sound is produced by vibrating objects and that pitch depends on how fast or slow the object vibrates.  |

## VERSION DESCRIPTION

Students who have varying levels of experience on orchestral string instruments explore high-quality literature written and/or arranged for string orchestra. Rehearsals focus on the development of instrumental techniques and skills, critical listening and aural skills, music literacy, ensemble skills, and aesthetic musical awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

The course descriptions for Elementary Music Electives have been designed to accommodate the mixing of grade levels, experience, and abilities within the same ensemble. Music teachers for elementary music electives should select the most appropriate set of grade-specific benchmarks based on each student's experience, music literacy, and available instruction time. Once an elementary student has entered a course at a specific level of benchmarks, he or she should progress to the next set of grade-specific benchmarks in the sequence for purposes of assessment. If a student reaches the Grade 5 level prior to 5th grade, he or she may continue to participate in the ensemble; the teacher is responsible for designating an appropriate means of increasing the rigor for the student in each subsequent year.

#### Examples:

- A 3rd grade student beginning in Elementary Band may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 2nd grade student who has taken violin lessons for several years and who is musically literate may receive instruction in Elementary Orchestra and be assessed according to the Grade 5 benchmarks, repeating use of these benchmarks with increased rigor in each subsequent year.
- A 5th grader singing in Elementary Chorus for the first time may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 4th grader in Handbell Ensemble (Special Ensemble) for the first time may receive instruction and be assessed according to the Grade 3 benchmarks. The same student, in Orff Ensemble (Special Ensemble) for the second year, may receive instruction and be assessed according to the Grade 4 benchmarks.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

Course Number: 5013030

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades PreK to 5 Education Courses > Subject: Music Education > SubSubject: General > Abbreviated Title: ELEM ORCHESTRA Course Length: Year (Y)

Course Status: Course Approved Grade Level(s): K,1,2,3,4,5,PreK

## **Educator Certifications**

Music Education (Elementary Grades 1-6)

```
Music (Elementary and Secondary Grades K-12)
Instrumental Music (Elementary and Secondary Grades K-12)
```

# Elementary Orchestra (#5013030) 2022 - And Beyond

| Name         | Description   |
|--------------|---|
|              | Describe listening skills and how they support appreciation of musical works.   |
| MU.3.C.1.1:  | Clarifications:   |
|              | e.g., focus: form, instrumentation, tempo, dynamics; organize: listening maps, active listening, checklists   |
|              | Respond to a musical work in a variety of ways and compare individual interpretations.  |
| MU.3.C.1.2:  | Clarifications:   |
|              | e.g., move, draw, sing, play, gesture, conduct  |
|              | Identify families of orchestral and band instruments.   |
| MU.3.C.1.3:  | Clarifications:   |
|              | e.g., strings, woodwinds, brass, percussion, keyboards  |
| MU.3.C.2.1:  | Evaluate performances of familiar music using teacher-established criteria.   |
|              | Identify musical characteristics and elements within a piece of music when discussing the value of the work.  |
| MU.3.C.3.1:  | Clarifications:   |
|              |   |
|              | Identify musicians in the school, community, and media.   |
| MU.3.F.2.1:  | Clarifications:   |
|              | Describe appartunities for personal music making  |
| MU DEDD.     |   |
| WIU.3.F.Z.Z: | e.g., performing ensembles, individual lessons, community and church music groups, family, playground, computer-generated music                         |
|              | Collaborate with others to create a musical presentation and acknowledge individual contributions as an integral part of the whole                      |
| MIL 2 F 2 1. | Clarifications:   |
| 10.3.1.3.1.  | e.g., work together, communicate effectively, share tasks and responsibilities, work well in cooperative learning groups                                |
| MU.3.H.1.2:  | Identify significant information about specified composers and one or more of their musical works.  |
|              | Experience and discuss, using correct music and other relevant content-area vocabulary, similarities in the use of pattern, line, and form in music and |
|              | other teacher-selected contexts.  |
| MU.3.H.3.1:  | Clarifications:   |
|              | e.g., in dance, visual art, language arts, pulse, rhythm, fluency   |
|              | Identify, using correct music vocabulary, the elements in a musical work.   |
| MU.3.0.1.1:  | Clarifications:   |
|              | e.g., rhythm, pitch, timbre, form   |
|              | Identify and describe the musical form of a familiar song.  |
| MU.3.0.1.2:  | Clarifications:   |
|              | e.g., AB, ABABA, call-and-response, verse/remain, rondo, intro, coda  |
| MU.3.O.3.1:  | Describe how tempo and dynamics can change the mood or emotion of a piece of music.   |
| MIL2S21.     |   |
| WIU.3.3.2.1. | e.g., parts of a round, parts of a layered work   |
|              | Sing simple la-sol-mi-re-do patterns at sight   |
| MIL 3 S 3 3· | Clarifications:   |
| 10.0.0.0.0   | e.g., reading from hand signs; reading from nontraditional or traditional notation  |
|              | Develop effective listening strategies and describe how they can support appreciation of musical works.   |
|              | Clarifications:   |
| MU.4.C.1.1:  | e.g., listen for form, instrumentation, tempo, dynamics, melodic line, rhythm patterns; organize thoughts using listening maps, active listening,       |
|              | checklists  |
|              | Describe, using correct music vocabulary, what is heard in a specific musical work.   |
| MU.4.C.1.2:  | Clarifications:   |
|              | e.g., movement of melodic line, tempo, repeated and contrasting patterns  |
| MU.4.C.1.3:  | Classify orchestral and band instruments as strings, woodwinds, brass, percussion, or keyboard.   |
|              | Identify and describe basic music performance techniques to provide a foundation for critiquing one's self and others.                                  |
| MU.4.C.2.1:  | Clarifications:   |
| MIL 4 C 2 2  | Critique specific techniques in one's own and others performances using teacher established arithme   |
| 10.4.0.2.2.  | Describe characteristics that make various musical works appealing.   |
| MU.4.C.3 1   | Clarifications:   |
|              |   |

|              | e.g., tempo, rhythm, dynamics, blend, timbre, form, texture, instrumentation  |  |
|--------------|---|--|
|              | Describe roles and careers of selected musicians.   |  |
| MU.4.F.2.1:  | Clarifications:   |  |
|              | e.g., teacher, conductor, composer, studio musician, recording technician, sound engineer, entertainer  |  |
| MU.4.F.3.1:  | Identify the characteristics and behaviors displayed by successful student musicians, and discuss how these qualities will contribute to success beyond the music classroom.  |  |
|              | Clarifications:<br>e.g., punctual, prepared, dependable, self-disciplined, solutions-oriented, shows initiative, uses time wisely   |  |
|              | Discuss the safe, legal way to download songs and other media.  |  |
| MU.4.F.3.2:  | Clarifications:<br>e.g., sharing personal and financial information, copying and sharing music  |  |
| MU.4.H.1.2:  | Describe the influence of selected composers on the musical works and practices or traditions of their time.  |  |
|              | Identify connections among music and other contexts, using correct music and other relevant content-area vocabulary, and explore how learning in one academic area can help with knowledge or skill acquisition in a different academic area. |  |
| MU.4.H.3.1:  | Clarifications:<br>e.g., movement, form, repetition, rhythmic patterns/numeric patterns, fractions, vibrations/sound waves  |  |
| MUL 4 O 1 1. | Compare musical elements in different types of music, using correct music vocabulary, as a foundation for understanding the structural conventions o specific styles.   |  |
| MU.4.0.1.1:  | Clarifications:<br>e.g., rules of rhythm, melody, timbre, form, tonality, harmony, meter; styles: Classical, Baroque  |  |
|              | Identify how expressive elements and lyrics affect the mood or emotion of a song.   |  |
| MU.4.O.3.1:  | Clarifications:<br>e.g., tempo, dynamics, phrasing, articulation  |  |
| MU.4.0.3.2:  | Apply expressive elements to a vocal or instrumental piece and, using correct music vocabulary, explain one's choices.  |  |
|              | Arrange a familiar song for voices or instruments by manipulating form.   |  |
| MU.4.S.1.3:  | Clarifications:<br>e.g., introduction, interlude/bridge, coda, ABA, rondo   |  |
| MU.4.S.2.1:  | Apply knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsal and performance.<br>Perform extended pentatonic melodies at sight.   |  |
| MU.4.S.3.3:  | Clarifications:<br>e.g., high do, low sol, low la; vocal and/or instrumental  |  |
|              | Discuss and apply listening strategies to support appreciation of musical works.  |  |
| MU.5.C.1.1:  | Clarifications:<br>e.g., focus: structure, instrumentation, tempo, dynamics, melodic line, rhythm patterns, style/genre; organize: listening maps, active listening,<br>checklists  |  |
|              | Hypothesize and discuss, using correct music vocabulary, the composer's intent for a specific musical work.   |  |
| MU.5.C.1.2:  | Clarifications:<br>e.g., title, historical notes, quality recordings, instrumentation, expressive elements  |  |
|              | Identify, aurally, selected instruments of the band and orchestra.  |  |
| MU.5.C.1.3:  | Clarifications:<br>e.g., violin, cello, string bass, flute, clarinet, oboe, bassoon, trumpet, trombone, tuba, French horn, bass drum, snare drum, xylophone, chimes,<br>piano, harpsichord  |  |
|              | Define criteria, using correct music vocabulary, to critique one's own and others performance.  |  |
| MU.5.C.2.1:  | Clarifications:<br>e.g., intonation, balance, blend, timbre   |  |
| MU.5.C.2.2:  | Describe changes, using correct music vocabulary, in one's own and/or others performance over time.   |  |
| MU.5.C.3.1:  | Develop criteria to evaluate an exemplary musical work from a specific period or genre.   |  |
|              | Describe jobs associated with various types of concert venues and performing arts centers.  |  |
| MU.5.F.2.1:  | clarifications:<br>e.g., music merchant, ticket agent, marketer, agent, security guard, food-and-beverage merchant  |  |
| MU.5.F.2.2:  | Explain why live performances are important to the career of the artist and the success of performance venues.  |  |
| MU.5.F.3.1:  | Clarifications:     e.g., dedicated, works toward mastery, punctual, prepared, dependable, self-disciplined, solutions-oriented   |  |
|              | Dractice cafe, logal, and responsible acquicition and use of music modia, and describe why it is important to do so   |  |
| MU.5.F.3.2:  | Clarifications:<br>e.g., downloading music and other digital media, sharing personal and financial information, copying music   |  |
| MU.5.H.1.2:  | Compare and describe the compositional characteristics used by two or more composers whose works are studied in class.  |  |
|              | Examine critical-thinking processes in music and describe how they can be transferred to other disciplines.   |  |
| MU.5.H.3.1:  | Clarifications:<br>e.g., reading, writing, observing, listening, evaluating, embellishing, revising   |  |
|              | Analyze, using correct music vocabulary, the use of musical elements in various styles of music as a foundation for understanding the creative process  |  |
| MU.5.O.1.1:  | Clarifications:   |  |

|                 | e.g., rhythm patterns, melody, timbre, form, tonality, harmony, meter, key; styles: Classical, Baroque, Romantic, nationalistic, jazz  |  |  |
|-----------------|--|--|--|
|                 | Examine and explain how expressive elements, when used in a selected musical work, affect personal response.   |  |  |
| MU.5.O.3.1:     | Clarifications:<br>e.g., tempo, dynamics, timbre, texture, phrasing, articulation  |  |  |
| MU.5.0.3.2:     | Perform expressive elements in a vocal or instrumental piece as indicated by the score and/or conductor.   |  |  |
|                 | Arrange a familiar song by manipulating specified aspects of music.  |  |  |
| MU.5.S.1.3:     | Clarifications:<br>e.g., dynamics, tempo, lyrics, form, rhythm, instrumentation  |  |  |
| MU.5.S.1.4:     | Sing or play simple melodic patterns by ear with support from the teacher.   |  |  |
| MU.5.S.2.1:     | Use expressive elements and knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsals and performance.   |  |  |
| MU.5.S.2.2:     | Apply performance techniques to familiar music.  |  |  |
| MU.5.S.3.3:     | Perform simple diatonic melodies at sight.  Clarifications: e.g., vocal and/or instrumental  |  |  |
|                 | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>   |  |  |
| MA.K12.MTR.1.1: | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |  |  |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> </ul>   |  |  |
| MA.K12.MTR.3.1: | <ul> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |  |  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> </ul>   |  |  |
| MA.K12.MTR.4.1: | <ul> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> </ul> |  |  |

| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br>Clarifications:<br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.<br>• Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking. |
|-----------------|---|
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.   |
|                 | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         Have students estimate or predict solutions prior to solving.         Prompt students to continually ask, "Does this solution make sense? How do you know?"         Reinforce that students check their work as they progress within and after a task.         Strengthen students' ability to verify solutions through justifications.  |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.  Clarifications:  K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.  4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  6-8 Students continue with previous skills and use a style guide to create a proper citation.  9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently.         Clarifications:         See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.3.1: | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
| ELA.K12.EE.4.1: | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.  In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |

|                   | Use the accepted rules governing a specific format to create quality work.   |  |
|-------------------|--|--|
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. |  |
|                   | Use appropriate voice and tone when speaking or writing.   |  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                    |  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |  |
| SC.4.P.10.3:      | Investigate and explain that sound is produced by vibrating objects and that pitch depends on how fast or slow the object vibrates.  |  |

## VERSION DESCRIPTION

Students who have varying levels of experience on orchestral string instruments explore high-quality literature written and/or arranged for string orchestra. Rehearsals focus on the development of instrumental techniques and skills, critical listening and aural skills, music literacy, ensemble skills, and aesthetic musical awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

The course descriptions for Elementary Music Electives have been designed to accommodate the mixing of grade levels, experience, and abilities within the same ensemble. Music teachers for elementary music electives should select the most appropriate set of grade-specific benchmarks based on each student's experience, music literacy, and available instruction time. Once an elementary student has entered a course at a specific level of benchmarks, he or she should progress to the next set of grade-specific benchmarks in the sequence for purposes of assessment. If a student reaches the Grade 5 level prior to 5th grade, he or she may continue to participate in the ensemble; the teacher is responsible for designating an appropriate means of increasing the rigor for the student in each subsequent year.

#### Examples:

- A 3rd grade student beginning in Elementary Band may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 2nd grade student who has taken violin lessons for several years and who is musically literate may receive instruction in Elementary Orchestra and be assessed according to the Grade 5 benchmarks, repeating use of these benchmarks with increased rigor in each subsequent year.
- A 5th grader singing in Elementary Chorus for the first time may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 4th grader in Handbell Ensemble (Special Ensemble) for the first time may receive instruction and be assessed according to the Grade 3 benchmarks. The same student, in Orff Ensemble (Special Ensemble) for the second year, may receive instruction and be assessed according to the Grade 4 benchmarks.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

Course Number: 5013030

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades PreK to 5 Education Courses > Subject: Music Education > SubSubject: General > Abbreviated Title: ELEM ORCHESTRA Course Length: Year (Y)

Course Status: State Board Approved Grade Level(s): K,1,2,3,4,5,PreK

## **Educator Certifications**

Music Education (Elementary Grades 1-6)

Music (Elementary and Secondary Grades K-12)

Instrumental Music (Elementary and Secondary Grades K-12)

| Name        | Description   |  |
|-------------|---|--|
|             | Describe listening skills and how they support appreciation of musical works.   |  |
| MU.3.C.1.1: | Clarifications:   |  |
|             | e.g., focus: form, instrumentation, tempo, dynamics; organize: listening maps, active listening, checklists   |  |
|             | Respond to a musical work in a variety of ways and compare individual interpretations.  |  |
| MU.3.C.1.2: | Clarifications:   |  |
|             | e.g., move, draw, sing, play, gesture, conduct  |  |
| MU.3.C.2.1: | Evaluate performances of familiar music using teacher-established criteria.   |  |
|             | Identify musical characteristics and elements within a piece of music when discussing the value of the work.  |  |
| MU.3.C.3.1: | Clarifications:   |  |
|             | e.g., tempo, rhythm, timbre, form, instrumentation, texture   |  |
|             | Identify musicians in the school, community, and media.   |  |
| MU.3.F.2.1: | Clarifications:   |  |
|             | e.g., band, chorus, and/or orchestra member; music teacher; cantor, choir director, or song leader in religious services                                |  |
|             | Describe opportunities for personal music-making.   |  |
| MU.3.F.2.2: | Clarifications:   |  |
|             | e.g., performing ensembles, individual lessons, community and church music groups, family, playground, computer-generated music                         |  |
|             | Collaborate with others to create a musical presentation and acknowledge individual contributions as an integral part of the whole.                     |  |
| MU.3.F.3.1: | Clarifications:   |  |
|             | e.g., work together, communicate effectively, share tasks and responsibilities, work well in cooperative learning groups                                |  |
| MU.3.H.1.2: | Identify significant information about specified composers and one or more of their musical works.  |  |
|             | Experience and discuss, using correct music and other relevant content-area vocabulary, similarities in the use of pattern, line, and form in music and |  |
|             | other teacher-selected contexts.  |  |
| MU.3.H.3.1: | Clarifications:   |  |
|             | e.g., in dance, visual art, language arts, pulse, rhythm, fluency   |  |
|             | Identify, using correct music vocabulary, the elements in a musical work.   |  |
| MU.3.0.1.1: | Clarifications:   |  |
|             | e.g., rhythm, pitch, timbre, form   |  |
|             | Identify and describe the musical form of a familiar song.  |  |
| MU.3.0.1.2: | Clarifications:   |  |
|             | e.g., AB, ABA, ABABA, call-and-response, verse/refrain, rondo, intro, coda  |  |
| MU.3.0.3.1: | Describe how tempo and dynamics can change the mood or emotion of a piece of music.   |  |
|             | Identify patterns in songs to aid the development of sequencing and memorization skills.  |  |
| MU.3.S.2.1: | Clarifications:   |  |
|             | e.g., parts of a round, parts of a layered work   |  |
|             | Sing simple la-sol-mi-re-do patterns at sight.  |  |
| MU.3.S.3.3: | Clarifications:   |  |
|             | e.g., reading from hand signs; reading from nontraditional or traditional notation  |  |
|             | Develop effective listening strategies and describe how they can support appreciation of musical works.   |  |
| MU 4 C 1 1· | Clarifications:   |  |
|             | e.g., listen for form, instrumentation, tempo, dynamics, melodic line, rhythm patterns; organize thoughts using listening maps, active listening,       |  |
|             | checklists  |  |
|             | Describe, using correct music vocabulary, what is heard in a specific musical work.   |  |
| MU.4.C.1.2: | Clarifications:   |  |
|             | e.g., movement of melodic line, tempo, repeated and contrasting patterns  |  |
|             | Identify and describe basic music performance techniques to provide a foundation for critiquing one's self and others.                                  |  |
| MU.4.C.2.1: | Clarifications:   |  |
|             | e.g., intonation, balance, blend, timbre, posture, breath support   |  |
| MU.4.C.2.2: | Critique specific techniques in one's own and others performances using teacher-established criteria.   |  |
|             | Describe characteristics that make various musical works appealing.   |  |
| MU.4.C.3.1: | Clarifications:   |  |
|             | e.g., tempo, rhythm, dynamics, blend, timbre, form, texture, instrumentation  |  |
|             | Describe roles and careers of selected musicians.   |  |
| MU.4.F.2.1: | Clarifications:   |  |
|             | e.g., teacher, conductor, composer, studio musician, recording technician, sound engineer, entertainer  |  |

|             | Identify the characteristics and behaviors displayed by successful student musicians, and discuss how these qualities will contribute to success beyond the music classroom.  |
|-------------|---|
| MU.4.F.3.1: | Clarifications  |
|             | e.g., punctual, prepared, dependable, self-disciplined, solutions-oriented, shows initiative, uses time wisely  |
| MU.4.H.1.2: | Describe the influence of selected composers on the musical works and practices or traditions of their time.  |
|             | Identify connections among music and other contexts, using correct music and other relevant content-area vocabulary, and explore how learning in one academic area can help with knowledge or skill acquisition in a different academic area. |
| MU.4.H.3.1: | Clarifications:<br>e.g., movement, form, repetition, rhythmic patterns/numeric patterns, fractions, vibrations/sound waves  |
|             | Compare musical elements in different types of music, using correct music vocabulary, as a foundation for understanding the structural conventions of specific styles.  |
| MU.4.O.1.1: | Clarifications:<br>e.g., rules of rhythm, melody, timbre, form, tonality, harmony, meter; styles: Classical, Baroque  |
|             | Identify how expressive elements and lyrics affect the mood or emotion of a song.   |
| MU.4.0.3.1: | Clarifications:   |
|             | e.g., tempo, dynamics, phrasing, articulation   |
| MU.4.0.3.2: | Apply expressive elements to a vocal or instrumental piece and, using correct music vocabulary, explain one's choices.  |
|             | Arrange a familiar song for voices or instruments by manipulating form.   |
| MU.4.S.1.3: | Clarifications:<br>e.g., introduction, interlude/bridge, coda, ABA, rondo   |
| MU.4.S.2.1: | Apply knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsal and performance.   |
|             | Perform extended pentatonic melodies at sight.  |
| MU.4.S.3.3: | Clarifications:<br>e.g., high do, low sol, low la; vocal and/or instrumental  |
|             | Discuss and apply listening strategies to support appreciation of musical works.  |
| MU.5.C.1.1: | Clarifications:<br>e.g., focus: structure, instrumentation, tempo, dynamics, melodic line, rhythm patterns, style/genre; organize: listening maps, active listening, checklists   |
|             | Hypothesize and discuss, using correct music vocabulary, the composer's intent for a specific musical work.   |
| MU.5.C.1.2: | Clarifications:<br>e.g., title, historical notes, quality recordings, instrumentation, expressive elements  |
|             | Define criteria, using correct music vocabulary, to critique one's own and others performance.  |
| MU.5.C.2.1: | Clarifications:<br>e.g., intonation, balance, blend, timbre   |
| MU.5.C.2.2: | Describe changes, using correct music vocabulary, in one's own and/or others performance over time.   |
| MU.5.C.3.1: | Develop criteria to evaluate an exemplary musical work from a specific period or genre.   |
|             | Describe jobs associated with various types of concert venues and performing arts centers.  |
| MU.5.F.2.1: | Clarifications:<br>e.g., music merchant, ticket agent, marketer, agent, security guard, food-and-beverage merchant  |
| MU.5.F.2.2: | Explain why live performances are important to the career of the artist and the success of performance venues.  |
|             | Examine and discuss the characteristics and behaviors displayed by successful student musicians that can be applied outside the music classroom.  |
| MU.5.F.3.1: | Clarifications:<br>e.g., dedicated, works toward mastery, punctual, prepared, dependable, self-disciplined, solutions-oriented  |
| MU.5.H.1.2: | Compare and describe the compositional characteristics used by two or more composers whose works are studied in class.  |
|             | Examine critical-thinking processes in music and describe how they can be transferred to other disciplines.   |
| MU.5.H.3.1: | Clarifications:<br>e.g., reading, writing, observing, listening, evaluating, embellishing, revising   |
|             | Analyze, using correct music vocabulary, the use of musical elements in various styles of music as a foundation for understanding the creative process.   |
| MU.5.O.1.1: | Clarifications:<br>e.g., rhythm patterns, melody, timbre, form, tonality, harmony, meter, key; styles: Classical, Baroque, Romantic, nationalistic, jazz  |
|             | Examine and explain how expressive elements, when used in a selected musical work, affect personal response.  |
| MU.5.O.3.1: | Clarifications:   |
|             | e.g., tempo, dynamics, timbre, texture, prirasing, articulation   |
| MU.5.0.3.2: | Perform expressive elements in a vocal or instrumental piece as indicated by the score and/or conductor.  |
| MU.5.S.1.3: | Clarifications:   |
|             | e.g., aynamics, tempo, lyrics, torm, rhythm, instrumentation  |
| MU.5.S.1.4: | Sing or play simple melodic patterns by ear with support from the teacher.  |
| MU.5.S.2.1: | use expressive elements and knowledge or musical structure to aid in sequencing and memorization and to internalize details of rehearsals and performance.  |
| MU.5.S.2.2: | Apply performance techniques to familiar music.   |
|             | Perform simple diatonic melodies at sight.  |
| MU.5.S.3.3: | Clarifications:<br>e.g., vocal and/or instrumental  |

| LAFS.3.RI.2.4:    | Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 3 topic or subject area.<br>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 3 topics and texts, building on otherwise there is a subject area.  |
|-------------------|--|
|                   | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about   |
| LAFS 3 SL 1 1     | the topic to explore ideas under discussion.<br>b. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the   |
|                   | topics and texts under discussion).  |
|                   | <ul> <li>d. Explain their own ideas and understanding in light of the discussion.</li> </ul>   |
|                   | Standard Relation to Course: Supporting  |
| LAFS.3.SL.1.2:    | Determine the main ideas and supporting details of a text read aloud or information presented in diverse media and formats, including visually,<br>quantitatively, and orally.   |
| LAFS.3.SL.1.3:    | Ask and answer questions about information from a speaker, offering appropriate elaboration and detail.  |
| LAFS.4.RI.2.4:    | Determine the meaning of general academic and domain-specific words or phrases in a text relevant to a grade 4 topic or subject area.  |
|                   | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 4 topics and texts,<br>building on others' ideas and expressing their own clearly.  |
|                   | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about   |
|                   | the topic to explore ideas under discussion.   |
| LAFS.4.SL.1.1:    | b. Follow agreed-upon rules for discussions and carry out assigned roles.  |
|                   | c. Pose and respond to specific questions to clarify or follow up on information, and make comments that contribute to the discussion and link to  |
|                   | <ul> <li>d. Review the key ideas expressed and explain their own ideas and understanding in light of the discussion.</li> </ul>  |
|                   | Standard Relation to Course: Supporting  |
| LAFS.4.SL.1.2:    | Paraphrase portions of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.  |
| LAFS.4.SL.1.3:    | Identify the reasons and evidence a speaker provides to support particular points.   |
| LAFS.5.RI.2.4:    | Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 5 topic or subject area.   |
|                   | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 5 topics and texts,<br>building on others' ideas and expressing their own clearly.  |
|                   | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about   |
|                   | the topic to explore ideas under discussion.   |
| LAFS.5.SL.1.1:    | b. Follow agreed-upon rules for discussions and carry out assigned roles.  |
|                   | <ul><li>c. Pose and respond to specific questions by making comments that contribute to the discussion and elaborate on the remarks of others.</li><li>d. Review the key ideas expressed and draw conclusions in light of information and knowledge gained from the discussions.</li></ul>   |
|                   | Standard Relation to Course: Supporting  |
| LAFS.5.SL.1.2:    | Summarize a written text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.   |
| LAF5.5.5L.1.3:    | Use appropriate tools strategically.   |
|                   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools  |
| MAFS.K12.MP.5.1:  | might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze<br>graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other<br>mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying<br>assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify<br>relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use<br>technological tools to explore and deepen their understanding of concepts.<br><b>Standard Relation to Course: Supporting</b>  |
|                   | Attend to precision.   |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|                   | Standard Relation to Course: Supporting  |
|                   | LOOK FOR AND MAKE USE OF STRUCTURE.  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. |
|                   | Standard Relation to Course: Supporting  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students with varying levels of experience in an elementary ensemble other than chorus, band, or orchestra develop foundational techniques, skills, and music literacy. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for such small-instrument ensembles as recorder or guitar, may require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

The course descriptions for Elementary Music Electives have been designed to accommodate the mixing of grade levels, experience, and abilities within the same ensemble. Music teachers for elementary music electives should select the most appropriate set of grade-specific benchmarks based on each student's experience, music literacy, and available instruction time. Once an elementary student has entered a course at a specific level of benchmarks, he or she should progress to the next set of grade-specific benchmarks in the sequence for purposes of assessment. If a student reaches the Grade 5 level prior to 5th grade, he or she may continue to participate in the ensemble; the teacher is responsible for designating an appropriate means of increasing the rigor for the student in each subsequent year.

#### Examples:

- A 3rd grade student beginning in Elementary Band may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 2nd grade student who has taken violin lessons for several years and who is musically literate may receive instruction in Elementary Orchestra and be assessed according to the Grade 5 benchmarks, repeating use of these benchmarks with increased rigor in each subsequent year.
- A 5th grader singing in Elementary Chorus for the first time may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 4th grader in Handbell Ensemble (Special Ensemble) for the first time may receive instruction and be assessed according to the Grade 3 benchmarks. The same student, in Orff Ensemble (Special Ensemble) for the second year, may receive instruction and be assessed according to the Grade 4 benchmarks.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

## **Educator Certifications**

| Music Education (Elementary Grades 1-6)                   |
|---|
| Music (Elementary and Secondary Grades K-12)              |
| Instrumental Music (Elementary and Secondary Grades K-12) |
| Name                    | Description   |
|-------------------------|---|
|                         | Describe listening skills and how they support appreciation of musical works.   |
| MU.3.C.1.1:             | Clarifications:   |
|                         | e.g., focus: form, instrumentation, tempo, dynamics; organize: listening maps, active listening, checklists   |
|                         | Respond to a musical work in a variety of ways and compare individual interpretations.  |
| MU.3.C.1.2:             | Clarifications:   |
|                         | e.g., move, draw, sing, play, gesture, conduct  |
| MU.3.C.2.1:             | Evaluate performances of familiar music using teacher-established criteria.   |
|                         | Identify musical characteristics and elements within a piece of music when discussing the value of the work.  |
| MU.3.C.3.1:             | Clarifications:   |
|                         | e.g., tempo, rhythm, timbre, form, instrumentation, texture   |
|                         | Identify musicians in the school, community, and media.   |
| MU.3.F.2.1:             | Clarifications:   |
|                         | e.g., band, chorus, and/or orchestra member; music teacher; cantor, choir director, or song leader in religious services                              |
|                         | Describe opportunities for personal music-making.   |
| MIL3E22                 | Clarifications  |
| 110.0.1 .2.2.           | e.g., performing ensembles, individual lessons, community and church music groups, family, playground, computer-generated music                       |
|                         | Collaborate with others to create a musical presentation and acknowledge individual contributions as an integral part of the whole                    |
| MII 2 F 2 1.            | Clarifications:   |
| WIU.3.F.3.T.            | e.g., work together, communicate effectively, share tasks and responsibilities, work well in cooperative learning groups                              |
|                         | Identify clarificant information about specified composers and one or more of their musical works   |
| 10.3.11.1.2.            | Experience and discuss using correct music and other relevant content-area vocabulary similarities in the use of pattern, line, and form in music and |
|                         | other teacher-selected contexts.  |
| MU.3.H.3.1:             | Clarifications:   |
|                         | e.g., in dance, visual art, language arts, pulse, rhythm, fluency   |
|                         | Identify, using correct music vocabulary, the elements in a musical work.   |
| MIL 3 O 1 1·            | Clarifications  |
|                         | e.g., rhythm, pitch, timbre, form   |
|                         | Identify and describe the musical form of a familiar song.  |
| MU 3 O 1 2·             | Clarifications  |
| 1010101121              | e.g., AB, ABA, ABABA, call-and-response, verse/refrain, rondo, intro, coda  |
| MU 3 O 3 1 <sup>.</sup> | Describe how tempo and dynamics can change the mood or emotion of a piece of music  |
|                         | Identify patterns in songs to aid the development of sequencing and memorization skills.  |
| MU 3 S 2 1              | Clarifications:   |
|                         | e.g., parts of a round, parts of a layered work   |
|                         | Sing simple la-sol-mi-re-do patterns at sight   |
| MII 3 5 3 3·            | Clarifications:   |
| 10.5.5.5.5.             | e.g., reading from hand signs; reading from nontraditional or traditional notation  |
|                         | Develop effective listening strategies and describe how they can support appreciation of musical works  |
|                         | Clarifications  |
| MU.4.C.1.1:             | e.g., listen for form, instrumentation, tempo, dynamics, melodic line, rhythm patterns; organize thoughts using listening maps, active listening,     |
|                         | checklists  |
|                         | Describe using correct music vocabulary, what is beard in a specific musical work   |
| MU A C 1 2.             |   |
| 10.4.0.1.2.             | e.g., movement of melodic line, tempo, repeated and contrasting patterns  |
|                         | Identify and describe basic music performance techniques to provide a foundation for critiquing one's self and others                                 |
| MIL 4 C O 1.            |   |
| WU.4.C.2.T:             | clarifications:   |
| MILACOO.                | Critique encelle techniques in ancie que and others performances using teacher actablished arteria  |
| WU.4.0.2.2.             | Describe characteristics that make various musical works appealing  |
| MILLA C 2 1.            |   |
| IVIU.4.0.3.1:           | e.g., tempo, rhythm, dynamics, blend, timbre, form, texture, instrumentation  |
|                         |   |
|                         |   |
| MU.4.F.2.1:             | Clarifications:   |
|                         | eigh counter, conductor, composer, studio mastellin, recording teennolan, sound engineer, entertainer   |

|               | Identify the characteristics and behaviors displayed by successful student musicians, and discuss how these qualities will contribute to success beyond the music classroom.  |
|---------------|---|
| MU.4.F.3.1:   | Clarifications:   |
|               | e.g., punctual, prepared, dependable, self-disciplined, solutions-oriented, shows initiative, uses time wisely  |
| MU.4.H.1.2:   | Describe the influence of selected composers on the musical works and practices or traditions of their time.  |
|               | Identify connections among music and other contexts, using correct music and other relevant content-area vocabulary, and explore how learning in one academic area can help with knowledge or skill acquisition in a different academic area. |
| MU.4.H.3.1:   | Clarifications:<br>e.g., movement, form, repetition, rhythmic patterns/numeric patterns, fractions, vibrations/sound waves  |
|               | Compare musical elements in different types of music, using correct music vocabulary, as a foundation for understanding the structural conventions of specific styles.  |
| MU.4.O.1.1:   | Clarifications:<br>e.g., rules of rhythm, melody, timbre, form, tonality, harmony, meter; styles: Classical, Baroque  |
|               | Identify how expressive elements and lyrics affect the mood or emotion of a song.   |
| MU.4.0.3.1:   | Clarifications:<br>e.g., tempo, dynamics, phrasing, articulation  |
| MU.4.0.3.2:   | Apply expressive elements to a vocal or instrumental piece and, using correct music vocabulary, explain one's choices.  |
|               | Arrange a familiar song for voices or instruments by manipulating form.   |
| MU.4.S.1.3:   | Clarifications:<br>e.g., introduction, interlude/bridge, coda, ABA, rondo   |
| MU.4.S.2.1:   | Apply knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsal and performance.   |
|               | Perform extended pentatonic melodies at sight.  |
| MU.4.S.3.3:   | Clarifications:<br>e.g., high do, low sol, low la; vocal and/or instrumental  |
|               | Discuss and apply listening strategies to support appreciation of musical works.  |
| MU.5.C.1.1:   | Clarifications:<br>e.g., focus: structure, instrumentation, tempo, dynamics, melodic line, rhythm patterns, style/genre; organize: listening maps, active listening,<br>checklists  |
|               | Hypothesize and discuss, using correct music vocabulary, the composer's intent for a specific musical work.   |
| MU.5.C.1.2:   | Clarifications:<br>e.g., title, historical notes, quality recordings, instrumentation, expressive elements  |
|               | Define criteria, using correct music vocabulary, to critique one's own and others performance.  |
| MU.5.C.2.1:   | Clarifications:<br>e.g., intonation, balance, blend, timbre   |
| MU.5.C.2.2:   | Describe changes, using correct music vocabulary, in one's own and/or others performance over time.   |
| MU.5.C.3.1:   | Develop criteria to evaluate an exemplary musical work from a specific period or genre.   |
|               | Describe jobs associated with various types of concert venues and performing arts centers.  |
| MU.5.F.2.1:   | Clarifications:<br>e.g., music merchant, ticket agent, marketer, agent, security guard, food-and-beverage merchant  |
| MU.5.F.2.2:   | Explain why live performances are important to the career of the artist and the success of performance venues.  |
| MU.5.F.3.1:   | Examine and discuss the characteristics and behaviors displayed by successful student musicians that can be applied outside the music classroom.<br>Clarifications:   |
|               | e.g., dedicated, works toward mastery, punctual, prepared, dependable, self-disciplined, solutions-oriented   |
| MU.5.H.1.2:   | Compare and describe the compositional characteristics used by two or more composers whose works are studied in class.  |
|               | Examine critical-thinking processes in music and describe how they can be transferred to other disciplines.   |
| MU.5.H.3.1:   | Clarifications:<br>e.g., reading, writing, observing, listening, evaluating, embellishing, revising   |
|               | Analyze, using correct music vocabulary, the use of musical elements in various styles of music as a foundation for understanding the creative process.   |
| MU.5.O.1.1:   | Clarifications:<br>e.g., rhythm patterns, melody, timbre, form, tonality, harmony, meter, key; styles: Classical, Baroque, Romantic, nationalistic, jazz  |
|               | Examine and explain how expressive elements, when used in a selected musical work, affect personal response.  |
| MU.5.O.3.1:   | Clarifications:<br>e.g., tempo, dynamics, timbre, texture, phrasing, articulation   |
| MU.5.0.3.2:   | Perform expressive elements in a vocal or instrumental piece as indicated by the score and/or conductor.  |
|               | Arrange a familiar song by manipulating specified aspects of music.   |
| MU.5.S.1.3:   | e.g., dynamics, tempo, lyrics, form, rhythm, instrumentation  |
| MU 5 S 1 4·   | Sing or play simple melodic patterns by ear with support from the teacher   |
| MULE \$ 0.1.  | Use expressive elements and knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsals and   |
| IVIU.5.5.2.1: | performance.  |
| MU.5.S.2.2:   | Apply performance techniques to familiar music.   |
| MUESOD        | Periorm simple diatonic melodies at signt.  |
| IVIU.3.3.3.3: | e.g., vocal and/or instrumental   |

| 1               |  |
|-----------------|--|
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> </ul>   |
|                 | Recognize students' effort when solving challenging problems.  Demonstrate understanding by representing problems in multiple ways.  |

|                 | Clarifications:         Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:         • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.         • Create opportunities for students to discuss their thinking with peers.         • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.         • Develop students' ability to justify methods and compare their responses to the responses of their peers.  |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br><b>Clarifications:</b><br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.  |

|                   | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
|-------------------|--|
|                   |  |
|                   | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> </ul>   |
|                   | Check calculations when solving problems.  |
|                   | <ul> <li>Verify possible solutions by explaining the methods used.</li> </ul>  |
| MA.K12.MTR.6.1:   | Evaluate results based on the given context.   |
|                   | Clarifications:  |
|                   | Teachers who encourage students to assess the reasonableness of solutions:   |
|                   | <ul> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask "Does this solution make sense? How do you know?"</li> </ul>  |
|                   | <ul> <li>Reinforce that students check their work as they progress within and after a task.</li> </ul>   |
|                   | • Strengthen students' ability to verify solutions through justifications.   |
|                   | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |
|                   | Connect mathematical concepts to everyday experiences.   |
|                   | Use models and methods to understand, represent and solve problems.  |
|                   | Perform investigations to gather data or determine if a method is appropriate.      Redesign models and methods to improve accuracy or efficiency  |
| MA.K12.MTR.7.1:   | Clarifications:  |
|                   | Provide opportunities for students to create models, both concrete and abstract, and perform investigations.   |
|                   | <ul> <li>Challenge students to question the accuracy of their models and methods.</li> </ul>   |
|                   | Support students as they validate conclusions by comparing them to the given situation.  |
|                   | Indicate how various concepts can be applied to other disciplines.   |
|                   | Cite evidence to explain and justify reasoning.  |
|                   | Clarifications:  |
|                   | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.  |
|                   | 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.   |
|                   | In 3rd grade, students should use a combination of direct and indirect citations.  |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly  |
|                   | quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide   |
|                   |  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                   | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:   | Clarifications:  |
|                   | Make inferences to support comprehension   |
|                   |  |
| ELA.K12.EE.3.1:   | Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl  |
|                   | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and  |
|                   | beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:   | In kindergarten, students learn to listen to one another respectfully.   |
|                   | In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The   |
|                   | collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, proved the conversation, and support claims and counterclaims with evidence.  |
|                   |  |
| ELA.K12.EE.5.1:   | Use the accepted rules governing a specific format to create quality work.   |
|                   | Clarifications:  |
|                   | must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to   |
|                   | do quality work.   |
|                   | Use appropriate voice and tone when speaking or writing.   |
| FLA.K12 FF 6 1    | Clarifications:  |
|                   | In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts |
|                   | English language learners communicate for cocial and instructional surpasses within the school setting   |
| ELU.KIZ.ELL.SI.I: | English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students with varying levels of experience in an elementary ensemble other than chorus, band, or orchestra develop foundational techniques, skills, and music literacy. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for such small-instrument ensembles as recorder or guitar, may require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

### **GENERAL NOTES**

The course descriptions for Elementary Music Electives have been designed to accommodate the mixing of grade levels, experience, and abilities within the same ensemble. Music teachers for elementary music electives should select the most appropriate set of grade-specific benchmarks based on each student's experience, music literacy, and available instruction time. Once an elementary student has entered a course at a specific level of benchmarks, he or she should progress to the next set of grade-specific benchmarks in the sequence for purposes of assessment. If a student reaches the Grade 5 level prior to 5th grade, he or she may continue to participate in the ensemble; the teacher is responsible for designating an appropriate means of increasing the rigor for the student in each subsequent year.

#### Examples:

- A 3rd grade student beginning in Elementary Band may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 2nd grade student who has taken violin lessons for several years and who is musically literate may receive instruction in Elementary Orchestra and be assessed according to the Grade 5 benchmarks, repeating use of these benchmarks with increased rigor in each subsequent year.
- A 5th grader singing in Elementary Chorus for the first time may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 4th grader in Handbell Ensemble (Special Ensemble) for the first time may receive instruction and be assessed according to the Grade 3 benchmarks. The same student, in Orff Ensemble (Special Ensemble) for the second year, may receive instruction and be assessed according to the Grade 4 benchmarks.

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Music - Grade Kindergarten (#5013060) 2015 - 2022 (current)

| Name                    | Description   |
|-------------------------|---|
|                         | Respond to music from various sound sources to show awareness of steady beat.   |
| MU.K.C.1.1:             | Clarifications:   |
|                         | e.g., steady beat, pulse  |
|                         | Identify various sounds in a piece of music.  |
| MU.K.C.1.2:             | Clarifications:   |
|                         | e.g., vocal/instrumental timbres, environmental sounds  |
|                         | Identify, visually and aurally, pitched and unpitched classroom instruments.  |
| MU.K.C.1.3:             | Clarifications:   |
|                         | e.g., rhythm sticks, woodblock, xylophone, metallophone, autoharp   |
| MU.K.C.1.4:             | Identify singing, speaking, and whispering voices.  |
| MU.K.C.2.1:             | Identify similarities and/or differences in a performance.  |
| MU.K.C.3.1:             | Share opinions about selected pieces of music.  |
|                         | Respond to and explore music through creative play and found sounds in the music classroom.   |
| MU.K.F.1.1:             | Clarifications:   |
|                         | e.g., creative play, drama/acting, kinesthetic response, vocalizations, sound carpets   |
|                         | Exhibit age-appropriate music and life skills that will add to the success in the music classroom.  |
| MU.K.F.3.1:             | Clarifications:   |
|                         | e.g., take turns, share, be a good listener, be respectful, display good manners  |
|                         | Respond to music from diverse cultures through singing and movement.  |
| MU.K.H.1.1:             | Clarifications:   |
|                         | e.g., nursery rhymes, singing games, folk dances  |
|                         | Respond to and/or perform folk music of American cultural sub-groups.   |
| MU.K.H.2.1:             | Clarifications:   |
|                         | e.g., African American, Anglo-American, Latin American, Native American   |
|                         | Perform simple songs, finger plays, and rhymes to experience connections among music, language, and numbers.  |
| MU.K.H.3.1:             | Clarifications:   |
|                         | e.g., decoding simple words, phonemes, rhyming words, vocabulary, making predictions, cardinal numbers, sequencing  |
|                         | Respond to beat, rhythm, and melodic line through imitation.  |
| MU.K.O.1.1:             | Clarifications:   |
|                         | e.g., locomotor and non-locomotor movement, body levels   |
|                         | Identify similarities and differences in melodic phrases and/or rhythm patterns.  |
| MU.K.O.1.2:             | Clarifications:   |
|                         | e.g., visually, aurally   |
|                         | Respond to music to demonstrate how it makes one feel.  |
| MU.K.O.3.1:             | Clarifications:   |
|                         | e.g., movement, drawings  |
|                         | Improvise a response to a musical question sung or played by someone else.  |
| MU K S 1 1 <sup>.</sup> | Clarifications:   |
|                         | e.g., melodic, rhythmic   |
|                         | Sing or play songs from memory.   |
| MILKS21.                | Clarifications:   |
| MO.R.0.2.1.             | e.g., rhymes, chants, poems   |
| MU.K.S.3.1:             | Sing songs of limited range appropriate to the young child and use the head voice.  |
|                         | Perform simple songs and accompaniments.  |
| MU.K.S.3.2:             | Clarifications:   |
|                         | e.g., singing, using body percussion or classroom instruments   |
|                         | Match pitches in a song or musical phrase in one or more keys.  |
| MILKS 3 3·              | Clarifications:   |
|                         | e.g., la, sol, mi   |
|                         | Imitate simple rhythm patterns played by the teacher or a peer.   |
| MUKS34.                 | Clarifications:   |
|                         | e.g., quarter note, quarter rest, beamed eighth notes   |
| LAFS.K.RL 1.2           | With prompting and support, retell familiar stories, including key details  |
|                         | i i o configura con contra constructiva constru |

| LAFS.K.RL.4.10:  | Actively engage in group reading activities with purpose and understanding.  |
|------------------|--|
|                  | Participate in collaborative conversations with diverse partners about kindergarten topics and texts with peers and adults in small and larger groups.   |
| LAFS.K.SL.1.1:   | <ul> <li>a. Follow agreed-upon rules for discussions (e.g., listening to others and taking turns speaking about the topics and texts under discussion).</li> <li>b. Continue a conversation through multiple exchanges.</li> </ul> |
|                  | b. Continue a conversation through multiple exchanges.   |
|                  | Standard Relation to Course: Supporting  |
| LAFS.K.SL.1.2:   | Confirm understanding of a text read aloud or information presented orally or through other media by asking and answering questions about key details and requesting clarification if something is not understood.                 |
| LAFS.K.SL.1.3:   | Ask and answer questions in order to seek help, get information, or clarify something that is not understood.  |
|                  | Recognize locomotor skills.  |
| PE.K.C.2.1:      | Clarifications:<br>Some examples of locomotor skills are walking, running, skipping, leaping, hopping, jumping and galloping.  |
|                  | Recognize physical activities have safety rules and procedures.  |
| PE.K.C.2.2:      | Clarifications:  |
|                  | An example would be to put equipment away when not in use in order to keep the physical activity area safe.  |
| PE.K.R.6.2:      | Identify a benefit of willingly trying new movements and motor skills.   |
| PE.K.R.6.3:      | Identify the benefits of continuing to participate when not successful on the first try.   |
|                  | Use appropriate tools strategically.   |
|                  |  |
|                  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,   |
|                  | Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools  |
|                  | might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze   |
| MAFS.K12.MP.5.1: | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other   |
|                  | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying   |
|                  | assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify  |
|                  | relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use   |
|                  | Standard Relation to Course: Supporting  |
|                  | Attend to precision.   |
|                  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own  |
|                  | reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about  |
| MAFS.K12.MP.6.1: | specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,  |
|                  | express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully  |
|                  | formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|                  | Standard Relation to Course: Supporting  |
|                  | Look for and make use of structure.  |
|                  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven  |
|                  | more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,   |
|                  | students will see 7 $\times$ 8 equals the well remembered 7 $\times$ 5 + 7 $\times$ 3, in preparation for learning about the distributive property. In the expression $x^2$  |
| MAFS.K12.MP.7.1: | + 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and  |
|                  | can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see  |
|                  | -x <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y  |
|                  |  |
|                  | Standard Relation to Course: Supporting  |
| DA.K.U.S.T:      | Develop kinesthetic awareness by maintaining personal space and moving in pathways through space   |
| FLD K12 FLL SL 1 | English language learners communicate for social and instructional purposes within the school setting  |
|                  | Recognize the consequences of not following rules/practices when making healthy and safe decisions.  |
| HE K B 5 3       | Clarifications:  |
| HE.R.D.0.0.      | Injury to self and/or others.  |
| SC K P 10 1      | Observe that things that make sound vibrate  |
| TH.K.S.1.3       | Describe personal preferences related to a performance.  |
|                  |  |

## VERSION DESCRIPTION

Kindergarten students in music class explore their environment and music world through a variety of experiences. Singing, listening, and movement activities will form the foundation for musical development, along with thinking, self-expression, and communication skills will be developed through singing, movement, creative musical play, creating, listening, and understanding activities. A variety of carefully chosen music will allow students to gain knowledge of one's self and build understanding, acceptance, and enrichment throughout their lives. By fostering creativity throughout the curriculum, the seeds of innovation will begin to bloom even in these novice learners.

# GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and

should be fully integrated in support of arts instruction.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Music - Grade Kindergarten (#5013060) 2022 - And Beyond

| Name                    | Description  |
|-------------------------|--|
|                         | Respond to music from various sound sources to show awareness of steady beat.                                      |
| MU.K.C.1.1:             | Clarifications:  |
|                         | e.g., steady beat, pulse   |
|                         | Identify various sounds in a piece of music.   |
| MU.K.C.1.2:             | Clarifications:  |
|                         | e.g., vocal/instrumental timbres, environmental sounds   |
|                         | Identify, visually and aurally, pitched and unpitched classroom instruments.                                       |
| MU.K.C.1.3:             | Clarifications:  |
|                         | e.g., rhythm sticks, woodblock, xylophone, metallophone, autoharp  |
| MU.K.C.1.4:             | Identify singing, speaking, and whispering voices.   |
| MU.K.C.2.1:             | Identify similarities and/or differences in a performance.   |
| MU.K.C.3.1:             | Share opinions about selected pieces of music.   |
|                         | Respond to and explore music through creative play and found sounds in the music classroom.                        |
| MU.K.F.1.1:             | Clarifications:  |
|                         | e.g., creative play, drama/acting, kinesthetic response, vocalizations, sound carpets                              |
|                         | Exhibit age-appropriate music and life skills that will add to the success in the music classroom.                 |
| MU.K.F.3.1:             | Clarifications:  |
|                         | e.g., take turns, share, be a good listener, be respectful, display good manners                                   |
|                         | Respond to music from diverse cultures through singing and movement.   |
| MU.K.H.1.1:             | Clarifications:  |
|                         | e.g., nursery rhymes, singing games, folk dances   |
|                         | Respond to and/or perform folk music of American cultural sub-groups.  |
| MU.K.H.2.1:             | Clarifications:  |
|                         | e.g., African American, Anglo-American, Latin American, Native American  |
|                         | Perform simple songs, finger plays, and rhymes to experience connections among music, language, and numbers.       |
| MU.K.H.3.1:             | Clarifications:  |
|                         | e.g., decoding simple words, phonemes, rhyming words, vocabulary, making predictions, cardinal numbers, sequencing |
|                         | Respond to beat, rhythm, and melodic line through imitation.   |
| MU.K.O.1.1:             | Clarifications:  |
|                         | e.g., locomotor and non-locomotor movement, body levels  |
|                         | Identify similarities and differences in melodic phrases and/or rhythm patterns.                                   |
| МU К О 1 2 <sup>.</sup> | Clarifications:  |
|                         | e.g., visually, aurally  |
|                         | Respond to music to demonstrate how it makes one feel  |
| MU K O 3 1·             | Clarifications   |
| MO.R.0.3.1.             | e.g., movement, drawings   |
|                         | Improvise a response to a musical question sund or played by someone else  |
| MUKS11.                 | Clarifications:  |
| WO.R.J. 1.1.            | e.a., melodic, rhythmic  |
|                         | Sing or play songs from memory   |
| MUKSOL                  |  |
| WU.K.J.Z.T.             | e.g., rhymes, chants, poems  |
| MILKS31.                | Sing songs of limited range appropriate to the young child and use the head voice                                  |
| MO.R.3.3.1.             | Perform simple songs and accompaniments.   |
| MILKS32                 | Clarifications:  |
| WO.R.3.3.2.             | e.g., singing, using body percussion or classroom instruments  |
|                         | Match pitches in a song or musical phrase in one or more keys  |
| MILK S 3 3.             | Clarifications:  |
| WO.K.J.J.J.             | e.q., la, sol, mi  |
|                         | Imitate simple rhythm patterns played by the teacher or a peer   |
| MILKS24                 | Clarifications:  |
| WO.K.J.J.4.             | e.g., guarter note, guarter rest, beamed eighth notes  |
|                         | Mathematicians who narticinate in effortful learning both individually and with others                             |
|                         | Mathematicians who participate in enormal rearning both individually and With Others.                              |

| MA.K12.MTR.1.1: | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>   |
|-----------------|---|
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.</li></ul>   |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>• Select efficient and appropriate methods for solving problems within the given context.<br>• Maintain flexibility and accuracy while performing procedures and mental calculations.<br>• Complete tasks accurately and with confidence.<br>• Adapt procedures to apply them to a new context.<br>• Use feedback to improve efficiency when performing calculations.<br><b>Clarifications:</b><br>Teachers who encourage students to complete tasks with mathematical fluency:<br>• Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>• Offer multiple opportunities for students to practice efficient and generalizable methods.<br>• Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
| MA.K12.MTR.4.1: | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:<br>• Communicate mathematical ideas, vocabulary and methods effectively.<br>• Analyze the mathematical thinking of others.<br>• Compare the efficiency of a method to those expressed by others.<br>• Compare the efficiency of a method to those expressed by others.<br>• Recognize errors and suggest how to correctly solve the task.<br>• Justify results by explaining methods and processes.<br>• Construct possible arguments based on evidence.<br><b>Clarifications:</b><br>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:<br>• Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.<br>• Create opportunities for students to discuss their thinking with peers.<br>• Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.<br>• Develop students' ability to justify methods and compare their responses to the responses of their peers.   |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br><b>Clarifications:</b><br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.<br>• Develop <b>students'</b> ability <b>to construct relationships between their current</b> understanding and more sophisticated ways of thinking.<br>Assess the reasonableness of solutions:<br>Mathematicians who assess the reasonableness of solutions: |

| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
|-----------------|--|
|                 | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.         • Prompt students to continually ask, "Does this solution make sense? How do you know?"         • Reinforce that students check their work as they progress within and after a task.         • Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts: <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul> |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.  Clarifications:  K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.  4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly.  |
|                 | <ul> <li>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> <li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li> </ul>   |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
| ELA.K12.EE.3.1: | Make inferences to support comprehension.  Clarifications:  Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.  |
| ELA.K12.EE.4.1: | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.          Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
| ELA.K12.EE.5.1: | Use the accepted rules governing a specific format to create quality work.<br>Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
| ELA.K12.EE.6.1: | Use appropriate voice and tone when speaking or writing.<br>Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| PE.K.C.2.1:     | Recognize locomotor skills.<br>Clarifications:<br>Some examples of locomotor skills are walking, running, skipping, leaping, hopping, jumping and galloping.   |
| PE.K.C.2.2:     | Recognize physical activities have safety rules and procedures.<br>Clarifications:<br>An example would be to put equipment away when not in use in order to keep the physical activity area safe.  |

| PE.K.R.6.2:       | Identify a benefit of willingly trying new movements and motor skills.                                 |
|-------------------|--|
| PE.K.R.6.3:       | Identify the benefits of continuing to participate when not successful on the first try.               |
| DA.K.O.3.1:       | Use movement to express a feeling, idea, or story.   |
| DA.K.S.3.3:       | Develop kinesthetic awareness by maintaining personal space and moving in pathways through space.      |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting. |
|                   | Recognize the consequences of not following rules/practices when making healthy and safe decisions.    |
| HE.K.B.5.3:       | Clarifications:<br>Injury to self and/or others.   |
| SC.K.P.10.1:      | Observe that things that make sound vibrate.   |
| TH.K.S.1.3:       | Describe personal preferences related to a performance.  |

### VERSION DESCRIPTION

Kindergarten students in music class explore their environment and music world through a variety of experiences. Singing, listening, and movement activities will form the foundation for musical development, along with thinking, self-expression, and communication skills will be developed through singing, movement, creative musical play, creating, listening, and understanding activities. A variety of carefully chosen music will allow students to gain knowledge of one's self and build understanding, acceptance, and enrichment throughout their lives. By fostering creativity throughout the curriculum, the seeds of innovation will begin to bloom even in these novice learners.

### **GENERAL NOTES**

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Music - Grade 1 (#5013070) 2015 - 2022 (current)

| Name         | Description  |
|--------------|--|
|              | Respond to specific, teacher-selected musical characteristics in a song or instrumental piece.   |
| MU.1.C.1.1:  | Clarifications:  |
|              | e.g., beat, rhythm, phrasing, dynamics, tempo  |
|              | Respond to music from various sound sources to show awareness of differences in musical ideas.   |
| MU.1.C.1.2:  | Clarifications:  |
|              | e.g., moods, images  |
|              | Classify instruments into pitched and unpitched percussion families.   |
| MU 1 C 1 3   | Clarifications   |
|              | e.g., xylophone, glockenspiel, woodblock, tambourine   |
| MU.1.C.1.4:  | Differentiate between music performed by one singer and music performed by a group of singers.   |
|              | Identify the similarities and differences between two performances of a familiar song.   |
| MU.1.C.2.1:  | Clarifications:  |
|              | e.g., tempo, lyrics/no lyrics, style   |
| MU.1.C.3.1:  | Share different thoughts or feelings people have about selected pieces of music.   |
|              | Create sounds or movement freely with props, instruments, and/or found sounds in response to various music styles and/or elements.                 |
| MU.1.F.1.1:  | Clarifications:  |
|              | e.g., staccato/legato, phrasing, melodic direction, steady beat, rhythm; props: use scarves, ribbon sticks, fabric shapes                          |
|              | Describe how he or she likes to participate in music.  |
| MU.1.F.2.1:  | Clarifications:  |
|              | e.g., sing with a family member or friend, make up songs, tap rhythms, play a musical instrument   |
|              | Demonstrate appropriate manners and teamwork necessary for success in a music classroom.   |
| MU.1.F.3.1:  | Clarifications:  |
|              | e.g., take turns, share, be a good listener, be respectful, display good manners   |
|              | Perform simple songs, dances, and musical games from a variety of cultures.  |
| MII 1 H 1 1· | Clarifications:  |
|              | e.g., nursery rhymes, singing games, play parties, folk dances   |
| MU.1.H.1.2:  | Explain the work of a composer.  |
|              | Identify and perform folk music used to remember and honor America and its cultural heritage.  |
| MU.1.H.2.1:  | Clarifications:  |
|              | e.g., "This Land is Your Land," "Short'nin' Bread," "America"  |
|              | Explore the use of instruments and vocal sounds to replace or enhance specified words or phrases in children's songs, choral readings of poems and |
|              | stories, and/or chants.  |
| MU.1.H.3.1:  | Clarifications:  |
|              | e.g., rhyming words, vowel sounds, characters, setting, mood   |
|              | Respond to contrasts in music as a foundation for understanding structure.   |
| MU.1.0.1.1:  | Clarifications:  |
|              | e.g., high/low, fast/slow, long/short, phrases   |
|              | Identify patterns of a simple, four-measure song or speech piece.  |
| MU.1.0.1.2:  | Clarifications:  |
|              | e.g., AABA, ABCA, ABAC   |
| MU.1.O.3.1:  | Respond to changes in tempo and/or dynamics within musical examples.   |
|              | Improvise a four-beat response to a musical question sung or played by someone else.   |
| MU.1.S.1.1:  | Clarifications:  |
|              | e.g., melodic, rhythmic  |
| MU.1.S.1.2:  | Create short melodic and rhythmic patterns based on teacher-established guidelines.  |
| MU.1.S.2.1:  | Sing or play songs, which may include changes in verses or repeats, from memory.   |
|              | Sing simple songs in a group, using head voice and maintaining pitch.  |
| MU.1.S.3.1:  | Clarifications:  |
|              | e.g., ioik songs, ninger-plays, can-ano-response, ecno songs   |
| MU.1.S.3.2:  | Play three- to five-note melodies and/or accompaniments on classroom instruments.  |
|              | Sing simple la-sol-mi patterns at signt.   |
| MU.1.S.3.3:  | Clarifications:  |
|              |  |
|              | iviator simple aural rnythm patterns in duple meter with written patterns.   |

| MU.1.S.3.4:                      | Clarifications:<br>e.g., quarter note/rest, beamed eighth notes  |
|----------------------------------|--|
| MU.1.S.3.5:                      | Show visual representation of simple melodic patterns performed by the teacher or a peer. Clarifications: e.g., draw, body/hand signs, manipulatives, la-sol-mi  |
| MAFS.1.OA.1.1:                   | Use addition and subtraction within 20 to solve word problems <sup>1</sup> involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem ( <sup>1</sup> Students are not required to independently read the word problems.)<br>Standard Relation to Course: Supporting  |
| MAFS.1.OA.1.2:                   | Solve word problems that call for addition of three whole numbers whose sum is less than or equal to 20, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem.<br>Standard Relation to Course: Supporting   |
| MAFS.K12.MP.5.1:                 | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. Standard Relation to Course: Supporting |
| MAFS.K12.MP.6.1:                 | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|                                  | Standard Relation to Course: Supporting  |
| MAFS.K12.MP.7.1:                 | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |

| HE.1.B.5.3:                      | Explain the consequences of not following rules/practices when making healthy and safe decisions.  Clarifications: Tooth decay and environmental damage  |
| ТН 1 С 1 3-                      | Evilain personal preferences related to a performance  |

## VERSION DESCRIPTION

First-grade students in music class explore their world through listening, singing, moving, playing instruments, and creating to stimulate the imagination and lead to innovation and creative risk-taking. As they develop basic skills, techniques, and processes in music, they strengthen their music and extra-music vocabulary and music literacy, as well as their ability to remember, focus on, process, and sequence information. As students sing, play, move, and create together, they develop the foundation for important skills such as teamwork, acceptance, respect, and responsibility that will help students be successful in the 21st century.

### GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

Course Number: 5013070

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades PreK to 5 Education Courses > Subject: Music Education > SubSubject: General > Abbreviated Title: MUSIC - GRADE 1 Course Length: Year (Y)

Course Status: Course Approved Grade Level(s): 1

### **Educator Certifications**

Music Education (Elementary Grades 1-6) Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12)

# Music - Grade 1 (#5013070) 2022 - And Beyond

| Name                    | Description  |
|-------------------------|--|
|                         | Respond to specific, teacher-selected musical characteristics in a song or instrumental piece.   |
| MU.1.C.1.1:             | Clarifications:  |
|                         | e.g., beat, rhythm, phrasing, dynamics, tempo  |
|                         | Respond to music from various sound sources to show awareness of differences in musical ideas.   |
| MU.1.C.1.2:             | Clarifications:  |
|                         | e.g., moods, images  |
|                         | Classify instruments into pitched and unpitched percussion families.   |
| MU.1.C.1.3:             | Clarifications:  |
|                         | e.g., xylophone, glockenspiel, woodblock, tambourine   |
| MU.1.C.1.4:             | Differentiate between music performed by one singer and music performed by a group of singers.   |
|                         | Identify the similarities and differences between two performances of a familiar song.   |
| MU.1.C.2.1:             | Clarifications:  |
|                         | e.g., tempo, lyrics/no lyrics, style   |
| MU.1.C.3.1:             | Share different thoughts or feelings people have about selected pieces of music.   |
|                         | Create sounds or movement freely with props, instruments, and/or found sounds in response to various music styles and/or elements.                 |
| MU.1.F.1.1:             | Clarifications:  |
|                         | e.g., staccato/legato, phrasing, melodic direction, steady beat, rhythm; props: use scarves, ribbon sticks, fabric shapes                          |
|                         | Describe how he or she likes to participate in music.  |
| MU 1 F 2 1 <sup>.</sup> | Clarifications:  |
|                         | e.g., sing with a family member or friend, make up songs, tap rhythms, play a musical instrument   |
|                         | Demonstrate appropriate manners and teamwork necessary for success in a music classroom  |
| MII 1 E 2 1.            |  |
| WIO. 1.1 . 3. 1.        | e.g., take turns, share, be a good listener, be respectful, display good manners   |
|                         | Deform simple conder, dances, and musical games from a variaty of sultures   |
| MII 4 11 4 4            |  |
| MU.I.H.I.I:             | Clarifications:  |
| MIL11110.               |  |
| MU.I.H.I.Z.             | Explain the work of a composer.  |
| MIL1 IL0 1.             |  |
| WIQ.1.11.2.1.           | e.g., "This Land is Your Land," "Short'nin' Bread," "America"  |
|                         | Evolore the use of instruments and vocal sounds to replace or enhance specified words or phrases in children's songs, choral readings of poems and |
|                         | stories, and/or chants.  |
| MU.1.H.3.1:             | Clarifications:  |
|                         | e.g., rhyming words, vowel sounds, characters, setting, mood   |
|                         | Respond to contrasts in music as a foundation for understanding structure.   |
| MU 1 O 1 1·             | Clarifications:  |
|                         | e.g., high/low, fast/slow, long/short, phrases   |
|                         | Identify patterns of a simple four-measure song or speech piece  |
| MU 1 O 1 2·             | Clarifications:  |
| 10.1.0.1.2.             | e.g., AABA, ABCA, ABAC   |
| MU 1 0 3 1·             | Respond to changes in tempo and/or dynamics within musical examples  |
| MO.1.0.0.1.             | Improvise a four-beat response to a musical question sung or played by someone else.   |
| MU 1 S 1 1 <sup>.</sup> | Clarifications:  |
|                         | e.g., melodic, rhythmic  |
| MU 1 S 1 2 <sup>.</sup> | Create short melodic and rhythmic patterns based on teacher-established guidelines   |
| MU.1.S.2.1:             | Sing or play songs, which may include changes in verses or repeats, from memory.   |
|                         | Sing simple songs in a group, using head voice and maintaining pitch.  |
| MU.1.S.3.1:             | Clarifications:  |
|                         | e.g., folk songs, finger-plays, call-and-response, echo songs  |
| MU.1.S.3.2:             | Play three- to five-note melodies and/or accompaniments on classroom instruments.  |
|                         | Sing simple la-sol-mi patterns at sight.   |
| MU.1.S.3.3:             | Clarifications:  |
|                         | e.g., reading from hand signs or iconic representations  |
|                         | Match simple aural rhythm patterns in duple meter with written patterns.   |

| MU.1.S.3.4:     | Clarifications:<br>e.g., quarter note/rest, beamed eighth notes  |
|-----------------|--|
| MU.1.S.3.5:     | Show visual representation of simple melodic patterns performed by the teacher or a peer.  Clarifications: e.g., draw, body/band signs, manipulatives, la sol mi   |
|                 | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>  |
| MA.K12.MTR.1.1: | Clarifications:         Teachers who encourage students to participate actively in effortful learning both individually and with others:         • Cultivate a community of growth mindset learners.         • Foster perseverance in students by choosing tasks that are challenging.         • Develop students' ability to analyze and problem solve.         • Recognize students' effort when solving challenging problems.   |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>                   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>                   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br>Clarifications:   |

|                 | <ul> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul> |
|-----------------|---|
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:   |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>  |
|                 | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.         • Prompt students to continually ask, "Does this solution make sense? How do you know?"         • Reinforce that students check their work as they progress within and after a task.         • Strengthen students' ability to verify solutions through justifications.  |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
| MA.K12.MTR.7.1: | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.          <ul> <li>Redesign models and methods to improve accuracy or efficiency</li> </ul> </li> <li>Clarifications:         <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> </ul> </li> </ul>  |
|                 | <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
|                 | Cite evidence to explain and justify reasoning.   |
|                 | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.   |
| ELA.K12.EE.1.1: | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|                 | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                 | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                 | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1: | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
| ELA.K12.EE.3.1: | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
| ELA.K12.EE.4.1: | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.   |
|                 | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
| ELA.K12.EE.5.1: | Use the accepted rules governing a specific format to create quality work.<br>Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                 | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1: | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |

| DA.1.0.3.1:       | Create movement phrases to express a feeling, idea, or story.   |
|-------------------|---|
|                   | Demonstrate acuity in transferring given rhythmic patterns from the aural to the kinesthetic.   |
| DA.1.S.3.4:       | Clarifications:<br>e.g., verbalized rhythm transferred to the feet  |
|                   | Identify the critical elements of locomotor skills.   |
| PE.1.C.2.1:       | Clarifications:<br>Some examples of critical elements of locomotor skills are step-hop for skipping and use of one foot for hopping.                        |
| PE.1.C.2.2:       | Identify safety rules and procedures for teacher-selected physical activities.  |
|                   | Clarifications:<br>An example of a safety procedure is having students stand a safe distance away from a student swinging a bat during striking activities. |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |
| HE.1.B.5.3:       | Explain the consequences of not following rules/practices when making healthy and safe decisions.   |
|                   | Clarifications:<br>Tooth decay and environmental damage.  |
| TH.1.S.1.3:       | Explain personal preferences related to a performance.  |

## VERSION DESCRIPTION

First-grade students in music class explore their world through listening, singing, moving, playing instruments, and creating to stimulate the imagination and lead to innovation and creative risk-taking. As they develop basic skills, techniques, and processes in music, they strengthen their music and extra-music vocabulary and music literacy, as well as their ability to remember, focus on, process, and sequence information. As students sing, play, move, and create together, they develop the foundation for important skills such as teamwork, acceptance, respect, and responsibility that will help students be successful in the 21st century.

### GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

Course Number: 5013070

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades PreK to 5 Education Courses > Subject: Music Education > SubSubject: General > Abbreviated Title: MUSIC - GRADE 1 Course Length: Year (Y)

Course Status: State Board Approved Grade Level(s): 1

| Music Education (Elementary Grades 1-6)            |
|--|
| Music (Elementary and Secondary Grades K-12)       |
| Vocal Music (Elementary and Secondary Grades K-12) |

# Music - Grade 2 (#5013080) 2015 - 2022 (current)

| Name           | Description  |
|----------------|--|
|                | Identify appropriate listening skills for learning about musical examples selected by the teacher.   |
| MU.2.C.1.1:    | Clarifications:  |
|                | e.g., listen for form, voices/instruments; organize thoughts using listening maps, active listening, checklists  |
|                | Period to a piece of music and discuss individual interpretations  |
|                |  |
| MU.2.C.1.2:    | Clarifications:  |
|                | e.g., move, write, draw, describe, gesture   |
| MU.2.C.1.3:    | Classify unpitched instruments into metals, membranes, shakers, and wooden categories.   |
| MU.2.C.1.4:    | Identify child, adult male, and adult female voices by timbre.   |
| MU.2.C.2.1:    | Identify strengths and needs in classroom performances of familiar songs.  |
|                | Discuss why musical characteristics are important when forming and discussing opinions about music.  |
| MU.2.C.3.1:    | Clarifications:<br>e.g., tempo, rhythm, dynamics, instrumentation  |
|                | Create a musical performance that brings a story or poem to life.  |
|                |  |
| IVIU.2.F.I.I.  | e.g. sound carnets, original stories and noems, literary works   |
|                |  |
|                | Describe how people participate in music.  |
| MU.2.F.2.1:    | Clarifications:<br>e.g., singing with family or friends, school music classes, live concerts, parades, sound recordings, video games, movie soundtracks, television and<br>radio commercials |
|                | Collaborate with others in a music presentation and discuss what was successful and what could be improved.  |
| MU.2.F.3.1:    | Clarifications:  |
|                | e.g., take turns, share, be a good listener, be respectful, display good manners, work well in cooperative learning groups   |
|                | Perform songs, musical games, dances, and simple instrumental accompaniments from a variety of cultures  |
|                |  |
| MU.2.H.1.1:    | e.g., multi-cultural and classroom pitched or non-pitched instruments; bordun, ostinato  |
| MU.2.H.1.2:    | Identify the primary differences between composed and folk music.  |
|                | Discuss how music is used for celebrations in American and other cultures.   |
| MU.2.H.2.1:    | Clarifications:<br>e.g., birthdays, New Year, national and religious holidays  |
| MU.2.H.3.1:    | Perform and compare patterns, aurally and visually, found in songs, finger plays, or rhymes to gain a foundation for exploring patterns in other contexts.                                   |
|                | Identify basic elements of music in a song or instrumental excerpt.  |
| MU.2.O.1.1:    | Clarifications:<br>e.g., melody, rhythm, pitch, form   |
|                | Identify the form of a simple piece of music.  |
| MIL 2 O 1 2·   | Clarifications   |
| 10.2.0.1.2.    | e.g., AB, ABA, call-and-response   |
|                |  |
| MU 2 S 1 1     | Describe changes in tempo and dynamics within a musical work.  |
| MU 2.3.1.1:    | Improvise snort prirases in response to a given musical question.  |
| MIL 2 S 2 1.   | Sing or play songe, which may include changes in dynamics, lyring, and form, from memory   |
| MU.2.5.2.1:    | Sing or play songs, which may include changes in dynamics, tyrics, and form, from memory.  |
| MU.2.5.3.1:    | Sing songs in an appropriate range, using nead voice and maintaining pitch.  |
| WIU.2.5.3.2:   | Play simple inelodies and/of accompaniments on classroom instruments.  |
|                | sing simple la-sol-m-do patterns at signt.   |
| MU.2.S.3.3:    | Clarifications:<br>e.g., reading from hand signs and/or iconic or traditional representations  |
| MU.2.S.3.4:    | Compare aural melodic patterns with written patterns to determine whether they are the same or different.  |
|                | Clarifications:<br>e.g., la-sol-mi-do; quarter note/rest, beamed eighth notes  |
|                | Show visual, gestural, and traditional representation of simple melodic patterns performed by someone else.  |
| MU 2 S 3 5     | Clarifications:  |
|                | e.g., draw, body/hand signs, manipulatives, la-sol-mi  |
|                |  |
| LAF5.2.RI.1.1: | Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding or key details in a text.   |
|                | Participate in consolidative conversations with unverse partners about grade 2 topics and texts with peers and adults in small and larger groups.  |
|                | a. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the                                     |

| <u>.</u>          |   |
|-------------------|---|
| LAFS.2.SL.1.1:    | topics and texts under discussion).<br>b. Build on others' talk in conversations by linking their comments to the remarks of others.  |
|                   |   |
| LAFS 2 SL 1 2     | Standard Relation to Course: Supporting<br>Recount or describe key ideas or details from a text read aloud or information presented orally or through other media   |
|                   | Ask and answer questions about what a speaker says in order to clarify comprehension, gather additional information, or deepen understanding of a   |
| LAFS.2.SL.1.3:    | topic or issue.   |
|                   | Identify safety rules and procedures for selected physical activities.  |
| PE.2.C.2.2:       | Clarifications:<br>An example of a safety procedure is having students stand a safe distance away from a student swinging a bat during striking activities.   |
|                   | Perform one folk or line dance accurately.  |
| PE.2.M.1.9:       | Clarifications:<br>An example of a line dance is the Electric Slide.  |
| PE.2.R.6.2:       | Discuss the relationship between skill competence and enjoyment.  |
| PE.2.R.6.3:       | Identify ways to contribute as a member of a cooperative group.   |
|                   | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
|                   | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                   | Standard Relation to Course: Supporting   |
| DA.2.0.3.1:       | Use movement to interpret feelings, stories, pictures, and songs.   |
| ELU.KIZ.ELL.SI.T: | English language learners communicate for social and instructional purposes within the school setting.  |
| HE.2.B.5.3:       | Clarifications:<br>Negative emotions, accidents, injuries, and pollution.   |
| TH.2.C.1.1:       | Describe a character in a story and tell why the character is important to the story.   |
|                   |   |

## VERSION DESCRIPTION

Second-grade students in music class continue exploration of their world as they strengthen their musical skills, techniques, and processes. Student's working vocabulary and musical literacy and understanding deepen with the ability to use unique musical language to communicate their own ideas. Connections with the arts and other disciplines allow students to transfer knowledge and skills to and from other fields of study. As students sing, play, move, and create together, they continue to build such important skills as teamwork, acceptance, respect, and responsibility that will help them be successful in the 21st century.

## GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li></ul> |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.   |

|  | Use benchmark quantities to determine if a solution makes sense.  |
|--|---|
|  | Check calculations when solving problems.   |
|  | Verify possible solutions by explaining the methods used.   |
| MA.K12.MTR.6.1:  | Evaluate results based on the given context.  |
|  | Clarifications:   |
|  | Teachers who encourage students to assess the reasonableness of solutions:  |
|  | <ul> <li>Prompt students to continually ask "Does this solution make sense? How do you know?"</li> </ul>  |
|  | Reinforce that students check their work as they progress within and after a task.  |
|  | <ul> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
|  | Apply mathematics to real world contacts  |
|  | Mathematicians who apply mathematics to real-world contexts:  |
|  |   |
|  | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> </ul>   |
|  | <ul> <li>Ose models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficience</li> </ul>  |
| MA.K12.MTR.7.1:  | Clarifications:   |
|  | Teachers who encourage students to apply mathematics to real-world contexts:  |
|  | <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> </ul>  |
|  | Challenge students to question the accuracy of their models and methods.  |
|  | Support students as they validate conclusions by comparing them to the given situation.   |
|  | Indicate how various concepts can be applied to other disciplines.  |
|  | Cite evidence to explain and justify reasoning.   |
|  | Clarifications:   |
|  | K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details  |
|  | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.   |
|  | In 3rd grade, students should use a combination of direct and indirect citations.   |
| ELA.K12.EE.1.1:  | 4. E Students continue with providus skills and reference comments made by speakers and pears. Students site taxts that they've directly  |
|  | 4-5 students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they ve directly<br>quoted paraphrased or used for information. When writing, students will use the form of citation dictated by the instructor or the style quide   |
|  | referenced by the instructor.   |
|  | 6.8 Students continue with previous skills and use a style quide to create a proper citation  |
|  | o o statema continue with providus skins and use a style galde to create a proper citation.   |
|  | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|  | Read and comprehend grade-level complex texts proficiently.   |

Students will use the terms and apply them in 2nd grade and beyond.         Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.         Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |

## VERSION DESCRIPTION

Second-grade students in music class continue exploration of their world as they strengthen their musical skills, techniques, and processes. Student's working vocabulary and musical literacy and understanding deepen with the ability to use unique musical language to communicate their own ideas. Connections with the arts and other disciplines allow students to transfer knowledge and skills to and from other fields of study. As students sing, play, move, and create together, they continue to build such important skills as teamwork, acceptance, respect, and responsibility that will help them be successful in the 21st century.

### GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

GENERAL INFORMATION

Course Number: 5013080

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades PreK to 5 Education Courses > Subject: Music Education > SubSubject: General > Abbreviated Title: MUSIC - GRADE 2 Course Length: Year (Y)

Course Status: State Board Approved Grade Level(s): 2

### **Educator Certifications**

Music Education (Elementary Grades 1-6) Vocal Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

# Music - Intermediate 1 (#5013090) 2015 - 2022 (current)

| Name         | Description   |
|--------------|---|
|              | Describe listening skills and how they support appreciation of musical works.   |
| MU.3.C.1.1:  | Clarifications:   |
|              | e.g., focus: form, instrumentation, tempo, dynamics; organize: listening maps, active listening, checklists   |
|              | Respond to a musical work in a variety of ways and compare individual interpretations.  |
| MU.3.C.1.2:  | Clarifications:   |
|              | e.g., move, draw, sing, play, gesture, conduct  |
|              | Identify families of orchestral and band instruments.   |
| MU.3.C.1.3:  | Clarifications:   |
|              |   |
| MU.3.C.1.4:  | Discriminate between unison and two-part singing.   |
| M0.3.6.2.1.  | Identify musical characteristics and elements within a piece of music when discussing the value of the work.  |
| MU.3.C.3.1:  | Clarifications:   |
|              | e.g., tempo, rhythm, timbre, form, instrumentation, texture   |
|              | Enhance the meaning of a story or poem by creating a musical interpretation using voices, instruments, movement, and/or found sounds.                   |
| MU.3.F.1.1:  | Clarifications:   |
|              | e.g., sound carpets, original stories and poems, literary works   |
|              | Identify musicians in the school, community, and media.   |
| MU.3.F.2.1:  | Clarifications:   |
|              | e.g., band, chorus, and/or orchestra member; music teacher; cantor, choir director, or song leader in religious services                                |
|              | Describe opportunities for personal music-making.   |
| MU.3.F.2.2:  | Clarifications:   |
|              | e.g., performing ensembles, individual lessons, community and church music groups, family, playground, computer-generated music                         |
|              | Collaborate with others to create a musical presentation and acknowledge individual contributions as an integral part of the whole.                     |
| MU.3.F.3.1:  | Clarifications:   |
|              | e.g., work together, communicate effectively, share tasks and responsibilities, work well in cooperative learning groups                                |
|              |   |
| MU.3.H.1.1:  | Clarifications:   |
| MII 3 H 1 2· | Identify significant information about specified composers and one or more of their musical works   |
| W0.3.11.1.2. | Identify timbre(s) in music from a variety of cultures.   |
| MU.3.H.1.3:  | Clarifications:   |
|              | e.g., metals, woods, shakers, strings, voice: adult, child  |
|              | Discuss how music in America was influenced by people and events in its history.  |
| MU.3.H.2.1:  | Clarifications:   |
|              | e.g., slavery, expansion of railroad, jazz, war, politics   |
|              | Experience and discuss, using correct music and other relevant content-area vocabulary, similarities in the use of pattern, line, and form in music and |
| MU.3.H.3.1:  | other teacher-selected contexts.  |
|              | Clarifications:   |
|              | Identify using correct music vocabulary, the elements in a musical work   |
| MIL 3 O 1 1· | Clarifications:   |
| M0.3.0.1.1.  | e.g., rhythm, pitch, timbre, form   |
|              | Identify and describe the musical form of a familiar song.  |
| MU.3.0.1.2:  | Clarifications:   |
|              | e.g., AB, ABA, ABABA, call-and-response, verse/refrain, rondo, intro, coda  |
| MU.3.0.2.1:  | Rearrange melodic or rhythmic patterns to generate new phrases.   |
| MU.3.0.3.1:  | Describe how tempo and dynamics can change the mood or emotion of a piece of music.   |
| MU.3.S.1.1:  | Improvise rhythms or melodies over ostinati.  |
|              | create an alternate ending to a familiar song.  |
| MU.3.5.1.2:  | e.g., dynamics, tempo, lyrics   |
|              | Identify natterns in songs to aid the development of sequencing and memorization skills   |
| MIL 3 S 2 1. |   |
| WI0.3.3.2.1. | viainications.  |

|                   | e.g., parts of a round, parts of a layered work  |
|-------------------|--|
| MU.3.S.3.1:       | Sing rounds, canons, or ostinati in an appropriate range, using head voice and maintaining pitch.  |
| MU.3.S.3.2:       | Play melodies and layered ostinati, using proper instrumental technique, on pitched and unpitched instruments.   |
|                   | Sing simple la-sol-mi-re-do patterns at sight.   |
| MU.3.S.3.3:       | Clarifications:  |
|                   | e.g., reading from hand signs; reading from nontraditional or traditional notation   |
|                   | Match simple aural rhythm patterns in duple and triple meter with written patterns.  |
| MU.3.S.3.4:       | Clarifications:  |
|                   | e.g., 2/4, 3/4, 4/4  |
|                   | Notate simple rbythmic and melodic patterns using traditional potation   |
| MULOSOF.          |  |
| 10.3.3.3.3.       | e.g., rhythmic: guarter notes, beamed eighth notes, half notes, guarter rests, half rests; melodic; la-sol-mi-do   |
|                   |  |
| LAF5.3.RI.1.1:    | Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers.  |
|                   | building on others' ideas and expressing their own clearly.  |
|                   | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about   |
|                   | the topic to explore ideas under discussion.   |
|                   | b. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the   |
| LAF3.3.3L.1.1.    | topics and texts under discussion).  |
|                   | c. Ask questions to check understanding of information presented, stay on topic, and link their comments to the remarks of others.   |
|                   | d. Explain their own ideas and understanding in light of the discussion.   |
|                   |  |
|                   | Standard Relation to Course: Supporting  |
| LAFS.3.SL.1.2:    | quantitatively, and orally   |
| LAFS.3.SL.1.3:    | Ask and answer questions about information from a speaker, offering appropriate elaboration and detail.  |
|                   | Use appropriate tools strategically.   |
|                   | <sub>F</sub> FF  |
|                   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,   |
|                   | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.   |
|                   | Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools  |
| MAFS.K12.MP.5.1:  | might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze   |
|                   | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other   |
|                   | mathematical knowledge, when making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify |
|                   | relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use   |
|                   | technological tools to explore and deepen their understanding of concepts.   |
|                   | Standard Relation to Course: Supporting  |
|                   | Attend to precision.   |
|                   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own  |
|                   | reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about  |
| MAFS.K12.MP.6.1:  | specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,  |
|                   | express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully  |
|                   | formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|                   | Standard Relation to Course: Supporting  |
|                   | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:  | Mathematically profisions students look elecoly to discorp a pattern or structure. Voying students, for example, might paties that three and soven   |
|                   | more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later  |
|                   | students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$   |
|                   | + 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and  |
|                   | can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see  |
|                   | complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x   |
|                   | - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |
|                   | Standard Relation to Course: Supporting  |
|                   | Understand the importance of safety rules and procedures in all physical activities.   |
| PE.3.C.2.2:       | Clarifications:  |
|                   | An example of a safety procedure is wearing a helmet when riding a bicycle.  |
|                   | Perform one dance accurately   |
|                   |  |
| PE.3.M.1.10:      | Clarifications:  |
|                   | some examples of values are square, contra, step and social.   |
| DA.3.H.1.1:       | Practice and perform social, cultural, or folk dances, using associated traditional music, to identify commonalities and differences.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |
| VA.3.H.1.3:       | Identity and be respectful of ideas important to individuals, groups, or cultures that are reflected in their artworks.  |

## VERSION DESCRIPTION

Third-grade\* students in music class explore their world by engaging in active learning processes to refine the skills, techniques, and processes of musicianship through such activities as improvisation and arranging. As they continue to develop their working music and cross-content vocabulary and become able to identify fundamental characteristics of musical structures, they demonstrate artistic growth through cognition and reflection and endeavor to use their own artistic voices to communicate ideas and inventions. They recognize the importance of cultural experiences in music throughout history and in emerging art forms. Music students examine the positive impact of the arts in society and practice creative risk-taking in preparation for contributive citizenship in the 21st century.

### **GENERAL NOTES**

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

\* Intermediate Music 1, 2, and 3 have been designed in two ways: 1) to challenge students on grade level who have previously taken classes in this content area; and 2) to challenge students whose education in this content area has been delayed until the intermediate grades. Music teachers of classes in Grades 3, 4, and 5 should select the most appropriate course level in the series based on each group's prior experience, the benchmarks, and available instruction time. Once elementary students have entered the series, they must progress to the next course in sequence.

#### Examples:

- A 3rd grade class that may or may not have taken Music previously should be enrolled in Intermediate Music 1 and progress through the series in subsequent grades.
- 4th graders beginning formal instruction in Music for the first time may be enrolled, as a class, in Intermediate Music 1, and must then progress to Intermediate Music 2 in the following year. ]

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Music - Intermediate 1 (#5013090) 2022 - And Beyond

| Name          | Description   |
|---------------|---|
|               | Describe listening skills and how they support appreciation of musical works.   |
| MU.3.C.1.1:   | Clarifications:   |
|               | e.g., focus: form, instrumentation, tempo, dynamics; organize: listening maps, active listening, checklists   |
|               | Respond to a musical work in a variety of ways and compare individual interpretations.  |
| MU.3.C.1.2:   | Clarifications:   |
|               | e.g., move, draw, sing, play, gesture, conduct  |
|               | Identify families of orchestral and band instruments.   |
| MU.3.C.1.3:   | Clarifications:   |
|               | e.g., strings, woodwinds, brass, percussion, keyboards  |
| MU.3.C.1.4:   | Discriminate between unison and two-part singing.   |
| MU.3.C.2.1:   | Evaluate performances of familiar music using teacher-established criteria.   |
|               | Identify musical characteristics and elements within a piece of music when discussing the value of the work.  |
| MU.3.C.3.1:   | Clarifications:   |
|               | e.g., tempo, rhythm, timbre, torm, instrumentation, texture   |
|               | Enhance the meaning of a story or poem by creating a musical interpretation using voices, instruments, movement, and/or found sounds.                   |
| MU.3.F.1.1:   | Clarifications:   |
|               | e.g., sound carpets, original stories and poems, interary works   |
|               | Identify musicians in the school, community, and media.   |
| MU.3.F.2.1:   | Clarifications:   |
|               |   |
|               | Describe opportunities for personal music-making.   |
| MU.3.F.2.2:   | Clarifications:   |
|               | e.g., performing ensembles, individual lessons, community and church music groups, family, playground, computer-generated music                         |
|               | Collaborate with others to create a musical presentation and acknowledge individual contributions as an integral part of the whole.                     |
| MU.3.F.3.1:   | Clarifications:   |
|               | e.g., work togetter, communicate effectively, share tasks and responsibilities, work wer in cooperative rearring groups                                 |
|               |   |
| MU.3.H.1.1:   | clarifications:   |
| MII 2 H 1 2·  | Identify cignificant information about specified composers and one or more of their musical works   |
| 10.3.11.1.2.  | Identify significant information about specifical composers and one of more of their musical works.   |
| MU.3.H.1.3:   | Clarifications:   |
|               | e.g., metals, woods, shakers, strings, voice: adult, child  |
|               | Discuss how music in America was influenced by people and events in its history.  |
| MU.3.H.2.1:   | Clarifications:   |
|               | e.g., slavery, expansion of railroad, jazz, war, politics   |
|               | Experience and discuss, using correct music and other relevant content-area vocabulary, similarities in the use of pattern, line, and form in music and |
| MIL 0 11 0 1. | other teacher-selected contexts.  |
| MU.3.H.3.1:   | Clarifications:   |
|               | e.g., in dance, visual art, language arts, pulse, rhythm, fluency   |
|               | Identify, using correct music vocabulary, the elements in a musical work.   |
| MU.3.0.1.1:   | Clarifications:   |
|               | e.g., rhythm, pitch, timbre, form   |
|               | Identify and describe the musical form of a familiar song.  |
| MU.3.0.1.2:   | Clarifications:   |
|               | e.g., AB, ABA, ABABA, call-and-response, verse/refrain, rondo, intro, coda  |
| MU.3.0.2.1:   | Rearrange melodic or rhythmic patterns to generate new phrases.   |
| MU.3.0.3.1:   | Describe how tempo and dynamics can change the mood or emotion of a piece of music.   |
| IVIU.3.5.1.1: | Improvise myumis or melodies over osunati.  |
| MIL2S12.      |   |
| 10.3.3.1.2.   | e.g., dynamics, tempo, lyrics   |
|               | Identify natterns in sonas to aid the development of sequencing and memorization skills   |
| MIL 3 S 2 1.  |   |
| IVIU.J.J.Z.T. | oranneations.   |

|                              | e.g., parts of a round, parts of a layered work  |
|------------------------------|--|
| MU.3.S.3.1:                  | Sing rounds, canons, or ostinati in an appropriate range, using head voice and maintaining pitch.  |
| MU.3.S.3.2:                  | Play melodies and layered ostinati, using proper instrumental technique, on pitched and unpitched instruments.   |
| MIL2S22                      | Sing simple la-sol-ini-re-do patterns at signt.  |
| 10.3.3.3.3.                  | e.g., reading from hand signs; reading from nontraditional or traditional notation   |
|                              | Match simple aural rhythm patterns in duple and triple meter with written patterns.  |
| MU.3.S.3.4:                  | Clarifications:  |
|                              | e.g., 2/4, 3/4, 4/4  |
|                              | Notate simple rhythmic and melodic patterns using traditional notation.  |
| MU.3.S.3.5:                  | Clarifications:  |
|                              | e.g., rhythmic: quarter notes, beamed eighth notes, nair notes, quarter rests, nair rests; meiodic: ia-soi-mi-do   |
|                              | Analyze the problem in a way that makes sense given the task.  |
|                              | Ask questions that will help with solving the task.  |
|                              | Build perseverance by modifying methods as needed while solving a challenging task.  |
|                              | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Use and support each other when attempting a new method or approach.</li> </ul>  |
| MA.K12.MTR.1.1:              | Reip and support each other when attempting a new method or approach.      Clarifications:   |
|                              | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                              | Cultivate a community of growth mindset learners.  |
|                              | <ul> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' oblities to enable and enables only and enables.</li> </ul>  |
|                              | <ul> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>   |
|                              | Demonstrate understanding by representing problems in multiple ways.   |
|                              | Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                              | Build understanding through modeling and using manipulatives.  |
|                              | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.  |
|                              | Progress from modeling problems with objects and drawings to using algorithms and equations.   |
| MA K12 MTR 2 1               | <ul> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose</li> </ul>   |
| IVIA. K I Z. IVI I K. Z. I . | Clarifications:  |
|                              | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:  |
|                              | Help students make connections between concepts and representations.   |
|                              | <ul> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Cuide students from concrete to nictorial to obstract representations as understanding progresses.</li> </ul>                                       |
|                              | <ul> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
|                              | Complete tasks with mathematical fluency.  |
|                              | Mathematicians who complete tasks with mathematical fluency:   |
|                              | Select efficient and appropriate methods for solving problems within the given context.  |
|                              | Maintain flexibility and accuracy while performing procedures and mental calculations.   |
|                              | Complete tasks accurately and with confidence.   |
| MA.K12.MTR.3.1:              | <ul> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>   |
|                              | Clarifications:  |
|                              | Teachers who encourage students to complete tasks with mathematical fluency:   |
|                              | <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple expective for students to practice efficient and generalizable methods.</li> </ul> |
|                              | <ul> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>   |
|                              | Engage in discussions that reflect on the mathematical thinking of self and others.  |
|                              | Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |
| MA.K12.MTR.4.1:              | Communicate mathematical ideas, vocabulary and methods effectively.  |
|                              | Analyze the mathematical thinking of others.   |
|                              | <ul> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task</li> </ul>   |
|                              | <ul> <li>Justify results by explaining methods and processes.</li> </ul>   |
|                              | Construct possible arguments based on evidence.  |
|                              | Clarifications:  |
|                              | Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:   |
|                              | <ul> <li>Establish a current which students ask questions of the teacher and their peers, and error is an opportunity for rearning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> </ul>                            |
|                              | <ul> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> </ul>   |
|                              | • Develop students' ability to justify methods and compare their responses to the responses of their peers.  |
|                              | Use patterns and structure to help understand and connect mathematical concepts.   |
|                              | Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |

|                  | Focus on relevant details within a problem.   |
|------------------|---|
|                  | <ul> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> </ul>  |
|                  | Decompose a complex problem into manageable parts.  |
|                  | Relate previously learned concepts to new concepts.   |
|                  | Look for similarities among problems.   |
| MA.R12.WITR.J.1. | Connect solutions of problems to more complicated large-scale situations.   |
|                  | Clarifications:   |
|                  | Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:                                 |
|                  | Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.                                  |
|                  | Support students to develop generalizations based on the similarities found among problems.   |
|                  | Provide opportunities for students to create plans and procedures to solve problems.  |
|                  | • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.                 |
|                  | Assess the reasonableness of solutions.   |
|                  | Mathematicians who assess the reasonableness of solutions:  |
|                  | Estimate to discover possible solutions   |
|                  | <ul> <li>Estimate to discover possible solutions.</li> <li>Lise henchmark quantities to determine if a solution makes sense.</li> </ul>             |
|                  | Check calculations when solving problems  |
|                  | Verify possible solutions by explaining the methods used  |
| MA K12 MTP 6 1.  | Verify possible solutions by explaining the methods used.     Evaluate results based on the given context   |
| MA.K12.WITK.0.1. |   |
|                  | Clarifications:   |
|                  | Have students estimate or predict solutions prior to solutions.   |
|                  | Prompt students to continually ask "Does this solution make sense? How do you know?"  |
|                  | Reinforce that students check their work as they progress within and after a task   |
|                  | <ul> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
|                  |   |
|                  | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real world contexts:   |
|                  | mathematicians who apply mathematics to real-world contexts.  |
|                  | Connect mathematical concepts to everyday experiences.  |
|                  | Use models and methods to understand, represent and solve problems.   |
|                  | Perform investigations to gather data or determine if a method is appropriate.     Redesign models and methods to improve accuracy or efficiency.   |
| MA.K12.MTR.7.1:  | Clarifications:   |
|                  | Teachers who encourage students to apply mathematics to real-world contexts:  |
|                  | Provide opportunities for students to create models, both concrete and abstract, and perform investigations.  |
|                  | Challenge students to question the accuracy of their models and methods.  |
|                  | Support students as they validate conclusions by comparing them to the given situation.   |
|                  | Indicate how various concepts can be applied to other disciplines.  |
|                  | Cite evidence to explain and justify reasoning.   |
|                  | Clarifications:   |
| ELA.K12.EE.1.1:  | K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details        |
|                  | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.                           |
|                  | 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.        |
|                  | In 3rd grade, students should use a combination of direct and indirect citations.   |
|                  | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly             |
|                  | quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide    |
|                  | referenced by the instructor.   |
|                  | 6-8 Students continue with previous skills and use a style quide to create a proper citation  |
|                  |   |
|                  | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.                         |
|                  | Read and comprehend grade-level complex texts proficiently  |
|                  |   |
| ELA.KIZ.EE.Z.I:  | Clarifications:   |
|                  |   |
|                  | Make inferences to support comprehension.   |
|                  | Clarifications:   |
| ELA.K12.EE.3.1:  | Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl |
|                  | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and           |
|                  | beyond.   |
|                  | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.                       |
| ELA.K12.EE.4.1:  | Clarifications:   |
|                  | In kindergarten, students learn to listen to one another respectfully.  |
|                  | In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The                            |
|                  |   |
|                  | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students  |
|                  | build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                  | Use the accepted rules governing a specific format to create quality work   |
| 1                | cost and accepted rates governing a specific format to dreate quality work.   |
|                  | Olavifications  |

| ELA.K12.EE.5.1:   | Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. |
|-------------------|---|
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. |
|                   | Understand the importance of safety rules and procedures in all physical activities.  |
| PE.3.C.2.2:       | Clarifications:<br>An example of a safety procedure is wearing a helmet when riding a bicycle.  |
|                   | Perform one dance accurately.   |
| PE.3.M.1.10:      | Clarifications:<br>Some examples of dances are square, contra, step and social.   |
| DA.3.H.1.1:       | Practice and perform social, cultural, or folk dances, using associated traditional music, to identify commonalities and differences.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |
| VA.3.H.1.3:       | Identify and be respectful of ideas important to individuals, groups, or cultures that are reflected in their artworks.   |

### VERSION DESCRIPTION

Third-grade\* students in music class explore their world by engaging in active learning processes to refine the skills, techniques, and processes of musicianship through such activities as improvisation and arranging. As they continue to develop their working music and cross-content vocabulary and become able to identify fundamental characteristics of musical structures, they demonstrate artistic growth through cognition and reflection and endeavor to use their own artistic voices to communicate ideas and inventions. They recognize the importance of cultural experiences in music throughout history and in emerging art forms. Music students examine the positive impact of the arts in society and practice creative risk-taking in preparation for contributive citizenship in the 21st century.

### **GENERAL NOTES**

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

\* Intermediate Music 1, 2, and 3 have been designed in two ways: 1) to challenge students on grade level who have previously taken classes in this content area; and 2) to challenge students whose education in this content area has been delayed until the intermediate grades. Music teachers of classes in Grades 3, 4, and 5 should select the most appropriate course level in the series based on each group's prior experience, the benchmarks, and available instruction time. Once elementary students have entered the series, they must progress to the next course in sequence.

### Examples:

- A 3rd grade class that may or may not have taken Music previously should be enrolled in Intermediate Music 1 and progress through the series in subsequent grades.
- 4th graders beginning formal instruction in Music for the first time may be enrolled, as a class, in Intermediate Music 1, and must then progress to Intermediate Music 2 in the following year. ]

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## **Educator Certifications**

Music Education (Elementary Grades 1-6) Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12)

# Music - Intermediate 2 (#5013100) 2015 - 2022 (current)

| Name        | Description   |  |
|-------------|---|--|
|             | Develop effective listening strategies and describe how they can support appreciation of musical works.   |  |
| MU.4.C.1.1: | Clarifications:<br>e.g., listen for form, instrumentation, tempo, dynamics, melodic line, rhythm patterns; organize thoughts using listening maps, active listening,<br>checklists  |  |
|             | Describe, using correct music vocabulary, what is heard in a specific musical work.   |  |
| MU.4.C.1.2: | Clarifications:<br>e.g., movement of melodic line, tempo, repeated and contrasting patterns   |  |
| MU.4.C.1.3: | Classify orchestral and band instruments as strings, woodwinds, brass, percussion, or keyboard.   |  |
| MU.4.C.1.4: | Identify and describe the four primary voice parts, i.e., soprano, alto, tenor, bass.   |  |
|             | Identify and describe basic music performance techniques to provide a foundation for critiquing one's self and others.  |  |
| MU.4.C.2.1: | Clarifications:<br>e.g., intonation, balance, blend, timbre, posture, breath support  |  |
| MU.4.C.2.2: | Critique specific techniques in one's own and others performances using teacher-established criteria.   |  |
|             | Describe characteristics that make various musical works appealing.   |  |
| MU.4.C.3.1: | Clarifications:<br>e.g., tempo, rhythm, dynamics, blend, timbre, form, texture, instrumentation   |  |
|             | Create new interpretations of melodic or rhythmic pieces by varying or adding dynamics, timbre, tempo, lyrics, and/or movement.   |  |
| MU.4.F.1.1: | Clarifications:<br>e.g., mallet use, vocal and instrumental changes, digital sounds, literature, poetry   |  |
|             | Describe roles and careers of selected musicians.   |  |
| MU.4.F.2.1: | Clarifications:   |  |
|             | e.g., teacher, conductor, composer, studio musician, recording technician, sound engineer, entertainer  |  |
|             | Identify the characteristics and behaviors displayed by successful student musicians, and discuss how these qualities will contribute to success beyond the music classroom.  |  |
| MU.4.F.3.1: | Clarifications:<br>e.g., punctual, prepared, dependable, self-disciplined, solutions-oriented, shows initiative, uses time wisely   |  |
|             | Discuss the safe, legal way to download songs and other media.  |  |
| MU.4.F.3.2: | Clarifications:<br>e.g., sharing personal and financial information, copying and sharing music  |  |
| MU.4.H.1.1: | Examine and describe a cultural tradition, other than one's own, learned through its musical style and/or use of authentic instruments.   |  |
| MU.4.H.1.2: | Describe the influence of selected composers on the musical works and practices or traditions of their time.  |  |
| MU.4.H.1.3: | Identify pieces of music that originated from cultures other than one's own.  |  |
|             | Perform, listen to, and discuss music related to Florida's history.   |  |
| MU.4.H.2.1: | Clarifications:<br>e.g., music of Stephen Foster; Spanish, African American, and Native American influences; folk music; early music used to heal, signal, impress,<br>intimidate, immortalize  |  |
|             | Identify ways in which individuals of varying ages and cultures experience music.   |  |
| MU.4.H.2.2: | Clarifications:<br>e.g., live concert, musical theatre, Internet, recordings  |  |
| MU.4.H.3.1: | Identify connections among music and other contexts, using correct music and other relevant content-area vocabulary, and explore how learning in one academic area can help with knowledge or skill acquisition in a different academic area. |  |
|             | Clarifications:<br>e.g., movement, form, repetition, rhythmic patterns/numeric patterns, fractions, vibrations/sound waves  |  |
|             | Compare musical elements in different types of music, using correct music vocabulary, as a foundation for understanding the structural conventions of specific styles.  |  |
| MU.4.O.1.1: | Clarifications:<br>e.g., rules of rhythm, melody, timbre, form, tonality, harmony, meter; styles: Classical, Baroque  |  |
| MU.4.0.2.1: | Create variations for selected melodies.  |  |
|             | Identify how expressive elements and lyrics affect the mood or emotion of a song.   |  |
| MU.4.O.3.1: | Clarifications:<br>e.g., tempo, dynamics, phrasing, articulation  |  |
| MU.4.0.3.2: | Apply expressive elements to a vocal or instrumental piece and, using correct music vocabulary, explain one's choices.  |  |
|             | Improvise phrases, using familiar songs.  |  |
| MU.4.S.1.1: | Clarifications:<br>e.g., altering text, rhythm, pitch, melody   |  |
|                            | Create melodic patterns using a variety of sound sources.  |  |
|----------------------------|--|--|
| MU.4.S.1.2:                | Clarifications:  |  |
|                            | e.g., voice, instrument  |  |
|                            | Arrange a familiar song for voices or instruments by manipulating form.  |  |
| MU.4.S.1.3:                | Clarifications:  |  |
| MU 4 S 2 1·                | Apply knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearcal and performance   |  |
| MU.4.5.2.1:<br>MU.4.5.3.1: | Apply knowledge of musical structure to aid in sequencing and memorization and to internalize details of reheats and performance.  |  |
| MU 4.3.3.1.                | Play rounds, canons, or layered ostination classroom instruments   |  |
| 10.4.3.3.2.                | Perform extended pentatonic melodies at sight.   |  |
| MIL / S 2 3·               | Clarifications:  |  |
| 10.4.3.3.3.                | e.g., high do, low sol, low la; vocal and/or instrumental  |  |
| MU.4.S.3.4:                | Play simple ostinati, by ear, using classroom instruments.   |  |
|                            | Notate simple rhythmic phrases and extended pentatonic melodies using traditional notation.  |  |
| MU 4 S 3 5                 | Clarifications:  |  |
|                            | e.g., rhythmic: quarter notes, beamed eighth notes, half notes, whole notes; corresponding rests; dotted half note; melodic: la-sol-mi-re-do   |  |
| LAFS.4.RL.1.3:             | Describe in depth a character, setting, or event in a story or drama, drawing on specific details in the text (e.g., a character's thoughts, words, or actions)  |  |
|                            | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 4 topics and texts.   |  |
|                            | building on others' ideas and expressing their own clearly.  |  |
|                            | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about   |  |
|                            | the topic to explore ideas under discussion.   |  |
| LAFS.4.SL.1.1:             | b. Follow agreed-upon rules for discussions and carry out assigned roles.  |  |
|                            | c. Pose and respond to specific questions to clarify or follow up on information, and make comments that contribute to the discussion and link to  |  |
|                            | the remarks of others.   |  |
|                            | a. Review the key ideas expressed and explain their own ideas and understanding in light of the discussion.  |  |
|                            | Standard Relation to Course: Supporting  |  |
| LAFS.4.SL.1.2:             | Paraphrase portions of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.  |  |
| LAFS.4.SL.1.3:             | Identify the reasons and evidence a speaker provides to support particular points.   |  |
|                            | Use appropriate tools strategically.   |  |
| MAFS.K12.MP.5.1:           | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. |  |
|                            | Attend to precision  |  |
| MAFS.K12.MP.6.1:           | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |  |
|                            | Standard Relation to Course: Supporting  |  |
|                            | Look for and make use of structure.  |  |
| MAFS.K12.MP.7.1:           | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |  |
|                            | Standard Relation to Course: Supporting  |  |
|                            | Understand the importance of safety rules and procedures in all physical activities, especially those that are high risk.  |  |
| PE.4.C.2.2:                | Clarifications:  |  |
|                            | An example of a safety procedure is naving students stand a safe distance away from a student swinging a golf club during striking activities.   |  |
|                            | Perform two or more dances accurately.   |  |
| PE.4.M.1.10:               | Clarifications:  |  |
|                            | some examples of dances are line, square, contra, tork, step and social.   |  |
| DA.4.H.3.3:                | Describe now dance and music can each be used to interpret and support the other.  |  |
| ELD.K12.ELL.SI.1:          | I. I. English language learners communicate for social and instructional purposes within the school setting.   |  |
| 30.4.P.10.3:               | investigate and explain that sound is produced by vibrating objects and that pitch depends on how fast or slow the object vibrates.  |  |

# VERSION DESCRIPTION

Fourth-grade\* students in music class explore artistic intent by investigating the inventive development of ideas, applying musicianship skills and techniques while engaging in the creation and interpretation of the arts. They analyze the characteristics of musical structures from simple to complex to build understanding and respect for the creative process. As they examine the significant cultural contributions in the arts throughout history, particularly in Florida, they become increasingly able to identify the connections among music and other fields of study. Music students also develop knowledge of careers in, and related to, the arts as they explore the impact of music on the local and global economies of the 21st century and strengthen personal skills for success throughout school and beyond.

# GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

\* Intermediate Music 1, 2, and 3 have been designed in two ways: 1) to challenge students on grade level who have previously taken classes in this content area; and 2) to challenge students whose education in this content area has been delayed until the intermediate grades. Music teachers of classes in Grades 3, 4, and 5 should select the most appropriate course level in the series based on each group's prior experience, the benchmarks, and available instruction time. Once elementary students have entered the series, they must progress to the next course in sequence.

#### Examples:

- A 3rd grade class that may or may not have taken Music previously should be enrolled in Intermediate Music 1 and progress through the series in subsequent grades.
- 4th graders beginning formal instruction in Music for the first time may be enrolled, as a class, in Intermediate Music 1, and must then progress to Intermediate Music 2 in the following year.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Music - Intermediate 2 (#5013100) 2022 - And Beyond

| Name        | Description   |
|-------------|---|
|             | Develop effective listening strategies and describe how they can support appreciation of musical works.   |
| MU.4.C.1.1: | Clarifications:<br>e.g., listen for form, instrumentation, tempo, dynamics, melodic line, rhythm patterns; organize thoughts using listening maps, active listening,<br>checklists  |
|             | Describe, using correct music vocabulary, what is heard in a specific musical work.   |
| MU.4.C.1.2: | Clarifications:<br>e.g., movement of melodic line, tempo, repeated and contrasting patterns   |
| MU.4.C.1.3: | Classify orchestral and band instruments as strings, woodwinds, brass, percussion, or keyboard.   |
| MU.4.C.1.4: | Identify and describe the four primary voice parts, i.e., soprano, alto, tenor, bass.   |
|             | Identify and describe basic music performance techniques to provide a foundation for critiquing one's self and others.  |
| MU.4.C.2.1: | Clarifications:<br>e.g., intonation, balance, blend, timbre, posture, breath support  |
| MU.4.C.2.2: | Critique specific techniques in one's own and others performances using teacher-established criteria.   |
|             | Describe characteristics that make various musical works appealing.   |
| MU.4.C.3.1: | Clarifications:<br>e.g., tempo, rhythm, dynamics, blend, timbre, form, texture, instrumentation   |
|             | Create new interpretations of melodic or rhythmic pieces by varying or adding dynamics, timbre, tempo, lyrics, and/or movement.   |
| MU.4.F.1.1: | Clarifications:<br>e.g., mallet use, vocal and instrumental changes, digital sounds, literature, poetry   |
|             | Describe roles and careers of selected musicians.   |
| MU.4.F.2.1: | Clarifications:   |
|             | e.g., teacher, conductor, composer, studio musician, recording technician, sound engineer, entertainer  |
|             | Identify the characteristics and behaviors displayed by successful student musicians, and discuss how these qualities will contribute to success beyond the music classroom.  |
| MU.4.F.3.1: | Clarifications:<br>e.g., punctual, prepared, dependable, self-disciplined, solutions-oriented, shows initiative, uses time wisely   |
|             | Discuss the safe, legal way to download songs and other media.  |
| MU.4.F.3.2: | Clarifications:<br>e.g., sharing personal and financial information, copying and sharing music  |
| MU.4.H.1.1: | Examine and describe a cultural tradition, other than one's own, learned through its musical style and/or use of authentic instruments.   |
| MU.4.H.1.2: | Describe the influence of selected composers on the musical works and practices or traditions of their time.  |
| MU.4.H.1.3: | Identify pieces of music that originated from cultures other than one's own.  |
|             | Perform, listen to, and discuss music related to Florida's history.   |
| MU.4.H.2.1: | Clarifications:<br>e.g., music of Stephen Foster; Spanish, African American, and Native American influences; folk music; early music used to heal, signal, impress,<br>intimidate, immortalize  |
|             | Identify ways in which individuals of varying ages and cultures experience music.   |
| MU.4.H.2.2: | Clarifications:<br>e.g., live concert, musical theatre, Internet, recordings  |
|             | Identify connections among music and other contexts, using correct music and other relevant content-area vocabulary, and explore how learning in one academic area can help with knowledge or skill acquisition in a different academic area. |
| MU.4.H.3.1: | Clarifications:<br>e.g., movement, form, repetition, rhythmic patterns/numeric patterns, fractions, vibrations/sound waves  |
|             | Compare musical elements in different types of music, using correct music vocabulary, as a foundation for understanding the structural conventions of specific styles.  |
| MU.4.0.1.1: | Clarifications:<br>e.g., rules of rhythm, melody, timbre, form, tonality, harmony, meter; styles: Classical, Baroque  |
| MU.4.0.2.1: | Create variations for selected melodies.  |
|             | Identify how expressive elements and lyrics affect the mood or emotion of a song.   |
| MU.4.O.3.1: | Clarifications:<br>e.g., tempo, dynamics, phrasing, articulation  |
| MU.4.0.3.2: | Apply expressive elements to a vocal or instrumental piece and, using correct music vocabulary, explain one's choices.  |
|             | Improvise phrases, using familiar songs.  |
| MU.4.S.1.1: | Clarifications:<br>e.g., altering text, rhythm, pitch, melody   |

|  | Create melodic patterns using a variety of sound sources.   |
|--|---|
| MU.4.S.1.2:  | Clarifications:<br>e.g., voice, instrument  |
|  | Arrange a familiar song for voices or instruments by manipulating form.   |
| MU.4.S.1.3:  | Clarifications:<br>e.g., introduction, interlude/bridge, coda, ABA, rondo   |
| MU.4.S.2.1:  | Apply knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsal and performance.   |
| MU.4.S.3.1:  | Sing rounds, canons, and/or partner songs in an appropriate range, using proper vocal technique and maintaining pitch.  |
| MU.4.S.3.2:  | Play rounds, canons, or layered ostinati on classroom instruments.  |
| MU.4.S.3.3:  | Clarifications:<br>e.g., high do, low sol, low la; vocal and/or instrumental  |
| MU.4.S.3.4:  | Play simple ostinati, by ear, using classroom instruments.  |
| MU.4.S.3.5: Notate simple obtained, by car, using classicon instruments.<br>MU.4.S.3.5: Clarifications:<br>a.g., chythmic: guarter potes, beamed eighth potes, half potes, whole potes; corresponding roots; dotted half potes, maladia. |   |
| MA.K12.MTR.1.1:  | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>  |
|  | <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
| MA.K12.MTR.2.1:  | <ul> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.</li></ul> |
| MA.K12.MTR.3.1:  | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul> Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li></ul>  |
| MA.K12.MTR.4.1:  | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> </ul>   |

|  | <ul> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>  |
|--|--|
|  | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
| MA.K12.MTR.5.1:  | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |
|  | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>   |
| MA.K12.MTR.6.1:  | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1:  | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts: <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> </ul> </li> </ul>  |
| ELA.K12.EE.1.1:  | Cite evidence to explain and justify reasoning. Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. |
| ELA.K12.EE.2.1:  | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
| Make inferences to support comprehension.         Clarifications:         ELA.K12.EE.3.1:         Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer quest smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them beyond. |  |
| ELA.K12.EE.4.1:  | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.  |

|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |  |
|-------------------|--|--|
|                   | Use the accepted rules governing a specific format to create quality work.   |  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |  |
|                   | Use appropriate voice and tone when speaking or writing.   |  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |  |
|                   | Understand the importance of safety rules and procedures in all physical activities, especially those that are high risk.  |  |
| PE.4.C.2.2:       | Clarifications:<br>An example of a safety procedure is having students stand a safe distance away from a student swinging a golf club during striking activities.  |  |
|                   | Perform two or more dances accurately.   |  |
| PE.4.M.1.10:      | Clarifications:<br>Some examples of dances are line, square, contra, folk, step and social.  |  |
| DA.4.H.3.3:       | Describe how dance and music can each be used to interpret and support the other.  |  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |  |
| SC.4.P.10.3:      | Investigate and explain that sound is produced by vibrating objects and that pitch depends on how fast or slow the object vibrates.  |  |

## VERSION DESCRIPTION

Fourth-grade\* students in music class explore artistic intent by investigating the inventive development of ideas, applying musicianship skills and techniques while engaging in the creation and interpretation of the arts. They analyze the characteristics of musical structures from simple to complex to build understanding and respect for the creative process. As they examine the significant cultural contributions in the arts throughout history, particularly in Florida, they become increasingly able to identify the connections among music and other fields of study. Music students also develop knowledge of careers in, and related to, the arts as they explore the impact of music on the local and global economies of the 21st century and strengthen personal skills for success throughout school and beyond.

# GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

\* Intermediate Music 1, 2, and 3 have been designed in two ways: 1) to challenge students on grade level who have previously taken classes in this content area; and 2) to challenge students whose education in this content area has been delayed until the intermediate grades. Music teachers of classes in Grades 3, 4, and 5 should select the most appropriate course level in the series based on each group's prior experience, the benchmarks, and available instruction time. Once elementary students have entered the series, they must progress to the next course in sequence.

#### Examples:

- A 3rd grade class that may or may not have taken Music previously should be enrolled in Intermediate Music 1 and progress through the series in subsequent grades.
- 4th graders beginning formal instruction in Music for the first time may be enrolled, as a class, in Intermediate Music 1, and must then progress to Intermediate Music 2 in the following year.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

| Course  | Number  | 5013100 |
|---------|---------|---------|
| COUI 36 | number. | 3013100 |

Courses > Grade Group: Grades PreK to 5 Education Courses > Subject: Music Education > SubSubject: General > Abbreviated Title: MUSIC-INTERM 2 Course Length: Year (Y)

Course Status: State Board Approved Grade Level(s): K,1,2,3,4,5,PreK

## **Educator Certifications**

| Music Education (Elementary Grades 1-6)            |
|--|
| Music (Elementary and Secondary Grades K-12)       |
| Vocal Music (Elementary and Secondary Grades K-12) |

# Music - Intermediate 3 (#5013110) 2015 - 2022 (current)

| Name        | Description  |
|-------------|--|
|             | Discuss and apply listening strategies to support appreciation of musical works.   |
| MU.5.C.1.1: | Clarifications:<br>e.g., focus: structure, instrumentation, tempo, dynamics, melodic line, rhythm patterns, style/genre; organize: listening maps, active listening,<br>checklists         |
|             | Hypothesize and discuss, using correct music vocabulary, the composer's intent for a specific musical work.  |
| MU.5.C.1.2: | Clarifications:<br>e.g., title, historical notes, quality recordings, instrumentation, expressive elements   |
|             | Identify, aurally, selected instruments of the band and orchestra.   |
| MU.5.C.1.3: | Clarifications:<br>e.g., violin, cello, string bass, flute, clarinet, oboe, bassoon, trumpet, trombone, tuba, French horn, bass drum, snare drum, xylophone, chimes,<br>piano, harpsichord |
| MU.5.C.1.4: | Identify, aurally, the four primary voice parts, i.e., soprano, alto, tenor, bass, of a mixed choir.   |
| MU.5.C.2.1: | Clarifications:<br>e.g., intonation, balance, blend, timbre  |
| MU.5.C.2.2: | Describe changes, using correct music vocabulary, in one's own and/or others performance over time.  |
| MU.5.C.3.1: | Develop criteria to evaluate an exemplary musical work from a specific period or genre.  |
| MU.5.F.1.1: | Create a performance, using visual, kinesthetic, digital, and/or acoustic means to manipulate musical elements.  |
|             | Describe jobs associated with various types of concert venues and performing arts centers.   |
| MU.5.F.2.1: | Clarifications:<br>e.g., music merchant, ticket agent, marketer, agent, security guard, food-and-beverage merchant   |
| MU.5.F.2.2: | Explain why live performances are important to the career of the artist and the success of performance venues.   |
|             | Examine and discuss the characteristics and behaviors displayed by successful student musicians that can be applied outside the music classroom.   |
| MU.5.F.3.1: | Clarifications:<br>e.g., dedicated, works toward mastery, punctual, prepared, dependable, self-disciplined, solutions-oriented   |
|             | Practice safe, legal, and responsible acquisition and use of music media, and describe why it is important to do so.   |
| MU.5.F.3.2: | Clarifications:<br>e.g., downloading music and other digital media, sharing personal and financial information, copying music  |
|             | Identify the purposes for which music is used within various cultures.   |
| MU.5.H.1.1: | Clarifications:<br>e.g., communication, celebration, ceremony  |
| MU.5.H.1.2: | Compare and describe the compositional characteristics used by two or more composers whose works are studied in class.   |
|             | Compare stylistic and musical features in works originating from different cultures.   |
| MU.5.H.1.3: | Clarifications:<br>e.g., use of rhythm, texture, tonality, use of folk melodies, improvisation, instrumentation, aural/oral traditions, principle drumming patterns                        |
| MU.5.H.2.1: | Examine the contributions of musicians and composers for a specific historical period.   |
| MU.5.H.2.2: | Describe how technology has changed the way audiences experience music.  |
|             | Examine critical-thinking processes in music and describe how they can be transferred to other disciplines.  |
| MU.5.H.3.1: | Clarifications:<br>e.g., reading, writing, observing, listening, evaluating, embellishing, revising  |
|             | Analyze, using correct music vocabulary, the use of musical elements in various styles of music as a foundation for understanding the creative process.                                    |
| MU.5.O.1.1: | Clarifications:<br>e.g., rhythm patterns, melody, timbre, form, tonality, harmony, meter, key; styles: Classical, Baroque, Romantic, nationalistic, jazz                                   |
| MU.5.0.2.1: | Create a new melody from two or more melodic motifs.   |
|             | Examine and explain how expressive elements, when used in a selected musical work, affect personal response.   |
| MU.5.O.3.1: | Clarifications:<br>e.g., tempo, dynamics, timbre, texture, phrasing, articulation  |
| MU.5.0.3.2: | Perform expressive elements in a vocal or instrumental piece as indicated by the score and/or conductor.   |
| MU.5.S.1.1: | Improvise rhythmic and melodic phrases to create simple variations on familiar melodies.   |
| MU.5.S.1.2: | Compose short vocal or instrumental pieces using a variety of sound sources.   |
|             | Arrange a familiar song by manipulating specified aspects of music.  |
| MU.5.S.1.3: | Clarifications:<br>e.g., dynamics, tempo, lyrics, form, rhythm, instrumentation  |
| MU.5.S.1.4: | Sing or play simple melodic patterns by ear with support from the teacher.   |

| MU.5.S.2.1:       | Use expressive elements and knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsals and<br>performance  |
|-------------------|---|
| MU.5.S.2.2:       | Apply performance techniques to familiar music.   |
| MU.5.S.3.1:       | Sing part songs in an appropriate range, using proper vocal technique and maintaining pitch.  |
| MU.5.S.3.2:       | Play melodies and accompaniments, using proper instrumental technique, on pitched and unpitched instruments.  |
|                   | Perform simple diatonic melodies at sight.  |
| MU.5.S.3.3:       | Clarifications:<br>e.g., vocal and/or instrumental  |
| MU.5.S.3.4:       | Play melodies and accompaniments, by ear, using classroom instruments.  |
|                   | Notate rhythmic phrases and simple diatonic melodies using traditional notation.  |
| MU.5.S.3.5:       | Clarifications:<br>e.g., rhythmic: quarter notes, beamed eighth notes, half notes, whole notes; corresponding rests; dotted half note; sixteenth notes;<br>syncopation  |
| LAFS.5.L.2.3:     | Use knowledge of language and its conventions when writing, speaking, reading, or listening.<br>a. Expand, combine, and reduce sentences for meaning, reader/listener interest, and style.<br>b. Compare and contrast the varieties of English (e.g., dialects, registers) used in stories, dramas, or poems.   |
|                   | Standard Relation to Course: Supporting         Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 5 topics and texts, building on others' ideas and expressing their own clearly.         a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about   |
| LAFS.5.SL.1.1:    | <ul><li>the topic to explore ideas under discussion.</li><li>b. Follow agreed-upon rules for discussions and carry out assigned roles.</li><li>c. Pose and respond to specific questions by making comments that contribute to the discussion and elaborate on the remarks of others.</li><li>d. Review the key ideas expressed and draw conclusions in light of information and knowledge gained from the discussions.</li></ul>   |
|                   | Standard Relation to Course: Supporting   |
| LAFS.5.SL.1.2:    | Summarize a written text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.  |
| LAFS.5.SL.1.3:    | Summarize the points a speaker makes and explain how each claim is supported by reasons and evidence.   |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
| MAFS.K12.MP.6.1:  | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. <b>Standard Relation to Course: Supporting</b>  |
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x<br>– y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |
| TH.5.H.1.2:       | Participate in a performance to explore and celebrate a variety of human experiences.   |
|                   |   |

# VERSION DESCRIPTION

Fifth-grade\* students in music class develop and analyze the skills necessary for the critical assessment of artistic works and creative works in other contexts. They demonstrate the proficiency of comprehensive musicianship and interpretive skills in the arts, which allows them to explore manipulation of musical structures to represent a personal and creative form of artistic communication. As students become more musically sophisticated, they establish and document reciprocal relationships among music and other disciplines of study. They learn to transfer their music knowledge and innovative skills as a means of discovering the significant contributions of music and the arts, in general, to positive social development and global economic success in the 21st Century.

# GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

\* Intermediate Music 1, 2, and 3 have been designed in two ways: 1) to challenge students on grade level who have previously taken classes in this content area; and 2) to challenge students whose education in this content area has been delayed until the intermediate grades. Music teachers of classes in Grades 3, 4, and 5 should select the most appropriate course level in the series based on each group's prior experience, the benchmarks, and available instruction time. Once elementary students have entered the series, they must progress to the next course in sequence.

### Examples:

- 3rd grade class that may or may not have taken Music previously should be enrolled in Intermediate Music 1 and progress through the series in subsequent grades.
- 4th graders beginning formal instruction in Music for the first time may be enrolled, as a class, in Intermediate Music 1, and must then progress to Intermediate Music 2 in the following year.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. |---------------------|---|
| MU.5.S.2.2:         | Apply performance techniques to familiar music.   |
| MU.5.S.3.1:         | Sing part songs in an appropriate range, using proper vocal technique and maintaining pitch.  |
| MU.5.S.3.2:         | Play melodies and accompaniments, using proper instrumental technique, on pitched and unpitched instruments.  |
|                     | Perform simple diatonic melodies at sight.  |
| MU.5.S.3.3:         | Clarifications:<br>e.g., vocal and/or instrumental  |
| MU.5.S.3.4:         | Play melodies and accompaniments, by ear, using classroom instruments.  |
|                     | Notate rhythmic phrases and simple diatonic melodies using traditional notation.  |
|                     | Clarifications:   |
| WIU.3.3.3.3.        | e.g., rhythmic: quarter notes, beamed eighth notes, half notes, whole notes; corresponding rests; dotted half note; sixteenth notes;  |
|                     | syncopation   |
|                     | Mathematicians who participate in effortful learning both individually and with others:   |
|                     | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ack questions that will halp with solving the task.</li> </ul>  |
|                     | Ask questions that will help with solving the task.     Build perseverance by modifying methods as needed while solving a challenging task  |
|                     | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>   |
|                     | Help and support each other when attempting a new method or approach.   |
| MA.K12.MTR.1.1:     | Clarifications:   |
|                     | Teachers who encourage students to participate actively in effortful learning both individually and with others:  |
|                     | Cultivate a community of growth mindset learners.   |
|                     | Foster perseverance in students by choosing tasks that are challenging.   |
|                     | Develop students' ability to analyze and problem solve.   |
|                     | Recognize students effort when solving challenging problems.  |
|                     | Demonstrate understanding by representing problems in multiple ways.  |
|                     | Mathematicians who demonstrate understanding by representing problems in multiple ways.   |
|                     | Build understanding through modeling and using manipulatives.   |
|                     | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Decrease from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>   |
|                     | Progress from modeling problems with objects and drawings to using algorithms and equations.     Express connections between concepts and representations   |
| MA.K12.MTR.2.1:     | Choose a representation based on the given context or purpose.  |
|                     |   |
|                     | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                     | Help students make connections between concepts and representations.  |
|                     | Provide opportunities for students to use manipulatives when investigating concepts.  |
|                     | Guide students from concrete to pictorial to abstract representations as understanding progresses.  |
|                     | Show students that various representations can have different purposes and can be useful in different situations.   |
|                     | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:   |
|                     | Solact afficient and appropriate methods for solving problems within the given context  |
|                     | Maintain flexibility and accuracy while performing procedures and mental calculations.  |
|                     | Complete tasks accurately and with confidence.  |
|                     | Adapt procedures to apply them to a new context.  |
| MA.K12.M1R.3.1:     | Use feedback to improve efficiency when performing calculations.  |
|                     | Clarifications:   |
|                     | Teachers who encourage students to complete tasks with mathematical fluency:  |
|                     | <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple expectively for students to practice efficient and generalizable methods.</li> </ul>                      |
|                     | <ul> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>  |
|                     | Engage in discussions that reflect on the mathematical thinking of self and others  |
|                     | Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  |
|                     | Communicate methomatical ideas, versionlary and methods officially  |
|                     | Analyze the mathematical thinking of others   |
|                     | <ul> <li>Compare the efficiency of a method to those expressed by others.</li> </ul>  |
|                     | Recognize errors and suggest how to correctly solve the task.   |
|                     | Justify results by explaining methods and processes.  |
| IVIA.N12.IVI1K.4.1: | Construct possible arguments based on evidence.   |
|                     | Clarifications:   |
|                     | <ul> <li>Leachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their nears, and error is an encourtwith for learning.</li> </ul> |
|                     | Create opportunities for students to discuss their thinking with peers  |
|                     | <ul> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> </ul>  |
|                     | • Develop students' ability to justify methods and compare their responses to the responses of their peers.   |
|                     | Use patterns and structure to help understand and connect mathematical concepts.  |
|                     | Mathematicians who use patterns and structure to help understand and connect mathematical concepts:   |

| MA.K12.MTR.5.1: | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>  |
|-----------------|---|
|                 | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.   |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.  |
|                 | Strengthen students' ability to verify solutions through justifications.      Apply mathematics to real-world contexts.     Mathematicians who apply mathematics to real-world contexts:     Connect mathematical concepts to everyday experiences.     Use models and methods to understand, represent and solve problems.      Definition to the black blac |
| MA.K12.MTR.7.1: | <ul> <li>Perform investigations to gattler data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul>  |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.<br>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly<br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide<br>referenced by the instructor.  |
|                 | <ul><li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li><li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li></ul>   |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently.         Clarifications:         See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.3.1: | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.  |
| ELA.K12.EE.4.1: | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.   |
|                 | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                 | Use the accepted rules governing a specific format to create quality work. Clarifications:  |

| ELA.K12.EE.5.1:   | Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. |
|-------------------|---|
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |
| TH.5.H.1.2:       | Participate in a performance to explore and celebrate a variety of human experiences.   |

# VERSION DESCRIPTION

Fifth-grade\* students in music class develop and analyze the skills necessary for the critical assessment of artistic works and creative works in other contexts. They demonstrate the proficiency of comprehensive musicianship and interpretive skills in the arts, which allows them to explore manipulation of musical structures to represent a personal and creative form of artistic communication. As students become more musically sophisticated, they establish and document reciprocal relationships among music and other disciplines of study. They learn to transfer their music knowledge and innovative skills as a means of discovering the significant contributions of music and the arts, in general, to positive social development and global economic success in the 21st Century.

# GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

\* Intermediate Music 1, 2, and 3 have been designed in two ways: 1) to challenge students on grade level who have previously taken classes in this content area; and 2) to challenge students whose education in this content area has been delayed until the intermediate grades. Music teachers of classes in Grades 3, 4, and 5 should select the most appropriate course level in the series based on each group's prior experience, the benchmarks, and available instruction time. Once elementary students have entered the series, they must progress to the next course in sequence.

### Examples:

- 3rd grade class that may or may not have taken Music previously should be enrolled in Intermediate Music 1 and progress through the series in subsequent grades.
- 4th graders beginning formal instruction in Music for the first time may be enrolled, as a class, in Intermediate Music 1, and must then progress to Intermediate Music 2 in the following year.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# GENERAL INFORMATION

Course Number: 5013110

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades PreK to 5 Education Courses > Subject: Music Education > SubSubject: General > Abbreviated Title: MUSIC-INTERM 3 Course Length: Year (Y)

Course Status: State Board Approved Grade Level(s): K,1,2,3,4,5,PreK

## **Educator Certifications**

Music Education (Elementary Grades 1-6)

| Music (Elementary and Secondary Grades K-12)       |  |
|--|--|
| Vocal Music (Elementary and Secondary Grades K-12) |  |

# M/J Music Theory 1 (#1300000) 2020 - 2022 (current)

| Name           | Description  |
|----------------|--|
|                | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:   | Clarifications:<br>e.g., listening maps, active listening, checklists  |
|                | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |
| MU.68.C.1.2:   | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
| MU.68.C.2.3:   | Critique personal composition and/or improvisation, using simple criteria, to generate improvements with guidance from teachers and/or peers.  |
| MU.68.C.3.1:   | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
| MU.68.F.1.1:   | Create a composition and/or performance, using visual, kinesthetic, digital, and/or acoustic means to manipulate musical elements.   |
|                | Describe several routes a composition or performance could travel from creator to consumer.  |
| MU.68.F.2.1:   | Clarifications:<br>e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales   |
| MU.68.F.3.2:   | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
|                | Identify the tasks involved in the compositional process and discuss how the process might be applied in the work place.   |
| MU.68.F.3.3:   | Clarifications:<br>e.g., idea, development, editing, selling, revising, testing, presenting  |
|                | Analyze how technology has changed the way music is created, performed, acquired, and experienced.   |
| MU.68.H.2.2:   | Clarifications:  |
|                | e.g., from harpsichord to piano; from phonograph to CD   |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.   |
|                | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1:   | Clarifications:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural<br>connections and traditions, ceremonial music, sales and advertising, communication   |
|                | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2:   | Clarifications:<br>e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays   |
|                | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.0.2.2:   | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor  |
|                | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU.68.O.3.1:   | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
|                | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1:   | Clarifications:<br>e.g., blues, rock   |
| MU.68.S.1.3:   | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|                | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:   | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice   |
| MU.68.S.1.6:   | Compose a melody, with or without lyrics, over a standard harmonic progression.  |
| MU.68.S.1.8:   | Demonstrate specified mixing and editing techniques using selected software and hardware.  |
|                | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:   | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|                | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:   | Clarifications:<br>e.g., error detection, interval reinforcement   |
| MU.68.S.3.5:   | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.  |
|                | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. |
| LAFS.6.SL.1.1: | <ul> <li>control roles for contegral discussions, set specific goals and deadlines, and define individual roles as needed.</li> <li>c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under</li> </ul>   |

| 1                 | discussion  |
|-------------------|---|
|                   | d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.   |
|                   | Standard Relation to Course: Supporting   |
| LAFS.6.SL.1.2:    | Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.  |
| LAFS.6.SL.1.3:    | Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.  |
| LAFS.6.SL.2.4:    | Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.   |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical<br>context relevant to grades 6–8 texts and topics.   |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.  |
|                   | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. <b>Standard Relation to Course: Supporting</b>  |
|                   | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                   | Standard Relation to Course: Supporting   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.KTZ.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students discover how music works with an exploratory introduction to the compositional process, and develop fluency in music notation and rhythmic skills, as well as knowledge of basic form. Acquisition of basic aural and keyboard skills provides students with skills to express themselves creatively through music. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

**GENERAL NOTES** 

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|              | e.g., from harpsichord to piano; from phonograph to CD   |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.   |
|              | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
|              | Clarifications:  |
| MU.68.H.3.1: | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural  |
|              | connections and traditions, ceremonial music, sales and advertising, communication   |
|              | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2: | Clarifications:  |
|              | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays                                  |
|              | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.0.2.2: | Clarifications:  |
|              | e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|              | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.                               |
| MU.68.0.3.1: | Clarifications:  |
|              | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration                                     |
|              | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1: | Clarifications:  |
|              | e.g., blues, rock  |
| MU.68.S.1.3: | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|              | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4: | Clarifications:  |
|              | e.g., melodies using traditional classroom instruments and/or voice  |
| MU.68.S.1.6: | Compose a melody, with or without lyrics, over a standard harmonic progression.  |
| MU.68.S.1.8: | Demonstrate specified mixing and editing techniques using selected software and hardware.  |
|              | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3: | Clarifications:  |
|              | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
| MU.68.S.3.4: | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
|              | Clarifications:  |
|              | e.g., error detection, interval reinforcement  |
| MU.68.S.3.5: | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.  |
|              | Mathematicians who participate in effortful learning both individually and with others:  |
|              | Analyze the problem in a way that makes sense given the task.  |
|              | Ask questions that will help with solving the task.  |
|              | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and methods as needed when working to solve tasks.</li> </ul> |
|              | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>     |
|              | • Thep and support each other when attempting a new method of approach.  |

| MA.K12.MTR.1.1:                    | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
|------------------------------------|--|
| MA.K12.MTR.2.1:<br>MA.K12.MTR.3.1: | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:<br>• Build understanding through modeling and using manipulatives.<br>• Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.<br>• Progress from modeling problems with objects and drawings to using algorithms and equations.<br>• Express connections between concepts and representations.<br>• Choose a representation based on the given context or purpose.<br><b>Clarifications:</b><br>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:<br>• Help students make connections between concepts and representations.<br>• Provide opportunities for students to use manipulatives when investigating concepts.<br>• Guide students from concrete to pictorial to abstract representations as understanding progresses.<br>• Show students that various representations can have different purposes and can be useful in different situations.<br>Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>• Select efficient and appropriate methods for solving problems within the given context.<br>• Maintain flexibility and accuracy while performing procedures and mental calculations.<br>• Complete tasks accurately and with confidence.<br>• Adapt procedures to apily them to a new context.<br>• Use feedback to improve efficiency when performing calculations. |
|                                    | Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:<br>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>Offer multiple opportunities for students to practice efficient and generalizable methods.<br>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
| MA.K12.MTR.4.1:                    | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>   |
| MA.K12.MTR.5.1:                    | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>Focus on relevant details within a problem.<br>Create plans and procedures to logically order events, steps or ideas to solve problems.<br>Decompose a complex problem into manageable parts.<br>Relate previously learned concepts to new concepts.<br>Look for similarities among problems.<br>Connect solutions of problems to more complicated large-scale situations.<br>Clarifications:<br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>Support students to develop generalizations based on the similarities found among problems.<br>Provide opportunities for students to create plans and procedures to solve problems.   |
|                                    | <ul> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> <li>Assess the reasonableness of solutions.</li> <li>Mathematicians who assess the reasonableness of solutions:</li> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> </ul>   |

| MA K12 MTR 6 1     | Evaluate results based on the given context.   |
|--------------------|--|
| MA.RT2.WITK.0.1.   |  |
|                    | Clarifications:  |
|                    | leachers who encourage students to assess the reasonableness of solutions:   |
|                    | Have students estimate or predict solutions prior to solving.  |
|                    | Prompt students to continually ask, "Does this solution make sense? How do you know?"  |
|                    | Reinforce that students check their work as they progress within and after a task.   |
|                    | Strengthen students' ability to verify solutions through justifications.   |
|                    | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |
|                    | Connect mathematical concepts to everyday experiences.   |
|                    | <ul> <li>Use models and methods to understand, represent and solve problems.</li> </ul>  |
|                    | • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.  |
| MA.K12.MTR.7.1:    | Clarifications:  |
|                    | Teachers who encourage students to apply mathematics to real-world contexts:   |
|                    | Provide opportunities for students to create models, both concrete and abstract, and perform investigations.   |
|                    | Challenge students to question the accuracy of their models and methods  |
|                    | <ul> <li>Support students as they validate conclusions by comparing them to the given situation</li> </ul>   |
|                    | Indicate how various concents can be applied to other disciplines  |
|                    |  |
|                    | Cite evidence to explain and justify reasoning.  |
|                    | Clarifications:  |
|                    | <ul> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.</li> </ul> |
| FLΔ K12 FF 1 1·    | In ard grade, students should use a combination of direct and indirect citations.  |
|                    | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                    | 6-8 Students continue with previous skills and use a style guide to create a proper citation   |
|                    |  |
|                    | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                    | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:    | Clarifications:  |
|                    | See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                    | Make inferences to support comprehension.  |
| ELA.K12.EE.3.1:    | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
|                    | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
|                    | Clarifications:  |
|                    | In kindergarten, students learn to listen to one another respectfully.   |
|                    | In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The   |
| ELA.KIZ.EE.4.I:    | collaborative conversations are becoming academic conversations.   |
|                    | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                    | Use the accepted rules governing a specific format to create quality work.   |
|                    | Clarifications:  |
| ELA.K12.EE.5.1:    | Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they  |
|                    | must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.  |
|                    | Use appropriate voice and tone when speaking or writing.   |
| FLA K12 FF 6 1     | Clarifications:  |
| LLM.N. 12.LL.U. 1. | In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends   |
|                    | differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.68.S.2.1:       | Sustain focused attention, respect, and discipline during classes and performances.  |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.   |
|                    | · · · · · · · · · · · · · · · · · · ·  |

# VERSION DESCRIPTION

Students discover how music works with an exploratory introduction to the compositional process, and develop fluency in music notation and rhythmic skills, as well as knowledge of basic form. Acquisition of basic aural and keyboard skills provides students with skills to express themselves creatively through music. Public performances may

serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

## **GENERAL NOTES**

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

Course Number: 1300000

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: General Music > Abbreviated Title: M/J MUS THEORY 1 Course Length: Year (Y) Course Level: 2

Course Status: State Board Approved Grade Level(s): 6,7,8

## **Educator Certifications**

Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

# M/J Music Theory 2 (#1300010) 2020 - 2022 (current)

| Name         | Description  |
|--------------|--|
|              | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1: | Clarifications:<br>e.g., listening maps, active listening, checklists  |
|              | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |
| MU.68.C.1.2: | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
|              | Identify, aurally, instrumental styles and a variety of instrumental ensembles.  |
| MU.68.C.1.3: | Clarifications:<br>e.g., Classical, Baroque, Romantic, contemporary, jazz, pop, solo, duet, trio, quartet, small ensembles   |
|              | Identify, aurally, a variety of vocal styles and ensembles.  |
| MU.68.C.1.4: | Clarifications:<br>e.g., chant, spiritual, folk, opera, world, jazz, pop, solo, duet, trio, quartet, small ensembles, choirs   |
| MU.68.C.2.3: | Critique personal composition and/or improvisation, using simple criteria, to generate improvements with guidance from teachers and/or peers.  |
| MU.68.C.3.1: | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
| MU.68.F.1.1: | Create a composition and/or performance, using visual, kinesthetic, digital, and/or acoustic means to manipulate musical elements.   |
| MU.68.F.1.2: | Create an original composition that reflects various performances that use "traditional" and contemporary technologies.  Clarifications:  a.g., MDL, Internet video resources, personal digital assistants, MP3 players, cell phones, digital recording, music software  |
|              | Describe squarel relates a composition or performance could travel from anotar to consumer   |
| MU.68.F.2.1: | Clarifications:<br>e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales   |
|              | Describe how concert attendance can financially impact a community.  |
| MU.68.F.2.2: | Clarifications:<br>e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants   |
|              | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1: | Clarifications:<br>e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect  |
| MU.68.F.3.2: | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
|              | Identify the tasks involved in the compositional process and discuss how the process might be applied in the work place.   |
| MU.68.F.3.3: | Clarifications:<br>e.g., idea, development, editing, selling, revising, testing, presenting  |
| MU.68.H.1.5: | Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.  |
| MU.68.H.2.1: | Describe the influence of historical events and periods on music composition and performance.  |
|              | Analyze how technology has changed the way music is created, performed, acquired, and experienced.   |
| MU.68.H.2.2: | Clarifications:<br>e.g., from harpsichord to piano; from phonograph to CD  |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.   |
| MU.68.H.3.1: | Identity connections among music and other content areas and/or contexts through interdisciplinary collaboration. Clarifications: e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication |
|              | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.O.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble  |
| MU.68.O.2.1: | Create a composition, manipulating musical elements and exploring the effects of those manipulations.  |
|              | Clarifications:<br>e.g., using electronic or paper-and-pencil means to experiment with timbre, melody, rhythm, harmony, form, tonality   |
|              | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.0.2.2: | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor  |
|              | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU.68.O.3.1: | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |

| MU.68.0.3.2:      | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.  |
|-------------------|--|
| MU.68.S.1.2:      | Compose a short musical piece.  Clarifications: e.g., using traditional, non-traditional, digital, or classroom instruments and/or voice   |
| MU.68.S.1.3:      | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
| MU.68.S.1.4:      | Sing or play melodies by ear with support from the teacher and/or peers.  Clarifications: e.g., melodies using traditional classroom instruments and/or voice  |
| MU.68.S.1.5:      | Perform melodies with chord progressions. Clarifications: e.g., keyboard/piano, keyboard/piano and voice, guitar, voice and guitar   |
| MU.68.S.1.6:      | Compose a melody, with or without lyrics, over a standard harmonic progression.  |
| MU.68.S.1.8:      | Demonstrate specified mixing and editing techniques using selected software and hardware.  |
| MU.68.S.3.3:      | Sight-read standard exercises and simple repertoire. Clarifications: e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
| MU.68.S.3.4:      | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. Clarifications: e.g., error detection, interval reinforcement   |
| MU.68.S.3.5:      | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.  |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–9 texts and tenics.   |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.   |
|                   | <ul> <li>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</li> </ul>  |
| LAFS.7.SL.1.1:    | <ul> <li>b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed.</li> <li>c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed.</li> <li>d. Acknowledge new information expressed by others and, when warranted, modify their own views.</li> </ul> Standard Relation to Course: Supporting  |
| LAFS.7.SL.1.2:    | Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas  |
|                   | clarify a topic, text, or issue under study.   |
| LAFS.7.SL.2.4:    | Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.  |
| MAFS.K12.MP.5.1:  | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,<br>concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.<br>Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools<br>might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze<br>graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other<br>mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying<br>assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify<br>relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use<br>technological tools to explore and deepen their understanding of concepts.<br><b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.   |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|                   | Standard Relation to Course: Supporting<br>Look for and make use of structure.   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |
|                   | Standard Relation to Course: Supporting  |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.  |
| ELU.KIZ.ELL.SI.T. | English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

Students with prior music theory experience expand their understanding of the technical and structural elements of music. Intermediate-level music theorists develop the aural skills needed for a variety of musical styles and processes, including composition, improvisation, performance, and consumerism. Class work focuses on creativity and strengthening analytical abilities. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

## **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

Course Number: 1300010

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: General Music > Abbreviated Title: M/J MUS THEORY 2 Course Length: Year (Y) Course Level: 2

Course Status: Course Approved Grade Level(s): 6,7,8

### **Educator Certifications**

Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

# M/J Music Theory 2 (#1300010) 2022 - And Beyond

| Name         | Description  |
|--------------|--|
|              | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1: | Clarifications:<br>e.g., listening maps, active listening, checklists  |
|              | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |
| MU.68.C.1.2: | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
|              | Identify, aurally, instrumental styles and a variety of instrumental ensembles.  |
| MU.68.C.1.3: | Clarifications:<br>e.g., Classical, Baroque, Romantic, contemporary, jazz, pop, solo, duet, trio, quartet, small ensembles   |
|              | Identify, aurally, a variety of vocal styles and ensembles.  |
| MU.68.C.1.4: | Clarifications:<br>e.g., chant, spiritual, folk, opera, world, jazz, pop, solo, duet, trio, quartet, small ensembles, choirs   |
| MU.68.C.2.3: | Critique personal composition and/or improvisation, using simple criteria, to generate improvements with guidance from teachers and/or peers.  |
| MU.68.C.3.1: | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
| MU.68.F.1.1: | Create a composition and/or performance, using visual, kinesthetic, digital, and/or acoustic means to manipulate musical elements.   |
|              | Create an original composition that reflects various performances that use "traditional" and contemporary technologies.  |
| MU.68.F.1.2: | Clarifications:<br>e.g., MIDI, Internet video resources, personal digital assistants, MP3 players, cell phones, digital recording, music software  |
|              | Describe several routes a composition or performance could travel from creator to consumer.  |
| MU.68.F.2.1: | Clarifications:<br>e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales   |
|              | Describe how concert attendance can financially impact a community.  |
| MU.68.F.2.2: | Clarifications:<br>e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants   |
|              | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1: | Clarifications:<br>e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect  |
| MU.68.F.3.2: | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
|              | Identify the tasks involved in the compositional process and discuss how the process might be applied in the work place.   |
| MU.68.F.3.3: | Clarifications:<br>e.g., idea, development, editing, selling, revising, testing, presenting  |
| MU.68.H.1.5: | Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.  |
| MU.68.H.2.1: | Describe the influence of historical events and periods on music composition and performance.  |
|              | Analyze how technology has changed the way music is created, performed, acquired, and experienced.   |
| MU.68.H.2.2: | Clarifications:<br>e.g., from harpsichord to piano; from phonograph to CD  |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.   |
| MU.68.H.3.1: | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
|              | Clarifications:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural<br>connections and traditions, ceremonial music, sales and advertising, communication |
| MU.68.O.1.1: | Compare performances of a musical work to identify artistic choices made by performers.  |
|              | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble  |
| MU.68.0.2.1: | Create a composition, manipulating musical elements and exploring the effects of those manipulations.  |
|              | Clarifications:<br>e.g., using electronic or paper-and-pencil means to experiment with timbre, melody, rhythm, harmony, form, tonality   |
|              | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.O.2.2: | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor  |
|              | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU.68.O.3.1: | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |

| MU.68.0.3.2:    | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.   |
|-----------------|---|
|                 | Compose a short musical piece.  |
| MU.68.S.1.2:    | Clarifications:<br>e.g., using traditional, non-traditional, digital, or classroom instruments and/or voice   |
| MU.68.S.1.3:    | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
| MU.68.S.1.4:    | Sing or play melodies by ear with support from the teacher and/or peers.  Clarifications: e.g., melodies using traditional classroom instruments and/or voice   |
| MU.68.S.1.5:    | Perform melodies with chord progressions. Clarifications: e.g., keyboard/piano, keyboard/piano and voice, guitar, voice and guitar  |
| MU.68.S.1.6:    | Compose a melody, with or without lyrics, over a standard harmonic progression.   |
| MU.68.S.1.8:    | Demonstrate specified mixing and editing techniques using selected software and hardware.   |
|                 | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3:    | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
| MU 68 S 3 4     | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
|                 | e.g., error detection, interval reinforcement   |
| MU.68.S.3.5:    | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |
|                 | Mathematicians who participate in effortful learning both individually and with others:   |
|                 | Analyze the problem in a way that makes sense given the task.   |
|                 | Ask questions that will help with solving the task.   |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.   |
|                 | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Using and support each other when attempting a new method or approach.</li> </ul>   |
| MA.K12.MTR.1.1: | Heip and support each other when attempting a new method or approach.   |
|                 | Clarifications:<br>Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                 | Cultivate a community of growth mindset learners.   |
|                 | <ul> <li>Foster perseverance in students by choosing tasks that are challenging.</li> </ul>   |
|                 | • Develop students' ability to analyze and problem solve.   |
|                 | Recognize students' effort when solving challenging problems.   |
|                 | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
| MA.K12.MTR.2.1: | <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> |
|                 | Clarifications:   |
|                 | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                 | Help students make connections between concepts and representations.  |
|                 | Provide opportunities for students to use manipulatives when investigating concepts.  |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.  |
|                 |   |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:   |
|                 | Select efficient and appropriate methods for solving problems within the given context.   |
|                 | <ul> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> </ul>  |
|                 | Complete tasks accurately and with confidence.  |
| MA.K12.MTR.3.1: | <ul> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
|                 |   |
|                 | Teachers who encourage students to complete tasks with mathematical fluency:  |
|                 | Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.  |
|                 | Offer multiple opportunities for students to practice efficient and generalizable methods.  |
|                 | • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.   |
|                 | <ul> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> </ul>   |
|                 | Analyze the mathematical thinking of others.  |
|                 | Compare the efficiency of a method to those expressed by others.  |
|                 | Recognize errors and suggest how to correctly solve the task.   |

| MA.K12.MTR.4.1: | <ul> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>   |
|-----------------|---|
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>  |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br>Clarifications:<br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.<br>• Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking. |
| MA.K12.MTR.6.1: | <ul> <li>Assess the reasonableness of solutions.</li> <li>Mathematicians who assess the reasonableness of solutions: <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to assess the reasonableness of solutions: <ul> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul> </li> </ul></li></ul>  |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency</li> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>  |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.  Clarifications:  K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.  4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  6-8 Students continue with previous skills and use a style guide to create a proper citation.  9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.3.1: | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |

|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
|-------------------|--|
| ELA.K12.EE.4.1:   | Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students with prior music theory experience expand their understanding of the technical and structural elements of music. Intermediate-level music theorists develop the aural skills needed for a variety of musical styles and processes, including composition, improvisation, performance, and consumerism. Class work focuses on creativity and strengthening analytical abilities. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

## **GENERAL NOTES**

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# M/J Basic Music Theory (#1300025) 2020 - 2022 (current)

| Name              | Description  |
|-------------------|--|
|                   | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:      | Clarifications:  |
|                   | e.g., listening maps, active listening, checklists   |
|                   | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |
| MU.68.C.1.2:      | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
| MU.68.F.3.2:      | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
| MU.68.H.2.3:      | Classify the literature being studied by genre, style, and/or time period.   |
|                   | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2:      | Clarifications:<br>e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays   |
|                   | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.0.2.2:      | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor  |
|                   | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU.68.0.3.1:      | Clarifications:  |
|                   | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration   |
|                   | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1:      | Clarifications:  |
|                   | e.g., blues, rock  |
| MU.68.S.1.3:      | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|                   | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:      | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice   |
| MU.68.S.1.6:      | Compose a melody, with or without lyrics, over a standard harmonic progression.  |
|                   | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:      | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|                   | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:      | Clarifications:<br>e.g., error detection, interval reinforcement   |
| MU.68.S.3.5:      | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.  |
|                   | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and  |
|                   | issues, building on others' ideas and expressing their own clearly.  |
|                   | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic,  |
| LAFS 6 SL 1 1     | text, or issue to probe and reflect on ideas under discussion.   |
| EAT 0.0.0E. T. T. | b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the tonic, text, or issue under  |
|                   | discussion.  |
|                   | d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.  |
| LAFS.6.SL.1.2:    | Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study  |
| LAFS.6.SL.2.4:    | Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.  |
| LAFS 68 RST 2 1.  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical  |
| En 0.00.101.2.1.  | context relevant to grades 6–8 texts and topics.   |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.   |
|                   | Use appropriate tools strategically.   |
|                   | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.   |
|                   | Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools  |
| MAFS.K12.MP.5.1:  | might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze<br>graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other |
|                   | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying   |
|                   | assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify  |
|                   | relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use   |

|                   | technological tools to explore and deepen their understanding of concepts.   |
|-------------------|--|
| MAFS.K12.MP.6.1:  | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x<br>– y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

## GENERAL NOTES

In this introductory theory course, students develop fluency in reading and writing music, as well as knowledge of basic form. Acquisition of basic aural and keyboard skills provides students with skills to express themselves creatively through music. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside of the school day to support, extend, and assess learning in the classroom. **English Language Development (ELD) Standards Special Notes Section:** 

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which **maximizes an ELL's need for communication and social skills. To access** an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf.

## GENERAL INFORMATION

Course Number: 1300025

Course Type: Elective Course Course Status: Course Approved Grade Level(s): 6,7,8 Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: General Music > Abbreviated Title: M/J BASIC MUS THEORY Course Length: Semester (S) Course Level: 2

## **Educator Certifications**

Instrumental Music (Secondary Grades 7-12) Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Elementary and Secondary Grades K-12)

# M/J Basic Music Theory (#1300025) 2022 - And Beyond

| Name            | Description   |
|-----------------|---|
|                 | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1:    | Clarifications:   |
|                 | e.g., listening maps, active listening, checklists  |
|                 | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent   |
| MUL / 0 C 1 0.  | Clarifications:   |
| MU.68.C.1.2:    | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
| MU.68.F.3.2:    | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.  |
| MU.68.H.2.3:    | Classify the literature being studied by genre, style, and/or time period.  |
|                 | Discuss how the absence of music would affect other content areas and contexts.   |
| MU.68.H.3.2:    | Clarifications:<br>e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays  |
|                 | Demonstrate knowledge of major and minor tonalities through performance and composition.  |
| MU.68.0.2.2:    | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|                 | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image   |
| MU 68 O 3 1     | Clarifications:   |
|                 | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
|                 |   |
|                 | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.   |
| MU.68.S.1.1:    | Clarifications:<br>e.g., blues, rock  |
| MU.68.S.1.3:    | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
|                 | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4:    | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice  |
| MU.68.S.1.6:    | Compose a melody, with or without lyrics, over a standard harmonic progression.   |
|                 | Sight-read standard exercises and simple repertoire.  |
| MIL 68 S 3 3·   | Clarifications  |
| 10.00.3.3.3.    | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|                 | Compare written potentian to oural examples and analyze for accuracy of rhythm and nitch  |
|                 |   |
| MU.68.S.3.4:    | Clarifications:   |
|                 | e.g., error detection, interval reinforcement   |
| MU.68.S.3.5:    | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |
|                 | Mathematicians who participate in effortful learning both individually and with others:   |
|                 | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> </ul>   |
|                 | Ask questions that will help with solving the task.   |
|                 | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> </ul>   |
|                 | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>   |
| MA K12 MTR 1 1  | Help and support each other when attempting a new method or approach.   |
| MART2.WITK.T.T. | Clarifications:   |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:  |
|                 | Cultivate a community of growth mindset learners.   |
|                 | Foster perseverance in students by choosing tasks that are challenging.   |
|                 | Develop students' ability to analyze and problem solve.   |
|                 | Recognize students' effort when solving challenging problems.   |
|                 | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
|                 | Build understanding through modeling and using manipulatives  |
|                 | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations  |
|                 | Progress from modeling problems with objects and drawings to using algorithms and equations   |
|                 | Frogress non-modeling problems with objects and drawings to using algorithms and equations.     Eveness connections between concents and representations.   |
| MA K12 MTD 2 1. | Choose a representation based on the given context or purpose   |
| WARTZ.WITK.Z.T: | Choose a representation based on the given context or purpose.  |
|                 | Clarifications:   |
|                 | Liele students make connections between concents and representing problems in multiple ways:  |
|                 | <ul> <li>neip students make connections between concepts and representations.</li> <li>Dravide encertwrities for students to use manipulatives when investigations to a students to a students of the students of the</li></ul> |
|                 | <ul> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> </ul>  |

|                 | <ul> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
|-----------------|--|
|                 | Complete tasks with mathematical fluency.  |
| MA.K12.MTR.3.1: | <ul> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> </ul>  |
|                 | <ul> <li>Use reedback to improve efficiency when performing calculations.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul> </li> </ul>  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop ctudents challer to instity methods and compare their responses of their peers.</li></ul>        |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li></ul> |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> </ul>  |

|                   | Indicate how various concepts can be applied to other disciplines.  |
|-------------------|---|
|                   | Cite evidence to explain and justify reasoning.   |
|                   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# GENERAL NOTES

In this introductory theory course, students develop fluency in reading and writing music, as well as knowledge of basic form. Acquisition of basic aural and keyboard skills provides students with skills to express themselves creatively through music. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside of the school day to support, extend, and assess learning in the classroom. **English Language Development (ELD) Standards Special Notes Section:** 

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which **maximizes an ELL's need for communication and social skills. To access** an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf.

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

# M/J Understanding Music (#1300030) 2020 - 2022 (current)

| Name              | Description  |
|-------------------|--|
|                   | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:      | Clarifications:  |
|                   | e.g., listening maps, active listening, checklists   |
| MU.68.C.1.2:      | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |
|                   | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
|                   | Identify, aurally, instrumental styles and a variety of instrumental ensembles.  |
| MU.68.C.1.3:      | Clarifications:<br>e.g., Classical, Baroque, Romantic, contemporary, jazz, pop, solo, duet, trio, quartet, small ensembles   |
|                   | Identify, aurally, a variety of vocal styles and ensembles.  |
| MU.68.C.1.4:      | Clarifications:<br>e.g., chant, spiritual, folk, opera, world, jazz, pop, solo, duet, trio, quartet, small ensembles, choirs   |
| MU.68.C.3.1:      | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
|                   | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1:      | Clarifications:<br>e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect  |
| MU.68.F.3.2:      | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
| MU.68.H.1.1:      | Describe the functions of music from various cultures and time periods.  |
| MU.68.H.1.2:      | Identify the works of representative composers within a specific style or time period.   |
| MU.68.H.1.5:      | Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.  |
| 10.00.11.2.1.     | Analyze how technology has changed the way music is created, performed, acquired, and experienced.   |
| MII 68 H 2 2·     | Clarifications:  |
| 10.00.11.2.2.     | e.g., from harpsichord to piano; from phonograph to CD   |
| MU.68.H.2.3:      | Classify the literature being studied by genre, style, and/or time period.   |
|                   | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1:      | Clarifications:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural<br>connections and traditions, ceremonial music, sales and advertising, communication |
|                   | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2:      | Clarifications:<br>e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays   |
|                   | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.O.1.1:      | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble  |
|                   | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU.68.O.3.1:      | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
|                   | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and  |
|                   | issues, building on others' ideas and expressing their own clearly.  |
|                   | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic,  |
| LAFS 6 SL 1 1.    | text, or issue to probe and reflect on ideas under discussion.   |
| LAI 3.0.3L.1.1.   | <ul> <li>b. Follow rules for collegial discussions, set specific goals and detail by making comments that contribute to the tonic, text, or issue under</li> </ul>   |
|                   | discussion.  |
|                   | d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.  |
| LAFS.6.SL.1.2:    | Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.   |
| LAFS.6.SL.1.3:    | Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.   |
| LAFS.6.SL.2.4:    | Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.                            |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.   |
| LAFS.68.WHST.3.7: | Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.                        |
|                   | Attend to precision.   |

| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|-------------------|--|
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x<br>– y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

## **GENERAL NOTES**

Students engage in an exploratory study of music through the examination of significant composers and their compositions across selected musical eras and/or genres. Students will also learn about modern and historical instruments, and gain a rudimentary understanding of the elements of music in order to develop strategies for listening to and appreciating musical works. Students may be expected to attend one or more performances outside of the school day to support and extend learning in the classroom. English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which **maximizes an ELL's need for communication and social skills. To access** an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf.

## GENERAL INFORMATION

Course Number: 1300030

Course Type: Elective Course Course Status: Course Approved Grade Level(s): 6,7,8 Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: General Music > Abbreviated Title: M/J UNDERSTAND MUSIC Course Length: Semester (S) Course Level: 2

## **Educator Certifications**

| Instrumental Music (Elementary and Secondary Grades K-12) |

# M/J Understanding Music (#1300030) 2022 - And Beyond

| Name            | Description  |
|-----------------|--|
|                 | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:    | Clarifications:<br>e.g., listening maps, active listening, checklists  |
|                 | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |
| MU.68.C.1.2:    | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
|                 | Identify, aurally, instrumental styles and a variety of instrumental ensembles.  |
| MU.68.C.1.3:    | Clarifications:<br>e.g., Classical, Baroque, Romantic, contemporary, jazz, pop, solo, duet, trio, quartet, small ensembles   |
|                 | Identify, aurally, a variety of vocal styles and ensembles.  |
| MU.68.C.1.4:    | Clarifications:<br>e.g., chant, spiritual, folk, opera, world, jazz, pop, solo, duet, trio, quartet, small ensembles, choirs   |
| MU.68.C.3.1:    | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
|                 | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1:    | Clarifications:<br>e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect  |
| MU.68.F.3.2:    | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
| MU.68.H.1.1:    | Describe the functions of music from various cultures and time periods.  |
| MU.68.H.1.2:    | Identify the works of representative composers within a specific style or time period.   |
| MU.68.H.1.5:    | Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.  |
| MU.68.H.2.1:    | Describe the influence of historical events and periods on music composition and performance.  |
|                 | Analyze how technology has changed the way music is created, performed, acquired, and experienced.   |
| MU.68.H.2.2:    | Clarifications:<br>e.g., from harpsichord to piano; from phonograph to CD  |
| MU.68.H.2.3:    | Classify the literature being studied by genre, style, and/or time period.   |
|                 | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1:    | Clarifications:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural<br>connections and traditions, ceremonial music, sales and advertising, communication   |
|                 | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2:    | Clarifications:<br>e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays   |
|                 | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.O.1.1:    | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble  |
|                 | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU.68.O.3.1:    | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> |
|                 | Clarifications:         Teachers who encourage students to participate actively in effortful learning both individually and with others:         • Cultivate a community of growth mindset learners.         • Foster perseverance in students by choosing tasks that are challenging.         • Develop students' ability to analyze and problem solve.         • Recognize students' effort when solving challenging problems.   |
|                 | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> </ul>   |
|                 | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>   |

| MA.K12.MTR.2.1:                    | <ul> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>  |
|------------------------------------|--|
|                                    | Clarifications:         Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:         Help students make connections between concepts and representations.         Provide opportunities for students to use manipulatives when investigating concepts.         Guide students from concrete to pictorial to abstract representations as understanding progresses.         Show students that various representations can have different purposes and can be useful in different situations.   |
| MA.K12.MTR.3.1:<br>MA.K12.MTR.4.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>• Select efficient and appropriate methods for solving problems within the given context.<br>• Maintain flexibility and accuracy while performing procedures and mental calculations.<br>• Complete tasks accurately and with confidence.<br>• Adapt procedures to apply them to a new context.<br>• Use feedback to improve efficiency when performing calculations.<br><b>Clarifications:</b><br>Teachers who encourage students to complete tasks with mathematical fluency:<br>• Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>• Offer multiple opportunities for students to practice efficient and generalizable methods.<br>• Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.<br>Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:<br>• Communicate mathematical ideas, vocabulary and methods effectively.<br>• Analyze the mathematical thinking of others.<br>• Compare the efficiency of a method to those expressed by others.<br>• Recognize errors and suggest how to correctly solve the task.<br>• Justify results by explaining methods and processes.<br>• Construct possible arguments based on evidence. |
|                                    | Clarifications:<br>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:<br>• Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.<br>• Create opportunities for students to discuss their thinking with peers.<br>• Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.<br>• Develop students' ability to justify methods and compare their responses to the responses of their peers.<br>Use patterns and structure to help understand and connect mathematical concepts.   |
| MA.K12.MTR.5.1:                    | <ul> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts. Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
| MA.K12.MTR.6.1:                    | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through justifications.   |
|                                    | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> </ul>   |

.

|                   | Perform investigations to gather data or determine if a method is appropriate.     Redesign models and methods to improve accuracy or efficiency.   |
|-------------------|---|
| MA.K12.MTR.7.1:   | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         Challenge students to question the accuracy of their models and methods.         Support students as they validate conclusions by comparing them to the given situation.         Indicate how various concepts can be applied to other disciplines.   |
|                   | Cite evidence to explain and justify reasoning.   |
| ELA.K12.EE.1.1:   | <ul> <li>Clarifications:</li> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> </ul> |
|                   | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.    |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## GENERAL NOTES

Students engage in an exploratory study of music through the examination of significant composers and their compositions across selected musical eras and/or genres. Students will also learn about modern and historical instruments, and gain a rudimentary understanding of the elements of music in order to develop strategies for listening to and appreciating musical works. Students may be expected to attend one or more performances outside of the school day to support and extend learning in the classroom. English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which **maximizes an ELL's need for communication and social skills. To access** an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

## GENERAL INFORMATION

Course Number: 1300030

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: General Music > Abbreviated Title: M/J UNDERSTAND MUSIC Course Length: Semester (S) Course Level: 2

Course Type: Elective Course Course Status: State Board Approved Grade Level(s): 6,7,8

## **Educator Certifications**

Instrumental Music (Secondary Grades 7-12) Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Elementary and Secondary Grades K-12)

# M/J Exploring Music Performance (#1300080) 2020 - 2022 (current)

| Name             | Description   |
|------------------|---|
|                  | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1:     | Clarifications:   |
|                  | e.g., listening maps, active listening, checklists  |
|                  | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.  |
| MU.68.C.1.2:     | Clarifications:   |
|                  | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
|                  | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.  |
| MU.68.C.2.1:     | Clarifications:   |
|                  | e.g., intonation, balance, blend, phrasing, rhythm  |
|                  | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.   |
| MU.68.C.2.2:     | Clarifications:   |
|                  | e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
|                  | Describe how studying music can enhance citizenship, leadership, and global thinking.   |
| MU.68.F.3.1:     | Clarifications:   |
|                  | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect  |
| MU.68.F.3.2:     | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.  |
| MU.68.H.2.1:     | Describe the influence of historical events and periods on music composition and performance.   |
|                  | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.   |
| MU.68.H.3.1:     | Clarifications:   |
|                  | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural   |
|                  |   |
|                  | Discuss how the absence of music would affect other content areas and contexts.   |
| MU.68.H.3.2:     | Clarifications:   |
|                  | e.g., illeatte alla dance, movies, sporting events, video games, commercial advertising, social gamerings, even and rengious coronomics, pags   |
| MU.68.0.3.2:     | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.   |
|                  | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1:     | Clarifications:   |
|                  |   |
|                  |   |
| MU.08.3.3.2.     | e.a., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                  | Use appropriate tools strategically   |
|                  |   |
|                  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,  |
|                  | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.  |
| MAFS.K12.MP.5.1: | might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze  |
|                  | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other  |
|                  | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying  |
|                  | assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content legated on a website, and use them to pase or solve problems. They are able to use                                |
|                  | technological tools to explore and deepen their understanding of concepts.  |
|                  | Attend to precision.  |
|                  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own   |
|                  | reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about   |
| MAFS.K12.MP.6.1: | specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,   |
|                  | express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully   |
|                  |   |
| MAFS.K12.MP.7.1: | Look for and make use of structure.   |
|                  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven   |
|                  | more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,  |
|                  | students will see $7 \times 8$ equals the well remembered $7 \times 5 + 7 \times 3$ , in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as $2 \times 7$ and the 9 as $2 + 7$ . They recognize the significance of an existing line in a geometric figure and |
|                  | can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see   |
|                  | complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x  |
|                  | - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |

| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
|-------------------|---|
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |
|                   | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. |
|                   | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.        |
| LAFS.6.SL.1.1:    | b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.   |
|                   | c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under   |
|                   | discussion.   |
|                   | d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.   |

## GENERAL NOTES

Students with little or no vocal or instrumental experience develop basic foundational skills and knowledge, including music theory, technique, musicianship and ensemble skills. Students also explore different genres of music and learn about the benefits of music study. Students may be required to attend one or more performances outside of the school day to support, extend, and assess learning in the classroom. This course may require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf.

# M/J Exploring Music Performance (#1300080) 2022 - And Beyond

| Name                              | Description  |
|-----------------------------------|--|
|                                   | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:                      | Clarifications:<br>e.g., listening maps, active listening, checklists  |
|                                   | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |
| MU.68.C.1.2:                      | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
|                                   | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
| MU.68.C.2.1:                      | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm  |
|                                   | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.  |
| MU.68.C.2.2:                      | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
|                                   | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1:                      | Clarifications:<br>e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect  |
| MU.68.F.3.2:                      | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
| MU.68.H.2.1:                      | Describe the influence of historical events and periods on music composition and performance.  |
|                                   | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1:                      | Clarifications:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural<br>connections and traditions, ceremonial music, sales and advertising, communication |
|                                   | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2:                      | Clarifications:<br>e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays   |
| MU.68.0.3.2:                      | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.  |
|                                   | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:                      | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|                                   | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:                      | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                                   | Mathematicians who participate in effortful learning both individually and with others:  |
|                                   | Analyze the problem in a way that makes sense given the task.  |
|                                   | <ul> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by medifying methods as peeded while solving a shallonging task.</li> </ul>   |
|                                   | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>   |
|                                   | <ul> <li>Help and support each other when attempting a new method or approach.</li> </ul>  |
| MA.K12.MTR.1.1:                   | Clarifications:  |
|                                   | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                                   | Cultivate a community of growth mindset learners.  |
|                                   | Foster perseverance in students by choosing tasks that are challenging.  |
|                                   | <ul> <li>Develop students' ability to analyze and problem solve.</li> <li>Decognize students' affert when solving shallonging problems.</li> </ul>   |
|                                   | Recognize students errort when solving challenging problems.   |
|                                   | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                                   | Build understanding through modeling and using manipulatives.  |
|                                   | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.  |
|                                   | Progress from modeling problems with objects and drawings to using algorithms and equations.   |
| MA K12 MTR 2 1.                   | <ul> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose</li> </ul>   |
| WITH N. I.Y. I.Y. I.Y. I.Y. Z. I. | Clarifications:  |
|                                   | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:  |
|                                   | Help students make connections between concepts and representations.   |
|                                   | Provide opportunities for students to use manipulatives when investigating concepts.   |

|                 | <ul> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
|-----------------|--|
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:  |
| MA.K12.MTR.3.1: | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
|                 | Clarifications:         Teachers who encourage students to complete tasks with mathematical fluency:         • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.         • Offer multiple opportunities for students to practice efficient and generalizable methods.         • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>                   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
|                 | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> </ul>   |
| MA.K12.MTR.5.1: | <ul> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>           |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
|                 | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through justifications.  |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |
|                 | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency</li> </ul>   |
| MA.K12.MTR.7.1: | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.   |

|                   | Indicate how various concepts can be applied to other disciplines.  |
|-------------------|---|
|                   | Cite evidence to explain and justify reasoning.   |
|                   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b><br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide<br>referenced by the instructor.   |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## GENERAL NOTES

Students with little or no vocal or instrumental experience develop basic foundational skills and knowledge, including music theory, technique, musicianship and ensemble skills. Students also explore different genres of music and learn about the benefits of music study. Students may be required to attend one or more performances outside of the school day to support, extend, and assess learning in the classroom. This course may require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which **maximizes an ELL's need for communication and social skills. To access** an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

 Description

 ELD.K12.ELL.SI.1:
 English language learners communicate for social and instructional purposes within the school setting.

## General Course Information and Notes

## GENERAL NOTES

#### SUBJECT AREA TRANSFER NUMBERS

Each course transferred into a Florida public school by an out-of-state or non-public school student should be matched with a course title and number when such course provides substantially the same content. However, a few transfer courses may not be close enough in content to be matched. For those courses a subject area transfer number is provided.

|                 | Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:  |
|                 | Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.   |
|                 | Support students to develop generalizations based on the similarities found among problems.  |
|                 | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>  |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
|                 | Estimate to discover possible solutions.   |
|                 | Use benchmark quantities to determine if a solution makes sense.   |
|                 | Check calculations when solving problems.     Vorify possible calculations by explaining the methods used  |
| MA.K12.MTR.6.1: | <ul> <li>Evaluate results based on the given context.</li> </ul>   |
|                 | Clarifications:  |
|                 | Teachers who encourage students to assess the reasonableness of solutions:   |
|                 | <ul> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ack "Does this solution make sonso? How do you know?"</li> </ul>  |
|                 | <ul> <li>Reinforce that students check their work as they progress within and after a task.</li> </ul>   |
|                 | Strengthen students' ability to verify solutions through justifications.   |
|                 | Apply mathematics to real-world contexts.  |
|                 | Mathematicians who apply mathematics to real-world contexts:   |
|                 | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, correspond and solve problems.</li> </ul>   |
|                 | <ul> <li>Ose models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency</li> </ul>  |
| MA.K12.MTR.7.1: | Clarifications:  |
|                 | Teachers who encourage students to apply mathematics to real-world contexts:   |
|                 | <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> </ul>   |
|                 | <ul> <li>Support students as they validate conclusions by comparing them to the given situation.</li> </ul>  |
|                 | Indicate how various concepts can be applied to other disciplines.   |
|                 | Cite evidence to explain and justify reasoning.  |
|                 | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details  |
|                 | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.  |
|                 | 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.   |
| ELA.K12.EE.1.1: | 4.5 Students continue with previous skills and reference comments made by snakers and nears. Students cite texts that they've directly   |
|                 | quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide   |
|                 | referenced by the instructor.  |
|                 | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                 | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                 | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1: | Clarifications:  |
|                 | See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                 | Clarifications:  |
| ELA.K12.EE.3.1: | Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl  |
|                 | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond   |
|                 | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
|                 | Clarifications:  |
|                 | In kindergarten, students learn to listen to one another respectfully.   |
| ELA.K12.EE.4.1: | In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.  |
|                 | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students   |
|                 | build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                 | Use the accepted rules governing a specific format to create quality work.   |
|                 | Clarifications:  |
| ELA.K12.EE.5.1: | Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must base instruction to an and a student creating a pactor based display must have instruction in how to effectively present information to |
|                 | do quality work.   |
|                 | Use appropriate voice and tone when speaking or writing.   |
|                 |  |

## GENERAL NOTES

#### SUBJECT AREA TRANSFER NUMBERS

Each course transferred into a Florida public school by an out-of-state or non-public school student should be matched with a course title and number when such course provides substantially the same content. However, a few transfer courses may not be close enough in content to be matched. For those courses a subject area transfer number is provided.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

## GENERAL INFORMATION

Course Number: 1300220

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Music Technology > Abbreviated Title: M/J MUS TRAN Course Length: Not Applicable

Course Type: Transfer Course Course Status: State Board Approved Grade Level(s): 6,7,8

| Name            | Description   |
|-----------------|---|
|                 | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1:    | Clarifications:   |
|                 | e.g., listening maps, active listening, checklists  |
|                 | Compare using correct music vacabulary, the aesthetic impact of a <b>performance to ope's own hypothesis of the composer's intent</b>                                     |
|                 | our is it   |
| MU.68.C.1.2:    | Clarifications:   |
|                 | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
|                 | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.                            |
| MU.68.C.2.1:    | Clarifications:   |
|                 | e.g., intonation, balance, blend, phrasing, rhythm  |
|                 | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                                       |
| MU.68.C.2.2:    | Clarifications:   |
|                 | e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
| MU.68.F.1.1:    | Create a composition and/or performance, using visual, kinesthetic, digital, and/or acoustic means to manipulate musical elements.  |
| MU.68.F.3.2:    | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.                          |
| MU.68.H.1.5:    | Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.                           |
| MU.68.H.2.3:    | Classify the literature being studied by genre, style, and/or time period.  |
|                 | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.   |
| MIL 68 H 3 1    | Clarifications:   |
|                 | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural                                 |
|                 | connections and traditions, ceremonial music, sales and advertising, communication  |
|                 | Discuss how the absence of music would affect other content areas and contexts.   |
| MU.68.H.3.2:    | Clarifications:   |
|                 | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays                           |
|                 | Compare performances of a musical work to identify artistic choices made by performers.   |
| MU.68.0.1.1:    | Clarifications:   |
|                 | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble  |
|                 | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to                          |
| MU.68.0.3.2:    | other musical works.  |
|                 | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.   |
| MU.68.S.1.1:    | Clarifications:   |
|                 | e.g., blues, rock   |
| MU.68.S.1.3:    | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
| MU.68.S.2.2:    | Transfer performance techniques from familiar to unfamiliar pieces.   |
|                 | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1:    | Clarifications:   |
|                 | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|                 | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2:    | Clarifications:   |
|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| MU.68.S.3.5:    | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |
|                 | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and                   |
|                 | issues, building on others' ideas and expressing their own clearly.   |
|                 | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic,                     |
|                 | text, or issue to probe and reflect on ideas under discussion.  |
| LAFS.6.SL.1.1:  | c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the tonic, text, or issue under                               |
|                 | discussion.   |
|                 | d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.   |
|                 |   |
|                 | Standard Relation to Course: Supporting   |
| LAFS.6.SL.1.2:  | interpret mormation presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain now it contributes to a topic, text, or issue under study |
| LAFS.6.SL.1.3:  | Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.                            |
|                 | Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes: use                      |
| LAFS.6.SL.2.4:  | appropriate eye contact, adequate volume, and clear pronunciation.  |
| LAFS.68.RST 2-4 | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical                           |
|                 | context relevant to grades 6–8 texts and topics.  |

| LAFS.68.WHST.3.7: | Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.   |
|-------------------|---|
| MAFS.K12.MP.5.1:  | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,<br>concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.<br>Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools<br>might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze<br>graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other<br>mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying<br>assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify<br>relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use<br>technological tools to explore and deepen their understanding of concepts.<br>Standard Relation to Course: Supporting |
| MAFS.K12.MP.6.1:  | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x<br>– y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students with little or no prior experience develop fundamental piano techniques, learn to read music, apply basic music theory, and explore the role of keyboard music in history and culture. Beginning pianists explore musical creativity in the form of basic arranging and improvisation, and develop analytical listening and problem-solving skills. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

| Name            | Description   |
|-----------------|---|
|                 | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1:    | Clarifications:   |
|                 | e.g., listening maps, active listening, checklists  |
|                 | Compare using correct music vecebulary, the postbatic impact of a performance to pro/s own hypothesis of the composer's intent                                  |
|                 | compare, using conect music vocabulary, the aesthetic impact of a performance to one slown hypothesis of the composer's intent.                                 |
| MU.68.C.1.2:    | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                |
|                 | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.                  |
| MU.68.C.2.1:    | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm   |
|                 | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                             |
| MU.68.C.2.2:    | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.F.1.1:    | Create a composition and/or performance, using visual, kinesthetic, digital, and/or acoustic means to manipulate musical elements.                              |
| MU.68.F.3.2:    | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.                |
| MU.68.H.1.5:    | Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.                 |
| MU.68.H.2.3:    | Classify the literature being studied by genre, style, and/or time period.  |
|                 | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.   |
|                 | Clarifications  |
| MU.68.H.3.1:    | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community; cultural                       |
|                 | connections and traditions, ceremonial music, sales and advertising, communication  |
|                 | Discuss how the absence of music would affect other content areas and contexts  |
|                 |   |
| MU.68.H.3.2:    | Clarifications:<br>e.g. theatre and dance movies sporting events video games commercial advertising social gatherings civic and religious ceremonies plays      |
|                 | c.g., medie and dance, mories, sporting events, video games, commercial dave tising, social gamerings, even and religious colemonies, plays                     |
|                 | compare performances of a musical work to identify artistic choices made by performers.   |
| MU.68.0.1.1:    | Clarifications:   |
|                 | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble  |
| MU 68 O 3 2·    | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences t                 |
| 10.00.0.3.2.    | other musical works.  |
|                 | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.   |
| MU.68.S.1.1:    | Clarifications:   |
|                 | e.g., blues, rock   |
| MU.68.S.1.3:    | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
| MU.68.S.2.2:    | Transfer performance techniques from familiar to unfamiliar pieces.   |
|                 | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1:    | Clarifications:   |
|                 | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|                 | Demonstrate proper vocal or instrumental technique  |
|                 |   |
| MU.68.5.3.2:    | Clarifications:   |
|                 | e.g., posture, breathing, ningering, embouchare, bow technique, tuning, strumming   |
| MU.68.S.3.5:    | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |
|                 | Mathematicians who participate in effortful learning both individually and with others:   |
|                 | Analyze the problem in a way that makes sense given the task.   |
|                 | Ask questions that will help with solving the task.   |
|                 | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> </ul>   |
|                 | Stay engaged and maintain a positive mindset when working to solve tasks.   |
| MA.K12.MTR.1.1: | Help and support each other when attempting a new method or approach.   |
|                 | Clarifications:   |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:  |
|                 | Cultivate a community of growth mindset learners.   |
|                 | Foster perseverance in students by choosing tasks that are challenging.   |
|                 | Develop students' ability to analyze and problem solve.   |
|                 | Recognize students' effort when solving challenging problems.   |
|                 | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways: |
|                 | Build understanding through modeling and using manipulatives.   |
|                 |   |

| MA.K12.MTR.2.1: | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.</li></ul>   |
|-----------------|--|
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>• Select efficient and appropriate methods for solving problems within the given context.<br>• Maintain flexibility and accuracy while performing procedures and mental calculations.<br>• Complete tasks accurately and with confidence.<br>• Adapt procedures to apply them to a new context.<br>• Use feedback to improve efficiency when performing calculations.<br><b>Clarifications:</b><br>Teachers who encourage students to complete tasks with mathematical fluency:<br>• Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>• Offer multiple opportunities for students to practice efficient and generalizable methods.<br>• Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.<br>Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:                                  |
| MA.K12.MTR.4.1: | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul>   |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts. Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking. |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.<br>Apply mathematics to real-world contexts.  |
|                 | Mathematicians who apply mathematics to real-world contexts:   |

| MA.K12.MTR.7.1:   | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>  |
|-------------------|--|
|                   | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         Challenge students to question the accuracy of their models and methods.         Support students as they validate conclusions by comparing them to the given situation.         Indicate how various concepts can be applied to other disciplines.  |
|                   | Cite evidence to explain and justify reasoning.  |
|                   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.                        |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b><br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide<br>referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                   | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                   | Make inferences to support comprehension.  |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:   | Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students with little or no prior experience develop fundamental piano techniques, learn to read music, apply basic music theory, and explore the role of keyboard music in history and culture. Beginning pianists explore musical creativity in the form of basic arranging and improvisation, and develop analytical listening and problem-solving skills. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

**GENERAL NOTES** 

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally

embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

# M/J Keyboard 2 (#1301040) 2020 - 2022 (current)

| Name         | Description  |
|--------------|--|
|              | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1: | Clarifications:<br>e.g., listening maps, active listening, checklists  |
|              | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |
| MU.68.C.1.2: | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
|              | Identify, aurally, instrumental styles and a variety of instrumental ensembles.  |
| MU.68.C.1.3: | Clarifications:<br>e.g., Classical, Baroque, Romantic, contemporary, jazz, pop, solo, duet, trio, quartet, small ensembles   |
|              | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
| MU.68.C.2.1: | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm  |
|              | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.  |
| MU.68.C.2.2: | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
| MU.68.C.2.3: | Critique personal composition and/or improvisation, using simple criteria, to generate improvements with guidance from teachers and/or peers.  |
| MU.68.F.1.1: | Create a composition and/or performance, using visual, kinesthetic, digital, and/or acoustic means to manipulate musical elements.<br>Describe how concert attendance can financially impact a community.  |
| MU.68.F.2.2: | Clarifications:<br>e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants   |
| MU.68.F.3.2: | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
| MU.68.H.1.2: | Identify the works of representative composers within a specific style or time period.   |
| MU.68.H.1.5: | Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.  |
| MU.68.H.2.1: | Describe the influence of historical events and periods on music composition and performance.  |
|              | Analyze how technology has changed the way music is created, performed, acquired, and experienced.   |
| MU.68.H.2.2: | Clarifications:<br>e.g., from harpsichord to piano; from phonograph to CD  |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.   |
|              | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1: | Clarifications:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural<br>connections and traditions, ceremonial music, sales and advertising, communication |
|              | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2: | Clarifications:<br>e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays   |
|              | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.O.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble  |
|              | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.O.2.2: | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor  |
| MU.68.O.3.2: | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.  |
|              | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1: | Clarifications:<br>e.g., blues, rock   |
| MU.68.S.1.3: | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|              | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4: | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice   |
| MU.68.S.1.6: | Compose a melody, with or without lyrics, over a standard harmonic progression.  |
| MU.68.S.2.2: | Transfer performance techniques from familiar to unfamiliar pieces.  |
|              | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1: | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |

| MU.68.S.3.2:      | Demonstrate proper vocal or instrumental technique.   |
|-------------------|---|
|                   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                   | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3:      | Clarifications:   |
|                   | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|                   | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:      | Clarifications:   |
|                   | e.g., error detection, interval reinforcement   |
| MU.68.S.3.5:      | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical<br>context relevant to grades 6–8 texts and topics.   |
| LAFS.68.WHST.3.7: | Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional<br>related, focused questions that allow for multiple avenues of exploration.  |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.  |
|                   | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.   |
|                   | a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the  |
|                   | topic, text, or issue to probe and reflect on ideas under discussion.   |
| LAFS.7.SL.1.1:    | c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the   |
|                   | discussion back on topic as needed.   |
|                   | d. Acknowledge new information expressed by others and, when warranted, modify their own views.   |
|                   | Standard Relation to Course: Supporting   |
| LAFS.7.SL.1.2:    | Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas   |
| LAFS 7 SL 1 3     | clarity a topic, text, or issue under study.<br>Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence   |
|                   | Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use  |
| LAFS.7.SL.2.4:    | appropriate eye contact, adequate volume, and clear pronunciation.  |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
|                   | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                   | Standard Relation to Course: Supporting   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| LLU.NIZ.ELL.31.1  | engnan ranguage rearrers communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students build on prior piano experience to develop intermediate piano techniques and skills, and learn music repertoire from various styles and time periods. They explore musical creativity through improvisation and composition, and cultivate analytical listening and critical thinking skills associated with making informed musical decisions.

Intermediate-level pianists also learn about the basic tools of music technology through such components as MIDI keyboards. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|              | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2: | Clarifications:<br>e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays   |
|              | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.O.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble  |
|              | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.0.2.2: | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor  |
| MU.68.0.3.2: | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.  |
|              | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1: | Clarifications:<br>e.g., blues, rock   |
| MU.68.S.1.3: | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|              | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4: | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice   |
| MU.68.S.1.6: | Compose a melody, with or without lyrics, over a standard harmonic progression.  |
| MU.68.S.2.2: | Transfer performance techniques from familiar to unfamiliar pieces.  |
|              | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1: | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |

|                 | Demonstrate proper vocal or instrumental technique.  |
|-----------------|--|
| MU.68.S.3.2:    | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                 | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:    | Clarifications:  |
|                 | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
| MU.68.S.3.4:    | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
|                 | e.g., error detection, interval reinforcement  |
| MU.68.S.3.5:    | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.  |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |
|                 | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will belo with solving the task</li> </ul>  |
|                 | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> </ul>  |
|                 | Stay engaged and maintain a positive mindset when working to solve tasks.  |
| MA.K12.MTR.1.1: | Help and support each other when attempting a new method or approach.  |
|                 | Clarifications:<br>Teachers who encourage students to participate actively in effortful learning both individually and with others:  |
|                 | Cultivate a community of growth mindset learners.  |
|                 | <ul> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to applyze and problem solve</li> </ul>  |
|                 | <ul> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
|                 | Demonstrate understanding by representing problems in multiple ways.   |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                 | Build understanding through modeling and using manipulatives.  |
|                 | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>                  |
|                 | <ul> <li>Express connections between concepts and representations.</li> </ul>  |
| MA.K12.MTR.2.1: | Choose a representation based on the given context or purpose.   |
|                 | Clarifications:  |
|                 | <ul> <li>Help students make connections between concepts and representations.</li> </ul>   |
|                 | Provide opportunities for students to use manipulatives when investigating concepts.   |
|                 | <ul> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various corresponditions can have different purposes and can be useful in different situations.</li> </ul> |
|                 | Complete tasks with mathematical fluency.  |
|                 | Mathematicians who complete tasks with mathematical fluency:   |
|                 | Select efficient and appropriate methods for solving problems within the given context.  |
|                 | Maintain flexibility and accuracy while performing procedures and mental calculations.   |
|                 | Complete tasks accurately and with confidence.      Adapt procedures to apply them to a new context  |
| MA.K12.MTR.3.1: | Use feedback to improve efficiency when performing calculations.   |
|                 | Clarifications:  |
|                 | Teachers who encourage students to complete tasks with mathematical fluency:   Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.                              |
|                 | <ul> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> </ul>   |
|                 | • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.   |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.  |
|                 | Mathematicalis who engage in discussions that renerci on the mathematical thinking of self and others.   |
|                 | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> </ul>  |
| MA.K12.MTR.4.1: | Compare the efficiency of a method to those expressed by others.   |
|                 | <ul> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Institut results by evaluating methods and processes</li> </ul>  |
|                 | <ul> <li>Construct possible arguments based on evidence.</li> </ul>  |
|                 | Clarifications:  |
|                 | Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:   |
|                 | <ul> <li>Establish a current in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> </ul>                 |
|                 | • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.   |
|                 | Develop students' ability to justify methods and compare their responses to the responses of their peers.  |
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
|                 | Eocus on relevant details within a problem   |
|                 | <ul> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> </ul>   |
|                 |  |

|                 | <ul> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> </ul>  |
|-----------------|---|
| MA.K12.MTR.5.1: | Connect solutions of problems to more complicated large-scale situations.   |
|                 | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.   |
|                 | Assess the reasonableness of solutions.   |
| MA.K12.MTR.6.1: | <ul> <li>Mathematicians who assess the reasonableness of solutions:</li> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul> Clarifications: Teachers who encourage students to assess the reasonableness of solutions:   |
|                 | Have students estimate or predict solutions prior to solving.   |
|                 | <ul> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>   |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
| MA K12 MTR 7 1  | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency</li> </ul>  |
| MA.K12.MTR.7.1: | <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
|                 | Cite evidence to explain and justify reasoning.   |
| ELA.K12.EE.1.1: | <ul> <li>Clarifications:</li> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly guoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide</li> </ul> |
|                 | referenced by the instructor.<br>6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                 | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                 | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1: | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
| ELA.K12.EE.3.1: | Make inferences to support comprehension.   |
|                 | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
| ELA.K12.EE.4.1: | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
|                 | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                 | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                 | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1: | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to  |

|                   | do quality work.  |  |
|-------------------|---|--|
|                   | Use appropriate voice and tone when speaking or writing.  |  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. |  |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |  |

## VERSION DESCRIPTION

Students build on prior piano experience to develop intermediate piano techniques and skills, and learn music repertoire from various styles and time periods. They explore musical creativity through improvisation and composition, and cultivate analytical listening and critical thinking skills associated with making informed musical decisions. Intermediate-level pianists also learn about the basic tools of music technology through such components as MIDI keyboards. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

Course Number: 1301040

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J KEYBD 2 Course Length: Year (Y) Course Level: 2

Course Status: State Board Approved Grade Level(s): 6,7,8

#### **Educator Certifications**

| istrumental Music (Secondary Grades 7-12)                 |  |
|---|--|
| Instrumental Music (Elementary and Secondary Grades K-12) |  |
| Vocal Music (Elementary and Secondary Grades K-12)        |  |
| Music (Elementary and Secondary Grades K-12)              |  |

| Name         | Description  |
|--------------|--|
| MU.68.C.1.1: | Develop strategies for listening to unfamiliar musical works.  |
|              | Clarifications:  |
|              | e.g., listening maps, active listening, checklists   |
|              | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                 |
| MU 68 C 1 2  | Clarifications   |
| W0.00.0.1.2. | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                    |
|              | Identify, aurally, instrumental styles and a variety of instrumental ensembles.  |
| MU.68.C.1.3: | Clarifications:  |
|              | e.g., Classical, Baroque, Romantic, contemporary, jazz, pop, solo, duet, trio, quartet, small ensembles  |
|              | Identify, aurally, a variety of vocal styles and ensembles.  |
| MU.68.C.1.4: | Clarifications:  |
|              | e.g., chant, spiritual, folk, opera, world, jazz, pop, solo, duet, trio, quartet, small ensembles, choirs  |
|              | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
| MU 68 C 2 1  | Clarifications   |
| 10.00.0.2.1. | e.g., intonation, balance, blend, phrasing, rhythm   |
|              | Critique, using correct music vecebulary, changes in one's own or others' musical performance resulting from practice or rehearcal               |
|              |  |
| MU.68.C.2.2: | Clarifications:  |
|              | e.g., biend, balance, ensemble playing, sononty, technique, tone quainty   |
| MU.68.C.2.3: | Critique personal composition and/or improvisation, using simple criteria, to generate improvements with guidance from teachers and/or peers.    |
| MU.68.C.3.1: | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
| MU.68.F.1.1: | Create a composition and/or performance, using visual, kinestnetic, digital, and/or acoustic means to manipulate musical elements.               |
|              | create an original composition that reflects various performances that use traditional and contemporary technologies.                            |
| MU.68.F.1.2: | Clarifications:  |
|              | e.g., widit, internet video resources, personal digital assistants, wipa players, cell phones, digital recording, music software                 |
|              | Describe several routes a composition or performance could travel from creator to consumer.  |
| MU.68.F.2.1: | Clarifications:  |
|              | e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales                        |
|              | Describe how concert attendance can financially impact a community.  |
| MU.68.F.2.2: | Clarifications:  |
|              | e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants                                      |
| MU.68.F.3.2: | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media. |
|              | Identify the tasks involved in the compositional process and discuss how the process might be applied in the work place.                         |
| MU.68.F.3.3: | Clarifications:  |
|              | e.g., idea, development, editing, selling, revising, testing, presenting   |
| MU.68.H.1.2: | Identify the works of representative composers within a specific style or time period.   |
| MU.68.H.1.3: | Describe how American music has been influenced by other cultures.   |
| MU.68.H.1.5: | Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.  |
| MU.68.H.2.1: | Describe the influence of historical events and periods on music composition and performance.  |
|              | Analyze how technology has changed the way music is created, performed, acquired, and experienced.   |
| MU.68.H.2.2: | Clarifications:  |
|              | e.g., from harpsichord to piano; from phonograph to CD   |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.   |
|              | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.                                |
| MU.68.H.3.1: | Clarifications:  |
|              | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural        |
|              | connections and traditions, ceremonial music, sales and advertising, communication   |
| MU.68.O.1.1: | Compare performances of a musical work to identify artistic choices made by performers.  |
|              | Clarifications:  |
|              | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble                                   |
|              | Create a composition, manipulating musical elements and evploring the effects of these manipulations   |
| MU.68.O.2.1: |  |
|              | LIARTITICATIONS:   |
|              | o.g., using electronic of paper-and-perior means to experiment with timbre, filelody, filytinn, harmony, form, tohality                          |
|              | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.0.2.2: | Clarifications:  |

|                   | e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|-------------------|--|
|                   | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image  |
| MU.68.O.3.1:      | Clarifications:  |
|                   | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration   |
| MU.68.0.3.2:      | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.  |
|                   | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1:      | Clarifications:<br>e.g., blues, rock   |
|                   | Compose a short musical piece.   |
| MU.68.S.1.2:      | Clarifications:<br>e.g., using traditional, non-traditional, digital, or classroom instruments and/or voice  |
| MU.68.S.1.3:      | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
| MU.68.S.1.4:      | Clarifications:  |
|                   | e.g., melodies using traditional classroom instruments and/or voice  |
|                   | Perform melodies with chord progressions.  |
| MU.68.S.1.5:      | Clarifications:<br>e.g., keyboard/piano, keyboard/piano and voice, guitar, voice and guitar  |
| MU.68.S.1.6:      | Compose a melody, with or without lyrics, over a standard harmonic progression.  |
|                   | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1:      | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony   |
| MU.68.S.2.2:      | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                   | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:      | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|                   | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:      | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                   | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:      | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|                   | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:      | Clarifications:<br>e.g., error detection, interval reinforcement   |
| MU.68.S.3.5:      | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.  |
|                   | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.   |
| MU.68.S.3.6:      | Clarifications:<br>e.g., independently, collaboratively  |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.   |
| LAFS.68.WHST.3.7: | Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.  |
|                   | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly.  |
|                   | a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the   |
|                   | topic, text, or issue to probe and reflect on ideas under discussion.  |
| LAFS.8.SL.1.1:    | b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed.  |
|                   | and ideas.   |
|                   | d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.  |
|                   | Standard Relation to Course: Supporting  |
| LAFS.8.SL.1.2:    | Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.   |
| LAFS.8.SL.1.3:    | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced.  |
| LAFS.8.SL.2.4:    | Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.   |
|                   | Use appropriate tools strategically.   |
|                   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,   |
|                   | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.   |
| MAFS.K12.MP.5.1:  | moncient students are sufficiently raminar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other |

|                   | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b>   |
|-------------------|---|
|                   | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own   |
| MAFS.K12.MP.6.1:  | reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x<br>- y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students with significant knowledge of piano technique, music literacy, and related musical knowledge extend their skills through a variety of solo and ensemble literature. Students explore the influence of the piano on performance and composition through history, and develop the skills needed to assess their own and others' piano performances. Advanced middle school pianists investigate familiar, new, and emerging music technology and its connection to keyboards and other sound-generating devices. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

### GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

Course Number: 1301050

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J KEYBD 3 Course Length: Year (Y) Course Level: 2

Course Status: Course Approved Grade Level(s): 6,7,8

### **Educator Certifications**

| Vocal Music (Elementary and Secondary Grades K-12)        |
|---|
| Instrumental Music (Secondary Grades 7-12)                |
| Instrumental Music (Elementary and Secondary Grades K-12) |

# M/J Keyboard 3 (#1301050) 2022 - And Beyond

| Name          | Description  |
|---------------|--|
|               | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:  | Clarifications:  |
|               | e.g., listening maps, active listening, checklists   |
|               | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                 |
| MU.68.C.1.2:  | Clarifications:  |
|               | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                    |
|               | Identify, aurally, instrumental styles and a variety of instrumental ensembles.  |
| MU.68.C.1.3:  | Clarifications:  |
|               | e.g., Classical, Baroque, Romantic, contemporary, jazz, pop, solo, duet, trio, quartet, small ensembles  |
|               | Identify, aurally, a variety of vocal styles and ensembles.  |
| MU.68.C.1.4:  | Clarifications:  |
|               | e.g., chant, spiritual, folk, opera, world, jazz, pop, solo, duet, trio, quartet, small ensembles, choirs  |
|               | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
| MU.68.C.2.1:  | Clarifications:  |
|               | e.g., intonation, balance, blend, phrasing, rhythm   |
|               | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.              |
| MU.68.C.2.2:  | Clarifications:  |
|               | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.C.2.3:  | Critique personal composition and/or improvisation, using simple criteria, to generate improvements with guidance from teachers and/or peers.    |
| MU.68.C.3.1:  | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
| MU.68.F.1.1:  | Create a composition and/or performance, using visual, kinesthetic, digital, and/or acoustic means to manipulate musical elements.               |
|               | Create an original composition that reflects various performances that use "traditional" and contemporary technologies.                          |
| MU.68.F.1.2:  | Clarifications:  |
|               | e.g., MIDI, Internet video resources, personal digital assistants, MP3 players, cell phones, digital recording, music software                   |
|               | Describe several routes a composition or performance could travel from creator to consumer.  |
| MU.68.F.2.1:  | Clarifications:  |
|               | e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales                        |
|               | Describe how concert attendance can financially impact a community.  |
| MU.68.F.2.2:  | Clarifications:  |
|               | e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants                                      |
| MU.68.F.3.2:  | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media. |
|               | Identify the tasks involved in the compositional process and discuss how the process might be applied in the work place.                         |
| MU.68.F.3.3:  | Clarifications:  |
|               | e.g., idea, development, editing, selling, revising, testing, presenting   |
| MU.68.H.1.2:  | Identify the works of representative composers within a specific style or time period.   |
| MU.68.H.1.3:  | Describe how American music has been influenced by other cultures.   |
| MU.68.H.1.5:  | Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.  |
| MU.68.H.2.1:  | Describe the influence of historical events and periods on music composition and performance.  |
|               |  |
| MU.68.H.2.2:  | clarifications:  |
|               | Classify the literature being studied by game, style, and/or time period   |
| MU.08.H.2.3:  | Classify the interature being studied by genre, style, and/or time period.   |
|               |  |
| MU.68.H.3.1:  | e a school: other music classes social studies dance physical education science health math world languages; community; cultural                 |
|               | connections and traditions, ceremonial music, sales and advertising, communication   |
|               | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU 68 O 1 1·  | Clarifications:  |
| 10.00.0.1.1.  | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble                                   |
|               | Create a composition, manipulating musical elements and exploring the effects of those manipulations   |
| MU 68 O 2 1.  | Clarifications:  |
| WIG.00.0.2.1. | e.g., using electronic or paper-and-pencil means to experiment with timbre, melody, rhythm, harmony, form, tonality                              |
|               | Demonstrate knowledge of major and minor togalities through performance and composition  |
| MIL 69 O 2 2. | Clarifications:  |
| 10.00.0.2.2:  |  |

|                 | e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|-----------------|--|
|                 | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image  |
| MU.68.0.3.1:    | Clarifications:  |
|                 | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration   |
| MU.68.0.3.2:    | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.                        |
|                 | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1:    | Clarifications:<br>e.g., blues, rock   |
|                 | Compose a short musical piece.   |
| MU.68.S.1.2:    | Clarifications:<br>e.g., using traditional, non-traditional, digital, or classroom instruments and/or voice  |
| MU.68.S.1.3:    | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|                 | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:    | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice   |
|                 | Perform melodies with chord progressions.  |
| MU.68.S.1.5:    | Clarifications:  |
|                 | e.g., keyboard/piano, keyboard/piano and voice, guitar, voice and guitar   |
| MU.68.S.1.6:    | Compose a melody, with or without lyrics, over a standard harmonic progression.  |
| MII 60 5 0 1.   |  |
| 10.00.3.2.1.    | e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2:    | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                 | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:    | Clarifications:  |
|                 | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                 | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:    | Clarifications:  |
|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                 | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:    | Clarifications:  |
|                 | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|                 | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:    | Clarifications:  |
|                 | e.g., error detection, interval reinforcement  |
| MU.68.S.3.5:    | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.  |
| MII 60 5 2 6.   | Clarifications:  |
| 10.00.3.3.0.    | e.g., independently, collaboratively   |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |
|                 | Analyze the problem in a way that makes sense given the task.  |
|                 | Ask questions that will help with solving the task.  |
|                 | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stev approach and maintain a positive mindest when working to achiev tasks.</li> </ul> |
|                 | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>                 |
| MA.K12.MTR.1.1: | Clarifications:  |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                 | Cultivate a community of growth mindset learners.  |
|                 | Foster perseverance in students by choosing tasks that are challenging.  |
|                 | Develop students' ability to analyze and problem solve.  |
|                 | Recognize students' effort when solving challenging problems.  |
| MA K12 MTD 2 1. | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:                              |
|                 | Build understanding through modeling and using manipulatives.  |
|                 | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.  |
|                 | Progress from modeling problems with objects and drawings to using algorithms and equations.   |
|                 | Express connections between concepts and representations.  |
| MA.K12.MTR.2.1: | Choose a representation based on the given context or purpose.   |
|                 | Clarifications:<br>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                 | <ul> <li>Help students make connections between concepts and representations.</li> </ul>   |
|                 | Provide opportunities for students to use manipulatives when investigating concepts.   |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.   |
|                 | Show students that various representations can have different purposes and can be useful in different situations.  |
|-----------------|--|
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:  |
| MA.K12.MTR.3.1: | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
|                 | <ul> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>   |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes</li> </ul>   |
|                 | <ul> <li>Construct possible arguments based on evidence.</li> <li>Clarifications:         <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> </li> </ul>  |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br>Clarifications:<br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems. |
| M4 K12 MTR 6 1- | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> <li>Assess the reasonableness of solutions.</li> <li>Mathematicians who assess the reasonableness of solutions:</li> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context</li> </ul>  |
| MA.K12.MTR.6.1: | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.         • Prompt students to continually ask, "Does this solution make sense? How do you know?"         • Reinforce that students check their work as they progress within and after a task.         • Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1: | Mathematicians who apply mathematics to real-world contexts:  Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. Redesign models and methods to improve accuracy or efficiency Clarifications: Teachers who encourage students to apply mathematics to real-world contexts: Provide opportunities for students to create models, both concrete and abstract, and perform investigations. Challenge students to guestion the accuracy of their medicine and methods  |
|                 | <ul> <li>Granenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |

|                   | Cite evidence to explain and justify reasoning.   |
|-------------------|---|
| ELA.K12.EE.1.1:   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
|                   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students with significant knowledge of piano technique, music literacy, and related musical knowledge extend their skills through a variety of solo and ensemble literature. Students explore the influence of the piano on performance and composition through history, and develop the skills needed to assess their own and others' piano performances. Advanced middle school pianists investigate familiar, new, and emerging music technology and its connection to keyboards and other sound-generating devices. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

Course Number: 1301050

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J KEYBD 3 Course Length: Year (Y) Course Level: 2

Course Status: State Board Approved Grade Level(s): 6,7,8

## **Educator Certifications**

# M/J Guitar 1 (#1301060) 2020 - 2022 (current)

| Name              | Description  |
|-------------------|--|
|                   | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:      | Clarifications:  |
|                   | e.g., listening maps, active listening, checklists   |
|                   | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |
| MU 68 C 1 2       | Clarifications:  |
| 110.00.0.1.2.     | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title  |
|                   | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
| MU.68.C.2.1:      | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm  |
|                   | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.  |
| MU.68.C.2.2:      | Clarifications:  |
|                   |  |
|                   | Describe how concert attendance can financially impact a community.  |
| MU.68.F.2.2:      | Clarifications:<br>e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants   |
| MU.68.F.3.2:      | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
| MU.68.H.1.3:      | Describe how American music has been influenced by other cultures.   |
| MU.68.H.2.1:      | Describe the influence of historical events and periods on music composition and performance.  |
| MU.68.H.2.3:      | Classify the literature being studied by genre, style, and/or time period.   |
|                   | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1:      | Clarifications:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural<br>connections and traditions, ceremonial music, sales and advertising, communication |
| MU.68.O.3.2:      | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.  |
| MU.68.S.1.3:      | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|                   | Perform melodies with chord progressions.  |
| MU.68.S.1.5:      | Clarifications:<br>e.g., keyboard/piano, keyboard/piano and voice, guitar, voice and guitar  |
| MU.68.S.2.2:      | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                   | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:      | Clarifications:  |
|                   | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                   | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:      | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                   | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and  |
|                   | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic,  |
|                   | text, or issue to probe and reflect on ideas under discussion.   |
| LAFS.6.SL.1.1:    | b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.  |
|                   |  |
|                   | d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.  |
|                   |  |
| LAFS.6.SL.1.2:    | Standard Relation to Course: Supporting<br>Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or   |
|                   | issue under study.   |
| LAFS.6.SL.1.3:    | Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.   |
| LAFS.6.SL.2.4:    | appropriate eye contact, adequate volume, and clear pronunciation.   |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.   |
| LAFS.68.WHST.3.7: | Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.                        |
|                   | Use appropriate tools strategically.   |
|                   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,   |

| MAFS.K12.MP.5.1:  | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.<br>Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools<br>might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze<br>graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other<br>mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying<br>assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify<br>relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use<br>technological tools to explore and deepen their understanding of concepts.<br><b>Standard Relation to Course: Supporting</b> |
|-------------------|--|
|                   | Attend to precision.   |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|                   | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students with little or no experience develop basic guitar skills and knowledge, including simple and full-strum chords, strumming patterns, playing/singing simple melodies, foundational music theory, parts of the guitar, and ensemble skills. Beginning guitarists explore the careers and music of significant performers in pop/rock, jazz, blues, classical, country, bluegrass, and hard rock/metal genres. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. | MU.68.S.2.2:    | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                 | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:    | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|                 | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:    | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                 | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> </ul>    |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.  |
|                 | Stay engaged and maintain a positive mindset when working to solve tasks.  |
|                 | Help and support each other when attempting a new method or approach.  |
| MA.K12.MTR.1.1: | Clarifications:<br>Teachers who encourage students to participate actively in effortful learning both individually and with others:<br>• Cultivate a community of growth mindset learners.   |
|                 | • Foster perseverance in students by choosing tasks that are challenging.  |
|                 | Develop students' ability to analyze and problem solve.  |
|                 | Recognize students' effort when solving challenging problems.  |
| MA.K12.MTR.2.1: | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                 | Build understanding through modeling and using manipulatives.  |
|                 | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.  |
|                 | Progress from modeling problems with objects and drawings to using algorithms and equations.   |
|                 | Express connections between concepts and representations.  |
|                 | Choose a representation based on the given context or purpose.   |

|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
|-----------------|--|
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>• Select efficient and appropriate methods for solving problems within the given context.<br>• Maintain flexibility and accuracy while performing procedures and mental calculations.<br>• Complete tasks accurately and with confidence.<br>• Adapt procedures to apply them to a new context.<br>• Use feedback to improve efficiency when performing calculations.   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul> </li> </ul>  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> </ul> |
|                 | <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>                    |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>            |
|                 | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.                      |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:<br>Connect mathematical concepts to everyday experiences.<br>Use models and methods to understand, represent and solve problems.   |
| MA.K12.MTR.7.1: | Perrorm investigations to gather data or determine if a method is appropriate.     Redesign models and methods to improve accuracy or efficiency.      Clarifications:      Teachers who encourage students to apply mathematics to real-world contexts:   |

|                   | <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
|-------------------|---|
|                   | Cite evidence to explain and justify reasoning.   |
| ELA.K12.EE.1.1:   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
|                   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students with little or no experience develop basic guitar skills and knowledge, including simple and full-strum chords, strumming patterns, playing/singing simple melodies, foundational music theory, parts of the guitar, and ensemble skills. Beginning guitarists explore the careers and music of significant performers in pop/rock, jazz, blues, classical, country, bluegrass, and hard rock/metal genres. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional

purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

Course Number: 1301060

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J GUITAR 1 Course Length: Year (Y) Course Level: 2

Course Status: State Board Approved Grade Level(s): 6,7,8

#### **Educator Certifications**

# M/J Guitar 2 (#1301070) 2020 - 2022 (current)

| Name          | Description   |
|---------------|---|
|               | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1:  | Clarifications:   |
|               | e.g., listening maps, active listening, checklists  |
|               | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                                      |
| MU.68.C.1.2:  | Clarifications:   |
|               | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
|               | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.                        |
| MU.68.C.2.1:  | Clarifications:   |
|               | e.g., intonation, balance, blend, phrasing, rhythm  |
|               | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                                   |
| MU.68.C.2.2:  | Clarifications:   |
|               | e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
| MU.68.C.3.1:  | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.   |
|               | Describe how concert attendance can financially impact a community.   |
| MU.68.F.2.2:  | Clarifications:   |
|               | e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants   |
|               | Describe how studying music can enhance citizenship, leadership, and global thinking.   |
| MU.68.F.3.1:  | Clarifications:   |
|               | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect                        |
| MU.68.F.3.2:  | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.                      |
| MU.68.H.1.2:  | Identify the works of representative composers within a specific style or time period.  |
|               |   |
| MU.68.H.1.4:  | Clarifications:   |
|               | aural/oral traditions, drumming patterns  |
| MU.68.H.2.1:  | Describe the influence of historical events and periods on music composition and performance.   |
| MU.68.H.2.3:  | Classify the literature being studied by genre, style, and/or time period.  |
|               | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.   |
| MII 68 H 3 1· | Clarifications:   |
| 10.00.11.3.1. | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural                             |
|               | connections and traditions, ceremonial music, sales and advertising, communication  |
|               | Discuss how the absence of music would affect other content areas and contexts.   |
| MU.68.H.3.2:  | Clarifications:   |
|               | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays                       |
|               | Compare performances of a musical work to identify artistic choices made by performers.   |
| MU.68.0.1.1:  | Clarifications:   |
|               | e.g., myrim, meiody, timbre, rorm, tonaity, narmony, expressive elements; chorai, orchestrai, band, ensemble  |
|               | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.                    |
| MU.68.0.3.1:  | Clarifications:   |
|               |   |
| MU.68.0.3.2:  | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works. |
| MU.68.S.1.3:  | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
|               | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4:  | Clarifications:   |
|               | e.g., melodies using traditional classroom instruments and/or voice   |
| MU.68.S.1.5:  | Perform melodies with chord progressions.   |
|               | Clarifications:   |
|               | e.g., keyboard/piano, keyboard/piano and voice, guitar, voice and guitar  |
|               | Perform music from memory to demonstrate knowledge of the musical structure.  |
| MU.68.S.2.1:  | Clarifications:   |
|               | e.g., basic themes, patterns, tonality, melody, harmony   |
| MU.68.S.2.2:  | Transfer performance techniques from familiar to unfamiliar pieces.   |
|               | Sing and/or play age-appropriate repertoire expressively.   |

| MU.68.S.3.1:      | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|-------------------|---|
|                   | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2:      | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                   | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:      | Clarifications:<br>e.g., error detection, interval reinforcement  |
|                   | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:      | Clarifications:<br>e.g., independently, collaboratively   |
|                   | <ul> <li>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</li> <li>b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.</li> </ul>  |
| LAI 3.0.3L.1.1.   | <ul> <li>c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion.</li> <li>d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.</li> </ul>  |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.3.7: | Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.   |
| LAFS.7.SL.1.2:    | Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas   |
| LAFS.7.SL.1.3:    | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.  |
| LAFS.7.SL.2.4:    | Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use  |
|                   | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students with previous experience expand on basic guitar skills and knowledge, adding simple and full-strum chords, barre and power chords, and strumming patterns; adding more complex lead sheets and 1st-position chromatics; and building ensemble skills. Guitarists transfer between tablature and standard notation, study the work of significant

musicians, and explore electric guitars, basses, and amplifiers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. | MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Brovide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul> Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li></ul>   |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.   |

| MA.K12.MTR.5.1: | <ul> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems. <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li></ul></li></ul>  |
|-----------------|--|
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br><b>Clarifications:</b><br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.  |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> </ul> Clarifications: Teachers who encourage students to apply mathematics to real-world contexts: <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning. Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
| ELA.K12.EE.3.1: | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
| ELA.K12.EE.4.1: | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
| ELA.K12.EE.5.1: | Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they   |

|                   | must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.   |  |
|-------------------|---|--|
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.  |  |
|                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. |  |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |  |

### VERSION DESCRIPTION

Students with previous experience expand on basic guitar skills and knowledge, adding simple and full-strum chords, barre and power chords, and strumming patterns; adding more complex lead sheets and 1st-position chromatics; and building ensemble skills. Guitarists transfer between tablature and standard notation, study the work of significant musicians, and explore electric guitars, basses, and amplifiers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### **Educator Certifications**

# M/J Guitar 3 (#1301080) 2020 - 2022 (current)

| Name         | Description   |
|--------------|---|
|              | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1: | Clarifications:<br>e.g., listening maps, active listening, checklists   |
| MU.68.C.1.2: | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.  |
|              | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title  |
|              | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.  |
| MU.68.C.2.1: | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm   |
|              | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.   |
| MU.68.C.2.2: | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.C.3.1: | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.   |
|              | Describe several routes a composition or performance could travel from creator to consumer.   |
| MU.68.F.2.1: | Clarifications:<br>e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales  |
|              | Describe how concert attendance can financially impact a community.   |
| MU.68.F.2.2: | Clarifications:<br>e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants  |
|              | Describe how studying music can enhance citizenship, leadership, and global thinking.   |
| MU.68.F.3.1: | Clarifications:<br>e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect   |
| MU.68.F.3.2: | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.  |
| MU.68.H.1.2: | Identify the works of representative composers within a specific style or time period.  |
| MU.68.H.1.3: | Describe how American music has been influenced by other cultures.  |
| MU.68.H.1.4: | Classify authentic stylistic reatures in music originating from various cultures.<br>Clarifications:<br>e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation,<br>aural/oral traditions, drumming patterns  |
| MU.68.H.2.1: | Describe the influence of historical events and periods on music composition and performance.   |
|              | Analyze how technology has changed the way music is created, performed, acquired, and experienced.  |
| MU.68.H.2.2: | Clarifications:<br>e.g., from harpsichord to piano; from phonograph to CD   |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.  |
| MU.68.H.3.1: | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  Clarifications: e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication |
|              | Discuss how the absence of music would affect other content areas and contexts.   |
| MU.68.H.3.2: | Clarifications:<br>e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays  |
|              | Compare performances of a musical work to identify artistic choices made by performers.   |
| MU.68.O.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble   |
|              | Demonstrate knowledge of major and minor tonalities through performance and composition.  |
| MU.68.0.2.2: | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|              | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.  |
| MU.68.0.3.1: | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration   |
| MU.68.0.3.2: | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.   |
| MU.68.S.1.3: | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
|              | Sing or play melodies by ear with support from the teacher and/or peers.  |

| MU.68.S.1.4:      | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice  |
|-------------------|---|
|                   | Perform melodies with chord progressions.   |
| MU.68.S.1.5:      | Clarifications:<br>e.g., keyboard/piano, keyboard/piano and voice, guitar, voice and guitar   |
| MU.68.S.1.6:      | Compose a melody, with or without lyrics, over a standard harmonic progression.   |
|                   | Perform music from memory to demonstrate knowledge of the musical structure.  |
| MU.68.S.2.1:      | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2:      | Transfer performance techniques from familiar to unfamiliar pieces.   |
|                   | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1:      | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                   | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2:      | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                   | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3:      | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|                   | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:      | Clarifications:<br>e.g., error detection, interval reinforcement  |
| MIL 68 S 3 5      | Notate rhythmic phrases and/or melodies, in varying simple maters, performed by someone else  |
| W0.00.3.3.3.      | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:      | Clarifications:   |
|                   | e.g., independently, collaboratively  |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.3.7: | Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.   |
| LAFS.8.SL.1.1:    | <ul> <li>issues, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</li> <li>b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed.</li> <li>c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas.</li> <li>d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.</li> </ul>  |
|                   | Standard Relation to Course: Supporting   |
| LAFS.8.SL.1.2:    | Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.  |
| LAFS.8.SL.1.3:    | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced.   |
| LAFS.8.SL.2.4:    | Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.  |
|                   | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
| MAFS.K12.MP.6.1:  | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
|                   | LOOK FOR AND MAKE USE OF STRUCTURE.   |
|                   | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,  |

|                   | students will see 7 $\times$ 8 equals the well remembered 7 $\times$ 5 + 7 $\times$ 3, in preparation for learning about the distributive property. In the expression $x^2$ |
|-------------------|---|
| MAFS.K12.MP.7.1:  | + 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and                         |
|                   | can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see                         |
|                   | complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x)$                     |
|                   | - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.                    |
|                   | Standard Relation to Course: Supporting   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students with previous experience strengthen their guitar skills and knowledge, reviewing barre and power chords; adding strumming and finger-picking patterns; playing in 5th position; working with major scales; and building ensemble skills. Guitarists expand their tablature and standard-notation reading skills, add to their knowledge of significant musicians, and explore electric guitars, basses, and amplifiers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

| MU.68.H.2.3:  | Classify the literature being studied by genre, style, and/or time period.   |
|               | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1:  | Clarifications:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural<br>connections and traditions, ceremonial music, sales and advertising, communication |
|               | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2:  | Clarifications:<br>e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays   |
|               | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.0.1.1:  | Clarifications:  |
|               | e.g., myrim, nelody, timbre, form, tonaity, narmony, expressive elements; chorai, orchestrai, band, ensemble   |
|               | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.0.2.2:  | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor  |
|               | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU.68.O.3.1:  | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
| MU.68.0.3.2:  | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other expressive elements.  |
| MIL 60 S 1 2. | other musical works.   |
| 10.00.3.1.3.  | Sing or play melodies by ear with support from the teacher and/or peers.   |
|               |  |

| MU.68.S.1.4:    | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice   |
|-----------------|--|
|                 | Perform melodies with chord progressions.  |
| MU.68.S.1.5:    | Clarifications:<br>e.g., keyboard/piano, keyboard/piano and voice, guitar, voice and guitar  |
| MU.68.S.1.6:    | Compose a melody, with or without lyrics, over a standard harmonic progression.  |
|                 | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1:    | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony   |
| MU.68.S.2.2:    | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                 | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:    | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
| MU.68.S.3.2:    | Demonstrate proper vocal or instrumental technique. Clarifications: e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                 | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:    | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|                 | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:    | Clarifications:  |
|                 | e.g., error detection, interval reinforcement  |
| MU.68.S.3.5:    | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.  |
| MIL 69 5 2 6.   |  |
| 10.00.3.3.0.    | e.g., independently, collaboratively   |
|                 | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> |
|                 | Clarifications:         Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:         • Help students make connections between concepts and representations.         • Provide opportunities for students to use manipulatives when investigating concepts.         • Guide students from concrete to pictorial to abstract representations as understanding progresses.         • Show students that various representations can have different purposes and can be useful in different situations.   |
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>   |
|                 | <ul> <li>Provide students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>  |

| MA.K12.MTR.4.1: | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul>   |
|-----------------|---|
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts. <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li></ul> |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br><b>Clarifications:</b><br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts: <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> </ul> </li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency</li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul></li></ul>  |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.  Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1: | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |

| ELA.K12.EE.3.1:   | Make inferences to support comprehension.  |
|-------------------|--|
|                   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.               |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.   |
|                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students with previous experience strengthen their guitar skills and knowledge, reviewing barre and power chords; adding strumming and finger-picking patterns; playing in 5th position; working with major scales; and building ensemble skills. Guitarists expand their tablature and standard-notation reading skills, add to their knowledge of significant musicians, and explore electric guitars, basses, and amplifiers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

Course Number: 1301080

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J GUITAR 3 Course Length: Year (Y) Course Level: 2

Course Status: State Board Approved Grade Level(s): 6,7,8

## **Educator Certifications**

# M/J Exploring Music 1 (#1301090) 2020 - 2022 (current)

| Name           | Description  |
|----------------|--|
|                | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:   | Clarifications:<br>e.g., listening maps, active listening, checklists  |
|                | Compare using correct music vecabulary, the aesthetic impact of a performance to one's own hypothesis of the compaser's intent   |
|                | Obsidiant of a performance to one sown hypothesis of the composer's intent.  |
| MU.68.C.1.2:   | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title  |
|                | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
| MU.68.C.2.1:   | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm  |
|                | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.  |
| MU.68.C.2.2:   | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
| MU.68.C.3.1:   | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
|                | Describe how concert attendance can financially impact a community.  |
| MU.68.F.2.2:   | Clarifications:<br>e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants   |
|                | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1:   | Clarifications:<br>e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect  |
| MIL 68 F 3 2.  | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media  |
| MU.68.H.1.1:   | Describe the functions of music from various cultures and time periods.  |
| MU.68.H.1.2:   | Identify the works of representative composers within a specific style or time period.   |
| MU.68.H.1.3:   | Describe how American music has been influenced by other cultures.   |
|                | Classify authentic stylistic features in music originating from various cultures.  |
| MU.68.H.1.4:   | Clarifications:<br>e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation,<br>aural/oral traditions, drumming patterns  |
|                | Analyze how technology has changed the way music is created, performed, acquired, and experienced.   |
| MU.68.H.2.2:   | Clarifications:<br>e.g., from harpsichord to piano; from phonograph to CD  |
|                | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2:   | Clarifications:<br>e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays   |
|                | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.O.1.1:   | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble  |
|                | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU.68.O.3.1:   | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
|                | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1:   | Clarifications:<br>e.g., blues, rock   |
| MU.68.S.1.3:   | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing,  |
|                | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:   | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|                | Demonstrate proper vocal or instrumental technique   |
| MU.68.S.3.2:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and  |
|                | issues, building on others' ideas and expressing their own clearly.  |
|                | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. |
| LAFS.6.SL.1.1: | b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.  |

|                   | c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion  |
|-------------------|---|
|                   | d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.   |
|                   | Standard Relation to Course: Supporting   |
| LAFS.6.SL.1.2:    | Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.  |
| LAFS.6.SL.1.3:    | Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.  |
| LAFS.6.SL.2.4:    | Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.   |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.3.7: | Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.   |
|                   | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x<br>– y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                   | Standard Relation to Course: Supporting   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students explore the essential elements of 20th- and 21st-century music in America (e.g., jazz, rock, soul, blues) and global cultures (e.g., Latin, Bollywood, European, Asian, world drumming). Students reflect on the significance of social influences and historical events on the development of music. Participants focus on the creation, use, and performance of music; and the modes of listening, distributing, and gaining access to music. Public performances may serve as a resource for specific instructional goals. Students may be expected to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

#### **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12) Elementary Education (Grades K-6) Elementary Education (Elementary Grades 1-6)

# M/J Exploring Music 1 (#1301090) 2022 - And Beyond

| Name                        | Description   |
|-----------------------------|---|
|                             | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1:                | Clarifications:   |
|                             | e.g., listening maps, active listening, checklists  |
|                             | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.  |
| MU 68 C 1 2 <sup>.</sup>    | Clarifications:   |
| 110.00.0.1.2.               | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
|                             | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.  |
| MU.68.C.2.1:                | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm   |
|                             | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.   |
| MU.68.C.2.2:                | Clarifications:   |
|                             | e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
| MU.68.C.3.1:                | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.   |
|                             | Describe how concert attendance can financially impact a community.   |
| MU.68.F.2.2:                | Clarifications:<br>e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants  |
|                             | Describe how studying music can enhance citizenship, leadership, and global thinking.   |
| MU 68 F 3 1                 | Clarifications:   |
| 10.00.1.3.1.                | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect  |
| MII 68 E 2 2                | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media   |
| MU.00.F.3.2.<br>MU.68 H 1 1 | Describe the functions of music from various cultures and time periods  |
| MU 68 H 1 2                 | Identify the works of representative composers within a specific style or time period   |
| MU.68.H.1.3:                | Describe how American music has been influenced by other cultures.  |
|                             | Classify authentic stylistic features in music originating from various cultures.   |
|                             | Clarifications  |
| MU.68.H.1.4:                | e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, aural/oral traditions, drumming patterns |
|                             | Analyze how technology has changed the way music is created, performed, acquired, and experienced.  |
| MU.68.H.2.2:                | Clarifications:<br>e.g., from harpsichord to piano; from phonograph to CD   |
|                             | Discuss how the absence of music would affect other content areas and contexts.   |
| MU.68.H.3.2:                | Clarifications:   |
|                             |   |
|                             | Compare performances of a musical work to identify artistic choices made by performers.   |
| MU.68.O.1.1:                | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble   |
|                             | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.  |
| MU.68.O.3.1:                | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration                               |
|                             | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.   |
| MU.68.S.1.1:                | Clarifications:   |
|                             | e.g., blues, rock   |
| MU.68.S.1.3:                | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
|                             | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1:                | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                             | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2:                | Clarifications:   |
|                             | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                             | Mathematicians who participate in effortful learning both individually and with others:   |
|                             | Analyze the problem in a way that makes sense given the task.   |
|                             | Ask questions that will help with solving the task.   |
|                             | Build perseverance by modifying methods as needed while solving a challenging task.   |
|                             | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>   |

| MA.K12.MTR.1.1: | <ul> <li>Help and support each other when attempting a new method or approach.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul> </li> </ul>   |
|-----------------|--|
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> </ul> |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.     Show students that various representations can have different purposes and can be useful in different situations. Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:  |
|                 | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>   |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.  |
|                 | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
|                 | Mathematicians who assess the reasonableness of solutions: <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> </ul>   |

| MA K12 MTR 6 1                    | <ul> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>  |
|-----------------------------------|--|
|                                   | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.         • Prompt students to continually ask, "Does this solution make sense? How do you know?"         • Reinforce that students check their work as they progress within and after a task.         • Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1:                   | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> </ul> Clarifications: Teachers who encourage students to apply mathematics to real-world contexts: <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation. <ul> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul></li></ul>   |
| ELA.K12.EE.1.1:                   | Cite evidence to explain and justify reasoning.         Clarifications:         K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.         2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.         4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.         6-8 Students continue with previous skills and use a style guide to create a proper citation.         9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. |
| ELA.K12.EE.2.1:                   | Read and comprehend grade-level complex texts proficiently.  Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.3.1:                   | Make inferences to support comprehension.         Clarifications:         Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.  |
| ELA.K12.EE.4.1:                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.          Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
| ELA.K12.EE.5.1:                   | Use the accepted rules governing a specific format to create quality work.<br>Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
| ELA.K12.EE.6.1:                   | Use appropriate voice and tone when speaking or writing.<br>Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.68.S.2.1:<br>ELD.K12.ELL.SI.1: | Sustain focused attention, respect, and discipline during classes and performances.<br>English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students explore the essential elements of 20th- and 21st-century music in America (e.g., jazz, rock, soul, blues) and global cultures (e.g., Latin, Bollywood, European, Asian,

world drumming). Students reflect on the significance of social influences and historical events on the development of music. Participants focus on the creation, use, and performance of music; and the modes of listening, distributing, and gaining access to music. Public performances may serve as a resource for specific instructional goals. Students may be expected to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

## GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1301090

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: General Music > Abbreviated Title: M/J EXPL MUSIC 1 Course Length: Year (Y) Course Level: 2

Course Status: State Board Approved Grade Level(s): 6,7,8

#### **Educator Certifications**

Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12) Elementary Education (Grades K-6) Elementary Education (Elementary Grades 1-6)

# M/J Exploring Music 2 (#1301100) 2020 - 2022 (current)

| Name                     | Description  |
|--------------------------|--|
|                          | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                     |
| MU.68.C.1.2:             | Clarifications:  |
|                          | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                        |
|                          | Identify aurally instrumental styles and a variety of instrumental ensembles   |
| MUL / 0 C 1 2.           |  |
| MU.68.C.1.3:             | Clarifications:  |
|                          | c.g., classical, baroque, komanae, concemporary, jazz, pop, solo, duet, ino, quarter, small ensembles  |
|                          | Identify, aurally, a variety of vocal styles and ensembles.  |
| MU.68.C.1.4:             | Clarifications:  |
|                          | e.g., chant, spiritual, folk, opera, world, jazz, pop, solo, duet, trio, quartet, small ensembles, choirs  |
|                          | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                  |
| MU.68.C.2.2:             | Clarifications:  |
|                          | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.C.3.1:             | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
|                          | Describe several routes a composition or performance could travel from creator to consumer.  |
| MIL 68 E 2 1.            | Clarifications   |
| 10.00.1.2.1.             | e a MIDL and other technology production sharing on the Internet home studios professional recording studios sales                                   |
|                          |  |
|                          | Describe now studying music can ennance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1:             | Clarifications:  |
|                          | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect       |
| MU.68.F.3.2:             | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.     |
| MU.68.H.1.1:             | Describe the functions of music from various cultures and time periods.  |
| MU.68.H.1.2:             | Identify the works of representative composers within a specific style or time period.   |
| MU.68.H.1.3:             | Describe how American music has been influenced by other cultures.   |
|                          | Classify authentic stylistic features in music originating from various cultures.  |
| MII 60 Ц 1 Л.            | Clarifications:  |
| 10.00.11.1.4.            | e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, |
|                          | aural/oral traditions, drumming patterns   |
| MU.68.H.2.1:             | Describe the influence of historical events and periods on music composition and performance.  |
| MU.68.H.2.3:             | Classify the literature being studied by genre, style, and/or time period.   |
|                          | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.                                    |
|                          | Clarifications:  |
| MU.68.H.3.1:             | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural            |
|                          | connections and traditions, ceremonial music, sales and advertising, communication   |
|                          | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU 68 O 1 1 <sup>.</sup> | Clarifications   |
|                          | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble                                       |
|                          | Describe how the combination of instrumentation and expressive elements in a musical work can canvou a specific theught idea, more and/as image      |
|                          | Describe now the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image    |
| MU.68.0.3.1:             | Clarifications:  |
|                          | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration         |
|                          | Compose a short musical piece.   |
| MU.68.S.1.2:             | Clarifications:  |
|                          | e.g., using traditional, non-traditional, digital, or classroom instruments and/or voice   |
| MU.68.S.1.3:             | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|                          | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1:             | Clarifications:  |
|                          | e.g., basic themes, patterns, tonality, melody, harmony  |
|                          | Sing and/or play ago appropriate reportaire avprosciuoly   |
| MU.68.S.3.1:             |  |
|                          | Clarifications:  |
|                          | e.g., technique, prirasing, dynamics, tone quality, blend, balance, intonation, kinestnetic support/response   |
|                          | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:             | Clarifications:  |
|                          | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                          | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU 68 S 3 4·             | Clarifications:  |
|                          |  |

|                   | e.g., error detection, interval reinforcement   |
|-------------------|---|
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.3.7: | Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.   |
| LAFS.7.SL.1.1:    | <ul> <li>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</li> <li>b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed.</li> <li>c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed.</li> <li>d. Acknowledge new information expressed by others and, when warranted, modify their own views.</li> </ul>  |
|                   | Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas   |
| LAFS.7.SL.1.2:    | clarify a topic, text, or issue under study.  |
| LAFS.7.SL.1.3:    | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.  |
| LAFS.7.SL.2.4:    | Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use<br>appropriate eye contact, adequate volume, and clear pronunciation.  |
|                   | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x<br>- y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students survey the growth of American music from its early years to 21st-century consumers, focusing on the settling of the nation and the effects of emigration. Learners explore the historical connections, cultural influences, and innovations of music development from the perspective of Native American music and that which was brought to American shores from other nations. Public performances may serve as a resource for specific instructional goals. Students may be expected to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

Course Number: 1301100

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: General Music > Abbreviated Title: M/J EXPL MUSIC 2 Course Length: Year (Y) Course Level: 2

Course Status: Course Approved Grade Level(s): 6,7,8

#### **Educator Certifications**

# M/J Exploring Music 2 (#1301100) 2022 - And Beyond

| Name                     | Description  |
|--------------------------|--|
|                          | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                     |
| MU.68.C.1.2:             | Clarifications:  |
|                          | e.g., guality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                        |
|                          |  |
| MU.68.C.1.3:             | identify, auraliy, instrumental styles and a variety of instrumental ensembles.  |
|                          | Clarifications:  |
|                          | e.g., Classical, Baroque, Romantic, contemporary, jazz, pop, solo, duet, trio, quartet, small ensembles  |
|                          | Identify, aurally, a variety of vocal styles and ensembles.  |
| MU.68.C.1.4:             | Clarifications:  |
|                          | e.g., chant, spiritual, folk, opera, world, jazz, pop, solo, duet, trio, quartet, small ensembles, choirs  |
|                          | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                  |
| MUL ( 0 C D D.           |  |
| MU.68.C.2.2:             | ciarifications:  |
|                          | e.g., biend, balance, ensemble playing, sononty, technique, tone quality   |
| MU.68.C.3.1:             | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
|                          | Describe several routes a composition or performance could travel from creator to consumer.  |
| MU.68.F.2.1:             | Clarifications:  |
|                          | e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales                            |
|                          | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MIL 68 E 3 1.            |  |
| 10.00.1 .3.1.            | e.g. dedication to mastering a task problem-solving self-discipline dependability ability to organize cultural awareness mutual respect              |
|                          |  |
| MU.68.F.3.2:             | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.     |
| MU.68.H.1.1:             | Describe the functions of music from various cultures and time periods.  |
| MU.68.H.1.2:             | Identify the works of representative composers within a specific style or time period.   |
| MU.68.H.1.3:             | Describe how American music has been influenced by other cultures.   |
|                          | Classify authentic stylistic features in music originating from various cultures.  |
| MU.68.H.1.4:             | Clarifications:  |
|                          | e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, |
|                          | aural/oral traditions, drumming patterns   |
| MU.68.H.2.1:             | Describe the influence of historical events and periods on music composition and performance.  |
| MU.68.H.2.3:             | Classify the literature being studied by genre, style, and/or time period.   |
|                          | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.                                    |
| MIL (011-2-1.            | Clarifications:  |
| WU.08.H.3.1:             | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural            |
|                          | connections and traditions, ceremonial music, sales and advertising, communication   |
|                          | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU 68 O 1 1 <sup>.</sup> | Clarifications:  |
|                          | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble                                       |
|                          | Describe her the combination of instrumentation and currencely elements in a musical work can convey a propidic the right idea mand and/or image     |
| MU.68.O.3.1:             | Describe now the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image    |
|                          | Clarifications:  |
|                          | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration         |
| MU.68.S.1.2:             | Compose a short musical piece.   |
|                          | Clarifications:  |
|                          | e.g., using traditional, non-traditional, digital, or classroom instruments and/or voice   |
| MU.68.S.1.3:             | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing,  |
|                          | Perform music from memory to demonstrate knowledge of the musical structure.   |
|                          | Clarifications   |
| IVIU.00.3.2.1.           | e a basic themes natterns tonality melody barmony  |
|                          |  |
| MU.68.S.3.1:             | Sing and/or play age-appropriate repertoire expressively.  |
|                          | Clarifications:  |
|                          | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                          | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:             | Clarifications:  |
|                          | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                          | Compare written notation to aural examples and analyze for accuracy of rhythm and nitch  |
|                          |  |
| MU.68.S.3.4:             | Clarifications:  |
|                 | e.g., error detection, interval reinforcement  |  |
|-----------------|--|--|
|                 | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>   |  |
| MA.K12.MTR.1.1: | Clarifications:<br>Teachers who encourage students to participate actively in effortful learning both individually and with others:<br>• Cultivate a community of growth mindset learners.<br>• Foster perseverance in students by choosing tasks that are challenging.<br>• Develop students' ability to analyze and problem solve.<br>• Recognize students' effort when solving challenging problems.  |  |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.</li></ul>  |  |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>Select efficient and appropriate methods for solving problems within the given context.<br>Maintain flexibility and accuracy while performing procedures and mental calculations.<br>Complete tasks accurately and with confidence.<br>Adapt procedures to apply them to a new context.<br>Use feedback to improve efficiency when performing calculations.<br>Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:<br>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>Offer multiple opportunities for students to practice efficient and generalizable methods.<br>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> </li> </ul> |  |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br><b>Clarifications:</b><br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.  |  |

| MA.K12.MTR.6.1:                   | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:   |
|-----------------------------------|---|
|                                   | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>  |
|                                   | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.   |
|                                   | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
|                                   | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>   |
| MA.K12.MTR.7.1:                   | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.         • Indicate how various concepts can be applied to other disciplines.   |
|                                   | Cite evidence to explain and justify reasoning.   |
|                                   | <ul> <li>Clarifications:</li> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> </ul> |
| ELA.K12.EE.1.1:                   | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|                                   | <ul><li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li><li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li></ul>   |
|                                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:                   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:                   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:                   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
| ELA.K12.EE.5.1:                   | Use the accepted rules governing a specific format to create quality work.  |
|                                   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.68.S.2.1:<br>ELD.K12.ELL.SI.1: | Sustain focused attention, respect, and discipline during classes and performances.<br>English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

Students survey the growth of American music from its early years to 21st-century consumers, focusing on the settling of the nation and the effects of emigration. Learners explore the historical connections, cultural influences, and innovations of music development from the perspective of Native American music and that which was brought to American shores from other nations. Public performances may serve as a resource for specific instructional goals. Students may be expected to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

**GENERAL NOTES** 

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# M/J Exploring Music 3 (#1301110) 2020 - 2022 (current)

| Name   | Description  |  |
|--|--|--|
|  | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |  |
| MU.68.C.1.2:   | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |  |
|  | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.  |  |
| MU.68.C.2.2:   | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |  |
| MU.68.C.2.3:   | Critique personal composition and/or improvisation, using simple criteria, to generate improvements with guidance from teachers and/or peers.  |  |
| MU.68.C.3.1:   | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |  |
| MU.68.F.1.1:   | Create a composition and/or performance, using visual, kinesthetic, digital, and/or acoustic means to manipulate musical elements.   |  |
|  | Create an original composition that reflects various performances that use "traditional" and contemporary technologies.  |  |
| MU.68.F.1.2:   | Clarifications:<br>e.g., MIDI, Internet video resources, personal digital assistants, MP3 players, cell phones, digital recording, music software  |  |
|  | Describe several routes a composition or performance could travel from creator to consumer.  |  |
| MU.68.F.2.1:   | Clarifications:<br>e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales   |  |
| MU.68.F.3.2:   | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |  |
|  | Identify the tasks involved in the compositional process and discuss how the process might be applied in the work place.   |  |
| MU.68.F.3.3:   | Clarifications:<br>e.g., idea, development, editing, selling, revising, testing, presenting  |  |
| MU.68.H.1.1:   | Describe the functions of music from various cultures and time periods.  |  |
| MU.68.H.1.2:   | Identify the works of representative composers within a specific style or time period.   |  |
|  | Classify authentic stylistic features in music originating from various cultures.  |  |
| MU.68.H.1.4:   | Clarifications:<br>e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation,<br>aural/oral traditions, drumming patterns                                |  |
| MU.68.H.1.5:   | Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.  |  |
| MU.68.H.2.1:   | Describe the influence of historical events and periods on music composition and performance.  |  |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.   |  |
|  | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |  |
| MU.68.H.3.1:   | Clarifications:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural<br>connections and traditions, ceremonial music, sales and advertising, communication |  |
|  | Compare performances of a musical work to identify artistic choices made by performers.  |  |
| MU.68.0.1.1: Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble |  |  |
|  | Create a composition, manipulating musical elements and exploring the effects of those manipulations.  |  |
| MU.68.0.2.1:   | Clarifications:<br>e.g., using electronic or paper-and-pencil means to experiment with timbre, melody, rhythm, harmony, form, tonality   |  |
|  | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |  |
| MU.68.0.3.1:   | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |  |
|  | Compose a short musical piece.   |  |
| MU.68.S.1.2:   | Clarifications:<br>e.g., using traditional, non-traditional, digital, or classroom instruments and/or voice  |  |
| MU.68.S.1.3:   | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |  |
|  | Sing or play melodies by ear with support from the teacher and/or peers.   |  |
| MU.68.S.1.4:   | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice   |  |
|  | Perform music from memory to demonstrate knowledge of the musical structure.   |  |
| MU.68.S.2.1:   | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony   |  |
|  | Sing and/or play age-appropriate repertoire expressively.  |  |
| MU.68.S.3.1:   | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |  |

|                      | Demonstrate proper vocal or instrumental technique.  |  |
|----------------------|--|--|
| MU.68.S.3.2:         | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |  |
|                      | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |  |
| MU.68.S.3.4:         | Clarifications:<br>e.g., error detection, interval reinforcement   |  |
| LAFS.68.RST.2.4:     | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.   |  |
| LAFS.68.WHST.3.7:    | Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.  |  |
| LAFS.8.SL.1.1:       | <ul> <li>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or researched material under study: explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</li> <li>b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed.</li> <li>c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas.</li> <li>d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.</li> </ul>   |  |
| LAFS.8.SL.1.2:       | Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.   |  |
| LAFS.8.SL.1.3:       | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced.  |  |
| LAFS.8.SL.2.4:       | Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.   |  |
| MAFS.K12.MP.5.1:     | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. |  |
| Attend to precision. |  |  |
| MAFS.K12.MP.6.1:     | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |  |
|                      | Standard Relation to Course: Supporting<br>Look for and make use of structure.   |  |
| MAFS.K12.MP.7.1:     | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |  |
|                      | Standard Relation to Course: Supporting  |  |
| DA.68.S.2.1:         | Sustain focused attention, respect, and discipline during classes and performances.  |  |
| LLD.N12.LLL.JI.I.    | English language loamers communicate for social and instructional parposes within the school setting.  |  |

# VERSION DESCRIPTION

Students engage in a study of global music traditions through history examining genres, significant composers, and compositions over time. As they review the expressive elements of music and compositional tools, students create music, develop structural mapping skills, self-assess, and connect music to its origins. Public performances may serve as a resource for specific instructional goals. Students may be expected to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

# **GENERAL NOTES**

## English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|                |  |  |
| MU.68.5.1.3:   | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |  |
|                | Sing or play melodies by ear with support from the teacher and/or peers.   |  |
| MU.68.S.1.4:   | Clarifications:  |  |
|                | e.g., melodies using traditional classroom instruments and/or voice  |  |
|                | Perform music from memory to demonstrate knowledge of the musical structure.   |  |
| MU.68.S.2.1:   | Clarifications:  |  |
|                | e.g., basic themes, patterns, tonality, melody, harmony  |  |
|                | Sing and/or play age-appropriate repertoire expressively.  |  |
| MU.68.S.3.1:   | Clarifications:  |  |
|                | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |  |
|                |  |  |

|  | Demonstrate proper vocal or instrumental technique.   |  |  |
|--|---|--|--|
| MU.68.S.3.2:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |  |  |
| Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. |   |  |  |
| MU.68.S.3.4:   | Clarifications:   |  |  |
|  | Mathematicians who narticinate in effortful learning both individually and with others:   |  |  |
|  | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> </ul>   |  |  |
|  | Ask questions that will help with solving the task.   |  |  |
|  | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>  |  |  |
|  | <ul> <li>Help and support each other when attempting a new method or approach.</li> </ul>   |  |  |
| MA.K12.MTR.1.1:  | Clarifications:   |  |  |
|  | Teachers who encourage students to participate actively in effortful learning both individually and with others:  |  |  |
|  | <ul><li>Foster perseverance in students by choosing tasks that are challenging.</li></ul>   |  |  |
|  | Develop students' ability to analyze and problem solve.   |  |  |
|  | Recognize students' effort when solving challenging problems.   |  |  |
|  | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:   |  |  |
|  | Build understanding through modeling and using manipulatives.   |  |  |
|  | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.   |  |  |
|  | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> </ul>   |  |  |
| MA.K12.MTR.2.1:  | Choose a representation based on the given context or purpose.  |  |  |
|  | Clarifications:   |  |  |
|  | <ul> <li>Help students make connections between concepts and representations.</li> </ul>  |  |  |
|  | Provide opportunities for students to use manipulatives when investigating concepts.  |  |  |
|  | Guide students from concrete to pictorial to abstract representations as understanding progresses.  |  |  |
|  | Show students that various representations can have different purposes and can be useful in different situations.   |  |  |
|  | Mathematicians who complete tasks with mathematical fluency:  |  |  |
|  | Select efficient and appropriate methods for solving problems within the given context.   |  |  |
|  | Maintain flexibility and accuracy while performing procedures and mental calculations.  |  |  |
|  | <ul> <li>Adapt procedures to apply them to a new context.</li> </ul>  |  |  |
| MA.K12.MTR.3.1:  | Use feedback to improve efficiency when performing calculations.  |  |  |
|  | Clarifications:   |  |  |
|  | <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> </ul>  |  |  |
|  | Offer multiple opportunities for students to practice efficient and generalizable methods.  |  |  |
|  | Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |  |  |
|  | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |  |  |
|  | Communicate mathematical ideas, vocabulary and methods effectively.   |  |  |
|  | Analyze the mathematical thinking of others.  |  |  |
|  | <ul> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> </ul>   |  |  |
| MA.K12.MTR.4.1:  | Justify results by explaining methods and processes.  |  |  |
|  | Construct possible arguments based on evidence.   |  |  |
|  | Clarifications:<br>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:   |  |  |
|  | • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.   |  |  |
|  | <ul> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select sequence and present student work to advance and deepen understanding of correct and increasingly officient methods.</li> </ul>                                  |  |  |
|  | <ul> <li>Select, sequence and present student work to advance and deepen understanding of confect and increasingly encient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |  |  |
|  | Use patterns and structure to help understand and connect mathematical concepts.  |  |  |
|  | Encus on relevant details within a problem  |  |  |
|  | <ul> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> </ul>  |  |  |
|  | Decompose a complex problem into manageable parts.  |  |  |
|  | <ul> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems</li> </ul>   |  |  |
| MA.K12.MTR.5.1:  | Connect solutions of problems to more complicated large-scale situations.   |  |  |
| 1  |   |  |  |

|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul> |  |
|-----------------|--|--|
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |  |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |  |
|                 | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.         • Prompt students to continually ask, "Does this solution make sense? How do you know?"         • Reinforce that students check their work as they progress within and after a task.         • Strengthen students' ability to verify solutions through justifications.   |  |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |  |
|                 | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Deferm investigations to active data and data minerial is a method is appropriate a Dedesian medals and methods to improve accuracy or officiance.</li> </ul>  |  |
| MA.K12.MTR.7.1: | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |  |
|                 | Cite evidence to explain and justify reasoning.  |  |
|                 | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.  |  |
| ELA.K12.EE.1.1: | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |  |
|                 | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |  |
|                 | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |  |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently.  Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric   |  |
|                 | Make inferences to support comprehension.  |  |
| ELA.K12.EE.3.1: | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |  |
|                 | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |  |
| ELA.K12.EE.4.1: | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |  |
|                 | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |  |
|                 | Use the accepted rules governing a specific format to create quality work.   |  |
| ELA.K12.EE.5.1: | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |  |
|                 | Use appropriate voice and tone when speaking or writing.   |  |
| ELA.K12.EE.6.1: | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends  |  |

|                   | differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss te |  |
|-------------------|--|--|
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.  |  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.                                     |  |

## VERSION DESCRIPTION

Students engage in a study of global music traditions through history examining genres, significant composers, and compositions over time. As they review the expressive elements of music and compositional tools, students create music, develop structural mapping skills, self-assess, and connect music to its origins. Public performances may serve as a resource for specific instructional goals. Students may be expected to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

## **GENERAL NOTES**

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

# M/J Band 1 (#1302000) 2020 - 2022 (current)

| Name   | Description  |  |
|--|--|--|
|  | Develop strategies for listening to unfamiliar musical works.  |  |
| MU.68.C.1.1:   | Clarifications:  |  |
|  | e.g., listening maps, active listening, checklists   |  |
|  | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |  |
| MU.68.C.2.1:   | Clarifications:  |  |
|  | e.g., intonation, balance, blend, phrasing, rhythm   |  |
|  | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.  |  |
| MU 68 C 2 2  | Clarifications:  |  |
|  | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |  |
| MU 68 F 3 2 <sup>.</sup>   | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media  |  |
| MU.68.H.1.2:   | Identify the works of representative composers within a specific style or time period.   |  |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.   |  |
|  | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |  |
|  | Clarifications:  |  |
| MU.68.H.3.1:   | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural  |  |
|  | connections and traditions, ceremonial music, sales and advertising, communication   |  |
|  | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |  |
| MU.68.0.3.1:   | Clarifications:  |  |
|  | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration   |  |
| MIL 40 O 2 2.  | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to   |  |
| MU.00.U.3.2.   | other musical works.   |  |
|  | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |  |
| MU.68.S.1.1:   | Clarifications:  |  |
|  | e.g., blues, rock  |  |
| MU.68.S.1.3: Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing. |  |  |
|  | Sing or play melodies by ear with support from the teacher and/or peers.   |  |
| MU.68.S.1.4:   | Clarifications:  |  |
|  | e.g., melodies using traditional classroom instruments and/or voice  |  |
| MU.68.S.2.2:   | Transfer performance techniques from familiar to unfamiliar pieces.  |  |
|  | Sing and/or play age-appropriate repertoire expressively.  |  |
| MU.68.S.3.1:   | Clarifications:  |  |
|  | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |  |
|  | Demonstrate proper vocal or instrumental technique.  |  |
| MU.68.S.3.2:   | Clarifications:  |  |
|  | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |  |
|  | Sight-read standard exercises and simple repertoire.   |  |
| MU.68.S.3.3:   | Clarifications:  |  |
|  | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |  |
|  | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |  |
| MU.68.S.3.4:   | Clarifications:  |  |
|  | e.g., error detection, interval reinforcement  |  |
|  | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.   |  |
| MU.68.S.3.6:   | Clarifications:  |  |
|  | e.g., independently, collaboratively   |  |
|  | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and  |  |
|  | issues, building on others' ideas and expressing their own clearly.  |  |
|  | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic,  |  |
| LAFS.6.SL.1.1:   | text, or issue to probe and reflect on ideas under discussion.   |  |
|  | <ul> <li>b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.</li> <li>C. Pese and respond to specific guestions with elaboration and detail by making commonts that contribute to the topic, text, or issue under</li> </ul> |  |
|  | <ul> <li>c. i use and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under<br/>discussion</li> </ul>  |  |
|  | d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.  |  |
|  |  |  |
|  | Standard Relation to Course: Supporting  |  |
| LAFS.6.SL.1.2:   | issue under study.   |  |
|  |  |  |

| LAFS.6.SL.1.3:    | Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.  |
|-------------------|---|
| LAFS.6.SL.2.4:    | Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.   |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.  |
|                   | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
|                   | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                   | Standard Relation to Course: Supporting   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students with little or no instrumental experience develop foundational instrumental technique, foundational music literacy, and aesthetic musical awareness through rehearsal, performance, and study of high-quality band literature. Instrumentalists work on the fundamentals of music notation, sound production, instrument care and maintenance, and personal and group rehearsal strategies. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

# GENERAL NOTES

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|                 | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:    | Clarifications:   |
|                 | e.g., error detection, interval reinforcement   |
|                 | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:    | Clarifications:   |
|                 | e.g., independently, collaboratively  |
| MA.K12.MTR.1.1: | Mathematicians who participate in effortful learning both individually and with others:   |
|                 | Analyze the problem in a way that makes sense given the task.   |
|                 | <ul> <li>Ask questions that will help with solving the task.</li> </ul>   |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.   |
|                 | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>   |
|                 | <ul> <li>Help and support each other when attempting a new method or approach.</li> </ul>   |
|                 | Clarifications:   |
|                 | l eachers who encourage students to participate actively in effortful learning both individually and with others:                                 |
|                 | Cultivate a community of growth minuset learners.     Factor perseverance in students by choosing tasks that are challenging                      |
|                 | <ul> <li>Develop students' ability to analyze and problem solve</li> </ul>  |
|                 | bevelop statents ubinty to analyze and problem solve.   |

|                 | Recognize students' effort when solving challenging problems.  |
|-----------------|--|
|                 | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
| MA.K12.MTR.2.1: | <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>  |
|                 | Clarifications:         Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:         Help students make connections between concepts and representations.         Provide opportunities for students to use manipulatives when investigating concepts.         Guide students from concrete to pictorial to abstract representations as understanding progresses.         Show students that various representations can have different purposes and can be useful in different situations.   |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:  |
| MA.K12.MTR.3.1: | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>  |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  |
| MA.K12.MTR.4.1: | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>  |
|                 | Clarifications:         Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:         • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.         • Create opportunities for students to discuss their thinking with peers.         • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.         • Develop students' ability to justify methods and compare their responses to the responses of their peers.        |
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
| MA.K12.MTR.5.1: | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul> |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
|                 | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"  |

|                   | <ul> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
|-------------------|---|
|                   | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
|                   | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>   |
| MA.K12.MTR.7.1:   | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.         • Indicate how various concepts can be applied to other disciplines.                                     |
|                   | Cite evidence to explain and justify reasoning.   |
|                   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students with little or no instrumental experience develop foundational instrumental technique, foundational music literacy, and aesthetic musical awareness through rehearsal, performance, and study of high-quality band literature. Instrumentalists work on the fundamentals of music notation, sound production, instrument care and maintenance, and personal and group rehearsal strategies. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

Course Number: 1302000

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J BAND 1 Course Length: Year (Y) Course Level: 2

Course Status: State Board Approved Grade Level(s): 6,7,8

### **Educator Certifications**

Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

# M/J Band 2 (#1302010) 2020 - 2022 (current)

| Name         | Description  |
|--------------|--|
|              | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1: | Clarifications:<br>e.g., listening maps, active listening, checklists  |
|              | Identify, aurally, instrumental styles and a variety of instrumental ensembles.  |
| MU.68.C.1.3: | Clarifications:<br>e.g., Classical, Baroque, Romantic, contemporary, jazz, pop, solo, duet, trio, quartet, small ensembles   |
|              | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
| MU.68.C.2.1: | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm  |
|              | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.  |
| MU.68.C.2.2: | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
| MU.68.C.2.3: | Critique personal composition and/or improvisation, using simple criteria, to generate improvements with guidance from teachers and/or peers.  |
| MU.68.F.3.2: | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
| MU.68.H.1.2: | Identify the works of representative composers within a specific style or time period.   |
| MU.68.H.1.3: | Describe how American music has been influenced by other cultures.   |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.   |
|              | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1: | Clarifications:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural<br>connections and traditions, ceremonial music, sales and advertising, communication |
|              | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU.68.O.3.1: | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
| MU.68.0.3.2: | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.  |
|              | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1: | Clarifications:<br>e.g., blues, rock   |
| MU.68.S.1.3: | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|              | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4: | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice   |
|              | Perform melodies with chord progressions.  |
| MU.68.S.1.5: | Clarifications:<br>e.g., keyboard/piano, keyboard/piano and voice, guitar, voice and guitar  |
|              | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1: | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony   |
| MU.68.S.2.2: | Transfer performance techniques from familiar to unfamiliar pieces.  |
|              | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1: | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|              | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2: | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|              | Sight-read standard exercises and simple repertoire  |
| MU.68.S.3.3: | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|              | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4: | Clarifications:<br>e.g., error detection, interval reinforcement   |
| MU.68.S.3.5: | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.  |
|              | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.   |

| MU.68.S.3.6:      | Clarifications:   |
|-------------------|---|
| LAFS.6.SL.1.1:    | <ul> <li>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</li> <li>b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.</li> <li>c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion.</li> <li>d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.</li> </ul>  |
|                   | Standard Relation to Course: Supporting   |
| LAFS.6.SL.1.2:    | Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.  |
| LAFS.6.SL.1.3:    | Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.  |
| LAFS.6.SL.2.4:    | Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.   |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.  |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
| MAFS.K12.MP.6.1:  | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. Standard Relation to Course: Supporting   |
|                   | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
| DA 68 S 2 1.      | Sustain focused attention, respect, and discipling during classes and performances  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students with previous band experience build on instrumental technique, music literacy, and aesthetic response through rehearsal, performance, and study of a variety of highquality band literature. Instrumentalists expand their knowledge of music notation, music theory, sound production, and personal and group rehearsal strategies. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level

words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# M/J Band 2 (#1302010) 2022 - And Beyond

| Name           | Description  |
|----------------|--|
|                | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:   | Clarifications:  |
|                | e.g., listening maps, active listening, checklists   |
|                | Identify aurally instrumental styles and a variety of instrumental ensembles   |
|                |  |
| MU.68.C.1.3:   | Clarifications:<br>e.g., Classical, Baroque, Romantic, contemporary, jazz, pop, solo, duet, trio, quartet, small ensembles   |
|                | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
| MU.68.C.2.1:   | Clarifications:  |
|                | e.g., intonation, balance, blend, phrasing, rhythm   |
|                | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.  |
| MU.68.C.2.2:   | Clarifications:  |
|                | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.C.2.3:   | Critique personal composition and/or improvisation, using simple criteria, to generate improvements with guidance from teachers and/or peers.  |
| MU.68.F.3.2:   | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
| MU.68.H.1.2:   | Identify the works of representative composers within a specific style or time period.   |
| MU.68.H.1.3:   | Describe how American music has been influenced by other cultures.   |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.   |
|                | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU 68 H 3 1    | Clarifications:  |
|                | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication |
|                | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU 68 O 3 1    | Clarifications:  |
|                | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration   |
|                | Deferm the supressive elements of a musical work indicated by the musical space and for conductor, and transfer new local data and superiors are to  |
| MU.68.0.3.2:   | other musical works.   |
|                | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1:   | Clarifications:  |
|                | e.g., blues, rock  |
| MU.68.S.1.3:   | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|                | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:   | Clarifications:  |
|                | e.g., melodies using traditional classroom instruments and/or voice  |
|                | Perform meladies with chard progressions   |
| MIL 40 S 1 E.  |  |
| IVIU.00.3.1.5. | e.g. keyboard/piano keyboard/piano and voice guitar, voice and guitar  |
|                |  |
|                | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1:   | Clarifications:  |
|                | e.g., basic themes, patterns, tonaiity, melody, narmony  |
| MU.68.S.2.2:   | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:   | Clarifications:  |
|                | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:   | Clarifications:  |
|                | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:   | Clarifications:  |
|                | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|                | Compare written notation to aural examples and analyze for accuracy of rhythm and nitch  |
| MIL 69 S 2 4.  |  |
| IVIU.00.5.3.4: | e.g., error detection, interval reinforcement  |
|                |  |
| MU.68.S.3.5:   | Notate mythinic phrases and/or melodies, in varying simple meters, performed by someone else.  |
|                | Develop and demonstrate emolent renearcal strategies to apply skins and techniques.  |

| MU.68.S.3.6:    | Clarifications:<br>e.g., independently, collaboratively  |
|-----------------|--|
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others: <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> </li> <li>Clarifications: <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> </ul> </li> </ul>   |
|                 | Recognize students' effort when solving challenging problems.  |
| MA.K12.MTR.2.1: | <ul> <li>Definition of the standard by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> </ul> </li> </ul></li></ul>  |
|                 | <ul><li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li><li>Show students that various representations can have different purposes and can be useful in different situations.</li></ul>   |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>Select efficient and appropriate methods for solving problems within the given context.<br>Maintain flexibility and accuracy while performing procedures and mental calculations.<br>Complete tasks accurately and with confidence.<br>Adapt procedures to apply them to a new context.<br>Use feedback to improve efficiency when performing calculations.<br>Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:<br>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>Offer multiple opportunities for students to practice efficient and generalizable methods.<br>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br><b>Clarifications:</b><br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.  |

|                   | • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
|-------------------|--|
|                   | Assess the reasonableness of solutions.  |
| MA.K12.MTR.6.1:   | Mathematicians who assess the reasonableness of solutions:   |
|                   | Estimate to discover possible solutions.   |
|                   | Use benchmark quantities to determine if a solution makes sense.   |
|                   | Check calculations when solving problems.     Verify possible solutions by explaining the methods used   |
|                   | Verify possible solutions by explaining the methods used.     Evaluate results based on the given context  |
|                   |  |
|                   | Teachers who encourage students to assess the reasonableness of solutions:   |
|                   | Have students estimate or predict solutions prior to solving.  |
|                   | <ul> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> </ul>  |
|                   | <ul> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to varify colutions through justifications.</li> </ul>   |
|                   | Strengthen students ability to verify solutions through justifications.  |
|                   | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |
|                   | Connect mathematical concents to everyday experiences  |
|                   | <ul> <li>Use models and methods to understand, represent and solve problems.</li> </ul>  |
|                   | • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency   |
| MA.K12.MTR.7.1:   | Clarifications:  |
|                   | Teachers who encourage students to apply mathematics to real-world contexts:   |
|                   | <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to group of their group of the group</li></ul> |
|                   | <ul> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> </ul>  |
|                   | <ul> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
|                   | Cite evidence to explain and justify reasoning.  |
|                   | Clarifications:  |
|                   | K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details   |
|                   | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.  |
|                   | In 3rd grade, students should use a combination of direct and indirect citations.  |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly  |
|                   | quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide   |
|                   | referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                   | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:   | Clarifications:  |
|                   | See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.  |
|                   | Clarifications:  |
| ELA.K12.EE.3.1:   | Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and  |
|                   | beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
|                   | Clarifications:  |
| ELA.K12.EE.4.1:   | In kindergarten, students learn to listen to one another respectfully.   |
|                   | In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations   |
|                   | In grades 2.12, students engage is conductione discussions along and welfing their responding refining and explains skills.  |
|                   | build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
| ELA.K12.EE.5.1:   |  |
|                   | Use the accepted rules governing a specific format to create quality work.   |
|                   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they   |
|                   | must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to   |
|                   | do quality work.   |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.   |
|                   | Clarifications:  |
|                   | In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and bevond, students practice appropriate social and academic language to discuss texts   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

Students with previous band experience build on instrumental technique, music literacy, and aesthetic response through rehearsal, performance, and study of a variety of highquality band literature. Instrumentalists expand their knowledge of music notation, music theory, sound production, and personal and group rehearsal strategies. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

# **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

Course Number: 1302010

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J BAND 2 Course Length: Year (Y) Course Level: 2

Course Status: State Board Approved Grade Level(s): 6,7,8

## **Educator Certifications**

| Music (Elementary and Secondary Grades K-12)              |
|---|
| nstrumental Music (Secondary Grades 7-12)                 |
| Instrumental Music (Elementary and Secondary Grades K-12) |

# M/J Band 3 (#1302020) 2020 - 2022 (current)

| Name           | Description  |
|----------------|--|
| MU.68.C.1.1:   | Develop strategies for listening to unfamiliar musical works.  |
|                | Clarifications:  |
|                | e.g., listening maps, active listening, checklists   |
|                | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |
| MU.68.C.1.2:   | Clarifications   |
|                | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title  |
|                | Identify, aurally, instrumental styles and a variety of instrumental ensembles.  |
| MU.68.C.1.3:   | Clarifications:<br>e.g., Classical, Baroque, Romantic, contemporary, jazz, pop, solo, duet, trio, quartet, small ensembles   |
|                | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
| MU.68.C.2.1:   | Clarifications:  |
|                | Critique, using correct music vectobulary, changes in one's own or others' musical performance resulting from practice or rehearcal  |
|                | chuque, using correct music vocabulary, changes in one's own or others musical performance resulting from practice or renearsal.   |
| MU.68.C.2.2:   | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
| MU.68.C.2.3:   | Critique personal composition and/or improvisation, using simple criteria, to generate improvements with guidance from teachers and/or peers.  |
| MU.68.C.3.1:   | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
|                | Describe how concert attendance can financially impact a community.  |
| MU.68.F.2.2:   | Clarifications:<br>e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants   |
|                | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1:   | Clarifications:  |
|                | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect   |
| MU.68.F.3.2:   | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
| MU.68.H.1.1:   | Describe the functions of music from various cultures and time periods.  |
| MU.68.H.1.2:   | Identify the works of representative composers within a specific style or time period.   |
|                | Classify authentic stylistic features in music originating from various cultures.  |
| MU.68.H.1.4:   | Clarifications:<br>e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation,<br>aural/oral traditions, drumming patterns                                |
|                | Analyze how technology has changed the way music is created, performed, acquired, and experienced.   |
| MU.68.H.2.2:   | Clarifications:  |
|                | e.g., from harpsichord to piano; from phonograph to CD   |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.   |
|                | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1:   | Clarifications:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural<br>connections and traditions, ceremonial music, sales and advertising, communication |
|                | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2:   | Clarifications:<br>e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays   |
|                | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.0.1.1:   | Clarifications:  |
|                | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble   |
| MU.68.0.2.2:   | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
|                | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor  |
| MU.68.O.3.1:   | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
|                | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
|                | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to   |
| MU.68.0.3.2:   | other musical works.   |
|                |  |
| IVIU.08.5.1.1: | cianications.  |

|                   | e.g., blues, rock   |
|-------------------|---|
| MU.68.S.1.3:      | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
|                   | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4:      | Clarifications:   |
|                   | e.g., melodies using traditional classroom instruments and/or voice   |
|                   | Perform music from memory to demonstrate knowledge of the musical structure.  |
| MU.68.S.2.1:      | Clarifications:   |
|                   | e.g., basic memes, patterns, tonality, melody, narmony  |
| MU.68.S.2.2:      | Transfer performance techniques from familiar to unfamiliar pieces.   |
|                   | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.5.3.1:      | Clarifications:   |
|                   |   |
|                   |   |
| MU.68.5.3.2:      | Clarifications:   |
|                   | Cight read standard suprises and simple reportsize  |
|                   |   |
| MU.68.5.3.3:      | Clarifications:   |
|                   |   |
|                   | compare written notation to adrai examples and analyze for accuracy of mythin and pitch.  |
| MU.68.5.3.4:      | Clarifications:   |
| MUL 40 S 2 E.     | Natata rhythmia phrases and/or maladias, in varying simple maters, parformed by someone also  |
| WIU.08.5.3.5:     | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques   |
| MIL 68 S 3 6.     | Clarifications:   |
| 10.00.3.3.0.      | e.g., independently, collaboratively  |
|                   | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical   |
| LAFS.68.RST.2.4:  | context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.  |
|                   | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and   |
|                   | issues, building on others' ideas and expressing their own clearly.   |
|                   | a. Come to discussions prepared, having read or researched material under study, explicitly draw on that preparation by referring to evidence on the topic text, or issue to probe and reflect on ideas under discussion.   |
|                   | b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed.   |
| LAFS.7.SL.1.1:    | c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the   |
|                   | discussion back on topic as needed.   |
|                   | d. Acknowledge new information expressed by others and, when warranted, modify their own views.   |
|                   | Standard Relation to Course: Supporting   |
| LAES 7 SL 1 2.    | Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas   |
| LAF3.7.3L.1.2.    | clarify a topic, text, or issue under study.  |
| LAFS.7.SL.1.3:    | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.  |
| LAFS.7.SL.2.4:    | Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use  |
|                   | Use appropriate tools strategically.  |
|                   |   |
|                   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,  |
|                   | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.  |
|                   | might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze  |
| MAFS.K12.MP.5.1:  | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other  |
|                   | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying  |
|                   | assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify   |
|                   | technological tools to explore and deepen their understanding of concepts.  |
|                   | Standard Relation to Course: Supporting   |
|                   | Attend to precision.  |
|                   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own   |
|                   | reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about   |
| MAFS.K12.MP.6.1:  | specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,   |
|                   | express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully   |
|                   |   |
|                   | Standard Relation to Course: Supporting   |
|                   | Look for and make use of structure.   |
|                   | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven   |
|                   | more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see $7 \times 8$ equals the well remembered $7 \times 5 + 7 \times 2$ in preparation for learning shout the distributive preparative. In the superscript will |
| MAFS.K12.MP.7 1   | + 9x + 14, older students can see the 14 as $2 \times 7$ and the 9 as $2 + 7$ . They recognize the significance of an existing line in a geometric figure and   |
|                   | can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see   |

|                   | -y <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. |
|-------------------|--|
|                   | Standard Relation to Course: Supporting  |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

I

Students with previous band experience expand on their instrumental technique, music literacy, and aesthetic response through rehearsal, performance, and study of a variety of intermediate-level, high-quality band literature. Instrumentalists extend their knowledge of music notation and theory, sound production, and personal and group rehearsal strategies. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

# GENERAL NOTES

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# M/J Band 3 (#1302020) 2022 - And Beyond

| Name          | Description  |
|---------------|--|
| MU.68.C.1.1:  | Develop strategies for listening to unfamiliar musical works.  |
|               | Clarifications:  |
|               | e.g., listening maps, active listening, checklists   |
|               | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                     |
| MU.68.C.1.2:  | Clarifications:  |
|               | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                        |
|               | Identify, aurally, instrumental styles and a variety of instrumental ensembles.  |
| MU.68.C.1.3:  | Clarifications:  |
|               | e.g., Classical, Baroque, Romantic, contemporary, jazz, pop, solo, duet, trio, quartet, small ensembles  |
|               | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.       |
| MU.68.C.2.1:  | Clarifications:  |
|               | e.g., intonation, balance, blend, phrasing, rhythm   |
|               | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                  |
| MU.68.C.2.2:  | Clarifications:  |
|               | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.C.2.3:  | Critique personal composition and/or improvisation, using simple criteria, to generate improvements with guidance from teachers and/or peers.        |
| MU.68.C.3.1:  | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
|               | Describe how concert attendance can financially impact a community.  |
| MU.68.F.2.2:  | Clarifications:  |
|               | e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants  |
|               | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1:  | Clarifications:  |
|               | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect       |
| MU.68.F.3.2:  | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.     |
| MU.68.H.1.1:  | Describe the functions of music from various cultures and time periods.  |
| MU.68.H.1.2:  | Identify the works of representative composers within a specific style of time period.   |
|               |  |
| MU.68.H.1.4:  | e.g., rhythm, layered texture, key patterns, tonality, melodic line, guarter- or semi-tones, national folk melodies, improvisation, instrumentation, |
|               | aural/oral traditions, drumming patterns   |
|               | Analyze how technology has changed the way music is created, performed, acquired, and experienced.   |
| MU.68.H.2.2:  | Clarifications:  |
|               | e.g., from harpsichord to piano; from phonograph to CD   |
| MU.68.H.2.3:  | Classify the literature being studied by genre, style, and/or time period.   |
|               | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.                                    |
| МП 40 Ц 2 1.  | Clarifications:  |
| 10.00.11.5.1. | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural            |
|               | connections and traditions, ceremonial music, sales and advertising, communication   |
|               | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2:  | Clarifications:  |
|               | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays      |
|               | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.O.1.1:  | Clarifications:  |
|               | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble                                       |
| MU.68.0.2.2:  | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
|               | Clarifications:  |
|               | e.g., scales; key signatures; relative major/minor; parallel major/minor   |
| MU.68.O.3.1:  | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
|               | Clarifications:  |
|               | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration         |
| MU.68.0.3.2:  | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to     |
|               | Utiler Husical WUKS.   |
| MIL 60 S 1 1. |  |
| WU.00.3.1.1:  | cial incations.  |

|                 | e.g., blues, rock  |
|-----------------|--|
| MU.68.S.1.3:    | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|                 | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:    | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice   |
|                 | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1:    | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony   |
| MU.68.S.2.2:    | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                 | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:    | Clarifications:  |
|                 | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                 | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:    | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                 | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:    | Clarifications:  |
|                 | e.g., note and rest values, key signatures, time signatures, expressive markings, special narmonic and/or notation symbols   |
| MIL 40 5 2 4.   | Compare written notation to aural examples and analyze for accuracy of rnythm and pitch.   |
| WU.08.3.3.4:    | e.g., error detection, interval reinforcement  |
| MU.68.S.3.5:    | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.<br>Develop and demonstrate efficient rehearsal strategies to apply skills and techniques |
| MU.68.S.3.6:    | Clarifications:  |
|                 | e.g., independently, collaboratively   |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |
|                 | Analyze the problem in a way that makes sense given the task.  |
|                 | <ul> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as peeded while solving a challenging task.</li> </ul>                   |
|                 | <ul> <li>State engaged and maintain a positive mindset when working to solve tasks.</li> </ul>   |
|                 | <ul> <li>Help and support each other when attempting a new method or approach.</li> </ul>  |
| MA.K12.MTR.1.1: | Clarifications:  |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                 | Cultivate a community of growth mindset learners.  |
|                 | Foster perseverance in students by choosing tasks that are challenging.  |
|                 | <ul> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>                                     |
|                 | Demonstrate understanding by representing problems in multiple ways  |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                 | Build understanding through modeling and using manipulatives.  |
|                 | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.  |
|                 | Progress from modeling problems with objects and drawings to using algorithms and equations.   |
|                 | Express connections between concepts and representations.  |
| MA.K12.MTR.2.1: | Choose a representation based on the given context or purpose.   |
|                 | Clarifications:<br>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                 | Help students make connections between concepts and representations.   |
|                 | Provide opportunities for students to use manipulatives when investigating concepts.   |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.   |
|                 | Show students that various representations can have different purposes and can be useful in different situations.  |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:  |
|                 | Select efficient and appropriate methods for solving problems within the given context.  |
|                 | <ul> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> </ul>   |
|                 | Complete tasks accurately and with confidence.   |
|                 | Adapt procedures to apply them to a new context.   |
|                 | Use feedback to improve efficiency when performing calculations.   |
|                 | Clarifications:  |
|                 | Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.   |
|                 | Offer multiple opportunities for students to practice efficient and generalizable methods.   |
|                 | • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.   |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.  |
|                 | mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |

| MA.K12.MTR.4.1: | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. <ul> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul></li></ul>  |
|-----------------|--|
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li></ul> |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts: <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul>  |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.<br>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly<br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide<br>referenced by the instructor.<br>6-8 Students continue with previous skills and use a style guide to create a proper citation.<br>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently.         Clarifications:         See Text Complexity for grade-level complexity bands and a text complexity rubric.   |

| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.               |  |
|-------------------|--|--|
| ELA.K12.EE.4.1:   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |  |
|                   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |  |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |  |
|                   | Use the accepted rules governing a specific format to create quality work.   |  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |  |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.   |  |
|                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |  |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.  |  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |  |

# VERSION DESCRIPTION

Students with previous band experience expand on their instrumental technique, music literacy, and aesthetic response through rehearsal, performance, and study of a variety of intermediate-level, high-quality band literature. Instrumentalists extend their knowledge of music notation and theory, sound production, and personal and group rehearsal strategies. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## Educator Certifications

Instrumental Music (Secondary Grades 7-12)

Instrumental Music (Elementary and Secondary Grades K-12)

Music (Elementary and Secondary Grades K-12)

# M/J Band 4 (#1302030) 2020 - 2022 (current)

| Name           | Description   |
|----------------|---|
|                | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1:   | Clarifications:   |
|                | e.g., listening maps, active listening, checklists  |
| MU.68.C.1.2:   | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.  |
|                | Clarifications:   |
|                | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
|                | Identify, aurally, instrumental styles and a variety of instrumental ensembles.   |
| MU.68.C.1.3:   | Clarifications:   |
|                | e.g., Classical, Baroque, Romantic, contemporary, jazz, pop, solo, duet, trio, quartet, small ensembles   |
|                | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.  |
| MU.68.C.2.1:   | Clarifications:   |
|                | e.g., intonation, balance, blend, phrasing, rhythm  |
|                | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.   |
| MU.68.C.2.2:   | Clarifications:   |
|                | e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
| MU.68.C.2.3:   | Critique personal composition and/or improvisation, using simple criteria, to generate improvements with guidance from teachers and/or peers.   |
| MU.68.C.3.1:   | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.   |
| MU.68.F.1.1:   | Create a composition and/or performance, using visual, kinesthetic, digital, and/or acoustic means to manipulate musical elements.  |
|                | Describe several routes a composition or performance could travel from creator to consumer.   |
| MU.68.F.2.1:   | Clarifications:   |
|                | e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales   |
|                | Describe how concert attendance can financially impact a community.   |
| MU.68.F.2.2:   | Clarifications:   |
|                | e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants   |
| MU.68.F.3.2:   | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.  |
|                | Identify the tasks involved in the compositional process and discuss how the process might be applied in the work place.  |
| MU.68.F.3.3:   | Clarifications:   |
|                | e.g., idea, development, editing, selling, revising, testing, presenting  |
| MU.68.H.1.2:   | Identify the works of representative composers within a specific style or time period.  |
| MU.68.H.1.3:   | Describe how American music has been influenced by other cultures.  |
|                | Classify authentic stylistic features in music originating from various cultures.   |
| MU.68.H.1.4:   | Clarifications:   |
|                | e.g., mythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national rolk melodies, improvisation, instrumentation,<br>aural/oral traditions, drumming patterns |
| MIL 40 LL 1 E. | Using representative musical works by celested compares elessify compositional characteristics common to a specific time period and/or genre  |
| MU.68.H.2.1.   | Describe the influence of historical events and periods on music composition and performance  |
| 10.00.11.2.1.  | Analyze how technology has changed the way music is created, performed, acquired, and experienced.  |
| MU 68 H 2 2·   | Clarifications:   |
| 10.00.11.2.2.  | e.g., from harpsichord to piano; from phonograph to CD  |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.  |
|                | Discuss how the absence of music would affect other content areas and contexts.   |
| MU.68.H.3.2:   | Clarifications:   |
|                | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays   |
|                | Compare performances of a musical work to identify artistic choices made by performers.   |
| MU.68.O.1.1:   | Clarifications:   |
|                | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble  |
| MU.68.O.2.1:   | Create a composition, manipulating musical elements and exploring the effects of those manipulations.   |
|                | Clarifications:   |
|                | e.g., using electronic or paper-and-pencil means to experiment with timbre, melody, rhythm, harmony, form, tonality   |
|                | Demonstrate knowledge of major and minor tonalities through performance and composition.  |
| MU.68.0.2.2    | Clarifications:   |
|                | e.g., scales; key signatures; relative major/minor; parallel major/minor  |
|                | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.  |
| MU.68.0.3.1    | Clarifications:   |
|                |   |

|                   | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
|-------------------|---|
| MU.68.0.3.2:      | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.   |
|                   | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.   |
| MU.68.S.1.1:      | Clarifications:<br>e.g., blues, rock  |
|                   | Compose a short musical piece.  |
| MU.68.S.1.2:      | Clarifications:<br>e.g., using traditional, non-traditional, digital, or classroom instruments and/or voice   |
|                   | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4:      | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice  |
|                   | Perform music from memory to demonstrate knowledge of the musical structure.  |
| MU.68.S.2.1:      | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2:      | Transfer performance techniques from familiar to unfamiliar pieces.   |
|                   | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1:      | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                   | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2:      | Clarifications:   |
|                   | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                   | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3:      | Clarifications:   |
|                   | e.g., note and rest values, key signatures, time signatures, expressive markings, special namonic and/or notation symbols   |
| MIL 40 5 2 4.     | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| WU.08.5.3.4:      | e.g., error detection, interval reinforcement   |
| MU.68.S.3.5:      | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |
|                   | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:      | Clarifications:<br>e.g., independently, collaboratively   |
|                   | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical   |
| LAI 5.00.R31.2.4. | context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.  |
|                   | issues, building on others' ideas and expressing their own clearly.   |
|                   | a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the  |
|                   | topic, text, or issue to probe and reflect on ideas under discussion.   |
| LAFS.8.SL.1.1:    | b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations.    |
|                   | and ideas.  |
|                   | d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.   |
|                   | Standard Relation to Course: Supporting   |
| LAFS.8.SL.1.2:    | Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social,  |
|                   | commercial, political) behind its presentation.   |
| LAFS.8.SL.1.3:    | identifying when irrelevant evidence is introduced.   |
| LAFS.8.SL.2.4:    | Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen  |
|                   | details; use appropriate eye contact, adequate volume, and clear pronunciation.   |
|                   | use appropriate tools strategically.  |
|                   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,  |
|                   | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.<br>Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools |
| MAFS.K12.MP.5.1:  | might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze  |
|                   | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other  |
|                   | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying<br>assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify               |
|                   | relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use  |
|                   | technological tools to explore and deepen their understanding of concepts.  |
|                   | Standard Relation to Course: Supporting Attend to precision   |
|                   |   |
|                   | reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about   |
| MAFS.K12.MP.6.1:  | specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully             |

|                   | formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|-------------------|---|
|                   | Standard Relation to Course: Supporting   |
|                   | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. |
|                   | Standard Relation to Course: Supporting   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students with considerable band experience strengthen their instrumental technique, music literacy, and aesthetic response through rehearsal, performance, and study of a variety of advanced, high-quality band literature. Instrumentalists refine their knowledge of music notation and theory, sound production, and personal and group rehearsal strategies. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## **GENERAL NOTES**

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. | MU.68.H.2.2:                 | Clarifications:  |
|                              | e.g., from harpsichord to piano; from phonograph to CD   |
| MU.68.H.2.3:                 | Classify the literature being studied by genre, style, and/or time period.   |
|                              | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2:                 | Clarifications:  |
|                              | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays      |
| MU.68.O.1.1:                 | Compare performances of a musical work to identify artistic choices made by performers.  |
|                              | Clarifications:  |
|                              | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble                                       |
| MU.68.0.2.1:                 | Create a composition, manipulating musical elements and exploring the effects of those manipulations.  |
|                              | Clarifications:  |
|                              | e.g., using electronic or paper-and-pencil means to experiment with timbre, melody, rhythm, harmony, form, tonality                                  |
|                              | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.0.2.2:                 | Clarifications:  |
|                              | e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|                              | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea. mood. and/or image.   |
| MU 68 O 3 1                  | Clarifications:  |
|                              |  |
|                 | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration   |
|-----------------|--|
| MU.68.0.3.2:    | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.  |
|                 | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1:    | Clarifications:<br>e.g., blues, rock   |
| MU.68.S.1.2:    | Compose a short musical piece.   |
|                 | Clarifications:<br>e.g., using traditional, non-traditional, digital, or classroom instruments and/or voice  |
|                 | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:    | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice   |
|                 | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1:    | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony   |
| MU.68.S.2.2:    | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                 | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:    | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|                 | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:    | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                 | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:    | Clarifications:  |
|                 | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|                 | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.5.3.4:    | e.g., error detection, interval reinforcement  |
| MU.68.S.3.5:    | Notate rhythmic phrases and/or melodies, in varving simple meters, performed by someone else.  |
|                 | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.   |
| MU.68.S.3.6:    | Clarifications:<br>e.g., independently, collaboratively  |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>   |
|                 | <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>   |
|                 | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
| MA.K12.MTR.2.1: | <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>  |
|                 | Clarifications:         Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:         • Help students make connections between concepts and representations.         • Provide opportunities for students to use manipulatives when investigating concepts.         • Guide students from concrete to pictorial to abstract representations as understanding progresses.         • Show students that various representations can have different purposes and can be useful in different situations. |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:  |
|                 | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> </ul>  |
| MA.K12.MTR.3.1: | <ul> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>   |

|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul></li></ul>   |
|-----------------|---|
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of sen and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> </li> </ul></li></ul> |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br><b>Clarifications:</b><br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.<br>• Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.  |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.  <ul> <li>Redesign models and methods to improve accuracy or efficiency</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul>  |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.  Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.  4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |

|                   | ( 0 Students continue with providue skills and use a stude guide to proper sitetion  |
|-------------------|--|
|                   | o-o students continue with previous skills and use a style guide to create a proper citation.  |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                   | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                   | Make inferences to support comprehension.  |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:   | Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students with considerable band experience strengthen their instrumental technique, music literacy, and aesthetic response through rehearsal, performance, and study of a variety of advanced, high-quality band literature. Instrumentalists refine their knowledge of music notation and theory, sound production, and personal and group rehearsal strategies. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1302030

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J BAND 4 Course Length: Year (Y) Course Level: 2

Course Status: State Board Approved Grade Level(s): 6,7,8

#### **Educator Certifications**

# M/J Orchestra 1 (#1302040) 2020 - 2022 (current)

| Name           | Description  |
|----------------|--|
|                | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:   | Clarifications:  |
|                | e.g., listening maps, active listening, checklists   |
| MU.68.C.2.1:   | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
|                | Clarifications:  |
|                | e.g., intonation, balance, blend, phrasing, rhythm   |
| MU.68.F.3.2:   | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.   |
|                | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1:   | Clarifications:  |
|                | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication |
|                | Compare performances of a muchal work to identify artistic choices made by performance   |
| MUL (0.0.1.1   |  |
| MU.68.0.1.1:   | Clarifications:  |
|                | Describe how the combination of instrumentation and concessive elements, enough on equival and ensemble  |
| MUL (0.0.2.1   |  |
| MU.08.U.3.1:   | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration   |
|                | Deform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to  |
| MU.68.0.3.2:   | other musical works.   |
| MU.68.S.1.3:   | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|                | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:   | Clarifications:  |
|                | e.g., melodies using traditional classroom instruments and/or voice  |
|                | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1:   | Clarifications:  |
|                | e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2:   | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:   | Clarifications:  |
|                | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:   | Clarifications:  |
|                | e.g., posture, breatning, fingering, embouchure, bow technique, tuning, strumming  |
|                | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:   | Clarifications:  |
|                | e.g., note and rest values, key signatures, time signatures, expressive markings, special narmonic and/or notation symbols   |
|                | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:   | Clarifications:  |
|                |  |
|                | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.   |
| MU.68.S.3.6:   | Clarifications:  |
|                |  |
| LAFS.6.SL.1.1: | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues building on others' ideas and expressing their own clearly.   |
|                | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic,  |
|                | text, or issue to probe and reflect on ideas under discussion.   |
|                | b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.  |
|                | c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under  |
|                | discussion.  |
|                | d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.  |
|                | Standard Relation to Course: Supporting  |
| LAFS.6.SL.1.2: | Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or  |
| LAFS.6.SL.1.3: | Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.   |

| LAFS.6.SL.2.4:    | Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.   |
|-------------------|---|
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.  |
| MAFS.K12.MP.5.1:  | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. <b>Standard Relation to Course: Supporting</b>  |
|                   | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
| DA 68 S 2 1       | Sustain focused attention, respect, and discipline during classes and performances  |
| FLD K12 FLL SL 1  | English language learners communicate for social and instructional purposes within the school setting   |
| 220.012.222.00.11 | Light hangedge fournete commandate for social and instructional parposes within the solidor sociality.  |

#### VERSION DESCRIPTION

Students who have little or no experience on violin, viola, cello, bass, or harp explore high-quality music literature written or transcribed for string orchestra. Study includes the development of foundational instrumental ensemble techniques, performance skills, music literacy, and aesthetic awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1302040

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J ORCH 1 Course Length: Year (Y) Course Level: 2

#### **Educator Certifications**

# M/J Orchestra 1 (#1302040) 2022 - And Beyond

| Name            | Description  |
|-----------------|--|
|                 | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:    | Clarifications:  |
|                 | e.g., listening maps, active listening, checklists   |
|                 | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
| MU.68.C.2.1:    | Clarifications:  |
|                 | e.g., intonation, balance, blend, phrasing, rhythm   |
| MU.68.F.3.2:    | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
| MU.68.H.2.3:    | Classify the literature being studied by genre, style, and/or time period.   |
|                 | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1:    | Clarifications:  |
|                 | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication |
|                 | Compare performances of a musical work to identify artistic choices made by performance  |
|                 | compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.0.1.1:    | Clarifications:  |
|                 | C.g., Hydrin, herody, thiste, form, tohanty, harmony, expressive elements, enough, orderestial, band, ensemble   |
|                 | besche now the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/of image.   |
| MU.68.U.3.1:    | Clarifications:  |
|                 | Deform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to  |
| MU.68.0.3.2:    | other musical works.   |
| MU.68.S.1.3:    | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|                 | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:    | Clarifications:  |
|                 | e.g., melodies using traditional classroom instruments and/or voice  |
|                 | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1:    | Clarifications:  |
|                 | e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2:    | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                 | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:    | Clarifications:  |
|                 | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                 | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:    | Clarifications:  |
|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                 | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:    | Clarifications:  |
|                 | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|                 | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:    | Clarifications:  |
|                 | e.g., error detection, interval reinforcement  |
|                 | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.   |
| MU.68.S.3.6:    | Clarifications:  |
|                 | e.g., independently, collaboratively   |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |
|                 | Analyze the problem in a way that makes sense given the task.  |
|                 | Ask questions that will help with solving the task.     Duild persoverance by modifying methods as peeded while solving a challenging task.  |
|                 | Stav engaged and maintain a positive mindset when working to solve tasks   |
|                 | <ul> <li>Help and support each other when attempting a new method or approach.</li> </ul>  |
| MA.K12.MTR.1.1: | Clarifications:  |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                 | Cultivate a community of growth mindset learners.  |
|                 | Foster perseverance in students by choosing tasks that are challenging.  |
|                 | Develop students' ability to analyze and problem solve.  |
|                 | Recognize students' effort when solving challenging problems.  |

| MA.K12.MTR.2.1: | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
|-----------------|---|
|                 | <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>   |
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul> Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts. <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li></ul>                 |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through justifications.  |

| 1                 |   |
|-------------------|---|
| MA.K12.MTR.7.1:   | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
|                   | <ul><li>Connect mathematical concepts to everyday experiences.</li><li>Use models and methods to understand, represent and solve problems.</li></ul>  |
|                   | Perform investigations to gather data or determine if a method is appropriate.     Redesign models and methods to improve accuracy or efficiency.   |
|                   | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.         • Indicate how various concepts can be applied to other disciplines.                                     |
|                   | Cite evidence to explain and justify reasoning.   |
|                   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
| ELA.K12.EE.5.1:   | Use the accepted rules governing a specific format to create quality work.  |
|                   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students who have little or no experience on violin, viola, cello, bass, or harp explore high-quality music literature written or transcribed for string orchestra. Study includes the development of foundational instrumental ensemble techniques, performance skills, music literacy, and aesthetic awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J ORCH 1 Course Length: Year (Y) Course Level: 2

Course Status: State Board Approved Grade Level(s): 6,7,8

#### **Educator Certifications**

| Instrumental Music (Secondary Grades 7-12)                |
|---|
| Instrumental Music (Elementary and Secondary Grades K-12) |
| Music (Elementary and Secondary Grades K-12)              |

| Name           | Description   |
|----------------|---|
|                | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1:   | Clarifications:   |
|                | e.g., listening maps, active listening, checklists  |
| MU.68.C.1.2:   | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                        |
|                | Clarifications:   |
|                | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                           |
|                | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.          |
| MU.68.C.2.1:   | Clarifications:   |
|                | e.g., intonation, balance, blend, phrasing, rhythm  |
|                | Describe several routes a composition or performance could travel from creator to consumer.   |
| MU.68.F.2.1:   | Clarifications:   |
|                | e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales                               |
| MU.68.F.3.2:   | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.        |
| MU.68.H.1.1:   | Describe the functions of music from various cultures and time periods.   |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.  |
|                | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.                                       |
| MU.68.H.3.1:   | Clarifications:   |
|                | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural               |
|                | connections and traditions, ceremonial music, sales and advertising, communication  |
|                | Compare performances of a musical work to identify artistic choices made by performers.   |
| MU.68.0.1.1:   | Clarifications:   |
|                | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble  |
|                | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image       |
| MU.68.0.3.1:   | Clarifications:   |
|                | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration            |
| MU.68.0.3.2:   | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to        |
|                | other musical works.  |
|                | Improvise rnythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.   |
| MU.68.S.1.1:   | Clarifications:   |
|                |   |
| 110.00.3.1.3.  | Sing or play melodies by ear with support from the teacher and/or peers   |
| MIL 40 S 1 4.  |   |
| 110.00.3.1.4.  | e.g., melodies using traditional classroom instruments and/or voice   |
|                | Barfarm music from momenty to demonstrate knowledge of the musical structure  |
|                |   |
| MU.68.5.2.1:   | e a basic themes patterns topality melody barmony   |
| MU (0 C 0 0.   | Transfer performance techniques from families to unfamilies pieces  |
| WIU.08.3.2.2:  | Sing and/or play age appropriate reportoire expressively  |
| MUL ( 0 C 2 1. |   |
| 110.00.3.3.1.  | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|                |   |
|                |   |
| MU.68.5.3.2:   | clarifications:   |
|                | Ciekt read standard eversions and simple reportation  |
| MU.68.S.3.3:   |   |
|                | Clarifications:   |
|                | Compare written notation to surel examples and anchine for accuracy of thether and siteh  |
| MU.68.S.3.4:   | compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
|                | Clarifications:   |
|                |   |
|                | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:   | Clarifications:   |
|                |   |
|                | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and |

| LAFS.6.SL.1.1:    | <ul> <li>issues, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</li> <li>b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.</li> <li>c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion.</li> <li>d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.</li> </ul>  |
|-------------------|---|
|                   | Standard Relation to Course: Supporting   |
| LAFS.6.SL.1.2:    | issue under study.  |
| LAFS.6.SL.1.3:    | Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.  |
| LAFS.6.SL.2.4:    | Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.   |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.  |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. <b>Standard Relation to Course: Supporting</b>  |
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see $7 \times 8$ equals the well remembered $7 \times 5 + 7 \times 3$ , in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as $2 \times 7$ and the 9 as $2 + 7$ . They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students who have some previous orchestral experience focus on the development of instrumental technique, musical literacy, performance skills, and increasing aesthetic awareness through study, rehearsal, and performance of a variety of high-quality orchestra literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# GENERAL INFORMATION

Course Number: 1302050

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J ORCH 2 Course Length: Year (Y) Course Level: 2

Course Status: Course Approved Grade Level(s): 6,7,8

#### **Educator Certifications**

| Name         | Description   |
|--------------|---|
|              | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1: | Clarifications:   |
|              | e.g., listening maps, active listening, checklists  |
| MU.68.C.1.2: | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                                      |
|              | Clarifications:   |
|              | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
|              | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.                        |
| MU.68.C.2.1: | Clarifications:   |
|              | e.g., intonation, balance, blend, phrasing, rhythm  |
|              | Describe several routes a composition or performance could travel from creator to consumer.   |
| MU.68.F.2.1: | Clarifications:   |
|              | e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales   |
| MU.68.F.3.2: | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.                      |
| MU.68.H.1.1: | Describe the functions of music from various cultures and time periods.   |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.  |
|              | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.   |
| MU.68.H.3.1: | Clarifications:   |
|              | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural                             |
|              | connections and traditions, ceremonial music, sales and advertising, communication  |
|              | Compare performances of a musical work to identify artistic choices made by performers.   |
| MU.68.0.1.1: | Clarifications:   |
|              | e.g., mythm, melody, timore, form, tonaity, narmony, expressive elements; chorar, orchestrar, band, ensemble  |
|              | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image                     |
| MU.68.0.3.1: | Clarifications:   |
|              | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration                          |
| MU.68.0.3.2: | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works. |
|              | Improvise rbythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions  |
| MIL 68 S 1 1 |   |
| 10.00.3.1.1. | e.g., blues, rock   |
| MU.68.S.1.3: | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
|              | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4: | Clarifications:   |
|              | e.g., melodies using traditional classroom instruments and/or voice   |
|              | Perform music from memory to demonstrate knowledge of the musical structure.  |
| MU.68.S.2.1: | Clarifications:   |
|              | e.g., basic themes, patterns, tonality, melody, harmony   |
| MU.68.S.2.2: | Transfer performance techniques from familiar to unfamiliar pieces.   |
|              | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1: | Clarifications:   |
|              | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|              | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2: | Clarifications:   |
|              | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| MU.68.S.3.3: | Sight-read standard exercises and simple repertoire.  |
|              | Clarifications:   |
|              | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
| MU.68.S.3.4: | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
|              | Clarifications:   |
|              | e.g., error detection, interval reinforcement   |
|              | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6: | Clarifications:   |
|              | e.g., independently, collaboratively  |
|              | Mathematicians who participate in effortful learning both individually and with others:   |

| MA.K12.MTR.1.1: | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li></ul>  |
|-----------------|--|
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> <b>Clarifications:</b> <ul> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>   |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>Select efficient and appropriate methods for solving problems within the given context.<br>Maintain flexibility and accuracy while performing procedures and mental calculations.<br>Complete tasks accurately and with confidence.<br>Adapt procedures to apply them to a new context.<br>Use feedback to improve efficiency when performing calculations.<br><b>Clarifications:</b><br>Teachers who encourage students to complete tasks with mathematical fluency:<br>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts. Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |

| DA.68.S.2.1:<br>ELD.K12.ELL.SI.1: | Sustain tocused attention, respect, and discipline during classes and performances.<br>English language learners communicate for social and instructional purposes within the school setting.  |
|-----------------------------------|--|
| ELA.K12.EE.6.1:                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| ELA.K12.EE.5.1:                   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.   |
|                                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
| ELA.K12.EE.4.1:                   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.   |
| ELA.K12.EE.3.1:                   | Make inferences to support comprehension.  Clarifications:  Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.  |
| ELA.K12.EE.2.1:                   | Read and comprehend grade-level complex texts proficiently.  Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                                   | <ul> <li>4-3 students continue with previous skins and reference comments made by speakers and peers. Students cite texts that they ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> <li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li> </ul>  |
| FI & K12 FE 1 1.                  | Cite evidence to explain and justify reasoning.  Clarifications:  K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.  |
| MA.K12.MTR.7.1:                   | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficience</li> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> |
| MA.K12.MTR.6.1:                   | <ul> <li>Evaluate results based on the given context.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul> </li> </ul>  |
| MA.K12.MTR.6.1:                   | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |

#### VERSION DESCRIPTION

Students who have some previous orchestral experience focus on the development of instrumental technique, musical literacy, performance skills, and increasing aesthetic awareness through study, rehearsal, and performance of a variety of high-quality orchestra literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### Educator Certifications

| Name            | Description   |
|-----------------|---|
|                 | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1:    | Clarifications:   |
|                 | e.g., listening maps, active listening, checklists  |
|                 | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                  |
| MU.68.C.1.2:    | Clarifications:   |
|                 | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                     |
|                 | Identify, aurally, instrumental styles and a variety of instrumental ensembles.   |
| MU.68.C.1.3:    | Clarifications:   |
|                 | e.g., Classical, Baroque, Romantic, contemporary, jazz, pop, solo, duet, trio, quartet, small ensembles   |
|                 | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.    |
| MU.68.C.2.1:    | Clarifications:   |
|                 | e.g., intonation, balance, blend, phrasing, rhythm  |
|                 | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.               |
| MU.68.C.2.2:    | Clarifications:   |
|                 | e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
| MU.68.C.3.1:    | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.   |
|                 | Describe several routes a composition or performance could travel from creator to consumer.   |
| MU.68.F.2.1:    | Clarifications:   |
|                 | e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales                         |
| MU.68.F.3.2:    | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.  |
| MU.68.H.1.1:    | Describe the functions of music from various cultures and time periods.   |
| MU.68.H.1.2:    | Identify the works of representative composers within a specific style or time period.  |
| MU.68.H.1.3:    | Describe how American music has been influenced by other cultures.  |
| MU.68.H.1.5:    | Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.   |
|                 | Analyze now technology has changed the way music is created, performed, acquired, and experienced.  |
| MU.68.H.2.2:    | Clarifications:   |
| MIL 40 11 2 2.  | Classify the literature being studied by genre, style, and/or time period   |
| 1010.00.11.2.3. | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration                                  |
|                 |   |
| MU.68.H.3.1:    | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural         |
|                 | connections and traditions, ceremonial music, sales and advertising, communication  |
|                 | Compare performances of a musical work to identify artistic choices made by performers.   |
| MU.68.0.1.1:    | Clarifications:   |
|                 | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble                                    |
|                 | Demonstrate knowledge of major and minor tonalities through performance and composition.  |
| MU.68.0.2.2:    | Clarifications:   |
|                 | e.g., scales; key signatures; relative major/minor; parallel major/minor  |
|                 | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image |
| MU.68.0.3.1:    | Clarifications:   |
|                 | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration      |
|                 | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to  |
| MU.68.0.3.2:    | other musical works.  |
|                 | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.   |
| MU.68.S.1.1:    | Clarifications:   |
|                 | e.g., blues, rock   |
| MU.68.S.1.3:    | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
| MU.68.S.1.4:    | Sing or play melodies by ear with support from the teacher and/or peers.  |
|                 | Clarifications:   |
|                 | e.g., melodies using traditional classroom instruments and/or voice   |
|                 | Perform music from memory to demonstrate knowledge of the musical structure.  |
| MU.68.S.2.1:    | Clarifications:   |
|                 | e.g., basic themes, patterns, tonality, melody, harmony   |
| MU.68.S.2.2:    | Transfer performance techniques from familiar to unfamiliar pieces.   |

|                   | Sing and/or play age-appropriate repertoire expressively.   |
|-------------------|---|
| MU.68.S.3.1:      | Clarifications:   |
|                   | e.g., technique, phrasing, dynamics, tone quality, biend, balance, intonation, kinestnetic support/response   |
|                   | Demonstrate proper vocal or instrumental technique.   |
| MU.68.5.3.2:      | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                   | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3:      | Clarifications:   |
|                   | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|                   | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:      | Clarifications:<br>e.g., error detection, interval reinforcement  |
| MU.68.S.3.5:      | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |
|                   | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:      | Clarifications:<br>e.g., independently, collaboratively   |
| LAFS 40 DST 2 4.  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical   |
| LAF3.00.K31.2.4.  | context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.  |
|                   | issues, building on others' ideas and expressing their own clearly.   |
|                   | a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the  |
|                   | topic, text, or issue to probe and reflect on ideas under discussion.   |
| LAFS.7.SL.1.1:    | c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the   |
|                   | discussion back on topic as needed.   |
|                   | d. Acknowledge new information expressed by others and, when warranted, modify their own views.   |
|                   | Standard Relation to Course: Supporting   |
| LAFS.7.SL.1.2:    | Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.  |
| LAFS.7.SL.1.3:    | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.  |
| LAFS.7.SL.2.4:    | Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.   |
|                   | Use appropriate tools strategically.  |
|                   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,  |
|                   | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.  |
|                   | might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze  |
| WAF5.K12.WP.5.1:  | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other  |
|                   | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify                          |
|                   | relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use  |
|                   | technological tools to explore and deepen their understanding of concepts.  |
|                   | Attend to precision.  |
|                   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own   |
|                   | reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about   |
| MAFS.K12.MP.6.1:  | specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,   |
|                   | formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
|                   | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven   |
|                   | more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see $7 \times 8$ equals the well remembered $7 \times 5 + 7 \times 3$ in propagation for learning about the distributive property. In the suggestion we |
|                   | + 9x + 14, older students can see the 14 as $2 \times 7$ and the 9 as $2 + 7$ . They recognize the significance of an existing line in a geometric figure and   |
|                   | can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see   |
|                   | complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real number y and y                    |
|                   | 77 as a minute a positive number times a square and use that to realize that its value cannot be more than 5 for any real humbers X and y.  |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students with previous orchestral experience demonstrate intermediate-level knowledge of instrumental techniques, musical literacy, ensemble performance skills, and related musical knowledge through study, rehearsal, and performance of a variety of high-quality orchestral literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1302060

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J ORCH 3 Course Length: Year (Y) Course Level: 2

Course Status: Course Approved Grade Level(s): 6,7,8

#### **Educator Certifications**

| 1                | Sing and/or play age-appropriate repertoire expressively.   |
|------------------|---|
| MU.68.S.3.1:     | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
| MU.68.S.3.2:     | Demonstrate proper vocal or instrumental technique.   |
|                  | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                  | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3:     | Clarifications:   |
|                  | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|                  | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:     | Clarifications:<br>e.g., error detection, interval reinforcement  |
| MU.68.S.3.5:     | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |
|                  | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:     | Clarifications:   |
|                  | e.g., independentry, conadorativery   |
|                  | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> </ul>   |
|                  | Ask questions that will help with solving the task.   |
|                  | Build perseverance by modifying methods as needed while solving a challenging task.   |
|                  | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach</li> </ul>                                 |
| MA.K12.MTR.1.1:  | Clarifications:   |
|                  | Teachers who encourage students to participate actively in effortful learning both individually and with others:  |
|                  | Cultivate a community of growth mindset learners.   |
|                  | <ul> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to apply and problem solve.</li> </ul>  |
|                  | <ul> <li>Recognize students' effort when solving challenging problems.</li> </ul>   |
|                  | Demonstrate understanding by representing problems in multiple ways.  |
|                  | Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
|                  | Build understanding through modeling and using manipulatives.   |
|                  | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.   |
|                  | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> </ul>                         |
| MA.K12.MTR.2.1:  | <ul> <li>Choose a representation based on the given context or purpose.</li> </ul>  |
|                  | Clarifications:   |
|                  | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                  | <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> </ul>                      |
|                  | <ul> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> </ul>  |
|                  | Show students that various representations can have different purposes and can be useful in different situations.   |
|                  | Complete tasks with mathematical fluency.   |
|                  | Mathematicians who complete tasks with mathematical fluency:  |
|                  | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain floxibility and accuracy while performing procedures and mental calculations.</li> </ul> |
|                  | Complete tasks accurately and with confidence.  |
| MA V12 MTD 2 1.  | Adapt procedures to apply them to a new context.  |
| WA.K12.WITK.5.1. | Use feedback to improve efficiency when performing calculations.  |
|                  | Clarifications:   |
|                  | <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> </ul>  |
|                  | Offer multiple opportunities for students to practice efficient and generalizable methods.  |
|                  | • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
|                  | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:               |
| MA.K12.MTR.4.1:  | Communicate mathematical ideas, vocabulary and methods effectively.   |
|                  | Analyze the mathematical thinking of others.  |
|                  | Compare the efficiency of a method to those expressed by others.  |
|                  | Recognize errors and suggest how to correctly solve the task.   |
|                  | Justify results by explaining methods and processes.     Construct possible arguments based on evidence.  |
|                  | Clarifications:   |
|                  | Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:  |
|                  | Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.   |
|                  | Greate opportunities for students to discuss their thinking with peers.   |

|                 | <ul> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>  |
|-----------------|--|
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
| MA.K12.MTR.5.1: | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |
|                 | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through justifications. |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:<br>• Connect mathematical concepts to everyday experiences.  |
| MA.K12.MTR.7.1: | <ul> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul>   |
|                 | Cite evidence to explain and justify reasoning.  |
|                 | K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.   |
| ELA.K12.EE.1.1: | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                 | <ul><li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li><li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li></ul>  |
|                 | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1: | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                 | Make inferences to support comprehension.  |
| ELA.K12.EE.3.1: | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
|                 | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1: | Ciarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |

|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |  |
|-------------------|--|--|
|                   | Use the accepted rules governing a specific format to create quality work.   |  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |  |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.   |  |
|                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |  |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.  |  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |  |

#### VERSION DESCRIPTION

Students with previous orchestral experience demonstrate intermediate-level knowledge of instrumental techniques, musical literacy, ensemble performance skills, and related musical knowledge through study, rehearsal, and performance of a variety of high-quality orchestral literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|---|
| Instrumental Music (Secondary Grades 7-12)                |
| Instrumental Music (Elementary and Secondary Grades K-12) |

| Name           | Description  |
|----------------|--|
|                | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:   | Clarifications:  |
|                | e.g., listening maps, active listening, checklists   |
|                | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                     |
| MU 68 C 1 2·   |  |
| 10.00.0.1.2.   | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                        |
|                | Identify, aurally, instrumental styles and a variety of instrumental ensembles.  |
| MU.68.C.1.3:   | Clarifications:  |
|                | e.g., Classical, Baroque, Romantic, contemporary, jazz, pop, solo, duet, trio, quartet, small ensembles  |
|                | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.       |
| MU.68.C.2.1:   | Clarifications:  |
|                | e.g., intonation, balance, blend, phrasing, rhythm   |
|                | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                  |
| MU.68.C.2.2:   | Clarifications:  |
|                | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.C.3.1:   | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
| MU.68.F.1.1:   | Create a composition and/or performance, using visual, kinesthetic, digital, and/or acoustic means to manipulate musical elements.                   |
|                | Describe several routes a composition or performance could travel from creator to consumer.  |
| MU.68.F.2.1:   | Clarifications:  |
|                | e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales                            |
|                | Describe how concert attendance can financially impact a community.  |
| MU.68.F.2.2:   | Clarifications:  |
|                | e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants  |
|                | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU 68 F 3 1    | Clarifications:  |
|                | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect       |
| MU.68.F.3.2:   | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.     |
|                | Identify the tasks involved in the compositional process and discuss how the process might be applied in the work place.                             |
| MU.68.F.3.3:   | Clarifications:  |
|                | e.g., idea, development, editing, selling, revising, testing, presenting   |
| MU.68.H.1.1:   | Describe the functions of music from various cultures and time periods.  |
| MU.68.H.1.2:   | Identify the works of representative composers within a specific style or time period.   |
| MU.68.H.1.3:   | Describe how American music has been influenced by other cultures.   |
|                | Classify authentic stylistic features in music originating from various cultures.  |
| MII 60 LI 1 4. | Clarifications:  |
| 10.00.11.1.4.  | e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, |
|                | aural/oral traditions, drumming patterns   |
| MU.68.H.1.5:   | Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.      |
| MU.68.H.2.1:   | Describe the influence of historical events and periods on music composition and performance.  |
|                | Analyze now technology has changed the way music is created, performed, acquired, and experienced.   |
| MU.68.H.2.2:   | Clarifications:  |
|                |  |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.   |
|                | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.                                    |
| MU.68.H.3.1:   | Clarifications:  |
|                | connections and traditions, ceremonial music, sales and advertising, communication   |
|                | Discuss how the absence of music would affect other content areas and contexts   |
| MIL 68 H 2 2   | Clarifications:  |
| wi0.00.11.3.2. | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays      |
|                | Compare performances of a musical work to identify artistic choices made by performance  |
| MUL ( 0 0 1 1  |  |
| WU.08.U.1.1:   | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, hand, epsemble                                       |
|                | Create a composition manipulating musical elements and surfacing the effects of these manipulating   |
|                | create a composition, manipulating musical elements and exploring the effects or those manipulations.  |

| MU.68.0.2.1:       | Clarifications:  |
|--------------------|--|
|                    | e.g., using electronic or paper-and-pencil means to experiment with timbre, melody, rhythm, harmony, form, tonality  |
|                    | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.0.2.2:       | Clarifications:  |
|                    | e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|                    | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image  |
| MU.68.0.3.1:       | Clarifications:  |
|                    | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration   |
| MUL 40 O 2 2.      | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to   |
| 1010.00.0.3.2.     | other musical works.   |
|                    | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1:       | Clarifications:  |
|                    | e.g., blues, rock  |
| MU.68.S.1.3:       | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|                    | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:       | Clarifications:  |
|                    | e.g., melodies using traditional classroom instruments and/or voice  |
|                    | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1:       | Clarifications:  |
|                    | e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2:       | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                    | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:       | Clarifications:  |
|                    | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                    | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:       | Clarifications:  |
|                    | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                    | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:       | Clarifications:  |
|                    | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|                    | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:       | Clarifications:  |
|                    | e.g., error detection, interval reinforcement  |
| MU.68.S.3.5:       | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.  |
|                    | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.   |
| MU.68.S.3.6:       | Clarifications:  |
|                    | e.g., independently, collaboratively   |
| LAFS 68 RST 2 1.   | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical  |
| EAI 3.00.1(31.2.4. | context relevant to grades 6-8 texts and topics.   |
| LAFS.68.WHST.3.9:  | Draw evidence from informational texts to support analysis reflection, and research.   |
|                    | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues building on others' ideas and expressions their own clearly.  |
|                    | a Come to discussions prepared baying read or researched material under study: explicitly draw on that preparation by referring to evidence on the   |
|                    | topic, text, or issue to probe and reflect on ideas under discussion.  |
|                    | b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed.  |
| EAT 3.0.3E.1.1.    | c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations,   |
|                    | and ideas.   |
|                    | d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.  |
|                    | Standard Relation to Course: Supporting  |
|                    | Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social,   |
| LAF5.8.5L.1.2:     | commercial, political) behind its presentation.  |
| LAFS.8.SL.1.3:     | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and  |
|                    | identifying when irrelevant evidence is introduced.  |
| LAFS.8.SL.2.4:     | Present claims and findings, emphasizing salient points in a rocused, concrent manner with relevant evidence, sound valid reasoning, and weil-chosen details: use appropriate eve contact, adequate volume, and clear propunciation  |
|                    | Use appropriate tools strategically  |
|                    |  |
| MAFS.K12.MP.5.1:   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,   |
|                    | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.   |
|                    | Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful recognizing both the incident to be gained and their limitations. For example, mathematically proficient high school students analyze |
|                    | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other   |
|                    | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying   |
|                    | assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify  |
|                    | relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use   |
|                    | technological tools to explore and deepen their understanding of concepts.   |
|                    | stanuaru keration to course, supporting  |

|                   | Attend to precision.   |
|-------------------|--|
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. <b>Standard Relation to Course: Supporting</b>   |
|                   | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting |
| DA 68 S 2 1       | Sustain focused attention respect and discipline during classes and performances   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students with previous orchestral experience demonstrate advanced knowledge of instrumental techniques, musical literacy, ensemble skills, and related musical knowledge through study, rehearsal, and performance of a variety of high-quality orchestral literature. Additional opportunities for experiences in small ensembles, solo performance, and various leadership roles may be available. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1302070

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J ORCH 4 Course Length: Year (Y) Course Level: 2

Course Status: Course Approved Grade Level(s): 6,7,8

### **Educator Certifications**

| Instrumental Music (Secondary Grades 7-12)                |
|---|
| Instrumental Music (Elementary and Secondary Grades K-12) |
| Music (Elementary and Secondary Grades K-12)              |

| Name         | Description  |
|--------------|--|
|              | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1: | Clarifications:  |
|              | e.g., listening maps, active listening, checklists   |
|              | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                     |
| MU.68.C.1.2: | Clarifications:  |
|              | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                        |
|              | Identify, aurally, instrumental styles and a variety of instrumental ensembles.  |
| MU.68.C.1.3: | Clarifications:  |
|              | e.g., Classical, Baroque, Romantic, contemporary, jazz, pop, solo, duet, trio, quartet, small ensembles  |
|              | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.       |
| MU.68.C.2.1: | Clarifications:  |
|              | e.g., intonation, balance, blend, phrasing, rhythm   |
|              | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                  |
| MU.68.C.2.2: | Clarifications:  |
|              | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.C.3.1: | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
| MU.68.F.1.1: | Create a composition and/or performance, using visual, kinesthetic, digital, and/or acoustic means to manipulate musical elements.                   |
|              | Describe several routes a composition or performance could travel from creator to consumer.  |
| MU.68.F.2.1: | Clarifications:  |
|              | e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales                            |
|              | Describe how concert attendance can financially impact a community.  |
| MU.68.F.2.2: | Clarifications:  |
|              | e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants  |
|              | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1: | Clarifications:  |
|              | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect       |
| MU.68.F.3.2: | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.     |
|              | Identify the tasks involved in the compositional process and discuss how the process might be applied in the work place.                             |
| MU.68.F.3.3: | Clarifications:  |
|              | e.g., idea, development, editing, selling, revising, testing, presenting   |
| MU.68.H.1.1: | Describe the functions of music from various cultures and time periods.  |
| MU.68.H.1.2: | Identify the works of representative composers within a specific style or time period.   |
| MU.08.H.1.3: | Classify authentic stylistic features in music originating from various cultures   |
|              |  |
| MU.68.H.1.4: | e.g., rhythm, lavered texture, key patterns, tonality, melodic line, guarter- or semi-tones, national folk melodies, improvisation, instrumentation, |
|              | aural/oral traditions, drumming patterns   |
| MU.68.H.1.5: | Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.      |
| MU.68.H.2.1: | Describe the influence of historical events and periods on music composition and performance.  |
|              | Analyze how technology has changed the way music is created, performed, acquired, and experienced.   |
| MU.68.H.2.2: | Clarifications:  |
|              | e.g., from harpsichord to piano; from phonograph to CD   |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.   |
|              | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.                                    |
| MU.68.H.3.1: | Clarifications:  |
|              | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural            |
|              |  |
|              | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2: | Clarifications:  |
|              | e.g., meane and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays        |
|              | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.0.1.1: | Clarifications:  |
|              | e.g., mymm, meiody, umbre, form, tonality, narmony, expressive elements; choral, orchestral, band, ensemble  |
|              | Create a composition, manipulating musical elements and exploring the effects of those manipulations.  |

| MU.68.0.2.1:    | Clarifications:<br>e.g., using electronic or paper-and-pencil means to experiment with timbre, melody, rhythm, harmony, form, tonality  |
|-----------------|---|
|                 | Demonstrate knowledge of major and minor tonalities through performance and composition.  |
| MU.68.0.2.2:    | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor   |
| MU.68.O.3.1:    | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image   |
| MU.68.O.3.2:    | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.   |
| MU.68.S.1.1:    | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  Clarifications: e.g., blues, rock  |
| MU.68.S.1.3:    | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
| MU.68.S.1.4:    | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice  |
| MU.68.S.2.1:    | Perform music from memory to demonstrate knowledge of the musical structure. Clarifications: e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2:    | Transfer performance techniques from familiar to unfamiliar pieces.   |
| MU.68.S.3.1:    | Sing and/or play age-appropriate repertoire expressively.<br>Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
| MU.68.S.3.2:    | Demonstrate proper vocal or instrumental technique. Clarifications: e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| MU.68.S.3.3:    | Sight-read standard exercises and simple repertoire. Clarifications: e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
| MU.68.S.3.4:    | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. Clarifications: e.g., error detection, interval reinforcement  |
| MU.68.S.3.5:    | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |
| MU.68.S.3.6:    | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques. Clarifications: e.g., independently, collaboratively   |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> <b>Clarifications:</b> <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul> |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:   |

| MA.K12.MTR.3.1: | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul> Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li></ul>   |
|-----------------|--|
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br>Clarifications:<br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.   |
| MA.K12.MTR.6.1: | <ul> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> <li>Assess the reasonableness of solutions.</li> <li>Mathematicians who assess the reasonableness of solutions:</li> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul> <b>Clarifications:</b> <ul> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts: <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul>  |
|                 | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.   |

|                                    | 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.  |
|------------------------------------|--|
| ELA.K12.EE.1.1:                    | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.                       |
|                                    | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                                    | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                                    | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:                    | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                                    | Make inferences to support comprehension.  |
| ELA.K12.EE.3.1:                    | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.               |
|                                    | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:                    | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |
|                                    | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                                    | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:<br>ELA.K12.EE.6.1: | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |
|                                    | Use appropriate voice and tone when speaking or writing.   |
|                                    | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |
| DA.68.S.2.1:                       | Sustain focused attention, respect, and discipline during classes and performances.  |
| ELD.K12.ELL.SI.1:                  | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students with previous orchestral experience demonstrate advanced knowledge of instrumental techniques, musical literacy, ensemble skills, and related musical knowledge through study, rehearsal, and performance of a variety of high-quality orchestral literature. Additional opportunities for experiences in small ensembles, solo performance, and various leadership roles may be available. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

# **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

#### **Educator Certifications**

| Name                     | Description   |
|--------------------------|---|
|                          | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1:             | Clarifications:   |
|                          | e.g., listening maps, active listening, checklists  |
|                          | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                        |
| MU.68.C.1.2:             | Clarifications:   |
|                          | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                           |
|                          | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.          |
| MU.68.C.2.1:             | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm   |
|                          | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                     |
| MU.68.C.2.2:             | Clarifications:   |
|                          | e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
| MU.68.H.2.3:             | Classify the literature being studied by genre, style, and/or time period.  |
|                          | Compare performances of a musical work to identify artistic choices made by performers.   |
| MU.68.O.1.1:             | Clarifications:   |
|                          | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble  |
|                          | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.      |
| MU.68.0.3.1:             | Clarifications:   |
|                          | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, narmonic structure, timbre, rhythm, orchestration            |
|                          | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.   |
| MU.68.S.1.1:             | Clarifications:   |
|                          | e.g., blues, rock   |
|                          | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4:             | Clarifications:   |
|                          | Deferm music from memory to demonstrate knowledge of the musical structure  |
| MUL 40 S O 1.            |   |
| WIU.00.3.2.1.            | e.g., basic themes, patterns, tonality, melody, harmony   |
| MU 68 S 2 2 <sup>.</sup> | Transfer performance techniques from familiar to unfamiliar pieces  |
|                          | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1:             | Clarifications:   |
|                          | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|                          | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2:             | Clarifications:   |
|                          | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                          | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3:             | Clarifications:   |
|                          | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols                              |
|                          | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:             | Clarifications:<br>e.g., error detection, interval reinforcement  |
| MU.68.S.3.5:             | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |
|                          | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:             | Clarifications:   |
|                          | e.g., independently, collaboratively  |
|                          | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and |
|                          | issues, building on others' ideas and expressing their own clearly.   |
|                          | text, or issue to probe and reflect on ideas under discussion.  |
| LAFS.6.SL.1.1:           | b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.                                     |
|                          | c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under             |
|                          | discussion.   |
|                          | d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.                           |
|                          | Standard Relation to Course: Supporting   |

| LAFS.6.SL.1.2:    | Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.  |
|-------------------|---|
| LAFS.6.SL.1.3:    | Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.  |
| LAFS.6.SL.2.4:    | Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.   |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| MAFS.K12.MP.5.1:  | <ul> <li>Use appropriate tools strategically.</li> <li>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</li> <li>Standard Relation to Course: Supporting</li> </ul> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
|                   | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                   | Standard Relation to Course: Supporting English language learners communicate for cocial and instructional numbers within the school setting  |
| ELD.NIZ.ELL.SI.I. | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students with little or no instrumental experience develop musicianship, technical proficiency, and performance skills. Beginning musicians focus on development of skills and techniques through scales, etudes, and solo literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

# GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. |                 | e.g., independently, collaboratively   |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |
|                 | Analyze the problem in a way that makes sense given the task.  |
|                 | <ul> <li>Ask questions that will help with solving the task.</li> <li>Build persoverance by medifying methods as peeded while solving a shallenging task.</li> </ul> |
|                 | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>  |
|                 | <ul> <li>Help and support each other when attempting a new method or approach.</li> </ul>  |
| MA.K12.MTR.1.1: | Clarifications:  |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                 | Cultivate a community of growth mindset learners.  |

|                 | <ul> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
|-----------------|--|
|                 | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
| MA.K12.MTR.2.1: | <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:  |
| MA.K12.MTR.3.1: | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
|                 | <ul> <li>Ose recoduct to improve enclosely when performing calculations.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul> </li> </ul>   |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  |
| MA.K12.MTR.4.1: | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> </li> </ul> |
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
| MA.K12.MTR.5.1: | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>                       |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
| Ι               | reachers who encourage students to assess the reasonableness of solutions:   |

|                   | <ul> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
|-------------------|---|
|                   | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency</li> </ul>   |
| MA.K12.MTR.7.1:   | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>  |
| ELA.K12.EE.1.1:   | Cite evidence to explain and justify reasoning.  Clarifications:  K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.   |
|                   | <ul> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> <li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li> </ul>  |
| ELA.K12.EE.2.1:   | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.3.1:   | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
| ELA.K12.EE.4.1:   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.          Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |
| ELA.K12.EE.5.1:   | Use the accepted rules governing a specific format to create quality work.<br>Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students with little or no instrumental experience develop musicianship, technical proficiency, and performance skills. Beginning musicians focus on development of skills and techniques through scales, etudes, and solo literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

Course Number: 1302080

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J INSTRU TECNQS 1 Course Length: Year (Y) Course Level: 2

Course Status: State Board Approved Grade Level(s): 6,7,8

### **Educator Certifications**

| Name         | Description  |
|--------------|--|
|              | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1: | Clarifications:  |
|              | e.g., listening maps, active listening, checklists   |
|              | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                   |
| MU.68.C.1.2: | Clarifications:  |
|              | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                      |
|              | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.     |
| MU.68.C.2.1: | Clarifications:  |
|              | e.g., intonation, balance, blend, phrasing, rhythm   |
|              | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                |
| MU.68.C.2.2: | Clarifications:  |
|              | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
|              | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1: | Clarifications:  |
|              | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect     |
|              | Analyze how technology has changed the way music is created, performed, acquired, and experienced.   |
| MU.68.H.2.2: | Clarifications:  |
|              | e.g., from harpsichord to piano; from phonograph to CD   |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.   |
|              | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.0.1.1: | Clarifications:  |
|              | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble                                     |
|              | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.0.2.2: | Clarifications:  |
|              | e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|              | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. |
| MU.68.0.3.1: | Clarifications:  |
|              | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration       |
|              | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to   |
| MU.68.0.3.2: | other musical works.   |
|              | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1: | Clarifications:  |
|              | e.g., blues, rock  |
|              | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4: | Clarifications:  |
|              | e.g., melodies using traditional classroom instruments and/or voice  |
|              | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1: | Clarifications:  |
|              | e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2: | Transfer performance techniques from familiar to unfamiliar pieces.  |
|              | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1: | Clarifications:  |
|              | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|              | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2: | Clarifications:  |
|              | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|              | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3: | Clarifications:  |
|              | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols                         |
|              | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4: | Clarifications:  |
|              | e.g., error detection, interval reinforcement  |
| MU.68.S.3.5: | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.  |

|                   | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
|-------------------|---|
| MU.68.S.3.6:      | Clarifications:   |
|                   | e.g., independently, collaboratively  |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.7.SL.1.1:    | <ul> <li>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</li> <li>b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed.</li> </ul>  |
|                   | <ul> <li>c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed.</li> <li>d. Acknowledge new information expressed by others and, when warranted, modify their own views.</li> </ul>  |
|                   | Standard Delation to Course, Supporting   |
| LAFS.7.SL.1.2:    | Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.  |
| LAFS.7.SL.1.3:    | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.  |
| LAFS.7.SL.2.4:    | Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.   |
|                   | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                   | Standard Relation to Course: Supporting   |
| ELD.KIZ.ELL.SI.T: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students build on previous instruction to strengthen their musicianship, technique, and performance skills through preparation of scales, etudes, and solo literature. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills necessary to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

# GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area

concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. | MU.68.O.3.2: | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works. |
|              | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.   |
| MU.68.S.1.1: | Clarifications:<br>e.g., blues, rock  |
|              | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4: | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice  |
|              | Perform music from memory to demonstrate knowledge of the musical structure.  |
| MU.68.S.2.1: | Clarifications:   |
|              | e.g., basic themes, patterns, tohainty, melody, namony  |
| MU.08.5.2.2: | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1: | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|              | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2: | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|              | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3: | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols                         |
|              | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4: | Clarifications:<br>e.g., error detection, interval reinforcement  |
| MU.68.S.3.5: | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |

|                 | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.   |
|-----------------|--|
| MU.68.S.3.6:    | Clarifications:<br>e.g., independently, collaboratively  |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>   |
|                 | <ul> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>   |
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> <li>Clarifications:</li> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>   |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts.</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> </ul>   |

|                   | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>   |
|-------------------|---|
|                   | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:   |
|                   | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> </ul>  |
| MA.K12.MTR.6.1:   | Evaluate results based on the given context.  |
|                   | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.   |
|                   | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
|                   | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> </ul>  |
| MA.K12.MTR.7.1:   | Clarifications:   |
|                   | <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> </ul>  |
|                   | Challenge students to question the accuracy of their models and methods.  |
|                   | <ul><li>Support students as they validate conclusions by comparing them to the given situation.</li><li>Indicate how various concepts can be applied to other disciplines.</li></ul>  |
|                   | Cite evidence to explain and justify reasoning.   |
|                   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   |   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students build on previous instruction to strengthen their musicianship, technique, and performance skills through preparation of scales, etudes, and solo literature. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills necessary to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

# GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

Course Number: 1302090

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J INSTRU TECNOS 2 Course Length: Year (Y) Course Level: 2

Course Status: State Board Approved Grade Level(s): 6,7,8

## **Educator Certifications**

| Name         | Description   |
|--------------|---|
|              | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1: | Clarifications:<br>e.g., listening maps, active listening, checklists   |
|              | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.  |
| MU.68.C.1.2: | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title  |
|              | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.  |
| MU.68.C.2.1: | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm   |
|              | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.   |
| MU.68.C.2.2: | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
|              | Describe how studying music can enhance citizenship, leadership, and global thinking.   |
| MU.68.F.3.1: | Clarifications:<br>e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect   |
| MU.68.H.1.1: | Describe the functions of music from various cultures and time periods.   |
| MU.68.H.1.2: | Identify the works of representative composers within a specific style or time period.  |
|              | Classify authentic stylistic features in music originating from various cultures.   |
| MU.68.H.1.4: | Clarifications:<br>e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation,<br>aural/oral traditions, drumming patterns |
|              | Analyze how technology has changed the way music is created, performed, acquired, and experienced.  |
| MU.68.H.2.2: | Clarifications:<br>e.g., from harpsichord to piano; from phonograph to CD   |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.  |
|              | Compare performances of a musical work to identify artistic choices made by performers.   |
| MU.68.O.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble   |
|              | Demonstrate knowledge of major and minor tonalities through performance and composition.  |
| MU.68.0.2.2: | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|              | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.  |
| MU.68.O.3.1: | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration   |
| MU.68.0.3.2: | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.   |
|              | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.   |
| MU.68.S.1.1: | Clarifications:<br>e.g., blues, rock  |
|              | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4: | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice  |
|              | Perform music from memory to demonstrate knowledge of the musical structure.  |
| MU.68.S.2.1: | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2: | Transfer performance techniques from familiar to unfamiliar pieces.   |
|              | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1: | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|              | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2: | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|              | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3: | Clarifications:   |

|                   | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|-------------------|---|
|                   | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:      | Clarifications:<br>e.g., error detection, interval reinforcement  |
| MU.68.S.3.5:      | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |
|                   | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:      | Clarifications:<br>e.g., independently, collaboratively   |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.8.SL.1.1:    | <ul> <li>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</li> <li>b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed.</li> <li>c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas.</li> <li>d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.</li> </ul>  |
|                   | Standard Relation to Course: Supporting   |
| LAFS.8.SL.1.2:    | Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.  |
| LAFS.8.SL.1.3:    | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced.   |
| LAFS.8.SL.2.4:    | Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.  |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x<br>- y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting   |
| FLD.K12 FLL SL 1  | English language learners communicate for social and instructional purposes within the school setting   |
|                   | g. angelige resider of bookar and not detend parposed within the benefit of botting.  |

# VERSION DESCRIPTION

Student musicians build on previous instruction to develop high levels of musicianship, technical proficiency, and performance skills through preparation of technically challenging scales, etudes, and solo literature. Students use problem-solving, critical thinking, and reflection to demonstrate the skills of disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

# **GENERAL NOTES**

## English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# M/J Instrumental Techniques 3 (#1302100) 2022 - And Beyond

| Name         | Description   |
|--------------|---|
|              | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1: | Clarifications:<br>e.g., listening maps, active listening, checklists   |
|              | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.  |
| MU.68.C.1.2: | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title  |
|              | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.  |
| MU.68.C.2.1: | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm   |
|              | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.   |
| MU.68.C.2.2: | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
|              | Describe how studying music can enhance citizenship, leadership, and global thinking.   |
| MU.68.F.3.1: | Clarifications:<br>e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect   |
| MU.68.H.1.1: | Describe the functions of music from various cultures and time periods.   |
| MU.68.H.1.2: | Identify the works of representative composers within a specific style or time period.  |
|              | Classify authentic stylistic features in music originating from various cultures.   |
| MU.68.H.1.4: | Clarifications:<br>e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation,<br>aural/oral traditions, drumming patterns |
|              | Analyze how technology has changed the way music is created, performed, acquired, and experienced.  |
| MU.68.H.2.2: | Clarifications:<br>e.g., from harpsichord to piano; from phonograph to CD   |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.  |
|              | Compare performances of a musical work to identify artistic choices made by performers.   |
| MU.68.O.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble   |
|              | Demonstrate knowledge of major and minor tonalities through performance and composition.  |
| MU.68.0.2.2: | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|              | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.  |
| MU.68.O.3.1: | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration   |
| MU.68.0.3.2: | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.   |
|              | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.   |
| MU.68.S.1.1: | Clarifications:<br>e.g., blues, rock  |
|              | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4: | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice  |
|              | Perform music from memory to demonstrate knowledge of the musical structure.  |
| MU.68.S.2.1: | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony  |

# VERSION DESCRIPTION

Student musicians build on previous instruction to develop high levels of musicianship, technical proficiency, and performance skills through preparation of technically challenging scales, etudes, and solo literature. Students use problem-solving, critical thinking, and reflection to demonstrate the skills of disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

# GENERAL NOTES

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## **Educator Certifications**

| Instrumental Music (Secondary Grades 7-12)                |
|---|
| Instrumental Music (Elementary and Secondary Grades K-12) |
| Music (Elementary and Secondary Grades K-12)              |

| Name           | Description  |
|----------------|--|
|                | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:   | Clarifications:  |
|                | e.g., listening maps, active listening, checklists   |
|                | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                       |
| MU.68.C.1.2:   | Clarifications:  |
|                | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                          |
|                | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.         |
| MU.68.C.2.1:   | Clarifications:  |
|                | e.g., intonation, balance, blend, phrasing, rhythm   |
|                | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                    |
| MU.68.C.2.2:   | Clarifications:  |
|                | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.F.3.2:   | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.       |
|                | Classify authentic stylistic features in music originating from various cultures.  |
| MU 68 H 1 4·   | Clarifications:  |
|                | e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation,   |
|                |  |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.   |
|                |  |
| MU.68.H.3.1:   | Clarifications:  |
|                | connections and traditions, ceremonial music, sales and advertising, communication   |
|                | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.     |
| MU 68 O 3 1    | Clarifications:  |
| M0.00.0.3.1.   | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration           |
|                | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to       |
| MU.68.0.3.2:   | other musical works.   |
| MU.68.S.1.3:   | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|                | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:   | Clarifications:  |
|                | e.g., melodies using traditional classroom instruments and/or voice  |
| MU.68.S.2.2:   | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:   | Clarifications:  |
|                | e.g., technique, prirasing, dynamics, tone quanty, biend, balance, intonation, knestnetic support/response   |
|                |  |
| MU.68.S.3.2:   | Clarifications:  |
|                | Cisht read standard everyless and simple reporties   |
|                |  |
| MU.68.5.3.3:   | Clarifications:  |
|                | Compare written notation to oursel examples and analyze for essured of shuthm and nitch  |
|                |  |
| WIU.08.3.3.4:  | e.g., error detection, interval reinforcement  |
|                | Develop and demonstrate afficient rehearsal strategies to apply skills and techniques  |
| MIL 40 5 2 4.  |  |
| WIU.00.3.3.0.  | e.g., independently, collaboratively   |
|                | Engage effectively in a range of collaborative discussions (one on one in groups, and teacher led) with diverse partners on grade 6 topics, tayts, and |
|                | issues, building on others' ideas and expressing their own clearly.  |
|                | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic,  |
|                | text, or issue to probe and reflect on ideas under discussion.   |
| LAFS.6.SL.1.1: | b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.                                    |
|                | c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under            |
|                | discussion.  |
|                | a. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.                          |

| AFS.6.5.1.12:       Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.         AFS.6.5.1.3:       Delineate a speeker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.         AFS.6.5.1.3:       Delineate a speeker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.         AFS.6.5.1.3:       Delemate a speeker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.         AFS.6.8.T.2.4:       Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.         AFS.68.WHST 3.9:       Draw evidence from informational texts to support analysis reflection, and research.         Use appropriate tools strategically.       Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algobra system, a statistical package, or dynamic geometry software.         AAFS.K12.MP.5.1:       Mathematical sources, sufficient famility with tooks appropriate for their grade errours to make sourd decising of vapanic grade levels are able to identify relevant external mathematical models. they know that technology can enable them to visualize the results of varying assumptions, onplore consequences, and compare preclicitons with data.   |                   | Standard Relation to Course: Supporting  |

Mathematical students are usuing or analyze them to visualize the results of varying mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.         Attend to precision.       Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently correspondence with quantities in a problem. They calculate accurately and efficiently formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.         AAFS,K12.MP.6.1:       Standard Relation to Course: Supporting       Mathematically proficient students look closely to discern apattern or structure. Young students, for example, maght | LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.   |
| Attend to precision.         Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.         Standard Relation to Course: Supporting         Look for and make use of structure.         Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression x <sup>2</sup> MAFS.K12.MP.7.1:       + 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x)   | MAFS.K12.MP.5.1:  | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x   | MAFS.K12.MP.6.1:  | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. Standard Relation to Course: Supporting  |
| - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting   | MAFS.K12.MP.7.1:  | <ul> <li>Look for and make use of structure.</li> <li>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression x<sup>2</sup> + 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y)<sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.</li> <li>Standard Relation to Course: Supporting</li> </ul>   |
| LD.K12.ELL.SI.1: English language learners communicate for social and instructional purposes within the school setting.  | ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

Students with little or no instrumental ensemble experience develop musicianship and performance skills as they study, rehearse, and perform high-quality ensemble literature in diverse styles. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

# GENERAL NOTES

## English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# **Educator Certifications**

| Name            | Description   |
|-----------------|---|
|                 | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1:    | Clarifications:   |
|                 | e.g., listening maps, active listening, checklists  |
|                 | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.  |
| MU.68.C.1.2:    | Clarifications:   |
|                 | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
|                 | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.  |
| MU.68.C.2.1:    | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm   |
|                 | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.   |
| MU.68.C.2.2:    | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.F.3.2:    | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.  |
|                 | Classify authentic stylistic features in music originating from various cultures.   |
|                 | Clarifications:   |
| MU.68.H.1.4:    | e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, aural/oral traditions, drumming patterns |
| MU.68.H.2.3:    | Classify the literature being studied by genre, style, and/or time period.  |
|                 | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.   |
| MIL 40 11 2 1.  | Clarifications:   |
| MU.00.H.3.1.    | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural   |
|                 | connections and traditions, ceremonial music, sales and advertising, communication  |
|                 | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.  |
| MU.68.0.3.1:    | Clarifications:   |
|                 | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
| MU 40 O 2 2.    | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to  |
| WIU.00.U.3.2.   | other musical works.  |
| MU.68.S.1.3:    | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
|                 | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4:    | Clarifications:   |
|                 | e.g., melodies using traditional classroom instruments and/or voice   |
| MU.68.S.2.2:    | Transfer performance techniques from familiar to unfamiliar pieces.   |
|                 | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1:    | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                 | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2:    | Clarifications:   |
|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                 | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3:    | Clarifications:   |
|                 | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|                 | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:    | Clarifications:   |
|                 | e.g., error detection, interval reinforcement   |
|                 | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:    | Clarifications:   |
|                 | e.g., independently, collaboratively  |
|                 | Mathematicians who participate in effortful learning both individually and with others:   |
|                 | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> </ul>   |
|                 | <ul> <li>Ask questions that will help with solving the task.</li> </ul>   |
|                 | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> </ul>   |
|                 | Stay engaged and maintain a positive mindset when working to solve tasks.   |
|                 | Help and support each other when attempting a new method or approach.   |
| MA.K12.MTR.1.1: | Clarifications:   |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:  |

|                 | <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>   |
|-----------------|--|
|                 | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>  |
| MA.K12.MTR.2.1: | <ul> <li>Frogress non-inducting problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> <li>Clarifications:         <ul> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> </ul> </li> </ul>  |
|                 | <ul> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul> Complete tasks with mathematical fluency.  |
| MA.K12.MTR.3.1: | Mathematicians who complete tasks with mathematical fluency: <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>   |
|                 | <ul> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>   |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> </ul> |
|                 | Clarifications:         Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:         • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.         • Create opportunities for students to discuss their thinking with peers.         • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.         • Develop students' ability to justify methods and compare their responses to the responses of their peers.            |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>Focus on relevant details within a problem.<br>Create plans and procedures to logically order events, steps or ideas to solve problems.<br>Decompose a complex problem into manageable parts.<br>Relate previously learned concepts to new concepts.<br>Look for similarities among problems.<br>Connect solutions of problems to more complicated large-scale situations.  |
|                 | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.                      |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.  |
| MA.K12.MTR.6.1: | Check calculations when solving problems.     Verify possible solutions by explaining the methods used.     Evaluate results based on the given context. Clarifications:   |

|                   | <ul> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
|-------------------|---|
|                   | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
|                   | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>   |
| MA.K12.MTR.7.1:   | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.         • Indicate how various concepts can be applied to other disciplines.                                     |
|                   | Cite evidence to explain and justify reasoning.   |
|                   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students with little or no instrumental ensemble experience develop musicianship and performance skills as they study, rehearse, and perform high-quality ensemble literature in diverse styles. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. | Name                     | Description  |
|--------------------------|--|
|                          | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:             | Clarifications:  |
|                          | e.g., listening maps, active listening, checklists   |
|                          | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                     |
| MU.68.C.1.2:             | Clarifications:  |
|                          | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                        |
|                          | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.       |
| MU.68.C.2.1:             | Clarifications:  |
|                          | e.g., intonation, balance, blend, phrasing, rhythm   |
|                          | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                  |
| MU.68.C.2.2:             | Clarifications:  |
|                          | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
|                          | Describe several routes a composition or performance could travel from creator to consumer.  |
| MU.68.F.2.1:             | Clarifications:  |
|                          | e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales                            |
|                          | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1:             | Clarifications:  |
|                          | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect       |
| MU.68.F.3.2:             | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.     |
|                          | Classify authentic stylistic features in music originating from various cultures.  |
| MU.68.H.1.4:             | Clarifications:  |
|                          | e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, |
|                          |  |
| MU.68.H.2.3:             | Classify the literature being studied by genre, style, and/or time period.   |
|                          |  |
| MU.68.H.3.1:             | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community; cultural            |
|                          | connections and traditions, ceremonial music, sales and advertising, communication   |
|                          | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2:             | Clarifications:  |
|                          | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays      |
|                          | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.0.1.1:             | Clarifications:  |
|                          | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble                                       |
|                          | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU.68.0.3.1:             | Clarifications:  |
|                          | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration         |
| MU 68 O 3 2 <sup>.</sup> | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to     |
|                          | other musical works.   |
| MU.68.S.1.3:             | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
| MUL / 0 C 1 4.           |  |
| WU.08.5.1.4:             | e.g., melodies using traditional classroom instruments and/or voice  |
|                          | Derform music from memory to demonstrate knowledge of the musical structure  |
| MU.68.S.2.1:             |  |
|                          | e.g., basic themes, patterns, tonality, melody, harmony  |
| MIL 68 S 2 2·            | Transfer performance techniques from familiar to unfamiliar nieces   |
| 10.00.3.2.2.             | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:             | Clarifications:  |
|                          | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                          | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:             | Clarifications:  |
|                          | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                          | Sight-read standard exercises and simple repertoire.   |
| 1                        |  |

| MU.68.S.3.3:      | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|-------------------|---|
|                   | Compare written notation to aural examples and analyze for accuracy of rhythm and nitch   |
| MU.68.S.3.4:      | Clarifications:       e.g., error detection, interval reinforcement   |
|                   | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:      | Clarifications:<br>e.g., independently, collaboratively   |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.  |
| LAFS.7.SL.1.1:    | <ul> <li>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</li> <li>b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed.</li> <li>c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed.</li> <li>d. Acknowledge new information expressed by others and, when warranted, modify their own views.</li> </ul>  |
|                   | Standard Relation to Course: Supporting   |
| LAFS.7.SL.1.2:    | Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas<br>clarify a topic, text, or issue under study.   |
| LAFS.7.SL.1.3:    | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.  |
| LAFS.7.SL.2.4:    | Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use<br>appropriate eye contact, adequate volume, and clear pronunciation.  |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
|                   | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                   | Standard Relation to Course: Supporting   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students with previous instrumental ensemble experience continue to build musicianship and performance skills through the study, rehearsal, and performance of high-quality ensemble literature in a variety of styles. Student musicians learn to self-assess and collaborate as they study relevant musical styles and time periods. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

Course Number: 1302120

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J INSTRU ENS 2 Course Length: Year (Y) Course Level: 2

Course Status: Course Approved Grade Level(s): 6,7,8

### **Educator Certifications**

| Name         | Description  |
|--------------|--|
|              | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1: | Clarifications:  |
|              | e.g., listening maps, active listening, checklists   |
|              | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                   |
| MU.68.C.1.2: | Clarifications:  |
|              | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                      |
|              | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.     |
| MU.68.C.2.1: | Clarifications:  |
|              | e.g., intonation, balance, blend, phrasing, rhythm   |
|              | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                |
| MU.68.C.2.2: | Clarifications:  |
|              | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
|              | Describe several routes a composition or performance could travel from creator to consumer.  |
| MU.68.F.2.1: | Clarifications:  |
|              | e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales                          |
|              | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1: | Clarifications:  |
|              | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect     |
| MU.68.F.3.2: | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
|              | Classify authentic stylistic features in music originating from various cultures.  |
| MU.68.H.1.4: | Clarifications:  |
|              | aural/oral traditions, drumming patterns   |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.   |
|              | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.                                  |
|              | Clarifications:  |
| MU.68.H.3.1: | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural          |
|              | connections and traditions, ceremonial music, sales and advertising, communication   |
|              | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2: | Clarifications:  |
|              | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays    |
|              | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.0.1.1: | Clarifications:  |
|              | e.g., rnythm, melody, timbre, form, tonality, narmony, expressive elements; choral, orchestral, band, ensemble                                     |
|              | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. |
| MU.68.0.3.1: | Clarifications:  |
|              |  |
| MU.68.0.3.2: | other musical works.   |
| MU.68.S.1.3: | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|              | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4: | Clarifications:  |
|              | e.g., melodies using traditional classroom instruments and/or voice  |
|              | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1: | Clarifications:  |
|              | e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2: | Transfer performance techniques from familiar to unfamiliar pieces.  |
|              | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1: | Clarifications:  |
|              | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|              | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2: | Clarifications:  |
|              | e.g., posture, preatring, ingering, embouchure, bow technique, tuning, strumming   |
|              | Signt-read standard exercises and simple repertoire.   |

| MU.68.S.3.3:    | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|-----------------|--|
| MU.68.S.3.4:    | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. Clarifications: e.g., error detection, interval reinforcement   |
| MU.68.S.3.6:    | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  Clarifications: e.g., independently, collaboratively   |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others: <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> </li> <li>Clarifications: <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul> </li> </ul>  |

|                  | Provide opportunities for students to create plans and procedures to solve problems.   |
|                  | • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
|                  | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
|                  | Estimate to discover possible solutions.   |
|                  | Use benchmark quantities to determine if a solution makes sense.   |
|                  | Check calculations when solving problems.  |
| MA V12 MTD 6 1.  | <ul> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context</li> </ul>   |
| WA.K12.WITK.0.1. |  |
|                  | Teachers who encourage students to assess the reasonableness of solutions:   |
|                  | Have students estimate or predict solutions prior to solving.  |
|                  | <ul> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> </ul>  |
|                  | Reinforce that students check their work as they progress within and after a task.   |
|                  | Strengthen students' ability to verify solutions through justifications.   |
|                  | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |
|                  | Connect mathematical concepts to everyday experiences.   |
|                  | Use models and methods to understand, represent and solve problems.  |
|                  | Perform investigations to gather data or determine if a method is appropriate.     Redesign models and methods to improve accuracy or efficiency   |
| MA.K12.MTR.7.1:  | Clarifications:  |
|                  | <ul> <li>Provide opportunities for students to greate models, both concrete and abstract, and perform investigations.</li> </ul>   |
|                  | <ul> <li>Challenge students to guestion the accuracy of their models and methods.</li> </ul>   |
|                  | <ul> <li>Support students as they validate conclusions by comparing them to the given situation.</li> </ul>  |
|                  | Indicate how various concepts can be applied to other disciplines.   |
|                  | Cite evidence to explain and justify reasoning.  |
|                  | Clarifications:  |
|                  | K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details   |
|                  | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.  |
|                  | In 3rd grade, students should use a combination of direct and indirect citations.  |
| ELA.K12.EE.1.1:  | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly  |
|                  | quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide   |
|                  | referenced by the instructor.  |
|                  | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                  | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                  | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:  | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                  | Make inferences to support comprehension.  |
|                  | Clarifications:  |
| ELA.K12.EE.3.1:  | Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smilling?" or make predictions about what will become based on the title page. Students will use the terms and apply them in 2nd grade and |
|                  | beyond.  |
|                  | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
|                  | Clarifications:  |
|                  | In kindergarten, students learn to listen to one another respectfully.   |
| ELA.K12.EE.4.1:  | In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The   |
|                  | conaborative conversations are becoming academic conversations.  |
|                  | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                  | build on ideas, proper the conversation, and support traints and counterclaints with evidence.   |
|                  | Use the accepted rules governing a specific format to create quality work.   |
| ELΔ K12 EE 5 1.  | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they   |
| ELA.KTZ.EE.S.T.  | must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to   |
|                  | do quality work.   |
|                  | Use appropriate voice and tone when speaking or writing.   |
|                  |  |

| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. |
|-------------------|---|
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students with previous instrumental ensemble experience continue to build musicianship and performance skills through the study, rehearsal, and performance of high-quality ensemble literature in a variety of styles. Student musicians learn to self-assess and collaborate as they study relevant musical styles and time periods. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

# GENERAL NOTES

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## **Educator Certifications**

| Instrumental Music (Secondary Grades 7-12)                |
|---|
| Instrumental Music (Elementary and Secondary Grades K-12) |
| Music (Elementary and Secondary Grades K-12)              |

| Name          | Description  |
|---------------|--|
|               | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:  | Clarifications:  |
|               | e.g., listening maps, active listening, checklists   |
|               | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                   |
| MU.68.C.1.2:  | Clarifications:  |
|               | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                      |
|               | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.     |
| MU.68.C.2.1:  | Clarifications:  |
|               | e.g., intonation, balance, blend, phrasing, rhythm   |
|               | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                |
| MU.68.C.2.2:  | Clarifications:  |
|               | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.C.3.1:  | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
|               | Describe how concert attendance can financially impact a community.  |
| MU.68.F.2.2:  | Clarifications:  |
|               | e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants  |
|               | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1:  | Clarifications:  |
|               | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect     |
| MU.68.F.3.2:  | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
| MU.68.H.1.1:  | Describe the functions of music from various cultures and time periods.  |
| MU.68.H.1.2:  | Identify the works of representative composers within a specific style or time period.   |
|               | Classify authentic stylistic features in music originating from various cultures.  |
| MU.68.H.1.4:  | Clarifications:  |
|               | aural/oral traditions, drumming patterns   |
| MU 68 H 2 1·  | Describe the influence of historical events and periods on music composition and performance   |
| MU.68.H.2.3:  | Classify the literature being studied by genre, style, and/or time period.   |
|               | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.                                  |
|               | Clarifications:  |
| MU.68.H.3.1:  | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural          |
|               | connections and traditions, ceremonial music, sales and advertising, communication   |
|               | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2:  | Clarifications:  |
|               | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays    |
|               | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.0.1.1:  | Clarifications:  |
|               | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble                                     |
|               | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.0.2.2:  | Clarifications:  |
|               | e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|               | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. |
| MU.68.0.3.1:  | Clarifications:  |
|               | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration       |
| MU.68.0.3.2:  | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to   |
|               | other musical works.   |
| MU.68.5.1.3:  | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
| MU.68.S.1.4:  |  |
|               | e.g., melodies using traditional classroom instruments and/or voice  |
|               | Parform mucic from momory to domonstrate knowledge of the mucical structure  |
| MUL 40 S O 1. |  |
| 10.00.3.2.1:  | e.g., basic themes, patterns, tonality, melody, harmony  |
| MIL 68 S 2 2: | Transfer performance techniques from familiar to unfamiliar pieces   |
|               | rensis, performance tearninges non-naminar to amanimar pieces.   |

|                       | Sing and/or play age-appropriate repertoire expressively.   |
|-----------------------|---|
| MU.68.S.3.1:          | Clarifications:   |
|                       | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|                       | Demonstrate proper vocal or instrumental technique  |
| MIL 68 S 3 2.         | Clarifications  |
| 10.00.3.3.2.          | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                       | Sight read standard evercises and simple reportaine   |
| MIL (0.6.2.2.         |   |
| WU.08.3.3.3:          | e.g. note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|                       |   |
|                       | compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:          | Clarifications:   |
|                       | e.g., error detection, interval remorcement   |
|                       | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:          | Clarifications:   |
|                       | e.g., independently, collaboratively  |
| LAFS.68.RST.2.4:      | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical   |
|                       | Context relevant to grades 6–8 texts and topics.  |
| LAI 5.00. WIIST. 5.9. | Engage effectively in a range of collaborative discussions (one-on-one in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and  |
|                       | issues, building on others' ideas and expressing their own clearly.   |
|                       | a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the  |
|                       | topic, text, or issue to probe and reflect on ideas under discussion.   |
| LAFS.8.SL.1.1:        | b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed.   |
|                       | c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations,  |
|                       | and ideas.  |
|                       | d. Acknowledge new information expressed by others, and, when warranted, quality or justify their own views in light of the evidence presented.   |
|                       | Standard Relation to Course: Supporting   |
| LAFS.8.SL.1.2:        | Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social,  |
|                       | commercial, political) bening its presentation.   |
| LAFS.8.SL.1.3:        | identifying when irrelevant evidence is introduced.   |
|                       | Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen  |
| LAF3.0.3L.2.4.        | details; use appropriate eye contact, adequate volume, and clear pronunciation.   |
|                       | Use appropriate tools strategically.  |
|                       | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper   |
|                       | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.  |
|                       | Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools   |
| MAFS.K12.MP.5.1:      | might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze  |
|                       | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying                   |
|                       | assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify   |
|                       | relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use  |
|                       | technological tools to explore and deepen their understanding of concepts.  |
|                       | Standard Relation to Course: Supporting   |
|                       | Attend to precision.  |
|                       | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own   |
| MAES K12 MD 6 1.      | reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently. |
| WAI 5.KT2.WF.0.T.     | express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully   |
|                       | formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                       | Standard Relation to Course: Supporting   |
|                       | Look for and make use of structure.   |
|                       | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven   |
| MAFS.K12.MP.7.1:      | more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later.  |
|                       | students will see 7 $\times$ 8 equals the well remembered 7 $\times$ 5 + 7 $\times$ 3, in preparation for learning about the distributive property. In the expression $x^2$   |
|                       | + 9x + 14, older students can see the 14 as $2 \times 7$ and the 9 as $2 + 7$ . They recognize the significance of an existing line in a geometric figure and   |
|                       | can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see   |
|                       | -y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y  |
|                       |   |
|                       | Standard Relation to Course: Supporting   |

# VERSION DESCRIPTION

Students continue to build musicianship and performance skills through the study, rehearsal, and performance of increasingly challenging, high-quality instrumental ensemble literature. Student musicians strengthen their techniques, ensemble skills, music literacy, and analytical skills as they study relevant history, cultures, and music genres. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

# GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

| MA.K12.MTR.3.1: | <ul> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul> Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>                       |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> </ul> </li> </ul></li></ul> |

|                      | <ul> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>  |
|----------------------|--|
| MA K12 MTP 5 1-      | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
|                      | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> </ul>  |
|                      | <ul> <li>Relate previously learned concepts to new concepts.</li> </ul>  |
|                      | Look for similarities among problems.  |
|                      | Connect solutions of problems to more complicated large-scale situations.  |
|                      | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul> |
|                      | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
| MA.K12.MTR.6.1:      | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
| NDV.IX 12.0011X.0.1. | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.         • Prompt students to continually ask, "Does this solution make sense? How do you know?"         • Reinforce that students check their work as they progress within and after a task.         • Strengthen students' ability to verify solutions through justifications.   |
|                      | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |
|                      | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>  |
| MA.K12.MTR.7.1:      | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.         • Indicate how various concepts can be applied to other disciplines.  |
|                      | Cite evidence to explain and justify reasoning.  |
| ELA.K12.EE.1.1:      | <ul> <li>Clarifications:</li> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> </ul>  |
|                      | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                      | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                      | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                      | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:      | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                      | Make inferences to support comprehension.  |
| ELA.K12.EE.3.1:      | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
|                      | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:      | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |
|                      | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students   |

|                   | build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|-------------------|--|
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.   |
|                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

Students continue to build musicianship and performance skills through the study, rehearsal, and performance of increasingly challenging, high-quality instrumental ensemble literature. Student musicians strengthen their techniques, ensemble skills, music literacy, and analytical skills as they study relevant history, cultures, and music genres. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## **GENERAL NOTES**

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# M/J Band 2 and Career Planning (#1302140) 2020 - 2022 (current)

| Name                | Description   |
|---------------------|---|
|                     | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1:        | Clarifications:   |
|                     | e.g., listening maps, active listening, checklists  |
|                     | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.            |
| MU.68.C.2.1:        | Clarifications:   |
|                     | e.g., intonation, balance, blend, phrasing, rhythm  |
|                     | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                       |
| MU.68.C.2.2:        | Clarifications:   |
|                     | e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
| MU.68.F.3.2:        | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.          |
| MU.68.H.1.2:        | Identify the works of representative composers within a specific style or time period.  |
| MU.68.H.2.3:        | Classify the literature being studied by genre, style, and/or time period.  |
|                     | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.   |
|                     | Clarifications:   |
| MU.68.H.3.1:        | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural                 |
|                     | connections and traditions, ceremonial music, sales and advertising, communication  |
|                     | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.        |
| MU.68.0.3.1:        | Clarifications:   |
|                     | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration              |
| MU (0.0.2.2)        | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to          |
| MU.68.0.3.2:        | other musical works.  |
| MU.68.S.1.3:        | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
|                     | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4:        | Clarifications:   |
|                     | e.g., melodies using traditional classroom instruments and/or voice   |
| MU.68.S.2.2:        | Transfer performance techniques from familiar to unfamiliar pieces.   |
|                     | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1:        | Clarifications:   |
|                     | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|                     | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2:        | Clarifications:   |
|                     | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                     | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3:        | Clarifications:   |
|                     | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols                                |
|                     | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:        | Clarifications:   |
|                     | e.g., error detection, interval reinforcement   |
| MU.68.S.3.5:        | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |
|                     | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and   |
|                     | issues, building on others' ideas and expressing their own clearly.   |
|                     | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by reterring to evidence on the topic,     |
|                     | text, or issue to probe and reflect on ideas under discussion.  |
| LAFS.6.SL.1.1:      | c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under               |
|                     | discussion.   |
|                     | d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.                             |
|                     | Standard Delation to Courses Supporting   |
|                     | Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evolain how it contributes to a topic, text, or |
| LAFS.6.SL.1.2:      | issue under study.  |
| LAFS.6.SL.1.3:      | Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.            |
| LAFS 6 SL 2 4       | Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use      |
| EAI 3.0.3E.2.4.     | appropriate eye contact, adequate volume, and clear pronunciation.  |
| LAFS.68.RST.2.4:    | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical           |
| LAES 60 WILLET 2 D. | Context relevant to grades b-b texts and topics.  |
| LAL3.00.WH31.3.9:   | Draw evidence nom mormational texts to support analysis renection, and research.  |

|                   | Use appropriate tools strategically.  |
|-------------------|---|
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Look for and make use of structure  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                   | Standard Relation to Course: Supporting   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students with previous band experience build on instrumental technique, music literacy, and aesthetic response through rehearsal, performance, and study of a variety of highquality band literature. Instrumentalists expand their knowledge of music notation, music theory, sound production, and personal and group rehearsal strategies. In tandem with their learning opportunities in band, students investigate careers in a wide variety of fields guided by the competencies required by Florida Statute. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## **GENERAL NOTES**

**Career and Education Planning** – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must **include information from the Department of Economic Opportunity's** economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.stml.

#### Career and Education Planning Course Standards - Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level

words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum **developers and teachers which maximizes an ELL's need for communication** and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# GENERAL INFORMATION

Course Number: 1302140

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J BAND 2&CAR PLAN Course Length: Year (Y) Course Level: 2

Course Status: Course Approved Grade Level(s): 6,7,8

## **Educator Certifications**

Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

# M/J Band 2 and Career Planning (#1302140) 2022 - And Beyond

| Name                | Description  |
|---------------------|--|
|                     | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:        | Clarifications:  |
|                     | e.g., listening maps, active listening, checklists   |
|                     | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.                       |
| MU.68.C.2.1:        | Clarifications:  |
|                     | e.g., intonation, balance, blend, phrasing, rhythm   |
|                     | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                                  |
| MU.68.C.2.2:        | Clarifications:  |
|                     | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.F.3.2:        | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.                     |
| MU.68.H.1.2:        | Identify the works of representative composers within a specific style or time period.   |
| MU.68.H.2.3:        | Classify the literature being studied by genre, style, and/or time period.   |
|                     | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MIL (0 11 2 1.      | Clarifications:  |
| MU.68.H.3.1:        | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural                            |
|                     | connections and traditions, ceremonial music, sales and advertising, communication   |
|                     | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.                   |
| MU.68.0.3.1:        | Clarifications:  |
|                     | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration                         |
| MU.68.0.3.2:        | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works |
| MU.68.S.1.3:        | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|                     | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU 68 S 1 4·        | Clarifications   |
| M0.00.3.1.4.        | e.g., melodies using traditional classroom instruments and/or voice  |
| MU.68.S.2.2:        | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                     | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:        | Clarifications:  |
|                     | Demonstrate proper vocal or instrumental technique   |
|                     |  |
| WIU.08.5.3.2:       | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                     | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:        | Clarifications:  |
|                     | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|                     | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU 68 S 3 4·        | Clarifications   |
| 10.00.0.0.1         | e.g., error detection, interval reinforcement  |
| MU 68 S 3 5:        | Notate rhythmic phrases and/or melodies in varying simple meters, performed by someone else  |
|                     | Mathematicians who participate in effortful learning both individually and with others:  |
|                     | Analyze the problem in a way that makes sense given the task.  |
|                     | Ask questions that will help with solving the task.  |
|                     | Build perseverance by modifying methods as needed while solving a challenging task.  |
|                     | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>  |
|                     | Help and support each other when attempting a new method or approach.  |
| IVIA.K12.IVITK.1.1: | Clarifications:  |
|                     | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                     | Cultivate a community or growth mindset learners.  |
|                     | Foster perseverance in students by choosing tasks that are chailenging.     Develop students' ability to applyze and problem solve                                   |
|                     | Recognize students' effort when solving challenging problems   |
|                     | Demonstrate understanding by representing problems in multiple ways  |
|                     | Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                     | Build understanding through modeling and using manipulatives.  |
|                     | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.  |

|                      | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>  |
|----------------------|--|
| MIA.K 12.1011 K.2.1. | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
|                      | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:  |
| MA.K12.MTR.3.1:      | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
|                      | <ul> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>   |
|                      | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  |
| MA.K12.MTR.4.1:      | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>  |
|                      | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
|                      | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
| MA.K12.MTR.5.1:      | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |
|                      | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>           |
| MA K12 MTR 6 1-      | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.  |
| ματικτέζιψη Κ.Ο. Γ   | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.         • Prompt students to continually ask, "Does this solution make sense? How do you know?"         • Reinforce that students check their work as they progress within and after a task.         • Strengthen students' ability to verify solutions through justifications.   |
|                      | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |
|                      | Connect mathematical concepts to everyday experiences.   |

|                   | Use models and methods to understand, represent and solve problems.   |
|-------------------|---|
|                   | • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.   |
| MA.K12.MTR.7.1:   | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.         • Indicate how various concepts can be applied to other disciplines.                                     |
|                   | Cite evidence to explain and justify reasoning.   |
|                   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students with previous band experience build on instrumental technique, music literacy, and aesthetic response through rehearsal, performance, and study of a variety of highquality band literature. Instrumentalists expand their knowledge of music notation, music theory, sound production, and personal and group rehearsal strategies. In tandem with their learning opportunities in band, students investigate careers in a wide variety of fields guided by the competencies required by Florida Statute. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

# **GENERAL NOTES**

**Career and Education Planning** – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida

Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.stml.

#### Career and Education Planning Course Standards - Students will:

1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.

- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum **developers and teachers which maximizes an ELL's need for communication** and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

# M/J Band 3 and Career Planning (#1302142) 2020 - 2022 (current)

| Name                     | Description  |
|--------------------------|--|
|                          | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:             | Clarifications:  |
|                          | e.g., listening maps, active listening, checklists   |
|                          | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.     |
| MU.68.C.2.1:             | Clarifications:  |
|                          | e.g., intonation, balance, blend, phrasing, rhythm   |
|                          | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                |
| MU.68.C.2.2:             | Clarifications:  |
|                          | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.C.3.1:             | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
|                          | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1:             | Clarifications:  |
|                          | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect     |
| MU.68.F.3.2:             | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
| MU.68.H.1.2:             | Identify the works of representative composers within a specific style or time period.   |
| MU.68.H.2.3:             | Classify the literature being studied by genre, style, and/or time period.   |
|                          | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.                                  |
| MU 68 H 3 1              | Clarifications:  |
|                          | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural          |
|                          | connections and traditions, ceremonial music, sales and advertising, communication   |
|                          | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2:             | Clarifications:  |
|                          | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays    |
|                          | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.0.1.1:             | Clarifications:  |
|                          | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble                                     |
|                          | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.0.2.2:             | Clarifications:  |
|                          | e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|                          | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. |
| MU.68.0.3.1:             | Clarifications:  |
|                          | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration       |
| MU.68.0.3.2:             | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to   |
| MIL 60 S 1 2.            | other musical works.   |
| 10.00.3.1.3.             | Sing or play melodies by ear with support from the teacher and/or peers  |
| MIL 68 S 1 4.            |  |
| 10.00.3.1.4.             | e.g., melodies using traditional classroom instruments and/or voice  |
| MU 68 S 2 2 <sup>.</sup> | Transfer performance techniques from familiar to unfamiliar pieces   |
| 10.00.012.2.             | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:             | Clarifications:  |
|                          | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                          | Demonstrate proper vocal or instrumental technique.  |
| MU 68 S 3 2 <sup>.</sup> | Clarifications:  |
|                          | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                          | Sight-read standard exercises and simple repertoire.   |
| MU 68 S 3 3 <sup>.</sup> | Clarifications:  |
|                          | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols                         |
|                          | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3 4              | Clarifications:  |
|                          | e.g., error detection, interval reinforcement  |
| MU.68.S.3.5:             | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.  |
|                          | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical    |
| LAF5.08.KS1.2.4:         | context relevant to grades 6–8 texts and topics.   |

| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.  |
|-------------------|---|
|                   | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and<br>issues, building on others' ideas and expressing their own clearly.  |
|                   | a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the  |
|                   | topic, text, or issue to probe and reflect on ideas under discussion.   |
| LAFS.7.SL.1.1:    | b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed.   |
|                   | c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the   |
|                   | discussion back on topic as needed.   |
|                   | d. Acknowledge new information expressed by others and, when warranted, modify their own views.   |
|                   | Standard Relation to Course: Supporting   |
| LAFS.7.SL.1.2:    | Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas<br>clarify a topic, text, or issue under study.   |
| LAFS.7.SL.1.3:    | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.  |
| LAFS.7.SL.2.4:    | Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.   |
|                   | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. <b>Standard Relation to Course: Supporting</b>  |
|                   | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |
|                   | Standard Relation to Course: Supporting   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students with previous band experience expand on their instrumental technique, music literacy, and aesthetic response through rehearsal, performance, and study of a variety of intermediate-level, high-quality band literature. Instrumentalists extend their knowledge of music notation and theory, sound production, and rehearsal strategies. In tandem with their learning opportunities in band, students investigate careers in a wide variety of fields guided by the competencies required by Florida Statute. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

# GENERAL NOTES

**Career and Education Planning** – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must **include information from the Department of Economic Opportunity's** economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.stml.

#### Career and Education Planning Course Standards - Students will:

1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.

- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

| Course | Number  | 1302142 |
|--------|---------|---------|
| Course | number. | 1302142 |

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: M/J BAND 3&CAR PLAN Course Length: Year (Y) Course Level: 2

Course Status: Course Approved Grade Level(s): 6,7,8

### **Educator Certifications**

Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

# M/J Band 3 and Career Planning (#1302142) 2022 - And Beyond

| Name         | Description  |
|--------------|--|
|              | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1: | Clarifications:  |
|              | e.g., listening maps, active listening, checklists   |
|              | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
| MU.68.C.2.1: | Clarifications:  |
|              | e.g., intonation, balance, blend, phrasing, rhythm   |
|              | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.  |
| MU.68.C.2.2: | Clarifications:  |
|              | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.C.3.1: | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
|              | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1: | Clarifications:  |
|              | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect   |
| MU.68.F.3.2: | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
| MU.68.H.1.2: | Identify the works of representative composers within a specific style or time period.   |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.   |
|              | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1: | Clarifications:  |
|              | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication |
|              |  |
|              | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2: | Clarifications:  |
|              | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gamerings, civic and religious ceremonies, plays   |
|              | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.0.1.1: | Clarifications:  |
|              | e.g., mythm, melody, timbre, form, tonainy, narmony, expressive elements, chorar, orchestrar, band, ensemble   |
|              | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.0.2.2: | Clarifications:  |
|              |  |
|              | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU.68.0.3.1: | Clarifications:  |
|              | e.g., tempo markings, expression markings, a treatation markings, prirasing, scales, modes, narmonic structure, timbre, mythin, orchestration  |
| MU.68.0.3.2: | perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works   |
| MU.68.S.1.3: | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|              | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4: | Clarifications:  |
|              | e.g., melodies using traditional classroom instruments and/or voice  |
| MU.68.S.2.2: | Transfer performance techniques from familiar to unfamiliar pieces.  |
|              | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1: | Clarifications:  |
|              | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|              | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2: | Clarifications:  |
|              | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|              | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3: | Clarifications:  |
|              | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|              | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4: | Clarifications:  |
|              | e.g., error detection, interval reinforcement  |
| MU.68.S.3.5: | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.  |
|              | Mathematicians who participate in effortful learning both individually and with others:  |
|              | Analyze the problem in a way that makes sense given the task.  |

|                 | <ul> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>   |
|-----------------|---|
| MA.K12.MTR.1.1: | <ul> <li>Help and support each other when attempting a new method or approach.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul> </li> </ul>  |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.</li></ul>   |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>Select efficient and appropriate methods for solving problems within the given context.<br>Maintain flexibility and accuracy while performing procedures and mental calculations.<br>Complete tasks accurately and with confidence.<br>Adapt procedures to apply them to a new context.<br>Use feedback to improve efficiency when performing calculations.<br>Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:<br>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br>Clarifications:<br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.<br>• Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.   |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:   |

| MA.K12.MTR.6.1:                   | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
|-----------------------------------|--|
|                                   | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         Have students estimate or predict solutions prior to solving.         Prompt students to continually ask, "Does this solution make sense? How do you know?"         Reinforce that students check their work as they progress within and after a task.         Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1:                   | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> </ul> |
|                                   | <ul><li>Support students as they validate conclusions by comparing them to the given situation.</li><li>Indicate how various concepts can be applied to other disciplines.</li></ul>   |
|                                   | Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.   |
| ELA.K12.EE.1.1:                   | <ul> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> <li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li> </ul>   |
| ELA.K12.EE.2.1:                   | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
| ELA.K12.EE.3.1:                   | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
| ELA.K12.EE.4.1:                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
| ELA.K12.EE.5.1:                   | Use the accepted rules governing a specific format to create quality work.<br>Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
| ELA.K12.EE.6.1:                   | Use appropriate voice and tone when speaking or writing.<br>Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.68.S.2.1:<br>ELD.K12.ELL.SI.1: | Sustain focused attention, respect, and discipline during classes and performances.<br>English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students with previous band experience expand on their instrumental technique, music literacy, and aesthetic response through rehearsal, performance, and study of a variety of intermediate-level, high-quality band literature. Instrumentalists extend their knowledge of music notation and theory, sound production, and rehearsal strategies. In tandem with their learning opportunities in band, students investigate careers in a wide variety of fields guided by the competencies required by Florida Statute. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

**Career and Education Planning** – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.stml.

#### Career and Education Planning Course Standards - Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# M/J Chorus 1 (#1303000) 2020 - 2022 (current)

| Name           | Description   |
|----------------|---|
|                | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1:   | Clarifications:   |
|                | e.g., listening maps, active listening, checklists  |
|                | Identify, aurally, a variety of vocal styles and ensembles.   |
| MU.68.C.1.4:   | Clarifications:   |
|                | e.g., chant, spiritual, folk, opera, world, jazz, pop, solo, duet, trio, quartet, small ensembles, choirs   |
|                | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                       |
| MU.68.C.2.2:   | Clarifications:   |
|                | e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
| MU.68.F.3.2:   | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.          |
| MU.68.H.1.1:   | Describe the functions of music from various cultures and time periods.   |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.  |
|                | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.   |
|                | Clarifications:   |
| MU.68.H.3.1:   | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural                 |
|                | connections and traditions, ceremonial music, sales and advertising, communication  |
|                | Discuss how the absence of music would affect other content areas and contexts.   |
| MU.68.H.3.2:   | Clarifications:   |
|                | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays           |
|                | Compare performances of a musical work to identify artistic choices made by performers.   |
| MU 68 O 1 1    |   |
| 10.00.0.1.1.   | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble  |
|                | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific theught idea, meed, and/or image          |
|                | bescribe now the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.        |
| MU.68.0.3.1:   | Clarifications:   |
|                | e.g., tempo markings, expression markings, articulation markings, pinasing, scales, modes, namonic structure, timpre, mythin, orchestration               |
|                | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.   |
| MU.68.S.1.1:   | Clarifications:   |
|                | e.g., blues, rock   |
| MU.68.S.1.3:   | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
|                | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4:   | Clarifications:   |
|                | e.g., melodies using traditional classroom instruments and/or voice   |
|                | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1:   | Clarifications:   |
|                | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|                | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2:   | Clarifications:   |
|                | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3:   | Clarifications:   |
|                | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols                                |
| MU.68.S.3.5:   | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |
|                | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and   |
|                | issues, building on others' ideas and expressing their own clearly.   |
| LAFS.6.SL.1.1: | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic,     |
|                | text, or issue to probe and reflect on ideas under discussion.  |
|                | b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.                                       |
|                | c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under               |
|                | discussion.   |
|                | a. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.                             |
|                | Standard Relation to Course: Supporting   |
| LAFS.6.SL.1.2: | Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or |
|                | issue under study.  |
| LAFS.6.SL.1.3: | Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.            |

| LAFS.6.SL.2.4:    | Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.  |
|-------------------|--|
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical<br>context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.   |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.   |
|                   | Use appropriate tools strategically.   |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,<br>concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.<br>Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools<br>might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze<br>graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other<br>mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying<br>assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify<br>relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use<br>technological tools to explore and deepen their understanding of concepts.<br><b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.   |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|                   | Standard Relation to Course: Supporting  |
|                   | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |
|                   | Standard Relation to Course: Supporting  |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

Students with little or no choral experience develop beginning vocal technique and skills, critical and creative thinking skills, and an appreciation of music from around the world and through time. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

# GENERAL NOTES

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. |                 | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2:    | Clarifications:   |
|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                 | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3:    | Clarifications:   |
|                 | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
| MU.68.S.3.5:    | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |
|                 | Mathematicians who participate in effortful learning both individually and with others:   |
|                 | Analyze the problem in a way that makes sense given the task.   |
|                 | Ask questions that will help with solving the task.     Delid account of the model of the task.   |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.   |
|                 | <ul> <li>Stay engaged and maintain a positive minuser when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach</li> </ul> |
| MA.K12.MTR.1.1: |   |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others   |
|                 | Cultivate a community of growth mindset learners.   |
|                 | Foster perseverance in students by choosing tasks that are challenging.   |
|                 | Develop students' ability to analyze and problem solve.   |
|                 | Recognize students' effort when solving challenging problems.   |
|                 | Demonstrate understanding by representing problems in multiple ways.  |

| MA.K12.MTR.2.1: | <ul> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li></ul>   |
|-----------------|--|
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>• Select efficient and appropriate methods for solving problems within the given context.<br>• Maintain flexibility and accuracy while performing procedures and mental calculations.<br>• Complete tasks accurately and with confidence.<br>• Adapt procedures to apply them to a new context.<br>• Use feedback to improve efficiency when performing calculations.<br><b>Clarifications:</b><br>Teachers who encourage students to complete tasks with mathematical fluency:<br>• Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>• Offer multiple opportunities for students to practice efficient and generalizable methods.<br>• Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.   |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> </li> </ul></li></ul> |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br><b>Clarifications:</b><br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.<br>• Develop <b>students' ability to construct relationships between their current</b> understanding and more sophisticated ways of thinking.  |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through justifications.   |

| MA.K12.MTR.7.1:   | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
|-------------------|---|
|                   | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>   |
|                   | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.         • Indicate how various concepts can be applied to other disciplines.   |
|                   | Cite evidence to explain and justify reasoning.   |
|                   | <ul> <li>Clarifications:</li> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> </ul> |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
| ELA.K12.EE.5.1:   | Use the accepted rules governing a specific format to create quality work.  |
|                   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students with little or no choral experience develop beginning vocal technique and skills, critical and creative thinking skills, and an appreciation of music from around the world and through time. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

**GENERAL NOTES** 

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# M/J Chorus 2 (#1303010) 2020 - 2022 (current)

| Name           | Description  |
|----------------|--|
|                | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:   | Clarifications:  |
|                | e.g., listening maps, active listening, checklists   |
|                | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |
| MU.68.C.1.2:   | Clarifications:  |
|                | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title  |
|                | Identify, aurally, a variety of vocal styles and ensembles.  |
| MU.68.C.1.4:   | Clarifications:  |
|                | e.g., chant, spiritual, folk, opera, world, jazz, pop, solo, duet, trio, quartet, small ensembles, choirs  |
|                | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
| MU.68.C.2.1:   | Clarifications:  |
|                | e.g., intonation, balance, blend, phrasing, rhythm   |
|                | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.  |
| MU.68.C.2.2:   | Clarifications:  |
|                | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
|                | Describe how concert attendance can financially impact a community.  |
| MU.68.F.2.2:   | Clarifications:  |
|                | e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants  |
| MU.68.F.3.2:   | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
| MU.68.H.1.1:   | Describe the functions of music from various cultures and time periods.  |
| MU.68.H.1.5:   | Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.  |
| MU.68.H.2.1:   | Describe the influence of historical events and periods on music composition and performance.  |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.   |
|                | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1:   | Clarifications:  |
|                | e.g., school: other music classes, social studies, dance, physical education, science, nearth, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication |
|                | Discuse how the absence of music would affect other content areas and contexts   |
| MIL 40 11 2 2. |  |
| ШО.00.П.3.2.   | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays  |
|                | Compare performances of a musical work to identify artistic choices made by performers   |
| MUL 40 O 1 1.  | Clarifications:  |
| WIU.00.U.T.T.  | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble   |
|                | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought idea, mood, and/or image   |
| MIL 69 O 2 1.  | Clarifications:  |
| WI0.08.0.3.1.  | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration   |
|                | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to   |
| MU.68.0.3.2:   | other musical works.   |
|                | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1:   | Clarifications:  |
|                | e.g., blues, rock  |
| MU.68.S.1.3:   | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|                | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:   | Clarifications:  |
|                | e.g., melodies using traditional classroom instruments and/or voice  |
|                | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1:   | Clarifications:  |
|                | e.g., basic themes, patterns, tonality, melody, harmony  |
|                | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:   | Clarifications:  |
|                | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:   | Clarifications:  |
|                | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |

|                                  | Sight-read standard exercises and simple repertoire.  |
|----------------------------------|---|
| MU.68.S.3.3:                     | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|                                  | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:                     | Clarifications:<br>e.g., error detection, interval reinforcement  |
| MU.68.S.3.5:                     | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |
|                                  | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:                     | Clarifications:<br>e.g., independently, collaboratively   |
| LAFS.6.SL.1.1:                   | <ul> <li>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</li> <li>b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.</li> <li>c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion.</li> <li>d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.</li> <li>Standard Relation to Course: Supporting</li> </ul>   |
| LAFS 6 SL 1 2.                   | Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or   |
| LAI 5.0.3L.1.2.                  | issue under study.  |
| LAFS.6.SL.1.3:<br>LAFS.6.SL.2.4: | Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.<br>Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.   |
| LAFS.68.RST.2.4:                 | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.2.4:                | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.68.WHST.3.9:                | Draw evidence from informational texts to support analysis reflection, and research.  |
| MAFS.K12.MP.5.1:                 | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                                  | Attend to precision.  |
| MAFS.K12.MP.6.1:                 | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                                  | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:                 | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see $7 \times 8$ equals the well remembered $7 \times 5 + 7 \times 3$ , in preparation for learning about the distributive property. In the expression $x^2$<br>+ $9x + 14$ , older students can see the 14 as $2 \times 7$ and the 9 as $2 + 7$ . They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting  |
| DA.68.S.2.1:                     | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1:                | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students build on previous choral experience to expand vocal, technical, musical, and ensemble skills through rehearsal, performance, and study of high-quality choral literature. Singers focus on increasing knowledge of music theory, music literacy, and aesthetic response. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

# GENERAL NOTES

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. | MA.K12.MTR.5.1: | <ul> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> </ul>  |
|-----------------|---|
|                 | Connect solutions of problems to more complicated large-scale situations.   |
|                 | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking. |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:   |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>  |
|                 | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.   |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
|                 | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>   |
| MA.K12.MTR.7.1: | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts: <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul>  |
|                 | Cite evidence to explain and justify reasoning.   |
|                 | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.   |
|                 | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                 | <ul><li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li><li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li></ul>   |
|                 | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1: | Clarifications:   |
|                 | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1: | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
| ELA.K12.EE.4.1: | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
|                 | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                 | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                 | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1: | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to  |

|                   | do quality work.  |
|-------------------|---|
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students build on previous choral experience to expand vocal, technical, musical, and ensemble skills through rehearsal, performance, and study of high-quality choral literature. Singers focus on increasing knowledge of music theory, music literacy, and aesthetic response. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

# **GENERAL NOTES**

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

## **Educator Certifications**

| Instrumental Music (Secondary Grades 7-12)                |  |
|---|--|
| Instrumental Music (Elementary and Secondary Grades K-12) |  |
| Music (Elementary and Secondary Grades K-12)              |  |
| Vocal Music (Elementary and Secondary Grades K-12)        |  |

| Name           | Description  |
|----------------|--|
|                | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:   | Clarifications:  |
|                | e.g., listening maps, active listening, checklists   |
|                | Compare, using correct music vocabulary, the aesthetic impact of a <b>performance to one's own hypothesis of the composer's intent</b> .             |
| MU.68.C.1.2:   |  |
|                | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                        |
|                | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.       |
| MU.68.C.2.1:   | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm  |
|                | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal                   |
| MU 40 C 2 2.   | Clarifications   |
| WIU.00.C.2.2.  | e.g., blend, balance, ensemble plaving, sonority, technique, tone quality  |
| MU 40 C 2 1.   | Apply specific stitute to evaluate why a musical work is an exampler in a specific style or gapra  |
| MU.08.C.3.T:   | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style of genre.  |
|                | Clarifications   |
| MU.68.F.2.1:   | e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales                            |
|                | Describe how concert attendance can financially impact a community.  |
| MU.68.F.2.2:   | Clarifications:  |
|                | e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants  |
|                | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU 68 F 3 1    | Clarifications:  |
|                | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect       |
| MU.68.F.3.2:   | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.     |
| MU.68.H.1.2:   | Identify the works of representative composers within a specific style or time period.   |
| MU.68.H.1.3:   | Describe how American music has been influenced by other cultures.   |
|                | Classify authentic stylistic features in music originating from various cultures.  |
|                | Clarifications:  |
| MU.68.H.1.4:   | e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, |
|                | aural/oral traditions, drumming patterns   |
| MU.68.H.2.1:   | Describe the influence of historical events and periods on music composition and performance.  |
|                | Analyze how technology has changed the way music is created, performed, acquired, and experienced.   |
| MU.68.H.2.2:   | Clarifications:  |
|                | e.g., from harpsichord to piano; from phonograph to CD   |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.   |
|                | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.                                    |
| MIL (0 11 2 1. | Clarifications:  |
| IVIU.00.H.3.1. | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural            |
|                | connections and traditions, ceremonial music, sales and advertising, communication   |
|                | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2:   | Clarifications:  |
|                | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays      |
|                | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.0.1.1:   | Clarifications:  |
|                | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble                                       |
|                | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.0.2.2:   | Clarifications   |
|                | e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|                | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought idea mood and/or image       |
| MU 49 O 2 1.   | Clarificatione:  |
| WO.00.0.3.1.   | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration         |
|                | Deform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and expressiones to     |
| MU.68.0.3.2:   | other musical works.   |
|                | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU 68 S 1 1·   | Clarifications:  |
|                |  |

|                   | e.g., blues, rock   |
|-------------------|---|
| MU.68.S.1.3:      | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
|                   | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4:      | Clarifications:   |
|                   | e.g., melodies damp it admonaticassion in instruments and/or voice  |
| MUL 40 S O 1.     |   |
| WU.06.3.2.1.      | e.g., basic themes, patterns, tonality, melody, harmony   |
| MU.68.S.2.2:      | Transfer performance techniques from familiar to unfamiliar pieces.   |
|                   | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1:      | Clarifications:   |
|                   | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|                   | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2:      | Clarifications:   |
|                   | e.g., postere, breathing, hingening, embouchare, bow technique, turning, strumming  |
| MII 40 5 2 2.     |   |
| WU.00.3.3.3.      | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|                   | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:      | Clarifications:   |
|                   | e.g., error detection, interval reinforcement   |
| MU.68.S.3.5:      | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |
|                   | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:      | Clarifications:   |
|                   | E.g., independently, conabolatively   |
| LAFS.68.RST.2.4:  | context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.  |
|                   | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade / topics, texts, and issues, building on others' ideas and expressing their own clearly.   |
|                   | a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the  |
|                   | topic, text, or issue to probe and reflect on ideas under discussion.   |
| LAFS.7.SL.1.1:    | b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed.   |
|                   | discussion back on topic as needed.   |
|                   | d. Acknowledge new information expressed by others and, when warranted, modify their own views.   |
|                   | Standard Relation to Course: Supporting   |
| LAFS 7 SL 1 2.    | Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas   |
|                   | clarify a topic, text, or issue under study.  |
| LAFS.7.SL.1.3:    | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.<br>Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples: use    |
| LAFS.7.SL.2.4:    | appropriate eye contact, adequate volume, and clear pronunciation.  |
|                   | Use appropriate tools strategically.  |
|                   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper.  |
|                   | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.  |
|                   | Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful recognizing both the inside to be gained and their limitations. For example, mothematically proficient bids school students applying |
| MAFS.K12.MP.5.1:  | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other  |
|                   | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying  |
|                   | assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to nose or solve problems. They are able to use  |
|                   | technological tools to explore and deepen their understanding of concepts.  |
|                   | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.6.1:  | Attend to precision.  |
|                   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own   |
|                   | specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,   |
|                   | express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully   |
|                   | tormulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
|                   | LOOK FOR AND MAKE USE OF STRUCTURE.   |
|                   | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may cort a collection of shapes according to how many cides the shapes have a later              |
|                   | students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$  |
| MAES K12 MP 7 1   | +9x + 14, older students can see the 14 as 2 x 7 and the 9 as $2 + 7$ . They recognize the significance of an existing line in a geometric figure and   |

|                   | can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting |
|-------------------|--|
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

Students with previous choral experience build intermediate-level knowledge of vocal technique, musical literacy, ensemble skills, and related musical knowledge through rehearsal, performance, and study of a variety of high-quality 2-, 3-, and 4-part choral literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## GENERAL NOTES

## English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# GENERAL INFORMATION

Course Number: 1303020

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Choral Music > Abbreviated Title: M/J CHORUS 3 Course Length: Year (Y) Course Level: 2

Course Status: Course Approved Grade Level(s): 6,7,8

## **Educator Certifications**

| Music (Elementary and Secondary Grades K-12)             |  |  |
|--|--|--|
| Instrumental Music (Secondary Grades 7-12)               |  |  |
| nstrumental Music (Elementary and Secondary Grades K-12) |  |  |
| Vocal Music (Elementary and Secondary Grades K-12)       |  |  |

# M/J Chorus 3 (#1303020) 2022 - And Beyond

| Name                     | Description  |
|--------------------------|--|
|                          | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:             | Clarifications:  |
|                          | e.g., listening maps, active listening, checklists   |
|                          | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                     |
| MU.68.C.1.2:             | Clarifications:  |
|                          | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                        |
|                          | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.       |
| MU.68.C.2.1:             | Clarifications:  |
|                          | e.g., intonation, balance, blend, phrasing, rhythm   |
|                          | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                  |
| MU.68.C.2.2:             | Clarifications:  |
|                          | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU 68 C 3 1 <sup>.</sup> | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre   |
|                          | Describe several routes a composition or performance could travel from creator to consumer.  |
| MU.68.F.2.1:             | Clarifications:  |
|                          | e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales                            |
|                          | Describe how concert attendance can financially impact a community.  |
| MU 68 F 2 2              |  |
| 10.00.1 .2.2.            | e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants  |
|                          | Describe how studying music can enhance citizenshin, leadershin, and global thinking   |
| MIL 60 E 2 1.            |  |
| WU.08.F.3.T:             | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect       |
| МП 40 Г 2 2.             | Investigate and discuss laws that protect intellectual property, and practice sets, legal, and responsible acquisition and use of musical media      |
| MU.00.F.3.2.             | Identify the works of representative composers within a specific style or time period  |
| MU.68.H.1.3:             | Describe how American music has been influenced by other cultures.   |
|                          | Classify authentic stylistic features in music originating from various cultures.  |
|                          | Clarifications:  |
| MU.68.H.1.4:             | e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, |
|                          | aural/oral traditions, drumming patterns   |
| MU.68.H.2.1:             | Describe the influence of historical events and periods on music composition and performance.  |
|                          | Analyze how technology has changed the way music is created, performed, acquired, and experienced.   |
| MU.68.H.2.2:             | Clarifications:  |
|                          | e.g., from harpsichord to piano; from phonograph to CD   |
| MU.68.H.2.3:             | Classify the literature being studied by genre, style, and/or time period.   |
|                          | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.                                    |
| MIL 68 H 3 1·            | Clarifications:  |
| M0.00.11.3.1.            | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural            |
|                          | connections and traditions, ceremonial music, sales and advertising, communication   |
|                          | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2:             | Clarifications:  |
|                          | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays      |
|                          | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.0.1.1:             | Clarifications:  |
|                          | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble                                       |
|                          | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.0.2.2:             | Clarifications:  |
|                          | e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|                          | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU.68.0.3.1:             | Clarifications:  |
|                          | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration         |
| MU 49 O 2 2:             | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to     |
| IVIU.00.U.3.2:           | other musical works.   |
|                          | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1:             | Clarifications:  |

|                 | e.g., blues, rock  |
|-----------------|--|
| MU.68.S.1.3:    | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|                 | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:    | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice   |
|                 | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1:    | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony   |
| MU.68.S.2.2:    | Transfer performance techniques from familiar to unfamiliar pieces.  |
| MU.68.S.3.1:    | Sing and/or play age-appropriate repertoire expressively.  |
|                 | Clarifications:  |
|                 | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
| MU.68.S.3.2:    | Demonstrate proper vocal or instrumental technique.  |
|                 | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                 | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:    | Clarifications:  |
|                 | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|                 | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:    | Clarifications:<br>e.g., error detection, interval reinforcement   |
| MU.68.S.3.5:    | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.<br>Develop and demonstrate efficient rehearsal strategies to apply skills and techniques     |
| MU.68.S.3.6:    | Clarifications:  |
|                 | e.g., independently, collaboratively   |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |
|                 | Analyze the problem in a way that makes sense given the task.  |
|                 | <ul> <li>Ask questions that will help with solving the task.</li> <li>Puild persoverance by medifying methods as peeded while solving a challenging task.</li> </ul>                       |
| MA.K12.MTR.1.1: | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul> |
|                 | <ul> <li>Help and support each other when attempting a new method or approach.</li> </ul>  |
|                 | Clarifications:  |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                 | Cultivate a community of growth mindset learners.  |
|                 | <ul> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to apply and problem solve.</li> </ul>                                 |
|                 | <ul> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
|                 | Demonstrate understanding by representing problems in multiple ways.   |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                 | Build understanding through modeling and using manipulatives.  |
|                 | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.  |
|                 | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>   |
| MA.K12.MTR.2.1: | <ul> <li>Express connections between concepts and representations.</li> <li>Chappe a representation based on the given context or purpose.</li> </ul>                                      |
|                 |  |
|                 | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:  |
|                 | Help students make connections between concepts and representations.   |
|                 | Provide opportunities for students to use manipulatives when investigating concepts.   |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.   |
|                 | Show students that various representations can have different purposes and can be useful in different situations.  |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:  |
|                 | Select efficient and appropriate methods for solving problems within the given context.  |
|                 | Maintain flexibility and accuracy while performing procedures and mental calculations.   |
|                 | Complete tasks accurately and with confidence.   |
|                 | Adapt procedures to apply them to a new context.   |
|                 | Use recuback to improve efficiency when performing calculations.   |
|                 | Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:  |
|                 | Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.   |
|                 | Offer multiple opportunities for students to practice efficient and generalizable methods.   |
|                 | • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.   |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.  |
|                 | mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |
| MA.K12.MTR.4.1: | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul>   |
|-----------------|--|
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems.</li></ul>  |
|                 | <ul> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> <li>Assess the reasonableness of solutions.</li> <li>Mathematicians who assess the reasonableness of solutions:</li> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> </ul>   |
| MA.K12.MTR.6.1: | <ul> <li>Evaluate results based on the given context.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul> </li> </ul>  |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency</li> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
| ELA.K12.EE.1.1: | <ul> <li>Cite evidence to explain and justify reasoning.</li> <li>Clarifications:</li> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> <li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li> </ul> |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.   |

| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.               |
|-------------------|--|
| ELA.K12.EE.4.1:   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
|                   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.   |
|                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students with previous choral experience build intermediate-level knowledge of vocal technique, musical literacy, ensemble skills, and related musical knowledge through rehearsal, performance, and study of a variety of high-quality 2-, 3-, and 4-part choral literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1303020

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Choral Music > Abbreviated Title: M/J CHORUS 3 Course Length: Year (Y) Course Level: 2

Course Status: State Board Approved Grade Level(s): 6,7,8 Music (Elementary and Secondary Grades K-12)

Instrumental Music (Secondary Grades 7-12)

Instrumental Music (Elementary and Secondary Grades K-12)

Vocal Music (Elementary and Secondary Grades K-12)

# M/J Chorus 4 (#1303030) 2020 - 2022 (current)

MU.68.H.1.4:       Clarifications:         e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation.   |
| MU.68.H.1.2:       Identify the works of representative composers within a specific style or time period.         MU.68.H.1.3:       Describe how American music has been influenced by other cultures.         Classify authentic stylistic features in music originating from various cultures.         MU.68.H.1.4:       Clarifications:         e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation.  |
| MU.68.H.1.3: Describe how American music has been influenced by other cultures. Classify authentic stylistic features in music originating from various cultures. Clarifications: e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation.   |
| MU.68.H.1.4: Classify authentic stylistic features in music originating from various cultures.<br>Clarifications: e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation.   |
| MU.68.H.1.4: Clarifications:<br>e.g., rhythm, layered texture, key patterns, tonality, melodic line, guarter- or semi-tones, national folk melodies, improvisation, instrumentation.   |
| e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation.   |
| aural/oral traditions, drumming natterns   |
|  |
| MU.68.H.1.5: Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.   |
| Analyze how technology has changed the way music is created, performed, acquired, and experienced  |
|  |
| e.g., from harpsichord to piano; from phonograph to CD   |
| MIL68 H 2.3 Classify the literature being studied by genre, style, and/or time period  |
| Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| Clarifications:  |
| MU.68.H.3.1:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural  |
| connections and traditions, ceremonial music, sales and advertising, communication   |
| Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2: Clarifications:   |
| e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays  |
| Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.0.1.1: Clarifications:   |
| e a rhythm melody timbre form tonality harmony expressive elements, choral procestral hand ensemble  |
| s.g., myann, molody, amore, rorn, tonancy, narmony, expressive elements, chorat, orchestrat, band, ensemble  |

| MU.68.0.2.1:      | Clarifications:<br>e.g., using electronic or paper-and-pencil means to experiment with timbre, melody, rhythm, harmony, form, tonality   |
|-------------------|--|
|                   | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.O.2.2:      | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor  |
|                   | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image  |
| MU.68.O.3.1:      | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
| MU.68.O.3.2:      | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.  |
|                   | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1:      | Clarifications:<br>e.g., blues, rock   |
|                   | Compose a short musical piece.   |
| MU.68.S.1.2:      | Clarifications:<br>e.g., using traditional, non-traditional, digital, or classroom instruments and/or voice  |
| MU.68.S.1.3:      | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|                   | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:      | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice   |
|                   | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1:      | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony   |
| MU.68.S.2.2:      | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                   | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:      | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|                   | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:      | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                   | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:      | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|                   | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:      | Clarifications:<br>e.g., error detection, interval reinforcement   |
| MU 68 S 3 5       | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else   |
|                   | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.   |
| MU.68.S.3.6:      | Clarifications:<br>e.g., independently, collaboratively  |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.   |
| LAFS.68.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.   |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.   |
|                   | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly.<br>a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic topics and explore and exp |
| LAFS.8.SL.1.1:    | <ul> <li>b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed.</li> <li>c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas.</li> </ul>   |
|                   | d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.  |
|                   | Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social  |
| LAFS.8.SL.1.2:    | commercial, political) behind its presentation.<br>Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and   |
| LAFS.8.SL.1.3:    | identifying when irrelevant evidence is introduced.  |
| LAFS.8.SL.2.4:    | Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.   |
|                   | Use appropriate tools strategically.   |
|                   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient biols school students analyze  |
| MAFS.K12.MP.5.1:  | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other   |

|                   | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. Standard Relation to Course: Supporting  |
|-------------------|---|
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x<br>- y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students with significant experience in a choral ensemble develop advanced knowledge of vocal techniques, music literacy, ensemble skills, and related musical knowledge through rehearsal, performance, and study of a variety of high-quality advanced choral literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1303030

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Choral Music > Abbreviated Title: M/J CHORUS 4 Course Length: Year (Y) Course Level: 2

Course Status: Course Approved Grade Level(s): 6,7,8

#### **Educator Certifications**

| Music (Elementary and Secondary Grades K-12)              |
|---|
| Instrumental Music (Secondary Grades 7-12)                |
| Instrumental Music (Elementary and Secondary Grades K-12) |
| Vocal Music (Elementary and Secondary Grades K-12)        |

# M/J Chorus 4 (#1303030) 2022 - And Beyond

| Name                     | Description  |
|--------------------------|--|
|                          | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:             | Clarifications:  |
|                          | e.g., listening maps, active listening, checklists   |
|                          | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |
| MU 68 C 1 2 <sup>.</sup> | Clarifications:  |
|                          | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title  |
|                          | Identify, aurally, a variety of vocal styles and ensembles.  |
| MU.68.C.1.4:             | Clarifications:  |
|                          | e.g., chant, spiritual, folk, opera, world, jazz, pop, solo, duet, trio, quartet, small ensembles, choirs  |
|                          | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
| MU.68.C.2.1:             | Clarifications:  |
|                          | e.g., intonation, balance, blend, phrasing, rhythm   |
|                          | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.  |
| MU.68.C.2.2:             | Clarifications:  |
|                          | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.C.2.3:             | Critique personal composition and/or improvisation, using simple criteria, to generate improvements with guidance from teachers and/or peers.  |
| MU.68.C.3.1:             | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
| MU.68.F.1.1:             | Create a composition and/or performance, using visual, kinesthetic, digital, and/or acoustic means to manipulate musical elements.   |
|                          | Describe several routes a composition or performance could travel from creator to consumer.  |
| MU.68.F.2.1:             | Clarifications:  |
|                          | e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales  |
|                          | Describe how concert attendance can financially impact a community.  |
| MU.68.F.2.2:             | Clarifications:  |
|                          | e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants  |
|                          | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1:             | Clarifications:  |
|                          | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect   |
| MU.68.F.3.2:             | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
|                          | Identity the tasks involved in the compositional process and discuss now the process might be applied in the work place.   |
| MU.68.F.3.3:             | Clarifications:  |
| MIL 40 11 1 0.           | Identify the works of representative compasses within a specific style or time period  |
| MU.68.H 1.3.             | Describe how American music has been influenced by other cultures  |
| 10.00.11.1.0.            | Classify authentic stylistic features in music originating from various cultures.  |
|                          | Clarifications:  |
| MU.68.H.1.4:             | e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation,   |
|                          | aural/oral traditions, drumming patterns   |
| MU.68.H.1.5:             | Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.  |
| MU.68.H.2.1:             | Describe the influence of historical events and periods on music composition and performance.  |
|                          | Analyze how technology has changed the way music is created, performed, acquired, and experienced.   |
| MU.68.H.2.2:             | Clarifications:  |
|                          | e.g., from harpsichord to piano; from phonograph to CD   |
| MU.68.H.2.3:             | Classify the literature being studied by genre, style, and/or time period.   |
|                          | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1:             | Clarifications:  |
|                          | e.g., school: other music classes, social studies, dance, physical education, science, nearth, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication |
|                          | Discuss how the absence of music would affect other content areas and contexts   |
| MIL 68 H 3 2.            | Clarifications:  |
| WIU.00.Π.3.2.            | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays  |
|                          | Compare performances of a musical work to identify artistic choices made by performers   |
| MIL 68 O 1 1             | Clarifications:  |
|                          | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble   |
|                          | Create a composition, manipulating musical elements and exploring the effects of those manipulations   |
|                          |  |

| MU.68.0.2.1:    | Clarifications:  |
|-----------------|--|
|                 | e.g., using electronic or paper-and-pencil means to experiment with timbre, melody, rhythm, harmony, form, tonality  |
|                 | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| 10.00.0.2.2.    | e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|                 | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image  |
| MU.68.0.3.1:    | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
| MIL 60 0 2 2.   | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to   |
| MU.08.0.3.2:    | other musical works.   |
| MU.68.S.1.1:    | Clarifications:  |
|                 | e.g., blues, rock  |
|                 | Compose a short musical piece.   |
| MU.68.S.1.2:    | Clarifications:<br>e.g., using traditional, non-traditional, digital, or classroom instruments and/or voice  |
| MU.68.S.1.3:    | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|                 | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:    | Clarifications:  |
|                 | Perform music from memory to demonstrate knowledge of the musical structure  |
| MU.68.S.2.1:    | Clarifications:  |
|                 | e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2:    | Transfer performance techniques from familiar to unfamiliar pieces.  |
| MU 68 S 3 1     | Clarifications:  |
|                 | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                 | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:    | Clarifications:  |
|                 | Sight-read standard exercises and simple repertoire  |
| MU.68.S.3.3:    | Clarifications:  |
| M0.00.3.3.3.    | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|                 | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:    | Clarifications:<br>e.g., error detection, interval reinforcement   |
| MU.68.S.3.5:    | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.  |
|                 | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.   |
| MU.68.S.3.6:    | Clarifications:  |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |
|                 | Analyze the problem in a way that makes sense given the task.  |
|                 | <ul> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> </ul>   |
|                 | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>  |
| MA.K12.MTR.1.1: | Help and support each other when attempting a new method or approach.  |
|                 | Clarifications:<br>Teachers who encourage students to participate actively in effortful learning both individually and with others:  |
|                 | Cultivate a community of growth mindset learners.  |
|                 | <ul> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve</li> </ul>  |
|                 | <ul> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
|                 | Demonstrate understanding by representing problems in multiple ways.   |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                 | <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Decreasest colutions to problems in multiple using objects, drawings, tables, graphs and equations.</li> </ul>                                     |
|                 | <ul> <li>Represent solutions to problems in multiple ways using objects, or awings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul> |
|                 | Express connections between concepts and representations.  |
| MA.K12.MTR.2.1: | Choose a representation based on the given context or purpose.   |
|                 | Clarifications:<br>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                 | Help students make connections between concepts and representations.   |
|                 | <ul> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> </ul>               |
| I               | · · · · · · · · · · · · · · · · · · ·  |

|                 | • Show students that various representations can have different purposes and can be useful in different situations.  |
|-----------------|--|
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:  |
| MA.K12.MTR.3.1: | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul> </li> </ul>  |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  |
| MA.K12.MTR.4.1: | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> </li> </ul> |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>                              |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>                       |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to assess the reasonableness of solutions: <ul> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul> </li> </ul>  |
|                 | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficience</li> </ul>   |
| MA.K12.MTR.7.1: | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |

|                   | Cite evidence to explain and justify reasoning.   |
|-------------------|---|
| ELA.K12.EE.1.1:   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
|                   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
| ELA.K12.EE.5.1:   | Use the accepted rules governing a specific format to create quality work.  |
|                   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students with significant experience in a choral ensemble develop advanced knowledge of vocal techniques, music literacy, ensemble skills, and related musical knowledge through rehearsal, performance, and study of a variety of high-quality advanced choral literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Course Number: 1303030

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Choral Music > Abbreviated Title: M/J CHORUS 4 Course Length: Year (Y) Course Level: 2

Course Status: State Board Approved Grade Level(s): 6,7,8

## **Educator Certifications**

| Music (Elementary and Secondary Grades K-12)              |
|---|
| Instrumental Music (Secondary Grades 7-12)                |
| Instrumental Music (Elementary and Secondary Grades K-12) |
| Vocal Music (Elementary and Secondary Grades K-12)        |

# M/J Vocal Techniques 1 (#1303070) 2020 - 2022 (current)

| Name           | Description   |
|----------------|---|
|                | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1:   | Clarifications:<br>e.g., listening maps, active listening, checklists   |
|                | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.  |
| MU.68.C.1.2:   | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title  |
|                | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.  |
| MU.68.C.2.1:   | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm   |
|                | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.   |
| MU.68.C.2.2:   | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.  |
|                | Compare performances of a musical work to identify artistic choices made by performers.   |
| MU.68.O.1.1:   | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble   |
|                | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.  |
| MU.68.O.3.1:   | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration   |
|                | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.   |
| MU.68.S.1.1:   | Clarifications:<br>e.g., blues, rock  |
|                | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4:   | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice  |
|                | Perform music from memory to demonstrate knowledge of the musical structure.  |
| MU.68.S.2.1:   | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2:   | Transfer performance techniques from familiar to unfamiliar pieces.   |
|                | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1:   | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3:   | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|                | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:   | Clarifications:<br>e.g., error detection, interval reinforcement  |
| MU.68.S.3.5:   | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |
|                | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:   | Clarifications:<br>e.g., independently, collaboratively   |
| LAFS.6.SL.1.1: | <ul> <li>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</li> <li>b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.</li> <li>c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion.</li> </ul> |
|                | <ul> <li>Review the key local expression and demonstrate understanding of multiple perspectives through reflection and paraphrasing.</li> </ul>   |
|                | Standard Relation to Course: Supporting   |

| LAFS.6.SL.1.2:    | Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.  |
|-------------------|---|
| LAFS.6.SL.1.3:    | Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.  |
| LAFS.6.SL.2.4:    | Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.   |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| MAFS.K12.MP.5.1:  | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,<br>concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.<br>Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools<br>might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze<br>graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other<br>mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying<br>assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify<br>relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use<br>technological tools to explore and deepen their understanding of concepts.<br>Standard Relation to Course: Supporting |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
|                   | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                   | Standard Relation to Course: Supporting   |
| LLU.NIZ.ELL.3I.I. | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students with little or no vocal experience develop musicianship, technical proficiency, and performance skills. Beginning musicians focus on development of skills and techniques through scales, etudes, and solo literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1303070

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Choral Music > Abbreviated Title: M/J VOCAL TECNQS 1 Course Length: Year (Y)

#### **Educator Certifications**

Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12)

# M/J Vocal Techniques 1 (#1303070) 2022 - And Beyond

| Name            | Description  |
|-----------------|--|
|                 | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:    | Clarifications:  |
|                 | e.g., listening maps, active listening, checklists   |
|                 | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |
| MU.68.C.1.2:    | Clarifications:  |
|                 | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title  |
|                 | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.                               |
| MU.68.C.2.1:    | Clarifications:  |
|                 | e.g., intonation, balance, blend, phrasing, rhythm   |
|                 | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.  |
| MU.68.C.2.2:    | Clarifications:  |
|                 | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.H.2.3:    | Classify the literature being studied by genre, style, and/or time period.   |
|                 | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.0.1.1:    | Clarifications:  |
|                 | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble   |
|                 | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.                           |
| MU.68.0.3.1:    | Clarifications:  |
|                 | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration                                 |
|                 | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1:    | Clarifications:  |
|                 | e.g., blues, rock  |
|                 | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:    | Clarifications:  |
|                 | e.g., melodies using traditional classroom instruments and/or voice  |
|                 | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1:    | Clarifications:  |
|                 | e.g., basic themes, patterns, tonainty, merody, narmony  |
| MU.68.S.2.2:    | Transfer performance techniques from familiar to unfamiliar pieces.  |
| MUL 40 C 2 1.   |  |
| MU.08.3.3.1.    | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                 | Demonstrate proper vocal or instrumental technique   |
| MIL 68 5 3 2·   |  |
| 10.00.3.3.2.    | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                 | Sight-read standard exercises and simple repertoire.   |
| MU 68 S 3 3     | Clarifications:  |
| 101001010101    | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|                 | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:    | Clarifications:  |
|                 | e.g., error detection, interval reinforcement  |
| MU.68.S.3.5:    | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.  |
|                 | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.   |
| MU.68.S.3.6:    | Clarifications:  |
|                 | e.g., independently, collaboratively   |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |
| MA.K12.MTR.1.1: | Analyze the problem in a way that makes sense given the task.  |
|                 | Ask questions that will help with solving the task.  |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.     Stay engaged and maintain a positive mindset when working to solve tasks             |
|                 | <ul> <li>Stay engaged and maintain a positive minuser when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> |
|                 | Clarifications:  |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                 | Cultivate a community of growth mindset learners.  |

|                 | <ul> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
|-----------------|--|
|                 | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
| MA.K12.MTR.2.1: | <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:  |
| MA.K12.MTR.3.1: | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
|                 | Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:<br>• Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>• Offer multiple opportunities for students to practice efficient and generalizable methods.<br>• Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  |
| MA.K12.MTR.4.1: | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
| MA.K12.MTR.5.1: | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |
|                 | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         Support students to develop generalizations based on the similarities found among problems.         Provide opportunities for students to create plans and procedures to solve problems.         Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.                                    |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
|                 | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:  |

|                   | <ul> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>   |
|-------------------|--|
| MA.K12.MTR.7.1:   | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency</li> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
| ELA.K12.EE.1.1:   | Cite evidence to explain and justify reasoning.         Clarifications:         K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.         2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.         4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.         6-8 Students continue with previous skills and use a style guide to create a proper citation.         9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. |
| ELA.K12.EE.2.1:   | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
| ELA.K12.EE.3.1:   | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
| ELA.K12.EE.4.1:   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
| ELA.K12.EE.5.1:   | Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.   |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.<br>Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students with little or no vocal experience develop musicianship, technical proficiency, and performance skills. Beginning musicians focus on development of skills and techniques through scales, etudes, and solo literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12)

# M/J Vocal Techniques 2 (#1303080) 2020 - 2022 (current)

| Name         | Description   |
|--------------|---|
|              | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1: | Clarifications:<br>e.g., listening maps, active listening, checklists   |
|              | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                                      |
| MU.68.C.1.2: | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                      |
|              | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.                        |
| MU.68.C.2.1: | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm   |
|              | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                                   |
| MU.68.C.2.2: | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
|              | Describe how studying music can enhance citizenship, leadership, and global thinking.   |
| MU.68.F.3.1: | Clarifications:<br>e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect     |
|              | Analyze how technology has changed the way music is created, performed, acquired, and experienced.  |
| MU.68.H.2.2: | Clarifications:<br>e.g., from harpsichord to piano; from phonograph to CD   |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.  |
|              | Compare performances of a musical work to identify artistic choices made by performers.   |
| MU.68.O.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble                                     |
|              | Demonstrate knowledge of major and minor tonalities through performance and composition.  |
| MU.68.O.2.2: | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|              | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.                    |
| MU.68.O.3.1: | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration       |
| MU.68.O.3.2: | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works. |
|              | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.   |
| MU.68.S.1.1: | Clarifications:<br>e.g., blues, rock  |
|              | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4: | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice  |
|              | Perform music from memory to demonstrate knowledge of the musical structure.  |
| MU.68.S.2.1: | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2: | Transfer performance techniques from familiar to unfamiliar pieces.   |
|              | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1: | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|              | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2: | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|              | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3: | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols                         |
|              | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4: | Clarifications:<br>e.g., error detection, interval reinforcement  |
| MU.68.S.3.5: | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |

|                   | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
|-------------------|---|
| MU.68.S.3.6:      | Clarifications:   |
|                   | e.g., independently, collaboratively  |
|                   | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical   |
| LAFS.68.RST.2.4:  | context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
|                   | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.   |
|                   | a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.  |
| LAES 7 SL 1 1.    | b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed.   |
| LAI 3.7.3L.1.1.   | c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed.   |
|                   | d. Acknowledge new information expressed by others and, when warranted, modify their own views.   |
|                   | Standard Relation to Course: Supporting   |
| LAFS.7.SL.1.2:    | Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas<br>clarify a topic, text, or issue under study.   |
| LAFS.7.SL.1.3:    | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.  |
| LAFS.7.SL.2.4:    | Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use<br>appropriate eye contact, adequate volume, and clear pronunciation.  |
|                   | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
|                   |   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven   |
|                   | students will see 7 x 8 equals the well remembered 7 x 5 + 7 x 3 in preparation for learning about the distributive property. In the expression $x^2$   |
|                   | + 9x + 14, older students can see the 14 as $2 \times 7$ and the 9 as $2 + 7$ . They recognize the significance of an existing line in a geometric figure and   |
|                   | can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see   |
|                   | complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                   | Standard Relation to Course: Supporting   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students build on previous instruction to strengthen their musicianship, technique, and performance skills through preparation of scales, etudes, and solo literature. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills necessary to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area

concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Status: Course Approved Grade Level(s): 6,7,8

## **Educator Certifications**

Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12)

# M/J Vocal Techniques 2 (#1303080) 2022 - And Beyond

| Name         | Description   |
|--------------|---|
|              | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1: | Clarifications:<br>e.g., listening maps, active listening, checklists   |
|              | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                                      |
| MU.68.C.1.2: | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                      |
|              | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.                        |
| MU.68.C.2.1: | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm   |
|              | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                                   |
| MU.68.C.2.2: | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
|              | Describe how studying music can enhance citizenship, leadership, and global thinking.   |
| MU.68.F.3.1: | Clarifications:<br>e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect     |
|              | Analyze how technology has changed the way music is created, performed, acquired, and experienced.  |
| MU.68.H.2.2: | Clarifications:<br>e.g., from harpsichord to piano; from phonograph to CD   |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.  |
|              | Compare performances of a musical work to identify artistic choices made by performers.   |
| MU.68.O.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble                                     |
|              | Demonstrate knowledge of major and minor tonalities through performance and composition.  |
| MU.68.O.2.2: | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|              | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.                    |
| MU.68.O.3.1: | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration       |
| MU.68.O.3.2: | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works. |
|              | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.   |
| MU.68.S.1.1: | Clarifications:<br>e.g., blues, rock  |
|              | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4: | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice  |
|              | Perform music from memory to demonstrate knowledge of the musical structure.  |
| MU.68.S.2.1: | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2: | Transfer performance techniques from familiar to unfamiliar pieces.   |
|              | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1: | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|              | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2: | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|              | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3: | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols                         |
|              | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4: | Clarifications:<br>e.g., error detection, interval reinforcement  |
| MU.68.S.3.5: | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.   |

|                 | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.   |
|-----------------|--|
| MU.68.S.3.6:    | Clarifications:<br>e.g., independently, collaboratively  |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others: <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> </li> <li>Clarifications: <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul></li></ul>  |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul> </li> </ul>  |
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul> Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>   |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li></ul>   |

|                   | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>   |
|-------------------|---|
|                   | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:   |
|                   | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> </ul>  |
| MA.K12.MTR.6.1:   | Evaluate results based on the given context.  |
|                   | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.         • Prompt students to continually ask, "Does this solution make sense? How do you know?"         • Reinforce that students check their work as they progress within and after a task.         • Strengthen students' ability to verify solutions through justifications.  |
|                   | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
|                   | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>   |
| MA.K12.MTR.7.1:   | Clarifications:<br>Teachers who encourage students to apply mathematics to real-world contexts:<br>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.<br>Challenge students to question the accuracy of their models and methods.<br>Support students as they validate conclusions by comparing them to the given situation.  |
|                   | Indicate now various concepts can be applied to other disciplines.  |
|                   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|                   | <ul><li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li><li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li></ul>   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students build on previous instruction to strengthen their musicianship, technique, and performance skills through preparation of scales, etudes, and solo literature. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills necessary to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12)

# M/J Vocal Ensemble 1 (#1303100) 2020 - 2022 (current)

| Name           | Description   |
|----------------|---|
|                | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1:   | Clarifications:   |
|                | e.g., listening maps, active listening, checklists  |
|                | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.  |
| MU.68.C.1.2:   | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title  |
|                | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.  |
| MU.68.C.2.1:   | Clarifications:   |
|                | e.g., intonation, balance, blend, phrasing, rhythm  |
|                | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.   |
| MU.68.C.2.2:   | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.F.3.2:   | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.  |
|                | Classify authentic stylistic features in music originating from various cultures.   |
|                | Clarifications:   |
| MU.68.H.1.4:   | e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, aural/oral traditions, drumming patterns   |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.  |
|                | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.   |
| MIL 40 11 2 1. | Clarifications:   |
| MU.08.H.3.1:   | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication              |
|                | Leventury Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.  |
| MU 68 O 3 1    | Clarifications:   |
| 10.00.0.3.1.   | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
| MU.68.0.3.2:   | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works  |
| MU.68.S.1.3:   | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
|                | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4:   | Clarifications:   |
|                | e.g., melodies using traditional classroom instruments and/or voice   |
| MU.68.S.2.2:   | Transfer performance techniques from familiar to unfamiliar pieces.   |
|                | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1:   | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2:   | Clarifications:   |
|                | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3:   | Clarifications:   |
|                | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|                | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:   | Clarifications:   |
|                | e.g., error detection, interval reinforcement   |
|                | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:   | Clarifications:   |
|                | e.g., independently, collaboratively  |
|                | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and   |
|                | issues, building on others' ideas and expressing their own clearly.   |
|                | <ul> <li>come to unscussions prepared, naving read or studied required material; explicitly draw on that preparation by referring to evidence on the topic,<br/>text, or issue to probe and reflect on ideas under discussion.</li> </ul> |
|                | b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed  |
| LAFS.6.SL.1.1: | c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under   |
|                | discussion.   |
|                | d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.   |
| i.             |   |

|                   | Standard Relation to Course: Supporting   |
|-------------------|---|
| LAFS.6.SL.1.2:    | Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.  |
| LAFS.6.SL.1.3:    | Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.  |
| LAFS.6.SL.2.4:    | Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.   |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.  |
| MAFS.K12.MP.5.1:  | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying  |
|                   | assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.<br>Standard Relation to Course: Supporting  |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x<br>– $x/2$ as 5 minus, a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. |
|                   | y) at a manual a product and a second to realize that to realize that to realize that to real of the other of the any real hambers x and y.   |
|                   | Standard Relation to Course: Supporting   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students with little or no small vocal ensemble experience develop musicianship and performance skills as they study, rehearse, and perform high-quality ensemble literature in diverse styles. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## **Educator Certifications**

Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

# M/J Vocal Ensemble 1 (#1303100) 2022 - And Beyond

| Name            | Description  |
|-----------------|--|
|                 | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:    | Clarifications:  |
|                 | e.g., listening maps, active listening, checklists   |
|                 | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                   |
| MU.68.C.1.2:    | Clarifications:  |
|                 | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                      |
|                 | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.     |
| MU.68.C.2.1:    | Clarifications:  |
|                 | e.g., intonation, balance, blend, phrasing, rhythm   |
|                 | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                |
| MU.68.C.2.2:    | Clarifications:  |
|                 | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.F.3.2:    | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
|                 | Classify authentic stylistic features in music originating from various cultures.  |
| MU.68.H.1.4:    | Clarifications:  |
|                 | aural/oral traditions, drumming patterns   |
| MU.68.H.2.3:    | Classify the literature being studied by genre, style, and/or time period.   |
|                 | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.                                  |
|                 | Clarifications:  |
| MU.68.H.3.1:    | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural          |
|                 | connections and traditions, ceremonial music, sales and advertising, communication   |
|                 | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. |
| MU.68.0.3.1:    | Clarifications:  |
|                 | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration       |
| MU.68.0.3.2:    | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to   |
| MIL 68 C 1 3.   | other musical works.   |
| 10.00.3.1.3.    | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:    | Clarifications:  |
|                 | e.g., melodies using traditional classroom instruments and/or voice  |
| MU.68.S.2.2:    | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                 | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:    | Clarifications:  |
|                 | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                 | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:    | Clarifications:  |
|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                 | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:    | Clarifications:  |
|                 | e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols                         |
|                 | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:    | Clarifications:  |
|                 | e.g., error detection, interval reinforcement  |
|                 | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.   |
| MU.68.S.3.6:    | Clarifications:  |
|                 | e.g., independently, collaboratively   |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |
|                 | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will belo with solving the task.</li> </ul>     |
|                 | <ul> <li>Build berseverance by modifying methods as needed while solving a challenging task.</li> </ul>  |
|                 | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>  |
|                 | Help and support each other when attempting a new method or approach.  |
| MA.K12.MTR.1.1: | Clarifications:  |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:                                   |

|                    | <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>   |
|--------------------|--|
|                    | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Descent colutions to problems in multiple ways using achieves, descent colutions.</li> </ul>   |
| MA.K12.MTR.2.1:    | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>   |
|                    | Clarifications:         Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:         • Help students make connections between concepts and representations.         • Provide opportunities for students to use manipulatives when investigating concepts.         • Guide students from concrete to pictorial to abstract representations as understanding progresses.         • Show students that various representations can have different purposes and can be useful in different situations.   |
|                    | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> </ul>   |
| MA.K.I.Z.MITK.3.T: | <ul> <li>Use feedback to improve efficiency when performing calculations.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul> </li> </ul>                          |
|                    | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> </ul>   |
| MA.K12.MTR.4.1:    | <ul> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>   |
|                    | Clarifications:         Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:         • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.         • Create opportunities for students to discuss their thinking with peers.         • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.         • Develop students' ability to justify methods and compare their responses to the responses of their peers.        |
|                    | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> </ul>   |
| MA.K12.MTR.5.1:    | <ul> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>  |
|                    | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul> |
|                    | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  • Estimate to discover possible solutions.  |
| MA.K12.MTR.6.1:    | <ul> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |

|                   | <ul> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
|-------------------|---|
|                   | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
|                   | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>   |
| MA.K12.MTR.7.1:   | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.         • Indicate how various concepts can be applied to other disciplines.                                     |
|                   | Cite evidence to explain and justify reasoning.   |
|                   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

Students with little or no small vocal ensemble experience develop musicianship and performance skills as they study, rehearse, and perform high-quality ensemble literature in diverse styles. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. |                   | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:      | Clarifications:<br>e.g., independently, collaboratively   |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.  |
| LAFS.7.SL.1.1:    | <ul> <li>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</li> <li>b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed.</li> <li>c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed.</li> <li>d. Acknowledge new information expressed by others and, when warranted, modify their own views.</li> </ul>  |
| LAFS.7.SL.1.2:    | Standard Relation to Course: Supporting         Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas   |
|                   | clarify a topic, text, or issue under study.  |
| LAF5.7.5L.1.3:    | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.  |
| LAFS.7.SL.2.4:    | appropriate eye contact, adequate volume, and clear pronunciation.  |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x<br>- y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students with previous vocal ensemble experience continue to build musicianship and performance skills through the study, rehearsal, and performance of high-quality ensemble literature in a variety of styles. Student musicians learn to self-assess and collaborate as they study relevant musical styles and time periods. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1303110

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Choral Music > Abbreviated Title: M/J VOCAL ENS 2 Course Length: Year (Y) Course Level: 2

Course Status: Course Approved Grade Level(s): 6,7,8

#### **Educator Certifications**

Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12)
# M/J Vocal Ensemble 2 (#1303110) 2022 - And Beyond

| Name  | Description  |
|---|--|
|   | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:  | Clarifications:  |
|   | e.g., listening maps, active listening, checklists   |
|   | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                     |
| MU.68.C.1.2:  | Clarifications:  |
|   | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                        |
|   | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.       |
| MU.68.C.2.1:  | Clarifications:  |
|   | e.g., intonation, balance, blend, phrasing, rhythm   |
|   | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                  |
| MU.68.C.2.2:  | Clarifications:  |
|   | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
|   | Describe several routes a composition or performance could travel from creator to consumer.  |
| MU.68.F.2.1:  | Clarifications:  |
|   | e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales                            |
|   | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1:  | Clarifications:  |
|   | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect       |
| MU.68.F.3.2:  | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.     |
|   | Classify authentic stylistic features in music originating from various cultures.  |
|   | Clarifications:  |
| MU.68.H.1.4:  | e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, |
|   | aural/oral traditions, drumming patterns   |
| MU.68.H.2.3: Classify the literature being studied by genre, style, and/or time period. |  |
|   | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.                                    |
| MU 68 H 3 1   | Clarifications:  |
| MI0.00.11.0.11  | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural            |
|   | connections and traditions, ceremonial music, sales and advertising, communication   |
|   | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2:  | Clarifications:  |
|   | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gathenings, civic and religious ceremonies, plays      |
|   | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.0.1.1:  | Clarifications:  |
|   | e.g., mythm, melody, timbre, form, tonality, narmony, expressive elements; chorar, orchestrar, band, ensemble  |
|   | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU.68.0.3.1:  | Clarifications:  |
|   | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, narmonic structure, timbre, rhythm, orchestration         |
| MU.68.0.3.2:  | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to     |
| MU 68 S 1 3 <sup>.</sup>  | Arrange a short musical piece by manipulating melody, form, rbythm, and/or voicing   |
|   | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:  | Clarifications:  |
|   | e.g., melodies using traditional classroom instruments and/or voice  |
|   | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1:  | Clarifications:  |
|   | e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2:  | Transfer performance techniques from familiar to unfamiliar pieces.  |
|   | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:  | Clarifications:  |
|   | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|   | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:  | Clarifications:  |
|   | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|   | Sight-read standard exercises and simple repertoire.   |

| MU.68.S.3.3:    | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |  |  |
|-----------------|--|--|--|
|                 | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |  |  |
| MU.68.S.3.4:    | Clarifications:<br>e.g., error detection, interval reinforcement   |  |  |
| MU.68.S.3.6:    | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques. Clarifications: e.g., independently, collaboratively  |  |  |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> Clarifications: <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |  |  |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |  |  |
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul> Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li></ul>   |  |  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |  |  |
|                 | <ul> <li>use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> </ul>  |  |  |

| MA.K12.MTR.5.1:            | Look for similarities among problems.     Connect colutions of problems to more complicated large scale situations   |
|----------------------------|--|
|                            | Connect solutions of problems to more complicated large-scale situations.  |
|                            | Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:  |
|                            | <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> </ul>   |
|                            | Support students to develop generalizations based on the similarities found among problems.  |
|                            | Provide opportunities for students to create plans and procedures to solve problems.   |
|                            | • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
|                            | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
|                            | Estimate to discover possible solutions.   |
|                            | Use benchmark quantities to determine if a solution makes sense.   |
|                            | Check calculations when solving problems.  |
| MA K12 MTR 6 1             | <ul> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>  |
|                            | Clarifications:  |
|                            | Teachers who encourage students to assess the reasonableness of solutions:   |
|                            | Have students estimate or predict solutions prior to solving.  |
|                            | <ul> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Deinforce that students shock their work as they progress within and after a task.</li> </ul>  |
|                            | <ul> <li>Remote that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
|                            | Apply mathematics to real world contaxts   |
|                            | Mathematicians who apply mathematics to real-world contexts:   |
|                            | Connect mathematical concepts to everyday experiences.   |
|                            | Use models and methods to understand, represent and solve problems.  |
| MA K12 MTD 7 1.            | Perform investigations to gather data or determine if a method is appropriate.     Redesign models and methods to improve accuracy or efficiency.  |
| IVIA. K 12. IVI 1 K. 7. 1. | Clarifications:<br>Teachers who encourage students to apply mathematics to real-world contexts:  |
|                            | <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> </ul>   |
|                            | Challenge students to question the accuracy of their models and methods.   |
|                            | Support students as they validate conclusions by comparing them to the given situation.  |
|                            | Indicate how various concepts can be applied to other disciplines.   |
|                            | Cite evidence to explain and justify reasoning.  |
|                            | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details  |
|                            | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.  |
|                            | 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.   |
| ELA K12 EE 1 1.            | In 3rd grade, students should use a combination of direct and indirect citations.  |
|                            | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly  |
|                            | referenced by the instructor.  |
|                            | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                            | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                            | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:            | Clarifications:  |
|                            | See Text complexity for grade-level complexity bands and a text complexity rubic.  |
|                            |  |
| ELA.K12.EE.3.1:            | Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl  |
|                            | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and  |
|                            | beyond.  |
| ELA.K12.EE.4.1:            | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
|                            | Clarifications:  |
|                            | In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because ." The   |
|                            | collaborative conversations are becoming academic conversations.   |
|                            | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students   |
|                            | build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                            | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:            | Clarifications:  |
|                            | students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to |
|                            | do quality work.   |
|                            | Use appropriate voice and tone when speaking or writing.   |
|                            |  |

| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. |  |
|-------------------|---|--|
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |  |

### VERSION DESCRIPTION

Students with previous vocal ensemble experience continue to build musicianship and performance skills through the study, rehearsal, and performance of high-quality ensemble literature in a variety of styles. Student musicians learn to self-assess and collaborate as they study relevant musical styles and time periods. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

### GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12)

# M/J Vocal Ensemble 3 (#1303120) 2020 - 2022 (current)

| Name Description  |  |  |
|---|--|--|
|   | Develop strategies for listening to unfamiliar musical works.  |  |
| MU.68.C.1.1:  | Clarifications:  |  |
|   | e.g., listening maps, active listening, checklists   |  |
|   | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                   |  |
| MU.68.C.1.2:  | Clarifications:  |  |
|   | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                      |  |
|   | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.     |  |
| MU.68.C.2.1:  | Clarifications:  |  |
|   | Citique, using correct music versional phrasma, rhytim   |  |
| MU 40 C 0 0.  |  |  |
| MU.08.C.2.2:  | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |  |
| MU 68 C 3 1   | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre   |  |
|   | Describe how concert attendance can financially impact a community.  |  |
| MU.68.F.2.2:  | Clarifications:  |  |
|   | e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants  |  |
|   | Describe how studying music can enhance citizenship, leadership, and global thinking.  |  |
| MU.68.F.3.1:  | Clarifications:  |  |
|   | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect     |  |
| MU.68.F.3.2:  | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |  |
| MU.68.H.1.1:  | Describe the functions of music from various cultures and time periods.  |  |
| MU.68.H.1.2: Identify the works of representative composers within a specific style or time period. |  |  |
|   | classify authentic stylistic features in music originating from various cultures.  |  |
| MU.68.H.1.4:  | Clarifications:  |  |
|   | aural/oral traditions, drumming patterns   |  |
| MU.68.H.2.1:  | Describe the influence of historical events and periods on music composition and performance   |  |
| MU.68.H.2.3:  | Classify the literature being studied by genre, style, and/or time period.   |  |
|   | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.                                  |  |
| MU 68 H 3 1   | Clarifications:  |  |
| MI0.00.11.0.11  | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural          |  |
|   |  |  |
|   | Discuss how the absence of music would affect other content areas and contexts.  |  |
| MU.68.H.3.2:  | Clarifications:  |  |
|   | Compare performenees of a multicle works, video games, commercial dave tising, social gamerings, civic and religious ecremonics, plays             |  |
|   | Compare performances of a musical work to identify anistic choices made by performers.   |  |
| MU.68.0.1.1:  | clarifications:  |  |
|   | Demonstrate knowledge of major and minor togelities through performance and composition  |  |
| MU 68 O 2 2·  |  |  |
| 10.00.0.2.2.  | e.g., scales; key signatures; relative major/minor; parallel major/minor   |  |
|   | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. |  |
| MU.68.0.3.1:  | Clarifications:  |  |
|   | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration       |  |
|   | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to   |  |
| MU.68.U.3.2:  | other musical works.   |  |
| MU.68.S.1.3:  | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |  |
|   | Sing or play melodies by ear with support from the teacher and/or peers.   |  |
| MU.68.S.1.4:  | Clarifications:  |  |
|   |  |  |
|   | Perform music from memory to demonstrate knowledge of the musical structure.   |  |
| WU.68.5.2.1:  | e.g., basic themes, patterns, tonality, melody, harmony  |  |
| MIL 69 S 2 2  | Transfer performance techniques from familiar to unfamiliar pieces   |  |
| IVIU.00.3.2.2.  | ransre perormance techniques nom familiar to unamiliar pieces.   |  |

|                       | Sing and/or play age-appropriate repertoire expressively.   |
|-----------------------|---|
| MU.68.S.3.1:          | Clarifications:   |
|                       | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|                       | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2:          | Clarifications:   |
|                       | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                       | Sight-read standard exercises and simple repertoire   |
| MIL 40 5 2 2.         |   |
| IVIU.00.3.3.3.        | e a note and rest values key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|                       |   |
|                       | compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:          | Clarifications:   |
|                       | e.g., error detection, interval remotement  |
|                       | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:          | Clarifications:   |
|                       | e.g., independently, collaboratively  |
| LAFS.68.RST.2.4:      | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical   |
|                       | context relevant to grades 6–8 texts and topics.  |
| LAFS.08.WHST.2.4:     | Produce clear and concretent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAI 5.00. WITS 1.3.9. | Engage effectively in a range of collaborative discussions (one-on-one in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and  |
|                       | issues, building on others' ideas and expressing their own clearly.   |
|                       | a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the  |
|                       | topic, text, or issue to probe and reflect on ideas under discussion.   |
| LAFS.8.SL.1.1:        | b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed.   |
|                       | c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations,  |
|                       | and ideas.  |
|                       | d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.   |
|                       | Standard Relation to Course: Supporting   |
|                       | Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social,  |
| LAF3.0.3L.1.2.        | commercial, political) behind its presentation.   |
