|                           | Adapt procedures to apply them to a new context.  |
|                           | Use feedback to improve efficiency when performing calculations.  |
|                           | Clarifications:   |
|                           | <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> </ul>  |
|                           | Offer multiple opportunities for students to practice efficient and generalizable methods.  |
|                           | • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
|                           | Engage in discussions that reflect on the mathematical thinking of self and others.   |
|                           | mamemancians who engage in discussions that remet on the mamemancial thinking of sell and others:   |
| 1                         | Communicate mathematical ideas, vocabulary and methods effectively.   |

| MA.K12.MTR.4.1: | <ul> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li></ul>                             |
|-----------------|---|
|                 | Develop students' ability to justify methods and compare their responses to the responses of their peers. Use patterns and structure to help understand and connect mathematical concepts. Nethematicipes who use patterns and structure to help understand and connect mathematical concepts.  |
| MA.K12.MTR.5.1: | <ul> <li>Focus on relevant details within a problem.</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li></ul>                    |
|                 | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>   |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to assess the reasonableness of solutions: <ul> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul> </li> </ul>   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>  |
|                 | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.         • Indicate how various concepts can be applied to other disciplines.   |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.<br>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly<br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide |
|                 | referenced by the instructor.<br>6-8 Students continue with previous skills and use a style guide to create a proper citation.<br>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently.         Clarifications:         See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                 | Make inferences to support comprehension.   |

| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.                |
|-------------------|---|
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | <b>Clarifications:</b><br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                           |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students with significant jazz experience become highly conversant with complex harmonic structures; compose or arrange for small groups; improvise over various forms, keys, and styles; and are knowledgeable about the professional jazz scene and its icons. Musicians study the impact of technology on jazz and the music industry, and learn the basics of sound reinforcement for solo and ensemble performance. In keeping with the rigor expected in an Honors course, students undertake independent study that includes synthesis of learning and experience. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

### GENERAL NOTES

Honors and Advanced Level Course Note: Academic rigor is more than simply assigning to students a greater quantity of work. Through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted, students are challenged to think and collaborate critically on the content they are learning.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|                | e.g., listening maps, active listening, checklists  |
|                | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                  |
| MIL 912 C 1 2· | composer's intent.  |
| MU.912.0.1.2:  | Clarifications:   |
|                | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                               |
| MU.912.C.1.4:  | Compare and perform a variety of vocal styles and ensembles.  |
| MU.912.C.2.1:  | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:  | Evaluate performance quality in recorded and/or live performances.  |
| 10.712.0.2.3.  | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development.      |
| MU.912.C.3.1:  | in music.   |
| MII 912 F 3 1· | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of       |
|                | leadership in school and/or non-school settings.  |
| MU.912.F.3.2:  | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.     |
| MU.912.F.3.3:  | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,   |
|                | demonstrating skills for use in the workplace.  |
| MU 012 U 1 1.  |   |
| WU.912.H.1.1.  | e.g., patriotic, folk, celebration, entertainment, spiritual  |
| MU.912.H.2.1:  | Evaluate the social impact of music on specific historical periods.   |
|                | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects                 |
| MU.912.H.3.1:  | musical performance.  |
|                | Clarifications:   |
|                | e.g., acoustics, sound amplification, materialis, mechanics   |
|                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.0.1.1:  | Clarifications:   |
| MU 012 O 2 1.  | Transfer acconted composition conventions and performance practices of a specific style to a contracting style of music                                     |
| 10.912.0.2.1.  | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied         |
|                | meaning of the composer/performer.  |
| MU.912.0.3.1:  | Clarifications:   |
|                | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,                       |
|                | orchestration   |
| MU.912.0.3.2:  | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                | Improvise rhythmic and melodic phrases over harmonic progressions.  |
| MU.912.S.1.1:  | Clarifications:   |
|                |   |
|                | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.5.1.4:  | Clarifications:   |
|                | Apply the ability to memorize and internalize musical structure, accurate and expressive datails, and processing skills to the creation or performance of   |
|                | music literature.   |
| MU.912.S.2.1:  | Clarifications:   |
|                | e.g., memorization, sequential process  |
| MU.912.S.2.2:  | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:  | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and |
|                | Kinestnetic energy.<br>Sight-read music accurately and expressively to show synthesis of skills   |
| MU.912.S.3.2:  |   |
|                | e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.3:  | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.                                  |
| MU.912.S.3.4:  | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:  | Clarifications:   |

|                    | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|--------------------|--|
| LAFS 910 RST 2 4   | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical  |
| LAFS.910.SL.1.1:   | <ul> <li>context relevant to grades 9–10 texts and topics.</li> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> <li>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</li> </ul> |
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.   |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.  |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.  |
| LAFS.910.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.   |
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.  |
| MAFS.K12.MP.5.1:   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b>  |
| MAFS.K12.MP.6.1:   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. <b>Standard Relation to Course: Supporting</b>   |
| MAFS.K12.MP.7.1:   | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x<br>– y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting  |
| DA.912.S.2.1:      | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

This year-long, entry-level class, designed for students with little or no choral experience, promotes the enjoyment and appreciation of music through performance of beginning choral repertoire from a variety of times and places. Rehearsals focus on the development of critical listening skills; foundational instrumental technique and skills, music literacy, and ensemble skills; and aesthetic musical awareness culminating in periodic public performances.

## GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course may require students to participate in extra rehearsals and performances beyond the school day.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li></ul>  |

| MA.K12.MTR.6.1:   | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:   |
|-------------------|---|
|                   | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>  |
|                   | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         Have students estimate or predict solutions prior to solving.         Prompt students to continually ask, "Does this solution make sense? How do you know?"         Reinforce that students check their work as they progress within and after a task.         Strengthen students' ability to verify solutions through justifications.  |
|                   | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
| MA.K12.MTR.7.1:   | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>   |
|                   | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         Challenge students to question the accuracy of their models and methods.         Support students as they validate conclusions by comparing them to the given situation.         Indicate how various concepts can be applied to other disciplines.   |
|                   | Cite evidence to explain and justify reasoning.   |
| ELA.K12.EE.1.1:   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
|                   | <ul> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> </ul>   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
| ELA.K12.EE.5.1:   | Use the accepted rules governing a specific format to create quality work.  |
|                   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

This year-long, entry-level class, designed for students with little or no choral experience, promotes the enjoyment and appreciation of music through performance of beginning choral repertoire from a variety of times and places. Rehearsals focus on the development of critical listening skills; foundational instrumental technique and skills, music literacy, and ensemble skills; and aesthetic musical awareness culminating in periodic public performances.

#### **GENERAL NOTES**

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course may require students to participate in extra rehearsals and performances beyond the school day.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|                 | Mathematicians who assess the reasonableness of solutions:  |
|                   | Estimate to discover possible solutions.  |
|-------------------|---|
| MA.K12.MTR.6.1:   | <ul> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems</li> </ul>  |
|                   | <ul> <li>Verify possible solutions by explaining the methods used.</li> </ul>   |
|                   | Evaluate results based on the given context.  |
|                   | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         Have students estimate or predict solutions prior to solving.         Prompt students to continually ask, "Does this solution make sense? How do you know?"         Reinforce that students check their work as they progress within and after a task.         Strengthen students' ability to verify solutions through justifications.  |
| MA.K12.MTR.7.1:   | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
|                   | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>   |
|                   | <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
|                   | Cite evidence to explain and justify reasoning.   |
| ELA.K12.EE.1.1:   | <ul><li>Clarifications:</li><li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li><li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li></ul> |
|                   | <ul> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> </ul>   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

This semester-long, entry-level class, designed for students with little or no choral experience, promotes the enjoyment and appreciation of music through performance of beginning choral repertoire from a variety of times and places. Rehearsals focus on the development of critical listening skills; foundational instrumental technique and skills, music literacy, and ensemble skills; and aesthetic musical awareness culminating in periodic public performances.

## GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course may require students to participate in extra rehearsals and performances beyond the school day.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

| 10.712.11.1.2.  | e a vocal instrumental quitar keyboard electronic handbells   |
|                 |   |
| MU.912.H.1.4:   | Analyze how western music has been influenced by historical and current world cultures.   |
| MU.912.H.1.5:   | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.1:   | Evaluate the social impact of music on specific historical periods.   |
| WU.912.0.2.4.   | Apply knowledge of science, math, and music to demonstrate, through an acquisition of music.  |
|                 | musical performance.  |
| MU.912.H.3.1:   | Clarifications  |
|                 | e.g., acoustics, sound amplification, materials, mechanics  |
|                 | Combine percent interact with chills and knowledge from a nen music place to cynlere, design, and present a music besed or music enhanced table of  |
|                 | interest to demonstrate the ability to make transfers across contexts   |
| MIL 012 11 2 2. |   |
| WIU.912.H.3.2:  | Clarifications:   |
|                 | speaking  |
|                 | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure   |
|                 |   |
| MU.912.0.1.1:   | Clarifications:   |
|                 | e.g., mythm, melody, timbre, form, tonality, narmony, texture, solo, chamber ensemble, farge ensemble   |
| MU.912.0.2.1:   | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.  |
|                 | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied   |
|                 | meaning of the composer/performer.  |
| MU.912.0.3.1:   | Clarifications:   |
|                 | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, narmonic structure, timbre choice, rhythm,<br>orchestration  |
|                 |   |
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                 | Improvise rhythmic and melodic phrases over harmonic progressions.  |
| MU.912.S.1.1:   | Clarifications:   |
|                 | e.g., using text or scat syllables  |
|                 | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S.1.4:   | Clarifications:   |
|                 | e.g., singing, playing, writing   |
|                 | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of   |
|                 | music literature.   |
| MU.912.S.2.1:   | Clarifications:   |
|                 |   |

|                    | e.g., memorization, sequential process  |
|--------------------|---|
| MU.912.S.2.2:      | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:      | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and   |
|                    | Kinesthetic energy.   |
| MIL 912 S 3 2·     |   |
| 110.712.0.0.2.     | e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.3:      | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.  |
| MU.912.S.3.4:      | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                    | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:      | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| LAFS.910.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.   |
| LAFS.910.SL.1.1:   | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> <li>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</li> </ul> |
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.  |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.   |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.   |
| LAFS.910.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.                                |
| MAFS.K12.MP.6.1:   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. <b>Standard Relation to Course: Supporting</b>  |
| MAFS.K12.MP.7.1:   | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x<br>– y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting   |
| DA.912.F.3.8:      | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.  |
| DA.912.S.2.1:      | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

This year-long, beginning-level class, designed for students with one year of experience or less in a choral performing group, promotes the enjoyment and appreciation of music through performance of basic, high-quality choral music. Rehearsals focus on the development of critical listening/aural skills; foundational instrumental technique and skills, music literacy, and ensemble skills; and aesthetic musical awareness culminating in periodic public performances.

#### GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course may require students to participate in extra rehearsals and performances beyond the school day.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. |  | Clarifications:   |
|  | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|  | Help students make connections between concepts and representations.  |
|  | <ul> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> </ul>              |
|  | <ul> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>   |
|  | Complete tasks with mathematical fluency.   |
|  | Mathematicians who complete tasks with mathematical fluency:  |
|  | Select efficient and appropriate methods for solving problems within the given context.   |
|  | Maintain flexibility and accuracy while performing procedures and mental calculations.  |
|  | Complete tasks accurately and with confidence.  |
| MA.K12.MTR.3.1:  | <ul> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
| MA.K12.MTR.3.1:  | Clarifications:   |
|  | Teachers who encourage students to complete tasks with mathematical fluency:  |
|  | Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.  |
|  | Offer multiple opportunities for students to practice efficient and generalizable methods.  |
|  | Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
|  | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:                                     |
|  | Communicate methematical ideas useshulary and methods effectively   |
|  | Communicate mathematical deas, vocability and methods effectively.     Analyze the mathematical thinking of others.   |
|  | <ul> <li>Compare the efficiency of a method to those expressed by others.</li> </ul>  |
|  | Recognize errors and suggest how to correctly solve the task.   |
| MA.K12.MTR.4.1:  | Justify results by explaining methods and processes.  |
|  | Construct possible arguments based on evidence.   |
|  | Clarifications:<br>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others  |
|  | <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> </ul>   |
|  | Create opportunities for students to discuss their thinking with peers.   |
|  | • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.  |
|  | Develop students' ability to justify methods and compare their responses to the responses of their peers.   |
|  | Use patterns and structure to help understand and connect mathematical concepts.  |
|  | mamematicians who use patterns and structure to help understand and connect mathematical concepts:  |

| MA.K12.MTR.5.1: | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts. <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li></ul>   |
|-----------------|--|
|                 | • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>  |
| ELA.K12.EE.1.1: | <ul> <li>Cite evidence to explain and justify reasoning.</li> <li>Clarifications:</li> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> <li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li> </ul> |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently.         Clarifications:         See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
| ELA.K12.EE.3.1: | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
| ELA.K12.EE.4.1: | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                 | Use the accepted rules governing a specific format to create quality work. Clarifications:   |

| ELA.K12.EE.5.1:   | Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. |
|-------------------|---|
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.  |
|                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

This year-long, beginning-level class, designed for students with one year of experience or less in a choral performing group, promotes the enjoyment and appreciation of music through performance of basic, high-quality choral music. Rehearsals focus on the development of critical listening/aural skills; foundational instrumental technique and skills, music literacy, and ensemble skills; and aesthetic musical awareness culminating in periodic public performances.

#### GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course may require students to participate in extra rehearsals and performances beyond the school day.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Course Path: Section: Grades PreK to 12 Education

#### GENERAL INFORMATION

| Course Number: 1303310                       | Courses > Grade Group: Grades 9 to 12 and Adult<br>Education Courses > Subject: Music Education ><br>SubSubject: Choral Music ><br>Abbreviated Title: CHORUS 2 |
|--|--|
| Number of Credits: One (1) credit            | Course Length: Year (Y)  |
| Course Type: Core Academic Course            | Course Level: 2  |
| Course Status: State Board Approved          |  |
| Grade Level(s): 9,10,11,12                   |  |
| Graduation Requirement: Performing/Fine Arts |  |

Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12)

# Chorus 3 (#1303320) 2020 - 2022 (current)

| Name           | Description  |
|----------------|--|
|                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:  | Clarifications:  |
|                | e.g., listening maps, active listening, checklists   |
|                | Compare using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the  |
|                | composer's intent.   |
| MU.912.C.1.2:  | Clarifications   |
|                | e.g., guality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
|                | Compare and perform a variaty of vacal styles and encomples  |
| MU.912.C.1.4.  | Evaluate and make appropriate adjustments to personal performance in solo and ensembles  |
| MU.912.C.2.1.  | Evaluate and make appropriate aujustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2.  | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively  |
| 10.712.0.2.3.  | Make critical evaluations hased on exemplary models of the quality and effectiveness of performances and apply the criteria to personal development.   |
| MU.912.C.3.1:  | in music.  |
|                | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of  |
| MU.912.F.3.1:  | leadership in school and/or non-school settings.   |
|                | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and  |
| WIU.912.F.3.2. | technology.  |
| MU.912.F.3.3:  | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,  |
|                | demonstrating skills for use in the workplace.   |
| MU.912.F.3.4:  | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,   |
|                | and initiative to advance skills and/or knowledge.   |
|                | Investigate and discuss now a culture's traditions are reflected through its music.  |
| MU.912.H.1.1:  | Clarifications:  |
|                | e.g., patriotic, foik, celebration, entertainment, spiritual   |
|                | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU.912.H.1.2:  | Clarifications:  |
|                | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
|                | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:  | Clarifications:  |
|                | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MIL 912 H 1 4· | Analyze how Western music has been influenced by historical and current world cultures   |
| MU.912.H.1.5:  | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.1:  | Evaluate the social impact of music on specific historical periods.  |
|                | Analyze the evolution of a music genre.  |
| MII 912 H 2 3· | Clarifications   |
|                | e.g., jazz, blues  |
|                | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects  |
|                | Apply knowledge of science, math, and music to demonstrate, through an acoustic of digital performance medium, now sound production affects musical performance  |
| MU.912.H.3.1:  |  |
| MU.912.H.3.1:  | e a acoustics sound amplification materials mechanics  |
|                |  |
|                | Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of interest to demonstrate the ability to make transfers across contexts. |
|                |  |
| MU.912.H.3.2:  | Clarifications:  |
|                | e.g., music and nearth, noiocaust, tolerance, Amcan American history, word languages, scientific research, data analysis, problem-solving, public speaking   |
|                |  |
|                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1:  | Clarifications:  |
|                | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
| MU.912.0.2.1:  | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
|                | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied  |
|                | meaning of the composer/performer.   |
| MU.912.0.3.1:  | Clarifications:  |
|                | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,  |
|                | orcnestration  |
| MU.912.0.3.2:  | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                | Improvise rhythmic and melodic phrases over harmonic progressions.   |
| MU.912.S.1.1:  | Clarifications:  |

|                     | e.g., using text or scat syllables  |
|---------------------|---|
|                     | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S.1.4:       | Clarifications:<br>e.g., singing, playing, writing  |
|                     | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of   |
| MU.912.S.2.1:       | Clarifications:   |
|                     | e.g., memorization, sequential process  |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.<br>Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and  |
| MU.912.S.3.1:       | kinesthetic energy.   |
|                     | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:       | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.3:       | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.  |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                     | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:       | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| LAFS.1112.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.  |
|                     | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as</li> </ul>  |
| LAFS.1112.SL.1.1:   | <ul><li>needed.</li><li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li><li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li></ul>  |
|                     | Standard Relation to Course: Supporting   |
| LAFS.1112.SL.1.2:   | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.   |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.   |
| LAFS.1112.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research. Use appropriate tools strategically. Mathematically preficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper  |
| MAFS.K12.MP.5.1:    | <ul> <li>mathematical products students consider the available consider the available consider mathematical problem. These considered mathematical problem. These considered mathematical problem. These considered mathematical problem. These considered mathematical problems are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</li> <li>Standard Relation to Course: Supporting</li> <li>Attend to precision.</li> </ul> |
| MAFS.K12.MP.6.1:    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                     | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:    | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see $7 \times 8$ equals the well remembered $7 \times 5 + 7 \times 3$ , in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as $2 \times 7$ and the 9 as $2 + 7$ . They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |

#### Standard Relation to Course: Supporting

 DA.912.F.3.8:
 Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.

 DA.912.S.2.1:
 Sustain focused attention, respect, and discipline during class, rehearsal, and performance.

 ELD.K12.ELL.SI.1:
 English language learners communicate for social and instructional purposes within the school setting.

## General Course Information and Notes

#### VERSION DESCRIPTION

This year-long, formative class, designed for students with previous participation in a school chorus who have basic knowledge of note-reading and vocal technique, concentrates on providing students opportunities to strengthen existing skills in critical listening, vocal techniques, and ensemble performance using high-quality three- and four-part choral literature. Rehearsals focus on gaining independence in music literacy and aesthetic engagement through critical listening and thinking skills.

#### GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course requires students to participate in extra rehearsals and performances beyond the school day.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|--|--|
| Music (Elementary and Secondary Grades K-12)       |  |

# Chorus 3 (#1303320) 2022 - And Beyond

| Name            | Description   |
|-----------------|---|
|                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:   | Clarifications:   |
|                 | e.g., listening maps, active listening, checklists  |
|                 | Compare using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the   |
|                 | composer's intent.  |
| MU.912.C.1.2:   | Clarifications  |
|                 | e.g., guality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title   |
| MU 012 C 1 4    | Compare and perform a variative funceal shullon and encomplian  |
| MU.912.C.1.4:   | Compare and perform a variety of vocal styles and ensembles.  |
| MU.912.C.2.1.   | Evaluate and make appropriate aujustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2.   | Evaluate performance quality in recorded and/or inverse performances.   |
| WIU.912.0.2.3:  | Evaluate one's own or other's compositions and/or improvisations and generate improvements independency or cooperatively.   |
| MU.912.C.3.1:   | in music.   |
| MU.912.F.3.1:   | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of<br>leadership in school and/or non-school settings. |
| MU.912.F.3.2:   | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.   |
| MU.912.F.3.3:   | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.  |
| MU.912.F.3.4:   | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge      |
|                 | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MII 912 H 1 1·  | Clarifications  |
| 10.712.11.1.1.  | e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                 | Compare the work of and influences on two or more exemplary composers in the performance medium studied in class  |
| MUL 012 UL 1 2. |   |
| MU.912.H.1.2:   | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|                 | Compare two or more works of a composer across performance media.   |
| MU.912.H.1.3:   | Clarifications:   |
|                 | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.4:   | Analyze how Western music has been influenced by historical and current world cultures.   |
| MU.912.H.1.5:   | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.1:   | Evaluate the social impact of music on specific historical periods.   |
|                 | Analyze the evolution of a music genre.   |
| MU.912.H.2.3:   | Clarifications:   |
|                 | e.g., jazz, blues   |
|                 | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects   |
|                 | musical performance.  |
| MU.912.H.3.1:   | Clarifications  |
|                 | e.g., acoustics, sound amplification, materials, mechanics  |
|                 | Combine personal interest with skills and knowledge from a non-music class to explore design, and present a music based or music enhanced tonic of  |
|                 | interest to demonstrate the ability to make transfers across contexts.  |
| MII 012 H 2 2·  | Clarifications  |
| 10.712.11.3.2.  | e.g., music and health. Holocaust, tolerance. African American history, world languages, scientific research, data analysis, problem-solving, public  |
|                 | speaking  |
|                 | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure   |
| MU 012 O 1 1.   |   |
| WIU.912.0.1.1:  | clarifications:   |
|                 |   |
| MU.912.0.2.1:   | Iranster accepted composition conventions and performance practices of a specific style to a contrasting style of music.  |
|                 | Analyze expressive elements in a musical work and describe now the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.                    |
| MU.912.0.3.1:   |   |
|                 | utarmications:  |
|                 | orchestration   |
| MU 012 0 2 2    | Interpret and perform ourseschip elements indicated by the musical score and/or conductor   |
| 10.912.0.3.2:   | Interpret and perform expressive elements inducated by the musical score and/or conductor.  |
|                 |   |
| WU.912.5.1.1:   | Utartifications:  |

|                  | e.g., using text or scat syllables  |
|------------------|---|
|                  | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S.1.4:    | Clarifications:   |
|                  | e.g., singing, playing, writing   |
|                  | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.                                 |
| MU.912.S.2.1:    | Clarifications:   |
|                  | e.g., memorization, sequential process  |
| MU.912.S.2.2:    | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:    | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy                              |
|                  | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:    | Clarifications:   |
|                  | e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.3:    | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.  |
| MU.912.5.3.4:    | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.<br>Develop and demonstrate proper vocal or instrumental technique.                          |
| MU.912.S.3.5:    | Clarifications:   |
|                  | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                  | Mathematicians who participate in effortful learning both individually and with others:   |
|                  | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will belo with solving the task.</li> </ul>  |
|                  | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> </ul>   |
|                  | Stay engaged and maintain a positive mindset when working to solve tasks.   |
| MA.K12.MTR.1.1:  | Help and support each other when attempting a new method or approach.   |
|                  | Clarifications:<br>Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                  | <ul> <li>Cultivate a community of growth mindset learners.</li> </ul>   |
|                  | Foster perseverance in students by choosing tasks that are challenging.   |
|                  | <ul> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems</li> </ul>   |
|                  | Recognize students enort when solving challenging problems.   |
|                  | Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
|                  | Build understanding through modeling and using manipulatives.   |
|                  | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.   |
|                  | Progress from modeling problems with objects and drawings to using algorithms and equations.  |
| MA.K12.MTR.2.1:  | <ul> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>   |
|                  | Clarifications:   |
|                  | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                  | <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts</li> </ul>                       |
|                  | <ul> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> </ul>  |
|                  | • Show students that various representations can have different purposes and can be useful in different situations.   |
|                  | Complete tasks with mathematical fluency.   |
|                  | Mathematicians who complete tasks with mathematical fluency:  |
|                  | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flavibility and converse while performing proceedures and months colorialized</li> </ul> |
|                  | <ul> <li>Maintain nexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> </ul>   |
| MA K12 MTD 2 1.  | Adapt procedures to apply them to a new context.  |
| WA.KTZ.WITK.3.T. | Use feedback to improve efficiency when performing calculations.  |
|                  | Clarifications:   |
|                  | <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> </ul>  |
|                  | Offer multiple opportunities for students to practice efficient and generalizable methods.  |
|                  | Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
|                  | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:               |
|                  | Communicate mathematical ideas: vocabulary and methods officially.  |
|                  | <ul> <li>Communicate mathematical deas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> </ul>  |
|                  | Compare the efficiency of a method to those expressed by others.  |
|                  | Recognize errors and suggest how to correctly solve the task.   |
| MA.K12.MTR.4.1:  | <ul> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence</li> </ul>  |
|                  | Clarifications:   |
| 1                |   |

|                 | <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
|-----------------|---|
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.  |
| MA.K12.MTR.5.1: | <ul> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |
|                 | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.   |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:   |
|                 | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> </ul>  |
| MA.K12.MTR.6.1: | <ul> <li>Evaluate results based on the given context.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul> </li> </ul>   |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:<br>• Connect mathematical concepts to everyday experiences.   |
|                 | <ul> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency</li> </ul>  |
| MA.K12.MTR.7.1: | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.         • Indicate how various concepts can be applied to other disciplines.   |
|                 | Cite evidence to explain and justify reasoning.   |
|                 | K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.  |
| ELA.K12.EE.1.1: | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly<br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide<br>referenced by the instructor.  |
|                 | <ul><li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li><li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li></ul>   |
|                 | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1: | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                 | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1: | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                 | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications:   |

| ELA.K12.EE.4.1:   | In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.<br>In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |
|-------------------|--|
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

This year-long, formative class, designed for students with previous participation in a school chorus who have basic knowledge of note-reading and vocal technique, concentrates on providing students opportunities to strengthen existing skills in critical listening, vocal techniques, and ensemble performance using high-quality three- and four-part choral literature. Rehearsals focus on gaining independence in music literacy and aesthetic engagement through critical listening and thinking skills.

### GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course requires students to participate in extra rehearsals and performances beyond the school day.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1303320

#### **Educator Certifications**

# Chorus 4 (#1303330) 2020 - 2022 (current)

| Name            | Description  |
|-----------------|--|
| MU.912.C.1.1:   | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
|                 | Clarifications:  |
|                 | e.g., listening maps, active listening, checklists   |
|                 | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the   |
|                 | composer's intent.   |
| MU.912.C.1.2:   | Clarifications:  |
|                 | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
| MU 912 C 1 4·   | Compare and perform a variety of vocal styles and ensembles  |
| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.2.3:   | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.   |
|                 | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development  |
| MU.912.C.3.1:   | in music.  |
| MU.912.F.1.1:   | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.  |
|                 | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music  |
|                 | training.  |
| 10.912.1.2.1.   | Clarifications:  |
|                 | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills  |
|                 | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.  |
| MU.912.F.2.2:   | Clarifications:  |
|                 | e.g., community revitalization, industry choosing new locations, cultural and social enrichment  |
|                 | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of  |
| MU.912.F.3.1:   | leadership in school and/or non-school settings.   |
| MIL 912 F 3 2.  | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and  |
| 10.712.1.0.2.   | technology.  |
| MU.912.F.3.3:   | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,  |
|                 | demonstrating skills for use in the workplace.   |
| MU.912.F.3.4:   | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge |
|                 | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MII 912 H 1 1·  | Clarifications   |
| MI0.712.11.1.1. | e.g., patriotic, folk, celebration, entertainment, spiritual   |
|                 | Compare the work of and influences on two or more exemplary composers in the performance medium studied in class   |
| MU 010 U 1 0.   |  |
| WIU.912.N.1.2.  | e a vocal instrumental quitar keyboard electronic handhells  |
|                 |  |
|                 | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:   | Clarifications:  |
|                 | e.g., orchestral and choral; guitar and string quartet; plano solo and plano concerto  |
| MU.912.H.1.4:   | Analyze how Western music has been influenced by historical and current world cultures.  |
| MU.912.H.1.5:   | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.1:   | Evaluate the social impact of music on specific historical periods.  |
| MU.912.H.2.2:   | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.  |
| MU.912.H.2.4:   | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|                 |  |
| MU.912.0.1.1:   | Clarifications:  |
|                 | e.g., mythm, melody, timbre, form, tonaity, narmony, texture; solo, chamber ensemble, large ensemble   |
| MU.912.0.2.1:   | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
|                 | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied  |
| MU.912.O.3.1:   | meaning of the composer/performer.   |
|                 | Clarifications:  |
|                 | e.g., tempo markings, expression markings, anticulation markings, phrasing, scales, modes, narmonic structure, timbre choice, mythin, orchestration  |
| MIL 012 0 2 0   |  |
| WU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                 | improvise mythinic and melodic phrases over narmonic progressions.   |
| MU.912.S.1.1:   | Clarifications:  |
|                 |  |
|                 | Arrange a musical work by manipulating two or more aspects of the composition  |

| MU.912.S.1.3:       | Clarifications:<br>e.g., texture, mode, form, tempo, voicing  |
|---------------------|---|
|                     | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S.1.4:       | Clarifications:<br>e.g., singing, playing, writing  |
| MU.912.S.2.1:       | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   |
|                     | Clarifications:<br>e.g., memorization, sequential process   |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
|                     | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:       | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.3:       | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.  |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
| MIL 012 S 3 5.      |   |
| 1010.912.3.3.3.     | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| LAFS.1112.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.  |
|                     | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–<br>12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.   |
|                     | a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from   |
|                     | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.  |
| LAFS 1112 SL 1 1    | needed.   |
|                     | c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a  |
|                     | topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.   |
|                     | when possible; and determine what additional information or research is required to deepen the investigation or complete the task.  |
|                     | Standard Relation to Course: Supporting   |
| LAFS.1112.SL.1.2:   | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.   |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks  |
| LAFS.1112.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
|                     | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                     | Attend to precision.  |
| MAFS.K12.MP.6.1:    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                     | Standard Relation to Course: Supporting   |
|                     | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:    | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - x) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y   |

|                   | Standard Relation to Course: Supporting  |
|-------------------|--|
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment. |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

### VERSION DESCRIPTION

This year-long, intermediate-level class is designed for students with previous participation in a high school chorus and moderate skills in critical listening, vocal techniques, music literacy, and choral performance. Rehearsals focus on enhancing these skills and students' aesthetic engagement with music through a variety of high-quality three- and four-part choral literature, providing students with the means to learn how to reflect and use a combination of analytical, assessment, and problem-solving skills consistently to improve their own and others' performance.

#### **GENERAL NOTES**

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course requires students to participate in extra rehearsals and performances beyond the school day. Additional experiences with small ensembles and solo performance may be available. Students who enjoy the challenges and successes of this course may wish to take an accelerated music class in the future.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|                 | compare, using context mase vocabulary, the assinence impact of two or more performances of a masical work to one s own hypothesis of the  |
| MU.912.C.1.2:   |  |
|                 | e a quality recordings individual and peer-group performances composer notes instrumentation expressive elements title   |
|                 |  |
| MU.912.C.1.4:   | Compare and perform a variety of vocal styles and ensembles.   |
| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.   |
| WIU.912.C.2.3:  | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.   |
| MU.912.C.3.1:   | make critical evaluations, based on exemplary models, or the quality and effectiveness or performances and apply the criteria to personal development<br>in music                      |
| MIL 912 F 1 1.  | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music   |
| 10.712.1.1.1.   | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music                                    |
|                 | training.  |
| MU.912.F.2.1:   | Clarifications   |
|                 | e.g. repertoire lists technology-based work, ability to research and analyze, and examples of leadership and collaborative skills  |
|                 |  |
|                 | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.  |
| MU.912.F.2.2:   | Clarifications:  |
|                 | e.g., community revitalization, industry choosing new locations, cultural and social enrichment  |
| MIL 912 F 3 1.  | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of                                  |
| 1010.712.1.3.1. | leadership in school and/or non-school settings.   |
| MU.912.F.3.2:   | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and  |
|                 | technology.  |
| MU.912.F.3.3:   | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,                              |
|                 | demonstrating skills for use in the workplace.   |
| MU.912.F.3.4:   | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,                                     |
|                 | Investigate and discuss how a culture's traditions are reflected through its music   |
|                 |  |
| WIU.912.H.1.1:  | clarifications:  |
|                 |  |
|                 | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU.912.H.1.2:   | Clarifications:  |
|                 | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
|                 | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:   | Clarifications:  |
|                 | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU.912.H.1.4:   | Analyze how Western music has been influenced by historical and current world cultures.  |
| MU.912.H.1.5:   | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.1:   | Evaluate the social impact of music on specific historical periods.  |
| MU.912.H.2.2:   | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.  |
| MU.912.H.2.4:   | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|                 | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU 912 O 1 1    | Clarifications   |
|                 | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
| MU 012 0 2 1.   | Transfer accounted composition conjunctions and performance practices of a specific style to a contracting style of music  |
| WIU.912.0.2.1:  | Analyze supressive elements in a musical work and describe how the chaines and manipulations of the elements supressive of music.  |
|                 | Analyze expressive elements in a musical work and describe now the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. |
| MU.912.O.3.1:   |  |
|                 | Clarifications:  |
|                 | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, narmonic structure, timore choice, mythim, orchestration                                    |
|                 |  |
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                 | Improvise rnythmic and melodic phrases over harmonic progressions.   |
| MU.912.S.1.1:   | Clarifications:  |
|                 | e.g., using text or scat syllables   |
|                 | Arrange a musical work by manipulating two or more aspects of the composition  |

| MU.912.S.1.3:   | Clarifications:<br>e.g., texture, mode, form, tempo, voicing  |
|-----------------|---|
|                 | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S.1.4:   | Clarifications:   |
|                 | e.g., singing, playing, writing   |
|                 | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   |
| MU.912.S.2.1:   | Clarifications:<br>e.g., memorization, sequential process   |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
|                 | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:   | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.3:   | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.  |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                 | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                 | Mathematicians who participate in effortful learning both individually and with others:   |
|                 | Analyze the problem in a way that makes sense given the task.   |
|                 | <ul> <li>Ask questions that will help with solving the task.</li> <li>Define a second definition of the task.</li> </ul>  |
|                 | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>  |
|                 | <ul> <li>Stay engaged and maintain a positive minuset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>  |
| MA.K12.MTR.1.1: | Clasifications:   |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:  |
|                 | Cultivate a community of growth mindset learners.   |
|                 | Foster perseverance in students by choosing tasks that are challenging.   |
|                 | Develop students' ability to analyze and problem solve.   |
|                 | Recognize students' effort when solving challenging problems.   |
|                 | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
|                 | Build understanding through modeling and using manipulatives.   |
|                 | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.   |
|                 | Progress from modeling problems with objects and drawings to using algorithms and equations.  |
|                 | Express connections between concepts and representations.   |
| MA.K12.MTR.2.1: | Choose a representation based on the given context or purpose.  |
|                 | Clarifications:   |
|                 | Help students make connections between concents and representations   |
|                 | <ul> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> </ul>  |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.  |
|                 | • Show students that various representations can have different purposes and can be useful in different situations.   |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:   |
|                 | Solact afficient and appropriate methods for solving problems within the given context  |
|                 | <ul> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> </ul>  |
|                 | Complete tasks accurately and with confidence.  |
|                 | Adapt procedures to apply them to a new context.  |
| MA.K12.MTR.3.1: | Use feedback to improve efficiency when performing calculations.  |
|                 | Clarifications:   |
|                 | Teachers who encourage students to complete tasks with mathematical fluency:  |
|                 | Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.  |
|                 | <ul> <li>Other multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Dravide apportunities for students to reflect an the method they used and datermine if a more efficient method could have been used</li> </ul> |
|                 | • Provide opportunities for students to reflect on the method they used and determine if a more encient method could have been used.  |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |
|                 | Communicate mathematical ideas, vocabulary and methods effectively.   |
|                 | Analyze the mathematical thinking of others.  |
|                 | Compare the efficiency of a method to those expressed by others.  |
|                 | Recognize errors and suggest how to correctly solve the task.   |
| MA.K12.MTR.4.1: | Justify results by explaining methods and processes.  |
|                 |   |

|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> </li> </ul> |
|-----------------|--|
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts: <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> </ul>  |
| MA.K12.MTR.5.1: | <ul> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>  |
|                 | <ul> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>  |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
|                 | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.         • Prompt students to continually ask, "Does this solution make sense? How do you know?"         • Reinforce that students check their work as they progress within and after a task.         • Strengthen students' ability to verify solutions through justifications.   |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |
|                 | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>  |
| MA.K12.MTR.7.1: | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
|                 | Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.   |
| ELA.K12.EE.1.1: | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b><br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide<br>referenced by the instructor.  |
|                 | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                 | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently.         Clarifications:         See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                 | Make inferences to support comprehension.  |
| ELA.K12.EE.3.1: | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
|                 | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |

| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.<br>In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students<br>build on ideas, propel the conversation, and support claims and counterclaims with evidence. |
|-------------------|---|
|                   | Use the accepted rules governing a specific format to create quality work.  Clarifications:  Students will incorrected skills learned into work products to produce quality work.   |
| ELA.K12.EE.5.1:   | must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.   |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

This year-long, intermediate-level class is designed for students with previous participation in a high school chorus and moderate skills in critical listening, vocal techniques, music literacy, and choral performance. Rehearsals focus on enhancing these skills and students' aesthetic engagement with music through a variety of high-quality three- and four-part choral literature, providing students with the means to learn how to reflect and use a combination of analytical, assessment, and problem-solving skills consistently to improve their own and others' performance.

### GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course requires students to participate in extra rehearsals and performances beyond the school day. Additional experiences with small ensembles and solo performance may be available. Students who enjoy the challenges and successes of this course may wish to take an accelerated music class in the future.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1303330

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Choral Music > Abbreviated Title: CHORUS 4 Course Length: Year (Y) Course Level: 2 Music (Elementary and Secondary Grades K-12)

Vocal Music (Elementary and Secondary Grades K-12)

# Chorus 5 Honors (#1303340) 2020 - 2022 (current)

| Name            | Description   |
|-----------------|---|
|                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:   | Clarifications:   |
|                 | e.g., listening maps, active listening, checklists  |
|                 | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                |
|                 | composer's intent.  |
| MU.912.C.1.2:   | Clarifications:   |
|                 | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                             |
| MIL 012 C 1 A.  | Compare and perform a variety of vocal styles and ensembles   |
| MU.912.C.1.4.   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles   |
| MU 912 C 2 2    | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.3:   | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.                                |
|                 | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development     |
| MU.912.C.3.1:   | in music.   |
| MU.912.F.1.1:   | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.   |
|                 | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music       |
|                 | training.   |
| MU.912.F.2.1:   | Clarifications:   |
|                 | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills                       |
|                 | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.                                   |
| MU.912.F.2.2:   | Clarifications:   |
|                 | e.g., community revitalization, industry choosing new locations, cultural and social enrichment   |
|                 | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.                               |
| MIL 912 E 2 3.  | Clarifications  |
| WIO. 712.1.2.3. | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel  |
|                 | Analyza and describe how meeting ana/s responsibilities in music offers expertunities to develop leadership skills, and identify personal examples of     |
| MU.912.F.3.1:   | leadership in school and/or non-school settings   |
|                 | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and               |
| MU.912.F.3.2:   | technology.   |
|                 | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, |
| WIU.912.F.3.3.  | demonstrating skills for use in the workplace.  |
| MU.912.F.3.4:   | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,        |
|                 | and initiative to advance skills and/or knowledge.  |
|                 | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:   | Clarifications:   |
|                 | e.g., patriotic, tolk, celebration, entertainment, spiritual  |
|                 | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.                                       |
| MU.912.H.1.2:   | Clarifications:   |
|                 | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|                 | Compare two or more works of a composer across performance media.   |
| MU.912.H.1.3:   | Clarifications:   |
|                 | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.4:   | Analyze how Western music has been influenced by historical and current world cultures.   |
| MU.912.H.1.5:   | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.1:   | Evaluate the social impact of music on specific historical periods.   |
| MU.912.H.2.2:   | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.                           |
|                 | Analyze the evolution of a music genre.   |
| MU.912.H.2.3:   | Clarifications:   |
|                 | e.g., jazz, blues   |
| MU.912.H.2.4:   | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                 | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects               |
|                 | musical performance.  |
| MU.912.H.3.1:   | Clarifications:   |
|                 | e.g., acoustics, sound amplification, materials, mechanics  |
|                 | Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of       |
|                 | interest to demonstrate the ability to make transfers across contexts.  |
| MU.912.H.3.2:   | Clarifications:   |
|                 | e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public      |

|                     | speaking   |
|---------------------|--|
|                     | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.O.1.1:       | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1:       | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
| MU.912.0.2.2:       | Transpose melodies into different modalities through performance and composition.<br>Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.  |
| MU.912.O.3.1:       | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration  |
| MU.912.0.3.2:       | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
| MU.912.S.1.1:       | Clarifications:<br>e.g., using text or scat syllables  |
| MU.912.S.1.2:       | Compose music for voices and/or acoustic, digital, or electronic instruments.  |
| MU.912.S.1.3:       | Arrange a musical work by manipulating two or more aspects of the composition. Clarifications: e.g., texture, mode, form, tempo, voicing   |
|                     | Perform and notate, independently and accurately, melodies by ear.   |
| MU.912.S.1.4:       | Clarifications:<br>e.g., singing, playing, writing   |
|                     | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
| MU.912.S.2.1:       | Clarifications:<br>e.g., memorization, sequential process  |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
| MU.912.S.3.2:       | Sight-read music accurately and expressively to show synthesis of skills. Clarifications: e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.3:       | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.   |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
| MU.912.S.3.5:       | Clarifications:         e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| LAFS.1112.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.   |
|                     | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as</li> </ul> |
| LAFS.1112.SL.1.1:   | <ul> <li>needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions</li> </ul>  |
|                     | when possible; and determine what additional information or research is required to deepen the investigation or complete the task.   |
| I AFS 1112 SL 1 2.  | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed  |
| LAF3.1112.3L.1.2.   | decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.<br>Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, point  |
| LAFS.1112.SL.1.3:   | of emphasis, and tone used.  |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.  |
| LAFS.1112.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.   |
| LAFS.1112.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.   |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.  |
|                     |  |
|                     | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,<br>concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.<br>Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools  |

| MAFS.K12.MP.5.1:  | might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.   |
|-------------------|--|
| MAFS.K12.MP.6.1:  | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,  |
|                   | express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.<br>Standard Relation to Course: Supporting   |
|                   | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. |
|                   | Standard Relation to Course: Supporting  |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |
|                   | Examine artistic response to social issues and new ideas in various cultures.  |
| SS.912.H.1.5:     | Clarifications:<br>Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.   |

#### VERSION DESCRIPTION

This year-long, advanced class is designed for students with previous participation in a high school chorus who have demonstrated a capacity for developing advanced listening/aural skills and advanced knowledge of vocal techniques, musical literacy, and choral performance. Chorus V focuses on development and application of these skills and provides opportunities for aesthetic engagement and making individual musical choices, where appropriate, while preparing a variety of high-quality choral literature.

### GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Notes: Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Additional experiences with small ensembles, solo performance, and leadership opportunities may be available. Students who enjoy the challenges and successes of this course may wish to take an accelerated music class in the future.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

Number of Credits: One (1) credit

Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Choral Music > Abbreviated Title: CHORUS 5 HON Course Length: Year (Y) Course Attributes: • Honors Course Level: 3

#### **Educator Certifications**

Vocal Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

# Chorus 5 Honors (#1303340) 2022 - And Beyond

| Name                       | Description  |
|----------------------------|--|
|                            | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU 912 C 1 1 <sup>.</sup>  | Clarifications:  |
|                            | e.g., listening maps, active listening, checklists   |
|                            |  |
|                            | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the   |
| MU.912.C.1.2:              |  |
|                            | Clarifications:  |
|                            | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
| MU.912.C.1.4:              | Compare and perform a variety of vocal styles and ensembles.   |
| MU.912.C.2.1:              | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:              | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.2.3:              | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.   |
| MU.912.C.3.1:              | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.   |
| MU 912 F 1 1 <sup>.</sup>  | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music   |
|                            | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music  |
|                            | training.  |
| MU.912.F.2.1:              | Clarifications   |
|                            | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills  |
|                            | e.g., repertoire insts, technology-based work, ability to research and analyze, and examples or leadership and collaborative skills  |
|                            | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.  |
| MU.912.F.2.2:              | Clarifications:  |
|                            | e.g., community revitalization, industry choosing new locations, cultural and social enrichment  |
|                            | Compare the organizational structure of a professional orchestra, chorus, guintet, or other ensemble to that of a business.  |
| MIL 912 E 2 3.             | Clarifications   |
| WIO. 712.1.2.3.            | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel   |
|                            |  |
| MU.912.F.3.1:              | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of  |
|                            | Summaries and the terms that experted and a line much to expert to the second and experted to the second seco |
| MU.912.F.3.2:              | summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
|                            | Define prioritize monitor and successfully complete tasks related to individual musical performance or project presentation, without direct oversight  |
| MU.912.F.3.3:              | demonstrating skills for use in the workplace.   |
|                            | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,   |
| MU.912.F.3.4:              | and initiative to advance skills and/or knowledge.   |
|                            | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MII 912 Н 1 1 <sup>.</sup> | Clarifications   |
|                            | e.g., patriotic, folk, celebration, entertainment, spiritual   |
|                            | Compare the work of and influences on two or more examples, compare in the performance medium studied in alcos   |
|                            | compare the work or, and initidences on, two or more exemplary composers in the performance medium studied in class.   |
| MU.912.H.1.2:              | Clarifications:  |
|                            | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
|                            | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:              | Clarifications:  |
|                            | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MII 912 H 1 4·             | Analyze how Western music has been influenced by historical and current world cultures   |
| MU 912 H 1 5               | Analyze now western music within cultures to gain understanding of authentic performance practices   |
| MU 912 H 2 1               | Evaluate the social impact of music on specific historical periods   |
| MII 912 H 2 2              | Analyze current musical trands, including audience environments and music acquisition, to predict possible directions of music   |
| WIO. 712.11.2.2.           | Analyze the evolution of a music genre   |
|                            |  |
| MU.912.H.2.3:              |  |
|                            | e.g., jazz, blues  |
| MU.912.H.2.4:              | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
| MU.912.H.3.1:              | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects  |
|                            | musical performance.   |
|                            | Clarifications:  |
|                            | e.g., acoustics, sound amplification, materials, mechanics   |
|                            | Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of  |
|                            | interest to demonstrate the ability to make transfers across contexts.   |
| MU.912.H.3.2:              | Clarifications:  |
|                            | e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public   |

|                     | speaking   |
|---------------------|--|
|                     | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1:       | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1:       | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
| MU.912.0.2.2:       | Transpose melodies into different modalities through performance and composition.<br>Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.  |
| MU.912.O.3.1:       | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration  |
| MU.912.0.3.2:       | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
| MU.912.S.1.1:       | Clarifications:<br>e.g., using text or scat syllables  |
| MU.912.S.1.2:       | Compose music for voices and/or acoustic, digital, or electronic instruments.  |
| MU.912.S.1.3:       | Arrange a musical work by manipulating two or more aspects of the composition.  Clarifications: e.g., texture, mode, form, tempo, voicing  |
| MU.912.S.1.4:       | Perform and notate, independently and accurately, melodies by ear. Clarifications: e.g., singing, playing, writing   |
| MU.912.S.2.1:       | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
|                     | e.g., memorization, sequential process   |
| MU.912.S.2.2:       | Iranster expressive elements and performance techniques from one piece of music to another.<br>Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and   |
| MU.912.S.3.1:       | kinesthetic energy.  |
| MU.912.S.3.2:       | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.3:       | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.   |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                     | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:       | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                     | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>   |
| MA.K12.MTR.1.1:     | Clarifications:         Teachers who encourage students to participate actively in effortful learning both individually and with others:         • Cultivate a community of growth mindset learners.         • Foster perseverance in students by choosing tasks that are challenging.         • Develop students' ability to analyze and problem solve.         • Recognize students' effort when solving challenging problems.   |
| MA, K12, MTR, 2, 1- | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> |
|                     | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
|                     | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency: <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> </ul>  |

|                 | <ul><li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li><li>Complete tasks accurately and with confidence.</li></ul>  |
|-----------------|--|
| MA.K12.MTR.3.1: | <ul> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>   |
|                 | Clarifications:         Teachers who encourage students to complete tasks with mathematical fluency:         • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.         • Offer multiple opportunities for students to practice efficient and generalizable methods.         • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  |
| MA.K12.MTR.4.1: | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts: <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> </ul>  |
|                 | <ul> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>  |
|                 | <ul> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>                                    |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
|                 | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.  |
| MA.K12.MTR.7.1: | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |
|                 | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>  |
|                 | Clarifications:<br>Teachers who encourage students to apply mathematics to real-world contexts:<br>• Provide opportunities for students to create models, both concrete and abstract, and perform investigations.<br>• Challenge students to question the accuracy of their models and methods.<br>• Support students as they validate conclusions by comparing them to the given situation.<br>• Indicate how various concepts can be applied to other disciplines.   |
|                 | Cite evidence to explain and justify reasoning.  |
|                 | K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.   |

|                   | In 3rd grade, students should use a combination of direct and indirect citations.  |
|-------------------|--|
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.                       |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                   | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                   | Make inferences to support comprehension.  |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.               |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |
|                   | Examine artistic response to social issues and new ideas in various cultures.  |
| SS.912.H.1.5:     | Clarifications:<br>Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.   |

### VERSION DESCRIPTION

This year-long, advanced class is designed for students with previous participation in a high school chorus who have demonstrated a capacity for developing advanced listening/aural skills and advanced knowledge of vocal techniques, musical literacy, and choral performance. Chorus V focuses on development and application of these skills and provides opportunities for aesthetic engagement and making individual musical choices, where appropriate, while preparing a variety of high-quality choral literature.

### GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Notes: Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Additional experiences with small ensembles, solo performance, and leadership opportunities may be available. Students who enjoy the challenges and successes of this course may wish to take an accelerated music class in the future.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally

embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Chorus 6 Honors (#1303350) 2020 - 2022 (current)

| Name           | Description   |
|----------------|---|
|                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:  | Clarifications:   |
|                | e.g., listening maps, active listening, checklists  |
|                | Compare using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to apo's own hypothesis of the                 |
|                | compare, using correct music vocabulary, the aesthetic impact of two of more performances of a musical work to one's own hypothesis of the                |
| MU.912.C.1.2:  |   |
|                | Clarifications:   |
|                | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                             |
| MU.912.C.1.4:  | Compare and perform a variety of vocal styles and ensembles.  |
| MU.912.C.2.1:  | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:  | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.2.3:  | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.                                |
| MIL 012 C 2 1  | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development     |
| 10.912.0.3.1.  | in music.   |
| MU.912.F.1.1:  | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.   |
| MU.912.F.1.2:  | Incorporate or adapt new, emerging, or previously unfamiliar technology to create an innovative composition, music project, or related product.           |
|                | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music       |
|                | training.   |
| MU.912.F.2.1:  | Clarifications:   |
|                | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills                       |
|                | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions                                    |
|                |   |
| MU.912.F.2.2:  | Clarifications:   |
|                | e.g., community revitalization, industry choosing new locations, cutoral and social emicriment  |
|                | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.                               |
| MU.912.F.2.3:  | Clarifications:   |
|                | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel  |
|                | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of     |
| MU.912.F.3.1:  | leadership in school and/or non-school settings.  |
|                | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and               |
| MU.912.F.3.2:  | technology.   |
| MIL 012 E 2 2  | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, |
| 10.912.1.3.3.  | demonstrating skills for use in the workplace.  |
| MII 912 F 3 4. | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,        |
|                | and initiative to advance skills and/or knowledge.  |
|                | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:  | Clarifications:   |
|                | e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.                                       |
| MII 912 H 1 2· | Clarifications:   |
|                | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|                |   |
|                | Compare two or more works of a composer across performance media.   |
| MU.912.H.1.3:  | Clarifications:   |
|                | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.4:  | Analyze how Western music has been influenced by historical and current world cultures.   |
| MU.912.H.1.5:  | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.1:  | Evaluate the social impact of music on specific historical periods.   |
| MU.912.H.2.2:  | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.                           |
|                | Analyze the evolution of a music genre.   |
| MU.912.H.2.3:  | Clarifications:   |
|                | e.g., jazz, blues   |
|                | Examine the affects of developing technology on composition, performance, and acquisition of music  |
| MU.912.H.2.4:  | Apply knowledge of science, meth, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects               |
|                | musical performance.  |
| MU.912.H.3.1:  | Clarifications  |
|                | e a acoustics sound amplification materials mechanics   |
|                | sign accustos, sound amplification, matchais, mechanics   |
|                | Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of       |
|                | interest to demonstrate the ability to make transfers across contexts.  |

| MU.912.H.3.2:       | Clarifications:<br>e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public<br>speaking   |
|---------------------|---|
|                     | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.O.1.1:       | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
| MU.912.0.2.1:       | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.  |
| MU.912.0.2.2:       | Transpose melodies into different modalities through performance and composition.   |
|                     | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.  |
| MU.912.0.3.1:       | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration   |
| MU.912.0.3.2:       | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                     | Improvise rhythmic and melodic phrases over harmonic progressions.  |
| MU.912.S.1.1:       | Clarifications:<br>e.g., using text or scat syllables   |
| MU.912.S.1.2:       | Compose music for voices and/or acoustic, digital, or electronic instruments.   |
|                     | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:       | Clarifications:<br>e.g., texture, mode, form, tempo, voicing  |
|                     | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S.1.4:       | Clarifications:   |
|                     | e.g., singing, playing, writing   |
|                     | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   |
| MU.912.S.2.1:       | Clarifications:   |
|                     | e.g., memorization, sequential process  |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
| MU 010 C 0 0.       | Sight-read music accurately and expressively to snow synthesis of skills.   |
| 1010.912.3.3.2.     | e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.3:       | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.  |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                     |   |
| WU.912.5.3.5:       | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| LAFS.1112.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics   |
|                     | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–<br>12 tonics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively                              |
|                     | a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from   |
|                     | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.  |
|                     | <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as<br/>peeded</li>   |
| LAFS.1112.SL.1.1:   | c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a  |
|                     | topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.   |
|                     | d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or recearch is required to depend the investigation or complete the tack                  |
|                     |   |
|                     | Standard Relation to Course: Supporting<br>Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed  |
| LAFS.1112.SL.1.2:   | decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used  |
|                     | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning,   |
| LAFS.1112.SL.2.4:   | alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.   |
| LAFS.1112.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.1112.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
|                     | Use appropriate tools strategically.  |
|                     | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper   |
|                     | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software   |
| MAFS.K12.MP.5.1:  | Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b>                                    |
|-------------------|--|
|                   | Attend to precision.   |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|                   | Standard Relation to Course: Supporting  |
|                   | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. |
|                   | Standard Relation to Course: Supporting  |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |
|                   | Examine artistic response to social issues and new ideas in various cultures.  |
| SS.912.H.1.5:     | Clarifications:<br>Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.   |

# VERSION DESCRIPTION

This year-long, very advanced class is designed for students who have demonstrated a capacity for developing very advanced listening/aural skills and performance techniques, as well as very advanced knowledge of vocal techniques, musical literacy, ensemble skills, and related musical knowledge. Chorus VI focuses on managing, mastering, and refining these skills and techniques through a variety of high-quality choral literature at a high level of aesthetic engagement. Musical independence and student leadership are promoted through significant opportunities for peer mentoring, solo work, and participation as a performer, conductor, or coach in a small or large ensemble.

# GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Additional experiences with small ensembles, solo performance, and leadership opportunities may be available. Students who enjoy the challenges and successes of this course may wish to take an accelerated music class in the future.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|                | composer's intent.  |
| MU.912.C.1.2:  | Clarifications  |
|                | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                             |
| MIL 912 C 1 4. | Compare and perform a variety of vocal styles and ensembles   |
| MU.912.C.1.4.  | Evaluate and make appropriate adjustments to personal performance in solo and ensembles   |
| MU 912 C 2 2   | Evaluate and make appropriate adjustments to personal performances  |
| MU 912 C 2 3   | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.                                |
|                | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development.    |
| MU.912.C.3.1:  | in music.   |
| MU.912.F.1.1:  | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.   |
| MU.912.F.1.2:  | Incorporate or adapt new, emerging, or previously unfamiliar technology to create an innovative composition, music project, or related product.           |
|                | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music       |
|                | training.   |
| MU.912.F.2.1:  | Clarifications:   |
|                | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills                       |
|                | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.                                   |
| MU.912.F.2.2:  | Clarifications:   |
|                | e.g., community revitalization, industry choosing new locations, cultural and social enrichment   |
|                | Compare the organizational structure of a professional orchestral chorus, quintat, or other ensemble to that of a husiness                                |
|                |   |
| MU.912.F.2.3:  | Clarifications:   |
|                | e.g., leadership, mancial needs and structure, marketing, personner matters, manager, traver  |
| MU.912.F.3.1:  | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of     |
|                | leadership in school and/or hon-school settings.  |
| MU.912.F.3.2:  | summarize copyright haws that govern printed, recorded, and on-line music to promote legal and responsible use or intellectual property and technology    |
|                | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight. |
| MU.912.F.3.3:  | demonstrating skills for use in the workplace.  |
|                | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,        |
| WIU.912.F.3.4: | and initiative to advance skills and/or knowledge.  |
|                | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:  | Clarifications:   |
|                | e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.                                       |
| MU.912.H.1.2:  | Clarifications:   |
|                | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|                | Compare two or more works of a composer across performance media  |
| MIL 010 IL 1 0 |   |
| MU.912.H.1.3:  | Clarifications:   |
|                |   |
| MU.912.H.1.4:  | Analyze how Western music has been influenced by historical and current world cultures.   |
| MU.912.H.1.5:  | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.1:  | Evaluate the social impact of music on specific historical periods.   |
| MU.912.H.2.2:  | Analyze current musical trends, including addience environments and music acquisition, to predict possible directions of music.                           |
|                |   |
| MU.912.H.2.3:  | Clarifications:   |
|                | e.g., jazz, blues   |
| MU.912.H.2.4:  | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects               |
| MU.912.H.3.1:  | musical performance.  |
|                | Clarifications:   |
|                | e.g., acoustics, sound amplification, materials, mechanics  |
|                | Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of       |
|                | Interest to demonstrate the ability to make transfers across contexts.  |

| MU.912.H.3.2:                  | Clarifications:<br>e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public<br>speaking   |
|--------------------------------|---|
|                                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.0.1.1:                  | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
| MU.912.0.2.1:                  | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.  |
| MU.912.0.2.2:                  | Transpose melodies into different modalities through performance and composition.   |
|                                | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.  |
| MU.912.O.3.1:                  | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration   |
| MU.912.0.3.2:                  | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
| MU.912.S.1.1:                  | Clarifications:<br>e.g., using text or scat syllables   |
| MU.912.S.1.2:                  | Compose music for voices and/or acoustic, digital, or electronic instruments.   |
| MU.912.S.1.3:                  | Clarifications:<br>e.g., texture, mode, form, tempo, voicing  |
|                                | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S.1.4:                  | Clarifications:   |
|                                | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   |
| MU.912.S.2.1:                  | Clarifications:<br>e.g., memorization, sequential process   |
| MU.912.S.2.2:                  | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:                  | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
| MU.912.S.3.2:                  | Sight-read music accurately and expressively to show synthesis of skills.  Clarifications: e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.3:<br>MU.912.S.3.4: | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.<br>Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
| MU.912.S.3.5:                  | Clarifications:   |
|                                | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                                | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>  |
| MA.K12.MTR.1.1:                | Clarifications:         Teachers who encourage students to participate actively in effortful learning both individually and with others:         • Cultivate a community of growth mindset learners.         • Foster perseverance in students by choosing tasks that are challenging.         • Develop students' ability to analyze and problem solve.         • Recognize students' effort when solving challenging problems.  |
|                                | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul> <li>Build understanding through modeling and using manipulatives.</li> </ul>   |
| MA.K12.MTR.2.1:                | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>  |
|                                | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different nurposes and can be useful in different situations.</li> </ul> |
|                                | Complete tasks with mathematical fluency  |

|                 | Mathematicians who complete tasks with mathematical fluency:  |
|-----------------|---|
|                 | Select efficient and appropriate methods for solving problems within the given context.   |
|                 | Maintain flexibility and accuracy while performing procedures and mental calculations.  |
|                 | Complete tasks accurately and with confidence.  |
|                 | Adapt procedures to apply them to a new context.  |
| MA.K12.M1R.3.1: | Use feedback to improve efficiency when performing calculations.  |
|                 | Clarifications:   |
|                 | Teachers who encourage students to complete tasks with mathematical fluency:  |
|                 | Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.  |
|                 | Offer multiple opportunities for students to practice efficient and generalizable methods.  |
|                 | • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: |
|                 | Communicate mathematical ideas, vocabulary and methods effectively.   |
|                 | Analyze the mathematical thinking of others.  |
|                 | Compare the efficiency of a method to those expressed by others.  |
|                 | Recognize errors and suggest how to correctly solve the task.   |
| MA K12 MTP / 1. | <ul> <li>Justify results by explaining methods and processes.</li> </ul>  |
| MA.K12.MTR.4.1: | Construct possible arguments based on evidence.   |
|                 | Clarifications:   |
|                 | Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:  |
|                 | • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.   |
|                 | Create opportunities for students to discuss their thinking with peers.   |
|                 | Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.  |
|                 | <ul> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>   |
|                 | Use patterns and structure to help understand and connect mathematical concepts.  |
|                 | Mathematicians who use patterns and structure to help understand and connect mathematical concepts:   |
|                 | Focus on relevant details within a problem.   |
|                 | <ul> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> </ul>  |
|                 | Decompose a complex problem into manageable parts.  |
|                 | Relate previously learned concepts to new concepts.   |
|                 | Look for similarities among problems.   |
| MA.K12.MTR.5.1: | Connect solutions of problems to more complicated large-scale situations.   |
|                 | Clarifications:   |
|                 | Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:   |
|                 | Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.  |
|                 | Support students to develop generalizations based on the similarities found among problems.   |
|                 | Provide opportunities for students to create plans and procedures to solve problems.  |
|                 | • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.   |
|                 | Assess the reasonableness of solutions.   |
|                 | Mathematicians who assess the reasonableness of solutions:  |
|                 | Estimate to discover possible solutions.  |
|                 | Use benchmark quantities to determine if a solution makes sense.  |
|                 | Check calculations when solving problems.   |
|                 | <ul> <li>Verify possible solutions by explaining the methods used.</li> </ul>   |
| MA.K12.MTR.6.1: | Evaluate results based on the given context.  |
|                 | Clarifications:   |
|                 | Teachers who encourage students to assess the reasonableness of solutions:  |
|                 | Have students estimate or predict solutions prior to solving.   |
|                 | <ul> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> </ul>   |
|                 | Reinforce that students check their work as they progress within and after a task.  |
|                 | Strengthen students' ability to verify solutions through justifications.  |
|                 | Apply mathematics to real-world contexts.   |
|                 | Mathematicians who apply mathematics to real-world contexts:  |
|                 | Connect mathematical concepts to everyday experiences.  |
|                 | <ul> <li>Use models and methods to understand, represent and solve problems.</li> </ul>   |
|                 | • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.   |
| MA.K12.MTR.7.1: | Clarifications  |
|                 | Teachers who encourage students to apply mathematics to real-world contexts:  |
|                 | <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> </ul>  |
|                 | Challenge students to question the accuracy of their models and methods.  |
|                 | Support students as they validate conclusions by comparing them to the given situation.   |
|                 | Indicate how various concepts can be applied to other disciplines.  |
|                 | Cite evidence to explain and justify reasoning.   |
|                 | Clarifications:   |
|                 | via invations.  |

| ELA.K12.EE.1.1:   | <ul> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly</li> </ul> |
|-------------------|---|
|                   | quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |
|                   | Examine artistic response to social issues and new ideas in various cultures.   |
| SS.912.H.1.5:     | Clarifications:<br>Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.  |

# VERSION DESCRIPTION

This year-long, very advanced class is designed for students who have demonstrated a capacity for developing very advanced listening/aural skills and performance techniques, as well as very advanced knowledge of vocal techniques, musical literacy, ensemble skills, and related musical knowledge. Chorus VI focuses on managing, mastering, and refining these skills and techniques through a variety of high-quality choral literature at a high level of aesthetic engagement. Musical independence and student leadership are promoted through significant opportunities for peer mentoring, solo work, and participation as a performer, conductor, or coach in a small or large ensemble.

# GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Additional experiences with small ensembles, solo performance, and leadership opportunities may be available. Students who enjoy the challenges and successes of this course may wish to take an accelerated music class in the future.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic

rigor is more than simply assigning to students a greater quantity of work.

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Vocal Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

# Chorus Register-specific 1 (#1303360) 2020 - 2022 (current)

| Name                   | Description  |
|------------------------|--|
|                        | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:          | Clarifications:  |
|                        | e.g., listening maps, active listening, checklists   |
| MIL 012 C 1 4.         | Compare and perform a variety of vocal styles and ensembles  |
| MU.912.C.1.4.          | Evaluate and make appropriate adjustments to personal performance in solo and ensembles  |
| MU 912 C 2 2           | Evaluate and make appropriate adjustments to personal performances   |
| 10.712.0.2.2.          | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development  |
| MU.912.C.3.1:          | in music.  |
| MU.912.F.3.1:          | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings. |
| MU.912.F.3.2:          | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
|                        | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1:          | Clarifications:<br>e.g., patriotic, folk, celebration, entertainment, spiritual  |
| MU.912.H.2.1:          | Evaluate the social impact of music on specific historical periods.  |
|                        | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.O.1.1:          | Clarifications:<br>e.g., rhythm, melody, timbre, form, topality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU 010 0 0 0           |  |
| MU.912.0.3.2:          | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                        | Improvise rnythmic and meiodic phrases over harmonic progressions.   |
| MU.912.S.1.1:          | Clarifications:  |
|                        | e.g., using text or scat syllables   |
|                        | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:          | Clarifications:  |
|                        | e.g., texture, mode, form, tempo, voicing  |
|                        | Perform and notate, independently and accurately, melodies by ear.   |
| MIL 912 S 1 <i>J</i> · | Clarifications   |
| 10.712.3.1.4.          | e.g., singing, plaving, writing  |
| MU 012 5 2 2           | Transfer supressive elements and performance techniques from ano piece of music to another   |
| WIU.912.3.2.2.         | Suphacize a bread range of musical skills by performing a varied reporteire with expression, appropriate stylistic interpretation, technical accuracy, and   |
| MU.912.S.3.1:          |  |
|                        | Sight-read music accurately and expressively to show synthesis of skills.  |
| MIL 012 S 3 2.         | Clarifications   |
| 1010.712.3.3.2.        | e a musical elements, expressive qualities, performance technique  |
|                        |  |
| MU.912.5.3.4:          | Analyze and describe the effect of renearsal sessions and/or strategies on relinement of skills and techniques.  |
|                        | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:          | Clarifications:  |
|                        | e.g., posture, breatning, fingering, embouchure, bow technique, tuning, strumming  |
| LAFS.910.RST.2.4:      | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.      |
|                        | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10   |
|                        | topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.  |
|                        | a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from  |
|                        | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.   |
|                        | b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of   |
| LAFS.910.SL.1.1:       | alternate views), clear goals and deadlines, and individual roles as needed.   |
|                        | c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively   |
|                        | incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.   |
|                        | d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their   |
|                        | own views and understanding and make new connections in light of the evidence and reasoning presented.   |
|                        | Standard Relation to Course: Supporting  |
| LAFS.910.SL.1.2:       | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.                       |
|                        | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric. identifying any fallacious reasoning or exaggerated or distorted  |
| LAFS.910.SL.1.3:       | evidence.  |

| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.  |
|--------------------|--|
| LAFS.910.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.  |
| LAFS.910.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.   |
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.  |
| MAFS.K12.MP.5.1:   | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,<br>concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.<br>Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools<br>might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze<br>graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other<br>mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying<br>assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify<br>relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use<br>technological tools to explore and deepen their understanding of concepts.<br><b>Standard Relation to Course: Supporting</b> |
|                    | Attend to precision.   |
| MAFS.K12.MP.6.1:   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|                    | Look for and make use of structure   |
| MAFS.K12.MP.7.1:   | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting   |
| DA.912.S.2.1:      | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

Students in this entry-level class focus on the rehearsal, performance, and study of high-quality music literature for singers of a similar voice range. As they address the technical needs of singers in a specific range of notes, they learn beginning music theory, musicianship, and choral performance skills. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

# GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|                 | e.g., mythin, melody, timbre, form, tohanty, texture, solo, chamber ensemble, large ensemble   |
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                 | Improvise rhythmic and melodic phrases over harmonic progressions.   |
| MU.912.S.1.1:   | Clarifications:  |
|                 | e.g., using text of scat synaples  |
|                 | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:   | Clarifications:  |
|                 | e.g., texture, mode, torm, tempo, voicing  |
|                 | Perform and notate, independently and accurately, melodies by ear.   |
| MU.912.S.1.4:   | Clarifications:  |
|                 | e.g., singing, playing, writing  |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and          |
|                 | kinesthetic energy.  |
|                 |  |
| MU.912.S.3.2:   | Clarifications:  |
|                 | e.g., inducal elements, expressive qualities, performance technique  |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                 | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:   | Clarifications:  |
|                 | e.g., postare, preatring, migering, emboachare, bow technique, taining, strainining  |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |
|                 | Analyze the problem in a way that makes sense given the task.      Ask questions that will below the solving the task  |
|                 | <ul> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> </ul> |
|                 | Stave engaged and maintain a positive mindset when working to solve tasks  |
|                 | <ul> <li>Help and support each other when attempting a new method or approach.</li> </ul>  |
| MA.K12.MTR.1.1: | Clarifications   |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                 | Cultivate a community of growth mindset learners.  |
|                 | Foster perseverance in students by choosing tasks that are challenging.  |
|                 | Develop students' ability to analyze and problem solve.  |
|                 | Recognize students' effort when solving challenging problems.  |
|                 | Demonstrate understanding by representing problems in multiple ways.   |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                 | Build understanding through modeling and using manipulatives.  |
|                 | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> </ul>  |
|                 | Progress from modeling problems with objects and drawings to using algorithms and equations.   |

| MA.K12.MTR.2.1:                    | <ul> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>  |
|------------------------------------|--|
|                                    | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
| MA.K12.MTR.3.1:<br>MA.K12.MTR.4.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>• Select efficient and appropriate methods for solving problems within the given context.<br>• Maintain flexibility and accuracy while performing procedures and mental calculations.<br>• Complete tasks accurately and with confidence.<br>• Adapt procedures to apply them to a new context.<br>• Use feedback to improve efficiency when performing calculations.<br><b>Clarifications:</b><br>Teachers who encourage students to complete tasks with mathematical fluency:<br>• Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>• Offer multiple opportunities for students to practice efficient and generalizable methods.<br>• Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.<br>Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicals who engage in discussions that reflect on the mathematical thinking of self and others:<br>• Communicate mathematical ideas, vocabulary and methods effectively.<br>• Analyze the mathematical ideas, vocabulary and methods effectively.<br>• Analyze the mathematical thinking of others.<br>• Compare the efficiency of a method to those expressed by others.<br>• Recognize errors and suggest how to correctly solve the task.<br>• Justify results by explaining methods and processes.<br>• Construct possible arguments based on evidence. |
| IVIA.N 12.IVI I N.4. I .           | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>   |
| MA.K12.MTR.5.1:                    | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br><b>Clarifications:</b><br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.<br>• Develop <b>students' ability to construct relationships between their current</b> understanding and more sophisticated ways of thinking.  |
| MA.K12.MTR.6.1:                    | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through justifications.   |
|                                    | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts: <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> </ul>  |

.

|                   | Perform investigations to gather data or determine if a method is appropriate.     Redesign models and methods to improve accuracy or efficiency.   |
|-------------------|---|
| MA.K12.MTR.7.1:   | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         Challenge students to question the accuracy of their models and methods.         Support students as they validate conclusions by comparing them to the given situation.         Indicate how various concepts can be applied to other disciplines.   |
|                   | Cite evidence to explain and justify reasoning.   |
|                   | <ul> <li>Clarifications:</li> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> </ul> |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.    |
|                   | Use the accepted rules governing a specific format to create guality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students in this entry-level class focus on the rehearsal, performance, and study of high-quality music literature for singers of a similar voice range. As they address the technical needs of singers in a specific range of notes, they learn beginning music theory, musicianship, and choral performance skills. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## GENERAL NOTES

## Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

| LAFS.910.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.   |
|--------------------|---|
| LAFS.910.SL.1.1:   | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively</li> </ul>   |
|                    | <ul> <li>incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> <li>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</li> <li>Standard Relation to Course: Supporting</li> </ul>  |
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.  |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.   |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the<br>organization, development, substance, and style are appropriate to purpose, audience, and task.  |
| LAFS.910.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.   |
| LAFS.910.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:   | mathematically producent students consider the available clous when solving a mathematical problem. These tools might include perich and paper,<br>concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.<br>Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools<br>might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze<br>graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other<br>mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying<br>assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify<br>relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use<br>technological tools to explore and deepen their understanding of concepts.<br><b>Standard Relation to Course: Supporting</b> |
| MAFS.K12.MP.6.1:   | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own<br>reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about<br>specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,<br>express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully<br>formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.<br><b>Standard Relation to Course: Supporting</b>   |
| MAFS.K12.MP.7.1:   | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x<br>– y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting   |
| DA.912.S.2.1:      | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students with prior choral or vocal instruction focus on developing skills to perform high-quality literature with singers in a similar vocal range. Through two- and three-part music, students build musicianship and choral ensemble skills. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## **GENERAL NOTES**

## English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level

words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br>Clarifications:<br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.<br>• Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.<br>Assess the reasonableness of solutions.   |

| MA.K12.MTR.6.1:           | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
|---------------------------|--|
|                           | <ul> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>   |
| MA K12 MTD 7 1-           | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>   |
| IVIA.N I 2.IVI I N. 7. 1. | Clarifications:<br>Teachers who encourage students to apply mathematics to real-world contexts:<br>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.<br>Challenge students to question the accuracy of their models and methods.<br>Support students as they validate conclusions by comparing them to the given situation.<br>Indicate how various concepts can be applied to other disciplines.   |
|                           | Cite evidence to explain and justify reasoning.  |
|                           | <ul> <li>Clarifications:</li> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> </ul>                            |
| ELA.K12.EE.1.1:           | <ul> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> <li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li> </ul> |
| ELA.K12.EE.2.1:           | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
| ELA.K12.EE.3.1:           | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
| ELA.K12.EE.4.1:           | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.  |
|                           | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
| ELA.K12.EE.5.1:           | Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.   |
|                           | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:           | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.S.2.1:             | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1:         | English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

Students with prior choral or vocal instruction focus on developing skills to perform high-quality literature with singers in a similar vocal range. Through two- and three-part music, students build musicianship and choral ensemble skills. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

Course Number: 1303370

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Choral Music > Abbreviated Title: CHORUS REG-SPEC 2 Course Length: Year (Y) Course Level: 2

## **Educator Certifications**

Vocal Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

# Chorus Register-specific 3 (#1303380) 2020 - 2022 (current)

| Name           | Description  |
|----------------|--|
|                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:  | Clarifications:  |
|                | e.g., listening maps, active listening, checklists   |
|                | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the   |
|                | composer's intent.   |
| MU.912.C.1.2:  | Clarifications:  |
|                | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
| MU.912.C.1.4:  | Compare and perform a variety of vocal styles and ensembles.   |
| MU.912.C.2.1:  | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:  | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:  | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.                                     |
|                | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.  |
| MU.912.F.2.3:  | Clarifications:  |
|                | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel   |
| MU.912.F.3.1:  | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings. |
| MU.912.F.3.2:  | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.4:  | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.  |
|                | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1:  | Clarifications:  |
|                | e.g., patriotic, folk, celebration, entertainment, spiritual   |
|                | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MII 912 H 1 2· | Clarifications   |
|                | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
|                | Compare two or more works of a composer across performance media   |
| MIL 912 H 1 3· | Clarifications:  |
|                | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU.912.H.2.1:  | Evaluate the social impact of music on specific historical periods.  |
| MU.912.H.2.4:  | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|                | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.                                       |
| MU.912.H.3.1:  | Clarifications   |
|                | e.g., acoustics, sound amplification, materials, mechanics   |
|                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure  |
| MIL 012 O 1 1. |  |
| 10.712.0.1.1.  | e.g., rhythm, melody, timbre, form, tonality, harmony, texture: solo, chamber ensemble, large ensemble   |
| MIL 012 0 2 2. | Interpret and perform expressive elements indicated by the musical score and/or conductor  |
| 10.912.0.3.2.  | Improvise rhythmic and melodic phrases over harmonic progressions  |
| MU 012 S 1 1.  |  |
| 10.912.3.1.1.  | e.g., using text or scat syllables   |
|                | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:  | Clarifications:  |
|                | e.g., texture, mode, form, tempo, voicing  |
|                | Perform and notate, independently and accurately, melodies by ear.   |
| MU.912.S.1.4:  | Clarifications:  |
|                | e.g., singing, playing, writing  |
|                | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of  |
| MU.912.S.2.1:  | music literature.  |
|                | Clarifications:  |
|                | e.g., memorization, sequential process   |
| MU.912.S.2.2:  | I ranster expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:  | synthesize a bload range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.                        |

|                    | Sight-read music accurately and expressively to show synthesis of skills.   |
|--------------------|---|
| MU.912.S.3.2:      | Clarifications:   |
|                    | e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:      | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                    | Develop and demonstrate proper vocal or instrumental technique.   |
| MU 912 S 3 5       | Clarifications  |
| 1017121010101      | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| LAFS.1112.SL.1.1:  | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to guestions that probe reasoning and evidence: ensure a hearing for a full range of positions on a</li> </ul>  |
|                    | <ul> <li>c. Propercentre defined by posing and responding to questions that proce reasoning and evidence, ensure a realing for a fail range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li> <li>Standard Relation to Course: Supporting</li> </ul>  |
| LAFS.910.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.   |
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.  |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.   |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.   |
| LAFS.910.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.   |
| LAFS.910.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
| MAFS.K12.MP.6.1:   | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own<br>reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about<br>specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,<br>express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully<br>formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.<br>Standard Relation to Course: Supporting  |
| MAFS.K12.MP.7.1:   | <ul> <li>Look for and make use of structure.</li> <li>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression x<sup>2</sup> + 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y)<sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.</li> <li>Standard Relation to Course: Supporting</li> </ul>  |
| DA.912.S.2.1:      | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| FLD K12 FLL SL 1   | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students continue to build on previous choral experience to develop skills to perform increasingly challenging, high-quality literature for singers in a similar vocal range. As singers explore two-, three-, and four-part literature in its historical and cultural context, they enhance their musicianship and choral ensemble skills. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and

## GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

|  | Course Path: Section: Grades PreK to 12 Education |
|--|---|
| Course Number: 1202200                       | Courses > Grade Group: Grades 9 to 12 and Adult   |

|  | SubSubject: Choral Music >                        |
|  | Abbreviated Title: CHORUS REG-SPEC 3              |
| Number of Credits: One (1) credit            | Course Length: Year (Y)                           |
| Course Type: Core Academic Course            | Course Level: 2                                   |
| Course Status: Course Approved               |   |
| Grade Level(s): 9,10,11,12                   |   |
| Graduation Requirement: Performing/Fine Arts |   |

#### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12)

# Chorus Register-specific 3 (#1303380) 2022 - And Beyond

| Name                      | Description  |
|---------------------------|--|
|                           | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:             | Clarifications:  |
|                           | e.g., listening maps, active listening, checklists   |
|                           | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the   |
|                           | composer's intent.   |
| MU.912.C.1.2:             | Clarifications:  |
|                           | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
| MU.912.C.1.4:             | Compare and perform a variety of vocal styles and ensembles.   |
| MU.912.C.2.1:             | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:             | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:             | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.                                     |
|                           | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.  |
| MU.912.F.2.3:             | Clarifications:  |
|                           | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel   |
| MU.912.F.3.1:             | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings. |
| MU.912.F.3.2:             | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.4:             | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.  |
|                           | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1:             | Clarifications:  |
|                           | e.g., patriotic, folk, celebration, entertainment, spiritual   |
|                           | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU 912 H 1 2 <sup>.</sup> | Clarifications:  |
|                           | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
|                           | Compare two or more works of a composer across performance media.  |
| MU 912 H 1 3·             | Clarifications:  |
| 10.712.11.1.0.            | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU.912.H.2.1:             | Evaluate the social impact of music on specific historical periods.  |
| MU.912.H.2.4:             | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|                           | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects  |
|                           | musical performance.   |
| MU.912.H.3.1:             | Clarifications:  |
|                           | e.g., acoustics, sound amplification, materials, mechanics   |
|                           | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1:             | Clarifications:  |
|                           | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
| MU.912.0.3.2:             | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                           | Improvise rhythmic and melodic phrases over harmonic progressions.   |
| MU.912.S.1.1:             | Clarifications:  |
|                           | e.g., using text or scat syllables   |
|                           | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU 912 S 1 3 <sup>.</sup> | Clarifications:  |
|                           | e.g., texture, mode, form, tempo, voicing  |
|                           | Perform and notate, independently and accurately, melodies by ear.   |
| MIL 012 S 1 4.            | Clarifications:  |
| 10.712.3.1.4.             | e.g., singing, playing, writing  |
|                           | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of  |
|                           | music literature.  |
| MU.912.S.2.1:             | Clarifications:  |
|                           | e.g., memorization, sequential process   |
| MU.912.S.2.2:             | Transfer expressive elements and performance techniques from one piece of music to another.  |
|                           | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and  |
| MU.912.S.3.1:             | kinesthetic energy.  |

|                 | Sight-read music accurately and expressively to show synthesis of skills.  |
|-----------------|--|
| MU.912.S.3.2:   | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
| MU.912.S.3.5:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> </ul> |
|                 | <ul> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>   |
|                 | <ul> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>   |
| MA.K12.MTR.3.1: | <ul> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |

| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> <li>Clarifications:</li> </ul>  |
|                 | <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>  |
|                 | <ul> <li>be patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Polate previously learned concepts to pew concepts.</li> </ul>   |

| MA.K12.MTR.5.1:            | Look for similarities among problems.  |
|----------------------------|--|
|                            | Connect solutions of problems to more complicated large-scale situations.  |
|                            | Clarifications:  |
|                            | <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts:</li> </ul>   |
|                            | <ul> <li>Support students to develop generalizations based on the similarities found among problems.</li> </ul>  |
|                            | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> </ul>   |
|                            | • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
|                            | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
|                            | Estimate to discover possible solutions.   |
|                            | Use benchmark quantities to determine if a solution makes sense.   |
|                            | Check calculations when solving problems.  |
| MA V12 MTD 6 1.            | <ul> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context</li> </ul>   |
| IVIA. K 12. IVI 1 K.O. 1.  | Clarifications   |
|                            | Teachers who encourage students to assess the reasonableness of solutions:   |
|                            | Have students estimate or predict solutions prior to solving.  |
|                            | <ul> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> </ul>  |
|                            | Reinforce that students check their work as they progress within and after a task.   |
|                            | Strengthen students' ability to verify solutions through justifications.   |
|                            | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |
|                            | Connect mathematical concepts to everyday experiences.   |
|                            | Use models and methods to understand, represent and solve problems.  |
|                            | Perform investigations to gather data or determine if a method is appropriate.     Redesign models and methods to improve accuracy or efficiency.  |
| IVIA. N 12. IVI 1 K. 7. 1. | Clarifications:  |
|                            | <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> </ul>   |
|                            | Challenge students to question the accuracy of their models and methods.   |
|                            | • Support students as they validate conclusions by comparing them to the given situation.  |
|                            | Indicate how various concepts can be applied to other disciplines.   |
|                            | Cite evidence to explain and justify reasoning.  |
|                            | Clarifications:  |
|                            | K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without paging the text. During 1st grade, students logg how to incorporate the evidence in their writing |
|                            | 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.   |
|                            | In 3rd grade, students should use a combination of direct and indirect citations.  |
| ELA.K12.EE.1.1:            | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly  |
|                            | quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide   |
|                            | 6.9. Students continue with providus skills and use a style guide to create a proper sitation  |
|                            | 0-0 students continue with previous skills and use a style guide to create a proper citation.  |
|                            | 7.12 Students continue with providus skins and should be aware of existing style guides and the ways in which they differ.   |
|                            | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:            | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                            | Make interences to support comprehension.  |
| ELA K12 EE 2 1.            | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the cirl   |
| LLA.NIZ.LL.J.I.            | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and  |
|                            | beyond.  |
| ELA.K12.EE.4.1:            | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
|                            | Clarifications:  |
|                            | In kindergarten, students learn to listen to one another respectfully.   |
|                            | collaborative conversations are becoming academic conversations.   |
|                            | In grades 3.12 students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students  |
|                            | build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                            |  |
|                            | Ose the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:            | Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately they   |
|                            | must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.  |
|                            | Use appropriate voice and tone when speaking or writing.   |
|                            |  |

|                   | Clarifications:  |
|-------------------|--|
| ELA.KIZ.EE.O.I:   | In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends |
|                   | differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

Students continue to build on previous choral experience to develop skills to perform increasingly challenging, high-quality literature for singers in a similar vocal range. As singers explore two-, three-, and four-part literature in its historical and cultural context, they enhance their musicianship and choral ensemble skills. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

# **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# GENERAL INFORMATION

| Vocal Music (Elementary and Secondary Grades K-12) |

# Chorus Register-specific 4 Honors (#1303390) 2020 - 2022 (current)

| Name                      | Description   |
|---------------------------|---|
|                           | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:             | Clarifications:   |
|                           | e.g., listening maps, active listening, checklists  |
|                           | Compare using correct music version was hubble to a static impact of two or mare performances of a musical work to one's own hypothesis of the  |
|                           | compare, using correct music vocabulary, the aesthetic impact of two or more performances or a musical work to one's own hypothesis of the  |
| MU.912.C.1.2:             |   |
|                           | Clarifications:   |
|                           | e.g., quaity recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, inte   |
| MU.912.C.1.4:             | Compare and perform a variety of vocal styles and ensembles.  |
| MU.912.C.2.1:             | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:             | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.2.3:             | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.  |
| MU.912.C.3.1:             | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.                                       |
| MU.912.F.1.1:             | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.   |
|                           | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music   |
|                           | training.   |
| MU.912.F.2.1:             | Clarifications  |
|                           | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills   |
|                           |   |
|                           | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.   |
| MU.912.F.2.2:             | Clarifications:   |
|                           | e.g., community revitalization, industry choosing new locations, cultural and social enrichment   |
| MIL 012 E 3 1.            | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of   |
| WIU.912.F.3.1.            | leadership in school and/or non-school settings.  |
| MIL 912 F 3 2             | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and   |
| 10.712.1.0.2.             | technology.   |
| MU.912.F.3.3:             | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,   |
|                           | demonstrating skills for use in the workplace.  |
| MU.912.F.3.4:             | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge. |
|                           | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:             | Clarifications:   |
|                           | e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                           | Compare two or more works of a composer across performance media  |
|                           |   |
| MU.912.H.1.3:             | Clarifications:<br>e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU 912 H 1 4·             | Analyze how Western music has been influenced by historical and current world cultures  |
| MU 912 H 1 5              | Analyze music within cultures to gain understanding of authentic performance practices  |
| MU 912 H 2 2              | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music  |
| 10.712.11.2.2.            | Analyze the evolution of a music genre  |
|                           |   |
| WIU.912.H.2.3:            |   |
|                           | e.g., jazz, blues   |
|                           | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects   |
| MU 912 H 3 1 <sup>.</sup> | musical performance.  |
|                           | Clarifications:   |
|                           | e.g., acoustics, sound amplification, materials, mechanics  |
|                           | Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of   |
|                           | interest to demonstrate the ability to make transfers across contexts.  |
| MU.912.H.3.2:             | Clarifications:   |
|                           | e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public  |
|                           | speaking  |
|                           | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.O.1.1:             | Clarifications  |
|                           | e.g., rhythm, melody, timbre, form, tonality, harmony, texture: solo, chamber ensemble, large ensemble  |
|                           |   |
| MU.912.0.2.1:             | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.  |
| MU.912.0.2.2:             | I ranspose melodies into different modalities through performance and composition.  |
|                           | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied   |

|                     | meaning of the composer/performer.   |
|---------------------|--|
| MU.912.0.3.1:       | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration  |
| MU.912.0.3.2:       | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                     | Improvise rhythmic and melodic phrases over harmonic progressions.   |
| MU.912.S.1.1:       | Clarifications:<br>e.g., using text or scat syllables  |
| MU.912.S.1.2:       | Compose music for voices and/or acoustic, digital, or electronic instruments.  |
|                     | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:       | Clarifications:<br>e.g., texture, mode, form, tempo, voicing   |
|                     | Perform and notate, independently and accurately, melodies by ear.   |
| MU.912.S.1.4:       | Clarifications:  |
|                     |  |
|                     | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
| WIU.912.3.2.1.      | Clarifications:<br>e.g., memorization, sequential process  |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
|                     | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:       | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.3:       | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.   |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                     | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:       | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| LAFS.1112.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.   |
| LAFS.1112.SL.1.1:   | <ul> <li>12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li> </ul>   |
|                     | Standard Relation to Course: Supporting  |
| LAFS.1112.SL.1.2:   | decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.  |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.  |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.  |
| LAFS.1112.SL.2.5:   | Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.  |
| LAFS.1112.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.   |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.  |
| MAFS.K12.MP.5.1:    | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. Standard Relation to Course: Supporting |
|                     | Attenu to predsion.  |

| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. <b>Standard Relation to Course: Supporting</b>   |
|-------------------|--|
|                   | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. |
|                   | Standard Relation to Course: Supporting  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

Students build and refine technical and expressive skills through the study, rehearsal, and performance of high-quality literature for singers in a similar vocal range. As singers explore three- and four-part literature in its historical and cultural context, they develop advanced musicianship and choral ensemble skills. In keeping with the rigor expected in an Honors course, students undertake independent study that includes synthesis of learning and experience. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

# **GENERAL NOTES**

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

| Vocal Music (Elementary and Secondary Grades K-12) |  |

# Chorus Register-specific 4 Honors (#1303390) 2022 - And Beyond

| Name             | Description   |
|------------------|---|
| MU.912.C.1.1:    | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
|                  | Clarifications:   |
|                  | e.g., listening maps, active listening, checklists  |
|                  | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the              |
|                  | composer's intent.  |
| MU.912.C.1.2:    | Clarifications:   |
|                  | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                           |
| MU 012 C 1 4     | Compare and perform a variety of vecal styles and encomples   |
| MU.912.C.1.4.    | Evaluate and make appropriate adjuctments to personal performance in sole and ensembles   |
| MU.912.C.2.1.    | Evaluate and make appropriate aujustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2.    | Evaluate performance quarty in recorded and/or improvisations and generate improvements independently or cooperatively                                  |
| 10.712.0.2.3.    | Make critical evaluations based on exemplary models of the quality and effectiveness of performances and apply the criteria to personal development.    |
| MU.912.C.3.1:    | in music.   |
| MU.912.F.1.1:    | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.   |
|                  | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music     |
|                  | training.   |
| MU.912.F.2.1:    | Clarifications:   |
|                  | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills                     |
|                  | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions                                  |
|                  |   |
| MU.912.F.2.2:    | Clarifications:   |
|                  |   |
| MU.912.F.3.1:    | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of   |
|                  | leadership in school and/or hon-school settings.  |
| MU.912.F.3.2:    | summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology. |
|                  | Define prioritize monitor and successfully complete tasks related to individual musical performance or project presentation, without direct oversight   |
| MU.912.F.3.3:    | demonstrating skills for use in the workplace.  |
|                  | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,      |
| MU.912.F.3.4:    | and initiative to advance skills and/or knowledge.  |
|                  | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:    | Clarifications:   |
|                  | e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                  | Compare two or more works of a composer across performance media.   |
| MII 912 H 1 3·   | Clarifications  |
|                  | e.g., orchestral and choral; guitar and string guartet; piano solo and piano concerto   |
|                  | Analyza haw Western music has been influenced by historical and surrant world sultures  |
| MU.912.H.1.4.    | Analyze now western music has been innuenced by historical and current world currents.  |
| MIL 912 H 2 2    | Analyze music within curdies to gain understanding of admentic performance practices.   |
| WIO. 712.11.2.2. | Analyze careful musical relias, including addictice environments and music acquisition, to predict possible directions of music.                        |
| MU 010 U 0 0.    |   |
| WIU.912.H.2.3:   |   |
|                  |   |
|                  | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects             |
| MU.912.H.3.1:    |   |
|                  | Clarifications:   |
|                  | e.g., acoustics, sound amplification, materials, mechanics  |
|                  | Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of     |
| MU.912.H.3.2:    | interest to demonstrate the ability to make transfers across contexts.  |
|                  | Clarifications:   |
|                  | e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public    |
|                  | speaking  |
| MU.912.O.1.1:    | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
|                  | Clarifications:   |
|                  | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1:    | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.                                |
| MU.912.0.2.2:    | Transpose melodies into different modalities through performance and composition.   |
|                  | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied     |
|                  | meaning of the composer/performer.  |

| MU.912.O.3.1:   | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration  |
|-----------------|--|
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.<br>Improvise rhythmic and melodic phrases over harmonic progressions.   |
| MU.912.S.1.1:   | Clarifications:<br>e.g., using text or scat syllables  |
| MU.912.S.1.2:   | Compose music for voices and/or acoustic, digital, or electronic instruments.  |
| MU.912.S.1.3:   | Arrange a musical work by manipulating two or more aspects of the composition.  Clarifications: e.g., texture, mode, form, tempo, voicing  |
|                 | Perform and notate, independently and accurately, melodies by ear.   |
| MU.912.S.1.4:   | Clarifications:  |
|                 | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
| MU.912.S.2.1:   | Clarifications:<br>e.g., memorization, sequential process  |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
| MU.912.S.3.2:   | Clarifications:<br>e.g., musical elements, expressive gualities, performance technique   |
| MU.912.S.3.3:   | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.   |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                 | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul> </li> </ul>  |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul> </li> </ul>  |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>Select efficient and appropriate methods for solving problems within the given context.<br>Maintain flexibility and accuracy while performing procedures and mental calculations.<br>Complete tasks accurately and with confidence.<br>Adapt procedures to apply them to a new context.<br>Use feedback to improve efficiency when performing calculations.<br>Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:<br>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>Offer multiple apportunities for students to practice efficient and appreciable methods |

|                 | • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.   |
|-----------------|--|
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  |
| MA.K12.MTR.4.1: | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
| MA.K12.MTR.5.1: | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>           |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context   |
|                 | <ul> <li>Evaluate results based on the given context.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul> </li> </ul>  |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |
| MA.K12.MTR.7.1: | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.   |
|                 | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b><br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide<br>referenced by the instructor.  |
|                 | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                 | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |

|                   | Read and comprehend grade-level complex texts proficiently.  |
|-------------------|--|
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                   | Make inferences to support comprehension.  |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:   | Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

Students build and refine technical and expressive skills through the study, rehearsal, and performance of high-quality literature for singers in a similar vocal range. As singers explore three- and four-part literature in its historical and cultural context, they develop advanced musicianship and choral ensemble skills. In keeping with the rigor expected in an Honors course, students undertake independent study that includes synthesis of learning and experience. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## **GENERAL NOTES**

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

Course Number: 1303390

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Choral Music >
Number of Credits: One (1) credit

Abbreviated Title: CHORUS REG-SPEC 4 H Course Length: Year (Y) Course Attributes: • Honors Course Level: 3

Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts

#### **Educator Certifications**

| Music (Elementary and Secondary Grades K-12)       |  |
|--|--|
| Vocal Music (Elementary and Secondary Grades K-12) |  |

# Vocal Techniques 1 (#1303400) 2020 - 2022 (current)

| Name               | Description  |
|--------------------|--|
|                    | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:      | Clarifications:  |
|                    | e.g., listening maps, active listening, checklists   |
| MU.912.C.2.1:      | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:      | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:      | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |
| MU.912.F.3.3:      | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.   |
| MU.912.0.2.1:      | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
| MU.912.0.3.2:      | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
| MU.912.S.2.2:      | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:      | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
| MU.912.S.3.4:      | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                    | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:      | Clarifications:  |
|                    | e.g., posture, breatning, fingering, embouchure, bow technique, tuning, strumming  |
| LAFS.910.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical<br>context relevant to grades 9–10 texts and topics.   |
| LAFS.910.SL.1.1:   | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10</li> <li>topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> <li>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</li> </ul>   |
|                    | Standard Relation to Course: Supporting  |
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.   |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.  |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.  |
| LAFS.910.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.  |
| LAFS.910.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.   |
| MAFS.K12.MP.5.1:   | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. Standard Relation to Course: Supporting |
|                    | Attend to precision.   |
| MAFS.K12.MP.6.1:   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|                    | Standard Relation to Course: Supporting  |
|                    | Look for and make use of structure.  |
|                    | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven  |

| MAFS.K12.MP.7.1:  | more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$ + 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x<br>- y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. |
|-------------------|---|
|                   | Standard Relation to Course: Supporting   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students in this entry-level class focus on the development of musical and technical skills on a specific voice through etudes, scales, and selected music literature. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### **Educator Certifications**

| Vocal Music (Elementary and Secondary Grades K-12) |
|--|
| Music (Elementary and Secondary Grades K-12)       |

| Name            | Description  |
|-----------------|--|
|                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:   | Clarifications:  |
|                 | e.g., listening maps, active listening, checklists   |
| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:   | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |
| MU.912.F.3.3:   | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace. |
| MU.912.0.2.1:   | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.                          |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                 | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |
|                 | Analyze the problem in a way that makes sense given the task.  |
|                 | Ask questions that will help with solving the task.  |
|                 | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> </ul>  |
|                 | Stay engaged and maintain a positive mindset when working to solve tasks.  |
|                 | Help and support each other when attempting a new method or approach.  |
| MA.K12.MTR.1.1: | Clarifications   |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                 | Cultivate a community of growth mindset learners.  |
|                 | • Foster perseverance in students by choosing tasks that are challenging.  |
|                 | Develop students' ability to analyze and problem solve.  |
|                 | Recognize students' effort when solving challenging problems.  |
|                 | Demonstrate understanding by representing problems in multiple wave  |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                 | Mathematicians who achieves and examining by representing problems in matiple ways.  |
|                 | <ul> <li>Build understanding through modeling and using manipulatives.</li> </ul>  |
|                 | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> </ul>  |
|                 | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>   |
|                 | <ul> <li>Express connections between concepts and representations.</li> </ul>  |
| MA.K12.MTR.2.1: | Choose a representation based on the given context or purpose.   |
|                 | Clarifications:  |
|                 | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:  |
|                 | Help students make connections between concepts and representations.   |
|                 | Provide opportunities for students to use manipulatives when investigating concepts.   |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.   |
|                 | Show students that various representations can have different purposes and can be useful in different situations.  |
|                 | Complete tasks with mathematical fluency.  |
|                 | Mathematicians who complete tasks with mathematical fluency:   |
|                 |  |
|                 | Select encient and appropriate methods for solving problems within the given context.  |
|                 | Maintain nexibility and accuracy while performing procedures and mental calculations.  |
| MA.K12.MTR.3.1: | Complete tasks accurately and with confidence.   |
|                 | Adapt procedures to apply them to a new context.   |
|                 | Use reedback to improve efficiency when performing calculations.   |
|                 | Clarifications:  |
|                 | Teachers who encourage students to complete tasks with mathematical fluency:   |
|                 | <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> </ul>   |
|                 | Offer multiple opportunities for students to practice efficient and generalizable methods.   |
|                 | • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.   |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.  |
|                 | Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |

| MA.K12.MTR.4.1: | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |
|-----------------|---|
|                 | Use patterns and structure to help understand and connect mathematical concepts.  |
| MA.K12.MTR.5.1: | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>  |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br>Clarifications:  |
|                 | <ul> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>  |
|                 | <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
| ELA.K12.EE.1.1: | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.<br>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly<br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide  |
|                 | referenced by the instructor.<br>6-8 Students continue with previous skills and use a style guide to create a proper citation.<br>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently.  Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                 | Make inferences to support comprehension.   |

| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.               |
|-------------------|--|
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

### VERSION DESCRIPTION

Students in this entry-level class focus on the development of musical and technical skills on a specific voice through etudes, scales, and selected music literature. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|                    |   |
| MU.912.S.3.4:      | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.<br>Develop and demonstrate proper vocal or instrumental technique.                          |
| MIL 912 S 3 5      | Clarifications  |
| 1017121313131      | e.a., posture, breathina, fingerina, embouchure, bow technique, tunina, strummina   |
|                    |   |
| LAFS.910.RST.2.4:  | context relevant to grades 9–10 texts and topics.   |
|                    | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10  |
|                    | topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.   |
|                    | a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from   |
|                    | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.  |
|                    | b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of  |
| LAFS.910.SL.1.1:   | alternate views), clear goals and deadlines, and individual roles as needed.  |
|                    | c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively  |
|                    | incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.  |
|                    | d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their  |
|                    | own views and understanding and make new connections in light of the evidence and reasoning presented.  |
|                    | Standard Relation to Course: Supporting   |
|                    | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and   |
| LAFS.910.SL.1.2:   | accuracy of each source.  |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.   |
|                    | Present information findings and supporting evidence clearly concisely and logically such that listeners can follow the line of reasoning and the   |
| LAFS.910.SL.2.4:   | organization, development, substance, and style are appropriate to purpose, audience, and task.   |
| LAFS.910.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.   |
| LAFS.910.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
|                    | Use appropriate tools strategically.  |
|                    |   |
|                    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,  |
|                    | concrete models, a ruler, a protractor, a calculator, a spreadsneet, a computer algebra system, a statistical package, or dynamic geometry software.  |
|                    | might be helpful recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze   |
| MAFS.K12.MP.5.1:   | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other  |
|                    | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying  |
|                    | assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify   |
|                    | relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use  |
|                    | technological tools to explore and deepen their understanding of concepts.  |
|                    | Standard Relation to Course: Supporting   |
|                    | Attend to precision.  |
|                    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own   |
|                    | reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about   |
| MAFS.K12.MP.6.1:   | specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,   |

|                   | express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. Standard Relation to Course: Supporting   |
|-------------------|---|
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x<br>– y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

Students in this novice-level class continue to develop musical and technical skills on a specific voice through developmentally appropriate solo literature, etudes, scales, and exercises. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills necessary to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

### **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Vocal Techniques 2 (#1303410) 2022 - And Beyond

| Name            | Description   |
|-----------------|---|
|                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:   | Clarifications:<br>e.g., listening maps, active listening, checklists   |
| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.3.1:   | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.   |
| MU.912.F.3.3:   | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.  |
| MU.912.F.3.4:   | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.   |
| MU.912.0.2.1:   | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.  |
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
| MU.912.S.3.2:   | Sight-read music accurately and expressively to show synthesis of skills. Clarifications: e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                 | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>  |
|                 | Clarifications:         Teachers who encourage students to participate actively in effortful learning both individually and with others:         • Cultivate a community of growth mindset learners.         • Foster perseverance in students by choosing tasks that are challenging.         • Develop students' ability to analyze and problem solve.         • Recognize students' effort when solving challenging problems.  |
|                 | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>   |
| MA.K12.MTR.2.1: | <ul> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul> </li> </ul> |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:   |
| MA.K12.MTR.3.1: | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>   |
|                 | Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:   |

|                 | <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>   |
|-----------------|--|
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.  |
| MA.K12.MTR.4.1: | <ul> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> </li> </ul>   |
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
| MA.K12.MTR.5.1: | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |
|                 | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task. |
|                 | <ul> <li>Strengthen students' ability to verify solutions through justifications.</li> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>   |
| MA.K12.MTR.7.1: | Clarifications:<br>Teachers who encourage students to apply mathematics to real-world contexts:<br>• Provide opportunities for students to create models, both concrete and abstract, and perform investigations.<br>• Challenge students to question the accuracy of their models and methods.<br>• Support students as they validate conclusions by comparing them to the given situation.<br>• Indicate how various concepts can be applied to other disciplines.   |
|                 | Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.   |
|                 | <ul> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> </ul>  |

|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|-------------------|--|
|                   | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                   | Make inferences to support comprehension.  |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:   | Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

### VERSION DESCRIPTION

Students in this novice-level class continue to develop musical and technical skills on a specific voice through developmentally appropriate solo literature, etudes, scales, and exercises. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills necessary to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. # Vocal Techniques 3 (#1303420) 2020 - 2022 (current)

| Name                | Description  |
|---------------------|--|
|                     | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:       | Clarifications:<br>e.g., listening maps, active listening, checklists  |
| MU.912.C.2.1:       | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:       | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:       | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |
| MU.912.F.3.3:       | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.   |
| MU.912.F.3.4:       | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.  |
| MU.912.H.1.1:       | Investigate and discuss now a culture's traditions are reflected through its music.         Clarifications:         e.g., patriotic, folk, celebration, entertainment, spiritual   |
| MU 012 U 2 1.       | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.   |
| MU.912.H.3.1:       | Clarifications:<br>e.g., acoustics, sound amplification, materials, mechanics  |
| MU.912.0.2.1:       | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
|                     | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.   |
| MU.912.O.3.1:       | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration  |
| MU.912.0.3.2:       | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
| MU.912.S.3.2:       | Sight-read music accurately and expressively to show synthesis of skills.  Clarifications: e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.<br>Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:       | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| LAFS.1112.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.   |
| LAFS.1112.SL.1.1:   | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task</li> </ul> |
|                     | Standard Relation to Course: Supporting  |
| LAFS.1112.SL.1.2:   | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.  |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.  |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.  |
| LAFS.1112.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.  |
| LAFS.1112.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.<br>Use appropriate tools strategically.   |

| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|-------------------|---|
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x<br>– y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

Students in this intermediate-level class develop their musical and technical skills further on a specific voice, and expand their technical and performance skills, enhanced by historical and cultural background knowledge of the music. Students explore more demanding solo literature, etudes, and technical exercises with increasing independence. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Vocal Techniques 3 (#1303420) 2022 - And Beyond

| Name            | Description  |
|-----------------|--|
|                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:   | Clarifications:<br>e.g., listening maps, active listening, checklists  |
| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:   | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.   |
| MU.912.F.3.3:   | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.   |
| MU.912.F.3.4:   | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.  |
| MU.912.H.1.1:   | Investigate and discuss how a culture's traditions are reflected through its music. Clarifications: e.g., patriotic, folk, celebration, entertainment, spiritual   |
| MU.912.H.3.1:   | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.   |
|                 | e.g., acoustics, sound amplification, materials, mechanics   |
| MU.912.0.2.1:   | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
|                 | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.   |
| MU.912.0.3.1:   | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration  |
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
| MU.912.S.3.2:   | Sight-read music accurately and expressively to show synthesis of skills.  Clarifications: e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                 | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                 | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>   |
| MA.K12.MTR.1.1: | Clarifications:         Teachers who encourage students to participate actively in effortful learning both individually and with others:         • Cultivate a community of growth mindset learners.         • Foster perseverance in students by choosing tasks that are challenging.         • Develop students' ability to analyze and problem solve.         • Recognize students' effort when solving challenging problems.   |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> |
|                 | Clarifications:<br>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:<br>• Help students make connections between concepts and representations.   |

|                 | <ul> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
|-----------------|--|
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>• Select efficient and appropriate methods for solving problems within the given context.<br>• Maintain flexibility and accuracy while performing procedures and mental calculations.<br>• Complete tasks accurately and with confidence.<br>• Adapt procedures to apply them to a new context.<br>• Use feedback to improve efficiency when performing calculations.<br><b>Clarifications:</b><br>Teachers who encourage students to complete tasks with mathematical fluency:<br>• Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>• Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> </li> </ul> |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts. Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.   |
| MA.K12.MTR.6.1: | <ul> <li>Assess the reasonableness of solutions.</li> <li>Mathematicians who assess the reasonableness of solutions:</li> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> </ul> </li> </ul>   |

|                   | <ul><li>Support students as they validate conclusions by comparing them to the given situation.</li><li>Indicate how various concepts can be applied to other disciplines.</li></ul>  |
|-------------------|---|
|                   | Cite evidence to explain and justify reasoning.   |
|                   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b><br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide<br>referenced by the instructor.   |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.  |
|                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

Students in this intermediate-level class develop their musical and technical skills further on a specific voice, and expand their technical and performance skills, enhanced by historical and cultural background knowledge of the music. Students explore more demanding solo literature, etudes, and technical exercises with increasing independence. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### **Course Standards**

| Name               | Description  |
|--------------------|--|
|                    | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:      | Clarifications:<br>e.g., listening maps, active listening, checklists  |
| MU.912.C.1.2:      | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent.  |
|                    | Clarifications:<br>e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title   |
| MU.912.C.2.1:      | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:      | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:      | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.   |
|                    | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training.  |
| MU.912.F.2.1:      | Clarifications:<br>e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills   |
| MU.912.F.3.1:      | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.   |
| MU.912.F.3.3:      | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.   |
| MU.912.F.3.4:      | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.<br>Investigate and discuss how a culture's traditions are reflected through its music. |
| MU.912.H.1.1:      | Clarifications:<br>e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                    | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.   |
| MU.912.H.3.1:      | Clarifications:<br>e.g., acoustics, sound amplification, materials, mechanics  |
| MU.912.0.2.1:      | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
| MU.912.0.2.2:      | Transpose melodies into different modalities through performance and composition.<br>Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied   |
|                    | meaning of the composer/performer.   |
| MU.912.O.3.1:      | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration  |
| MU.912.0.3.2:      | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                    | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
| MU.912.S.2.1:      | Clarifications:<br>e.g., memorization, sequential process  |
| MU.912.S.2.2:      | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:      | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
|                    | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:      | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:      | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                    | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:      | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| LAFS.1112.RST.2.4: | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.   |
|                    | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–<br>12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.                      |
|                    | a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from<br>texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.                            |
|                    | b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as  |

They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting  |
| ELD K12 ELL SL1. English language learners communicate for social and instructional numbers within the school sotting  | DA.912.S.2.1:       | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELEDINTZ.ELEJITT EITYIISITIAIIYuaye learners communicate for social and instructional purposes within the school Setting.  | ELD.K12.ELL.SI.1:   | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

Students in this advanced class refine their musicianship and performance skills on a specified voice. Students prepare for post-secondary and community music experiences and develop artistry independently through a variety of advanced solos, etudes, and excerpts. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### **GENERAL NOTES**

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional

purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|--|--|
| Music (Elementary and Secondary Grades K-12)       |  |

# Vocal Techniques 4 Honors (#1303430) 2022 - And Beyond

| Name            | Description  |
|-----------------|--|
|                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:   | Clarifications:  |
|                 | e.g., listening maps, active listening, checklists   |
|                 | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent.  |
| MU.912.C.1.2:   | Clarifications:  |
|                 | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:   | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.                                       |
|                 | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training.  |
| MU.912.F.2.1:   | Clarifications:  |
|                 | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills  |
| MU.912.F.3.1:   | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.   |
| MU.912.F.3.3:   | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace. |
| MU.912.F.3.4:   | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.    |
|                 | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1:   | Clarifications:  |
|                 | e.g., patriotic, folk, celebration, entertainment, spiritual   |
|                 | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.   |
| MU.912.H.3.1:   | Clarifications:  |
|                 | e.g., acoustics, sound amplification, materials, mechanics   |
| MU.912.O.2.1:   | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
| MU.912.0.2.2:   | Transpose melodies into different modalities through performance and composition.  |
|                 | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.                   |
| MU.912.O.3.1:   | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,   |
|                 | orchestration  |
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                 | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.                              |
| MU.912.S.2.1:   | Clarifications:  |
|                 | e.g., memorization, sequential process   |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.                          |
|                 | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:   | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                 | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |
|                 | Analyze the problem in a way that makes sense given the task.  |
|                 | Ask questions that will help with solving the task.  |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.  |
|                 | <ul> <li>stay engaged and maintain a positive mindset when Working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>                             |
| MA.K12.MTR.1.1: |  |

|                 | <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
|-----------------|---|
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>   |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>• Select efficient and appropriate methods for solving problems within the given context.<br>• Maintain flexibility and accuracy while performing procedures and mental calculations.<br>• Complete tasks accurately and with confidence.<br>• Adapt procedures to apply them to a new context.<br>• Use feedback to improve efficiency when performing calculations.  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>   |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>  |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> </ul>  |
|                 | <ul> <li>Connect solutions of problems to more complicated large-scale situations.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul> </li> </ul> |
| MA K12 MTD 6 1- | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context  |
|                 |   |

|                                    | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>   |
|------------------------------------|---|
| MA.K12.MTR.7.1:                    | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>  |
| ELA.K12.EE.1.1:                    | Cite evidence to explain and justify reasoning.  Clarifications:  K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.  4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  6-8 Students continue with previous skills and use a style guide to create a proper citation.  9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. |
| ELA.K12.EE.2.1:                    | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.3.1:                    | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
| ELA.K12.EE.4.1:                    | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
| ELA.K12.EE.5.1:                    | Use the accepted rules governing a specific format to create quality work.<br>Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
| ELA.K12.EE.6.1:                    | Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.S.2.1:<br>ELD.K12.ELL.SI.1: | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.<br>English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students in this advanced class refine their musicianship and performance skills on a specified voice. Students prepare for post-secondary and community music experiences and develop artistry independently through a variety of advanced solos, etudes, and excerpts. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

| MU.912.C.2.1.      | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:      | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:      | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.   |
| MU.912.F.3.2:      | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.H.1.5:      | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.4:      | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
| MU.912.0.3.2:      | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                    | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:      | Clarifications:  |
|                    | e.g., texture, mode, form, tempo, voicing  |
| MU 012 6 2 2.      | Transfer supressive elements and performance techniques from one piece of music to enother   |
| MU.912.5.2.2:      | Fransfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:      | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and  |
|                    | kinestnetic energy.  |
|                    | Signt-read music accurately and expressively to snow synthesis of skills.  |
| MU.912.S.3.2:      | Clarifications:  |
|                    | e.g., musical elements, expressive qualities, performance technique  |
|                    | Develop and demonstrate proper vocal or instrumental technique.  |
| MIL 912 S 3 5      | Clarifications   |
| 10.712.3.3.3.      | e a posture breathing fingering embouchure bow technique tuning strumming  |
|                    |  |
| LAFS.910.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical<br>context relevant to grades 9–10 texts and topics.   |
|                    | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10   |
|                    | topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.  |
|                    | a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from  |
|                    | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.   |
|                    | b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of   |
| LAES 010 SL 1 1.   | alternate views), clear goals and deadlines, and individual roles as needed.   |
| LAI 3.910.3L.1.1.  | c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively   |
|                    | incorporate others into the discussion: and clarify, verify, or challenge ideas and conclusions.   |
|                    | d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, gualify or justify their   |
|                    | own views and understanding and make new connections in light of the evidence and reasoning presented  |
|                    | own views and and istanting and make new connections in right of the evidence and reasoning presented.   |
|                    | Standard Relation to Course: Supporting  |
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.   |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted  |
|                    | evidence.  |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the  |
|                    | Adapt speech to a variable of contaute and tasks, demonstrating command of formal English when indicated as appropriate to   |
| LAFS.910.3L.2.0:   | Adapt speech to a variety of contexts and tasks, demonstrating command of formal english when indicated of appropriate.  |
| LAFS.910.WHS1.2.4: | Produce clear and concrent writing in which the development, organization, and style are appropriate to task, purpose, and audience.   |
| LAFS.910.WHS1.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.  |
|                    | Use appropriate tools strategically.   |
|                    |  |
|                    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,   |
|                    | Concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry sortware.   |
|                    | might be beinful recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze  |
| MAFS.K12.MP.5.1:   | araphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other   |
|                    | graphs of intertoins and solutions generated using a graphing education. Into acteur possible control by strategically using education and other and the solution and other and the solution and other acteurs and the solution acteurs and the soluti |
|                    | assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify  |
|                    | relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use   |
|                    | technological tools to explore and deepen their understanding of concepts.   |
|                    | Standard Relation to Course: Supporting  |
|                    | Attend to precision.   |
|                    |  |

| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. <b>Standard Relation to Course: Supporting</b>   |
|-------------------|--|
|                   | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in   |
|                   | the work environment.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

### VERSION DESCRIPTION

Students with little or no experience in a vocal ensemble develop basic musicianship and ensemble performance skills through the study of basic, high-quality music in diverse styles. Student musicians focus on building foundational music techniques, music literacy, listening skills, and aesthetic awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Vocal Ensemble 1 (#1303440) 2022 - And Beyond

| Name            | Description   |
|-----------------|---|
|                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:   | Clarifications:   |
|                 | e.g., listening maps, active listening, checklists  |
| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.3.1:   | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.                                     |
| MU.912.F.3.2:   | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.   |
| MU.912.H.1.5:   | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.4:   | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                 | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:   | Clarifications:<br>e.g., texture, mode, form, tempo, voicing  |
| MIL 912 S 2 2·  | Transfer expressive elements and performance techniques from one piece of music to another  |
| 10.712.3.2.2.   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and   |
| MU.912.S.3.1:   | kinesthetic energy.   |
|                 | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:   | Clarifications:   |
|                 | e.g., musical elements, expressive qualities, performance technique   |
|                 | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:   | Clarifications:   |
|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                 | Mathematicians who participate in effortful learning both individually and with others:   |
|                 | Analyze the problem in a way that makes sense given the task.   |
|                 | Ask questions that will help with solving the task.   |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.   |
|                 | Stay engaged and maintain a positive mindset when working to solve tasks.   |
| MA.K12.MTR.1.1: | Help and support each other when attempting a new method or approach.   |
|                 | Clarifications:   |
|                 | l eachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                 | Cultivate a community of growth minuset realities.     Easter perseverance in students by choosing tasks that are challenging   |
|                 | <ul> <li>Poster perseverance in students by choosing tasks that are chailenging.</li> <li>Develop students' ability to analyze and problem solve</li> </ul>   |
|                 | Recognize students' effort when solving challenging problems.   |
|                 | Demonstrate understanding by representing problems in multiple ways   |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
|                 | Duild understanding through modeling and using manipulatives  |
|                 | <ul> <li>During understanding through modeling and using manipulatives.</li> <li>Penresent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> </ul> |
|                 | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>  |
|                 | Express connections between concepts and representations.   |
| MA.K12.MTR.2.1: | Choose a representation based on the given context or purpose.  |
|                 | Clarifications:   |
|                 | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                 | Help students make connections between concepts and representations.  |
|                 | Provide opportunities for students to use manipulatives when investigating concepts.  |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.  |
|                 | Show students that various representations can have different purposes and can be useful in different situations.   |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:   |
|                 | <ul> <li>Select efficient and appropriate methods for solving problems within the given context</li> </ul>  |
|                 | Maintain flexibility and accuracy while performing procedures and mental calculations.  |
|                 | Complete tasks accurately and with confidence.  |
|                 | Adapt procedures to apply them to a new context.  |
| MA.K12.MTR.3.1: | Use feedback to improve efficiency when performing calculations.  |
|                 | Clarifications:   |
|                 |   |

|                 | <ul> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>   |
|-----------------|--|
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>Focus on relevant details within a problem.<br>Create plans and procedures to logically order events, steps or ideas to solve problems.<br>Decompose a complex problem into manageable parts.<br>Relate previously learned concepts to new concepts.<br>Look for similarities among problems.<br>Connect solutions of problems to more complicated large-scale situations.<br>Clarifications:<br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>Support students to develop generalizations based on the similarities found among problems.<br>Provide opportunities for students to create plans and procedures to solve problems.<br>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>  |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.<br>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly<br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide<br>referenced by the instructor.   |

|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|-------------------|--|
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                   | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                   | Make inferences to support comprehension.  |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.               |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.   |
|                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

### VERSION DESCRIPTION

Students with little or no experience in a vocal ensemble develop basic musicianship and ensemble performance skills through the study of basic, high-quality music in diverse styles. Student musicians focus on building foundational music techniques, music literacy, listening skills, and aesthetic awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

### GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|                    | e.g., listening maps, active listening, checklists   |
| MU.912.C.2.1:      | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:      | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:      | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |
| MU.912.F.3.2:      | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.H.1.5:      | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.4:      | Examine the effects of developing technology on composition, performance, and acquisition of music.<br>Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.O.1.1:      | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
|                    | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.   |
| MU.912.0.3.1:      | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration  |
| MU.912.0.3.2:      | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                    | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:      | Clarifications:<br>e.g., texture, mode, form, tempo, voicing   |
|                    | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
| MU.912.S.2.1:      | Clarifications:<br>e.g., memorization, sequential process  |
| MU.912.S.2.2:      | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:      | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
|                    | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:      | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
|                    | Develop and demonstrate proper vocal or instrumental technique.  |
| MU 012 S 2 5       |  |
| 1010.912.3.3.3.    | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| LAFS.910.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical<br>context relevant to grades 9–10 texts and topics.   |
| LAFS.910.SL.1.1:   | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> </ul>   |
|                    | <ul> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> <li>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their</li> </ul> |
|                    | own views and understanding and make new connections in light of the evidence and reasoning presented.   |
|                    | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and  |
| LAFS.910.SL.1.2:   | accuracy of each source.   |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.  |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.  |
| LAFS.910.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.  |
| LAFS.910.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.   |
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.  |

|                   | Use appropriate tools strategically.  |
|-------------------|---|
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
|                   | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                   | Standard Relation to Course: Supporting   |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students with previous vocal ensemble experience continue building musicianship and performance skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant musical styles and time periods. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

Course Number: 1303450

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Choral Music > Abbreviated Title: VOCAL ENS 2 Course Length: Year (Y) Course Level: 2

#### **Educator Certifications**
| Name                   | Description   |
|------------------------|---|
|                        | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:          | Clarifications:   |
|                        | e.g., listening maps, active listening, checklists  |
| MU.912.C.2.1:          | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:          | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.3.1:          | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.   |
| MU.912.F.3.2:          | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.   |
| MU.912.H.1.5:          | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.4:          | Examine the effects of developing technology on composition, performance, and acquisition of music.<br>Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. |
| MU.912.0.1.1:          | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
|                        | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.                                |
| MU.912.O.3.1:          | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration   |
| MU.912.0.3.2:          | Interpret and perform expressive elements indicated by the musical score and/or conductor.<br>Arrange a musical work by manipulating two or more aspects of the composition.  |
| MIL 012 S 1 2.         |   |
| 1010.712.3.1.3.        | e.g., texture, mode, form, tempo, voicing   |
|                        | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of   |
| MU.912.S.2.1:          | music literature.   |
|                        | Clarifications:<br>e.g., memorization, sequential process   |
| MU.912.S.2.2:          | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:          | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.                                       |
|                        | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:          | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
|                        | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:          | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                        | Mathematicians who participate in effortful learning both individually and with others:   |
|                        | Analyze the problem in a way that makes sense given the task.   |
|                        | Ask questions that will help with solving the task.   |
|                        | Build perseverance by modifying methods as needed while solving a challenging task.   |
|                        | Stay engaged and maintain a positive mindset when working to solve tasks.   |
| MA K12 MTR 1 1         | <ul> <li>Help and support each other when attempting a new method or approach.</li> </ul>   |
| WD (.1(12.1011(.1.1.1. | Clarifications:   |
|                        | Teachers who encourage students to participate actively in effortful learning both individually and with others:  |
|                        | Cultivate a community of growth mindset rearners.     Factor persoverance in students by choosing tasks that are shallenging  |
|                        | <ul> <li>Poster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve</li> </ul>   |
|                        | Recognize students' effort when solving challenging problems.   |
|                        |   |
|                        | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
|                        | Build understanding through modeling and using manipulatives.   |
|                        | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.   |
|                        | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>  |
|                        | Express connections between concepts and representations.   |
| MA.K12.MTR.2.1:        | <ul> <li>Unoose a representation based on the given context or purpose.</li> </ul>  |
|                        | Clarifications:<br>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:  |

|                 | <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> </ul>   |  |  |
|-----------------|--|--|--|
|                 | Show students that various representations can have different purposes and can be useful in different situations.  Complete tasks with mathematical fluency.  Mathematicians who complete tasks with mathematical fluency:   |  |  |
| MA.K12.MTR.3.1: | <ul> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |  |  |
|                 | Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:<br>• Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>• Offer multiple opportunities for students to practice efficient and generalizable methods.<br>• Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |  |  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |  |  |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>Focus on relevant details within a problem.<br>Create plans and procedures to logically order events, steps or ideas to solve problems.<br>Decompose a complex problem into manageable parts.<br>Relate previously learned concepts to new concepts.<br>Look for similarities among problems.<br>Connect solutions of problems to more complicated large-scale situations.<br>Clarifications:<br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>Support students to develop generalizations based on the similarities found among problems.<br>Provide opportunities for students to create plans and procedures to solve problems.   |  |  |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.   |  |  |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>• Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> </ul>   |  |  |

|                   | <ul><li>Challenge students to question the accuracy of their models and methods.</li><li>Support students as they validate conclusions by comparing them to the given situation.</li><li>Indicate how various concepts can be applied to other disciplines.</li></ul>   |
|-------------------|---|
|                   | Cite evidence to explain and justify reasoning.   |
| ELA.K12.EE.1.1:   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
|                   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.  |
|                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students with previous vocal ensemble experience continue building musicianship and performance skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant musical styles and time periods. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area

concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Vocal Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

# Vocal Ensemble 3 (#1303460) 2020 - 2022 (current)

| Name            | Description   |
|-----------------|---|
|                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:   | Clarifications:   |
|                 | e.g., listening maps, active listening, checklists  |
|                 | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                                  |
|                 | composer's intent.  |
| MU.912.C.1.2:   | Clarifications:   |
|                 | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title   |
| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.3.1:   | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development                       |
|                 | in music.   |
|                 | Design or refine a resume for application to higher education or the workforce that highlights marketable skills and knowledge gained through music                         |
| MU.912.F.2.1:   |   |
|                 | Clarifications:   |
|                 |   |
|                 |   |
| MU.912.F.2.3:   | Clarifications:   |
|                 | e.g., leadership, mancial needs and structure, marketing, personner matters, manager, traver  |
| MU.912.F.3.1:   | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of                       |
|                 | Summarize convright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and                                 |
| MU.912.F.3.2:   | technology.   |
|                 | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,                   |
| MU.912.F.3.3:   | demonstrating skills for use in the workplace.  |
|                 | Compare two or more works of a composer across performance media.   |
| MU.912.H.1.3:   | Clarifications:   |
|                 | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.5:   | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.4:   | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                 | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.O.1.1:   | Clarifications:   |
|                 | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1:   | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.  |
|                 | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied                         |
|                 | meaning of the composer/performer.  |
| MU.912.0.3.1:   | Clarifications:   |
|                 | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, narmonic structure, timbre choice, rhythm,                                       |
|                 |   |
| MU.912.0.3.2:   | Arrange a musical work by manipulating two or more aspects of the composition   |
| MU 010 C 1 0    |   |
| MU.912.5.1.3:   | Clarifications:   |
|                 |   |
|                 | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S.1.4:   | Clarifications:   |
|                 | e.g., singing, praying, writing   |
|                 | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. |
| MU.912.S.2.1:   |   |
|                 | clarifications:   |
| MU 010 C 0 0    |   |
| IVIU.912.5.2.2: | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:   | kinesthetic energy.   |
|                 | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:   | Clarifications:   |
|                 | e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |

| Develop and demonstrate proper vocal or instrumental technique.  |   |  |
|--|---|--|
| MU.912.S.3.5:  | Clarifications:   |  |
|  | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |  |
| LAFS.1112.RST.2.4: Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or te context relevant to grades 11–12 texts and topics. |   |  |
| LAFS.1112.SL.1.1:  | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11– 12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li> </ul>                            |  |
|  | Standard Relation to Course: Supporting   |  |
| LAFS.1112.SL.1.2:  | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |  |
| LAFS.1112.SL.1.3:  | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.   |  |
| LAFS.1112.SL.2.4:  | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.   |  |
| LAFS.1112.SL.2.6:  | Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.   |  |
| LAFS.1112.WHST.2.4:  | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |  |
| AFS.1112.WHST.3.9: Draw evidence from informational texts to support analysis, reflection, and research.   |   |  |
| MAFS.K12.MP.5.1:   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |  |
|  | Attend to precision.  |  |
| MAFS.K12.MP.6.1:   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |  |
|  | Standard Relation to Course: Supporting<br>Look for and make use of structure.  |  |
| MAFS.K12.MP.7.1:   | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |  |
|  | Standard Relation to Course: Supporting   |  |
| DA.912.F.3.8:  | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.  |  |
| DA.912.S.2.1:  | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |  |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.  |  |

#### VERSION DESCRIPTION

Students strengthen vocal ensemble performance skills, music literacy, and analytical skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant history and cultures. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### **Educator Certifications**

Vocal Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

# Vocal Ensemble 3 (#1303460) 2022 - And Beyond

| Name            | Description   |
|-----------------|---|
|                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:   | Clarifications:   |
|                 | e.g., listening maps, active listening, checklists  |
|                 | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                                    |
|                 | composer's intent.  |
| MU.912.C.1.2:   | Clarifications:   |
|                 | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title   |
| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.3.1:   | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development                         |
|                 | in music.   |
|                 | Design or refine a resume for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training                  |
| MU.912.F.2.1:   |   |
|                 | CIARTITICATIONS:  |
|                 |   |
|                 | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.   |
| MU.912.F.2.3:   | Clarifications:   |
|                 | e.g., leadership, maintai needs and structure, marketing, personner matters, manager, traver  |
| MU.912.F.3.1:   | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of                         |
|                 | Summarize convright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and                                   |
| MU.912.F.3.2:   | technology.   |
|                 | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,                     |
| MU.912.F.3.3:   | demonstrating skills for use in the workplace.  |
|                 | Compare two or more works of a composer across performance media.   |
| MU.912.H.1.3:   | Clarifications:   |
|                 | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.5:   | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.4:   | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                 | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.0.1.1:   | Clarifications:   |
|                 | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1:   | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.  |
|                 | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied                           |
|                 | meaning of the composer/performer.  |
| MU.912.0.3.1:   | Clarifications:   |
|                 | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, narmonic structure, timbre choice, rhythm,<br>orchestration                        |
|                 |   |
| MU.912.0.3.2:   | Arrange a musical work by manipulating two or more aspects of the composition   |
| MU 010 C 1 0    |   |
| MU.912.5.1.3:   | Clarifications:   |
|                 |   |
|                 | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S.1.4:   | Clarifications:   |
|                 |   |
|                 | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of musical literature. |
| MU.912.S.2.1:   |   |
|                 | clarifications:   |
| MU 012 C 2 2    | Transfer supressive elements and performance techniques from one piece of music to another  |
| IVIU.912.5.2.2: | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:   | kinesthetic energy.   |
|                 | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:   | Clarifications:   |
|                 | e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |

|  | Develop and demonstrate proper vocal or instrumental technique.  |
|--|--|
| //U.912.S.3.5:       Clarifications:         e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming |  |
| MA.K12.MTR.1.1:  | <ul> <li>Mathematicians who participate in effortful learning both individually and with others: <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> </li> <li>Clarifications: <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems</li> </ul> </li> </ul>   |
| MA.K12.MTR.2.1:  | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:<br>• Build understanding through modeling and using manipulatives.<br>• Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.<br>• Progress from modeling problems with objects and drawings to using algorithms and equations.<br>• Express connections between concepts and representations.<br>• Choose a representation based on the given context or purpose.   |
|  | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
| MA.K12.MTR.3.1:  | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul> Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li></ul>   |
| MA.K12.MTR.4.1:  | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |
| MA.K12.MTR.5.1:  | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts. <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li></ul>   |

|                 | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>   |
|-----------------|---|
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:   |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>  |
|                 | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.         • Prompt students to continually ask, "Does this solution make sense? How do you know?"         • Reinforce that students check their work as they progress within and after a task.         • Strengthen students' ability to verify solutions through justifications.  |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
| MA.K12.MTR.7.1: | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.   <ul> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul> |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.  |
|                 | <ul> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> </ul>   |
|                 | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently.  Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
| ELA.K12.EE.3.1: | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
|                 | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1: | In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.   |
|                 | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
| ELA.K12.EE.5.1: | Use the accepted rules governing a specific format to create quality work.<br>Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                 | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1: | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.F.3.8:   | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.  |
| DA.912.S.2.1:   | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |

#### VERSION DESCRIPTION

Students strengthen vocal ensemble performance skills, music literacy, and analytical skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant history and cultures. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. #### GENERAL INFORMATION

Course Number: 1303460 Educatio SubSub Abbrevi Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Choral Music > Abbreviated Title: VOCAL ENS 3 Course Length: Year (Y) Course Level: 2

#### **Educator Certifications**

Vocal Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

Graduation Requirement: Performing/Fine Arts

# Vocal Ensemble 4 Honors (#1303470) 2020 - 2022 (current)

| Name          | Description  |
|---------------|--|
|               | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1: | Clarifications:<br>e.g., listening maps, active listening, checklists  |
|               | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent.  |
| MU.912.C.1.2: | Clarifications:<br>e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title   |
| MU.912.C.2.1: | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2: | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1: | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.                                       |
| MU.912.F.1.1: | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.  |
|               | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training.  |
| MU.912.F.2.1: | Clarifications:  |
|               | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills  |
|               | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.  |
| MU.912.F.2.2: | Clarifications:<br>e.g., community revitalization, industry choosing new locations, cultural and social enrichment   |
|               | Compare the organizational structure of a professional orchestra, chorus, guintet, or other ensemble to that of a business.  |
| MU.912.F.2.3: | Clarifications:  |
|               | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel   |
| MU.912.F.3.1: | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.   |
| MU.912.F.3.2: | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.3: | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace. |
| MU.912.F.3.4: | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.    |
|               | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU.912.H.1.2: | Clarifications:<br>e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|               | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3: | Clarifications:<br>e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.5: | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.1: | Evaluate the social impact of music on specific historical periods.  |
| MU.912.H.2.2: | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.  |
| MU.912.H.2.4: | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|               | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.O.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1: | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
|               | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.                   |
| MU.912.O.3.1: | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration                                |
| MU.912.0.3.2: | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|               | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3: | Clarifications:<br>e.g., texture, mode, form, tempo, voicing   |
|               | Perform and notate, independently and accurately, melodies by ear.   |
| MU.912.S.1.4: | Clarifications:<br>e.g., singing, playing, writing   |

|                      | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   |
|----------------------|---|
| MU.912.S.2.1:        | Clarifications:<br>e.g., memorization, sequential process   |
| MU.912.S.2.2:        | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:        | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
|                      | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:        | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.4:        | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
| MU.912.S.3.5:        | Develop and demonstrate proper vocal or instrumental technique.  Clarifications: e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| LAFS.1112.RST.2.4:   | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and tonics   |
| LAFS.1112.SL.1.1:    | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li> </ul>                   |
|                      | Standard Relation to Course: Supporting   |
| LAFS.1112.SL.1.2:    | decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |
| LAFS.1112.SL.1.3:    | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.   |
| LAFS.1112.SL.2.4:    | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.   |
| LAFS.1112.SL.2.6:    | Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.   |
| LAFS.1112.WHST.2.4:  | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.<br>Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or  |
| I AES 1112 W/HST 2 0 | broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.   |
| MAFS.K12.MP.5.1:     | Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. |
| MAFS.K12.MP.6.1:     | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. <b>Standard Relation to Course: Supporting</b>  |
|                      | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:     | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
| DA.912.F.3.8:        | Standard Relation to Course: Supporting Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment   |
|                      |   |

#### VERSION DESCRIPTION

Students with extensive vocal ensemble experience refine their critical listening, music literacy, and ensemble skills through the study, rehearsal, and performance of highquality, advanced literature. Students use reflection and problem-solving skills with increasing independence to improve their performance and musical expressivity. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Vocal Ensemble 4 Honors (#1303470) 2022 - And Beyond

| Name           | Description   |
|----------------|---|
|                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:  | Clarifications:   |
|                | e.g., listening maps, active listening, checklists  |
|                | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the            |
|                | composer's intent.  |
| MU.912.C.1.2:  | Clarifications:   |
|                | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                         |
| MU.912.C.2.1:  | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:  | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.3.1:  | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development |
| MIL 012 E 1 1. | In music.   |
| 110.712.1.1.1. | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music   |
|                | training.   |
| MU.912.F.2.1:  | Clarifications:   |
|                | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills                   |
|                | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.                               |
| MU.912.F.2.2:  | Clarifications:   |
|                | e.g., community revitalization, industry choosing new locations, cultural and social enrichment   |
|                | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.                           |
| MU.912.F.2.3:  | Clarifications:   |
|                | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel  |
|                | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of |
| MU.912.F.3.1:  | leadership in school and/or non-school settings.  |
| MU.912.F.3.2:  | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and           |
|                | technology.   |
| MU.912.F.3.3:  | demonstrating skills for use in the workplace   |
|                | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,    |
| MU.912.F.3.4:  | and initiative to advance skills and/or knowledge.  |
|                | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.                                   |
| MU.912.H.1.2:  | Clarifications:   |
|                | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|                | Compare two or more works of a composer across performance media.   |
| MU.912.H.1.3:  | Clarifications:   |
|                | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.5:  | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.1:  | Evaluate the social impact of music on specific historical periods.   |
| MU.912.H.2.2:  | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.                       |
| MU.912.H.2.4:  | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
| MU 012 O 1 1.  |   |
| MU.912.0.1.1:  | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU 012 O 2 1·  | Transfer accented composition conventions and performance practices of a specific style to a contracting style of music                               |
| 10.712.0.2.1.  | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support for the listener, the implied    |
|                | meaning of the composer/performer.  |
| MU.912.0.3.1:  | Clarifications:   |
|                | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,                 |
|                | orchestration   |
| MU.912.0.3.2:  | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:  | Clarifications:   |
|                | e.g., texture, mode, form, tempo, voicing   |
|                | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S.1.4:  | Clarifications:   |
|                | e.g., singing, playing, writing   |

|                 | music literature.   |
|-----------------|---|
| MU.912.S.2.1:   | Clarifications:   |
|                 | e.g., memorization, sequential process  |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic experts.  |
|                 | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:   | Clarifications:   |
|                 | e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                 | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:   | Clarifications:   |
|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                 | Mathematicians who participate in effortful learning both individually and with others: <ul> <li>Analyze the problem in a way that makes sense given the task</li> </ul>  |
|                 | <ul> <li>Ask questions that will help with solving the task.</li> </ul>   |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.   |
|                 | Stay engaged and maintain a positive mindset when working to solve tasks.   |
| MA.K12.MTR.1.1: | Help and support each other when attempting a new method or approach.   |
|                 | Clarifications:   |
|                 | <ul> <li>Cultivate a community of growth mindset learners.</li> </ul>   |
|                 | Foster perseverance in students by choosing tasks that are challenging.   |
|                 | Develop students' ability to analyze and problem solve.   |
|                 | Recognize students' effort when solving challenging problems.   |
|                 | Demonstrate understanding by representing problems in multiple ways.  |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways.   |
|                 | <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Depresent solutions to problems in multiple using objects deputings, tables, graphs and equations.</li> </ul>                                     |
|                 | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul> |
|                 | <ul> <li>Express connections between concepts and representations.</li> </ul>   |
| MA.K12.MTR.2.1: | Choose a representation based on the given context or purpose.  |
|                 | Clarifications:   |
|                 | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                 | <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> </ul>  |
|                 | <ul> <li>Guide students for concrete to pictorial to abstract representations as understanding progresses.</li> </ul>   |
|                 | Show students that various representations can have different purposes and can be useful in different situations.   |
|                 | Complete tasks with mathematical fluency.   |
|                 | Mathematicians who complete tasks with mathematical fluency:  |
|                 | Select efficient and appropriate methods for solving problems within the given context.   |
|                 | Maintain flexibility and accuracy while performing procedures and mental calculations.  |
|                 | Complete tasks accurately and with confidence.  |
| MA.K12.MTR.3.1: | <ul> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
|                 | Clarifications:   |
|                 | Teachers who encourage students to complete tasks with mathematical fluency:  |
|                 | • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.  |
|                 | Offer multiple opportunities for students to practice efficient and generalizable methods.  |
|                 | <ul> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>  |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:                                     |
|                 |   |
|                 | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> </ul>   |
|                 | <ul> <li>Compare the efficiency of a method to those expressed by others.</li> </ul>  |
| MA.K12.MTR.4.1: | Recognize errors and suggest how to correctly solve the task.   |
|                 | Justify results by explaining methods and processes.  |
|                 | Construct possible arguments based on evidence.   |
|                 | Clarifications:   |
|                 | <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an expertunity for learning.</li> </ul>   |
|                 | <ul> <li>Create opportunities for students to discuss their thinking with peers.</li> </ul>   |
|                 | <ul> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> </ul>  |
|                 | Develop students' ability to justify methods and compare their responses to the responses of their peers.   |
|                 |   |

|                 | Mathematicians who use patterns and structure to help understand and connect mathematical concepts:   |
|-----------------|---|
|                 | Focus on relevant details within a problem.   |
|                 | Create plans and procedures to logically order events, steps or ideas to solve problems.  |
|                 | Decompose a complex problem into manageable parts.  |
|                 | Relate previously learned concepts to new concepts.   |
|                 | Look for similarities among problems.   |
| MA.K12.MTR.5.1: | Connect solutions of problems to more complicated large-scale situations.   |
|                 | Clarifications:   |
|                 | Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:   |
|                 | Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.  |
|                 | Support students to develop generalizations based on the similarities found among problems.   |
|                 | Provide opportunities for students to create plans and procedures to solve problems.  |
|                 | • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.                                       |
|                 | Assess the reasonableness of solutions.   |
|                 | Mathematicians who assess the reasonableness of solutions:  |
|                 | Estimate to discover possible solutions   |
|                 | <ul> <li>Use benchmark quantities to determine if a solution makes sense.</li> </ul>  |
|                 | Check calculations when solving problems.   |
|                 | <ul> <li>Verify possible solutions by explaining the methods used.</li> </ul>   |
| MA.K12.MTR.6.1: | Evaluate results based on the given context.  |
|                 | Clarifications:   |
|                 | Teachers who encourage students to assess the reasonableness of solutions:  |
|                 | Have students estimate or predict solutions prior to solving.   |
|                 | <ul> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> </ul>   |
|                 | Reinforce that students check their work as they progress within and after a task.  |
|                 | Strengthen students' ability to verify solutions through justifications.  |
|                 | Apply mathematics to real-world contexts.   |
|                 | Mathematicians who apply mathematics to real-world contexts:  |
|                 | Connect mathematical concepts to everyday experiences.  |
|                 | <ul> <li>Use models and methods to understand, represent and solve problems.</li> </ul>   |
|                 | <ul> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficience</li> </ul> |
| MA.K12.MTR.7.1: | Clarifications:   |
|                 | Teachers who encourage students to apply mathematics to real-world contexts:  |
|                 | <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> </ul>  |
|                 | Challenge students to question the accuracy of their models and methods.  |
|                 | Support students as they validate conclusions by comparing them to the given situation.   |
|                 | Indicate how various concepts can be applied to other disciplines.  |
|                 | Cite evidence to explain and justify reasoning.   |
|                 | Clarifications:   |
|                 | K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details                              |
|                 | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.   |
|                 | 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.                              |
|                 | In 3rd grade, students should use a combination of direct and indirect citations.   |
| ELA.K12.EE.1.1: | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly                                   |
|                 | quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide                          |
|                 | referenced by the instructor.   |
|                 | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                 |   |
|                 | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                 | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1: | Clarifications:   |
|                 | See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                 | Make inferences to support comprehension  |
|                 | Marke interences to support comprehension.  |
| FLA K12 FF 2 1. | Utartitications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the sid    |
| ELA.KIZ.EE.3.I: | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and                                 |
|                 | beyond.   |
| ELA.K12.EE.4.1: | L<br>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations   |
|                 | Clarifications:   |
|                 | Clarifications:   |
|                 | In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The  |
|                 | collaborative conversations are becoming academic conversations.  |
|                 | In grades 3-12 students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students                         |
|                 | build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                 |   |
|                 | Use the accepted rules governing a specific format to create guality work.  |

| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |
|-------------------|--|
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students with extensive vocal ensemble experience refine their critical listening, music literacy, and ensemble skills through the study, rehearsal, and performance of highquality, advanced literature. Students use reflection and problem-solving skills with increasing independence to improve their performance and musical expressivity. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

| Vocal Music (Elementary and Secondary Grades K-12) |
|--|
| Music (Elementary and Secondary Grades K-12)       |

# Music Technology and Sound Engineering 1 (#1304300) 2020 - 2022 (current)

| Name                | Description   |
|---------------------|---|
|                     | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:       | Clarifications:   |
|                     | e.g., listening maps, active listening, checklists  |
| MU.912.C.2.2:       | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.2.3:       | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.  |
| MU.912.C.3.1:       | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.  |
| MU.912.F.1.2:       | Incorporate or adapt new, emerging, or previously unfamiliar technology to create an innovative composition, music project, or related product.   |
| MU.912.F.3.2:       | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.   |
| MU.912.H.2.4:       | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                     | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.  |
| MU.912.H.3.1:       | Clarifications:   |
|                     | e.g., acoustics, sound amplification, materials, mechanics  |
|                     | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:       | Clarifications:<br>e.g., texture, mode, form, tempo, voicing  |
| MU.912.S.1.5:       | Research and report on the impact of MIDI as an industry-standard protocol.   |
| MU.912.S.1.7:       | Combine and/or create virtual and audio instruments.  |
| MU.912.S.1.8:       | Record, mix, and edit a recorded performance.   |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                     | Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.  |
| LAES 010 L 1 1.     | a. Use parallel structure.  |
| LAF3.910.L.1.1.     | <ul> <li>b. Use various types of phrases (noun, verb, adjectival, adverbial, participial, prepositional, absolute) and clauses (independent, dependent; noun,<br/>relative, adverbial) to convey specific meanings and add variety and interest to writing or presentations.</li> </ul>   |
| LAFS.910.RST.2.4:   | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9-10 texts and topics  |
| LAFS.910.RST.3.7:   | Translate quantitative or technical information expressed in words in a text into visual form (e.g., a table or chart) and translate information expressed visually or mathematically (e.g., in an equation) into words.  |
|                     | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.<br>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from |
|                     | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.  |
|                     | b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of<br>alternate views), clear goals and deadlines, and individual roles as peeded.  |
| LAFS.910.SL.1.1:    | c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas: actively  |
|                     | incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.  |
|                     | d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their  |
|                     | own views and understanding and make new connections in light of the evidence and reasoning presented.  |
|                     | Standard Relation to Course: Supporting   |
| LAFS.910.SL.1.2:    | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.  |
| LAFS.910.SL.1.3:    | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence  |
| LAFS.910.SL.2.4:    | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the   |
|                     | organization, development, substance, and style are appropriate to purpose, audience, and task.   |
| LAF3.910.WH31.3.9.  | Create equations and inequalities in one variable and use them to solve problems. Include equations arising from linear and quadratic functions, and  |
| MAFS.912.A-CED.1.1: | simple rational, absolute, and exponential functions. ★<br>Standard Relation to Course: Supporting  |
| MAFS.912.A-CED.1.2: | Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.<br><b>Standard Relation to Course: Supporting</b>   |
| MAFS.912.A-CED.1.3: | Represent constraints by equations or inequalities, and by systems of equations and/or inequalities, and interpret solutions as viable or non-viable options in a modeling context. For example, represent inequalities describing nutritional and cost constraints on combinations of different foods. <b>★</b> Standard Relation to Course: Supporting  |
| 1                   |   |

| MAFS.912.A-CED.1.4: | Rearrange formulas to highlight a quantity of interest, using the same reasoning as in solving equations. For example, rearrange Ohm's law V = IR to highlight resistance R. ★<br>Standard Relation to Course: Supporting  |
|---------------------|--|
| MAFS.K12.MP.5.1:    | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. Standard Relation to Course: Supporting |
| MAFS.K12.MP.6.1:    | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:    | <ul> <li>Look for and make use of structure.</li> <li>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression x<sup>2</sup> + 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y)<sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.</li> <li>Standard Relation to Course: Supporting</li> </ul>   |
| DA.912.S.2.1:       | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1:   | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students explore the fundamental applications and tools of music technology and sound engineering. As they create and learn its terminology, students also learn the history and aesthetic development of technology used to capture, create, and distribute music. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

#### GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1304300

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Music Technology > Abbreviated Title: MUS TECH & SO ENG 1 Course Length: Year (Y) Course Level: 2

#### **Educator Certifications**

Instrumental Music (Secondary Grades 7-12)

Instrumental Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12)

Music (Elementary and Secondary Grades K-12)

# Music Technology and Sound Engineering 1 (#1304300) 2022 - And Beyond

| Name            | Description  |
|-----------------|--|
|                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:   | Clarifications:  |
|                 | e.g., listening maps, active listening, checklists   |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.2.3:   | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.                                       |
| MU.912.C.3.1:   | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |
| MU.912.F.1.2:   | Incorporate or adapt new, emerging, or previously unfamiliar technology to create an innovative composition, music project, or related product.                  |
| MU.912.F.3.2:   | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.          |
| MU.912.H.2.4:   | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
| MU 012 U 2 1.   | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance. |
| MU.912.H.3.1:   | Clarifications:<br>e.g., acoustics, sound amplification, materials, mechanics  |
|                 | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:   | Clarifications:  |
|                 | e.g., texture, mode, form, tempo, voicing  |
| MU 912 S 1 5    | Research and report on the impact of MIDL as an industry-standard protocol   |
| MU.912.S.1.7:   | Combine and/or create virtual and audio instruments.   |
| MU.912.S.1.8:   | Record, mix, and edit a recorded performance.  |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |
|                 | Analyze the problem in a way that makes sense given the task.  |
|                 | Ask questions that will help with solving the task.  |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.  |
|                 | Stay engaged and maintain a positive mindset when working to solve tasks.  |
|                 | Help and support each other when attempting a new method or approach.  |
| MA.K12.MTR.1.1: | Clarifications   |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                 | Cultivate a community of growth mindset learners.  |
|                 | <ul> <li>Foster perseverance in students by choosing tasks that are challenging.</li> </ul>  |
|                 | Develop students' ability to analyze and problem solve.  |
|                 | Recognize students' effort when solving challenging problems.  |
|                 |  |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                 | Build understanding through modeling and using manipulatives.  |
|                 | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> </ul>                                      |
|                 | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>   |
|                 | <ul> <li>Express connections between concepts and representations.</li> </ul>  |
| MA.K12.MTR.2.1: | Choose a representation based on the given context or purpose.   |
|                 | Clarifications:  |
|                 | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:  |
|                 | Help students make connections between concepts and representations.   |
|                 | <ul> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> </ul>   |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.   |
|                 | Show students that various representations can have different purposes and can be useful in different situations.  |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:  |
|                 | Select efficient and appropriate methods for solving problems within the given context   |
|                 | Maintain flexibility and accuracy while performing procedures and montal calculations  |
|                 | Mannann nextbility and accuracy while performing procedures and mental calculations.   |
|                 | Complete tasks accurately and with confidence.   |
| MA.K12.MTR.3.1: | Audpt procedures to apply them to a new context.   |
|                 |  |

|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul> </li> </ul>  |
|-----------------|--|
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li></ul>                            |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency</li> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.<br>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly<br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide<br>referenced by the instructor.   |

|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|-------------------|--|
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                   | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                   | Make inferences to support comprehension.  |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:   | Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students explore the fundamental applications and tools of music technology and sound engineering. As they create and learn its terminology, students also learn the history and aesthetic development of technology used to capture, create, and distribute music. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

#### GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

# Music Technology and Sound Engineering 2 (#1304310) 2020 - 2022 (current)

| Name               | Description  |
|--------------------|--|
|                    | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:      | Clarifications:  |
|                    | e.g., listening maps, active listening, checklists   |
| MIL 012 C 2 2·     | Evaluate performance quality in recorded and/or live performances  |
| MU 012 C 2 3       | Evaluate performance quality in recorded and/or improvisations and generate improvements independently or cooperatively  |
| 10.912.0.2.3.      | Alka critical avaluations, based on examplary models, of the quality and effectiveness of performances and apply the criteria to personal development.   |
| MU.912.C.3.1:      | in music.  |
| MU.912.F.1.2:      | Incorporate or adapt new, emerging, or previously unfamiliar technology to create an innovative composition, music project, or related product.  |
| MU.912.F.3.2:      | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
|                    | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU.912.H.1.2:      | Clarifications:<br>e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
| MII 012 H 2 1.     | Evaluate the social impact of music on specific historical periods   |
| MU 012 H 2 A       | Evanuate the affects of developing technology on composition, performance, and acquisition of music  |
| 10.712.11.2.4.     | Apply knowledge of science, math, and music to demonstrate, through an acquisition of music.   |
|                    | Apply knowledge of science, math, and music to demonstrate, through an acoustic of digital performance medium, now sound production affects musical performance  |
| MU.912.H.3.1:      | Clarifications:<br>e.g., acoustics, sound amplification, materials, mechanics  |
| MU 912 S 1 2.      | Compose music for voices and/or acoustic digital or electronic instruments   |
|                    | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU 012 S 1 2.      |  |
| 1010.912.3.1.3.    | e.g., texture, mode, form, tempo, voicing  |
| MU.912.S.1.5:      | Research and report on the impact of MIDI as an industry-standard protocol.  |
| MU.912.S.1.7:      | Combine and/or create virtual and audio instruments.   |
| MU.912.S.1.8:      | Record, mix, and edit a recorded performance.  |
| MU.912.S.2.2:      | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.4:      | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                    | Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.   |
|                    | a. Use parallel structure.   |
| LAFS.910.L.1.1:    | b. Use various types of phrases (noun, verb, adjectival, adverbial, participial, prepositional, absolute) and clauses (independent, dependent; noun,   |
|                    | relative, adverbial) to convey specific meanings and add variety and interest to writing or presentations.   |
| LAFS.910.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.  |
| LAFS.910.RST.3.7:  | Translate quantitative or technical information expressed in words in a text into visual form (e.g., a table or chart) and translate information expressed visually or mathematically (e.g., in an equation) into words.   |
|                    | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. |
|                    | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.   |
|                    | b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of   |
|                    | alternate views), clear goals and deadlines, and individual roles as needed.   |
| LAFS.910.SL.1.1:   | c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas: actively   |
|                    | incorporate others into the discussion: and clarify, verify, or challenge ideas and conclusions  |
|                    | d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, gualify or justify their   |
|                    | own views and understanding and make new connections in light of the evidence and reasoning presented  |
|                    | own wews and analistanding and make new connections in light of the conditional indirectioning presented.  |
|                    | Standard Relation to Course: Supporting  |
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.   |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.  |
|                    | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the  |
| LAP3.910.3L.2.4:   | organization, development, substance, and style are appropriate to purpose, audience, and task.  |
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.  |
|                    | Create equations and inequalities in one variable and use them to solve problems. Include equations arising from linear and quadratic functions, and   |

| MAFS.912.A-CED.1.1: | simple rational, absolute, and exponential functions. ★ Standard Relation to Course: Supporting   |
|---------------------|---|
| MAFS.912.A-CED.1.2: | Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales. <b>★</b> Standard Relation to Course: Supporting  |
| MAFS.912.A-CED.1.3: | Represent constraints by equations or inequalities, and by systems of equations and/or inequalities, and interpret solutions as viable or non-viable options in a modeling context. For example, represent inequalities describing nutritional and cost constraints on combinations of different foods. $\star$ Standard Relation to Course: Supporting   |
| MAFS.912.A-CED.1.4: | Rearrange formulas to highlight a quantity of interest, using the same reasoning as in solving equations. For example, rearrange Ohm's law V = IR to highlight resistance R. ★<br>Standard Relation to Course: Supporting   |
|                     | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                     | Attend to precision.  |
| MAFS.K12.MP.6.1:    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                     | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:    | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                     | Standard Relation to Course: Supporting   |
| DA.912.S.2.1:       | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1:   | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students build on previous experience with the fundamentals of music technology and sound engineering to integrate their knowledge of traditional musical elements with past and current technologies used to capture, create, mix, and present music. They explore the creative and aesthetic implications of music technology and sound engineering through class work. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

#### GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1304310

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Music Technology > Abbreviated Title: MUS TECH & SO ENG 2 Course Length: Year (Y) Course Level: 2

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts

#### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12)

Instrumental Music (Elementary and Secondary Grades K-12)

# Music Technology and Sound Engineering 2 (#1304310) 2022 - And Beyond

| Name            | Description   |
|-----------------|---|
|                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:   | Clarifications:   |
|                 | e.g., listening maps, active listening, checklists  |
| MIL 912 C 2 2.  | Evaluate performance quality in recorded and/or live performances   |
| MU 912 C 2 3    | Evaluate performance quality in recorded analysis inverse performances.   |
| 10.712.0.2.0.   | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development |
| MU.912.C.3.1:   | in music.   |
| MU.912.F.1.2:   | Incorporate or adapt new, emerging, or previously unfamiliar technology to create an innovative composition, music project, or related product.       |
| MIL 912 F 3 2.  | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and           |
| 10.712.1.0.2.   | technology.   |
|                 | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.                                   |
| MU.912.H.1.2:   | Clarifications:   |
|                 | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
| MU.912.H.2.1:   | Evaluate the social impact of music on specific historical periods.   |
| MU.912.H.2.4:   | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                 | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects           |
|                 | musical performance.  |
| MU.912.H.3.1:   | Clarifications:   |
|                 | e.g., acoustics, sound amplification, materials, mechanics  |
| MU.912.S.1.2:   | Compose music for voices and/or acoustic, digital, or electronic instruments,   |
|                 | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MIL 012 S 1 2.  |   |
| 10.712.3.1.3.   | e.a. texture. mode. form. tempo. voicina  |
| MU 012 C 1 F    |   |
| MU.912.5.1.5:   | Research and report on the impact of MIDI as an industry-standard protocol.   |
| MU.912.5.1.7:   | Combine and/of create virtual and addio instruments.  |
| MU.912.5.1.0.   | Transfer expressive elements and performance techniques from one piece of music to another  |
| MU.912.3.2.2.   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques  |
| 10.712.3.3.4.   | Manage and describe the effect of relearsal sessions and/of strategies of remement of skins and techniques.   |
|                 | Analyze the problem in a way that makes sense given the task  |
|                 | Ask guestions that will help with solving the task.   |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.   |
|                 | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>   |
|                 | Help and support each other when attempting a new method or approach.   |
| MA.K12.MTR.1.1: | Clarifications  |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:                                      |
|                 | Cultivate a community of growth mindset learners.   |
|                 | Foster perseverance in students by choosing tasks that are challenging.   |
|                 | Develop students' ability to analyze and problem solve.   |
|                 | Recognize students' effort when solving challenging problems.   |
|                 | Demonstrate understanding by representing problems in multiple ways   |
| MA.K12.MTR.2.1: | Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
|                 | ······································  |
|                 | Build understanding through modeling and using manipulatives.   |
|                 | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> </ul>                           |
|                 | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>                                      |
|                 | Express connections between concepts and representations.   |
|                 | <ul> <li>Choose a representation based on the given context or purpose.</li> </ul>  |
|                 | Clarifications:   |
|                 | leachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                 | Heip students make connections between concepts and representations.  |
|                 | Provide opportunities for students to use manipulatives when investigating concepts.  |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.  |
|                 | <ul> <li>Snow students that various representations can have different purposes and can be useful in different situations.</li> </ul>                 |
|                 | Complete tasks with mathematical fluency.   |

|                                    | Mathematicians who complete tasks with mathematical fluency:  |
|------------------------------------|---|
| MA.K12.MTR.3.1:                    | Select efficient and appropriate methods for solving problems within the given context.   |
|                                    | Maintain flexibility and accuracy while performing procedures and mental calculations.  |
|                                    | Complete tasks accurately and with confidence.  |
|                                    | Adapt procedures to apply them to a new context.  |
|                                    | Use reedback to improve efficiency when performing calculations.  |
|                                    | Clarifications:   |
|                                    | Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately   |
|                                    | <ul> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> </ul>  |
|                                    | <ul> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>  |
|                                    | Engage in discussions that reflect on the mathematical thinking of self and others  |
|                                    | Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  |
|                                    | Communicate method ideas used bulary and methods offsetively  |
|                                    | Communicate mathematical ideas, vocabulary and methods enectively.     Analyze the mathematical thinking of others  |
|                                    | <ul> <li>Compare the efficiency of a method to those expressed by others.</li> </ul>  |
|                                    | Recognize errors and suggest how to correctly solve the task.   |
|                                    | Justify results by explaining methods and processes.  |
| MA.K12.M1R.4.1:                    | Construct possible arguments based on evidence.   |
|                                    | Clarifications:   |
|                                    | Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:  |
|                                    | • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.   |
|                                    | Create opportunities for students to discuss their thinking with peers.   |
|                                    | <ul> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their poers.</li> </ul>   |
|                                    | • Develop students ability to justify methods and compare their responses to the responses of their peers.  |
|                                    | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:   |
|                                    |   |
|                                    | Focus on relevant details within a problem.   |
|                                    | Create plans and procedures to logically order events, steps or ideas to solve problems.  |
|                                    | Decompose a complex problem into manageable parts.  |
|                                    | Look for similarities among problems  |
| MA.K12.MTR.5.1:                    | Connect solutions of problems to more complicated large-scale situations.   |
|                                    |   |
|                                    | Clarifications:   |
|                                    | Clarifications:<br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:  |
|                                    | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> </ul>  |
|                                    | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> </ul>   |

Mathematicians who assess the reasonableness of solutions:   |
|                                    | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         Support students to develop generalizations based on the similarities found among problems.         Provide opportunities for students to create plans and procedures to solve problems.         Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.         Assess the reasonableness of solutions.         Mathematicians who assess the reasonableness of solutions:         Estimate to discover possible solutions.   |
|                                    | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.         Assess the reasonableness of solutions.         Mathematicians who assess the reasonableness of solutions:         • Estimate to discover possible solutions.         • Use benchmark quantities to determine if a solution makes sense.  |
|                                    | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.         Assess the reasonableness of solutions.         Mathematicians who assess the reasonableness of solutions:         • Estimate to discover possible solutions.         • Use benchmark quantities to determine if a solution makes sense.         • Check calculations when solving problems.  |
|                                    | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.         Assess the reasonableness of solutions.         Mathematicians who assess the reasonableness of solutions:         • Estimate to discover possible solutions.         • Use benchmark quantities to determine if a solution makes sense.         • Check calculations when solving problems.         • Verify possible solutions by explaining the methods used.  |
| MA.K12.MTR.6.1:                    | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         Support students to develop generalizations based on the similarities found among problems.         Provide opportunities for students to create plans and procedures to solve problems.         Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.         Assess the reasonableness of solutions.         Mathematicians who assess the reasonableness of solutions:         Estimate to discover possible solutions.         Use benchmark quantities to determine if a solution makes sense.         Check calculations when solving problems.         Verify possible solutions by explaining the methods used.         Evaluate results based on the given context.   |
| MA.K12.MTR.6.1:                    | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.         Assess the reasonableness of solutions.         Mathematicians who assess the reasonableness of solutions:         • Estimate to discover possible solutions.         • Use benchmark quantities to determine if a solution makes sense.         • Check calculations when solving problems.         • Verify possible solutions by explaining the methods used.         • Evaluate results based on the given context.   |
| MA.K12.MTR.6.1:                    | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.         Assess the reasonableness of solutions.         Mathematicians who assess the reasonableness of solutions:         • Estimate to discover possible solutions.         • Use benchmark quantities to determine if a solution makes sense.         • Check calculations when solving problems.         • Verify possible solutions by explaining the methods used.         • Evaluate results based on the given context.         Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.  |
| MA.K12.MTR.6.1:                    | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         Support students to develop generalizations based on the similarities found among problems.         Provide opportunities for students to create plans and procedures to solve problems.         Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.         Assess the reasonableness of solutions.         Mathematicians who assess the reasonableness of solutions:         Estimate to discover possible solutions.         Verify possible solutions when solving problems.         Verify possible solutions by explaining the methods used.         Evaluate results based on the given context.         Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         Have students estimate or predict solutions prior to solving.         Prompt students to continually ask, "Does this solution make sense? How do you know?"  |
| MA.K12.MTR.6.1:                    | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         Support students to develop generalizations based on the similarities found among problems.         Provide opportunities for students to create plans and procedures to solve problems.         Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.         Assess the reasonableness of solutions.         Mathematicians who assess the reasonableness of solutions:         • Estimate to discover possible solutions.         • Use benchmark quantities to determine if a solution makes sense.         • Check calculations when solving problems.         • Verify possible solutions by explaining the methods used.         • Evaluate results based on the given context.         Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.         • Prompt students to continually ask, "Does this solution make sense? How do you know?"         • Reinforce that students check their work as they progress within and after a task.   |
| MA.K12.MTR.6.1:                    | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:            Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.            Support students to develop generalizations based on the similarities found among problems.             Provide opportunities for students to create plans and procedures to solve problems.             Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.             Assess the reasonableness of solutions.             Mathematicians who assess the reasonableness of solutions:             Lise benchmark quantities to determine if a solution makes sense.             Check calculations when solving problems.             Verify possible solutions by explaining the methods used.             Evaluate results based on the given context.             Clarifications:             Teachers who encourage students to assess the reasonableness of solutions:             Have students estimate or predict solutions prior to solving.             Prompt students estimate or predict solutions prior to solving.             Prompt students check their work as they progress within and after a task.             Strengthen stud   |
| MA.K12.MTR.6.1:                    | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.         Assess the reasonableness of solutions.         Mathematicians who assess the reasonableness of solutions:         • Estimate to discover possible solutions.         • Use benchmark quantities to determine if a solution makes sense.         • Check calculations when solving problems.         • Verify possible solutions by explaining the methods used.         • Evaluate results based on the given context.         Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.         • Prompt students ectimate is continually ask, "Does this solution make sense? How do you know?"         • Reinforce that students check their work as they progress within and after a task.         • Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.6.1:                    | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.         Assess the reasonableness of solutions.         • Les benchmark quantities to determine if a solution makes sense.         • Check calculations when solving problems.         • Verify possible solutions by explaining the methods used.         • Evaluate results based on the given context.         Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.         • Prompt students to continually ask, "Does this solution make sense? How do you know?"         • Reinforce that students wher youth as the yorgens within and after a task.         • Strengthen students' ability to verify solutions through justifications.  |

| ELA.K12.EE.1.1:   | <ul> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> </ul> |
|-------------------|--|
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                   | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                   | Make inferences to support comprehension.  |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students build on previous experience with the fundamentals of music technology and sound engineering to integrate their knowledge of traditional musical elements with past and current technologies used to capture, create, mix, and present music. They explore the creative and aesthetic implications of music technology and sound engineering through class work. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

#### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Music Technology > Abbreviated Title: MUS TECH & SO ENG 2 Course Length: Year (Y) Course Level: 2

#### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

| Name   | Description  |
|--|--|
|  | Apply replication, physical rehearsal, and cognitive rehearsal to aid in the mental and physical retention of patterns, complex steps, and sequences performed by another dancer.  |
| DA.912.C.1.2:  | Clarifications:  |
|  | e.g., mind/body connection, watching, following, marking, visualizing, imagery, using rhythmic clues   |
| DA.912.C.2.3:  | Develop a plan to improve technique, performance quality, and/or compositional work with artistic intent.  |
|  | Practice conditioning methods that complement the physical instrument, and determine the degree of personal improvement in established dance techniques.   |
| DA.912.F.3.6:  | Clarifications:  |
|  | e.g., Feldenkrais, Bartenieff, Pilates, yoga, cardio routines  |
| DA.912.F.3.8:  | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
|  | Apply standards of class and performance etiquette consistently to attain optimal working conditions.  |
| DA.912.0.1.2:  | Clarifications:<br>e.g., appropriate attire, professional respect, traditions, procedures  |
| DA.912.0.3.1:  | Perform dance pieces to express feelings, ideas, cultural identity, music, and other abstract concepts through movements, steps, pantomime, and gestures.  |
| DA.912.0.3.2:  | Use imagery, analogy, and metaphor to improve body alignment and/or enhance the quality of movements, steps, phrases, or dances.   |
| DA.912.S.2.1:  | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| DA.912.S.2.4:  | Demonstrate retention of directions, corrections, and memorization of dance from previous rehearsals and classes.  |
| DA.912.S.3.2:  | Develop and maintain flexibility, strength, and stamina for wellness and performance.  |
|  | Perform dance vocabulary with musicality and sensitivity.  |
| DA.912.S.3.4:  | Clarifications:  |
|  | e.g., on the counts, hin the music, emulate musical nuance   |
| LAFS.910.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.  |
| LAFS.910.SL.1.1:<br>LAFS.910.SL.1.2:<br>LAFS.910.SL.1.3:<br>LAFS.910.SL.2.4:<br>LAFS.910.SL.2.6:<br>LAFS.910.WHST.2.4:<br>LAFS.910.WHST.3.9: | <ul> <li>Initial and participate entitively in a range of collaborative discussions (the volte, in groups, and teacher red) with diverse particles on groups.</li> <li>a. Come to discussions prepared, having read and researched material under study: explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> <li>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</li> <li>Standard Relation to Course: Supporting</li> <li>Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.</li> <li>Evaluate a speaker's point of view, reasoning, and use of evidence and rehoric, identifying any fallacious reasoning or exaggerated or distorted evidence.</li> <li>Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.</li> <li>Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.</li> <li>Produce clear and coherent writting in which the development, organization, and style are appro</li></ul> |
|  | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:  | Clarifications:<br>e.g., listening maps, active listening, checklists  |
| MU.912.C.2.2:  | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:  | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.   |
| MU.912.F.3.2:  | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
|  | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.O.1.1:  | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
|  | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.   |
| •  |  |

| MU.912.0.3.1:     | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,  |
|-------------------|---|
|                   | orcnestration<br>Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of<br>music literature.   |
| MU.912.S.2.1:     | Clarifications:<br>e.g., memorization, sequential process   |
|                   | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x<br>– y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                   | Standard Relation to Course: Supporting   |
| PE.912.C.2.2:     | Apply terminology and etiquette in dance.   |
|                   | Analyze the movement performance of self and others.  |
| PE.912.C.2.3:     | Clarifications:<br>Some examples are video analysis and checklist.  |
| PE.912.C.2.5:     | Analyze the relationship between music and dance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Student dancers develop basic skills in performing and evaluating choreographed performances as an independent ensemble and in cooperation with a music ensemble. Emphasis is placed on dance, equipment manipulation, precision, and the relationship between music and dance. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

#### GENERAL INFORMATION

Course Number: 1305300

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Eurythmics > Abbreviated Title: EURHY 1 Course Length: Year (Y) Course Level: 2
# Eurhythmics 1 (#1305300) 2022 - And Beyond

| Name            | Description  |
|-----------------|--|
|                 | Apply replication, physical rehearsal, and cognitive rehearsal to aid in the mental and physical retention of patterns, complex steps, and sequences performed by another dancer.  |
| DA.912.C.1.2:   | Clarifications:  |
|                 | e.g., mind/body connection, watching, following, marking, visualizing, imagery, using rhythmic clues   |
| DA.912.C.2.3:   | Develop a plan to improve technique, performance quality, and/or compositional work with artistic intent.  |
|                 | Practice conditioning methods that complement the physical instrument, and determine the degree of personal improvement in established dance techniques.   |
| DA.912.F.3.6:   | Clarifications:<br>e.g., Feldenkrais, Bartenieff, Pilates, yoga, cardio routines   |
| DA.912.F.3.8:   | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
|                 | Apply standards of class and performance etiquette consistently to attain optimal working conditions.  |
| DA.912.0.1.2:   | Clarifications:<br>e.g., appropriate attire, professional respect, traditions, procedures  |
| DA.912.0.3.1:   | Perform dance pieces to express feelings, ideas, cultural identity, music, and other abstract concepts through movements, steps, pantomime, and gestures.  |
| DA.912.0.3.2:   | Use imagery, analogy, and metaphor to improve body alignment and/or enhance the quality of movements, steps, phrases, or dances.   |
| DA.912.S.2.1:   | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| DA.912.S.2.4:   | Demonstrate retention of directions, corrections, and memorization of dance from previous rehearsals and classes.  |
| DA.912.S.3.2:   | Develop and maintain flexibility, strength, and stamina for wellness and performance.  |
|                 | Perform dance vocabulary with musicality and sensitivity.  |
| DA.912.S.3.4:   | Clarifications:  |
|                 | e.g., on the counts, fill the music, emulate musical nuance  |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:  |
| MA.K12.MTR.3.1: | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
|                 | Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:  |

|                 | <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>   |
|-----------------|--|
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.  |
| MA.K12.MTR.4.1: | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> </li> </ul> |
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
| MA.K12.MTR.5.1: | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |
|                 | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.  |
|                 | <ul> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
| MA.K12.MTR.7.1: | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:<br>• Connect mathematical concepts to everyday experiences.<br>• Use models and methods to understand, represent and solve problems.<br>• Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.  |
|                 | <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>  |
| MU.912 C 1 1·   | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| M0.712.0.1.1.   | e.g., listening maps, active listening, checklists   |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.<br>Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development  |
| MU.912.C.3.1:   | in music.  |
| MU.912.F.3.2:   | summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.0.1.1:   | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  Clarifications: e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |

| 1                 |   |
|-------------------|---|
| MU.912.O.3.1:     | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.  |
|                   | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration   |
| MU.912.S.2.1:     | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   |
|                   | Clarifications:<br>e.g., memorization, sequential process   |
|                   | Cite evidence to explain and justify reasoning.   |
|                   | <ul> <li>Clarifications:</li> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> </ul> |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.<br>In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students<br>build on ideas, propel the conversation, and support claims and counterclaims with evidence.             |
|                   |   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| PE.912.C.2.2:     | Apply terminology and etiquette in dance.   |
|                   | Analyze the movement performance of self and others.  |
| PE.912.C.2.3:     | Clarifications:<br>Some examples are video analysis and checklist.  |
| PE.912.C.2.5:     | Analyze the relationship between music and dance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

Student dancers develop basic skills in performing and evaluating choreographed performances as an independent ensemble and in cooperation with a music ensemble. Emphasis is placed on dance, equipment manipulation, precision, and the relationship between music and dance. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

### **GENERAL NOTES**

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

| DA.912.S.1.2:  | Generate choreographic ideas through improvisation and physical brainstorming.   |
| DA.912.S.2.1:  | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| DA.912.S.2.4:  | Demonstrate retention of directions, corrections, and memorization of dance from previous rehearsals and classes.  |
| DA.912.S.3.2:  | Develop and maintain flexibility, strength, and stamina for wellness and performance.  |
|                | Perform dance vocabulary with musicality and sensitivity.  |
| DA.912.S.3.4:  | Clarifications:<br>e.g., on the counts, fill the music, emulate musical nuance   |
|                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:  | Clarifications:<br>e.g., listening maps, active listening, checklists  |
| MU.912.C.2.2:  | Evaluate performance guality in recorded and/or live performances.   |
|                | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development  |
| MU.912.C.3.1:  | in music.  |
| MU.912.F.3.1:  | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.                               |
| MU.912.F.3.2:  | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.4:  | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.                                |
| MU.912.H.2.1:  | Evaluate the social impact of music on specific historical periods.  |
|                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1:  | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
|                | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer (performer.  |
|                |  |
| MU.912.0.3.1:  | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration  |
|                | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
| MU.912.S.2.1:  | Clarifications:  |
|                | e.g., memorization, sequential process   |
| MU.912.S.2.2:  | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.4:  | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                |  |

| LAFS.910.SL.1.1:   | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> <li>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</li> </ul>                 |
|--------------------|---|
|                    | Standard Relation to Course: Supporting   |
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.  |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.   |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.   |
| LAFS.910.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.   |
| LAFS.910.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
| MAFS.K12.MP.6.1:   | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. Standard Relation to Course: Supporting   |
|                    | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:   | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
| PE.912.C.2.2:      | Apply terminology and etiguette in dance.   |
|                    | Analyze the movement performance of self and others.  |
| PE.912.C.2.3:      | Clarifications:<br>Some examples are video analysis and checklist.  |
| PE.912.C.2.5:      | Analyze the relationship between music and dance.   |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

Student dancers build on previous experience to perform and evaluate choreographed performances as an independent ensemble and in cooperation with a music ensemble. Students focus on strengthening dance skills, equipment manipulation, precision, and the relationship between music and dance. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

### GENERAL INFORMATION

Course Number: 1305310

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Eurythmics > Abbreviated Title: EURHY 2 Course Length: Year (Y) Course Level: 2

# Eurhythmics 2 (#1305310) 2022 - And Beyond

| Name          | Description   |
|---------------|---|
|               | Apply replication, physical rehearsal, and cognitive rehearsal to aid in the mental and physical retention of patterns, complex steps, and sequences performed by another dancer.   |
| DA.912.C.1.2: | Clarifications:   |
|               | e.g., mind/body connection, watching, following, marking, visualizing, imagery, using rhythmic clues  |
|               | Make informed critical assessments of the quality and effectiveness of one's own technique and performance quality, based on criteria developed from<br>a variety of sources, to support personal competence and artistic growth. |
| DA.912.C.2.2: | Clarifications:   |
|               | e.g., exemplary models, critical processes, background knowledge, experience, self-assessment, constructive criticism, comparison to other works  |
| DA.912.C.2.3: | Develop a plan to improve technique, performance quality, and/or compositional work with artistic intent.   |
|               | Practice conditioning methods that complement the physical instrument, and determine the degree of personal improvement in established dance techniques.  |
| DA.912.F.3.6: | Clarifications:<br>e.g., Feldenkrais, Bartenieff, Pilates, yoga, cardio routines  |
| DA 912 F 3 8  | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in  |
|               | the work environment.   |
|               | Apply standards of class and performance etiquette consistently to attain optimal working conditions.   |
| DA.912.0.1.2: | Clarifications:<br>e.g., appropriate attire, professional respect, traditions, procedures   |
|               | Perform dance pieces to express feelings, ideas, cultural identity, music, and other abstract concepts through movements, steps, pantomime, and   |
| DA.912.0.3.1: | gestures.   |
| DA.912.0.3.2: | Use imagery, analogy, and metaphor to improve body alignment and/or enhance the quality of movements, steps, phrases, or dances.  |
| DA.912.S.1.2: | Generate choreographic ideas through improvisation and physical brainstorming.  |
| DA.912.S.2.1: | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| DA.912.S.2.4: | Demonstrate retention of directions, corrections, and memorization of dance from previous rehearsals and classes.   |
| DA.912.S.3.2: | Develop and maintain flexibility, strength, and stamina for wellness and performance.   |
|               | Perform dance vocabulary with musicality and sensitivity.   |
| DA.912.S.3.4: | Clarifications:<br>e.g., on the counts, fill the music, emulate musical nuance  |
|               | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1: | Clarifications:<br>e.g., listening maps, active listening, checklists   |
| MU.912.C.2.2: | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.3.1: | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.  |
| MU.912.F.3.1: | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of<br>leadership in school and/or non-school settings.                         |
| MU.912.F.3.2: | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.   |
| MU.912.F.3.4: | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.                             |
| MU.912.H.2.1: | Evaluate the social impact of music on specific historical periods.   |
|               | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.0.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
|               | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied   |
| MU.912.O.3.1: | meaning of the composer/performer.  |
|               | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration   |
|               | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   |
| MU.912.S.2.1: | Clarifications:   |
|               | e.g., memorization, sequential process  |
| MU.912.S.2.2: | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.4: | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|               | Mathematicians who participate in effortful learning both individually and with others:   |
|               | Analyze the problem in a way that makes sense given the task.   |

|                 | <ul> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>  |
|-----------------|--|
| MA.K12.MTR.1.1: | <ul> <li>Help and support each other when attempting a new method or approach.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul> </li> </ul>   |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> <b>Clarifications:</b> <ul> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>   |
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul> Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>   |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br><b>Clarifications:</b><br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.<br>• Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.   |
|                 | Mathematicians who assess the reasonableness of solutions:   |

| MA.K12.MTR.6.1:   | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul> Clarifications: Teachers who encourage students to assess the reasonableness of solutions: <ul> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li></ul>  |
|-------------------|--|
| MA.K12.MTR.7.1:   | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul>  |
| ELA.K12.EE.1.1:   | Cite evidence to explain and justify reasoning.         Clarifications:         K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.         2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.         4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.         6-8 Students continue with previous skills and use a style guide to create a proper citation.         9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. |
| ELA.K12.EE.2.1:   | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
| ELA.K12.EE.3.1:   | Make inferences to support comprehension.  Clarifications:  Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.  |
| ELA.K12.EE.4.1:   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
| ELA.K12.EE.5.1:   | Use the accepted rules governing a specific format to create quality work.<br>Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| PE.912.C.2.2:     | Apply terminology and etiquette in dance.  |
| PE.912.C.2.3:     | Analyze the movement performance of self and others. Clarifications: Some examples are video analysis and checklist.   |
| PE.912.C.2.5:     | Analyze the relationship between music and dance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

### VERSION DESCRIPTION

Student dancers build on previous experience to perform and evaluate choreographed performances as an independent ensemble and in cooperation with a music ensemble. Students focus on strengthening dance skills, equipment manipulation, precision, and the relationship between music and dance. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

### GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

# Eurhythmics 3 (#1305320) 2015 - 2022 (current)

| Name                           | Description   |
|--------------------------------|---|
| DA.912.C.1.2:                  | Apply replication, physical rehearsal, and cognitive rehearsal to aid in the mental and physical retention of patterns, complex steps, and sequences performed by another dancer.                               |
|                                | Clarifications:   |
|                                | e.g., mind/body connection, watching, following, marking, visualizing, imagery, using rhythmic clues  |
| DA.912.C.1.4:                  | Weigh and discuss the personal significance of using both physical and cognitive rehearsal over time to strengthen one's own retention of patterns, complex steps, and sequences for rehearsal and performance. |
|                                | Make informed critical assessments of the quality and effectiveness of one's own technique and performance quality, based on criteria developed from  |
| DA.912.C.2.2:                  | a variety of sources, to support personal competence and artistic growth.   |
| DA. 712.0.2.2.                 | Clarifications:   |
|                                | e.g., exemplarly models, childal processes, background knowledge, experience, sen-assessment, constructive childsin, comparison to other works  |
| DA.912.0.2.3:                  | Develop a plan to improve technique, performance quality, and/or compositional work with artistic intent.   |
| DA 012 C 3 1.                  |   |
| DA.912.0.3.1.                  | e.g., use of movements, elements, principles of design, lighting, costumes, music   |
|                                | Assess artistic or personal challenges, holistically and in parts, to explore and weigh potential solutions to problems in technique or composition.  |
| DA.912.C.3.2:                  | Clarifications:   |
|                                | e.g., time management, refining dance steps, research   |
|                                | Investigate and report potential careers, requirements for employment, markets, potential salaries, and the degree of competition in dance and  |
|                                | dance-related fields.   |
| DA.712.1.2.1.                  | Clarifications:   |
|                                | e.g., dancer, teacher, artistic director, stage manager, videographer, costumer, agent, Pilates teacher, dance therapist, nutritionist  |
|                                | Practice conditioning methods that complement the physical instrument, and determine the degree of personal improvement in established dance techniques.  |
| DA.912.F.3.6:                  | Clarifications:   |
|                                | e.g., Feldenkrais, Bartenieff, Pilates, yoga, cardio routines   |
| DA.912.F.3.8:                  | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.                                      |
| DA.912.H.1.1:                  | Explore and select music from a broad range of cultures to accompany, support, and/or inspire choreography.   |
| DA.912.H.1.3:                  | Adhere to copyright laws for choreography and music licensing to show respect for the intellectual property of others.  |
| DA.912.H.3.3:                  | Apply standards of class and performance etiquette consistently to attain optimal working conditions  |
| DA 912 O 1 2                   | Clarifications:   |
| 57117121011121                 | e.g., appropriate attire, professional respect, traditions, procedures  |
| DA.912.0.3.1:                  | Perform dance pieces to express feelings, ideas, cultural identity, music, and other abstract concepts through movements, steps, pantomime, and gestures.   |
| DA.912.0.3.2:                  | Use imagery, analogy, and metaphor to improve body alignment and/or enhance the quality of movements, steps, phrases, or dances.  |
| DA.912.S.1.2:                  | Generate choreographic ideas through improvisation and physical brainstorming.  |
| DA.912.S.2.1:                  | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
|                                | Apply corrections and concepts from previously learned steps to different material to improve processing of new information.  |
| DA.912.S.2.2:                  | Clarifications:   |
|                                | Demonstrate retention, revision, remainent, rocus   |
| DA.912.5.2.4:<br>DA 912 S 3 2: | Demonstrate retention of directions, corrections, and memorization of dance from previous renearsals and classes.   |
| Driff TElotolei                | Perform dance vocabulary with musicality and sensitivity.   |
| DA.912.S.3.4:                  | Clarifications:   |
|                                | e.g., on the counts, fill the music, emulate musical nuance   |
|                                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:                  | Clarifications:<br>e.g., listening maps, active listening, checklists   |
| MU.912.C.2.2:                  | Evaluate performance guality in recorded and/or live performances.  |
| MU.912.C.3.1:                  | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.   |
|                                | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.   |
| MU.912.F.2.2:                  | Clarifications:   |
|                                | e.g., community revitalization, industry choosing new locations, cultural and social enrichment   |
|                                |   |

| MU.912.F.3.1:       | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.  |
|---------------------|---|
| MU.912.F.3.2:       | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.   |
| MU.912.F.3.4:       | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.   |
|                     | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:       | Clarifications:<br>e.g., patriotic, folk, celebration, entertainment, spiritual   |
| MU.912.H.2.1:       | Evaluate the social impact of music on specific historical periods.   |
| MU.912.H.2.2:       | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.   |
|                     | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.O.1.1:       | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
|                     | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.  |
| MU.912.O.3.1:       | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration   |
| MU.912.0.3.2:       | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                     | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   |
| MU.912.S.2.1:       | Clarifications:<br>e.g., memorization, sequential process   |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
| LAFS.1112.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.  |
|                     | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–<br>12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.   |
|                     | <ul> <li>a. Connecto discussions prepared, having read and researched material dider study, explicitly draw of that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as</li> </ul>  |
| LAES 1112 SL 1 1.   | needed.   |
| LAI 3.1112.3L.1.1.  | c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a  |
|                     | topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.   |
|                     | d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions  |
|                     | when possible; and determine what additional information or research is required to deepen the investigation or complete the task.  |
|                     | Standard Relation to Course: Supporting   |
| LAFS.1112.SL.1.2:   | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.   |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.   |
| LAFS.1112.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.   |
| LAFS.1112.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
|                     | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                     | Attend to precision.  |
| MAFS.K12.MP.6.1:    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                     | Standard Relation to Course: Supporting Look for and make use of structure.   |
|                     |   |

| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting |
|-------------------|--|
| PE.912.C.2.2:     | Apply terminology and etiquette in dance.  |
| PE.912.C.2.3:     | Analyze the movement performance of self and others.  Clarifications: Some examples are video analysis and checklist.  |
| PE.912.C.2.5:     | Analyze the relationship between music and dance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

### VERSION DESCRIPTION

Student dancers strengthen their performance and evaluative skills, and explore the basic processes of designing choreography for an independent ensemble or in cooperation with a music ensemble. Students develop more sophisticated dance skills and equipment manipulation. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

### GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

### GENERAL INFORMATION

Course Number: 1305320

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Eurythmics > Abbreviated Title: EURHY 3 Course Length: Year (Y) Course Level: 2

# Eurhythmics 3 (#1305320) 2022 - And Beyond

| Name          | Description   |
|---------------|---|
| DA.912.C.1.2: | Apply replication, physical rehearsal, and cognitive rehearsal to aid in the mental and physical retention of patterns, complex steps, and sequences<br>performed by another dancer.                            |
|               | Clarifications:   |
|               | e.g., mind/body connection, watching, following, marking, visualizing, imagery, using rhythmic clues  |
| DA.912.C.1.4: | Weigh and discuss the personal significance of using both physical and cognitive rehearsal over time to strengthen one's own retention of patterns, complex steps, and sequences for rehearsal and performance. |
|               | Make informed critical assessments of the quality and effectiveness of one's own technique and performance quality, based on criteria developed from  |
|               | a variety of sources, to support personal competence and artistic growth.   |
| DA.912.C.2.2: | Clarifications:<br>e.g., exemplary models, critical processes, background knowledge, experience, self-assessment, constructive criticism, comparison to other works   |
|               | Develop a plan to improve technique, performance quality, and/or compositional work with article intent   |
| DA.912.0.2.3. | Criticity and effectiveness of performances based on exemplary models and self-established criteria   |
|               |   |
| DA.912.0.3.1. | e.g., use of movements, elements, principles of design, lighting, costumes, music   |
|               | Assess artistic or personal challenges, holistically and in parts, to explore and weigh potential solutions to problems in technique or composition.  |
| DA.912.C.3.2: | Clarifications:   |
|               | e.g., time management, refining dance steps, research   |
|               | Investigate and report potential careers, requirements for employment, markets, potential salaries, and the degree of competition in dance and  |
| DA 912 F 2 1  | dance-related fields.   |
| 571772112111  | Clarifications:   |
|               | e.g., dancer, teacher, artistic director, stage manager, videographer, costumer, agent, Pilates teacher, dance therapist, nutritionist  |
|               | Practice conditioning methods that complement the physical instrument, and determine the degree of personal improvement in established dance techniques.  |
| DA.912.F.3.6: | Clarifications:   |
|               | e.g., Feldenkrais, Bartenieff, Pilates, yoga, cardio routines   |
| DA.912.F.3.8: | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.                                      |
| DA.912.H.1.1: | Explore and select music from a broad range of cultures to accompany, support, and/or inspire choreography.   |
| DA.912.H.1.3: | Adhere to copyright laws for choreography and music licensing to show respect for the intellectual property of others.  |
| DA.912.H.3.3: | Explain the importance of proper nutrition, injury prevention, and safe practices to optimal performance and the life-long health of a dancer.  |
|               | Apply standards of class and performance etiquette consistently to attain optimal working conditions.   |
| DA.912.0.1.2: | Clarifications:<br>e.g., appropriate attire, professional respect, traditions, procedures   |
| DA.912.0.3.1: | Perform dance pieces to express feelings, ideas, cultural identity, music, and other abstract concepts through movements, steps, pantomime, and gestures.   |
| DA.912.0.3.2: | Use imagery, analogy, and metaphor to improve body alignment and/or enhance the guality of movements, steps, phrases, or dances.  |
| DA.912.S.1.2: | Generate choreographic ideas through improvisation and physical brainstorming.  |
| DA.912.S.2.1: | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
|               | Apply corrections and concepts from previously learned steps to different material to improve processing of new information.  |
| DA.912.S.2.2: | Clarifications:   |
|               | e.g., repetition, revision, refinement, focus   |
| DA.912.S.2.4: | Demonstrate retention of directions, corrections, and memorization of dance from previous rehearsals and classes.   |
| DA.912.S.3.2: | Develop and maintain flexibility, strength, and stamina for wellness and performance.   |
|               | Perform dance vocabulary with musicality and sensitivity.   |
| DA.912.S.3.4: | Clarifications:<br>e.g., on the counts, fill the music, emulate musical nuance  |
|               | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works  |
| MU 010 0 1 1  |   |
| 10.912.0.1.1. | e.g., listening maps, active listening, checklists  |
| MU.912.C.2.2: | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.3.1: | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.   |
|               | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.   |
| MU.912.F.2.2: | Clarifications:   |
|               | e.g., community revitalization, industry choosing new locations, cultural and social enrichment   |

| MU.912.F.3.1:   | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings  |
|-----------------|--|
| MU.912.F.3.2:   | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.4:   | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.  |
| MU.912.H.1.1:   | Investigate and discuss how a culture's traditions are reflected through its music.  Clarifications: e.g., patriotic, folk, celebration, entertainment, spiritual  |
| MU.912.H.2.1:   | Evaluate the social impact of music on specific historical periods.  |
| MU.912.H.2.2:   | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.  |
| MU.912.O.1.1:   | Clarifications:         e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
|                 | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.   |
| MU.912.O.3.1:   | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration  |
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.<br>Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
| MU.912.S.2.1:   | Clarifications:<br>e.g., memorization, sequential process  |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.4:   | <ul> <li>Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.</li> <li>Mathematicians who participate in effortful learning both individually and with others: <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul> </li> </ul>   |
| MA.K12.MTR.1.1: | <ul> <li>Help and support each other when attempting a new method or approach.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul> </li> </ul>   |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li></ul> |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>Select efficient and appropriate methods for solving problems within the given context.<br>Maintain flexibility and accuracy while performing procedures and mental calculations.<br>Complete tasks accurately and with confidence.<br>Adapt procedures to apply them to a new context.<br>Use feedback to improve efficiency when performing calculations.<br>Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:<br>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>Offer multiple opportunities for students to practice efficient and generalizable methods.<br>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
|                 | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> </ul>   |

| Use patients well structure to help understand and cannot methematical concepts.              Mathematicians who use patients on structure to help understand and cannot methematical concepts:            • Tools of relevant datas within a potient.              • Tools of relevant datas within a potient.            • Tools of relevant datas within a potient.              • Tools of relevant datas within a potient.            • Obstact complex potient in memory relevants.              • Relevants.            • Obstact complex potient in memory complex potient in memory complex of data in memory complex.               Complex structure in the word complex of data in the memory complex.            • Point values of relevant datas with reserver registration in the word complex. |---|-----------------|---|
| Assess the reasonableness of solutions.         Mathematicians who assess the reasonableness of solutions is:         • Estimate to discover possible solutions.         • Use benchmark quantities to determine if a solution makes sense.         • Check calculations who assess the reasonableness.         • Verify possible solutions to assess the reasonableness of solutions:         • Verify possible solutions by explaining the methods used.         • Verify possible solutions to assess the reasonableness of solutions:         • Have solutions estimates to continuelly adar, "Does this solution make sense? How do you know?"         • Reinforce that students check their work as they progress within and after a task.         • Strengthen students' ability to verify solutions through justifications.         • Consci mathematics to real-world contexts:         • Connect mathematics to real-world contexts:         • Denotics and methods to understand, represent and solve problems.         • Derive apply mathematics to agather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.         MA.K12.MTR.7.1:       Clarifications:         Clarifications:       • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.         MA.K12.MTR.7.1:       Clarifications:         Clarifications:       • Perform investigations to apply mathematics to real-world contexts:   | MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br><b>Clarifications:</b><br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.<br>• Develop <b>students' ability to construct relationships between their current</b> understanding and more sophisticated ways of thinking. |
| Apply mathematics to real-world contexts.         Mathematicians who apply mathematics to real-world contexts:         • Connect mathematical concepts to everyday experiences.         • Use models and methods to understand, represent and solve problems.         • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.         Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.         • Indicate how various concepts can be applied to other disciplines.         Clarifications:         K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.         2-3 Students include textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students shuld use a combination of direct and indirect citations.         ELA K12.EE.1.1:       4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, studen  | MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.  |
| Cite evidence to explain and justify reasoning.         Clarifications:         K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.         2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.         ELA.K12.EE.1.1:       4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.         6-8 Students continue with previous skills and use a style guide to create a proper citation.         9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.         ELA.K12.EE.2.1:       Clarifications:         Read and comprehend grade-level complex texts proficiently.         ELA.K12.EE.2.1:       Clarifications:         See Text Complexity for grade-level complexity bands and a text complexity rubric.         Make inferences to support comprehension.   | MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |

| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
|-------------------|--|
| ELA.K12.EE.4.1:   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.  In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |
| ELA.K12.EE.5.1:   | Use the accepted rules governing a specific format to create quality work.<br>Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.<br>Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| PE.912.C.2.2:     | Apply terminology and etiquette in dance.  |
| PE.912.C.2.3:     | Analyze the movement performance of self and others.  Clarifications: Some examples are video analysis and checklist.  |
| PE.912.C.2.5:     | Analyze the relationship between music and dance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

### VERSION DESCRIPTION

Student dancers strengthen their performance and evaluative skills, and explore the basic processes of designing choreography for an independent ensemble or in cooperation with a music ensemble. Students develop more sophisticated dance skills and equipment manipulation. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

### GENERAL INFORMATION

Course Number: 1305320

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Eurythmics > Abbreviated Title: EURHY 3 Course Length: Year (Y) Course Level: 2

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts

# Eurhythmics 4 (#1305330) 2015 - 2022 (current)

| Name            | Description   |
|-----------------|---|
| DA.912.C.1.2:   | Apply replication, physical rehearsal, and cognitive rehearsal to aid in the mental and physical retention of patterns, complex steps, and sequences performed by another dancer. |
|                 | Clarifications:   |
|                 | e.g., mind/body connection, watching, following, marking, visualizing, imagery, using rhythmic clues  |
| DA.912.C.1.3:   | Develop and articulate criteria for use in critiquing dance, drawing on background knowledge and personal experience, to show independence in one's response.                     |
|                 | Clarifications:<br>e.g., journal entries, discussion  |
|                 | Weigh and discuss the personal significance of using both physical and cognitive rehearsal over time to strengthen one's own retention of patterns,                               |
| DA.912.C.1.4:   | complex steps, and sequences for rehearsal and performance.   |
|                 | Analyze movement from varying perspectives and experiment with a variety of creative solutions to solve technical or choreographic challenges.                                    |
| DA.912.C.2.1:   | e.g., improvisation, trial and error, collaboration   |
|                 | Make informed critical assessments of the quality and effectiveness of one's own technique and performance quality, based on criteria developed from                              |
| DA 912 C 2 2    | a variety of sources, to support personal competence and artistic growth.   |
| D.1.712.0.2.2.  | Clarifications:<br>e.g., exemplary models, critical processes, background knowledge, experience, self-assessment, constructive criticism, comparison to other works               |
| DA.912.C.2.3:   | Develop a plan to improve technique, performance quality, and/or compositional work with artistic intent.   |
| DA.912.C.2.4:   | Evaluate nuances of movement and their relationship to style, choreographic elements, and/or other dancers, and apply this knowledge to alter personal performance.               |
|                 | Critique the quality and effectiveness of performances based on exemplary models and self-established criteria.   |
| DA.912.C.3.1:   | Clarifications:   |
|                 | e.g., use of movements, elements, principles of design, lighting, costumes, music   |
|                 | Assess artistic or personal challenges, holistically and in parts, to explore and weigh potential solutions to problems in technique or composition.                              |
| DA.912.C.3.2:   | Clarifications:<br>e.g., time management, refining dance steps, research  |
| DA.912.F.1.3:   | Employ acquired knowledge to stimulate creative risk-taking and broaden one's own dance technique, performance, and choreography.   |
|                 | Investigate and report potential careers, requirements for employment, markets, potential salaries, and the degree of competition in dance and                                    |
| DA.912.F.2.1:   |   |
|                 | e.g., dancer, teacher, artistic director, stage manager, videographer, costumer, agent, Pilates teacher, dance therapist, nutritionist  |
| DA.912.F.3.1:   | Demonstrate leadership and responsibility through designing choreography, planning rehearsals, or directing a dance piece.  |
|                 | Synthesize information and make use of a variety of experiences and resources from outside dance class to inform and inspire one's work as a dancer.                              |
| DA.912.F.3.2:   | Clarifications:<br>e.g., private studio work, school subjects, athletics, outside interests, news, personal life, music, poetry, environment                                      |
|                 | Practice conditioning methods that complement the physical instrument, and determine the degree of personal improvement in established dance techniques.                          |
| DA.912.F.3.6:   | Clarifications:   |
|                 | Demonstrate effective teamwork and accountability using compromise collaboration, and conflict resolution, to set and achieve goals as required in                                |
| DA.912.F.3.8:   | the work environment.   |
| DA.912.H.1.1:   | Explore and select music from a broad range of cultures to accompany, support, and/or inspire choreography.   |
| DA.912.H.1.2:   | Study dance works created by artists of diverse backgrounds, and use their work as inspiration for performance or creating new works.   |
| DA.912.H.1.3:   | Adhere to copyright laws for choreography and music licensing to show respect for the intellectual property of others.  |
| DA. 712.11.3.3. | Apply standards of class and performance etiquette consistently to attain optimal working conditions.   |
| DA.912.0.1.2:   | Clarifications:   |
|                 | Construct a dance that uses specific choreographic structures to express an idea and show understanding of continuity and framework   |
| DA.912.O.1.5:   | Clarifications:   |
|                 | e.g., ABA, ABCA, ABACA, narrative, motif, beginning-middle-end, motif manipulation  |
| DA.912.0.3.1:   | Perform dance pieces to express feelings, ideas, cultural identity, music, and other abstract concepts through movements, steps, pantomime, and gestures.                         |
| DA.912.0.3.2:   | Use imagery, analogy, and metaphor to improve body alignment and/or enhance the quality of movements, steps, phrases, or dances.  |
| DA 012 0 1 1    | Synthesize a variety of choreographic principles and structures to create a dance.  |
| DA.912.S.1.1:   | Clarifications:   |

|                                | e.g., unity, variety, contrast, repetition, transition   |
|--------------------------------|--|
| DA.912.S.1.2:                  | Generate choreographic ideas through improvisation and physical brainstorming.   |
| DA.912.S.2.1:                  | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
|                                | Apply corrections and concepts from previously learned steps to different material to improve processing of new information.   |
| DA.912.S.2.2:                  | Clarifications:<br>e.g., repetition, revision, refinement, focus   |
| DA.912.S.2.4:                  | Demonstrate retention of directions, corrections, and memorization of dance from previous rehearsals and classes.  |
| DA.912.S.3.2:                  | Develop and maintain flexibility, strength, and stamina for wellness and performance.  |
|                                | Perform dance vocabulary with musicality and sensitivity.  |
| DA.912.S.3.4:                  | e.g., on the counts, fill the music, emulate musical nuance  |
|                                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:                  | Clarifications:<br>e.g., listening maps, active listening, checklists  |
| MU.912.C.2.2:                  | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:                  | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development  |
|                                | in music.  |
| WIU.912.F.1.2.                 | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions   |
| MII 912 F 2 2·                 | Clarifications:  |
| WI0.712.1.2.2.                 | e.g., community revitalization, industry choosing new locations, cultural and social enrichment  |
|                                | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of  |
| MU.912.F.3.1:                  | leadership in school and/or non-school settings.   |
| MU.912.F.3.2:                  | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.3:                  | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace. |
| MU.912.F.3.4:                  | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.    |
|                                | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1:                  | Clarifications:  |
|                                |  |
| MU.912.H.2.1:<br>MIL912 H 2 2: | Evaluate the social impact of music on specific historical periods.  |
| WI0.712.11.2.2.                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1:                  | Clarifications:  |
|                                | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied  |
|                                | meaning of the composer/performer.   |
| MU.912.O.3.1:                  | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration                                |
| MU.912.0.3.2:                  | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                                | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of  |
| MU 912 S 2 1·                  | music literature.  |
|                                | Clarifications:  |
| MU 012 6 2 2.                  | E.g., memorization, sequential process   |
| MU.912.5.2.2:<br>MIL912.5.3.4: | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques   |
|                                | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical  |
| LAFS.1112.RST.2.4:             | context relevant to grades 11–12 texts and topics.   |
|                                | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–  |
|                                | a. Come to discussions prepared, having read and researched material under study: explicitly draw on that preparation by referring to evidence from  |
|                                | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.   |
|                                | b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as  |
| LAFS.1112.SL.1.1:              | needed.  |
|                                | c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a   |
|                                | topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.  |
|                                | when possible; and determine what additional information or research is required to deepen the investigation or complete the task.   |
|                                | Standard Dalation to Courses Supporting  |
|                                | Standard Relation to Course: Supporting  |
| LAFS.1112.SL.1.2:              | decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.  |
| LAFS 1112 SL 1 3               | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points  |
|                                | of emphasis, and tone used.  |
| 1                              | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning,  |

| LAFS.1112.SL.2.4:   | alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience,<br>and a range of formal and informal tasks.   |
|---------------------|--|
| LAFS.1112.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.  |
| LAFS.1112.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.   |
| LAFS.1112.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.   |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.  |
| MAFS.K12.MP.5.1:    | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. |
|                     | Standard Relation to Course: Supporting  |
| MAFS.K12.MP.6.1:    | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. Standard Relation to Course: Supporting  |
|                     | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:    | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                     | Standard Relation to Course: Supporting  |
| PE.912.C.2.2:       | Apply terminology and etiquette in dance.  |
|                     | Analyze the movement performance of self and others.   |
| PE.912.C.2.3:       | Clarifications:<br>Some examples are video analysis and checklist.   |
| PE.912.C.2.5:       | Analyze the relationship between music and dance.  |
| ELD.K12.ELL.SI.1:   | English language learners communicate for social and instructional purposes within the school setting.   |

### VERSION DESCRIPTION

Student dancers develop advanced skills in creating, performing, and evaluating choreographed performances as an independent ensemble and in cooperation with a music ensemble. Coursework focuses on dance, equipment manipulation, precision, and analysis of the relationship between music and dance. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

### GENERAL NOTES

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

### GENERAL INFORMATION

Course Number: 1305330

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Eurythmics > Abbreviated Title: EURHY 4 Course Length: Year (Y) Course Level: 2

# Eurhythmics 4 (#1305330) 2022 - And Beyond

| Name          | Description  |
|---------------|--|
| DA.912.C.1.2: | Apply replication, physical rehearsal, and cognitive rehearsal to aid in the mental and physical retention of patterns, complex steps, and sequences performed by another dancer.  |
|               | Clarifications:  |
|               | Develop and articulate criteria for use in critiguing dance, drawing on background knowledge and personal experience, to show independence in one's  |
|               | response.  |
| DA.912.C.1.3: | Clarifications:<br>e.g., journal entries, discussion   |
| DA.912.C.1.4: | Weigh and discuss the personal significance of using both physical and cognitive rehearsal over time to strengthen one's own retention of patterns, complex steps, and sequences for rehearsal and performance.                |
|               | Analyze movement from varying perspectives and experiment with a variety of creative solutions to solve technical or choreographic challenges.   |
| DA.912.C.2.1: | Clarifications:<br>e.g., improvisation, trial and error, collaboration   |
|               | Make informed critical assessments of the quality and effectiveness of one's own technique and performance quality, based on criteria developed from a variety of sources, to support personal competence and artistic growth. |
| DA.912.C.2.2: | Clarifications:<br>e.g., exemplary models, critical processes, background knowledge, experience, self-assessment, constructive criticism, comparison to other works  |
| DA.912.C.2.3: | Develop a plan to improve technique, performance quality, and/or compositional work with artistic intent.  |
| DA.912.C.2.4: | Evaluate nuances of movement and their relationship to style, choreographic elements, and/or other dancers, and apply this knowledge to alter personal performance.  |
|               | Critique the quality and effectiveness of performances based on exemplary models and self-established criteria.  |
| DA.912.C.3.1: | Clarifications:  |
|               | e.g., use of movements, elements, principles of design, lighting, costumes, music  |
|               | Assess artistic or personal challenges, holistically and in parts, to explore and weigh potential solutions to problems in technique or composition.   |
| DA.912.C.3.2: | Clarifications:<br>e.g., time management, refining dance steps, research   |
| DA.912.F.1.3: | Employ acquired knowledge to stimulate creative risk-taking and broaden one's own dance technique, performance, and choreography.  |
|               | Investigate and report potential careers, requirements for employment, markets, potential salaries, and the degree of competition in dance and   |
| DA.912.F.2.1: |  |
|               | e.g., dancer, teacher, artistic director, stage manager, videographer, costumer, agent, Pilates teacher, dance therapist, nutritionist   |
| DA.912.F.3.1: | Demonstrate leadership and responsibility through designing choreography, planning rehearsals, or directing a dance piece.   |
|               | Synthesize information and make use of a variety of experiences and resources from outside dance class to inform and inspire one's work as a dancer.   |
| DA.912.F.3.2: | Clarifications:<br>e.g., private studio work, school subjects, athletics, outside interests, news, personal life, music, poetry, environment   |
|               | Practice conditioning methods that complement the physical instrument, and determine the degree of personal improvement in established dance techniques.   |
| DA.912.F.3.6: | Clarifications:<br>e.g., Feldenkrais, Bartenieff, Pilates, yoga, cardio routines   |
| DA.912.F.3.8: | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
| DA.912.H.1.1: | Explore and select music from a broad range of cultures to accompany, support, and/or inspire choreography.  |
| DA.912.H.1.2: | Study dance works created by artists of diverse backgrounds, and use their work as inspiration for performance or creating new works.  |
| DA.912.H.1.3: | Adhere to copyright laws for choreography and music licensing to show respect for the intellectual property of others.   |
| DA.912.H.3.3: | Explain the importance of proper nutrition, injury prevention, and safe practices to optimal performance and the life-long health of a dancer.   |
| DA.912.0.1.2: | Clarifications:<br>e.g., appropriate attire, professional respect, traditions, procedures  |
| DA.912.O.1.5: | Construct a dance that uses specific choreographic structures to express an idea and show understanding of continuity and framework.   |
|               | Clarifications:<br>e.g., ABA, ABCA, ABACA, narrative, motif, beginning-middle-end, motif manipulation  |
| DA.912.0.3.1: | Perform dance pieces to express feelings, ideas, cultural identity, music, and other abstract concepts through movements, steps, pantomime, and gestures.  |
| DA.912.0.3.2: | Use imagery, analogy, and metaphor to improve body alignment and/or enhance the quality of movements, steps, phrases, or dances.   |
|               | Synthesize a variety of choreographic principles and structures to create a dance.   |
| DA.912.S.1.1: | Clarifications:  |

|                                | e.g., unity, variety, contrast, repetition, transition  |
|--------------------------------|---|
| DA.912.S.1.2:                  | Generate choreographic ideas through improvisation and physical brainstorming.  |
| DA.912.S.2.1:                  | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
|                                | Apply corrections and concepts from previously learned steps to different material to improve processing of new information.  |
| DA.912.S.2.2:                  | Clarifications:<br>e.g., repetition, revision, refinement, focus  |
| DA.912.S.2.4:                  | Demonstrate retention of directions, corrections, and memorization of dance from previous rehearsals and classes.   |
| DA.912.S.3.2:                  | Develop and maintain flexibility, strength, and stamina for wellness and performance.   |
|                                | Perform dance vocabulary with musicality and sensitivity.   |
| DA.912.S.3.4:                  | Clarifications:<br>e.g., on the counts, fill the music, emulate musical nuance  |
|                                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:                  | Clarifications:<br>e.g., listening maps, active listening, checklists   |
| MU.912.C.2.2:                  | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.3.1:                  | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development   |
| MIL 912 F 1 2.                 | IN MUSIC.   |
| 10.712.1.1.2.                  | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.   |
| MU.912.F.2.2:                  | Clarifications:<br>e.g., community revitalization, industry choosing new locations, cultural and social enrichment  |
| MU.912.F.3.1:                  | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings   |
| MU.912.F.3.2:                  | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.   |
| MU.912.F.3.3:                  | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace |
| MU.912.F.3.4:                  | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.   |
|                                | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:                  | Clarifications:<br>e.g., patriotic, folk, celebration, entertainment, spiritual   |
| MU.912.H.2.1:                  | Evaluate the social impact of music on specific historical periods.   |
| MU.912.H.2.2:                  | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.   |
|                                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.O.1.1:                  | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
|                                | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.                  |
| MU.912.O.3.1:                  | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration                               |
| MU.912.0.3.2:                  | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                                | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of   |
| MU.912.S.2.1:                  | Clarifications:   |
| MU 012 5 2 2                   | E.g., memorization, sequential process  |
| MU.912.S.2.2:<br>MU.912.S.3.4: | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                                | Mathematicians who participate in effortful learning both individually and with others:   |
|                                | Analyze the problem in a way that makes sense given the task.   |
|                                | <ul> <li>Ask questions that will help with solving the task.</li> <li>Duild personance by modifying methods as peeded while achieve a shellenging task.</li> </ul>                                      |
|                                | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>              |
|                                | Help and support each other when attempting a new method or approach.   |
| MA.K12.MTR.1.1:                | Clarifications:   |
|                                | Teachers who encourage students to participate actively in effortful learning both individually and with others:  |
|                                | <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Easter perseverance in students by choosing tasks that are challenging.</li> </ul>  |
|                                | <ul> <li>Develop students' ability to analyze and problem solve.</li> </ul>   |
|                                | Recognize students' effort when solving challenging problems.   |
|                                | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
|                                | Build understanding through modeling and using manipulatives  |
|                                | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> </ul>   |
|                                | Progress from modeling problems with objects and drawings to using algorithms and equations.  |

| MA.K12.MTR.2.1: | Express connections between concepts and representations.     Choose a representation based on the given context or purpose   |
|-----------------|---|
|                 |   |
|                 | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                 | Help students make connections between concepts and representations.  |
|                 | Provide opportunities for students to use manipulatives when investigating concepts.  |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.  |
|                 | Show students that various representations can have different purposes and can be useful in different situations.   |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:   |
|                 | Select efficient and appropriate methods for solving problems within the given context.   |
|                 | Maintain flexibility and accuracy while performing procedures and mental calculations.  |
|                 | Complete tasks accurately and with confidence.  |
| MA.K12.MTR.3.1: | Adapt procedures to apply them to a new context.  |
|                 | Use reedback to improve efficiency when performing calculations:  |
|                 | Teachers who encourage students to complete tasks with mathematical fluency:  |
|                 | • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.  |
|                 | Offer multiple opportunities for students to practice efficient and generalizable methods.  |
|                 | Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |
|                 | Communicate mathematical ideas, vocabulary and methods effectively.   |
|                 | Analyze the mathematical thinking of others.  |
|                 | Compare the efficiency of a method to those expressed by others.  |
|                 | Recognize errors and suggest how to correctly solve the task.   |
| MA.K12.MTR.4.1: | Justify results by explaining methods and processes.     Construct possible arguments based on evidence   |
|                 | Clarifications:   |
|                 | Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:  |
|                 | • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.   |
|                 | Create opportunities for students to discuss their thinking with peers.   |
|                 | <ul> <li>Select, sequence and present student work to advance and deepen understanding or correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
|                 | Use patterns and structure to help understand and connect mathematical concepts.  |
|                 | Mathematicians who use patterns and structure to help understand and connect mathematical concepts:   |
|                 | Focus on relevant details within a problem.   |
|                 | Create plans and procedures to logically order events, steps or ideas to solve problems.  |
|                 | Decompose a complex problem into manageable parts.     Relate previously learned concepts to new concepts   |
|                 | <ul> <li>Look for similarities among problems.</li> </ul>   |
| MA.K12.MTR.5.1: | Connect solutions of problems to more complicated large-scale situations.   |
|                 | Clarifications:   |
|                 | Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:   |
|                 | <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> </ul>                         |
|                 | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> </ul>  |
|                 | • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.   |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:   |
|                 | Estimate to discover possible solutions.  |
|                 | Use benchmark quantities to determine if a solution makes sense.  |
|                 | Check calculations when solving problems.   |
|                 | Verify possible solutions by explaining the methods used.   |
| MA.K12.MTR.6.1: | Evaluate results based on the given context.  |
|                 | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:   |
|                 | Have students estimate or predict solutions prior to solving.   |
|                 | Prompt students to continually ask, "Does this solution make sense? How do you know?"   |
|                 | Reinforce that students check their work as they progress within and after a task.  |
|                 | Strengthen students' ability to verify solutions through justifications.  |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
|                 | Connect mathematical concents to everyday experiences   |
|                 | Idea medias and methods to understand consected and solve problems  |

|                   | Perform investigations to gather data or determine if a method is appropriate.     Redesign models and methods to improve accuracy or efficiency.   |
|-------------------|---|
| MA.K12.MTR.7.1:   | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>                    |
|                   | Cite evidence to explain and justify reasoning.   |
|                   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| PE.912.C.2.2:     | Apply terminology and etiquette in dance.   |
|                   | Analyze the movement performance of self and others.  |
| PE.912.C.2.3:     | Clarifications:<br>Some examples are video analysis and checklist.  |
| PE.912.C.2.5:     | Analyze the relationship between music and dance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

Student dancers develop advanced skills in creating, performing, and evaluating choreographed performances as an independent ensemble and in cooperation with a music ensemble. Coursework focuses on dance, equipment manipulation, precision, and analysis of the relationship between music and dance. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

### GENERAL NOTES

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

### GENERAL INFORMATION

Course Number: 1305330

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Eurythmics > Abbreviated Title: EURHY 4 Course Length: Year (Y) Course Level: 2

# Music Ensemble 1 (#1305400) 2020 - 2022 (current)

| Name               | Description  |
|--------------------|--|
|                    | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:      | Clarifications:  |
|                    | e.g., listening maps, active listening, checklists   |
| MU 912 C 2 1·      | Evaluate and make appropriate adjustments to personal performance in solo and ensembles  |
| MU.912.C.2.2:      | Evaluate and make appropriate adjustmente to performances.   |
|                    | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development  |
| MU.912.C.3.1:      | in music.  |
| MU.912.F.3.2:      | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.H.1.5:      | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.4:      | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
| MU.912.0.3.2:      | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                    | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:      | Clarifications:  |
|                    | e.g., texture, mode, form, tempo, voicing  |
| MU.912.S.2.2:      | Transfer expressive elements and performance techniques from one piece of music to another.  |
|                    | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and  |
| MU.912.5.3.1:      | kinesthetic energy.  |
|                    | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:      | Clarifications:  |
|                    | e.g., musical elements, expressive qualities, performance technique  |
|                    | Develop and demonstrate proper vocal or instrumental technique   |
| MU 012 S 2 5.      | Clarifications:  |
| WIU.912.3.3.5.     | e a posture breathing fingering embouchure how technique tuning strumming  |
|                    |  |
| LAFS.910.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.  |
|                    | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. |
|                    | a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from  |
|                    | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.   |
|                    | b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of   |
| LAFS.910.SL.1.1:   | alternate views), clear goals and deadlines, and individual roles as needed.   |
|                    | c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively   |
|                    | incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.   |
|                    | d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their   |
|                    | own views and understanding and make new connections in light of the evidence and reasoning presented.   |
|                    | Standard Relation to Course: Supporting  |
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.   |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.  |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the  |
|                    | organization, development, substance, and style are appropriate to purpose, audience, and task.  |
| LAFS.910.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.  |
| LAFS.910.WHS1.2.4: | Produce clear and concrent writing in which the development, organization, and style are appropriate to task, purpose, and audience.   |
| LAFS.910.WHS1.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.  |
|                    | Use appropriate tools strategically.   |
|                    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper  |
|                    | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.   |
|                    | Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools  |
| MAES K12 MD 5 1.   | might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze   |
| MAF5.K12.MP.5.1:   | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other   |
|                    | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying   |
|                    | assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify  |
|                    | terevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts                                     |
|                    | Standard Relation to Course: Supporting  |
|                    | Attend to precision.   |
|                    |  |

| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. <b>Standard Relation to Course: Supporting</b>   |
|-------------------|--|
|                   | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in   |
|                   | the work environment.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students with little or no experience in a vocal or instrumental ensemble develop basic musicianship and ensemble performance skills through the study of basic, high-quality music in diverse styles. Student musicians focus on building foundational music techniques, music literacy, listening skills, and aesthetic awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

### GENERAL NOTES

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|                             | Maintain flexibility and accuracy while performing procedures and mental calculations.  |
|                             | Complete tasks accurately and with confidence.  |
|                             | Adapt procedures to apply them to a new context.  |
| WA.NTZ.WITK.3.1:            | Use feedback to improve efficiency when performing calculations.  |
|                             | Clarifications:   |

|                 | <ul> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>  |
|-----------------|---|
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> <li>Clarifications: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> </li> </ul>                                |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br><b>Clarifications:</b><br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.<br>• Develop <b>students' ability to construct relationships between their current</b> understanding and more sophisticated ways of thinking. |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through justifications.  |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.<br>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly<br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide<br>referenced by the instructor.  |

|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|-------------------|---|
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
| ELA.K12.EE.3.1:   | Make inferences to support comprehension.   |
|                   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students |
|                   | build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.  |
|                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

Students with little or no experience in a vocal or instrumental ensemble develop basic musicianship and ensemble performance skills through the study of basic, high-quality music in diverse styles. Student musicians focus on building foundational music techniques, music literacy, listening skills, and aesthetic awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

### GENERAL NOTES

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

Course Number: 1305400

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: General Music > Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Abbreviated Title: MUSIC ENS 1 Course Length: Year (Y) Course Level: 2

### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12)

Instrumental Music (Elementary and Secondary Grades K-12)

# Music Ensemble 2 (#1305410) 2020 - 2022 (current)

| Name                      | Description  |
|---------------------------|--|
|                           | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:             | Clarifications:  |
|                           | e.g., listening maps, active listening, checklists   |
| MU.912.C.2.1:             | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:             | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:             | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |
| MU.912.F.3.2:             | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.H.1.5:             | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.4:             | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|                           | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1:             | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
|                           | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.   |
| MU.912.0.3.1:             | Clarifications:  |
|                           | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration  |
| MU.912.0.3.2:             | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                           | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:             | Clarifications:  |
|                           | e.g., texture, mode, form, tempo, voicing  |
|                           | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature   |
| MU.912.S.2.1:             | Clarifications   |
|                           | e.g., memorization, sequential process   |
| MU 912 S 2 2 <sup>.</sup> | Transfer expressive elements and performance techniques from one piece of music to another   |
| 110.712.0.2.2.            | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and  |
| MU.912.S.3.1:             | kinesthetic energy.  |
|                           | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:             | Clarifications:  |
|                           | e.g., musical elements, expressive qualities, performance technique  |
|                           | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:             | Clarifications:  |
|                           | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                           | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical  |
| LAFS.910.RST.2.4:         | context relevant to grades 9–10 texts and topics.  |
|                           | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. |
|                           | a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from  |
|                           | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.   |
|                           | b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of   |
| LAFS.910.SL.1.1:          | alternate views), clear goals and deadlines, and individual roles as needed.   |
|                           | c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively   |
|                           | incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.   |
|                           | a. Respond thoughtnung to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, quality of justify their own views and understanding and make new connections in light of the evidence and reasoning presented                |
|                           | own views and analistanding and make new connections in light of the evidence and reasoning presented.   |
|                           | Standard Relation to Course: Supporting  |
| LAFS.910.SL.1.2:          | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.   |
| LAFS.910.SL.1.3:          | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.  |
| LAFS.910.SL.2.4:          | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the<br>organization, development, substance, and style are appropriate to purpose, audience, and task.           |
| LAFS.910.SL.2.6:          | Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.  |
| LAFS.910.WHST.2.4:        | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.   |
| LAFS.910.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.  |
|--------------------|---|
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:   | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.<br>Standard Relation to Course: Supporting |
|                    | Attend to precision.  |
| MAFS.K12.MP.6.1:   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                    | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:   | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                    | Standard Relation to Course: Supporting   |
| DA.912.S.2.1:      | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| DA.912.S.3.8:      | Articulate and apply a stylistically appropriate sense of line to enhance artistry in one or more dance forms. Clarifications: e.g., arabesque, lateral T, jazz hands   |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students with previous vocal or instrumental ensemble experience continue building musicianship and performance skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant musical styles and time periods. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

# Music Ensemble 2 (#1305410) 2022 - And Beyond

| Name                   | Description   |
|------------------------|---|
|                        | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:          | Clarifications:   |
|                        | e.g., listening maps, active listening, checklists  |
| MU.912.C.2.1:          | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:          | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.3.1:          | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.   |
| MU.912.F.3.2:          | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.   |
| MU.912.H.1.5:          | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.4:          | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
| MU.912.0.1.1:          | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  Clarifications: e.g., rhythm, melody, timbre, form, tonality, barmony, texture: solo, chamber ensemble, large ensemble, |
|                        | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer   |
| MU.912.O.3.1:          | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration   |
| MU.912.0.3.2:          | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                        | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:          | Clarifications:<br>e.g., texture, mode, form, tempo, voicing  |
|                        | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   |
| MU.912.S.2.1:          | Clarifications:<br>e.g., memorization, sequential process   |
| MU.912.S.2.2:          | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:          | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
|                        | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:          | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
|                        | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:          | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                        | Mathematicians who participate in effortful learning both individually and with others:   |
|                        | Analyze the problem in a way that makes sense given the task.   |
|                        | Ask questions that will help with solving the task.   |
|                        | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> </ul>   |
|                        | Stay engaged and maintain a positive mindset when working to solve tasks.   |
| MA.K12.MTR.1.1:        | Help and support each other when attempting a new method or approach.   |
| WP3. N 12. WH N. L. L. | Clarifications:   |
|                        | Learners who encourage students to participate actively in effortful learning both individually and with others:  |
|                        | <ul> <li>Foster perseverance in students by choosing tasks that are challenging</li> </ul>  |
|                        | <ul> <li>Develop students' ability to analyze and problem solve.</li> </ul>   |
|                        | <ul> <li>Recognize students' effort when solving challenging problems.</li> </ul>   |
|                        | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
|                        | Duild understanding through modeling and using manipulatives  |
|                        | Build understanding through modeling and using manipulatives.      Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations   |
|                        | Progress from modeling problems with objects and drawings to using algorithms and equations   |
|                        | Express connections between concepts and representations  |
| MA.K12.MTR.2.1:        | Choose a representation based on the given context or purpose.  |
|                        | Clarifications:   |
|                        | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |

|                 | <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> </ul>  |
|-----------------|---|
|                 | Show students that various representations can have different purposes and can be useful in different situations.   |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:   |
| MA.K12.MTR.3.1: | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve officiency when performing calculations.</li> </ul>   |
|                 | <ul> <li>Ose recuback to improve enclosely when performing calculations.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul> </li> </ul>  |
| MA.K12.MTR.4.1: | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:<br>Communicate mathematical ideas, vocabulary and methods effectively.<br>Analyze the mathematical thinking of others.<br>Compare the efficiency of a method to those expressed by others.<br>Recognize errors and suggest how to correctly solve the task.<br>Justify results by explaining methods and processes.<br>Construct possible arguments based on evidence.<br>Clarifications:<br>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:<br>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.<br>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.<br>Develop students' ability to justify methods and compare their responses to the responses of their peers.<br>Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>Focus on relevant details within a problem.<br>Create plans and procedures to logically order events, steps or ideas to solve problems.<br>Decompose a complex problem into manageable parts. |
| MA.K12.MTR.5.1: | <ul> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems. <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li></ul></li></ul>   |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through iustifications.  |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications:         <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> </ul> </li> </ul>  |

| 1                 | Challenge students to question the accuracy of their models and methods.  |
|-------------------|---|
|                   | <ul> <li>Support students as they validate conclusions by comparing them to the given situation.</li> </ul>   |
|                   | Indicate how various concepts can be applied to other disciplines.  |
|                   | Cite evidence to explain and justify reasoning.   |
| ELA.K12.EE.1.1:   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
|                   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
|                   | Articulate and apply a stylistically appropriate sense of line to enhance artistry in one or more dance forms.  |
| DA.912.S.3.8:     | Clarifications:<br>e.g., arabesque, lateral T, jazz hands   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students with previous vocal or instrumental ensemble experience continue building musicianship and performance skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant musical styles and time periods. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

Course Number: 1305410

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: General Music > Abbreviated Title: MUSIC ENS 2 Course Length: Year (Y) Course Level: 2

# Music Ensemble 3 (#1305420) 2020 - 2022 (current)

| Name            | Description  |
|-----------------|--|
| MU.912.C.1.1:   | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
|                 | Clarifications:  |
|                 | e.g., listening maps, active listening, checklists   |
|                 | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                                 |
|                 | composer's intent.   |
| MU.912.C.1.2:   | Clarifications:  |
|                 | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:   | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development                      |
|                 | in music.  |
|                 | Design or refine a resume for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training               |
| MU.912.F.2.1:   |  |
|                 | Clarifications:  |
|                 |  |
|                 | compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.  |
| MU.912.F.2.3:   | Clarifications:  |
|                 | e.g., leadership, mancial needs and structure, marketing, personner matters, manager, traver   |
| MU.912.F.3.1:   | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of                      |
|                 | seadership in school and/or hon-school settings.   |
| MU.912.F.3.2:   | technology.  |
|                 | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,                  |
| MU.912.F.3.3:   | demonstrating skills for use in the workplace.   |
|                 | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:   | Clarifications:  |
|                 | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU.912.H.1.5:   | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.4:   | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|                 | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1:   | Clarifications:  |
|                 | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
| MU.912.0.2.1:   | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
|                 | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied                        |
|                 | meaning of the composer/performer.   |
| MU.912.0.3.1:   | Clarifications:  |
|                 | e.g., tempo markings, expression markings, articulation markings, prirasing, scales, modes, narmonic structure, timbre choice, mythim, orchestration                       |
| MU 012 O 2 2    | Interpret and perform expressive elements indicated by the musical score and/or conductor  |
| WIU.912.0.3.2.  | Arrange a musical work by manipulating two or more aspects of the composition  |
| MU 012 \$ 1 2.  |  |
| 10.912.3.1.3.   | e.a., texture, mode, form, tempo, voicing  |
|                 | Perform and notate, independently and accurately, melodies by ear  |
| MU 010 C 1 4.   |  |
| MU.912.5.1.4:   | clarifications:  |
|                 |  |
|                 | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature |
| MU.912.S.2.1:   |  |
|                 | e.g., memorization, sequential process   |
| MU 012 S 2 2    | Transfer expressive elements and performance techniques from one piece of music to another   |
| 1910.712.3.2.2. | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and                |
| MU.912.S.3.1:   | kinesthetic energy.  |
|                 | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:   | Clarifications:  |
|                 | e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |

|                     | Develop and demonstrate proper vocal or instrumental technique.   |
|---------------------|---|
| MU.912.S.3.5:       | Clarifications:   |
|                     | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| LAFS.1112.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.  |
| LAFS.1112.SL.1.1:   | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li> </ul> |
|                     | Standard Relation to Course: Supporting   |
| LAFS.1112.SL.1.2:   | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.   |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.   |
| LAFS.1112.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.   |
| LAFS.1112.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.1112.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or<br>broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.   |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.                    |
|                     | Attend to precision.  |
| MAFS.K12.MP.6.1:    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                     | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:    | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x<br>– y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                     | Standard Relation to Course: Supporting   |
| DA.912.F.3.8:       | the work environment.   |
| DA.912.S.2.1:       | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1:   | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students strengthen vocal or instrumental ensemble performance skills, music literacy, and analytical skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant history and cultures. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the

classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

# Music Ensemble 3 (#1305420) 2022 - And Beyond

| Name            | Description  |
|-----------------|--|
| MU.912.C.1.1:   | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
|                 | Clarifications:  |
|                 | e.g., listening maps, active listening, checklists   |
|                 | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the   |
|                 | composer's intent.   |
| MU.912.C.1.2:   | Clarifications:  |
|                 | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.   |
| MII 912 C 3 1·  | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development  |
| 10.712.0.0.1.   | in music.  |
|                 | Design or refine a resume for application to higher education or the workforce that highlights marketable skills and knowledge gained through music  |
| MU.912.F.2.1:   |  |
|                 | Clarifications:  |
|                 |  |
|                 | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.  |
| MU.912.F.2.3:   | Clarifications:  |
|                 | e.g., readership, hinancial needs and structure, marketing, personner marters, manager, traver   |
| MU.912.F.3.1:   | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings. |
|                 | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and  |
| MU.912.F.3.2:   | technology.  |
| MIL 912 F 3 3·  | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,  |
| 10.712.1.3.3.   | demonstrating skills for use in the workplace.   |
|                 | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:   | Clarifications:  |
|                 | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU.912.H.1.5:   | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.4:   | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|                 | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1:   | Clarifications:  |
|                 |  |
| MU.912.0.2.1:   | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
|                 | meaning of the composer/performer.   |
| MU 912 O 3 1·   | Clarifications:  |
|                 | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,  |
|                 | orchestration  |
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                 | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:   | Clarifications:  |
|                 | e.g., texture, mode, form, tempo, voicing  |
|                 | Perform and notate, independently and accurately, melodies by ear.   |
| MU.912.S.1.4:   | Clarifications:  |
|                 | e.g., singing, playing, writing  |
|                 | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of  |
| MU 010 5 0 1.   | music literature.  |
| WIU.912.3.2.1.  | Clarifications:  |
|                 | e.g., memorization, sequential process   |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and  |
|                 | kinestnetic energy.  |
| MU 010 C 2 0    | Signe-read music accurately and expressively to show synthesis of skills.  |
| IVIU.712.3.3.2: | e.g., musical elements, expressive gualities, performance technique  |
| MIL 012 C 2 4   | Applying and describe the effect of reheated sections and/or strategies on refinement of skills and techniques   |
| 1010.912.3.3.4: | Analyze and describe the effect of refleatsal sessions and/or strategies of refinement of skills and techniques.   |

|                 | Develop and demonstrate proper vocal or instrumental technique.  |
|-----------------|--|
| MU.912.S.3.5:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others: <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> </li> <li>Clarifications: <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul> </li> </ul>  |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> <li>Clarifications:</li> <li>Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul> </li> </ul>   |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li></ul>   |

|                 | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>  |
|-----------------|--|
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
|                 | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
|                 | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         Have students estimate or predict solutions prior to solving.         Prompt students to continually ask, "Does this solution make sense? How do you know?"         Reinforce that students check their work as they progress within and after a task.         Strengthen students' ability to verify solutions through justifications.   |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |
| MA.K12.MTR.7.1: | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul> |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.   |
|                 | <ul> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> </ul>  |
|                 | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently.  Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.3.1: | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                 | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1: | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |
|                 | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                 | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1: | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
| ELA.K12.EE.6.1: | Use appropriate voice and tone when speaking or writing.   |
|                 | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.F.3.8:   | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment  |
| DA.912.S.2.1:   | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |

## VERSION DESCRIPTION

Students strengthen vocal or instrumental ensemble performance skills, music literacy, and analytical skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant history and cultures. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

| MU.912.C.2.1: | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |  |
| MU.912.C.2.2: | Evaluate performance quality in recorded and/or live performances.   |  |
| MU.912.C.3.1: | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |  |
| MU.912.F.1.1: | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.  |  |
|               | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training.  |  |
| MU.912.F.2.1: | Clarifications:  |  |
|               | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills  |  |
|               | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.  |  |
| MU.912.F.2.2: | Clarifications:<br>e.g., community revitalization, industry choosing new locations, cultural and social enrichment   |  |
|               | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.  |  |
| MU.912.F.2.3: | Clarifications:<br>e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel  |  |
| MU.912.F.3.1: | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.   |  |
| MU.912.F.3.2: | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |  |
| MU.912.F.3.3: | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace. |  |
| MU.912.F.3.4: | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.    |  |
|               | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |  |
| MU.912.H.1.2: | Clarifications:<br>e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |  |
|               | Compare two or more works of a composer across performance media.  |  |
| MU.912.H.1.3: | Clarifications:<br>e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |  |
| MU.912.H.1.5: | Analyze music within cultures to gain understanding of authentic performance practices.  |  |
| MU.912.H.2.1: | Evaluate the social impact of music on specific historical periods.  |  |
| MU.912.H.2.2: | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.  |  |
| MU.912.H.2.4: | Examine the effects of developing technology on composition, performance, and acquisition of music.  |  |
|               | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |  |
| MU.912.O.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |  |
| MU.912.0.2.1: | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |  |
|               | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.                   |  |
| MU.912.O.3.1: | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration                                |  |
| MU.912.O.3.2: | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |  |
|               | Arrange a musical work by manipulating two or more aspects of the composition.   |  |
| MU.912.S.1.3: | Clarifications:<br>e.g., texture, mode, form, tempo, voicing   |  |
|               | Perform and notate, independently and accurately, melodies by ear.   |  |
| MU.912.S.1.4: | Clarifications:<br>e.g., singing, playing, writing   |  |
|               |  |  |

|   | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |  |
|---|--|--|
| MU.912.S.2.1:                           | Clarifications:<br>e.g., memorization, sequential process  |  |
| MU.912.S.2.2:                           | Transfer expressive elements and performance techniques from one piece of music to another.  |  |
| MU.912.S.3.1:                           | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |  |
|   | Sight-read music accurately and expressively to show synthesis of skills.  |  |
| MU.912.S.3.2:                           | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |  |
| MU.912.S.3.4:                           | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |  |
| MU.912.S.3.5:                           | Develop and demonstrate proper vocal or instrumental technique.  Clarifications: e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming,  |  |
| LAFS.1112.RST.2.4:                      | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.   |  |
| LAFS.1112.SL.1.1:                       | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li> </ul>  |  |
|   | Standard Relation to Course: Supporting  |  |
| LAFS.1112.SL.1.2:                       | decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.  |  |
| LAFS.1112.SL.1.3:                       | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.  |  |
| LAFS.1112.SL.2.4:                       | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.  |  |
| LAFS.1112.SL.2.6:                       | Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.  |  |
| LAFS.1112.WHST.2.4:                     | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.   |  |
| LAFS.1112.WHST.2.6:                     | Use technology, including the internet, to produce, publish, and update individual or shared writing products in response to ongoing reedback, including new arguments or information.   |  |
| LAFS.1112.WHST.3.7:                     | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.   |  |
| LAFS.TT12.WHS1.3.9:<br>MAFS.K12.MP.5.1: | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. Standard Relation to Course: Supporting |  |
| MAFS.K12.MP.6.1:                        | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. Standard Relation to Course: Supporting Look for and make use of structure.  |  |
| MAFS.K12.MP.7.1:                        | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting   |  |

| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in |
|-------------------|--|
|                   | the work environment.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students with extensive vocal or instrumental ensemble experience refine their critical listening, music literacy, and ensemble skills through the study, rehearsal, and performance of high-quality, advanced literature. Students use reflection and problem-solving skills with increasing independence to improve their performance and musical expression. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

# Music Ensemble 4 Honors (#1305430) 2022 - And Beyond

| Name          | Description  |  |
|---------------|--|--|
|               | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |  |
| MU.912.C.1.1: | Clarifications:  |  |
|               | e.g., listening maps, active listening, checklists   |  |
|               | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent.  |  |
| MU.912.C.1.2: | Clarifications:<br>e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title   |  |
| MU.912.C.2.1: | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |  |
| MU.912.C.2.2: | Evaluate performance quality in recorded and/or live performances.   |  |
| MU.912.C.3.1: | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |  |
| MU.912.F.1.1: | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.  |  |
|               | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training.  |  |
| MU.912.F.2.1: | Clarifications:  |  |
|               | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills  |  |
|               | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.  |  |
| MU.912.F.2.2: | Clarifications:<br>e.g., community revitalization, industry choosing new locations, cultural and social enrichment   |  |
|               | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.  |  |
| MU.912.F.2.3: | Clarifications:<br>e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel  |  |
| MU.912.F.3.1: | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.   |  |
| MU.912.F.3.2: | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |  |
| MU.912.F.3.3: | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace. |  |
| MU.912.F.3.4: | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.    |  |
|               | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |  |
| MU.912.H.1.2: | Clarifications:<br>e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |  |
|               | Compare two or more works of a composer across performance media.  |  |
| MU.912.H.1.3: | Clarifications:<br>e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |  |
| MU.912.H.1.5: | Analyze music within cultures to gain understanding of authentic performance practices.  |  |
| MU.912.H.2.1: | Evaluate the social impact of music on specific historical periods.  |  |
| MU.912.H.2.2: | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.  |  |
| MU.912.H.2.4: | Examine the effects of developing technology on composition, performance, and acquisition of music.  |  |
|               | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |  |
| MU.912.O.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |  |
| MU.912.0.2.1: | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |  |
|               | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.                   |  |
| MU.912.O.3.1: | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration                                |  |
| MU.912.O.3.2: | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |  |
|               | Arrange a musical work by manipulating two or more aspects of the composition.   |  |
| MU.912.S.1.3: | Clarifications:<br>e.g., texture, mode, form, tempo, voicing   |  |
|               | Perform and notate, independently and accurately, melodies by ear.   |  |
| MU.912.S.1.4: | Clarifications:<br>e.g., singing, playing, writing   |  |
|               |  |  |

|                 | music literature.  |  |
|-----------------|--|--|
| MU.912.S.2.1:   | Clarifications:  |  |
|                 | e.g., memorization, sequential process   |  |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.  |  |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, an   |  |
|                 | Sight-read music accurately and expressively to show synthesis of skills.  |  |
| MU.912.S.3.2:   | Clarifications:  |  |
|                 | e.g., musical elements, expressive qualities, performance technique  |  |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |  |
|                 | Develop and demonstrate proper vocal or instrumental technique.  |  |
| MU.912.S.3.5:   | Clarifications:  |  |
|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |  |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |  |
|                 | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> </ul>   |  |
|                 | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> </ul>  |  |
|                 | Stay engaged and maintain a positive mindset when working to solve tasks.  |  |
|                 | Help and support each other when attempting a new method or approach.  |  |
| MA.K12.MIR.1.1: | Clarifications:  |  |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |  |
|                 | Eoster perseverance in students by choosing tasks that are challenging.  |  |
|                 | <ul> <li>Develop students' ability to analyze and problem solve.</li> </ul>  |  |
|                 | Recognize students' effort when solving challenging problems.  |  |
|                 | Demonstrate understanding by representing problems in multiple ways.   |  |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways:  |  |
|                 | Build understanding through modeling and using manipulatives.  |  |
|                 | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.  |  |
|                 | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>   |  |
|                 | <ul> <li>Express connections between concepts and representations.</li> <li>Change a representation based on the given context or purpose</li> </ul>   |  |
| MA.K12.M1R.2.1: | Choose a representation based on the given context or purpose.   |  |
|                 | Clarifications:<br>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |  |
|                 | <ul> <li>Help students make connections between concepts and representations.</li> </ul>   |  |
|                 | Provide opportunities for students to use manipulatives when investigating concepts.   |  |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.   |  |
|                 | Show students that various representations can have different purposes and can be useful in different situations.  |  |
|                 | Complete tasks with mathematical fluency.  |  |
|                 |  |  |
|                 | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Meintein flowibility and accuracy while performing precedures and mental calculations.</li> </ul>  |  |
|                 | Complete tasks accurately and with confidence.   |  |
|                 | Adapt procedures to apply them to a new context.   |  |
| MA.K12.MTR.3.1: | Use feedback to improve efficiency when performing calculations.   |  |
|                 | Clarifications:  |  |
|                 | Teachers who encourage students to complete tasks with mathematical fluency:   |  |
|                 | <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> </ul> |  |
|                 | <ul> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>   |  |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others   |  |
|                 | Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |  |
|                 | Communicate mathematical ideas, vocabulary and methods effectively.  |  |
| MA.K12.MTR.4.1: | <ul> <li>Analyze the mathematical thinking of others.</li> </ul>   |  |
|                 | Compare the efficiency of a method to those expressed by others.   |  |
|                 | Recognize errors and suggest how to correctly solve the task.  |  |
|                 | Justify results by explaining methods and processes.   |  |
|                 | construct possible arguments based on evidence.  |  |
|                 | Clarifications:<br>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of colf and others   |  |
|                 | <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> </ul>  |  |
|                 | Create opportunities for students to discuss their thinking with peers.  |  |
|                 | • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.   |  |
|                 | Develop students' ability to justify methods and compare their responses to the responses of their peers.  |  |
|                 |  |  |

|                    | Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
|--------------------|--|
|                    | Focus on relevant details within a problem.  |
|                    | Create plans and procedures to logically order events, steps or ideas to solve problems.   |
|                    | Decompose a complex problem into manageable parts.   |
|                    | Relate previously learned concepts to new concepts.  |
|                    | Look for similarities among problems.  |
| MA.K12.MTR.5.1:    | Connect solutions of problems to more complicated large-scale situations.  |
|                    | Clarifications:  |
|                    | Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:  |
|                    | Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.   |
|                    | • Support students to develop generalizations based on the similarities found among problems.  |
|                    | Provide opportunities for students to create plans and procedures to solve problems.   |
|                    | • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
|                    | Assess the reasonableness of solutions.  |
|                    | Mathematicians who assess the reasonableness of solutions:   |
|                    | Ectimate to discover possible solutions  |
|                    | Use henchmark quantities to determine if a solution makes sense  |
|                    | Check calculations when solving problems.  |
|                    | <ul> <li>Verify possible solutions by explaining the methods used.</li> </ul>  |
| MA.K12.MTR.6.1:    | Evaluate results based on the given context.   |
|                    | Clarifications   |
|                    | Teachers who encourage students to assess the reasonableness of solutions:   |
|                    | <ul> <li>Have students estimate or predict solutions prior to solving.</li> </ul>  |
|                    | <ul> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> </ul>  |
|                    | Reinforce that students check their work as they progress within and after a task.   |
|                    | • Strengthen students' ability to verify solutions through justifications.   |
|                    | Apply mathematics to real-world contexts   |
|                    | Mathematicians who apply mathematics to real-world contexts:   |
|                    |  |
|                    | Connect mathematical concepts to everyday experiences.   |
|                    | <ul> <li>Use models and methods to understand, represent and solve problems.</li> <li>Deferm investigations to gather data as determine if a method is appropriate to Dedesign models and methods to improve accuracy or efficience</li> </ul> |
|                    | <ul> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficience</li> </ul>  |
| WIA.K 12.WITK.7.1: | Clarifications:  |
|                    | leachers who encourage students to apply mathematics to real-world contexts:   |
|                    | <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the assuracy of their models and methods.</li> </ul>                             |
|                    | <ul> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> </ul>  |
|                    | <ul> <li>Support students as they validate conclusions by comparing mem to the given studation.</li> <li>Indicate how various concents can be applied to other disciplines.</li> </ul>   |
|                    |  |
|                    | Cite evidence to explain and justify reasoning.  |
|                    | Clarifications:  |
|                    | K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details   |
|                    | from the text without naming the text. During 1st grade, students learn now to incorporate the evidence in their writing.  |
|                    | In 3rd grade, students should use a combination of direct and indirect citations   |
| ELA.K12.EE.1.1:    | g  |
|                    | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly  |
|                    | quoted, paraphrased, of used for information. When writing, students will use the form of citation dictated by the instructor of the style guide referenced by the instructor.   |
|                    | referenced by the instructor.  |
|                    | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                    | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                    |  |
|                    | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:    | Clarifications:  |
|                    | See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                    | Make inferences to support comprehension.  |
|                    | Clarifications:  |
| ELA.K12.EE.3.1:    | Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl  |
|                    | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and  |
|                    | beyond.  |
|                    | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
|                    | Clarifications:  |
|                    | In kindergarten, students learn to listen to one another respectfully.   |
|                    | In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The   |
| ELA.KIZ.EE.4.1:    | collaborative conversations are becoming academic conversations.   |
|                    | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students   |
|                    | build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                    |  |
|                    | Use the accepted rules governing a specific format to create guality work.   |

| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |  |
|-------------------|--|--|
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.  Clarifications: In kindergation and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends   |  |
|                   | differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |  |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |  |

## VERSION DESCRIPTION

Students with extensive vocal or instrumental ensemble experience refine their critical listening, music literacy, and ensemble skills through the study, rehearsal, and performance of high-quality, advanced literature. Students use reflection and problem-solving skills with increasing independence to improve their performance and musical expression. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## **GENERAL NOTES**

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Music Techniques 1 (#1305500) 2020 - 2022 (current)

| Name                   | Description  |
|------------------------|--|
|                        | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:          | Clarifications:  |
|                        | e.g., listening maps, active listening, checklists   |
| MU 912 C 2 1·          | Evaluate and make appropriate adjustments to personal performance in solo and ensembles  |
| MU.912.C.2.2:          | Evaluate and make appropriate adjustmente to performances.   |
|                        | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development  |
| MU.912.C.3.1:          | in music.  |
|                        | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,  |
| MU.912.F.3.3:          | demonstrating skills for use in the workplace.   |
| MU.912.0.2.1:          | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
| MU.912.0.3.2:          | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
| MU.912.S.2.2:          | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:          | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and  |
|                        | kinesthetic energy.  |
| MU.912.S.3.4:          | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                        | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:          | Clarifications:  |
|                        | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| LAFS.910.RST.2.4:      | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical  |
|                        | Listiate and participate offectively in a range of collaborative discussions (one on one in groups, and teacher led) with diverse partners on grades 0, 10   |
|                        | topics, texts, and issues, building on others' ideas and expressing their own clearly and nersuasively   |
|                        | a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from  |
|                        | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.   |
|                        | b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of   |
| LAFS 910 SL 1 1.       | alternate views), clear goals and deadlines, and individual roles as needed.   |
| EAI 3. 710.3E.1.1.     | c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively   |
|                        | incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.   |
|                        | d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their   |
|                        | own views and understanding and make new connections in light of the evidence and reasoning presented.   |
|                        | Standard Relation to Course: Supporting  |
|                        | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, guantitatively, orally) evaluating the credibility and  |
| LAFS.910.SL.1.2:       | accuracy of each source.   |
|                        | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted  |
| LAF5.910.5L.1.3:       | evidence.  |
| LAFS 910 SL 2 4        | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the  |
| EAT 0.710.0E.2.11      | organization, development, substance, and style are appropriate to purpose, audience, and task.  |
| LAFS.910.SL.2.6:       | Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.  |
| LAFS.910.WHST.2.4:     | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.   |
|                        | Use appropriate tools strategically.   |
|                        | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper  |
|                        | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.   |
|                        | Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools  |
| MAES K12 MP 5 1        | might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze   |
| WINT 0.1(12.1WH 10.11. | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other   |
|                        | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying   |
|                        | assumptions, explore consequences, and compare predictions with data. Mathematically proticient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use |
|                        | technological tools to explore and deepen their understanding of concepts  |
|                        | Standard Relation to Course: Supporting  |
|                        | Attend to precision.   |
|                        | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own  |
|                        | reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about  |
| MAFS.K12.MP.6.1:       | specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,  |
|                        | express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully  |
|                        | formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|                        | Standard Relation to Course: Supporting  |
|                        | Look for and make use of structure.  |
|                        | Mathematically proficient students look closely to discore a noticer or structure. Young students, for superstands to state that the   |
| 1                      | mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven  |

| MAFS.K12.MP.7.1:  | more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$ + 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x<br>– y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. |  |
|-------------------|---|--|
|                   | Standard Relation to Course: Supporting   |  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |  |

## VERSION DESCRIPTION

Students in this entry-level class focus on the development of musical and technical skills on a specific instrument or voice through etudes, scales, and selected music literature. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental class, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:   | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |
| MU.912.F.3.3:   | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.   |
| MU.912.0.2.1:   | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy   |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                 | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:   | Clarifications:  |
|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                 | Mathematicians who participate in effortful learning both individually and with others   |
|                 | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> </ul>  |
|                 | Ask questions that will help with solving the task.  |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.  |
|                 | Stay engaged and maintain a positive mindset when working to solve tasks.  |
|                 | Help and support each other when attempting a new method or approach.  |
| MA.K12.MTR.1.1: | Clarifications:  |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                 | Cultivate a community of growth mindset learners.  |
|                 | Foster perseverance in students by choosing tasks that are challenging.  |
|                 | Develop students' ability to analyze and problem solve.  |
|                 | Recognize students' effort when solving challenging problems.  |
|                 | Demonstrate understanding by representing problems in multiple ways.   |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                 | Build understanding through modeling and using manipulatives.  |
|                 | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> </ul>  |
|                 | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>   |
|                 | <ul> <li>Express connections between concepts and representations.</li> </ul>  |
| MA.K12.MTR.2.1: | Choose a representation based on the given context or purpose.   |
|                 | Clarifications:  |
|                 | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:  |
|                 | Help students make connections between concepts and representations.   |
|                 | <ul> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Cuide students from concepts to pictorial to obstrate representations on understanding programmed.</li> </ul>   |
|                 | <ul> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various corresponditions can have different purposes and can be useful in different cituations.</li> </ul>                 |
|                 | • Show students that various representations can have different purposes and can be useful in different studations.  |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.  |
|                 | Mathematicians who complete tasks with mathematical fluency:   |
|                 | Select efficient and appropriate methods for solving problems within the given context.  |
|                 | Maintain flexibility and accuracy while performing procedures and mental calculations.   |
|                 | Complete tasks accurately and with confidence.   |
|                 | Adapt procedures to apply them to a new context.   |
|                 | Use feedback to improve efficiency when performing calculations.   |
|                 | Clarifications:  |
|                 | Teachers who encourage students to complete tasks with mathematical fluency:   |
|                 | <ul> <li>Provide students with the relaxibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple expectively for students to prostice efficient and so yet lightly with allows.</li> </ul> |
|                 | Other multiple opportunities for students to practice efficient and generalizable methods.     Provide opportunities for students to reflect on the method they used and determine if a mere efficient method could have been used.                                |
|                 | <ul> <li>Frome opportunities for students to renect on the method they used and determine if a more encient method could have been used.</li> </ul>  |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.  |
|                 | mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |

| <ul> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul>  |  |
|--|--|
| <ul> <li>Makenaticians and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:         <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> </li> <li>Clarifications:         <ul> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts.</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> </ul> </li> </ul>  |  |
| Provide opportunities for students to create plans and procedures to solve problems.     Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking     Assess the reasonableness of solutions.     Mathematicians who assess the reasonableness of solutions:     Estimate to discover possible solutions.     Use benchmark quantities to determine if a solution makes sense.     Check calculations when solving problems.     Verify possible solutions by explaining the methods used.     Evaluate results based on the given context.     Clarifications:     Teachers who encourage students to assess the reasonableness of solutions:   |  |
| <ul> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>   |  |
| Mathematicians who apply mathematics to real-world contexts:   Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. Perform investigations to gather data or determine if a method is appropriate. MA.K12.MTR.7.1:  MA | y or efficiency                          |
| Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they re<br>In 3rd grade, students should use a combination of direct and indirect citations.<br>ELA.K12.EE.1.1:<br>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've dir<br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the s<br>referenced by the instructor.<br>6-8 Students continue with previous skills and use a style guide to create a proper citation.<br>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   | fer to it.<br>e <b>ctly</b><br>yle guide |
| Read and comprehend grade-level complex texts proficiently.         ELA.K12.EE.2.1:         Clarifications:         See Text Complexity for grade-level complexity bands and a text complexity rubric.         Make inferences to support comprehension  |  |

| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.               |  |  |
|-------------------|--|--|--|
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |  |  |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |  |  |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |  |  |
|                   | Use the accepted rules governing a specific format to create quality work.   |  |  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |  |  |
|                   | Use appropriate voice and tone when speaking or writing.   |  |  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |  |  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |  |  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |  |  |

## VERSION DESCRIPTION

Students in this entry-level class focus on the development of musical and technical skills on a specific instrument or voice through etudes, scales, and selected music literature. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental class, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

### GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf
