| LAFS.8.SL.1.3:        | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and   |
|                       | Identifying when irrelevant evidence is introduced.   |
| LAFS.8.SL.2.4:        | details; use appropriate eye contact, adequate volume, and clear pronunciation.   |
|                       | Use appropriate tools strategically.  |
|                       |   |
|                       | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,  |
|                       | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.  |
|                       | might be beloful recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze   |
| MAFS.K12.MP.5.1:      | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other  |
|                       | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying  |
|                       | assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify   |
|                       | relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use  |
|                       | technological tools to explore and deepen their understanding of concepts.  |
|                       | Attend to precision.  |
|                       |   |
|                       | Mathematically proticient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about |
| MAFS.K12.MP.6.1:      | specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently.   |
|                       | express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully   |
|                       | formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                       | Standard Relation to Course: Supporting   |
|                       | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:      | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven   |
|                       | more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,  |
|                       | students will see 7 $\times$ 8 equals the well remembered 7 $\times$ 5 + 7 $\times$ 3, in preparation for learning about the distributive property. In the expression x <sup>2</sup>  |
|                       | + 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and   |
|                       | can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see   |
|                       | complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2 = 5$ minute a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers y and y.        |
|                       | y) as a minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |
|                       | Standard Relation to Course: Supporting   |
| ELD.K12.ELL.SI.1:     | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students continue to build musicianship and performance skills through the study, rehearsal, and performance of increasingly challenging, high-quality vocal ensemble literature. Student musicians strengthen their techniques, ensemble skills, music literacy, and analytical skills as they study relevant history, cultures, and music genres. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1303120

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Choral Music > Abbreviated Title: M/J VOCAL ENS 3 Course Length: Year (Y) Course Level: 2

Course Status: Course Approved Grade Level(s): 6,7,8

#### **Educator Certifications**

Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12)

# M/J Vocal Ensemble 3 (#1303120) 2022 - And Beyond

| Name   | Description  |  |
|--|--|--|
|  | Develop strategies for listening to unfamiliar musical works.  |  |
| MU.68.C.1.1:   | Clarifications:<br>e.g., listening maps, active listening, checklists  |  |
|  | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |  |
| MU.68.C.1.2:   | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |  |
|  | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |  |
| MU.68.C.2.1:   | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm  |  |
|  | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.  |  |
| MU.68.C.2.2:   | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |  |
| MU.68.C.3.1:   | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |  |
|  | Describe how concert attendance can financially impact a community.  |  |
| MU.68.F.2.2:   | Clarifications:<br>e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants   |  |
|  | Describe how studying music can enhance citizenship, leadership, and global thinking.  |  |
| MU.68.F.3.1:   | Clarifications:<br>e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect  |  |
| MU.68.F.3.2:   | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |  |
| MU.68.H.1.1:   | Describe the functions of music from various cultures and time periods.  |  |
| MU.68.H.1.2:   | Identify the works of representative composers within a specific style or time period.   |  |
|  | Classify authentic stylistic features in music originating from various cultures.  |  |
| MU.68.H.1.4:   | Clarifications:<br>e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation,<br>aural/oral traditions, drumming patterns                                |  |
| MU.68.H.2.1:   | Describe the influence of historical events and periods on music composition and performance.  |  |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.   |  |
|  | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |  |
| MU.68.H.3.1:   | Clarifications:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural<br>connections and traditions, ceremonial music, sales and advertising, communication |  |
|  | Discuss how the absence of music would affect other content areas and contexts.  |  |
| MU.68.H.3.2:   | Clarifications:<br>e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays   |  |
|  | Compare performances of a musical work to identify artistic choices made by performers.  |  |
| MU.68.O.1.1: Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble |  |  |
|  | Demonstrate knowledge of major and minor tonalities through performance and composition.   |  |
| MU.68.O.2.2:   | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor  |  |
|  | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |  |
| MU.68.O.3.1:   | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |  |
| MU.68.O.3.2:   | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.  |  |
| MU.68.S.1.3:   | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |  |
| MU.68.S.1.4:   | Sing or play melodies by ear with support from the teacher and/or peers. Clarifications:   |  |
|  |  |  |
| MU.68.S.2.1:   | Perform music from memory to demonstrate knowledge of the musical structure.  Clarifications: e.g., basic themes, patterns, tonality, melody, harmony  |  |
| MIL 68 S 2 2   | Transfer performance techniques from familiar to unfamiliar pieces   |  |
| IVIU.00.3.2.2.   | manare performance techniques nom raminar to unraminar pieces.   |  |

|                 | Sing and/or play age-appropriate repertoire expressively.  |
|-----------------|--|
| MU.68.S.3.1:    | Clarifications:  |
|                 | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                 | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:    | Clarifications:  |
|                 | e.g., posture, breatning, fingering, embouchure, bow technique, tuning, strumming  |
|                 | Sight-read standard exercises and simple repertoire.   |
| MU.68.5.3.3:    | clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|                 | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:    | Clarifications:  |
|                 | e.g., error detection, interval reinforcement  |
|                 | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.   |
| MU.68.S.3.6:    | Clarifications:  |
|                 | Mathematicians who participate in offertful learning both individually and with others:  |
|                 | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> </ul>  |
|                 | • Ask questions that will help with solving the task.  |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.  |
|                 | Stay engaged and maintain a positive mindset when working to solve tasks.  |
| MA.K12.MTR.1.1: | Heip and support each other when attempting a new method or approach.  |
|                 | Clarifications:<br>Teachers who encourage students to participate actively in effortful learning both individually and with others:  |
|                 | Cultivate a community of growth mindset learners.  |
|                 | Foster perseverance in students by choosing tasks that are challenging.  |
|                 | Develop students' ability to analyze and problem solve.  |
|                 | Recognize students' effort when solving challenging problems.  |
|                 | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                 |  |
|                 | <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Penresent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> </ul>   |
|                 | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>   |
|                 | • Express connections between concepts and representations.  |
| MA.K12.MTR.2.1: | Choose a representation based on the given context or purpose.   |
|                 | Clarifications:  |
|                 | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:  |
|                 | <ul> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> </ul>   |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.   |
|                 | Show students that various representations can have different purposes and can be useful in different situations.  |
|                 | Complete tasks with mathematical fluency.  |
|                 | Mathematicians who complete tasks with mathematical fluency:   |
|                 | Select efficient and appropriate methods for solving problems within the given context.  |
|                 | Complete tasks accurately and with confidence.   |
|                 | <ul> <li>Adapt procedures to apply them to a new context.</li> </ul>   |
| MA.K12.MTR.3.1: | Use feedback to improve efficiency when performing calculations.   |
|                 | Clarifications:  |
|                 | Teachers who encourage students to complete tasks with mathematical fluency:   |
|                 | <ul> <li>Provide students with the nexibility to solve problems by selecting a procedure that allows them to solve enciently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> </ul>  |
|                 | <ul> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>   |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.  |
| MA.K12.MTR.4.1: | Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |
|                 | Communicate mathematical ideas, vocabulary and methods effectively.  |
|                 | Analyze the mathematical thinking of others.   |
|                 | Compare the efficiency of a method to those expressed by others.   |
|                 | <ul> <li>Vectorize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> </ul>  |
|                 | Construct possible arguments based on evidence.  |
|                 | Clarifications:  |
|                 | Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:   |
|                 | <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with poors.</li> </ul>   |
|                 | <ul> <li>Select, sequence and present students to advance and deepen understanding of correct and increasingly efficient methods</li> </ul>  |
|                 | supervised and acception acceptication accep |

|                 | <ul> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>  |  |
|-----------------|--|--|
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |  |
|                 | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> </ul>  |  |
|                 | Relate previously learned concepts to new concepts.  |  |
| MA.K12.MTR.5.1: | <ul> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul> |  |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |  |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |  |
| MA.KTZ.MTK.0.T: | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.         • Prompt students to continually ask, "Does this solution make sense? How do you know?"         • Reinforce that students check their work as they progress within and after a task.         • Strengthen students' ability to verify solutions through justifications.   |  |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |  |
|                 | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficience</li> </ul>   |  |
| MA.K12.MTR.7.1: | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |  |
|                 | Cite evidence to explain and justify reasoning.  |  |
| ELA.K12.EE.1.1: | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.  |  |
|                 | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |  |
|                 | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |  |
|                 | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |  |
|                 | Read and comprehend grade-level complex texts proficiently.  |  |
| ELA.K12.EE.2.1: | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |  |
| ELA.K12.EE.3.1: | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |  |
|                 | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |  |
| ELA.K12.EE.4.1: | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |  |
|                 | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students   |  |

|   | build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |  |
|---|---|--|
|   | Use the accepted rules governing a specific format to create quality work.  |  |
| ELA.K12.EE.5.1: Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills approprimust receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present do quality work. |   |  |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.  |  |
|   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. |  |
| ELD.K12.ELL.SI.1:   | English language learners communicate for social and instructional purposes within the school setting.  |  |

#### VERSION DESCRIPTION

Students continue to build musicianship and performance skills through the study, rehearsal, and performance of increasingly challenging, high-quality vocal ensemble literature. Student musicians strengthen their techniques, ensemble skills, music literacy, and analytical skills as they study relevant history, cultures, and music genres. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12)

# M/J Music Technology (#1303150) 2020 - 2022 (current)

| Name              | Description   |
|-------------------|---|
|                   | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.            |
| MU.68.C.2.1:      | Clarifications:   |
|                   | e.g., intonation, balance, blend, phrasing, rhythm  |
| MU 68 C 2 3       | Critique personal composition and/or improvisation, using simple criteria, to generate improvements with guidance from teachers and/or peers              |
| MU 68 F 1 1       | Create a composition and/or performance, using visual kinesthetic, digital, and/or acoustic means to manipulate musical elements                          |
|                   | Create an original composition that reflects various performances that use "traditional" and contemporary technologies                                    |
| MIL 69 E 1 2.     |   |
| 10.00.1.1.2.      | e.g., MIDL. Internet video resources, personal digital assistants, MP3 players, cell phones, digital recording, music software                            |
|                   |   |
|                   | Describe several routes a composition or performance could travel from creator to consumer.   |
| MU.68.F.2.1:      | Clarifications:   |
|                   | e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales                                 |
| MU.68.F.3.2:      | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.          |
|                   | Identify the tasks involved in the compositional process and discuss how the process might be applied in the work place.                                  |
| MU.68.F.3.3:      | Clarifications:   |
|                   | e.g., idea, development, editing, selling, revising, testing, presenting  |
|                   | Analyze how technology has changed the way music is created, performed, acquired, and experienced.  |
| MU.68.H.2.2:      | Clarifications:   |
|                   | e.g., from harpsichord to piano; from phonograph to CD  |
|                   | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration  |
|                   |   |
| MU.68.H.3.1:      | Clarifications:   |
|                   | connections and traditions, ceremonial music, sales and advertising, communication  |
|                   |   |
|                   | create a composition, manipulating musical elements and exploring the effects of those manipulations.   |
| MU.68.0.2.1:      | Clarifications:   |
|                   | e.g., using electronic or paper-and-pencil means to experiment with timbre, melody, rhythm, harmony, form, tonality                                       |
|                   | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.        |
| MU.68.0.3.1:      | Clarifications:   |
|                   | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration              |
|                   | Compose a short musical piece.  |
| MU.68.S.1.2:      | Clarifications:   |
|                   | e.g., using traditional, non-traditional, digital, or classroom instruments and/or voice  |
| MU 68 S 1 3       | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing  |
| MU.68.S.1.8:      | Demonstrate specified mixing and editing techniques using selected software and hardware.   |
|                   | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and   |
|                   | issues, building on others' ideas and expressing their own clearly.   |
|                   | a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic,     |
|                   | text, or issue to probe and reflect on ideas under discussion.  |
| LAFS.6.SL.1.1:    | b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.                                       |
|                   | c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under               |
|                   | discussion.   |
|                   | d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.                             |
|                   | Standard Relation to Course: Supporting   |
|                   | Interpret information presented in diverse media and formats (e.g., visually, guantitatively, orally) and explain how it contributes to a topic, text, or |
| LAFS.6.SL.1.2:    | issue under study.  |
| LAFS.6.SL.1.3:    | Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.            |
|                   | Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use      |
| LAI 3.0.3L.2.4.   | appropriate eye contact, adequate volume, and clear pronunciation.  |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical           |
|                   | context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.3.7: | Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional          |
|                   | related, rocused questions that allow for multiple avenues of exploration.  |
| LAP3.00.WH31.3.9  |   |
|                   | ose appropriate tools strategically.  |
|                   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper.          |
|                   | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.      |
|                   | Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools     |

| MAFS.K12.MP.5.1:  | might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze<br>graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other<br>mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying<br>assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify<br>relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use<br>technological tools to explore and deepen their understanding of concepts.<br><b>Standard Relation to Course: Supporting</b>   |
|-------------------|---|
| MAFS.K12.MP.6.1:  | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x<br>- y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students investigate the fundamental applications, tools, history, and aesthetics of music technology. Student musicians explore traditional, current, and emerging technologies, including personal devices; and use them to explore, capture, create, arrange, manipulate, reproduce, and distribute music. Public performances may serve as a resource for specific instructional goals. Students may be expected to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

#### GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1303150

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: Music Technology > Abbreviated Title: M/J MUSIC TECH Course Length: Year (Y) Course Level: 2

Course Status: Course Approved Grade Level(s): 6,7,8

|                          | Analyze how technology has changed the way music is created, performed, acquired, and experienced.   |
| MU 68 H 2 2 <sup>.</sup> | Clarifications:  |
| 110.00.11.2.2.           | e.g., from harpsichord to piano; from phonograph to CD   |
|                          |  |
|                          | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1:             | Clarifications:  |
|                          | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural                                      |
|                          | connections and traditions, ceremonial music, sales and advertising, communication   |
|                          | Create a composition, manipulating musical elements and exploring the effects of those manipulations.  |
| MU.68.0.2.1:             | Clarifications:  |
|                          | e.g., using electronic or paper-and-pencil means to experiment with timbre, melody, rhythm, harmony, form, tonality  |
|                          | Describe how the combination of instrumentation and contractive elements in a musical work can convey a specific theorem and and/or image                                      |
|                          | Describe now the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.                             |
| MU.68.0.3.1:             | Clarifications:  |
|                          | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration                                   |
|                          | Compose a short musical piece.   |
| MU.68.S.1.2:             | Clarifications:  |
|                          | e.g., using traditional, non-traditional, digital, or classroom instruments and/or voice   |
| MU.68.S.1.3:             | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
| MU 68 S 1 8              | Demonstrate specified mixing and editing techniques using selected software and hardware   |
| 10.00.0.1.0.             | Mathematicians who participate in effortful learning both individually and with others:  |
|                          | Analyze the problem in a way that makes sense given the task   |
|                          | Ask questions that will belo with solving the task   |
|                          | Build perseverance by modifying methods as needed while solving a challenging task   |
|                          | Stay engaged and maintain a positive mindset when working to solve tasks   |
|                          | Help and support each other when attempting a new method or approach   |
| MA.K12.MTR.1.1:          |  |
| WITH N 12 WITH 11 1 1    | Clarifications:  |
|                          | experience a community of accepted actively in erroritul learning both individually and with others:   |
|                          | <ul> <li>Cultivate a community of growth minuser realing tools that are challenging</li> <li>Easter persequences in students by chaosing tools that are challenging</li> </ul> |
|                          | <ul> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students/ shifts to persever and exchange setue.</li> </ul>                  |
|                          | Develop students ability to analyze and problem solve.   |
|                          | • Recognize students errort when solving challenging problems.   |
|                          | Demonstrate understanding by representing problems in multiple ways.   |
|                          | Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                          | Build understanding through modeling and using manipulatives.  |
|                          | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations   |
|                          | Progress from modeling problems with objects and drawings to using algorithms and equations  |
|                          | Express connections between concepts and representations   |
| MA K12 MTD 2 1.          | Choose a representation based on the given context or purpose  |
| WART2.WITK.2.1.          | e tre t  |
|                          | Clarifications:  |
|                          | reachers who encourage students to demonstrate understanding by representing problems in multiple ways:  |
|                          | <ul> <li>help students make connections between concepts and representations.</li> </ul>   |

|                 | <ul> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
|-----------------|--|
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>• Select efficient and appropriate methods for solving problems within the given context.<br>• Maintain flexibility and accuracy while performing procedures and mental calculations.<br>• Complete tasks accurately and with confidence.<br>• Adapt procedures to apply them to a new context.<br>• Use feedback to improve efficiency when performing calculations.<br><b>Clarifications:</b><br>Teachers who encourage students to complete tasks with mathematical fluency:<br>• Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>• Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts. <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li></ul>                            |
| MA.K12.MTR.6.1: | <ul> <li>Assess the reasonableness of solutions.</li> <li>Mathematicians who assess the reasonableness of solutions:</li> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> </ul> </li> </ul>   |

|                   | <ul> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
|-------------------|---|
|                   | Cite evidence to explain and justify reasoning.   |
| ELA.K12.EE.1.1:   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
|                   | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.68.S.2.1:      | Sustain focused attention, respect, and discipline during classes and performances.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students investigate the fundamental applications, tools, history, and aesthetics of music technology. Student musicians explore traditional, current, and emerging technologies, including personal devices; and use them to explore, capture, create, arrange, manipulate, reproduce, and distribute music. Public performances may serve as a resource for specific instructional goals. Students may be expected to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

### GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12)

# M/J Music Ensemble 1 (#1303200) 2020 - 2022 (current)

| Name           | Description   |
|----------------|---|
|                | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1:   | Clarifications:   |
|                | e.g., listening maps, active listening, checklists  |
|                | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.  |
| MU.68.C.1.2:   | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title  |
|                | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.  |
| MU.68.C.2.1:   | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm   |
|                | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.   |
| MU.68.C.2.2:   | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.F.3.2:   | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.  |
|                | Classify authentic stylistic features in music originating from various cultures.   |
| MU.68.H.1.4:   | Clarifications:<br>e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation,<br>aural/oral traditions, drumming patterns   |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.  |
|                | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.   |
| MU.68.H.3.1:   | Clarifications:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural<br>connections and traditions, ceremonial music, sales and advertising, communication  |
|                | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.  |
| MU.68.O.3.1:   | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration   |
| MU.68.0.3.2:   | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.   |
| MU.68.S.1.3:   | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
| MU.68.S.1.4:   | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice  |
| MU.68.S.2.2:   | Transfer performance techniques from familiar to unfamiliar pieces.   |
|                | Sing and/or play age-appropriate repertoire expressively.   |
| MU.68.S.3.1:   | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                | Demonstrate proper vocal or instrumental technique.   |
| MU.68.S.3.2:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                | Sight-read standard exercises and simple repertoire.  |
| MU.68.S.3.3:   | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|                | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:   | Clarifications:<br>e.g., error detection, interval reinforcement  |
|                | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:   | Clarifications:<br>e.g., independently, collaboratively   |
| LAFS.6.SL.1.1: | <ul> <li>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</li> <li>b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.</li> <li>c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion.</li> <li>d. Poview the key ideas expressed and demonstrate understanding of multiple perspectives through coffection and perspective.</li> </ul> |
|                | a. Review the key tuess expressed and demonstrate understanding or multiple perspectives through reflection and paraphiliasing.   |

| LAFS.6.S.L.1.2:       Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.         LAFS.6.S.L.1.3:       Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.         LAFS.6.S.L.2.4:       Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes: use appropriate eye contact, adequate volume, and clear pronunciation.         LAFS.6.8.RST.2.4:       Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.         LAFS.68.WHST.2.4:       Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.         LAFS.68.WHST.3.9:       Draw evidence from informational texts to support analysis reflection, and research.         Use appropriate tools strategically.       Mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.         Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphing claculator. They detetet possible errors by strategically using e   |

| Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own  |
| Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own  |
| MAFS.K12.MP.6.1: reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
| Look for and make use of structure   |
| <ul> <li>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression x<sup>2</sup> + 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y)<sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.</li> </ul>   |
| FLD K12 FLL SL 1. English language learners communicate for social and instructional purposes within the school setting  |

## VERSION DESCRIPTION

Students with little or no small vocal or instrumental ensemble experience develop musicianship and performance skills as they study, rehearse, and perform high-quality ensemble literature in diverse styles. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

| Name             | Description  |
|------------------|--|
|                  | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:     | Clarifications:  |
|                  | Compare using correct music weekulary, the costhetic impact of a parformance to analy own hypothesis of the compare/s intent   |
| MUL ( 0, 0, 1, 0 | compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |
| MU.68.C.1.2:     | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title  |
|                  | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
| MU.68.C.2.1:     | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm  |
|                  | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.  |
| MU.68.C.2.2:     | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
| MU.68.F.3.2:     | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
|                  | Classify authentic stylistic features in music originating from various cultures.  |
| MU.68.H.1.4:     | Clarifications:<br>e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation,<br>aural/oral traditions, drumming patterns                                |
| MU.68.H.2.3:     | Classify the literature being studied by genre, style, and/or time period.   |
|                  | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1:     | Clarifications:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural<br>connections and traditions, ceremonial music, sales and advertising, communication |
|                  | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU.68.O.3.1:     | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
| MU.68.O.3.2:     | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.  |
| MU.68.S.1.3:     | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
| MU.68.S.1.4:     | Sing or play melodies by ear with support from the teacher and/or peers.  Clarifications: e.g., melodies using traditional classroom instruments and/or voice  |
| MU.68.S.2.2:     | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                  | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:     | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|                  | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:     | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                  | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:     | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|                  | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:     | Clarifications:<br>e.g., error detection, interval reinforcement   |
|                  | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.   |
| MU.68.S.3.6:     | Clarifications:<br>e.g., independently, collaboratively  |
|                  | Mathematicians who participate in effortful learning both individually and with others:  |
|                  | Analyze the problem in a way that makes sense given the task.  |
|                  | Ask questions that will help with solving the task.  |
|                  | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay opgraded and maintain a positive mindset when working to solve tasks.</li> </ul>  |
|                  | <ul> <li>stay engaged and maintain a positive minuset when Working to Solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>   |
| MA.K12.MTR.1.1:  | Clarifications:  |
|                  | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |

|                 | <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>   |
|-----------------|--|
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>   |
|                 | Clarifications:         Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:         • Help students make connections between concepts and representations.         • Provide opportunities for students to use manipulatives when investigating concepts.         • Guide students from concrete to pictorial to abstract representations as understanding progresses.         • Show students that various representations can have different purposes and can be useful in different situations.   |
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul> Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li></ul>                         |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> </ul> </li> </ul></li></ul> |
|                 | <ul> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>   |
| MA.K12.MTR.5.1: | <ul> <li>Ose patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>   |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.  |
|                 | Clarifications:  |

|                   | <ul> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
|-------------------|---|
|                   | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
| MA.K12.MTR.7.1:   | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.   <ul> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul> </li> </ul>   |
|                   | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.         • Indicate how various concepts can be applied to other disciplines.                                     |
|                   | Cite evidence to explain and justify reasoning.   |
|                   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

Students with little or no small vocal or instrumental ensemble experience develop musicianship and performance skills as they study, rehearse, and perform high-quality ensemble literature in diverse styles. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1303200

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: General Music > Abbreviated Title: M/J MUSIC ENS 1 Course Length: Year (Y) Course Level: 2

Course Status: State Board Approved Grade Level(s): 6,7,8

#### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12)

# M/J Music Ensemble 2 (#1303210) 2020 - 2022 (current)

| Name         | Description  |
|--------------|--|
|              | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1: | Clarifications:<br>e.g., listening maps, active listening, checklists  |
|              | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |
| MU.68.C.1.2: | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
|              | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
| MU.68.C.2.1: | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm  |
|              | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.  |
| MU.68.C.2.2: | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
|              | Describe several routes a composition or performance could travel from creator to consumer.  |
| MU.68.F.2.1: | Clarifications:<br>e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales   |
|              | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1: | Clarifications:<br>e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect  |
| MU.68.F.3.2: | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
|              | Classify authentic stylistic features in music originating from various cultures.  |
| MU.68.H.1.4: | Clarifications:<br>e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation,<br>aural/oral traditions, drumming patterns                                |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.   |
|              | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1: | Clarifications:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural<br>connections and traditions, ceremonial music, sales and advertising, communication |
|              | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2: | Clarifications:<br>e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays   |
|              | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.O.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble  |
|              | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU.68.O.3.1: | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
| MU.68.0.3.2: | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works   |
| MU.68.S.1.3: | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|              | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4: | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice   |
|              | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1: | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony   |
| MU.68.S.2.2: | Transfer performance techniques from familiar to unfamiliar pieces.  |
|              | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1: | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|              | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2: | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|              | Sight-read standard exercises and simple repertoire.   |

| MU.68.S.3.3:      | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols   |
|-------------------|---|
|                   | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.  |
| MU.68.S.3.4:      | Clarifications:<br>e.g., error detection, interval reinforcement  |
|                   | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  |
| MU.68.S.3.6:      | Clarifications:<br>e.g., independently, collaboratively   |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.  |
| LAFS.68.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.68.WHST.3.9: | Draw evidence from informational texts to support analysis reflection, and research.  |
| LAFS.7.SL.1.1:    | <ul> <li>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade / topics, texts, and issues, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</li> <li>b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed.</li> <li>c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed.</li> <li>d. Acknowledge new information expressed by others and, when warranted, modify their own views.</li> </ul>  |
|                   | Standard Relation to Course: Supporting   |
| LAFS.7.SL.1.2:    | Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.  |
| LAFS.7.SL.1.3:    | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.  |
| LAFS.7.SL.2.4:    | Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.   |
| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x<br>- y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students with previous vocal or instrumental ensemble experience continue to build musicianship and performance skills through the study, rehearsal, and performance of highquality ensemble literature in a variety of styles. Student musicians learn to self-assess and collaborate as they study relevant musical styles and time periods. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. # M/J Music Ensemble 2 (#1303210) 2022 - And Beyond

| Name           | Description  |
|----------------|--|
|                | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:   | Clarifications:  |
|                | e.g., listening maps, active listening, checklists   |
|                | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                     |
| MU.68.C.1.2:   | Clarifications:  |
|                | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                        |
|                | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.       |
| MU.68.C.2.1:   | Clarifications:  |
|                | e.g., intonation, balance, blend, phrasing, rhythm   |
|                | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                  |
| MU.68.C.2.2:   | Clarifications:  |
|                | e.g., biend, balance, ensemble playing, sonority, technique, tone quality  |
|                | Describe several routes a composition or performance could travel from creator to consumer.  |
| MU.68.F.2.1:   | Clarifications:  |
|                | e.g., with and other technology, production, sharing on the internet, none studios, professional recording studios, sales                            |
|                | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1:   | Clarifications:  |
|                | e.g., dedication to mastering a task, problem solving, set alsophice, dependating, ability to organize, cardial awareness, matual respect            |
| MU.08.F.3.2:   | Classify authentic stylistic features in music originating from various cultures   |
|                | Clarifications:  |
| MU.68.H.1.4:   | e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, |
|                | aural/oral traditions, drumming patterns   |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.   |
|                | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.                                    |
| MU 68 H 3 1    | Clarifications:  |
|                | e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural            |
|                |  |
|                | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2:   | Clarifications:  |
|                | Compare performances of a musical work to identify artistic shalese mode by performance  |
| MUL (0.0.1.1   | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.U.1.1:   | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble                                       |
|                | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image    |
| MIL 68 O 2 1   | Clarifications:  |
| 10.00.0.3.1.   | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration         |
|                | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to     |
| MU.68.0.3.2:   | other musical works.   |
| MU.68.S.1.3:   | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|                | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:   | Clarifications:  |
|                | e.g., melodies using traditional classroom instruments and/or voice  |
|                | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1:   | Clarifications:  |
|                |  |
| MU.68.S.2.2:   | I ranster performance techniques from familiar to unfamiliar pieces.   |
| MIL 68 S 2 1.  |  |
| 1110.00.3.3.1. | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                | Demonstrate proper vocal or instrumental technique   |
| MIL 68 S 3 2·  | Clarifications:  |
| ma.00.3.3.2.   | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                | Sight-read standard exercises and simple repertoire.   |
|                | eight fode otentided energies reportente.  |

| MU.68.S.3.3:    | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|-----------------|--|
| MU.68.S.3.4:    | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. Clarifications: e.g., error detection, interval reinforcement   |
| MU.68.S.3.6:    | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.  Clarifications: e.g., independently, collaboratively   |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others: <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> </li> <li>Clarifications: <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul> </li> </ul>  |

Show students that various representations can have different purposes and can be useful in different situations.</li></ul>  |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>Select efficient and appropriate methods for solving problems within the given context.<br>Maintain flexibility and accuracy while performing procedures and mental calculations.<br>Complete tasks accurately and with confidence.<br>Adapt procedures to apply them to a new context.<br>Use feedback to improve efficiency when performing calculations.<br>Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:<br>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>Offer multiple opportunities for students to practice efficient and generalizable methods.<br>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.  |

| MA.K12.MTR.5.1:              | Look for similarities among problems.     Connect solutions of problems to more complicated large scale situations   |
|------------------------------|--|
|                              | Connect solutions of problems to more complicated large-scale situations.  |
|                              | Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:  |
|                              | <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> </ul>   |
|                              | Support students to develop generalizations based on the similarities found among problems.  |
|                              | Provide opportunities for students to create plans and procedures to solve problems.   |
|                              | • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
|                              | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
|                              | Estimate to discover possible solutions.   |
|                              | Use benchmark quantities to determine if a solution makes sense.   |
|                              | Check calculations when solving problems.  |
| MA K12 MTR 6 1               | <ul> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>  |
|                              | Clarifications:  |
|                              | Teachers who encourage students to assess the reasonableness of solutions:   |
|                              | Have students estimate or predict solutions prior to solving.  |
|                              | <ul> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Deinforce that students should their work as they progress within and after a task.</li> </ul>   |
|                              | <ul> <li>Remote that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
|                              | Apply mathematics to real world contexts   |
|                              | Mathematicians who apply mathematics to real-world contexts:   |
|                              | Connect mathematical concepts to everyday experiences.   |
|                              | Use models and methods to understand, represent and solve problems.  |
| MA K12 MTD 7 1.              | Perform investigations to gather data or determine if a method is appropriate.     Redesign models and methods to improve accuracy or efficiency.  |
| IVIA. K 12. IVI 1 K. 7 . 1 . | Clarifications:<br>Teachers who encourage students to apply mathematics to real-world contexts:  |
|                              | <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> </ul>   |
|                              | Challenge students to question the accuracy of their models and methods.   |
|                              | Support students as they validate conclusions by comparing them to the given situation.  |
|                              | Indicate how various concepts can be applied to other disciplines.   |
|                              | Cite evidence to explain and justify reasoning.  |
|                              | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details  |
|                              | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.  |
|                              | 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.   |
| FLA K12 FF 1 1               | In 3rd grade, students should use a combination of direct and indirect citations.  |
|                              | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly  |
|                              | referenced by the instructor.  |
|                              | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                              | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                              | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:              | Clarifications:  |
|                              | See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                              | Make interences to support comprehension.  |
| FLA.K12.FF.3.1:              | Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl  |
|                              | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and  |
|                              | beyond.  |
|                              | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
|                              | Clarifications:  |
|                              | In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifving what they are thinking. For example: "I think because "The   |
| ELA.K12.EE.4.1:              | collaborative conversations are becoming academic conversations.   |
|                              | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students   |
|                              | build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                              | Use the accepted rules governing a specific format to create quality work.   |
|                              | Clarifications:  |
| ELA.K12.EE.5.1:              | Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster hoard display must have instruction in how to effectively present information to |
|                              | do quality work.   |
|                              | Use appropriate voice and tone when speaking or writing.   |
|                              |  |

| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. |
|-------------------|---|
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

Students with previous vocal or instrumental ensemble experience continue to build musicianship and performance skills through the study, rehearsal, and performance of highquality ensemble literature in a variety of styles. Student musicians learn to self-assess and collaborate as they study relevant musical styles and time periods. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# M/J Music Ensemble 3 (#1303220) 2020 - 2022 (current)

| Name              | Description   |
|-------------------|---|
|                   | Develop strategies for listening to unfamiliar musical works.   |
| MU.68.C.1.1:      | Clarifications:   |
|                   | e.g., listening maps, active listening, checklists  |
|                   | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.  |
| MU.68.C.1.2:      | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title  |
|                   | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.  |
| MU.68.C.2.1:      | Clarifications:   |
|                   | e.g., intonation, balance, blend, phrasing, rhythm  |
|                   | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.   |
| MU.68.C.2.2:      | Clarifications:   |
| MUL ( 0, C, 2, 1, |   |
| MU.68.C.3.T:      | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.   |
| MIL 69 E 2 2.     |   |
| NU.00.F.2.2.      | e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants   |
|                   | Describe how studying music can enhance citizenship, leadership, and global thinking.   |
| MU.68.F.3.1:      | Clarifications:   |
|                   | e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect  |
| MU.68.F.3.2:      | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.  |
| MU.68.H.1.1:      | Describe the functions of music from various cultures and time periods.   |
| MU.68.H.1.2:      | Identify the works of representative composers within a specific style or time period.  |
|                   | Classify authentic stylistic features in music originating from various cultures.   |
| MU.68.H.1.4:      | Clarifications:<br>e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation,<br>aural/oral traditions, drumming patterns                             |
| MU.68.H.2.1:      | Describe the influence of historical events and periods on music composition and performance.   |
| MU.68.H.2.3:      | Classify the literature being studied by genre, style, and/or time period.  |
|                   | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.   |
| MU.68.H.3.1:      | Clarifications:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication |
|                   | Discuss how the absence of music would affect other content areas and contexts.   |
| MU.68.H.3.2:      | Clarifications:   |
|                   | e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays   |
|                   | Compare performances of a musical work to identify artistic choices made by performers.   |
| MU.68.0.1.1:      | Clarifications:   |
|                   | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble  |
|                   | Demonstrate knowledge of major and minor tonalities through performance and composition.  |
| MU.68.0.2.2:      | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor   |
|                   | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.  |
| MU.68.0.3.1:      | Clarifications:   |
|                   | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
|                   | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to  |
| MU.68.U.3.2:      | other musical works.  |
| MU.68.S.1.3:      | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.   |
|                   | Sing or play melodies by ear with support from the teacher and/or peers.  |
| MU.68.S.1.4:      | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice  |
|                   | Perform music from memory to demonstrate knowledge of the musical structure.  |
| MU.68.S.2.1:      | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2:      | Transfer performance techniques from familiar to unfamiliar pieces.   |

|                    | Sing and/or play age-appropriate repertoire expressively.  |
|--------------------|--|
| MU.68.S.3.1:       | Clarifications:  |
|                    | e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response  |
|                    | Demonstrate proper vocal or instrumental technique.  |
| MIL 68 S 3 2.      | Clarifications   |
| 10.00.0.0.2.       | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                    | Sight read standard eversions and simple reporteire  |
|                    |  |
| MU.68.5.3.3:       | Clarifications:  |
|                    | e.g., note and rest values, key signatures, time signatures, expressive markings, special narmonic and/or notation symbols   |
|                    | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:       | Clarifications:  |
|                    | e.g., error detection, interval reinforcement  |
|                    | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.   |
| MU.68.S.3.6:       | Clarifications:  |
|                    | e.g., independently, collaboratively   |
| LAFS 68 RST 2 1.   | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical  |
| EAT 5.00.1(51.2.4. | context relevant to grades 6–8 texts and topics.   |
| LAFS.68.WHST.2.4:  | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.   |
| LAFS.68.WHST.3.9:  | Draw evidence from informational texts to support analysis reflection, and research.   |
|                    | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and  |
|                    | issues, building on ouriers lideds and expressing their own cleany.  |
|                    | a. Come to discussions prepared, having read or researched material under study, explicitly draw on that preparation by referring to evidence on the tonic text, or issue to probe and reflect on ideas under discussion.  |
|                    | <ul> <li>b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed.</li> </ul>  |
| LAFS.8.SL.1.1:     | c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations,   |
|                    | and ideas.   |
|                    | d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.  |
|                    | Standard Balatian to Course, Supporting  |
|                    | Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social  |
| LAFS.8.SL.1.2:     | commercial, political) behind its presentation.  |
|                    | Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and  |
| LAI 3.0.3L.1.3.    | identifying when irrelevant evidence is introduced.  |
| LAFS.8.SL.2.4:     | Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen   |
|                    | details; use appropriate eye contact, adequate volume, and clear pronunciation.  |
|                    | Use appropriate tools strategically.   |
|                    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,   |
|                    | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.   |
|                    | Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools  |
| MAFS.K12.MP.5.1:   | might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze   |
|                    | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying  |
|                    | assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify  |
|                    | relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use   |
|                    | technological tools to explore and deepen their understanding of concepts.   |
|                    | Standard Relation to Course: Supporting  |
|                    | Attend to precision.   |
|                    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own  |
|                    | reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about  |
| MAFS.K12.MP.6.1:   | specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,  |
|                    | formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|                    |  |
|                    | Standard Relation to Course: Supporting  |
|                    |  |
|                    | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven  |
|                    | more is the same amount as seven and three more, or they may sort a collection of shapes according to now many sides the shapes have. Later, students will see $7 \times 8$ equals the well commembered $7 \times 5 + 7 \times 3$ in propagation for learning about the distributive property. In the events of $7 \times 5 + 7 \times 3$ is propagation for learning about the distributive property. In the events of $7 \times 5 + 7 \times 3$ is propagation for learning about the distributive property. In the events of $7 \times 5 + 7 \times 3$ is propagation for learning about the distributive property. In the events of $7 \times 5 + 7 \times 3$ is propagation for learning about the distributive property. |
| MAFS.K12.MP.7.1:   | + 9x + 14, older students can see the 14 as $2 \times 7$ and the 9 as $2 + 7$ . They recognize the significance of an existing line in a geometric figure and  |
|                    | can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see  |
|                    | complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x   |
|                    | - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |
|                    | Standard Relation to Course: Supporting  |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students continue to build musicianship and performance skills through the study, rehearsal, and performance of increasingly challenging, high-quality vocal or instrumental ensemble literature. Student musicians strengthen their techniques, ensemble skills, music literacy, and analytical skills as they study relevant history, cultures, and music genres. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1303220

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: General Music > Abbreviated Title: M/J MUSIC ENS 3 Course Length: Year (Y) Course Level: 2

Course Status: Course Approved Grade Level(s): 6,7,8

| Educator Certifications                                   |  |

# M/J Music Ensemble 3 (#1303220) 2022 - And Beyond

| Name         | Description  |
|--------------|--|
|              | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1: | Clarifications:<br>e.g., listening maps, active listening, checklists  |
|              | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |
| MU.68.C.1.2: | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
|              | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
| MU.68.C.2.1: | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm  |
|              | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.  |
| MU.68.C.2.2: | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
| MU.68.C.3.1: | Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.  |
|              | Describe how concert attendance can financially impact a community.  |
| MU.68.F.2.2: | Clarifications:<br>e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants   |
|              | Describe how studying music can enhance citizenship, leadership, and global thinking.  |
| MU.68.F.3.1: | Clarifications:<br>e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect  |
| MU.68.F.3.2: | Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.   |
| MU.68.H.1.1: | Describe the functions of music from various cultures and time periods.  |
| MU.68.H.1.2: | Identify the works of representative composers within a specific style or time period.   |
|              | Classify authentic stylistic features in music originating from various cultures.  |
| MU.68.H.1.4: | Clarifications:<br>e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation,<br>aural/oral traditions, drumming patterns                                |
| MU.68.H.2.1: | Describe the influence of historical events and periods on music composition and performance.  |
| MU.68.H.2.3: | Classify the literature being studied by genre, style, and/or time period.   |
|              | Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration.  |
| MU.68.H.3.1: | Clarifications:<br>e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural<br>connections and traditions, ceremonial music, sales and advertising, communication |
|              | Discuss how the absence of music would affect other content areas and contexts.  |
| MU.68.H.3.2: | Clarifications:<br>e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays   |
|              | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.O.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble  |
|              | Demonstrate knowledge of major and minor tonalities through performance and composition.   |
| MU.68.0.2.2: | Clarifications:<br>e.g., scales; key signatures; relative major/minor; parallel major/minor  |
|              | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU.68.O.3.1: | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
| MU.68.0.3.2: | Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.  |
| MU.68.S.1.3: | Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.  |
|              | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4: | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice   |
|              | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1: | Clarifications:<br>e.g., basic themes, patterns, tonality, melody, harmony   |
| MU.68.S.2.2: | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                 | Sing and/or play age-appropriate repertoire expressively.  |
|-----------------|--|
| MU.68.S.3.1:    | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
| MU.68.S.3.2:    | Demonstrate proper vocal or instrumental technique.<br>Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| MU.68.S.3.3:    | Sight-read standard exercises and simple repertoire.<br>Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
| MU.68.S.3.4:    | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. Clarifications: e.g., error detection, interval reinforcement   |
| MU.68.S.3.6:    | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques. Clarifications: e.g., independently, collaboratively  |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>              |
| MA.K12.MTR.2.1: | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:<br>Build understanding through modeling and using manipulatives.<br>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.<br>Progress from modeling problems with objects and drawings to using algorithms and equations.<br>Express connections between concepts and representations.<br>Choose a representation based on the given context or purpose.<br>Clarifications:<br>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:<br>Help students make connections between concepts and representations.<br>Provide opportunities for students to use manipulatives when investigating concepts.   |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.     Show students that various representations can have different purposes and can be useful in different situations. Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:     Select efficient and appropriate methods for solving problems within the given context.     Maintain flexibility and accuracy while performing procedures and mental calculations  |
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks accurately and utdealedy time performing procedules and montal calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul> Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li></ul>  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> </ul> </li> </ul></li></ul> |

|                 | <ul> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>  |
|-----------------|--|
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
|                 | <ul><li>Focus on relevant details within a problem.</li><li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li><li>Decompose a complex problem into manageable parts.</li></ul>  |
|                 | <ul><li>Relate previously learned concepts to new concepts.</li><li>Look for similarities among problems.</li></ul>  |
| MA.K12.WIR.5.1: | Connect solutions of problems to more complicated large-scale situations.  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul> </li> </ul> |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
|                 | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.         • Prompt students to continually ask, "Does this solution make sense? How do you know?"         • Reinforce that students check their work as they progress within and after a task.         • Strengthen students' ability to verify solutions through justifications.   |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |
|                 | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficience</li> </ul>   |
| MA.K12.MTR.7.1: | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts: <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul>   |
|                 | Cite evidence to explain and justify reasoning.  |
| ELA.K12.EE.1.1: | <ul> <li>Clarifications:</li> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> </ul>  |
|                 | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|                 | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                 | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                 | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1: | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.3.1: | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                 | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1: | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |
|                 | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students   |

|                   | build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|-------------------|--|
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.   |
|                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

### VERSION DESCRIPTION

Students continue to build musicianship and performance skills through the study, rehearsal, and performance of increasingly challenging, high-quality vocal or instrumental ensemble literature. Student musicians strengthen their techniques, ensemble skills, music literacy, and analytical skills as they study relevant history, cultures, and music genres. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# M/J Music Techniques 1 (#1303230) 2020 - 2022 (current)

| Name           | Description  |
|----------------|--|
|                | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:   | Clarifications:  |
|                | e.g., listening maps, active listening, checklists   |
| MU.68.C.1.2:   | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.   |
|                | Clarifications:<br>e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title   |
|                | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.   |
| MU.68.C.2.1:   | Clarifications:<br>e.g., intonation, balance, blend, phrasing, rhythm  |
|                | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.  |
| MU.68.C.2.2:   | Clarifications:<br>e.g., blend, balance, ensemble playing, sonority, technique, tone quality   |
| MU.68.H.2.3:   | Classify the literature being studied by genre, style, and/or time period.   |
|                | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.O.1.1:   | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble  |
|                | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image.   |
| MU.68.O.3.1:   | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration  |
|                | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1:   | Clarifications:<br>e.g., blues, rock   |
|                | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:   | Clarifications:<br>e.g., melodies using traditional classroom instruments and/or voice   |
|                | Perform music from memory to demonstrate knowledge of the musical structure  |
| MU.68.S.2.1:   | Clarifications:  |
|                | e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2:   | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:   | Clarifications:<br>e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response   |
|                | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                | Sight-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:   | Clarifications:<br>e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols  |
|                | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:   | Clarifications:<br>e.g., error detection, interval reinforcement   |
| MU.68.S.3.5:   | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.  |
|                | Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.   |
| MU.68.S.3.6:   | Clarifications:<br>e.g., independently, collaboratively  |
| LAFS.6.SL.1.1: | <ul> <li>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly.</li> <li>a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</li> <li>b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed.</li> <li>c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion.</li> <li>d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.</li> </ul> |
|                | standard relation to course, supporting  |

| LAFS.6.SL.1.2:    | Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.  |
|-------------------|---|
| LAFS.6.SL.1.3:    | Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.  |
| LAFS.6.SL.2.4:    | Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.   |
| LAFS.68.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical<br>context relevant to grades 6–8 texts and topics.   |
| LAFS.68.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| MAFS.K12.MP.5.1:  | <ul> <li>Use appropriate tools strategically.</li> <li>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</li> <li>Standard Relation to Course: Supporting</li> </ul> |
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
|                   | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                   | Standard Relation to Course: Supporting   |
| ELU.NIZ.ELL.SI.I: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students with little or no instrumental or vocal experience develop musicianship, technical proficiency, and performance skills. Beginning musicians focus on development of skills and techniques through scales, etudes, and solo literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental class, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

## **Educator Certifications**

Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12)

# M/J Music Techniques 1 (#1303230) 2022 - And Beyond

| Name            | Description  |
|-----------------|--|
|                 | Develop strategies for listening to unfamiliar musical works.  |
| MU.68.C.1.1:    | Clarifications:  |
|                 | e.g., listening maps, active listening, checklists   |
|                 | Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent.                   |
| MU.68.C.1.2:    | Clarifications:  |
|                 | e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title                      |
|                 | Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers.     |
| MU.68.C.2.1:    | Clarifications:  |
|                 | e.g., intonation, balance, blend, phrasing, rhythm   |
|                 | Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.                |
| MU.68.C.2.2:    | Clarifications:  |
|                 | e.g., blend, balance, ensemble playing, sonority, technique, tone quality  |
| MU.68.H.2.3:    | Classify the literature being studied by genre, style, and/or time period.   |
|                 | Compare performances of a musical work to identify artistic choices made by performers.  |
| MU.68.0.1.1:    | Clarifications:  |
|                 | e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble                                     |
|                 | Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. |
| MU.68.0.3.1:    | Clarifications:  |
|                 | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration       |
|                 | Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions.  |
| MU.68.S.1.1:    | Clarifications:  |
|                 | e.g., blues, rock  |
|                 | Sing or play melodies by ear with support from the teacher and/or peers.   |
| MU.68.S.1.4:    | Clarifications:  |
|                 | e.g., melodies using traditional classroom instruments and/or voice  |
|                 | Perform music from memory to demonstrate knowledge of the musical structure.   |
| MU.68.S.2.1:    | Clarifications:  |
|                 | e.g., basic themes, patterns, tonality, melody, harmony  |
| MU.68.S.2.2:    | Transfer performance techniques from familiar to unfamiliar pieces.  |
|                 | Sing and/or play age-appropriate repertoire expressively.  |
| MU.68.S.3.1:    | Clarifications:  |
|                 | e.g., technique, phrasing, dynamics, tone quality, biend, balance, intonation, knestnetic support/response   |
|                 | Demonstrate proper vocal or instrumental technique.  |
| MU.68.S.3.2:    | Clarifications:  |
|                 | e.g., postare, breathing, hingering, emboachare, bow technique, taning, strainning   |
|                 | Signt-read standard exercises and simple repertoire.   |
| MU.68.S.3.3:    | Clarifications:  |
|                 |  |
|                 | Compare written notation to aural examples and analyze for accuracy of rhythm and pitch.   |
| MU.68.S.3.4:    | Clarifications:  |
|                 |  |
| MU.68.5.3.5:    | Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.  |
| MIL 40 5 2 4.   | Clarifications:  |
| 10.00.3.3.0.    | e.g., independently, collaboratively   |
|                 | Mathematicians who narticipate in effortful learning both individually and with others:  |
|                 | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> </ul>  |
|                 | Ask questions that will help with solving the task.  |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.  |
|                 | Stay engaged and maintain a positive mindset when working to solve tasks.  |
|                 | Help and support each other when attempting a new method or approach.  |
| MA.K12.M1R.1.1: | Clarifications:  |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:                                   |
|                 | Cultivate a community of growth mindset learners.  |

|                 | <ul> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
|-----------------|--|
|                 | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
| MA.K12.MTR.2.1: | <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:  |
| MA.K12.MTR.3.1: | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
|                 | Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:<br>• Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>• Offer multiple opportunities for students to practice efficient and generalizable methods.<br>• Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  |
| MA.K12.MTR.4.1: | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
| MA.K12.MTR.5.1: | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |
|                 | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         Support students to develop generalizations based on the similarities found among problems.         Provide opportunities for students to create plans and procedures to solve problems.         Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.                                    |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
|                 | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:  |

|                   | <ul> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
|-------------------|---|
|                   | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency</li> </ul>   |
| MA.K12.MTR.7.1:   | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>  |
| ELA.K12.EE.1.1:   | Cite evidence to explain and justify reasoning.  Clarifications:  K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.   |
|                   | <ul> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> <li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li> </ul>  |
| ELA.K12.EE.2.1:   | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.3.1:   | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
| ELA.K12.EE.4.1:   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |
| ELA.K12.EE.5.1:   | Use the accepted rules governing a specific format to create quality work.<br>Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students with little or no instrumental or vocal experience develop musicianship, technical proficiency, and performance skills. Beginning musicians focus on development of skills and techniques through scales, etudes, and solo literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental class, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1303230

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 6 to 8 Education Courses > Subject: Music Education > SubSubject: General Music > Abbreviated Title: M/J MUSIC TECNQS 1 Course Length: Year (Y) Course Level: 2

Course Status: State Board Approved Grade Level(s): 6,7,8

#### **Educator Certifications**

Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12) Music (Elementary and Secondary Grades K-12)

Vocal Music (Elementary and Secondary Grades K-12)

# Music Theory 1 (#1300300) 2020 - 2022 (current)

| Name              | Description  |
|-------------------|--|
|                   | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:     | Clarifications:<br>e.g., listening maps, active listening, checklists  |
|                   | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent.  |
| MU.912.C.1.2:     | Clarifications:<br>e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title   |
| MU.912.C.2.2:     | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.2.3:     | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.   |
| MU.912.C.3.1:     | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |
| MU.912.F.1.1:     | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.  |
| MU.912.F.3.1:     | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.   |
| MU.912.F.3.2:     | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.4:     | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.  |
|                   | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU.912.H.1.2:     | Clarifications:<br>e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
| MU.912.H.2.2:     | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.  |
|                   | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.   |
| MU.912.H.3.1:     | Clarifications:<br>e.g., acoustics, sound amplification, materials, mechanics  |
|                   | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.O.1.1:     | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
|                   | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.   |
| MU.912.O.3.1:     | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration  |
|                   | Improvise rhythmic and melodic phrases over harmonic progressions.   |
| MU.912.S.1.1:     | Clarifications:<br>e.g., using text or scat syllables  |
| MU.912.S.1.2:     | Compose music for voices and/or acoustic, digital, or electronic instruments.  |
|                   | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:     | Clarifications:<br>e.g., texture, mode, form, tempo, voicing   |
| MU.912.S.1.8:     | Record, mix, and edit a recorded performance.  |
|                   | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:     | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.3:     | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.<br>Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.   |
| LAFS.910.L.1.1:   | <ul> <li>a. Use parallel structure.</li> <li>b. Use various types of phrases (noun, verb, adjectival, adverbial, participial, prepositional, absolute) and clauses (independent, dependent; noun, relative, adverbial) to convey specific meanings and add variety and interest to writing or presentations.</li> </ul>  |
|                   | Standard Relation to Course: Supporting  |
| LAFS.910.RST.2.4: | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.  |
|                   | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10<br>topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.<br>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from<br>texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. |

| LAFS.910.SL.1.1:   | <ul> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> <li>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</li> </ul>  |
|--------------------|--|
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source  |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.  |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.  |
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.  |
| MAFS.K12.MP.5.1:   | Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. Standard Relation to Course: Supporting Attend to precision. Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about |
| MAFS.K12.MP.6.1:   | specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,<br>express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully<br>formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.<br>Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:   | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x<br>- y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting  |
| DA.912.S.2.1:      | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students learn how music is constructed and developed, and acquire a basic understanding of the structural, technical, and historical elements of music. Student theorists develop basic ear-training, keyboard, and functional singing skills, and engage in the creative process through individual and collaborative projects. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

## GENERAL NOTES

#### Special Notes:

#### Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

- 1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
- 2. Making close reading and rereading of texts central to lessons.
- 3. Asking high-level, text specific questions and requiring high-level, complex tasks and assignments.
- 4. Requiring students to support answers with evidence from the text.
- 5. Providing extensive text-based research and writing opportunities (claims and evidence).

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|                 | e.g., texture, mode, form, tempo, voicing  |
| MU.912.S.1.8:   | Record, mix, and edit a recorded performance.  |
|                 | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:   | Clarifications:  |
|                 | e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.3:   | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.   |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |
|                 | Analyze the problem in a way that makes sense given the task.     Ask questions that will beln with solving the task   |
|                 | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> </ul>  |
|                 | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>  |
|                 | Help and support each other when attempting a new method or approach.  |
| MA.K12.MTR.1.1: | Clarifications:  |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                 | Cultivate a community of growth mindset learners.  |
|                 | Foster perseverance in students by choosing tasks that are challenging.  |
|                 | Develop students' ability to analyze and problem solve.  |

|                 | Recognize students' effort when solving challenging problems.  |
|-----------------|--|
|                 | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
| MA.K12.MTR.2.1: | <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>  |
|                 | Clarifications:         Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:         Help students make connections between concepts and representations.         Provide opportunities for students to use manipulatives when investigating concepts.         Guide students from concrete to pictorial to abstract representations as understanding progresses.         Show students that various representations can have different purposes and can be useful in different situations.   |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:  |
| MA.K12.MTR.3.1: | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>  |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  |
| MA.K12.MTR.4.1: | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>  |
|                 | Clarifications:         Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:         • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.         • Create opportunities for students to discuss their thinking with peers.         • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.         • Develop students' ability to justify methods and compare their responses to the responses of their peers.        |
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
| MA.K12.MTR.5.1: | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |

|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
|                 | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"  |

|                   | <ul> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
|-------------------|---|
| MA.K12.MTR.7.1:   | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
|                   | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> </ul>  |
|                   | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.         • Indicate how various concepts can be applied to other disciplines.   |
|                   | Cite evidence to explain and justify reasoning.   |
|                   | Clarifications:         K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.         2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.         In 3rd grade, students should use a combination of direct and indirect citations. |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students learn how music is constructed and developed, and acquire a basic understanding of the structural, technical, and historical elements of music. Student theorists develop basic ear-training, keyboard, and functional singing skills, and engage in the creative process through individual and collaborative projects. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

#### Special Notes:

#### Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

- 1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
- 2. Making close reading and rereading of texts central to lessons.
- 3. Asking high-level, text specific questions and requiring high-level, complex tasks and assignments.
- 4. Requiring students to support answers with evidence from the text.
- 5. Providing extensive text-based research and writing opportunities (claims and evidence).

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

| Course Number: 1300300              | Course Path: Section: Grades PreK to 12 Education<br>Courses > Grade Group: Grades 9 to 12 and Adult |
|-------------------------------------|--|
|                                     | Education Courses > Subject: Music Education >   |
|                                     | SubSubject: General Music >  |
|                                     | Abbreviated Title: MUS THEORY 1  |
| Number of Credits: One (1) credit   | Course Length: Year (Y)  |
| Course Type: Core Academic Course   | Course Level: 2  |
| Course Status: State Board Approved |  |
| Grade Level(s): 9,10,11,12          |  |

#### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

Graduation Requirement: Performing/Fine Arts

# Fundamentals of Music Theory (#1300305) 2021 - And Beyond (current)

| Name             | Description  |
|------------------|--|
| MU.912.C.1.1:    | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
|                  | Clarifications:  |
|                  | e.g., listening maps, active listening, checklists   |
|                  | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                     |
| MU.912.C.1.2:    | composer's intent.   |
|                  |  |
|                  | e.g., guality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                                  |
| MIL 012 C 2 2    | Evaluate performance quality in recorded and/or live performance   |
| MU.912.C.2.2.    | Evaluate performance quality in recorded and/or inverse performances.  |
| 10.912.0.2.3.    | Make critical evaluations, based on exemplany models, of the quality and effectiveness of performances and apply the criteria to personal development          |
| MU.912.C.3.1:    | in music   |
| MU.912.F.1.1:    | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.  |
|                  | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MII 912 H 1 2·   | Clarifications   |
| WIO. 712.11.1.2. | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
| MIL 012 IL 2 2.  |  |
| WIU.912.H.2.2:   | Analyze current musical iterios, including audience environments and music acquisition, to predict possible directions of music.                               |
|                  | Apply knowledge of science, math, and music to demonstrate, through an acoustic of digital performance medium, now sound production arects musical performance |
| MU.912.H.3.1:    |  |
|                  | e a acoustics sound amplification materials mechanics  |
|                  |  |
|                  | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1:    | Clarifications:  |
|                  | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
|                  | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied            |
|                  | meaning of the composer/performer.   |
| MU.912.0.3.1:    | Clarifications:  |
|                  | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,                          |
|                  | orchestration  |
|                  | Improvise rhythmic and melodic phrases over harmonic progressions.   |
| MU.912.S.1.1:    | Clarifications:  |
|                  | e.g., using text or scat syllables   |
|                  | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:    | Clarifications:  |
|                  | e.g., texture, mode, form, tempo, voicing  |
| MIL 012 S 1 8.   | Pecord mix and edit a recorded performance   |
| M0.712.3.1.0.    | Sight-read music accurately and expressively to show synthesis of skills   |
| MIL 012 5 2 2    |  |
| WIU.912.3.3.2.   | e a musical elements, expressive qualities, performance technique  |
|                  |  |
| MU.912.5.3.3:    | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.                                     |
|                  | Analyze the problem in a way that makes conce given the task   |
|                  | Ack questions that will belo with solving the task   |
|                  | Ask questions that will help with solving the task.     Build perseverance by modifying methods as peeded while solving a challenging task                     |
|                  | <ul> <li>Stav engaged and maintain a nositive mindset when working to solve tasks</li> </ul>   |
|                  | Help and support each other when attempting a new method or approach   |
| MA.K12.MTR.1.1:  |  |
|                  | Clarifications:<br>Teachers who encourage students to participate actively in effortful learning both individually and with others:                            |
|                  | Cultivate a community of growth mindset learners.  |
|                  | <ul> <li>Foster perseverance in students by choosing tasks that are challenging.</li> </ul>  |
|                  | <ul> <li>Develop students' ability to analyze and problem solve.</li> </ul>  |
|                  | Recognize students' effort when solving challenging problems.  |
|                  | Demonstrate understanding by representing problems in multiple ways  |
|                  | Mathematicians who demonstrate understanding by representing problems in multiple ways.  |
|                  |  |
|                  | Build understanding through modeling and using manipulatives.  |
|                  | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.  |
|                  | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations</li> </ul>  |

| MA.K12.MTR.2.1:   | Choose a representation based on the given context or purpose.  |
|-------------------|---|
| WPA.RT2.WTTR.2.T. | Clarifications:   |
|                   | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                   | Help students make connections between concepts and representations.  |
|                   | Provide opportunities for students to use manipulatives when investigating concepts.  |
|                   | Guide students from concrete to pictorial to abstract representations as understanding progresses.  |
|                   | Show students that various representations can have different purposes and can be useful in different situations.   |
|                   | Complete tasks with mathematical fluency.   |
|                   | Mathematicians who complete tasks with mathematical fluency:  |
|                   | Select efficient and appropriate methods for solving problems within the given context.   |
|                   | Maintain flexibility and accuracy while performing procedures and mental calculations.  |
|                   | Complete tasks accurately and with confidence.  |
| MA.K12.MTR.3.1:   | <ul> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
|                   | Clarifications:   |
|                   | Teachers who encourage students to complete tasks with mathematical fluency:  |
|                   | • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.  |
|                   | Offer multiple opportunities for students to practice efficient and generalizable methods.  |
|                   | • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
|                   | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |
|                   |   |
|                   | Communicate mathematical ideas, vocabulary and methods effectively.   |
|                   | Analyze the mathematical minking of others.     Compare the efficiency of a method to those expressed by others   |
|                   | <ul> <li>Recognize errors and suggest how to correctly solve the task.</li> </ul>   |
|                   | Justify results by explaining methods and processes.  |
| MA.K12.MTR.4.1:   | Construct possible arguments based on evidence.   |
|                   | Clarifications:   |
|                   | Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:  |
|                   | • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.   |
|                   | <ul> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, conjugae and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> </ul>   |
|                   | <ul> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>   |
|                   | Use patterns and structure to help understand and connect mathematical concepts.  |
|                   | Mathematicians who use patterns and structure to help understand and connect mathematical concepts:   |
|                   | Focus on relevant details within a problem.   |
|                   | Create plans and procedures to logically order events, steps or ideas to solve problems.  |
|                   | Decompose a complex problem into manageable parts.  |
|                   | Relate previously learned concepts to new concepts.   |
| MA.K12.MTR.5.1:   | Look for similarities among problems.   |
|                   | Connect solutions of problems to more complicated large-scale situations.   |
|                   | Clarifications:   |
|                   | Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.  |
|                   | <ul> <li>Support students to develop generalizations based on the similarities found among problems.</li> </ul>   |
|                   | Dravide encerturities for dividente te erecte plane and presedures te colus predictors  |
|                   | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> </ul>  |
|                   | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>   |
|                   | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> <li>Assess the reasonableness of solutions.</li> </ul>  |
|                   | <ul> <li>Provide opportunities for students to create plans and proceedines to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> <li>Assess the reasonableness of solutions.</li> <li>Mathematicians who assess the reasonableness of solutions:</li> </ul>   |
|                   | <ul> <li>Provide opportunities for students to create plans and proceedines to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> <li>Assess the reasonableness of solutions.</li> <li>Mathematicians who assess the reasonableness of solutions:</li> <li>Estimate to discover possible solutions.</li> </ul>   |
|                   | <ul> <li>Provide opportunities for students to create plans and proceedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> <li>Assess the reasonableness of solutions.</li> <li>Mathematicians who assess the reasonableness of solutions:</li> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> </ul>   |
|                   | <ul> <li>Provide opportunities for students to create plans and proceedines to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> <li>Assess the reasonableness of solutions.</li> <li>Mathematicians who assess the reasonableness of solutions:</li> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> </ul>  |

How do you know?"</li> <li>Reinforce that students continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students continually ask, "Does this solution students and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul> </li> <li>Apply mathematics to real-world contexts.</li> <li>Connect mathematical concepts to everyday experiences.</li> </ul> |

| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |
|-------------------|---|
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use the accepted rules governing a specific format to create quality work.  |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|                   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
|                   | Cite evidence to explain and justify reasoning.   |
|                   | <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
| MA.K12.MTR.7.1:   | Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or emclency.     Clarifications:   |

#### VERSION DESCRIPTION

Students learn how music is constructed and developed, and acquire a basic understanding of the structural, technical, and historical elements of music. Student theorists develop basic ear-training, keyboard, and functional singing skills, and engage in the creative process through individual and collaborative projects. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

#### **GENERAL NOTES**

#### Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

- 1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
- 2. Making close reading and rereading of texts central to lessons.

- 3. Asking high-level, text specific questions and requiring high-level, complex tasks and assignments.
- 4. Requiring students to support answers with evidence from the text.
- 5. Providing extensive text-based research and writing opportunities (claims and evidence).

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

| Course Number: 1200205                         | Courses > Grade Group: Grades 9 to 12 and Adult   |
| Course Number: 1300303                         | Education Courses > Subject: Music Education >    |
|  | SubSubject: General Music >                       |
|  | Abbreviated Title: FUNDAMENTAL MUSIC TH           |
| Number of Credits: Half credit (.5)            | Course Length: Semester (S)                       |
| Course Type: Core Academic Course              | Course Level: 2                                   |
| Course Status: Draft - Course Pending Approval |   |
| Grade Level(s): 9,10,11,12                     |   |
| Graduation Pequirement: Performing/Fine Arts   |   |

#### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

# Music Theory 2 Honors (#1300310) 2020 - 2022 (current)

| Name           | Description   |
|----------------|---|
|                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:  | Clarifications:   |
|                | e.g., listening maps, active listening, checklists  |
|                | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                |
| MU.912.C.1.2:  | composer's intent.  |
|                | Clarifications:   |
|                | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                             |
|                | Analyze instruments of the world and classify them by common traits.  |
| MU.912.C.1.3:  | Clarifications:   |
|                | e.g., classical and folk instruments from around the world  |
| MU.912.C.2.3:  | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.                                |
| MIL 012 C 2 1. | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development     |
| WIU.912.0.3.1. | in music.   |
| MU.912.F.1.1:  | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.   |
| MU.912.F.1.2:  | Incorporate or adapt new, emerging, or previously unfamiliar technology to create an innovative composition, music project, or related product.           |
|                | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.                                   |
| MU.912.F.2.2:  | Clarifications:   |
|                | e.g., community revitalization, industry choosing new locations, cultural and social enrichment   |
| MU.912.F.3.2:  | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and               |
|                | technology.   |
| MU.912.F.3.3:  | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, |
|                | Design and implement a personal learning plan, related to the study of music, which demonstrates self assessment, brain storming, decision making         |
| MU.912.F.3.4:  | and initiative to advance skills and/or knowledge.  |
|                | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:  | Clarifications:   |
|                | e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                | Compare two or more works of a composer across performance media  |
| MIL 912 H 1 3· | Clarifications:   |
|                | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MII 912 H 1 4· | Analyze how Western music has been influenced by historical and current world cultures  |
| MU.912.H.1.5:  | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.2:  | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.                           |
| MU.912.H.2.4:  | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                | Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of       |
|                | interest to demonstrate the ability to make transfers across contexts.  |
| MU.912.H.3.2:  | Clarifications:   |
|                | e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public      |
|                | speaking  |
|                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.O.1.1:  | Clarifications:   |
|                | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.O.2.1:  | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.                                  |
| MU.912.0.2.2:  | Transpose melodies into different modalities through performance and composition.   |
|                | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied       |
|                | meaning of the composer/performer.  |
| MU.912.0.3.1:  | Clarifications:   |
|                | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,                     |
|                |   |
|                | Improvise rhythmic and melodic phrases over harmonic progressions.  |
| MU.912.S.1.1:  | Clarifications:   |
|                | e.g., using text or scat syllables  |
| MU.912.S.1.2:  | Compose music for voices and/or acoustic, digital, or electronic instruments.   |
|                | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:  | Clarifications:   |
|                | e.g., texture, mode, form, tempo, voicing   |

|                    | Perform and notate, independently and accurately, melodies by ear.  |
|--------------------|---|
| MU.912.S.1.4:      | Clarifications:   |
|                    | e.g., singing, playing, writing   |
| MU.912.S.1.8:      | Record, mix, and edit a recorded performance.<br>Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of<br>music literature.   |
| MU.912.S.2.1:      | Clarifications:<br>e.g., memorization, sequential process   |
|                    | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:      | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.3:      | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.  |
| LAFS.910.L.1.1:    | <ul> <li>Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</li> <li>a. Use parallel structure.</li> <li>b. Use various types of phrases (noun, verb, adjectival, adverbial, participial, prepositional, absolute) and clauses (independent, dependent; noun, relative, adverbial) to convey specific meanings and add variety and interest to writing or presentations.</li> </ul>   |
| LAFS.910.RST.2.4:  | Standard Relation to Course: Supporting<br>Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical<br>context relevant to grades 9–10 texts and topics.   |
| LAFS.910.SL.1.1:   | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> <li>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</li> </ul>                 |
|                    | Standard Relation to Course: Supporting   |
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.  |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.   |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.   |
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
| MAFS.K12.MP.6.1:   | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. Standard Relation to Course: Supporting   |
|                    | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:   | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                    | Standard Relation to Course: Supporting   |
| DA.912.S.2.1:      | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students with prior music theory training study composition, form, and analysis, and develop individual aural skills. The aural, analytical, and cognitive skills expanded in this class inform the serious musician's performance abilities over a variety of styles and genres. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

#### GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

- 1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
- 2. Making close reading and rereading of texts central to lessons.
- 3. Asking high-level, textspecific questions and requiring high-level, complex tasks and assignments.
- 4. Requiring students to support answers with evidence from the text.
- 5. Providing extensive text-based research and writing opportunities (claims and evidence).

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Graduation Requirement: Performing/Fine Arts

# Music Theory 2 Honors (#1300310) 2022 - And Beyond

| Name           | Description   |
|----------------|---|
|                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:  | Clarifications:<br>e.g., listening maps, active listening, checklists   |
| MU.912.C.1.2:  | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent.   |
|                | Clarifications:<br>e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
|                | Analyze instruments of the world and classify them by common traits.  |
| MU.912.C.1.3:  | Clarifications:<br>e.g., classical and folk instruments from around the world   |
| MU.912.C.2.3:  | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.  |
| MU.912.C.3.1:  | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.   |
| MU.912.F.1.1:  | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.   |
| MU.912.F.1.2:  | Incorporate or adapt new, emerging, or previously unfamiliar technology to create an innovative composition, music project, or related product.   |
| MU.912.F.2.2:  | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.  Clarifications: e.g., community revitalization, industry choosing new locations, cultural and social enrichment  |
| MU.912.F.3.2:  | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.   |
| MU.912.F.3.3:  | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.  |
| MU.912.F.3.4:  | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.   |
|                | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:  | Clarifications:<br>e.g., patriotic, folk, celebration, entertainment, spiritual   |
|                | Compare two or more works of a composer across performance media.   |
| MU.912.H.1.3:  | Clarifications:<br>e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU.912.H.1.4:  | Analyze how Western music has been influenced by historical and current world cultures.   |
| MU.912.H.1.5:  | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.2:  | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.   |
| MU.912.H.2.4:  | Examine the effects of developing technology on composition, performance, and acquisition of music.<br>Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of interest to demonstrate the ability to make transfers acress contexts. |
| MIL 010 LL 0.0 |   |
| MU.912.H.3.2:  | e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public speaking   |
|                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.O.1.1:  | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
| MU.912.0.2.1:  | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.  |
| MU.912.0.2.2:  | Transpose melodies into different modalities through performance and composition.   |
|                | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.  |
| MU.912.O.3.1:  | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration   |
|                | Improvise rhythmic and melodic phrases over harmonic progressions.  |
| MU.912.S.1.1:  | Clarifications:<br>e.g., using text or scat syllables   |
| MU.912.S.1.2:  | Compose music for voices and/or acoustic, digital, or electronic instruments.   |
|                | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:  | Clarifications:   |
|                | e.g., texture, mode, form, tempo, voicing   |

|                 | Perform and notate, independently and accurately, melodies by ear.  |
|-----------------|---|
| MU.912.S.1.4:   | Clarifications:   |
|                 | e.g., singing, playing, writing   |
| MU.912.S.1.8:   | Record, mix, and edit a recorded performance.<br>Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of<br>music literature.   |
| MU.912.S.2.1:   | Clarifications:<br>e.g., memorization, sequential process   |
|                 | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:   | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
| MU 912 S 3 3    | Transcribe aurally presented songs into melodic and/or rbythmic potation to show synthesis of aural and potational skills   |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> Clarifications: <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>   |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li></ul>   |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>• Select efficient and appropriate methods for solving problems within the given context.<br>• Maintain flexibility and accuracy while performing procedures and mental calculations.<br>• Complete tasks accurately and with confidence.<br>• Adapt procedures to apply them to a new context.<br>• Use feedback to improve efficiency when performing calculations.<br><b>Clarifications:</b><br>Teachers who encourage students to complete tasks with mathematical fluency:<br>• Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>• Offer multiple opportunities for students to practice efficient and generalizable methods.  |
| MA.K12.MTR.4.1: | <ul> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> <b>Clarifications:</b> <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of correct and increasingly efficient methods.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. <b>Develop students' ability to justify methods and connect mathematical concepts</b></li></ul> |
|                 | Mathematicians who use patterns and structure to help understand and connect mathematical concepts:   |

| MA.K12.MTR.5.1: | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |
|-----------------|--|
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>   |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts: <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> </ul> </li> <li>Perform investigations to gather data or determine if a method is appropriate.  <ul> <li>Redesign models and methods to improve accuracy or efficiency</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts: <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul></li></ul>   |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning. Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently.         Clarifications:         See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
| ELA.K12.EE.3.1: | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
| ELA.K12.EE.4.1: | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.          Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                 | Use the accepted rules governing a specific format to create quality work.   |

| ELA.K12.EE.5.1:   | Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. |
|-------------------|---|
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students with prior music theory training study composition, form, and analysis, and develop individual aural skills. The aural, analytical, and cognitive skills expanded in this class inform the serious musician's performance abilities over a variety of styles and genres. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

#### GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

- 1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
- 2. Making close reading and rereading of texts central to lessons.
- 3. Asking high-level, textspecific questions and requiring high-level, complex tasks and assignments.
- 4. Requiring students to support answers with evidence from the text.
- 5. Providing extensive text-based research and writing opportunities (claims and evidence).

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

| LAFS.910.L.1.1:                    | <ul><li>a. Use parallel structure.</li><li>b. Use various types of phrases (noun, verb, adjectival, adverbial, participial, prepositional, absolute) and clauses (independent, dependent; noun, relative, adverbial) to convey specific meanings and add variety and interest to writing or presentations.</li></ul>   |
|------------------------------------|--|
|                                    | Standard Relation to Course: Supporting  |
| LAFS.910.RST.2.4:                  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical<br>context relevant to grades 9–10 texts and topics.   |
| LAFS.910.SL.1.1:                   | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> <li>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</li> </ul>  |
| LAFS.910.SL.1.2:                   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.   |
| LAFS.910.SL.1.3:                   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.  |
| LAFS.910.SL.2.4:                   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.  |
| LAFS.910.WHST.3.7:                 | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.   |
| MAFS.K12.MP.5.1:                   | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,<br>concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.<br>Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools<br>might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze<br>graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other<br>mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying<br>assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify<br>relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use<br>technological tools to explore and deepen their understanding of concepts.<br><b>Standard Relation to Course: Supporting</b> |
| MAFS.K12.MP.6.1:                   | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|                                    | Standard Relation to Course: Supporting  |
| MAFS.K12.MP.7.1:                   | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x<br>– y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |
|                                    | Standard Relation to Course: Supporting  |
| DA.912.5.2.1:<br>FLD K12 FLL SL 1- | Sustain rocused attention, respect, and discipline during class, rehearsal, and performance.   |
| LLU.NIZ.LLL.31.1.                  | English language learners communicate for social and instructional purposes within the school setting.   |

### VERSION DESCRIPTION

Students explore the musical traditions of 20th- and 21st-century American and global communities around the world through study of current trends, focusing on the function of music within various cultures (e.g., jazz, world drumming, mariachi, soul, gamelan, Bollywood, digital). Students examine and report on human activities involving music, technology- and culture-related influences on music, and the sounds and structures of music composition. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1300340

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: General Music > Abbreviated Title: MUSIC WORLD Course Length: Year (Y) Course Level: 2

#### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

# Music of the World (#1300340) 2022 - And Beyond

| Name                      | Description   |
|---------------------------|---|
|                           | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:             | Clarifications:   |
|                           | e.g., listening maps, active listening, checklists  |
|                           | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                  |
|                           | composer's intent.  |
| MU.912.C.1.2:             | Clarifications:   |
|                           | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                               |
|                           | Analyze instruments of the world and classify them by common traits.  |
| MU.912.C.1.3:             | Clarifications:   |
|                           | e.g., classical and folk instruments from around the world  |
| MU 912 C 2 2 <sup>.</sup> | Evaluate performance guality in recorded and/or live performances   |
| MU.912.C.2.3:             | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.                                  |
| MU.912.F.1.1:             | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.   |
|                           | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.                                     |
| MU 912 F 2 2 <sup>.</sup> | Clarifications  |
|                           | e.g., community revitalization, industry choosing new locations, cultural and social enrichment   |
|                           | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of       |
| MU.912.F.3.1:             | leadership in school and/or non-school settings.  |
|                           | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and                 |
| WIU.912.F.3.2.            | technology.   |
| MU.912.F.3.3:             | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,   |
|                           | demonstrating skills for use in the workplace.  |
|                           | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:             | Clarifications:   |
|                           | e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                           | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.   |
| MU.912.H.1.2:             | Clarifications:   |
|                           | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|                           | Compare two or more works of a composer across performance media.   |
| MU.912.H.1.3:             | Clarifications:   |
|                           | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.4:             | Analyze how Western music has been influenced by historical and current world cultures.   |
| MU.912.H.1.5:             | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.1:             | Evaluate the social impact of music on specific historical periods.   |
| MU.912.H.2.4:             | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                           | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects                 |
| MU.912.H.3.1:             | musical performance.  |
|                           | Clarifications:   |
|                           | e.g., acoustics, sound amplification, materials, mechanics  |
|                           | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.0.1.1:             | Clarifications:   |
|                           | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
|                           | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied         |
|                           | meaning of the composer/performer.  |
| MU.912.0.3.1:             | Clarifications:   |
|                           | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,                       |
|                           | orchestration   |
|                           | Improvise rhythmic and melodic phrases over harmonic progressions.  |
| MU.912.S.1.1:             | Clarifications:   |
|                           | e.g., using text or scat syllables  |
|                           | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:             | Clarifications:   |
|                           | e.g., texture, mode, form, tempo, voicing   |
| MU 012 5 2 1              | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and |
| WIU.712.3.3.1:            | kinesthetic energy.   |
|                           | Mathematicians who participate in effortful learning both individually and with others:   |

| MA.K12.MTR.1.1: | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
|-----------------|--|
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li></ul>  |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>Select efficient and appropriate methods for solving problems within the given context.<br>Maintain flexibility and accuracy while performing procedures and mental calculations.<br>Complete tasks accurately and with confidence.<br>Adapt procedures to apply them to a new context.<br>Use feedback to improve efficiency when performing calculations.<br>Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:<br>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.   |
| MA.K12.MTR.4.1: | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:<br>• Communicate mathematical ideas, vocabulary and methods effectively.<br>• Analyze the mathematical thinking of others.<br>• Compare the efficiency of a method to those expressed by others.<br>• Compare the efficiency of a method to those expressed by others.<br>• Recognize errors and suggest how to correctly solve the task.<br>• Justify results by explaining methods and processes.<br>• Construct possible arguments based on evidence.<br>Clarifications:<br>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:<br>• Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.<br>• Create opportunities for students to discuss their thinking with peers.<br>• Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.<br>• Develop students' ability to justify methods and compare their responses to the responses of their peers. |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br><b>Clarifications:</b><br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.<br>• Develop <b>students' ability to construct relationships between their current</b> understanding and more sophisticated ways of thinking.<br>Assess the reasonableness of solutions.                       |
| MA.K12.MTR.6.1:                    | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
|------------------------------------|--|
|                                    | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through justifications.  |
| MA.K12.MTR.7.1:                    | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.  <ul> <li>Redesign models and methods to improve accuracy or efficiency</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul> |
| ELA.K12.EE.1.1:                    | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.  |
|                                    | <ul> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> <li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li> </ul>   |
| ELA.K12.EE.2.1:                    | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
| ELA.K12.EE.3.1:                    | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
| ELA.K12.EE.4.1:                    | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
| ELA.K12.EE.5.1:                    | Use the accepted rules governing a specific format to create quality work.  Clarifications:  Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.   |
| ELA.K12.EE.6.1:                    | Use appropriate voice and tone when speaking or writing.  Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.S.2.1:<br>ELD.K12.ELL.SI.1: | Sustain tocused attention, respect, and discipline during class, rehearsal, and performance.<br>English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students explore the musical traditions of 20th- and 21st-century American and global communities around the world through study of current trends, focusing on the function of music within various cultures (e.g., jazz, world drumming, mariachi, soul, gamelan, Bollywood, digital). Students examine and report on human activities involving music, technology- and culture-related influences on music, and the sounds and structures of music composition. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

#### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Florida's Preinternational Baccalaureate Music 1 (#1300800) 2020 - 2022 (current)

| Name               | Description   |
|--------------------|---|
|                    | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:      | Clarifications:   |
|                    | e.g., listening maps, active listening, checklists  |
|                    | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent.   |
| MU.912.C.1.2:      | Clarifications:<br>e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
| MU.912.C.2.1:      | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:      | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.3.1:      | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.   |
|                    | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training.   |
| MU.912.F.2.1:      | Clarifications:<br>e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills  |
| MU.912.F.3.1:      | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.  |
| MU.912.F.3.3:      | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.  |
| MU.912.F.3.4:      | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,<br>and initiative to advance skills and/or knowledge.  |
|                    | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:      | Clarifications:<br>e.g., patriotic, folk, celebration, entertainment, spiritual   |
|                    | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance   |
| MU.912.H.3.1:      | Clarifications:   |
| MIL 012 O 2 1.     | Transfer accented composition conventions and performance practices of a specific style to a contrasting style of music   |
| MU.912.0.2.1:      | Transpose melodies into different modalities through performance and composition.   |
|                    | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.  |
| MU.912.0.3.1:      | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration   |
| MU.912.0.3.2:      | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                    | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   |
| MU.912.S.2.1:      | Clarifications:<br>e.g., memorization, sequential process   |
| MU.912.S.2.2:      | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:      | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
|                    | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:      | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.4:      | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
| MU.912.S.3.5:      | Develop and demonstrate proper vocal or instrumental technique.   |
|                    | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| LAFS.1112.RST.2.4: | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.  |
|                    | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–<br>12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. |

| LAFS.1112.SL.1.1:   | <ul> <li>texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li> </ul>  |
|---------------------|---|
|                     | Standard Relation to Course: Supporting   |
| LAFS.1112.SL.1.2:   | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.   |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.   |
| LAFS.1112.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.   |
| LAFS.1112.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.1112.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; harrow or<br>broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.   |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                     | Attend to precision.  |
| MAFS.K12.MP.6.1:    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                     | Standard Relation to Course: Supporting   |
|                     | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:    | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
| DA 012 S 2 1.       | Standard Relation to Course: Supporting   |
| FLD.K12.FLL SL 1    | English language learners communicate for social and instructional purposes within the school setting   |
| CC0.N12.CCC.01.1.   | English rangaage loannels communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students in this Pre-IB class refine their musicianship and performance skills on a specified instrument or voice. Students prepare for post-secondary and community music experiences and develop artistry independently through a variety of advanced solos, etudes, and excerpts. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental class, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

In addition, the purpose of this Pre-IB course is to prepare students for the International Baccalaureate Diploma Programme (DP). As such, this course will provide academic rigor and relevance through a comprehensive curriculum based on the Next Generation Sunshine State Standards taught with reference to the unique facets of the IB. These facets include interrelatedness of subject areas, holistic view of knowledge, intercultural awareness embracing international issues, and communication as fundamental to learning. Instructional design must provide students with values and opportunities that enable them to develop respect for others and an appreciation of similarities and differences. Learning how to learn and how to critically evaluate information is as important as the content of the disciplines themselves.

#### GENERAL NOTES

**Special Note.** Pre-IB courses have been created by individual schools or school districts since before the MYP started. These courses mapped backwards the Diploma Programme (DP) to prepare students as early as age 14. The IB was never involved in creating or approving these courses. The IB acknowledges that it is important for students to receive preparation for taking part in the DP, and that preparation is the MYP. The IB designed the MYP to address the whole child, which, as a result, has a very different philosophical approach that aims at educating all students aged 11-16. Pre-IB courses usually deal with content, with less emphasis upon the needs of the whole child or the affective domain than the MYP. A school *can have a course that it calls "pre-IB" as long as it makes it clear* that the course and any supporting material have been developed independently of the IB. For this reason, the school must name the *course along the lines of, for example, the "Any School pre-IB course"*.

The IB does not recognize pre-IB courses or courses labeled IB by different school districts which are not an official part of the IBDP or IBCC curriculum. Typically, students enrolled in grade 9 or 10 are not in the IBDP or IBCC programmes.

https://ibanswers.ibo.org/app/answers/detail/a\_id/5414/kw/pre-ib. Florida's Pre-IB courses should only be used in schools where MYP is not offered in order to prepare students to enter the IBDP. Teachers of Florida's Pre-IB courses should have undergone IB training in order to ensure seamless articulation for students within the subject area.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum **developers and teachers which maximizes an ELL's need for communication** and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### **Educator Certifications**

# Florida's Preinternational Baccalaureate Music 1 (#1300800) 2022 - And Beyond

| Course Standards |  |  |
|------------------|--|--|
| Name             | Description  |  |
|                  | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |  |
| MU.912.C.1.1:    | Clarifications:<br>e.g., listening maps, active listening, checklists  |  |
|                  | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent.  |  |
| MU.912.C.1.2:    | Clarifications:<br>e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title   |  |
| MU.912.C.2.1:    | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |  |
| MU.912.C.2.2:    | Evaluate performance quality in recorded and/or live performances.   |  |
| MU.912.C.3.1:    | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |  |
|                  | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training.  |  |
| MU.912.F.2.1:    | Clarifications:<br>e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills   |  |
| MU.912.F.3.1:    | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.   |  |
| MU.912.F.3.3:    | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace. |  |
| MU.912.F.3.4:    | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.    |  |
|                  | Investigate and discuss how a culture's traditions are reflected through its music.  |  |
| MU.912.H.1.1:    | Clarifications:<br>e.g., patriotic, folk, celebration, entertainment, spiritual  |  |
|                  | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.   |  |
| MU.912.H.3.1:    | Clarifications:<br>e.g., acoustics, sound amplification, materials, mechanics  |  |
| MU.912.0.2.1:    | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |  |
| MU.912.0.2.2:    | Transpose melodies into different modalities through performance and composition.  |  |
|                  | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.                   |  |
| MU.912.0.3.1:    | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration                                |  |
| MU.912.0.3.2:    | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |  |
|                  | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.                              |  |
| MU.912.S.2.1:    | Clarifications:<br>e.g., memorization, sequential process  |  |
| MU.912.S.2.2:    | Transfer expressive elements and performance techniques from one piece of music to another.  |  |
| MU.912.S.3.1:    | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.                          |  |
|                  | Sight-read music accurately and expressively to show synthesis of skills.  |  |
| MU.912.S.3.2:    | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |  |
| MU.912.S.3.4:    | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |  |
| MIL 012 S 2 5.   |  |  |
| WIU.912.3.3.5.   | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |  |
|                  | Mathematicians who participate in effortful learning both individually and with others:  |  |
|                  | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will belo with solving the task</li> </ul>  |  |
|                  | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> </ul>  |  |

|                  | <ul><li>Stay engaged and maintain a positive mindset when working to solve tasks.</li><li>Help and support each other when attempting a new method or approach.</li></ul>   |
|------------------|---|
| MA.K12.MTR.1.1:  | Clarifications:   |
|                  | Teachers who encourage students to participate actively in effortful learning both individually and with others:  |
|                  | <ul> <li>Foster perseverance in students by choosing tasks that are challenging.</li> </ul>   |
|                  | Develop students' ability to analyze and problem solve.   |
|                  | Recognize students' effort when solving challenging problems.   |
|                  | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
|                  | Build understanding through modeling and using manipulatives.   |
|                  | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>                   |
|                  | • Express connections between concepts and representations.   |
| MA.K12.MTR.2.1:  | Choose a representation based on the given context or purpose.  |
|                  | Clarifications:   |
|                  | <ul> <li>Help students make connections between concepts and representations.</li> </ul>  |
|                  | Provide opportunities for students to use manipulatives when investigating concepts.  |
|                  | Guide students from concrete to pictorial to abstract representations as understanding progresses.  |
|                  | Snow students that various representations can have different purposes and can be useful in different situations.   |
|                  | Mathematicians who complete tasks with mathematical fluency:  |
|                  | Select efficient and appropriate methods for solving problems within the given context.   |
|                  | Maintain flexibility and accuracy while performing procedures and mental calculations.  |
|                  | <ul> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> </ul>  |
| MA.K12.MTR.3.1:  | Use feedback to improve efficiency when performing calculations.  |
|                  | Clarifications:   |
|                  | <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> </ul>  |
|                  | Offer multiple opportunities for students to practice efficient and generalizable methods.  |
|                  | • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
|                  | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |
|                  | Communicate mathematical ideas, vocabulary and methods effectively.   |
|                  | Analyze the mathematical thinking of others.  |
|                  | <ul> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task</li> </ul>  |
|                  | <ul> <li>Justify results by explaining methods and processes.</li> </ul>  |
| MA.K12.MTR.4.1:  | Construct possible arguments based on evidence.   |
|                  | Clarifications:   |
|                  | <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> </ul>   |
|                  | Create opportunities for students to discuss their thinking with peers.   |
|                  | Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.  |
|                  | • Develop students ability to justify methods and compare their responses to the responses of their peers.<br>Use patterns and structure to help understand and connect mathematical concepts.  |
|                  | Mathematicians who use patterns and structure to help understand and connect mathematical concepts:   |
| MA //12 MTD 5 1  | Focus on relevant details within a problem.   |
|                  | Create plans and procedures to logically order events, steps or ideas to solve problems.  |
|                  | <ul> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> </ul>   |
|                  | Look for similarities among problems.   |
| WA.KT2.WITR.3.T. | Connect solutions of problems to more complicated large-scale situations.   |
|                  | Clarifications:<br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concents:  |
|                  | <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> </ul>  |
|                  | Support students to develop generalizations based on the similarities found among problems.   |
|                  | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul> |
|                  | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:   |
|                  | Estimate to discover possible solutions.  |
|                  | Use benchmark quantities to determine if a solution makes sense.  |

| MA.K12.MTR.6.1:   | <ul> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
|-------------------|--|
|                   | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.  |
| MA.K12.MTR.7.1:   | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts: <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul> |
|                   | Cite evidence to explain and justify reasoning.  |
| ELA.K12.EE.1.1:   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.  |
|                   | <ul> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> </ul>  |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                   | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.3.1:   | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
| ELA.K12.EE.4.1:   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
| ELA.K12.EE.5.1:   | Use the accepted rules governing a specific format to create quality work.<br>Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.KTZ.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

Students in this Pre-IB class refine their musicianship and performance skills on a specified instrument or voice. Students prepare for post-secondary and community music experiences and develop artistry independently through a variety of advanced solos, etudes, and excerpts. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental class, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

In addition, the purpose of this Pre-IB course is to prepare students for the International Baccalaureate Diploma Programme (DP). As such, this course will provide academic rigor and relevance through a comprehensive curriculum based on the Next Generation Sunshine State Standards taught with reference to the unique facets of the IB. These facets include interrelatedness of subject areas, holistic view of knowledge, intercultural awareness embracing international issues, and communication as fundamental to learning. Instructional design must provide students with values and opportunities that enable them to develop respect for others and an appreciation of similarities and differences. Learning how to learn and how to critically evaluate information is as important as the content of the disciplines themselves.

#### **GENERAL NOTES**

**Special Note.** Pre-IB courses have been created by individual schools or school districts since before the MYP started. These courses mapped backwards the Diploma Programme (DP) to prepare students as early as age 14. The IB was never involved in creating or approving these courses. The IB acknowledges that it is important for students to receive preparation for taking part in the DP, and that preparation is the MYP. The IB designed the MYP to address the whole child, which, as a result, has a very different philosophical approach that aims at educating all students aged 11-16. Pre-IB courses usually deal with content, with less emphasis upon the needs of the whole child or the affective domain than the MYP. A school *can have a course that it calls "pre-IB" as long as it makes it clear* that the course and any supporting material have been developed independently of the IB. For this reason, the school must name the *course along the lines of, for example, the "Any School pre-IB course"*.

The IB does not recognize pre-IB courses or courses labeled IB by different school districts which are not an official part of the IBDP or IBCC curriculum. Typically, students enrolled in grade 9 or 10 are not in the IBDP or IBCC programmes.

# https://ibanswers.ibo.org/app/answers/detail/a\_id/5414/kw/pre-ib. Florida's Pre-IB courses should only be used in schools where MYP is not offered in order to prepare students to enter the IBDP. Teachers of Florida's Pre-IB courses should have undergone IB training in order to ensure seamless articulation for students within the subject area.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum **developers and teachers which maximizes an ELL's need for communication** and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Florida's Preinternational Baccalaureate Music 2 (#1300810) 2020 - 2022 (current)

| Name          | Description  |
|---------------|--|
|               | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1: | Clarifications:  |
|               | e.g., listening maps, active listening, checklists   |
| MU.912.C.1.2: | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent.  |
|               | Clarifications:  |
|               | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
| MU.912.C.2.1: | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2: | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1: | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.                                       |
| MU.912.F.1.1: | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.  |
|               | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training.  |
| MU.912.F.2.1: | Clarifications:  |
|               | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills  |
|               | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.  |
| MU.912.F.2.2: | Clarifications:  |
|               | e.g., community revitalization, industry choosing new locations, cultural and social enrichment  |
|               | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.  |
| MU.912.F.2.3: | Clarifications:  |
|               | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel   |
| MU.912.F.3.1: | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.   |
| MU.912.F.3.2: | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.3: | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace. |
| MU.912.F.3.4: | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.    |
|               | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU.912.H.1.2: | Clarifications:  |
|               | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
|               | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3: | Clarifications:<br>e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.5: | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.1: | Evaluate the social impact of music on specific historical periods.  |
| MU.912.H.2.2: | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.  |
| MU.912.H.2.4: | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|               | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1: | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
|               | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.                   |
| MU.912.O.3.1: | Clarifications:  |
|               | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration   |
| MU.912.0.3.2: | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|               | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3: | Clarifications:<br>e.g., texture, mode, form, tempo, voicing   |
|               | Perform and notate, independently and accurately, melodies by ear.   |
| 1             |  |

| MU.912.S.1.4:       | Clarifications:<br>e.g., singing, playing, writing  |
|---------------------|---|
|                     | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   |
| MU.912.S.2.1:       | Clarifications:<br>e.g., memorization, sequential process   |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
|                     | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:       | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                     | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:       | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| LAFS.1112.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.  |
|                     | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–<br>12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.<br>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from  |
|                     | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.  |
| LAFS.1112.SL.1.1:   | <ul> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence: ensure a bearing for a full range of positions on a</li> </ul>   |
|                     | topic or issue: clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives  |
|                     | <ul> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li> </ul>   |
|                     | Standard Relation to Course: Supporting   |
| LAFS.1112.SL.1.2:   | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |
| LAFS.1112.SL.1.3:   | of emphasis, and tone used.   |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.   |
| LAFS.1112.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.   |
| LAFS.1112.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.1112.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.  |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                     |   |
| MAFS.K12.MP.6.1:    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                     | Standard Relation to Course: Supporting<br>Look for and make use of structure.  |
| MAFS.K12.MP.7.1:    | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                     | Standard Relation to Course: Supporting   |

| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment. |
|-------------------|--|
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students with extensive vocal or instrumental ensemble experience refine their critical listening, music literacy, and ensemble skills through the study, rehearsal, and performance of high-quality, advanced literature. Students in this Pre-IB class use reflection and problem-solving skills with increasing independence to improve their performance and musical expression. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source. In addition, the purpose of this Pre-IB course is to prepare students for the International Baccalaureate Diploma Programme (DP). As such, this course will provide academic rigor and relevance through a comprehensive curriculum based on the Next Generation Sunshine State Standards taught with reference to the unique facets of the IB. These facets include interrelatedness of subject areas, holistic view of knowledge, intercultural awareness embracing international issues, and communication as fundamental to learning. Instructional design must provide students with values and opportunities that enable them to develop respect for others and an appreciation of similarities and differences. Learning how to learn and how to critically evaluate information is as important as the content of the disciplines themselves.

#### **GENERAL NOTES**

**Special Note.** Pre-IB courses have been created by individual schools or school districts since before the MYP started. These courses mapped backwards the Diploma Programme (DP) to prepare students as early as age 14. The IB was never involved in creating or approving these courses. The IB acknowledges that it is important for students to receive preparation for taking part in the DP, and that preparation is the MYP. The IB designed the MYP to address the whole child, which, as a result, has a very different philosophical approach that aims at educating all students aged 11-16. Pre-IB courses usually deal with content, with less emphasis upon the needs of the whole child or the affective domain than the MYP. A school *can have a course that it calls "pre-IB" as long as it makes it clear* that the course and any supporting material have been developed independently of the IB. For this reason, the school must name the *course along the lines of, for example, the "Any School pre-IB course".* 

The IB does not recognize pre-IB courses or courses labeled IB by different school districts which are not an official part of the IBDP or IBCC curriculum. Typically, students enrolled in grade 9 or 10 are not in the IBDP or IBCC programmes.

https://ibanswers.ibo.org/app/answers/detail/a\_id/5414/kw/pre-ib. Florida's Pre-IB courses should only be used in schools where MYP is not offered in order to prepare students to enter the IBDP. Teachers of Florida's Pre-IB courses should have undergone IB training in order to ensure seamless articulation for students within the subject area.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum **developers and teachers which maximizes an ELL's need for communication** and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1300810

Number of Credits: One (1) credit

Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: General Music > Abbreviated Title: FL PRE-IB MUSIC 2 Course Length: Year (Y) Course Attributes: • Honors Course Level: 3

#### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

# Florida's Preinternational Baccalaureate Music 2 (#1300810) 2022 - And Beyond

| Name           | Description   |
|----------------|---|
|                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:  | Clarifications:   |
|                | e.g., listening maps, active listening, checklists  |
|                | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                    |
|                | composer's intent.  |
| MU.912.C.1.2:  | Clarifications:   |
|                | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                                 |
| MU.912.C.2.1:  | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:  | Evaluate performance quality in recorded and/or live performances.  |
| MU 912 C 3 1·  | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development         |
| 10.712.0.0.11  | in music.   |
| MU.912.F.1.1:  | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.   |
|                | Design or refine a resume for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training. |
| MU.912.F.2.1:  |   |
|                | Clarifications:   |
|                |   |
|                | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.                                       |
| MU.912.F.2.2:  | Clarifications:   |
|                | e.g., community revitalization, industry choosing new locations, cultural and social enficinment  |
|                | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.                                   |
| MU.912.F.2.3:  | Clarifications:   |
|                | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel  |
| MU.912.F.3.1:  | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of         |
|                | leadership in school and/or non-school settings.  |
| MU.912.F.3.2:  | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.       |
|                | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight.     |
| MU.912.F.3.3:  | demonstrating skills for use in the workplace.  |
|                | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,            |
| WIU.912.F.3.4. | and initiative to advance skills and/or knowledge.  |
|                | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.   |
| MU.912.H.1.2:  | Clarifications:   |
|                | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|                | Compare two or more works of a composer across performance media.   |
| MU.912.H.1.3:  | Clarifications:   |
|                | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.5:  | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.1:  | Evaluate the social impact of music on specific historical periods.   |
| MU.912.H.2.2:  | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.                               |
| MU.912.H.2.4:  | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.0.1.1:  | Clarifications:   |
|                | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1:  | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.                                      |
|                | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied           |
|                | meaning of the composer/performer.  |
| MU.912.0.3.1:  | Clarifications:   |
|                | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>erchestration        |
|                | or chestration  |
| MU.912.0.3.2:  | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:  | Clarifications:   |
|                | e.g., texture, mode, rorm, tempo, voicing   |
|                | Perform and notate, independently and accurately, melodies by ear.  |

| MU.912.S.1.4:    | Clarifications:<br>e.g., singing, playing, writing  |
|------------------|---|
|                  | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature  |
| MU.912.S.2.1:    | Clarifications:<br>e.g., memorization, sequential process   |
| MU.912.S.2.2:    | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:    | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
| MU 912 S 3 2     | Clarifications:   |
| mo., 12.0.0.2.   | e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:    | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
| MU.912.S.3.5:    | Clarifications:   |
|                  | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                  | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> </ul>  |
|                  | Ask questions that will help with solving the task.   |
|                  | Build perseverance by modifying methods as needed while solving a challenging task.   |
|                  | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>  |
| MA.K12.MTR.1.1:  | Clarifications:   |
|                  | Teachers who encourage students to participate actively in effortful learning both individually and with others:  |
|                  | Cultivate a community of growth mindset learners.   |
|                  | Foster perseverance in students by choosing tasks that are challenging.   |
|                  | <ul> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems</li> </ul>   |
|                  | Demonstrate understanding by representing problems in multiple ways   |
|                  | Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
|                  | Build understanding through modeling and using manipulatives.   |
|                  | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.   |
|                  | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>  |
|                  | <ul> <li>Express connections between concepts and representations.</li> <li>Change a representation based on the given context or purpose.</li> </ul>   |
| WA.K12.WITR.2.1: | Clarifications:   |
|                  | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                  | Help students make connections between concepts and representations.  |
|                  | Provide opportunities for students to use manipulatives when investigating concepts.  |
|                  | <ul> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>           |
|                  | Complete tasks with mathematical fluency  |
|                  | Mathematicians who complete tasks with mathematical fluency:  |
|                  | Select efficient and appropriate methods for solving problems within the given context.   |
|                  | Maintain flexibility and accuracy while performing procedures and mental calculations.  |
|                  | Complete tasks accurately and with confidence.  |
| MA.K12.MTR.3.1:  | <ul> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
|                  | Clarifications:   |
|                  | Teachers who encourage students to complete tasks with mathematical fluency:  |
|                  | Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.  |
|                  | <ul> <li>Other multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used</li> </ul> |
|                  | Engage in discussions that reflect on the mathematical thinking of self and others.   |
|                  | Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  |
|                  | Communicate mathematical ideas, vocabulary and methods effectively.   |
| MA.K12.MTR.4.1:  | Analyze the mathematical thinking of others.  |
|                  | Compare the efficiency of a method to those expressed by others.  |
|                  | <ul> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processor.</li> </ul>   |
|                  | <ul> <li>Sustry results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>  |
|                  | Clarifications:   |
|                  | Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:  |
|                  | • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.   |
|                  | <ul> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select: sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> </ul>                           |
|                  | <ul> <li>Select, sequence and present station, work to advance and deepen understanding or correct and increasingly enclent methods.</li> </ul>   |

|                 | • Develop students' ability to justify methods and compare their responses to the responses of their peers.   |
|-----------------|---|
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:   |
|                 | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> </ul>   |
| MA.K12.MTR.5.1: | Connect solutions of problems to more complicated large-scale situations.   |
|                 | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking. |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:   |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>  |
|                 | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.   |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
| MA.K12.MTR.7.1: | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>   |
|                 | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.         • Indicate how various concepts can be applied to other disciplines.   |
|                 | Cite evidence to explain and justify reasoning.   |
| ELA.K12.EE.1.1: | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.   |
|                 | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|                 | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                 | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently.  Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                 | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1: | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                 | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1: | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                 | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students  |

|                   | build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|-------------------|--|
| ELA.K12.EE.5.1:   | Use the accepted rules governing a specific format to create quality work.   |
|                   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.   |
|                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students with extensive vocal or instrumental ensemble experience refine their critical listening, music literacy, and ensemble skills through the study, rehearsal, and performance of high-quality, advanced literature. Students in this Pre-IB class use reflection and problem-solving skills with increasing independence to improve their performance and musical expression. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source. In addition, the purpose of this Pre-IB course is to prepare students for the International Baccalaureate Diploma Programme (DP). As such, this course will provide academic rigor and relevance through a comprehensive curriculum based on the Next Generation Sunshine State Standards taught with reference to the unique facets of the IB. These facets include interrelatedness of subject areas, holistic view of knowledge, intercultural awareness embracing international issues, and communication as fundamental to learning. Instructional design must provide students with values and opportunities that enable them to develop respect for others and an appreciation of similarities and differences. Learning how to learn and how to critically evaluate information is as important as the content of the disciplines themselves.

#### GENERAL NOTES

**Special Note.** Pre-IB courses have been created by individual schools or school districts since before the MYP started. These courses mapped backwards the Diploma Programme (DP) to prepare students as early as age 14. The IB was never involved in creating or approving these courses. The IB acknowledges that it is important for students to receive preparation for taking part in the DP, and that preparation is the MYP. The IB designed the MYP to address the whole child, which, as a result, has a very different philosophical approach that aims at educating all students aged 11-16. Pre-IB courses usually deal with content, with less emphasis upon the needs of the whole child or the affective domain than the MYP. A school *can have a course that it calls "pre-IB" as long as it makes it clear* that the course and any supporting material have been developed independently of the IB. For this reason, the school must name the *course along the lines of, for example, the "Any School pre-IB course"*.

The IB does not recognize pre-IB courses or courses labeled IB by different school districts which are not an official part of the IBDP or IBCC curriculum. Typically, students enrolled in grade 9 or 10 are not in the IBDP or IBCC programmes.

https://ibanswers.ibo.org/app/answers/detail/a\_id/5414/kw/pre-ib. Florida's Pre-IB courses should only be used in schools where MYP is not offered in order to prepare students to enter the IBDP. Teachers of Florida's Pre-IB courses should have undergone IB training in order to ensure seamless articulation for students within the subject area.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum **developers and teachers which maximizes an ELL's need for communication** and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Music Transfer (#1300990) 2015 - 2022 (current)

## General Course Information and Notes

#### VERSION DESCRIPTION

#### SUBJECT AREA TRANSFER NUMBERS

Each course transferred into a Florida public school by an out-of-state or non-public school student should be matched with a course title and number when such course provides substantially the same content. However, a few transfer courses may not be close enough in content to be matched. For those courses a subject area transfer number is provided.

| MA.K12.MTR.2.1: | Choose a representation based on the given context or purpose.  |
|                 | Clarifications:   |
|                 | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                 | Help students make connections between concepts and representations.  |
|                 | Provide opportunities for students to use manipulatives when investigating concepts.  |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.  |
|                 | • Show students that various representations can have different purposes and can be useful in different situations.   |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:   |
|                 | <ul> <li>Select efficient and appropriate methods for solving problems within the given context</li> </ul>  |
|                 | Maintain flexibility and accuracy while performing procedures and mental calculations   |
|                 | Complete tasks accurately and with confidence.  |
|                 | Adapt procedures to apply them to a new context.  |
| MA.K12.MTR.3.1: | • Use feedback to improve efficiency when performing calculations.  |
|                 | Clarifications  |
|                 | Teachers who encourage students to complete tasks with mathematical fluency:  |
|                 | <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> </ul>      |
|                 | Offer multiple opportunities for students to practice efficient and generalizable methods.  |
|                 | • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.                          |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.   |
|                 | Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  |
|                 | Communicate mathematical ideas, vocabulary and methods effectively.   |
|                 | Analyze the mathematical thinking of others.  |
|                 | Compare the efficiency of a method to those expressed by others.  |
|                 | Recognize errors and suggest how to correctly solve the task.   |
|                 | Justify results by explaining methods and processes.  |
| MA.K12.MTR.4.1: | Construct possible arguments based on evidence.   |
|                 | Clarifications:   |
|                 | Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:  |
|                 | • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.                                 |
|                 | Create opportunities for students to discuss their thinking with peers.   |
|                 | • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.                                  |
|                 | • Develop students' ability to justify methods and compare their responses to the responses of their peers.   |
|                 | Use patterns and structure to help understand and connect mathematical concepts.  |
|                 | Mathematicians who use patterns and structure to help understand and connect mathematical concepts:   |
|                 | Focus on relevant details within a problem.   |
|                 | Create plans and procedures to logically order events, steps or ideas to solve problems.  |
|                 | Decompose a complex problem into manageable parts.  |
|                 | Relate previously learned concepts to new concepts.   |

| MA.K12.MTR.5.1: | Look for similarities among problems.   |
|-----------------|---|
|                 | Connect solutions of problems to more complicated large-scale situations.   |
|                 | Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:   |
|                 | Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.  |
|                 | Support students to develop generalizations based on the similarities found among problems.   |
|                 | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>   |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:   |
|                 | Estimate to discover possible solutions.  |
|                 | Use benchmark quantities to determine if a solution makes sense.  |
|                 | Check calculations when solving problems.     Vorify possible calculations by explaining the methods used   |
| MA.K12.MTR.6.1: | <ul> <li>Evaluate results based on the given context.</li> </ul>  |
|                 | Clarifications:   |
|                 | Teachers who encourage students to assess the reasonableness of solutions:  |
|                 | <ul> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ack "Does this solution make sonso? How do you know?"</li> </ul>   |
|                 | <ul> <li>Reinforce that students check their work as they progress within and after a task.</li> </ul>  |
|                 | Strengthen students' ability to verify solutions through justifications.  |
|                 | Apply mathematics to real-world contexts.   |
|                 | Mathematicians who apply mathematics to real-world contexts:  |
|                 | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> </ul>   |
|                 | <ul> <li>Ose models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency</li> </ul>                                      |
| MA.K12.MTR.7.1: | Clarifications:   |
|                 | Teachers who encourage students to apply mathematics to real-world contexts:  |
|                 | <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> </ul>  |
|                 | <ul> <li>Support students as they validate conclusions by comparing them to the given situation.</li> </ul>   |
|                 | Indicate how various concepts can be applied to other disciplines.  |
|                 | Cite evidence to explain and justify reasoning.   |
|                 | Clarifications:   |
|                 | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.   |
|                 | 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.  |
| ELA.K12.EE.1.1: | In and grade, students should use a combination of direct and indirect citations.   |
|                 | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly<br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide |
|                 | referenced by the instructor.   |
|                 | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                 | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                 | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1: | Clarifications:   |
|                 | See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                 | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1: | Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl   |
|                 | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and   |
|                 | Degono.   |
|                 | Clarifications:   |
|                 | In kindergarten, students learn to listen to one another respectfully.  |
| ELA.K12.EE.4.1: | In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The  |
|                 | In grades 2.12, students engage in academic conversations discussing dams and institutes their respective, refining and analytic students   |
|                 | build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                 | Use the accented rules governing a specific format to create quality work   |
|                 | Clarifications:   |
| ELA.K12.EE.5.1: | Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they   |
|                 | must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work  |
|                 | Use appropriate voice and tone when speaking or writing.  |
| 1               | ······································  |

#### VERSION DESCRIPTION

#### SUBJECT AREA TRANSFER NUMBERS

Each course transferred into a Florida public school by an out-of-state or non-public school student should be matched with a course title and number when such course provides substantially the same content. However, a few transfer courses may not be close enough in content to be matched. For those courses a subject area transfer number is provided.

#### GENERAL INFORMATION

Course Number: 1300990

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Eurythmics > Abbreviated Title: MUS TRAN Course Length: Not Applicable

Course Type: Transfer Course Course Status: State Board Approved Grade Level(s): 9,10,11,12

# Guitar 1 (#1301320) 2020 - 2022 (current)

| Name              | Description  |
|-------------------|--|
|                   | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:     | Clarifications:  |
|                   | e.g., listening maps, active listening, checklists   |
| MU.912.C.2.1:     | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU 012 C 2 1.     | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development  |
| MU.912.C.3.1:     | in music.  |
| MU.912.F.3.2:     | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
|                   | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1:     | Clarifications:  |
|                   | e.g., patriotic, folk, celebration, entertainment, spiritual   |
|                   | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.   |
| MU.912.H.3.1:     | Clarifications:  |
|                   | e.g., acoustics, sound amplification, materials, mechanics   |
|                   | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1:     | Clarifications:  |
|                   | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
| MU 912 O 3 2·     | Interpret and perform expressive elements indicated by the musical score and/or conductor  |
|                   | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MIL 912 S 1 3·    | Clarifications   |
| 1017121011101     | e.g., texture, mode, form, tempo, voicing  |
|                   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and  |
| MU.912.S.3.1:     | kinesthetic energy.  |
| MU.912.S.3.4:     | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                   | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:     | Clarifications:  |
|                   | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                   | Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and  |
|                   | issues, building on others' ideas and expressing their own clearly.  |
|                   | a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the   |
|                   | topic, text, or issue to probe and reflect on ideas under discussion.  |
| LAFS.8.SL.1.1:    | b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed.  |
|                   | c. Pose questions that connect the lucas of several speakers and respond to others questions and comments with relevant evidence, observations, and ideas  |
|                   | d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented   |
|                   |  |
|                   | Standard Relation to Course: Supporting Determine the meaning of sumhals, key terms, and other domain specific words and phrases as they are used in a specific scientific or technical  |
| LAFS.910.RST.2.4: | context relevant to grades 9–10 texts and topics.  |
|                   | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. |
|                   | a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from  |
|                   | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.   |
|                   | b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of   |
| LAF3.910.3L.1.1.  | alternate views), clear goals and deadlines, and individual roles as needed.   |
|                   | c. Proper conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas, actively   |
|                   | d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, gualify or justify their   |
|                   | own views and understanding and make new connections in light of the evidence and reasoning presented.   |
|                   |  |
| LAFS.910.SL.1.2:  | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.   |
| LAFS.910.SL.1.3:  | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.  |
| LAFS.910.SL.2.4:  | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.              |
| LAFS 910 WHST 3 7 | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or   |
|                   | broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.  |
|                   | Use appropriate tools strategically.   |

| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|-------------------|---|
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x<br>- y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students with little or no experience develop basic guitar skills and knowledge, including simple and full-strum chords, bass lines and lead sheets, barre and power chords, foundational music literacy and theory, major scales, simple finger-picking patterns, and ensemble skills for a variety of music. Beginning guitarists explore the careers and music of significant performers in a variety of styles. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Instrumental Music (Elementary and Secondary Grades K-12)

# Guitar 1 (#1301320) 2022 - And Beyond

| Name            | Description   |
|-----------------|---|
|                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:   | Clarifications:   |
|                 | e.g., listening maps, active listening, checklists  |
| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.3.1:   | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.  |
| MU.912.F.3.2:   | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.   |
|                 | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:   | Clarifications:   |
|                 |   |
| MIL 012 H 3 1   | Apply knowledge of science, math, and music to demonstrate, through an acoustic of digital performance medium, now sound production anects musical performance.   |
| WIU.912.H.3.1.  | Clarifications:   |
|                 | e.g., acoustics, sound amplification, materials, mechanics  |
|                 | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.O.1.1:   | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
| MIL 912 O 3 2.  | Internet and perform expressive elements indicated by the musical score and/or conductor  |
| 10.712.0.0.2.   | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU 912 S 1 3.   | Clarifications:   |
| 101712.0.110.   | e.g., texture, mode, form, tempo, voicing   |
|                 | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and   |
| MU.912.S.3.1:   | kinesthetic energy.   |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                 | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:   | Clarifications:   |
|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                 | Mathematicians who participate in effortful learning both individually and with others:   |
|                 | Analyze the problem in a way that makes sense given the task.   |
|                 | Ask questions that will help with solving the task.   |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.   |
|                 | Stay engaged and maintain a positive mindset when working to solve tasks.   |
| MA.K12.MTR.1.1: | Help and support each other when attempting a new method or approach.   |
|                 | Clarifications:   |
|                 | Cultivate a community of growth mindset learners  |
|                 | Foster perseverance in students by choosing tasks that are challenging.   |
|                 | <ul> <li>Develop students' ability to analyze and problem solve.</li> </ul>   |
|                 | Recognize students' effort when solving challenging problems.   |
|                 | Demonstrate understanding by representing problems in multiple ways.  |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
|                 | Build understanding through modeling and using manipulatives.   |
|                 | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> </ul>   |
|                 | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>  |
|                 | Express connections between concepts and representations.   |
| MA.K12.MTR.2.1: | Choose a representation based on the given context or purpose.  |
|                 | Clarifications:   |
|                 | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                 | Help students make connections between concepts and representations.  |
|                 | Provide opportunities for students to use manipulatives when investigating concepts.  |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.     Show students that various representations can have different auropses and can be useful in different situations |
|                 | • Show students that valious representations can have unrerent purposes and can be useful in different situations.  |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:   |
|                 | Select efficient and appropriate methods for solving problems within the given context.   |

| MA.K12.MTR.3.1: | <ul> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> </ul>  |
|-----------------|---|
|                 | <ul> <li>Use feedback to improve efficiency when performing calculations.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul> </li> </ul>   |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> </ul>  |
|                 | <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>   |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br><b>Clarifications:</b><br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.<br>• Develop <b>students' ability to construct relationships between their current</b> understanding and more sophisticated ways of thinking. |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br><b>Clarifications:</b><br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.  <ul> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul> </li> <li>Clarifications:</li> </ul>  |
|                 | <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
|                 | Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.   |

| ELA.K12.EE.1.1:   | In 3rd grade, students should use a combination of direct and indirect citations.<br>4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b><br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide<br>referenced by the instructor.<br>6-8 Students continue with previous skills and use a style guide to create a proper citation.<br>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.<br>Read and comprehend grade-level complex texts proficiently. |
|-------------------|---|
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                   | Use the accepted rules geverning a specific format to create quality work   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students with little or no experience develop basic guitar skills and knowledge, including simple and full-strum chords, bass lines and lead sheets, barre and power chords, foundational music literacy and theory, major scales, simple finger-picking patterns, and ensemble skills for a variety of music. Beginning guitarists explore the careers and music of significant performers in a variety of styles. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1301320

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: GUITAR 1 Course Length: Year (Y) Course Level: 2

#### Educator Certifications
# Guitar 2 (#1301330) 2020 - 2022 (current)

| Name              | Description  |
|-------------------|--|
| MU.912.C.1.1:     | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
|                   | Clarifications:  |
|                   | e.g., listening maps, active listening, checklists   |
|                   | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent.  |
| MU.912.C.1.2:     | Clarifications:  |
|                   | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
| MU.912.C.2.1:     | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:     | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:     | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |
| MU.912.F.3.2:     | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
|                   | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1:     | Clarifications:<br>e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                   | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:     | Clarifications:  |
|                   | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU.912.H.2.1:     | Evaluate the social impact of music on specific historical periods.  |
|                   | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.   |
| MU.912.H.3.1:     | Clarifications:<br>e.g., acoustics, sound amplification, materials, mechanics  |
|                   | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.O.1.1:     | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.3.2:     | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                   | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:     | Clarifications:<br>e.g., texture, mode, form, tempo, voicing   |
|                   | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
| MU.912.S.2.1:     | Clarifications:  |
|                   | e.g., memorization, sequential process   |
| MU.912.S.3.1:     | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
| MU.912.S.3.4:     | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                   | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:     | Clarifications:  |
|                   | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| LAFS.910.RST.2.4: | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.  |
| LAFS.910.SL.1.1:  | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> </ul> |
|                   | d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.  |
|                   | Standard Relation to Course: Supporting  |
| LAFS.910.SL.1.2:  | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.   |

| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.   |
|--------------------|---|
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.   |
| LAFS.910.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or<br>broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.   |
|                    | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                    | Attend to precision.  |
| MAFS.K12.MP.6.1:   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                    | Standard Relation to Course: Supporting   |
|                    | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:   | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see  |
|                    | $(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                    | Standard Relation to Course: Supporting   |
| DA.912.S.2.1:      | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students with previous guitar experience build on their skills and knowledge, adding chords, new strumming and finger-picking patterns, movable major and minor scales, basic music theory, more complex bass lines and lead sheets, and ensemble skills for a variety of music. Beginning guitarists explore the careers and music of significant performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|                 | e.g., listening maps, active listening, checklists  |
|                 | Compare using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                   |
|                 | compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                  |
| MU.912.C.1.2:   | Clarifications  |
|                 | e.g., guality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                               |
|                 |   |
| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.3.1:   | in music  |
|                 | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and                 |
| MU.912.F.3.2:   | technology.   |
|                 | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:   | Clarifications:   |
|                 | e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                 | Compare two or more works of a composer across performance media  |
|                 |   |
| MU.912.H.1.3:   | Clarifications:   |
|                 |   |
| MU.912.H.2.1:   | Evaluate the social impact of music on specific historical periods.   |
|                 | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects                 |
| MU.912.H.3.1:   |   |
|                 | Clarifications:   |
|                 | e.g., acoustics, sound amplification, materials, mechanics  |
|                 | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.0.1.1:   | Clarifications:   |
|                 | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                 | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:   | Clarifications:   |
|                 | e.g., texture, mode, form, tempo, voicing   |
|                 | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of   |
|                 | music literature.   |
| MU.912.S.2.1:   | Clarifications:   |
|                 | e.g., memorization, sequential process  |
|                 | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and |
| MU.912.S.3.1:   | kinesthetic energy.   |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                 | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:   | Clarifications:   |
|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                 | Mathematicians who participate in effortful learning both individually and with others:   |
|                 | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> </ul>   |
|                 | Ask questions that will help with solving the task.   |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.   |
|                 | Stay engaged and maintain a positive mindset when working to solve tasks.   |
|                 | Help and support each other when attempting a new method or approach.   |
| MA.K12.MTR.1.1: | Clarifications:   |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:  |
|                 | Cultivate a community of growth mindset learners.   |
|                 | Foster perseverance in students by choosing tasks that are challenging.   |
|                 | Develop students' ability to analyze and problem solve.   |
|                 | Recognize students' effort when solving challenging problems.   |
|                 | Demonstrate understanding by representing problems in multiple ways.  |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
|                 | Build understanding through modeling and using manipulatives  |
| 1               | - baile and of standing through mouthing and using manipulatives.   |

| MA.K12.MTR.2.1: | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.</li></ul>   |
|-----------------|--|
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> <li>Clarifications:</li> <li>Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul> </li> </ul>  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul>         |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts. <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems. <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li></ul></li></ul> |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br><b>Clarifications:</b><br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through justifications.  |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |

| MA.K12.MTR.7.1:   | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>   |
|-------------------|---|
|                   | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.         • Indicate how various concepts can be applied to other disciplines.   |
|                   | Cite evidence to explain and justify reasoning.   |
|                   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.                       |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence |
|                   |   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students with previous guitar experience build on their skills and knowledge, adding chords, new strumming and finger-picking patterns, movable major and minor scales, basic music theory, more complex bass lines and lead sheets, and ensemble skills for a variety of music. Beginning guitarists explore the careers and music of significant performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

## Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit

https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1301330

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: GUITAR 2 Course Length: Year (Y) Course Level: 2

# **Educator Certifications**

# Guitar 3 (#1301340) 2020 - 2022 (current)

| Name               | Description  |
|--------------------|--|
|                    | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:      | Clarifications:<br>e.g., listening maps, active listening, checklists  |
| MU.912.C.1.2:      | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent.  |
|                    | Clarifications:<br>e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title   |
| MU.912.C.2.1:      | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:      | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:      | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |
| MU.912.F.3.2:      | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
|                    | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1:      | Clarifications:<br>e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                    | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:      | Clarifications:<br>e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.2.1:      | Evaluate the social impact of music on specific historical periods.  |
|                    | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.   |
| MU.912.H.3.1:      | Clarifications:<br>e.g., acoustics, sound amplification, materials, mechanics  |
|                    | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1:      | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1:      | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
| MU.912.0.3.2:      | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                    | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:      | Clarifications:<br>e.g., texture, mode, form, tempo, voicing   |
|                    | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
| MU.912.S.2.1:      | Clarifications:<br>e.g., memorization, sequential process  |
| MU.912.S.2.2:      | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:      | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
|                    | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:      | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:      | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.<br>Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:      | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| LAFS.1112.RST.2.4: | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.   |
| LAFS.1112.SL.1.1:  | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> </ul> |
|                    | <ul> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Perspective contradictions and evidence made on all sides of an issue; resolve contradictions</li> </ul>   |

|                                   | when possible; and determine what additional information or research is required to deepen the investigation or complete the task.  |
|-----------------------------------|---|
|                                   | Standard Relation to Course: Supporting   |
| LAFS.1112.SL.1.2:                 | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |
| LAFS.1112.SL.1.3:                 | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.   |
| LAFS.1112.SL.2.4:                 | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.   |
| LAFS.1112.WHST.3.7:               | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or<br>broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.   |
|                                   | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:                  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                                   | Attend to precision.  |
| MAFS.K12.MP.6.1:                  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                                   | Standard Relation to Course: Supporting   |
|                                   | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:                  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                                   | Standard Relation to Course: Supporting   |
| DA.912.S.2.1:<br>ELD K12 ELL SL 1 | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| LED. N12. LEL. 31. 1.             | English langadge learners commanicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students with previous experience strengthen their guitar skills and knowledge, adding a variety of chords; refining finger-picking and strumming patterns; reading notation in 1st, 2nd, and 5th position; and learning stylistic nuances, left-hand technique, and alternative fingering. Guitarists readily use tablature and standard notation, study the work of significant musicians, and develop significant self-assessment skills. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. | 10.712.3.1.3.                   | e.g., texture, mode, form, tempo, voicing  |
|                                 | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of  |
|                                 | music literature.  |
| MU.912.S.2.1:                   | Clarifications:  |
|                                 | e.g., memorization, sequential process   |
| MU.912.S.2.2:                   | Transfer expressive elements and performance techniques from one piece of music to another.  |
|                                 | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and  |
| MU.912.S.3.1:                   | kinesthetic energy.  |
|                                 | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:                   | Clarifications:  |
|                                 | e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.4:                   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                                 | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:                   | Clarifications:  |
|                                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                                 | Mathematicians who participate in effortful learning both individually and with others:  |
|                                 | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> </ul>  |
|                                 | Ask questions that will help with solving the task.  |
|                                 | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> </ul>  |
|                                 | Stay engaged and maintain a positive mindset when working to solve tasks.  |
| MA.K12.MTR.1.1:                 | Heip and support each other when attempting a new method or approach.  |
|                                 | Clarifications:  |
|                                 | <ul> <li>eachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners</li> </ul>  |
|                                 | Foster perseverance in students by choosing tasks that are challenging   |
| 1                               | PP. P P P P P PP. P P P PP. P. |

|                 | <ul><li>Develop students' ability to analyze and problem solve.</li><li>Recognize students' effort when solving challenging problems.</li></ul>  |
|-----------------|--|
| MA.K12.MTR.2.1: | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                 | <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>  |
|                 | Clarifications:         Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:         Help students make connections between concepts and representations.         Provide opportunities for students to use manipulatives when investigating concepts.         Guide students from concrete to pictorial to abstract representations as understanding progresses.         Show students that various representations can have different purposes and can be useful in different situations.   |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>• Select efficient and appropriate methods for solving problems within the given context.<br>• Maintain flexibility and accuracy while performing procedures and mental calculations.<br>• Complete tasks accurately and with confidence.<br>• Adapt procedures to apply them to a new context  |
| MA.K12.MTR.3.1: | <ul> <li>Use feedback to improve efficiency when performing calculations.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul> </li> </ul>                                    |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>                   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>                  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>           |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  • Estimate to discover possible solutions.  |
| MA.K12.MTR.6.1: | <ul> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
|                 | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.   |

|                                    | <ul> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
|------------------------------------|--|
| MA.K12.MTR.7.1:                    | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications: <ul> <li>Percover who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> <li>Clarifications: <ul> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.</li> </ul> </li> </ul> |
| ELA.K12.EE.1.1:                    | <ul> <li>In 3rd grade, students should use a combination of direct and indirect citations.</li> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> <li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li> </ul>  |
| ELA.K12.EE.2.1:                    | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
| ELA.K12.EE.3.1:                    | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
| ELA.K12.EE.4.1:                    | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.  In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
| ELA.K12.EE.5.1:                    | Use the accepted rules governing a specific format to create quality work.<br>Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
| ELA.K12.EE.6.1:                    | Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.S.2.1:<br>ELD.K12.ELL.SI.1: | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.<br>English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

Students with previous experience strengthen their guitar skills and knowledge, adding a variety of chords; refining finger-picking and strumming patterns; reading notation in 1st, 2nd, and 5th position; and learning stylistic nuances, left-hand technique, and alternative fingering. Guitarists readily use tablature and standard notation, study the work of significant musicians, and develop significant self-assessment skills. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## **GENERAL NOTES**

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

Course Number: 1301340

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: GUITAR 3 Course Length: Year (Y) Course Level: 2

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts

## **Educator Certifications**

# Guitar 4 Honors (#1301350) 2020 - 2022 (current)

| Name                          | Description  |
|-------------------------------|--|
|                               | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:                 | Clarifications:  |
|                               | e.g., listening maps, active listening, checklists   |
|                               | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the   |
| MU 010 C 1 0.                 | composer's intent.   |
| MU.912.C.1.2:                 | Clarifications:  |
|                               | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
| MU.912.C.2.1:                 | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:                 | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:                 | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music  |
| MU.912.F.1.2:                 | Incorporate or adapt new, emerging, or previously unfamiliar technology to create an innovative composition, music project, or related product.  |
|                               | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training.  |
| MU.912.F.2.1:                 | Clarifications   |
|                               | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills  |
|                               | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.  |
| MU.912.F.2.3:                 | Clarifications:  |
|                               | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel   |
|                               | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and  |
| MU.912.F.3.2:                 | technology.  |
| MU.912.F.3.3:                 | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.                     |
| MU 912 F 3 4                  | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,   |
|                               | and initiative to advance skills and/or knowledge.   |
|                               | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:                 | Clarifications:  |
|                               |  |
| MU.912.H.1.4:<br>MIL912 H 2 2 | Analyze new western musical trends, including audience environments and music acquisition, to predict possible directions of music   |
| WO.712.11.2.2.                | Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of<br>Interest to demostrate the ability to make transfers across contexts. |
|                               |  |
| MU.912.H.3.2:                 | e.g., music and health. Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public   |
|                               | speaking   |
|                               | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1:                 | Clarifications:  |
|                               | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
| MU.912.0.2.1:                 | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
| MU.912.0.2.2:                 | Transpose melodies into different modalities through performance and composition.  |
|                               | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied  |
|                               | meaning of the composer/performer.   |
| MU.912.0.3.1:                 | Clarifications:  |
|                               | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, narmonic structure, timbre choice, rhythm, orchestration  |
| MU 012 O 2 2.                 | Interpret and perform expressive elements indicated by the musical score and/or conductor  |
| WIU.912.0.3.2.                | Arrange a musical work by manipulating two or more aspects of the composition  |
| MIL 012 S 1 3.                | Clarifications:  |
| 10.912.3.1.3.                 | e.g., texture, mode, form, tempo, voicing  |
|                               | Perform and notate independently and accurately, melodies by ear   |
| MIL 912 S 1 4·                | Clarifications:  |
| 10.712.0.1.1.                 | e.g., singing, playing, writing  |
|                               | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of  |
|                               | music literature.  |
| MU.912.S.2.1:                 | Clarifications:  |
|                               | e.g., memorization, sequential process   |
|                               |  |

| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.   |
|---------------------|---|
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and   |
|                     | kinesthetic energy.   |
|                     | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:       | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                     | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:       | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| LAFS.1112.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.  |
| LAFS.1112.SL.1.1:   | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li> </ul>                             |
|                     | Standard Relation to Course: Supporting   |
| LAFS.1112.SL.1.2:   | decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.   |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.   |
| LAFS.1112.SL.2.5:   | Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.   |
| LAFS.1112.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.1112.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.  |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
| MAFS.K12.MP.6.1:    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. <b>Standard Relation to Course: Supporting</b>  |
|                     | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:    | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see $7 \times 8$ equals the well remembered $7 \times 5 + 7 \times 3$ , in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as $2 \times 7$ and the 9 as $2 + 7$ . They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |
|                     | Standard Relation to Course: Supporting   |
| DA.912.S.2.1:       | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1:   | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students with considerable experience broaden their guitar skills and knowledge, adding left- and right-hand techniques and stylistic nuances; work with classical etudes and ensemble performance literature; and become familiar with modes and jazz chords. Guitarists extend their reading and theory skills and add to their knowledge of significant musicians through history. In keeping with the rigor expected in an Honors course, students undertake independent study that includes synthesis of learning and experience. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

# GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

|  | Course Path: Section: Grades PreK to 12 Education      |
|--|--|
| Course Number: 1201250                       | Courses > Grade Group: Grades 9 to 12 and Adult        |
| Course Number: 1501550                       | Education Courses > <b>Subject</b> : Music Education > |
|  | SubSubject: Instrumental Music >                       |
|  | Abbreviated Title: GUITAR 4 HONORS                     |
| Number of Credits: One (1) credit            | Course Length: Year (Y)                                |
|  | Course Attributes:                                     |

| Course Type: Core Academic Course            | Course Level: 3  |
| Course Status: Course Approved               |  |
| Grade Level(s): 9,10,11,12                   |  |
| Graduation Requirement: Performing/Fine Arts |  |

### **Educator Certifications**

# Guitar 4 Honors (#1301350) 2022 - And Beyond

| Name                      | Description   |
|---------------------------|---|
|                           | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:             | Clarifications:   |
|                           | e.g., listening maps, active listening, checklists  |
|                           | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                |
|                           | composer's intent.  |
| MU.912.C.1.2:             | Clarifications:   |
|                           | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                             |
| MU.912.C.2.1:             | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:             | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.3.1:             | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development     |
| MIL 012 E 1 2.            | In music.   |
| 110.912.1.1.2.            | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music       |
|                           | training.   |
| MU.912.F.2.1:             | Clarifications:   |
|                           | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills                       |
|                           | Compare the organizational structure of a professional orchestra, chorus, guintet, or other ensemble to that of a business.                               |
| MU 912 F 2 3 <sup>.</sup> | Clarifications:   |
| 10.712.1.2.0.             | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel  |
|                           | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and               |
| MU.912.F.3.2:             | technology.   |
| MII 912 F 3 3.            | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, |
| 10.712.1.0.0.             | demonstrating skills for use in the workplace.  |
| MU.912.F.3.4:             | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,        |
|                           | and initiative to advance skills and/or knowledge.  |
| MU 012 U 1 2.             |   |
| MIU.912.H.1.3.            | e.g., orchestral and choral: guitar and string guartet: piano solo and piano concerto   |
| MII 912 H 1 <i>А</i> ·    | Analyze how Western music has been influenced by historical and current world cultures  |
| MU.912.H.2.2:             | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.                           |
|                           | Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of       |
|                           | interest to demonstrate the ability to make transfers across contexts.  |
| MU.912.H.3.2:             | Clarifications:   |
|                           | e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public      |
|                           | speaking  |
|                           | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.0.1.1:             | Clarifications:   |
|                           | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1:             | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.                                  |
| MU.912.0.2.2:             | Transpose melodies into different modalities through performance and composition.   |
|                           | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied       |
|                           |   |
| MU.912.0.3.1:             | Clarifications:   |
|                           | orchestration   |
| MU 912 O 3 2·             | Interpret and perform expressive elements indicated by the musical score and/or conductor   |
| 10.712.0.0.2.             | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MIL 912 S 1 3.            | Clarifications:   |
| WIG: 712:0:11:0:          | e.g., texture, mode, form, tempo, voicing   |
|                           | Perform and notate independently and accurately, melodies by ear  |
| MIL 912 S 1 <i>A</i> ·    | Clarifications:   |
| 110.712.3.1.4.            | e.g., singing, playing, writing   |
|                           | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of |
|                           | music literature.   |
| MU.912.S.2.1:             | Clarifications:   |
|                           | e.g., memorization, sequential process  |
|                           |   |

| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.  |
|-----------------|--|
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
| MU.912.S.3.2:   | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                 | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> </ul>   |
|                 | Foster perseverance in students by choosing tasks that are challenging.  |
|                 | <ul> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>   |
|                 | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> </ul>   |
| MA.K12.MTR.2.1: | <ul> <li>Choose a representation based on the given context or purpose.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul> </li> </ul>  |
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used. Encode in discussion the performance of performing of performing if a performing if a more efficient method could have been used.</li></ul>  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts: <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> </ul>  |

| MA.K12.MTR.5.1:                                       | <ul> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |
|---|---|
|   | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>  |
| MA.K12.MTR.6.1:                                       | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask. "Does this solution make sense? How do you know?"  |
|   | <ul> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul> Apply mathematics to real-world contexts.  |
|   | <ul> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> </ul>  |
| MA.K12.MTR.7.1:                                       | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>  |
| ELA.K12.EE.1.1:                                       | Cite evidence to explain and justify reasoning.  Clarifications:  K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.  4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|   | 6-8 Students continue with previous skills and use a style quide to create a proper citation  |
|   | <ul><li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li><li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li></ul>   |
| ELA.K12.EE.2.1:                                       | 6-8 Students continue with previous skills and use a style guide to create a proper citation.     9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.      Read and comprehend grade-level complex texts proficiently.      Clarifications:     See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.2.1:<br>ELA.K12.EE.3.1:                    | <ul> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> <li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li> <li>Read and comprehend grade-level complex texts proficiently.</li> <li>Clarifications:<br/>See Text Complexity for grade-level complexity bands and a text complexity rubric.</li> <li>Make inferences to support comprehension.</li> <li>Clarifications:<br/>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</li> </ul>   |
| ELA.K12.EE.2.1:<br>ELA.K12.EE.3.1:<br>ELA.K12.EE.4.1: | 6-8 Students continue with previous skills and use a style guide to create a proper citation.     9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.      Read and comprehend grade-level complex texts proficiently.      Clarifications:     See Text Complexity for grade-level complexity bands and a text complexity rubric.      Make inferences to support comprehension.      Clarifications:     Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smilling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.      Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.      Clarifications:     In kindergarten, students learn to listen to one another respectfully.     In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.     In grades 3-12, students engage in academic conversations. |

|                   | Use appropriate voice and tone when speaking or writing.  |
|-------------------|---|
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students with considerable experience broaden their guitar skills and knowledge, adding left- and right-hand techniques and stylistic nuances; work with classical etudes and ensemble performance literature; and become familiar with modes and jazz chords. Guitarists extend their reading and theory skills and add to their knowledge of significant musicians through history. In keeping with the rigor expected in an Honors course, students undertake independent study that includes synthesis of learning and experience. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

 Course Number: 1301350
 Courses > Grade Group: G

 Education Courses > Subje
 SubSubject: Instrumental

 Abbreviated Title: GUITAI
 Abbreviated Title: GUITAI

 Number of Credits: One (1) credit
 Course Length: Year (Y)

 Course Type: Core Academic Course
 • Honors

 Course Status: State Board Approved
 Grade Level(s): 9,10,11,12

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: GUITAR 4 HONORS Course Length: Year (Y) Course Attributes: • Honors Course Level: 3

### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

Graduation Requirement: Performing/Fine Arts

# Keyboard 1 (#1301360) 2020 - 2022 (current)

| Name                      | Description   |
|---------------------------|---|
|                           | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:             | Clarifications:   |
|                           | e.g., listening maps, active listening, checklists  |
| MU.912.C.2.1:             | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:             | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.3.1:             | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.   |
| MU.912.F.1.1:             | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.   |
| MU.912.F.3.2:             | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and   |
|                           | technology.   |
| MU.912.F.3.3:             | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.                                      |
|                           | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:             | Clarifications:<br>e.g., patriotic, folk, celebration, entertainment, spiritual   |
|                           | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.   |
| MU 912 H 1 2 <sup>.</sup> | Clarifications:   |
|                           | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
| MU 912 H 1 5              | Analyze music within cultures to gain understanding of authentic performance practices  |
|                           | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects   |
|                           | musical performance.  |
| MU.912.H.3.1:             | Clarifications:   |
|                           | e.g., acoustics, sound amplification, materials, mechanics  |
|                           | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.0.1.1:             | Clarifications:   |
|                           | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.3.2:             | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                           | Improvise rhythmic and melodic phrases over harmonic progressions.  |
| MU.912.S.1.1:             | Clarifications:<br>e.g., using text or scat syllables   |
|                           | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:             | Clarifications:   |
|                           | e.g., texture, mode, form, tempo, voicing   |
|                           | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and   |
| MU.912.S.3.1:             | kinesthetic energy.   |
| MU.912.S.3.4:             | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                           | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:             | Clarifications:   |
|                           | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                           | Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.  |
|                           | <ul> <li>b. Use various types of phrases (noun, verb, adjectival, adverbial, participial, prepositional, absolute) and clauses (independent, dependent; noun,</li> </ul>  |
| LAFS.910.L.1.1:           | relative, adverbial) to convey specific meanings and add variety and interest to writing or presentations.  |
|                           | Chardend Balation to Course Course the  |
|                           | Standard Relation to Course: Supporting Determine the meaning of symbols, key terms, and other domain specific words and phrases as they are used in a specific scientific or technical   |
| LAFS.910.RST.2.4:         | context relevant to grades 9–10 texts and topics.   |
|                           | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9-10  |
|                           | topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.   |
|                           | a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from   |
| LAFS.910.SL.1.1:          | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.  |
|                           | b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of  |
|                           | alternate views), clear goals and deadlines, and individual roles as needed.  |
|                           | c. Fromer conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. |
|                           | d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and when warranted gualify or justify their  |
|                           | own views and understanding and make new connections in light of the evidence and reasoning presented.  |
|                           |   |

|                    | Standard Relation to Course: Supporting   |
|--------------------|---|
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.  |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.   |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.   |
| LAFS.910.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.  |
| MAFS.K12.MP.5.1:   | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,<br>concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.<br>Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools<br>might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze<br>graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other<br>mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying<br>assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify<br>relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use<br>technological tools to explore and deepen their understanding of concepts.<br>Standard Relation to Course: Supporting |
|                    | Attend to precision.  |
| MAFS.K12.MP.6.1:   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                    | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:   | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting  |
| DA.912.S.2.1:      | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students build fundamental piano techniques while learning to read music, acquire and apply knowledge of basic music theory, and explore the role of keyboard music in history and culture. Beginning pianists develop skills in analytical listening and explore musical creativity in the form of basic improvisation and basic composition. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## GENERAL NOTES

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|                         | Mathematicians who demonstrate understanding by representing problems in multiple ways.   |
|                         |   |
|                         | Build understanding through modeling and using manipulatives.   |
|                         | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Brogress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul> |
|                         | • Trogress from modeling problems with objects and drawings to daily algorithms and equations.  |

| MA.K12.MTR.2.1: | <ul> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>   |
|-----------------|---|
| WART2.WITK.2.1. |   |
|                 | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                 | Help students make connections between concepts and representations.  |
|                 | Provide opportunities for students to use manipulatives when investigating concepts.  |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.  |
|                 | Show students that various representations can have different purposes and can be useful in different situations.   |
|                 | Complete tasks with mathematical fluency.   |
|                 | Mathematicians who complete tasks with mathematical fluency:  |
|                 | Select efficient and appropriate methods for solving problems within the given context.   |
|                 | Maintain flexibility and accuracy while performing procedures and mental calculations.  |
|                 | Complete tasks accurately and with confidence.  |
| MA.K12.MTR.3.1: | Use feedback to improve efficiency when performing calculations.  |
|                 | Clarifications:   |
|                 | Teachers who encourage students to complete tasks with mathematical fluency:  |
|                 | • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.  |
|                 | Offer multiple opportunities for students to practice efficient and generalizable methods.  |
|                 | • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |
|                 | Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others.  |
|                 | Communicate mathematical ideas, vocabulary and methods effectively.   |
|                 | <ul> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> </ul>  |
|                 | Recognize errors and suggest how to correctly solve the task.   |
|                 | <ul> <li>Justify results by explaining methods and processes.</li> </ul>  |
| MA.K12.MTR.4.1: | Construct possible arguments based on evidence.   |
|                 | Clarifications:   |
|                 | Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:  |
|                 | • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.   |
|                 | <ul> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly officient methods.</li> </ul>   |
|                 | <ul> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>   |
|                 | Use patterns and structure to help understand and connect mathematical concepts.  |
|                 | Mathematicians who use patterns and structure to help understand and connect mathematical concepts:   |
|                 | Focus on relevant details within a problem.   |
|                 | Create plans and procedures to logically order events, steps or ideas to solve problems.  |
|                 | Decompose a complex problem into manageable parts.  |
|                 | Relate previously learned concepts to new concepts.   |
| MA.K12.MTR.5.1: | Look for similarities among problems.   |
|                 | Connect solutions of problems to more complicated large-scale situations.   |
|                 | Clarifications:   |
|                 | Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts:  |
|                 | <ul> <li>Support students to develop generalizations based on the similarities found among problems.</li> </ul>   |
|                 | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> </ul>  |
|                 | • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.   |
|                 | Assess the reasonableness of solutions.   |
|                 | Mathematicians who assess the reasonableness of solutions:  |
|                 |   |
|                 | Estimate to discover possible solutions.  |
|                 | <ul><li>Estimate to discover possible solutions.</li><li>Use benchmark quantities to determine if a solution makes sense.</li></ul>   |
|                 | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> </ul>   |
|                 | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> </ul>  |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>  |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>  |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul> Clarifications: Teachers who encourage students to assess the reasonableness of solutions: <ul> <li>Have students estimate or predict solutions prior to solving</li> </ul>  |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul> Clarifications: Teachers who encourage students to assess the reasonableness of solutions: <ul> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> </ul>  |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul> Clarifications: Teachers who encourage students to assess the reasonableness of solutions: <ul> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li></ul>   |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul> Clarifications: Teachers who encourage students to assess the reasonableness of solutions: <ul> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |

Mathematicians who apply mathematics to real-world contexts: <ul> <li>Connect mathematical concepts to everyday experiences.</li> </ul> |

|                   | Perform investigations to gather data or determine if a method is appropriate.     Redesign models and methods to improve accuracy or efficiency.   |
|-------------------|---|
| MA.K12.MTR.7.1:   | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>  |
|                   | Cite evidence to explain and justify reasoning.   |
| ELA.K12.EE.1.1:   | <ul> <li>Clarifications:</li> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> </ul> |
|                   | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.<br>In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students   |
|                   | build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students build fundamental piano techniques while learning to read music, acquire and apply knowledge of basic music theory, and explore the role of keyboard music in history and culture. Beginning pianists develop skills in analytical listening and explore musical creativity in the form of basic improvisation and basic composition. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

Course Number: 1301360

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: KEYBD 1 Course Length: Year (Y) Course Level: 2

#### **Educator Certifications**

# Keyboard 2 (#1301370) 2020 - 2022 (current)

| Name          | Description  |
|---------------|--|
|               | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1: | Clarifications:<br>e.g., listening maps, active listening, checklists  |
|               | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent.  |
| MU.912.C.1.2: | Clarifications:<br>e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title   |
| MU.912.C.2.1: | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2: | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1: | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |
| MU.912.F.1.1: | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.  |
| MU.912.F.3.2: | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.3: | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace. |
| MU.912.F.3.4: | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.    |
|               | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1: | Clarifications:<br>e.g., patriotic, folk, celebration, entertainment, spiritual  |
|               | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU.912.H.1.2: | Clarifications:  |
|               | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
|               | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3: | Clarifications:<br>e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.5: | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.4: | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|               | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.   |
| MU.912.H.3.1: | Clarifications:<br>e.g., acoustics, sound amplification, materials, mechanics  |
|               | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.O.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.3.2: | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|               | Improvise rhythmic and melodic phrases over harmonic progressions.   |
| MU.912.S.1.1: | Clarifications:<br>e.g., using text or scat syllables  |
| MU.912.S.1.2: | Compose music for voices and/or acoustic, digital, or electronic instruments.  |
|               | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3: | Clarifications:<br>e.g., texture, mode, form, tempo, voicing   |
|               | Perform and notate, independently and accurately, melodies by ear.   |
| MU.912.S.1.4: | Clarifications:  |
|               | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of  |
| MU.912.S.2.1: | music literature.  |
|               | Clarifications:<br>e.g., memorization, sequential process  |
| MU.912.S.3.1: | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy                           |
| MU.912.S.3.4: | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|               | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5: | Clarifications:  |

|                    | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|--------------------|---|
| LAFS.910.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.   |
|                    | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.  |
|                    | a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from   |
|                    | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.  |
|                    | b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of  |
| LAFS.910.SL.1.1:   | alternate views), clear goals and deadlines, and individual roles as needed.  |
|                    | c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively  |
|                    | incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.  |
|                    | a. Respond thought unity to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, quality of justify their own views and understanding and make new connections in light of the evidence and reasoning presented.  |
|                    | own views and understanding and make new connections in light of the evidence and reasoning presented.  |
|                    | Standard Relation to Course: Supporting   |
| LAFS.910.SL.1.2:   | integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and<br>accuracy of each source  |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.   |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.   |
| LAFS.910.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or<br>broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.   |
|                    | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                    | Attend to precision.  |
| MAFS.K12.MP.6.1:   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                    | Standard Relation to Course: Supporting   |
|                    | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:   | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                    | Standard Relation to Course: Supporting   |
| DA.912.S.2.1:      | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

Students build on previous plano techniques and skills through reading music, acquiring and applying knowledge of music theory, and exploring the role of keyboard music in history and culture. Students learn repertoire from various styles and time periods, exploring the historical influence keyboards have had on music performance and composition. Students explore the basic tools of music technology (i.e., MIDI keyboards). Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

# **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional

purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. ## GENERAL INFORMATION

Course Number: 1301370

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: KEYBD 2 Course Length: Year (Y) Course Level: 2

## **Educator Certifications**

# Keyboard 2 (#1301370) 2022 - And Beyond

| Name            | Description  |
|-----------------|--|
|                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:   | Clarifications:  |
|                 | e.g., listening maps, active listening, checklists   |
|                 | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent.  |
| MU.912.C.1.2:   | Clarifications:  |
|                 | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, inte   |
| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.3.1:   | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development to personal development                            |
| MIL 912 F 1 1.  | In music.  |
| MU.912.F.3.2:   | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.3:   | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace. |
| MU.912.F.3.4:   | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.    |
|                 | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1:   | Clarifications:<br>e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                 | Compare the work of and influences on two or more exemplary composers in the performance medium studied in class   |
| MIL 012 II 1 2. | Clarifications:  |
| WU.912.n.1.2.   | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
|                 | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:   | Clarifications:<br>e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.5:   | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.4:   | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|                 | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.   |
| MU.912.H.3.1:   | Clarifications:<br>e.g., acoustics, sound amplification, materials, mechanics  |
|                 | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.O.1.1:   | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
|                 | Interpret and perform expressive elements indicated by the musical score and/or conductor  |
| 10.912.0.3.2.   | Improvise rhythmic and melodic phrases over harmonic progressions  |
| MU.912.S.1.1:   | Clarifications:<br>e.g., using text or scat syllables  |
| MIL 912 S 1 2·  | Compose music for voices and/or acoustic idiatal or electronic instruments   |
| 10.712.3.1.2.   | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:   | Clarifications:<br>e.g., texture, mode, form, tempo, voicing   |
|                 | Perform and notate, independently and accurately, melodies by ear  |
| MU 012 S 1 4.   |  |
| 1010.912.3.1.4. | e.g., singing, playing, writing  |
| MU.912.S.2.1:   | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.                              |
|                 | Clarifications:<br>e.g., memorization, sequential process  |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.                          |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                 | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:   | Clarifications:  |

|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|-----------------|--|
|                 | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>   |
| MA.K12.MTR.1.1: | <ul> <li>Help and support each other when attempting a new method of approach.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul> </li> </ul>   |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li></ul>   |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>Select efficient and appropriate methods for solving problems within the given context.<br>Maintain flexibility and accuracy while performing procedures and mental calculations.<br>Complete tasks accurately and with confidence.<br>Adapt procedures to apply them to a new context.<br>Use feedback to improve efficiency when performing calculations.<br>Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:<br>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>Offer multiple opportunities for students to practice efficient and generalizable methods.<br>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> </li> </ul></li></ul> |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>Focus on relevant details within a problem.<br>Create plans and procedures to logically order events, steps or ideas to solve problems.<br>Decompose a complex problem into manageable parts.<br>Relate previously learned concepts to new concepts.<br>Look for similarities among problems.<br>Connect solutions of problems to more complicated large-scale situations.<br>Clarifications:<br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>Support students to develop generalizations based on the similarities found among problems.<br>Provide opportunities for students to create plans and procedures to solve problems.   |

| MA.K12.MTR.6.1:                    | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:   |
|------------------------------------|---|
|                                    | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>  |
|                                    | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.   |
|                                    | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
| MA.K12.MTR.7.1:                    | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>   |
|                                    | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.         • Indicate how various concepts can be applied to other disciplines.                                     |
|                                    | Cite evidence to explain and justify reasoning.   |
| ELA.K12.EE.1.1:                    | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
|                                    | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b> quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|                                    | <ul><li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li><li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li></ul>   |
|                                    | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:                    | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                                    | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:                    | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                                    | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:                    | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                                    | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                                    | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:                    | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                                    | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:                    | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.S.2.1:<br>ELD.K12.ELL.SI.1: | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.<br>English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students build on previous piano techniques and skills through reading music, acquiring and applying knowledge of music theory, and exploring the role of keyboard music in history and culture. Students learn repertoire from various styles and time periods, exploring the historical influence keyboards have had on music performance and composition. Students explore the basic tools of music technology (i.e., MIDI keyboards). Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

## **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### **Educator Certifications**

# Keyboard 3 (#1301380) 2020 - 2022 (current)

| Name          | Description  |
|---------------|--|
|               | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1: | Clarifications:  |
|               | e.g., listening maps, active listening, checklists   |
|               | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the   |
| MU 010 C 1 0. | composer's intent.   |
| MU.912.C.1.2: | Clarifications:  |
|               | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
| MU.912.C.2.1: | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2: | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.2.3: | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.   |
| MU.912.C.3.1: | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.   |
| MU.912.F.1.1: | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.  |
|               | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music  |
| MU.912.F.2.1: | training.  |
|               | Clarifications:  |
|               | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills  |
| MU.912.F.3.1: | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.                     |
| MU.912.F.3.2: | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.3: | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.                   |
| MU.912.F.3.4: | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.                      |
|               | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1: | Clarifications:  |
|               | e.g., patriotic, folk, celebration, entertainment, spiritual   |
|               | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU.912.H.1.2: | Clarifications:<br>e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|               | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3: | Clarifications:  |
|               | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU.912.H.1.5: | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.1: | Evaluate the social impact of music on specific historical periods.  |
| MU.912.H.2.4: | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|               | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.   |
| MU.912.H.3.1: | Clarifications:  |
|               | e.g., acoustics, sound amplification, materials, mechanics   |
|               | Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of interest to demonstrate the ability to make transfers across contexts. |
| MU 912 H 3 2· | Clarifications   |
|               | e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public speaking  |
|               | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1: | Clarifications:  |
|               | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
| MU.912.0.2.1: | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
| MU.912.0.3.2: | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|               | Improvise rhythmic and melodic phrases over harmonic progressions.   |
| MU.912.S.1.1: | Clarifications:  |
|               | e.g., using text or scat syllables   |
| MU.912.S.1.2: | Compose music for voices and/or acoustic, digital, or electronic instruments.  |
|               | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3: | Clarifications:  |
|                     | e.g., texture, mode, form, tempo, voicing  |
|---------------------|--|
|                     | Perform and notate, independently and accurately, melodies by ear.   |
| MU.912.S.1.4:       | Clarifications:  |
|                     | e.g., singing, playing, writing  |
| MU.912.S.2.1:       | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
|                     | Clarifications:<br>e.g., memorization, sequential process  |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
|                     | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:       | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                     | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:       | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| LAFS.1112.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.   |
| LAFS.1112.SL.1.2:   | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.  |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, poin of emphasis, and tone used.  |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.   |
| LAFS.1112.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.   |
| LAFS.910.SL.1.1:    | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–1 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> <li>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</li> </ul>                 |
|                     | Use appropriate tools strategically.   |
| MAFS.K12.MP.5.1:    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to us technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
| MAFS.K12.MP.6.1:    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|                     | Standard Relation to Course: Supporting  |
|                     |  |
| MAFS.K12.MP.7.1:    | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                     | Standard Relation to Course: Supporting  |

### VERSION DESCRIPTION

Students further develop advanced knowledge of piano techniques, musical literacy, solo and ensemble performance skills, and related musical knowledge, using a variety of advanced piano literature. Students explore the historical influence keyboards have had on music performance and composition, and apply criteria to assess their own and others' piano performances. Students extend their knowledge of music technology (i.e., MIDI keyboards) and its connection to the computer and other sound-generating devices. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

#### GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1301380

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: KEYBD 3 Course Length: Year (Y) Course Level: 2

### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

# Keyboard 3 (#1301380) 2022 - And Beyond

| Name          | Description  |
|---------------|--|
|               | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1: | Clarifications:  |
|               | e.g., listening maps, active listening, checklists   |
|               | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the   |
| MU 010 C 1 0. | composer's intent.   |
| MU.912.C.1.2: | Clarifications:  |
|               | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
| MU.912.C.2.1: | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2: | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.2.3: | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.   |
| MU.912.C.3.1: | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.   |
| MU.912.F.1.1: | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.  |
|               | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music  |
| MU.912.F.2.1: | training.  |
|               | Clarifications:  |
|               | e.g., repertoine lists, technology-based work, ability to research and analyze, and examples or leadership and collaborative skills  |
| MU.912.F.3.1: | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.                     |
| MU.912.F.3.2: | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.3: | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.                   |
| MU.912.F.3.4: | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.                      |
|               | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1: | Clarifications:  |
|               | e.g., patriotic, folk, celebration, entertainment, spiritual   |
|               | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU.912.H.1.2: | Clarifications:<br>e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|               | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3: | Clarifications:  |
|               | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU.912.H.1.5: | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.1: | Evaluate the social impact of music on specific historical periods.  |
| MU.912.H.2.4: | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|               | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.   |
| MU.912.H.3.1: | Clarifications:  |
|               | e.g., acoustics, sound amplification, materials, mechanics   |
|               | Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of interest to demonstrate the ability to make transfers across contexts. |
| MU 912 H 3 2· | Clarifications   |
|               | e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public speaking  |
|               | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1: | Clarifications:  |
|               | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
| MU.912.0.2.1: | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
| MU.912.0.3.2: | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|               | Improvise rhythmic and melodic phrases over harmonic progressions.   |
| MU.912.S.1.1: | Clarifications:  |
|               | e.g., using text or scat syllables   |
| MU.912.S.1.2: | Compose music for voices and/or acoustic, digital, or electronic instruments.  |
|               | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3: | Clarifications:  |

|                 | e.g., texture, mode, form, tempo, voicing  |  |
|-----------------|--|--|
|                 | Perform and notate, independently and accurately, melodies by ear.   |  |
| MU.912.S.1.4:   | Clarifications:  |  |
|                 | e.g., singing, playing, writing  |  |
| MU 012 5 2 1.   | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |  |
| WIU.712.3.2.1.  | Clarifications:<br>e.g., memorization, sequential process  |  |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.  |  |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, an kinesthetic energy.   |  |
|                 | Sight-read music accurately and expressively to show synthesis of skills.  |  |
| MU.912.S.3.2:   | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |  |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |  |
| MU.912.S.3.5:   | Clarifications:  |  |
|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |  |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |  |
|                 | Analyze the problem in a way that makes sense given the task.  |  |
|                 | Ask questions that will help with solving the task.  |  |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.  |  |
|                 | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Using and support each other when attempting a new method or approach.</li> </ul>  |  |
| MA.K12.MTR.1.1: | Help and support each other when attempting a new method or approach.  |  |
|                 | Clarifications:  |  |
|                 | Cultivate a community of growth mindset learners   |  |
|                 | Cultivate a community of growth minuser learners.     Foster perseverance in students by choosing tasks that are challenging   |  |
|                 | <ul> <li>Develop students' ability to analyze and problem solve</li> </ul>   |  |
|                 | <ul> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |  |
|                 | Demonstrate understanding by representing problems in multiple ways  |  |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways:  |  |
|                 |  |  |
|                 | <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Despecent colutions to problems in multiple using objects drawings tables, graphs and equations.</li> </ul>  |  |
|                 | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Decreases from modeling problems with objects and drawings to using place/thms and equations.</li> </ul> |  |
|                 | <ul> <li>Progress nom modeling problems with objects and drawings to using algorithms and equations.</li> <li>Eveness connections between concents and concentations.</li> </ul>   |  |
| MA K12 MTR 2 1  | Choose a representation based on the given context or purpose.   |  |
|                 | Clarifications   |  |
|                 | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:  |  |
|                 | Help students make connections between concepts and representations.   |  |
|                 | Provide opportunities for students to use manipulatives when investigating concepts.   |  |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.   |  |
|                 | Show students that various representations can have different purposes and can be useful in different situations.  |  |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:  |  |
|                 |  |  |
|                 | Select efficient and appropriate methods for solving problems within the given context.  |  |
|                 | Maintain flexibility and accuracy while performing procedures and mental calculations.   |  |
|                 | Complete tasks accurately and with confidence.   |  |
| MA.K12.MTR.3.1: | Adapt proceedies to apply them to a new context.      Ise feedback to improve efficiency when performing calculations  |  |
|                 | • Use recuback to improve entciency when performing calculations.  |  |
|                 | Clarifications:  |  |
|                 | Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately  |  |
|                 | Offer multiple opportunities for students to practice efficient and generalizable methods.   |  |
|                 | Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.   |  |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.  |  |
|                 | mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |  |
|                 | Communicate mathematical ideas, vocabulary and methods effectively.  |  |
|                 | Analyze the mathematical thinking of others.   |  |
|                 | Compare the efficiency of a method to those expressed by others.   |  |
|                 | Recognize errors and suggest how to correctly solve the task.  |  |
| MA.K12.MTR.4.1: | Justify results by explaining methods and processes.   |  |
|                 | construct possible arguments based on evidence.  |  |
|                 | Clarifications:  |  |
| I               | reachers who encourage students to engage in discussions that reject on the mathematical thinking of self and others:  |  |

| 1               | • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.   |
|-----------------|---|
|                 | Create opportunities for students to discuss their thinking with peers.   |
|                 | <ul> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
|                 | Use patterns and structure to help understand and connect mathematical concepts.  |
|                 | Focus on relevant details within a problem  |
|                 | <ul> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> </ul>  |
|                 | Decompose a complex problem into manageable parts.  |
|                 | <ul> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> </ul>  |
| MA.K12.MTR.5.1: | Connect solutions of problems to more complicated large-scale situations.   |
|                 | Clarifications:   |
|                 | <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> </ul>  |
|                 | Support students to develop generalizations based on the similarities found among problems.   |
|                 | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>                 |
|                 | Assess the reasonableness of solutions.   |
|                 | Mathematicians who assess the reasonableness of solutions:  |
|                 | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> </ul>  |
|                 | <ul> <li>Check calculations when solving problems.</li> </ul>   |
|                 | Verify possible solutions by explaining the methods used.     Suchesta equal to the piece explaining the methods used.  |
| MA.K12.MTR.6.1: | Evaluate results based on the given context.  Clarifications:   |
|                 | Teachers who encourage students to assess the reasonableness of solutions:  |
|                 | Have students estimate or predict solutions prior to solving.   |
|                 | <ul> <li>Prompt students to continually ask, Does this solution make sense? How do you know?</li> <li>Reinforce that students check their work as they progress within and after a task.</li> </ul>   |
|                 | • Strengthen students' ability to verify solutions through justifications.  |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
|                 | Connect mathematical concepts to everyday experiences.  |
|                 | Use models and methods to understand, represent and solve problems.   |
| MA.K12.MTR.7.1: | Perform investigations to gather data or determine if a method is appropriate.     Redesign models and methods to improve accuracy or efficiency  |
|                 | Teachers who encourage students to apply mathematics to real-world contexts:  |
|                 | <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to guestion the assurage of their models and methods.</li> </ul>  |
|                 | <ul> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> </ul>   |
|                 | Indicate how various concepts can be applied to other disciplines.  |
|                 | Cite evidence to explain and justify reasoning.   |
|                 | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details   |
|                 | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.   |
|                 | 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.                                   |
| ELA.K12.EE.1.1: | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly   |
|                 | quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide  |
|                 | referenced by the instructor.   |
|                 | 0-0 students continue with previous skills and should be aware of existing style guides and the ways in which they differ   |
|                 | 7 12 stadents continue with previous skins and should be aware or existing style galaes and the ways in which they direr.   |
|                 | Read and comprehend grade-level complex texts proficiently.   |
| ELA.KT2.EE.2.1: | See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                 | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1: | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl  |
|                 | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and   |
|                 | beyond.   |
|                 | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
|                 | In kindergarten, students learn to listen to one another respectfully   |

| ELA.K12.EE.4.1:   | In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.<br>In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |
|-------------------|--|
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

### VERSION DESCRIPTION

Students further develop advanced knowledge of piano techniques, musical literacy, solo and ensemble performance skills, and related musical knowledge, using a variety of advanced piano literature. Students explore the historical influence keyboards have had on music performance and composition, and apply criteria to assess their own and others' piano performances. Students extend their knowledge of music technology (i.e., MIDI keyboards) and its connection to the computer and other sound-generating devices. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

| Name                      | Description   |
|---------------------------|---|
|                           | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:             | Clarifications:   |
|                           | e.g., listening maps, active listening, checklists  |
|                           | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the  |
| MU.912.C.1.2:             | composer's intent.  |
|                           | Clarifications:   |
|                           | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title   |
| MU.912.C.2.1:             | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:             | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.2.3:             | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.  |
| MU.912.C.3.1:             | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.                                    |
| MU.912.F.1.1:             | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.   |
| MU.912.F.1.2:             | Incorporate or adapt new, emerging, or previously unfamiliar technology to create an innovative composition, music project, or related product.   |
|                           | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music   |
| MU.912.F.2.1:             | training.   |
|                           | Clarifications:   |
|                           | e.g., reperior ensis, recrimology-based work, ability to research and analyze, and examples or readership and contaborative skins   |
|                           | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.   |
| MU.912.F.2.2:             | Clarifications:   |
|                           | e.g., community revitalization, industry choosing new locations, cuitural and social enrichment   |
|                           | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.   |
| MU.912.F.2.3:             | Clarifications:   |
|                           | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel  |
| MU.912.F.3.1:             | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings |
|                           | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and   |
| MU.912.F.3.2:             | technology.   |
| MU 912 F 3 3              | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,   |
| 10.712.11.0.0.            | demonstrating skills for use in the workplace.  |
| MU.912.F.3.4:             | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge  |
|                           | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU 912 H 1 1 <sup>.</sup> | Clarifications  |
|                           | e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                           | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.   |
| MU.912.H.1.2:             | Clarifications:   |
|                           | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|                           | Compare two or more works of a composer across performance media.   |
| MU.912.H.1.3:             | Clarifications:   |
|                           | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.4:             | Analyze how Western music has been influenced by historical and current world cultures.   |
| MU.912.H.1.5:             | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.1:             | Evaluate the social impact of music on specific historical periods.   |
| MU.912.H.2.2:             | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.   |
|                           | Analyze the evolution of a music genre.   |
| MU.912.H.2.3:             | Clarifications:   |
|                           | e.g., jazz, blues   |
| MU.912.H.2.4:             | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
| MU.912.H.3.1:             | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects   |
|                           |   |
|                           | clarifications:   |
|                           | Combine percent interact with civile and knowledge from a pap music place to surface, design, and present a music based as music sub-set to be a  |
|                           | interest to demonstrate the ability to make transfers across contexts.  |
| MU.912.H.3.2              | Clarifications:   |
|                           | e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public  |

|                     | speaking   |
|---------------------|--|
|                     | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1:       | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1:       | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
| MU.912.0.2.2:       | Transpose melodies into different modalities through performance and composition.<br>Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied<br>meaning of the composer/performer.   |
| MU.912.O.3.1:       | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration  |
| MU.912.0.3.2:       | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
| MU.912.S.1.2:       | Compose music for voices and/or acoustic, digital, or electronic instruments.  |
| MU.912.S.1.4:       | Clarifications:<br>e.g., singing, playing, writing   |
| MU.912.S.1.6:       | Synthesize music, MIDI, pod-casting, webpage-development, and/or similar technology-based skills to share knowledge.  Clarifications: e.g., history of electronic music and musicians; physics of sound; signal flow; effects of MIDI on studios, instruments, musicians, and producers  |
| MU.912.S.1.7:       | Combine and/or create virtual and audio instruments.<br>Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
| MU.912.S.2.1:       | Clarifications:<br>e.g., memorization, sequential process  |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
| MU.912.S.3.2:       | Sight-read music accurately and expressively to show synthesis of skills.  Clarifications: e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.3:       | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.   |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
| MU.912.S.3.5:       | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| LAFS.1112.L.1.1:    | <ul> <li>Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</li> <li>a. Apply the understanding that usage is a matter of convention, can change over time, and is sometimes contested.</li> <li>b. Resolve issues of complex or contested usage, consulting references (e.g., <i>Merriam-Webster's Dictionary of English Usage, Garner's Modern</i> American Usage) as needed.</li> </ul>   |
| LAFS.1112.RST.2.4:  | Standard Relation to Course: Supporting Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical  |
| LAFS.1112.SL.1.1:   | <ul> <li>context relevant to grades 11–12 texts and topics.</li> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue: clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> </ul> |
|                     | <ul> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li> <li>Standard Relation to Course: Supporting</li> </ul>   |
| LAFS.1112.SL.1.2:   | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.  |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.  |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.  |
| LAFS.1112.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.   |
| LAFS.1112.WHST.3.7: | broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.<br>Draw evidence from informational texts to support analysis, reflection, and research  |
|                     | Use appropriate tools strategically.   |
|                     | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper.   |
|                     |  |

| MAFS.K12.MP.5.1:  | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.<br>Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools<br>might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze<br>graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other<br>mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying<br>assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify<br>relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use<br>technological tools to explore and deepen their understanding of concepts.<br><b>Standard Relation to Course: Supporting</b> |
|-------------------|--|
|                   | Attend to precision.   |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|                   | Standard Relation to Course: Supporting  |
|                   | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
| DA 912 S 2 1·     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

### VERSION DESCRIPTION

Students develop highly advanced piano techniques, music literacy, solo performance skills, and related musical knowledge through a variety of advanced piano literature. Students work toward greater musical independence through accompanying other musicians, performing solos, and/or creating original music compositions. In keeping with the rigor expected in an Honors course, students undertake independent study that includes synthesis of learning and experience. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

### **GENERAL NOTES**

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. |                           | Use benchmark quantities to determine if a solution makes sense.  |
|                           | Check calculations when solving problems.   |
| MA K12 MTD 6 1.           | Verify possible solutions by explaining the methods used.     Evaluate results based on the given context   |
| WA.K12.WITK.0.1.          |   |
|                           | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:   |
|                           | <ul> <li>Have students estimate or predict solutions prior to solving.</li> </ul>   |
|                           | <ul> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> </ul>   |
|                           | Reinforce that students check their work as they progress within and after a task.  |
|                           | Strengthen students' ability to verify solutions through justifications.  |
|                           | Apply mathematics to real-world contexts.   |
|                           | Mathematicians who apply mathematics to real-world contexts:  |
|                           | Connect mathematical concepts to everyday experiences   |
|                           | Use models and methods to understand, represent and solve problems.   |
|                           | <ul> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency</li> </ul>   |
| MA.K12.MTR.7.1:           | Clarifications  |
|                           | Teachers who encourage students to apply mathematics to real-world contexts:  |
|                           | <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> </ul>  |
|                           | Challenge students to question the accuracy of their models and methods.  |
|                           | Support students as they validate conclusions by comparing them to the given situation.   |
|                           | Indicate how various concepts can be applied to other disciplines.  |
|                           | Cite evidence to explain and justify reasoning.   |
|                           | Clarifications:   |
|                           | K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details  |
|                           | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.   |
|                           | 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.  |
|                           |   |
| FLA K12 FF 1 1            |   |

|                   | quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|-------------------|--|
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                   | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                   | Make inferences to support comprehension.  |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.               |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

### VERSION DESCRIPTION

Students develop highly advanced piano techniques, music literacy, solo performance skills, and related musical knowledge through a variety of advanced piano literature. Students work toward greater musical independence through accompanying other musicians, performing solos, and/or creating original music compositions. In keeping with the rigor expected in an Honors course, students undertake independent study that includes synthesis of learning and experience. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

### GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1301390

Number of Credits: One (1) credit

Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: KEYBD 4 HONORS Course Length: Year (Y) Course Attributes: • Honors Course Level: 3

#### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Vocal Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

# Band 1 (#1302300) 2020 - 2022 (current)

| Name            | Description   |
|-----------------|---|
|                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:   | Clarifications:   |
|                 | e.g., listening maps, active listening, checklists  |
|                 | Compare using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to ope's own hypothesis of the                 |
|                 | compare, using context music vocabulary, the aesthetic impact of two of more performances of a musical work to one s own hypothesis of the                |
| MU.912.C.1.2:   |   |
|                 | Clarifications:   |
|                 | e.g., quanty recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                              |
|                 | Analyze instruments of the world and classify them by common traits.  |
| MU.912.C.1.3:   | Clarifications:   |
|                 | e.g., classical and folk instruments from around the world  |
| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.2.3:   | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.                                |
|                 | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development     |
| MU.912.C.3.1:   | in music.   |
|                 | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of     |
| WIU.912.F.S.1.  | leadership in school and/or non-school settings.  |
| MII 912 F 3 2.  | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and               |
| 10.712.1.3.2.   | technology.   |
| MU.912.F.3.3:   | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, |
|                 | demonstrating skills for use in the workplace.  |
|                 | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:   | Clarifications:   |
|                 | e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                 | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.                                       |
| MU 912 H 1 2·   | Clarifications:   |
|                 | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|                 | Compare tue er mere uerte ef e compacer errore performance media  |
|                 |   |
| MU.912.H.1.3:   | Clarifications:   |
|                 | e.g., orchestral and choral; guitar and string quarter; plano solo and plano concerto   |
| MU.912.H.1.4:   | Analyze how Western music has been influenced by historical and current world cultures.   |
| MU.912.H.1.5:   | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.1:   | Evaluate the social impact of music on specific historical periods.   |
| MU.912.H.2.4:   | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                 | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.0.1.1:   | Clarifications:   |
|                 | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1:   | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.                                  |
|                 | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied       |
|                 | meaning of the composer/performer.  |
| MU.912.0.3.1:   | Clarifications:   |
|                 | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,                     |
|                 | orchestration   |
| MIL 912 O 3 2·  | Interpret and perform expressive elements indicated by the musical score and/or conductor   |
| 10.712.0.3.2.   | Improvise rhythmic and melodic phrases over harmonic progressions   |
|                 |   |
| MU.912.S.1.1:   | Clarifications:   |
|                 | e.g., using text of scat synaples   |
| MU.912.S.1.4:   | Perform and notate, independently and accurately, melodies by ear.  |
|                 | Clarifications:   |
|                 | e.g., singing, playing, writing   |
|                 | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of |
|                 | music literature.   |
| MU.912.S.2.1:   | Clarifications:   |
|                 | e.g., memorization, sequential process  |
| MIL 012 8 2 2   | Transfer overcesive elements and performance techniques from ano piece of music to another  |
| IVIU.912.5.2.2: | mansier expressive elements and performance techniques from one piece of music to another.  |

| MU.912.S.3.1:                     | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
|-----------------------------------|---|
|                                   | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:                     | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.3:                     | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.  |
| MU.912.S.3.4:                     | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                                   | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:                     | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| LAFS.910.RST.2.4:                 | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical<br>context relevant to grades 9–10 texts and topics.  |
| LAFS.910.SL.1.1:                  | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> <li>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</li> </ul>                 |
|                                   | Standard Relation to Course: Supporting   |
| LAFS.910.SL.1.2:                  | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.  |
| LAFS.910.SL.1.3:                  | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.   |
| LAFS.910.SL.2.4:                  | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.   |
| LAFS.910.WHST.3.9:                | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:                  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                                   | Attend to precision.  |
| MAFS.K12.MP.6.1:                  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                                   | Standard Relation to Course: Supporting   |
|                                   | Look for and make use of structure  |
|                                   |   |
| MAFS.K12.MP.7.1:                  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |
| MAFS.K12.MP.7.1:                  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting  |
| MAFS.K12.MP.7.1:<br>DA.912.S.2.1: | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |

## VERSION DESCRIPTION

This year-long, entry-level class, designed for students having little or no previous band experience with woodwind, brass, and/or percussion instruments, promotes the enjoyment and appreciation of music through performance of high-quality, beginning wind and percussion literature from different times and places. Rehearsals focus on the

development of critical listening/aural skills; rudimentary instrumental technique and skills, music literacy, and ensemble skills; and aesthetic musical awareness culminating in periodic public performances.

## GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Notes: This course may require students to participate in extra rehearsals and performances beyond the school day. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

# Band 1 (#1302300) 2022 - And Beyond

| Name           | Description   |
|----------------|---|
|                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:  | Clarifications:   |
|                | e.g., listening maps, active listening, checklists  |
|                | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                |
|                | composer's intent.  |
| MU.912.C.1.2:  | Clarifications:   |
|                | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                             |
|                | Analyze instruments of the world and classify them by common traits   |
| MU 012 C 1 2-  |   |
| 10.712.0.1.3.  | e.g. classical and folk instruments from around the world   |
| MU 012 C 2 1.  | Evaluate and make appropriate adjustments to personal performance in sole and apsombles   |
| MU.912.C.2.1.  | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2.  | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively                                 |
| 10.712.0.2.3.  | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development     |
| MU.912.C.3.1:  | in music.   |
|                | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of     |
| MU.912.F.3.1:  | leadership in school and/or non-school settings.  |
| MU.912.F.3.2:  | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and               |
|                | technology.   |
| MU.912.F.3.3:  | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, |
|                | Investigate and discuss how a culture's traditions are reflected through its music  |
| MU 010 U 1 1.  |   |
| MU.912.H.1.1:  | clarifications:   |
|                |   |
|                | compare the work of, and initialities on, two of more exemplary composers in the performance medium studied in class.                                     |
| MU.912.H.1.2:  | Clarifications:   |
|                | e.g., vocai, instrumentai, guitar, keyboard, electronic, handbells  |
|                | Compare two or more works of a composer across performance media.   |
| MU.912.H.1.3:  | Clarifications:   |
|                | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.4:  | Analyze how Western music has been influenced by historical and current world cultures.   |
| MU.912.H.1.5:  | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.1:  | Evaluate the social impact of music on specific historical periods.   |
| MU.912.H.2.4:  | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.0.1.1:  | Clarifications:   |
|                | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1:  | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.                                  |
|                | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied       |
|                | meaning of the composer/performer.  |
| MU.912.0.3.1:  | Clarifications:   |
|                | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, erchectration       |
|                |   |
| MU.912.0.3.2:  | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                | Improvise rhythmic and melodic phrases over harmonic progressions.  |
| MU.912.S.1.1:  | Clarifications:   |
|                | e.g., using text of scat syllables  |
|                | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S.1.4:  | Clarifications:   |
|                | e.g., singing, playing, writing   |
|                | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of |
| MIL 912 S 2 1. | music literature.   |
| 10.712.3.2.1.  | Clarifications:   |
|                | e.g., memorization, sequential process  |
| MU.912.S.2.2:  | Transfer expressive elements and performance techniques from one piece of music to another.   |

| MU.912.S.3.1:              | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
|----------------------------|--|
|                            | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:              | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.3:              | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.   |
| MU.912.S.3.4:              | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
| MU.912.S.3.5:              | Develop and demonstrate proper vocal or instrumental technique.  |
|                            | Clarifications:  |
|                            | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                            | Mathematicians who participate in effortful learning both individually and with others:  |
|                            | <ul> <li>Analyze the problem in a way that makes series given the task.</li> <li>Ask questions that will belo with solving the task.</li> </ul>  |
|                            | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> </ul>  |
|                            | Stay engaged and maintain a positive mindset when working to solve tasks.  |
|                            | Help and support each other when attempting a new method or approach.  |
| MA.K12.MTR.1.1:            | Clarifications:  |
|                            | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                            | <ul> <li>Cultivate a community of growin minuser learners.</li> <li>Easter perseverance in students by choosing tasks that are challenging.</li> </ul>   |
|                            | <ul> <li>Develop students' ability to analyze and problem solve.</li> </ul>  |
|                            | Recognize students' effort when solving challenging problems.  |
|                            | Demonstrate understanding by representing problems in multiple ways.   |
|                            | Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                            | Build understanding through modeling and using manipulatives.  |
|                            | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.  |
|                            | Progress from modeling problems with objects and drawings to using algorithms and equations.   |

| WA.N 12.WH K.2.1.          | Clarifications:  |
|                            | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:  |
|                            | Help students make connections between concepts and representations.   |
|                            | Provide opportunities for students to use manipulatives when investigating concepts.   |
|                            | Guide students from concrete to pictorial to abstract representations as understanding progresses.   |
|                            | • Show students that various representations can have different purposes and can be useful in different situations.  |
|                            | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:  |
|                            | Select officiant and appropriate methods for calving problems within the given context   |
|                            | <ul> <li>Select enclent and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> </ul>                          |
|                            | Complete tasks accurately and with confidence.   |
|                            | Adapt procedures to apply them to a new context.   |
| IVIA. K 12. IVI 1 K. 3. 1. | Use feedback to improve efficiency when performing calculations.   |
|                            | Clarifications:  |
|                            | <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> </ul>   |
|                            | <ul> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> </ul>   |
|                            | • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.   |
|                            | Engage in discussions that reflect on the mathematical thinking of self and others.  |
|                            | Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |
| MA.K12.MTR.4.1:            | Communicate mathematical ideas, vocabulary and methods effectively.  |
|                            | Analyze the mathematical thinking of others.   |
|                            | <ul> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Desception express and suggest how to correctly colve the test.</li> </ul>  |
|                            | Recognize errors and suggest now to correctly solve the task.      Iustify results by explaining methods and processes   |
|                            | Construct possible arguments based on evidence.  |
|                            | Clarifications:  |
|                            | Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:   |
|                            | <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> </ul> |
|                            | <ul> <li>Greate opportunities for students to discuss their trinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> </ul>  |
|                            | <ul> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>  |
|                            | Use patterns and structure to help understand and connect mathematical concepts.   |
|                            | Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
|                            | Focus on relevant details within a problem.  |
|                            | Create plans and procedures to logically order events, steps or ideas to solve problems.   |
|                            | <ul> <li>Decompose a complex problem into manageable parts.</li> </ul>   |

| MA.K12.MTR.5.1:                                       | <ul> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>  |
|---|--|
|   | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>   |
| MA.K12.MTR.6.1:                                       | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task  |
|   | Strengthen students' ability to verify solutions through justifications.  Apply mathematics to real-world contexts.  Mathematicians who apply mathematics to real-world contexts:      Connect mathematical concepts to everyday experiences.      Use models and methods to understand, represent and solve problems.   |
| MA.K12.MTR.7.1:                                       | <ul> <li>Perform investigations to gather data or determine if a method is appropriate.          <ul> <li>Redesign models and methods to improve accuracy or efficiency</li> </ul> </li> <li>Clarifications:         <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul>   |
| ELA.K12.EE.1.1:                                       | Cite evidence to explain and justify reasoning.         Clarifications:         K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.         2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.         4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.         6-8 Students continue with previous skills and use a style guide to create a proper citation.         9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|   |  |
| ELA.K12.EE.2.1:                                       | Read and comprehend grade-level complex texts proficiently.  Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.2.1:<br>ELA.K12.EE.3.1:                    | Read and comprehend grade-level complex texts proficiently.         Clarifications:         See Text Complexity for grade-level complexity bands and a text complexity rubric.         Make inferences to support comprehension.         Clarifications:         Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.   |
| ELA.K12.EE.2.1:<br>ELA.K12.EE.3.1:<br>ELA.K12.EE.4.1: | Read and comprehend grade-level complex texts proficiently.         Clarifications:         See Text Complexity for grade-level complexity bands and a text complexity rubric.         Make inferences to support comprehension.         Clarifications:         Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.         Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.         Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because," The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |

|                   | Use appropriate voice and tone when speaking or writing.  |
|-------------------|---|
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

This year-long, entry-level class, designed for students having little or no previous band experience with woodwind, brass, and/or percussion instruments, promotes the enjoyment and appreciation of music through performance of high-quality, beginning wind and percussion literature from different times and places. Rehearsals focus on the development of critical listening/aural skills; rudimentary instrumental technique and skills, music literacy, and ensemble skills; and aesthetic musical awareness culminating in periodic public performances.

### GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Notes: This course may require students to participate in extra rehearsals and performances beyond the school day. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.         MU.912.O.3.1:       Clarifications:         e.g., thempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration         MU.912.O.3.2:       Interpret and perform expressive elements indicated by the musical score and/or conductor.         MU.912.S.1.1:       Clarifications:         e.g., using text or scat syllables         Perform and notate, independently and accurately, melodies by ear.         MU.912.S.1.4:       Clarifications:         e.g., singing, playing, writing         Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   |                | e.g., jazz, blues  |
| Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.         MU.912.0.1.1:       Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture: solo, chamber ensemble, large ensemble         MU.912.0.2.1:       Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.         MU.912.0.3.1:       Clarifications:<br>e.g., thythm, melody, timbre, spressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied<br>meaning of the composer/performer.         MU.912.0.3.1:       Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration         MU.912.0.3.2:       Interpret and perform expressive elements indicated by the musical score and/or conductor.         MU.912.S.1.1:       Clarifications:<br>e.g., using text or scat syllables         MU.912.S.1.4:       Clarifications:<br>e.g., singling, playing, writing         MU.912.S.1.4:       Clarifications:<br>e.g., singling, playing, writing         MU.912.S.2.1:       Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of<br>music literature.   | MU.912.H.2.4:  | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
| MU.912.0.1.1:       Clarifications:         e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble         MU.912.0.2.1:       Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.         Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.         MU.912.0.3.1:       Clarifications:         e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration         MU.912.0.3.2:       Interpret and perform expressive elements indicated by the musical score and/or conductor.         MU.912.S.1.1:       Clarifications:         e.g., using text or scat syllables         MU.912.S.1.4:       Clarifications:         e.g., singing, playing, writing         MU.912.S.2.1:       Clarifications:         e.g., singing, playing, writing         MU.912.S.2.1:       Clarifications:         e.g., singing, playing, writing         Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.         MU.912.S.2.1:       Clarifications:  |                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| e.g., rhythm, melody, timbre, form, tonality, harmony, texture: solo, chamber ensemble, large ensemble         MU.912.0.2.1:       Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.         MU.912.0.3.1:       Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.         MU.912.0.3.1:       Clarifications:         e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration         MU.912.0.3.2:       Interpret and perform expressive elements indicated by the musical score and/or conductor.         Improvise rhythmic and melodic phrases over harmonic progressions.         MU.912.S.1.1:       Clarifications:         e.g., using text or scat syllables         MU.912.S.1.4:       Clarifications:         e.g., singing, playing, writing         MU.912.S.2.1:       Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   | MU.912.0.1.1:  | Clarifications:  |
| MU.912.0.2.1:       Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.         Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.         MU.912.0.3.1:       Clarifications:         e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration         MU.912.0.3.2:       Interpret and perform expressive elements indicated by the musical score and/or conductor.         Improvise rhythmic and melodic phrases over harmonic progressions.         MU.912.S.1.1:       Clarifications:         e.g., using text or scat syllables         MU.912.S.1.4:       Perform and notate, independently and accurately, melodies by ear.         Clarifications:       e.g., singling, playing, writing         Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.         MU.912.S.2.1:       Clarifications:  |                | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
| Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.         MU.912.0.3.1:       Clarifications:         e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration         MU.912.0.3.2:       Interpret and perform expressive elements indicated by the musical score and/or conductor. | MU.912.S.2.1: Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.<br>Clarifications:  |                |  |
| MU.912.S.2.1: Clarifications:   |                | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.                              |
|   | MU.912.S.2.1:  | Clarifications:  |

|                    | e.g., memorization, sequential process  |
|--------------------|---|
| MU.912.S.2.2:      | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:      | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
|                    | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:      | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.3:      | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.  |
| MU.912.S.3.4:      | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                    | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:      | Clarifications:   |
|                    | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| LAFS.910.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.   |
| LAFS.910.SL.1.1:   | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> <li>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</li> </ul>                 |
|                    | Standard Relation to Course: Supporting   |
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.  |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.   |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.   |
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                    | Attend to precision.  |
| MAFS.K12.MP.6.1:   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                    | Standard Relation to Course: Supporting   |
|                    | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:   | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                    | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in  |
| DA.912.F.3.8:      | the work environment.   |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

This year-long, beginning-level class, designed for students with at least one year of woodwind, brass, and/ or percussion ensemble experience, promotes the enjoyment and appreciation of music through performance of high-quality wind and percussion literature. Rehearsals focus on the development of critical listening skills, instrumental and ensemble technique and skills, expanded music literacy, and aesthetic awareness culminating in periodic public performances.

#### GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Notes: This course may require students to participate in extra rehearsals and performances beyond the school day. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

#### Course Number: 1302310

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: BAND 2 Course Length: Year (Y) Course Level: 2

#### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

# Band 2 (#1302310) 2022 - And Beyond

| Name            | Description   |
|-----------------|---|
|                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:   | Clarifications:   |
|                 | e.g., listening maps, active listening, checklists  |
|                 | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                |
|                 | composer's intent.  |
| MU.912.C.1.2:   | Clarifications:   |
|                 | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                             |
|                 | Analyze instruments of the world and classify them by common traits.  |
| MIL 912 C 1 3.  | Clarifications  |
| 10.712.0.1.0.   | e.g., classical and folk instruments from around the world  |
| MU 012 C 2 1.   | Evaluate and make appropriate adjustments to personal performance in cale and accomplies  |
| MU.912.C.2.1.   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU 912 C 2 3    | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.                                |
|                 | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development     |
| MU.912.C.3.1:   | in music.   |
| MU 012 E 2 1.   | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of     |
| WIU.912.F.3.1.  | leadership in school and/or non-school settings.  |
| MU.912.F.3.2:   | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and               |
|                 | technology.   |
| MU.912.F.3.3:   | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, |
|                 | Investigate and discuss how a culture's traditions are reflected through its music  |
| MIL 012 II 1 1. |   |
| MU.912.H.1.1:   | e a natriotic folk celebration entertainment spiritual  |
|                 |   |
|                 | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.                                       |
| MU.912.H.1.2:   | Clarifications:   |
|                 | e.g., vocal, instrumental, guitar, keyboard, electronic, nandbells  |
|                 | Compare two or more works of a composer across performance media.   |
| MU.912.H.1.3:   | Clarifications:   |
|                 | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.4:   | Analyze how Western music has been influenced by historical and current world cultures.   |
| MU.912.H.1.5:   | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.1:   | Evaluate the social impact of music on specific historical periods.   |
|                 | Analyze the evolution of a music genre.   |
| MU.912.H.2.3:   | Clarifications:   |
|                 | e.g., jazz, blues   |
| MU.912.H.2.4:   | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                 | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.0.1.1:   | Clarifications:   |
|                 | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1:   | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.                                  |
|                 | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied       |
|                 | meaning of the composer/performer.  |
| MU.912.0.3.1:   | Clarifications:   |
|                 | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, narmonic structure, timbre choice, rhythm, orchestration       |
|                 |   |
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                 |   |
| MU.912.S.1.1:   | Clarifications:   |
|                 |   |
|                 | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S.1.4:   | Clarifications:   |
|                 | e.g., singing, playing, writing   |
|                 | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of |
| MU.912.S.2.1:   | music literature.   |
|                 | Clarifications:   |

|                 | e.g., memorization, sequential process  |
|-----------------|---|
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy  |
|                 | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:   | Clarifications:   |
|                 | e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.3:   | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.  |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
| MU 012 S 2 5.   |   |
|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                 | Mathematicians who participate in effortful learning both individually and with others:   |
|                 | Analyze the problem in a way that makes sense given the task.   |
|                 | <ul> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> </ul>  |
|                 | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>   |
|                 | Help and support each other when attempting a new method or approach.   |
| MA.K12.MTR.1.1: | Clarifications:   |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:  |
|                 | <ul> <li>Foster perseverance in students by choosing tasks that are challenging.</li> </ul>   |
|                 | Develop students' ability to analyze and problem solve.   |
|                 | Recognize students' effort when solving challenging problems.   |
|                 | Demonstrate understanding by representing problems in multiple ways.  |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
|                 | <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Penresent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> </ul>  |
|                 | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>  |
|                 | Express connections between concepts and representations.   |
| MA.K12.MTR.2.1: | Choose a representation based on the given context or purpose.  |
|                 | Clarifications:   |
|                 | <ul> <li>Help students make connections between concepts and representations.</li> </ul>  |
|                 | Provide opportunities for students to use manipulatives when investigating concepts.  |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.  |
|                 | • Show students that various representations can have different purposes and can be useful in different situations.   |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:   |
|                 | Select efficient and appropriate methods for solving problems within the given context.   |
|                 | Maintain flexibility and accuracy while performing procedures and mental calculations.  |
|                 | Complete tasks accurately and with confidence.  |
| MA.K12.MTR.3.1: | <ul> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
|                 | Clarifications:   |
|                 | Teachers who encourage students to complete tasks with mathematical fluency:  |
|                 | Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.  |
|                 | <ul> <li>Other multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used</li> </ul> |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others  |
|                 | Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  |
| MA.K12.MTR.4.1: | Communicate mathematical ideas, vocabulary and methods effectively.   |
|                 | Analyze the mathematical thinking of others.  |
|                 | Compare the efficiency of a method to those expressed by others.  |
|                 | <ul> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes</li> </ul>  |
|                 | Construct possible arguments based on evidence.   |
|                 | Clarifications:   |
|                 | Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:  |
|                 | <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> </ul>                          |
|                 | <ul> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> </ul>  |
|                 | • Develop students' ability to justify methods and compare their responses to the responses of their peers.   |
|                 | Use patterns and structure to help understand and connect mathematical concepts.  |
|                 | Mathematicians who use patterns and structure to help understand and connect mathematical concepts:   |

|                 | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to pew concepts.</li> </ul>  |
|-----------------|---|
| MA.K12.MTR.5.1: | <ul> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>  |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:   |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul> Clarifications: Teachers who encourage students to assess the reasonableness of solutions: <ul> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask. "Does this solution make sense? How do you know?"</li> </ul>  |
|                 | <ul> <li>Reinforce that students check their work as they progress within and after a task.</li> </ul>  |
|                 | <ul> <li>Strengthen students' ability to verify solutions through justifications.</li> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficience</li> </ul>   |
| MA.K12.MTR.7.1: | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>  |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.  Clarifications:  K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly |
|                 | <ul> <li>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> <li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li> </ul>  |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.3.1: | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
| ELA.K12.EE.4.1: | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.  |
|                 | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                 | Use the accepted rules governing a specific format to create quality work. Clarifications:  |

| ELA.K12.EE.5.1:   | Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. |
|-------------------|---|
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

This year-long, beginning-level class, designed for students with at least one year of woodwind, brass, and/ or percussion ensemble experience, promotes the enjoyment and appreciation of music through performance of high-quality wind and percussion literature. Rehearsals focus on the development of critical listening skills, instrumental and ensemble technique and skills, expanded music literacy, and aesthetic awareness culminating in periodic public performances.

#### **GENERAL NOTES**

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Notes: This course may require students to participate in extra rehearsals and performances beyond the school day. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

| Course Type: Core Academic Course            | Course Level: 2   |
| Course Status: State Board Approved          |   |
| Grade Level(s): 9,10,11,12                   |   |
| Graduation Requirement: Performing/Fine Arts |   |

## Educator Certifications

Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

# Band 3 (#1302320) 2020 - 2022 (current)

| Name            | Description   |
|-----------------|---|
| MU.912.C.1.1:   | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
|                 | Clarifications:   |
|                 | e.g., listening maps, active listening, checklists  |
|                 | Compare using correct music version were the acethetic impact of two or more performances of a musical work to apa's own hypethesis of the                |
|                 | compare, using context music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                |
| MU.912.C.1.2:   |   |
|                 | Clarifications:   |
|                 | e.g., quanty recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, the                                |
|                 | Analyze instruments of the world and classify them by common traits.  |
| MU.912.C.1.3:   | Clarifications:   |
|                 | e.g., classical and folk instruments from around the world  |
| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.2.3:   | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.                                |
|                 | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development     |
| MU.912.C.3.1:   | in music.   |
|                 | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of     |
| MU.912.F.3.1:   | leadership in school and/or non-school settings.  |
|                 | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and               |
| WU.912.F.3.2:   | technology.   |
| MIL 912 F 3 3.  | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, |
| 10.912.1.3.3.   | demonstrating skills for use in the workplace.  |
| MU 912 F 3 4    | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,        |
| 110.712.1.0.1.  | and initiative to advance skills and/or knowledge.  |
|                 | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:   | Clarifications:   |
|                 | e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                 | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.                                       |
| MII 912 H 1 2·  | Clarifications  |
| 111017121111121 | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|                 | Compare tue or more works of a compacer agrees performance modia  |
|                 |   |
| MU.912.H.1.3:   | Clarifications:   |
|                 | e.g., orchestral and choral; guitar and string quartet; plano solo and plano concerto   |
| MU.912.H.1.4:   | Analyze how Western music has been influenced by historical and current world cultures.   |
| MU.912.H.1.5:   | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.1:   | Evaluate the social impact of music on specific historical periods.   |
|                 | Analyze the evolution of a music genre.   |
| MU.912.H.2.3:   | Clarifications:   |
|                 | e.g., jazz, blues   |
| MU.912.H.2.4:   | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                 | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects               |
|                 | musical performance.  |
| MU.912.H.3.1:   | Clarifications  |
|                 | e.g., acoustics, sound amplification, materials, mechanics  |
|                 |   |
|                 | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.0.1.1:   | Clarifications:   |
|                 | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1:   | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.                                  |
| MU.912.0.2.2:   | Transpose melodies into different modalities through performance and composition.   |
|                 | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied       |
| MU.912.0.3.1:   | meaning of the composer/performer.  |
|                 | Clarifications:   |
|                 | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,                     |
|                 | orchestration   |
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                 | Improvise rhythmic and melodic phrases over harmonic progressions.  |
| MU.912.S.1.1:   | Clarifications:   |
|                 | e.g., using text or scat syllables  |

|                     | Perform and notate, independently and accurately, melodies by ear.  |
|---------------------|---|
| MU.912.S.1.4:       | Clarifications:<br>e.g., singing, playing, writing  |
| MU.912.S.2.1:       | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   |
|                     | Clarifications:<br>e.g., memorization, sequential process   |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
|                     | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:       | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.3:       | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.  |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                     | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:       | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| LAFS.1112.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.  |
|                     | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–<br>12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.<br>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from  |
|                     | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.<br>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as   |
| LAFS.1112.SL.1.1:   | needed.   |
|                     | topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.   |
|                     | d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions  |
|                     | when possible; and determine what additional information or research is required to deepen the investigation or complete the task.  |
|                     | Standard Relation to Course: Supporting   |
| LAES 1112 SL 1 2.   | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed   |
| LAFS 1112 SL 1.3    | decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data. Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points   |
| 2.11 011112.02.1101 | of emphasis, and tone used.   |
| LAFS.1112.SL.2.4:   | alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience,<br>and a range of formal and informal tasks.  |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
|                     | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                     | Attend to precision.  |
| MAFS.K12.MP.6.1:    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                     | Standard Relation to Course: Supporting   |
|                     | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:    | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |
|                     | Standard Relation to Course: Supporting   |
| DA.912.S.2.1:       | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |

#### VERSION DESCRIPTION

This year-long, formative class, designed for students ready to build on skills and knowledge previously acquired in a middle or high school instrumental ensemble, promotes the enjoyment and appreciation of music through performance of high-quality, intermediate-level wind and percussion literature. Rehearsals focus on development of critical listening/aural skills, individual musicianship, instrumental technique, refinement of ensemble skills, and aesthetic engagement culminating in periodic public performances.

#### GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Notes: This course requires students to participate in extra rehearsals and performances beyond the school day. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Band 3 (#1302320) 2022 - And Beyond

| Name           | Description   |
|----------------|---|
|                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:  | Clarifications:   |
|                | e.g., listening maps, active listening, checklists  |
|                | Compare using correct music version was hubble to a settletic impact of two or more performances of a musical work to apa's own hypethesis of the         |
| MU.912.C.1.2:  | compare, using context music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                |
|                |   |
|                | Clarifications:   |
|                | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, ritle                             |
|                | Analyze instruments of the world and classify them by common traits.  |
| MU.912.C.1.3:  | Clarifications:   |
|                | e.g., classical and folk instruments from around the world  |
| MU.912.C.2.1:  | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:  | Evaluate performance guality in recorded and/or live performances.  |
| MU.912.C.2.3:  | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.                                |
|                | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development     |
| MU.912.C.3.1:  | in music.   |
|                | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of     |
| MU.912.F.3.1:  | leadership in school and/or non-school settings.  |
|                | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and               |
| WIU.912.F.3.2. | technology.   |
| MII 912 F 3 3. | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, |
| 10.912.1.3.3.  | demonstrating skills for use in the workplace.  |
| MU 912 F 3 4   | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,        |
| 10.712.1.0.1.  | and initiative to advance skills and/or knowledge.  |
|                | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:  | Clarifications:   |
|                | e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.                                       |
| MII 912 H 1 2· | Clarifications  |
| 10.712.11.1.2. | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|                | Compare two or more works of a compasser agrees performance modia   |
|                |   |
| MU.912.H.1.3:  | Clarifications:   |
|                | e.g., orchestral and choral; guitar and string quartet; plano solo and plano concerto   |
| MU.912.H.1.4:  | Analyze how Western music has been influenced by historical and current world cultures.   |
| MU.912.H.1.5:  | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.1:  | Evaluate the social impact of music on specific historical periods.   |
|                | Analyze the evolution of a music genre.   |
| MU.912.H.2.3:  | Clarifications:   |
|                | e.g., jazz, blues   |
| MU.912.H.2.4:  | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects               |
|                | musical performance.  |
| MU.912.H.3.1:  | Clarifications:   |
|                | e.g., acoustics, sound amplification, materials, mechanics  |
|                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure   |
|                |   |
| MU.912.0.1.1:  | Clarifications:   |
|                | e.g., mythm, melody, timbre, form, tonality, harmony, texture, solo, chamber ensemble, large ensemble   |
| MU.912.0.2.1:  | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.                                  |
| MU.912.0.2.2:  | Transpose melodies into different modalities through performance and composition.   |
|                | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied       |
| MU.912.O.3.1:  | meaning of the composer/performer.  |
|                | Clarifications:   |
|                | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,                     |
|                | orchestration   |
| MU.912.0.3.2:  | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                | Improvise rhythmic and melodic phrases over harmonic progressions.  |
| MU.912.S.1.1:  | Clarifications:   |
|                | e.g., using text or scat syllables  |

|                  | Perform and notate, independently and accurately, melodies by ear.  |
|------------------|---|
| MU.912.S.1.4:    | Clarifications:<br>e.g., singing, playing, writing  |
|                  | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.                   |
| MU.912.S.2.1:    | Clarifications:<br>e.g., memorization, sequential process   |

|                  | Express connections between concepts and representations.   |
| MA.K12.MTR.2.1:  | Choose a representation based on the given context or purpose.  |
|                  | Clarifications:   |
|                  | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                  | Help students make connections between concepts and representations.  |
|                  | Provide opportunities for students to use manipulatives when investigating concepts.  |
|                  | Guide students from concrete to pictorial to abstract representations as understanding progresses.  |
|                  | • Snow students that various representations can have different purposes and can be useful in different situations.   |
|                  | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:   |
|                  | <ul> <li>Select efficient and appropriate methods for solving problems within the given context</li> </ul>  |
|                  | Maintain flexibility and accuracy while performing procedures and mental calculations.  |
|                  | <ul> <li>Complete tasks accurately and with confidence.</li> </ul>  |
|                  | Adapt procedures to apply them to a new context.  |
| MA.K12.MTR.3.1:  | Use feedback to improve efficiency when performing calculations.  |
|                  | Clarifications:   |
|                  | Teachers who encourage students to complete tasks with mathematical fluency:  |
|                  | Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.  |
|                  | Offer multiple opportunities for students to practice efficient and generalizable methods.  |
|                  | • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
|                  | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: |
|                  | Communicate mathematical ideas, vocabulary and methods effectively.   |
|                  | Analyze the mathematical thinking of others.  |
|                  | Compare the efficiency of a method to those expressed by others.  |
| MA.K12.MTR.4.1:  | Recognize errors and suggest how to correctly solve the task.   |
|                  | Justify results by explaining methods and processes.  |
|                  | Construct possible arguments based on evidence.   |
|                  | Clarifications:   |
|                  | Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:  |

|                 | • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.  |
|-----------------|--|
|                 | Create opportunities for students to discuss their thinking with peers.  |
|                 | • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.   |
|                 | • Develop students' ability to justify methods and compare their responses to the responses of their peers.  |
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
|                 | Focus on relevant details within a problem.  |
|                 | Create plans and procedures to logically order events, steps or ideas to solve problems.   |
|                 | Decompose a complex problem into manageable parts.   |
|                 | Relate previously learned concepts to new concepts.  |
| MA.K12.MTR.5.1: | Look for similarities among problems.  |
|                 | <ul> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>  |
|                 | Clarifications:  |
|                 | l eachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:   |
|                 | <ul> <li>Help students recognize the parterns in the world abound them and connect these parterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> </ul>  |
|                 | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> </ul>   |
|                 | <ul> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>  |
|                 |  |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
|                 |  |
|                 | Estimate to discover possible solutions.   |
|                 | Ose benchmark quantities to determine if a solution makes sense.     Check calculations when solving problems  |
|                 | <ul> <li>Verify possible solutions by explaining the methods used.</li> </ul>  |
| MA.K12.MTR.6.1: | Evaluate results based on the given context.   |
|                 | Clarifications:  |
|                 | Teachers who encourage students to assess the reasonableness of solutions:   |
|                 | Have students estimate or predict solutions prior to solving.  |
|                 | <ul> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> </ul>  |
|                 | Reinforce that students check their work as they progress within and after a task.   |
|                 | Strengthen students' ability to verify solutions through justifications.   |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |
|                 | Connect mathematical concepts to everyday experiences.   |
|                 | <ul> <li>Use models and methods to understand, represent and solve problems.</li> </ul>  |
|                 | • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency   |
| MA.K12.MTR.7.1: | Clarifications:  |
|                 | Teachers who encourage students to apply mathematics to real-world contexts:   |
|                 | Provide opportunities for students to create models, both concrete and abstract, and perform investigations.   |
|                 | Challenge students to question the accuracy of their models and methods.   |
|                 | Support students as they validate conclusions by comparing them to the given situation.  |
|                 | Indicate how various concepts can be applied to other disciplines.   |
|                 | Cite evidence to explain and justify reasoning.  |
|                 | Clarifications:  |
|                 | K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details   |
|                 | 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it  |
|                 | In 3rd grade, students should use a combination of direct and indirect citations.  |
| ELA.K12.EE.1.1: | 4.5 Students continue with providus skills and reference comments made by <b>chapkers and poors. Students site texts that they've directly</b>   |
|                 | 4-5 students continue with previous skins and reference comments made by speakers and peers. students cite texts that they we directly<br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style quide |
|                 | referenced by the instructor.  |
|                 | 6-8 Students continue with previous skills and use a style quide to create a proper citation   |
|                 |  |
|                 | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                 | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1: | Clarifications:  |
|                 | See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                 | Make inferences to support comprehension.  |
|                 | Clarifications:  |
| ELA.K12.EE.3.1: | Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl  |
|                 | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and  |
|                 | beyona.  |
|                 | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
|                 | Clarifications:  |
|                 | In kindergarten, students learn to listen to one another respectfully.   |
| ELA.K12.EE.4.1:   | In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.  |
|-------------------|--|
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

This year-long, formative class, designed for students ready to build on skills and knowledge previously acquired in a middle or high school instrumental ensemble, promotes the enjoyment and appreciation of music through performance of high-quality, intermediate-level wind and percussion literature. Rehearsals focus on development of critical listening/aural skills, individual musicianship, instrumental technique, refinement of ensemble skills, and aesthetic engagement culminating in periodic public performances.

## GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Notes: This course requires students to participate in extra rehearsals and performances beyond the school day. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# GENERAL INFORMATION

Course Number: 1302320

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: BAND 3 Course Length: Year (Y) Course Level: 2

Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts

## **Educator Certifications**

Music (Elementary and Secondary Grades K-12)

# Band 4 (#1302330) 2020 - 2022 (current)

| Name           | Description   |
|----------------|---|
|                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:  | Clarifications:   |
|                | e.g., listening maps, active listening, checklists  |
|                | Compare using correct music vocabulary, the postbatic impact of two or more performances of a musical work to one's own hypothesis of the   |
|                | compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the  |
| MU.912.C.1.2:  |   |
|                | Clarifications:   |
|                | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title   |
|                | Analyze instruments of the world and classify them by common traits.  |
| MU.912.C.1.3:  | Clarifications:   |
|                | e.g., classical and folk instruments from around the world  |
| MU.912.C.2.1:  | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:  | Evaluate performance guality in recorded and/or live performances.  |
| MU 912 C 2 3   | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.  |
|                | Make critical evaluations based on exemplary models of the quality and effectiveness of performances and apply the criteria to personal development.  |
| MU.912.C.3.1:  | in music.   |
| MU.912.F.1.1:  | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.   |
|                | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.   |
|                | Clarifications  |
| 10.912.1.2.2.  | e.g. community revitalization, industry choosing new locations, cultural and social enrichment  |
|                |   |
| MU.912.F.3.1:  | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of   |
|                | leadership in school and/or non-school settings.  |
| MU.912.F.3.2:  | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and   |
|                | technology.<br>Define a initial and in a statistic technological technological and formation and the technology of the statistic technology.  |
| MU.912.F.3.3:  | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace |
|                | Design and implement a personal learning plan, related to the study of music, which demonstrates self assessment, hearn starming, decision making   |
| MU.912.F.3.4:  | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.   |
|                | Investigate and discuss how a culture's traditions are reflected through its music  |
|                |   |
| MU.912.H.1.1:  | Clarifications:   |
|                | e.g., pathotic, loik, celebration, entertainment, spintuai  |
|                | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.   |
| MU.912.H.1.2:  | Clarifications:   |
|                | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|                | Compare two or more works of a composer across performance media.   |
| MII 012 H 1 3· | Clarifications  |
| 10.712.11.1.3. | e.g. orchestral and choral: quitar and string guartet: piano solo and piano concerto  |
|                |   |
| MU.912.H.1.4:  | Analyze how Western music has been influenced by historical and current world cultures.   |
| MU.912.H.1.5:  | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.1:  | Evaluate the social impact of music on specific historical periods.   |
| MU.912.H.2.2:  | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.   |
|                | Analyze the evolution of a music genre.   |
| MU.912.H.2.3:  | Clarifications:   |
|                | e.g., jazz, blues   |
| MU.912.H.2.4:  | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects   |
|                | musical performance.  |
| MU.912.H.3.1:  | Clarifications:   |
|                | e.g., acoustics, sound amplification, materials, mechanics  |
|                | Evaluate the organizational principles and conventions in musical works and discuss their offset on structure   |
|                |   |
| MU.912.0.1.1:  | Clarifications:   |
|                | e.g., myunin, melody, umbre, torm, tonanty, narmony, texture; solo, cnamber ensemble, large ensemble  |
| MU.912.0.2.1:  | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.  |
| MU.912.0.2.2:  | Transpose melodies into different modalities through performance and composition.   |
|                | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied   |
|                | meaning of the composer/performer.  |
| MU.912.0.3.1:  | Clarifications:   |
|                |   |

|                     | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration  |
|---------------------|--|
| MU.912.0.3.2:       | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                     | Improvise rhythmic and melodic phrases over harmonic progressions.   |
| MU.912.S.1.1:       | Clarifications:<br>e.g., using text or scat syllables  |
|                     | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:       | Clarifications:<br>e.g., texture, mode, form, tempo, voicing   |
|                     | Perform and notate, independently and accurately, melodies by ear.   |
| MU.912.S.1.4:       | Clarifications:<br>e.g., singing, playing, writing   |
|                     | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
| MU.912.S.2.1:       | Clarifications:<br>e.g., memorization, sequential process  |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
|                     | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:       | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.3:       | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.   |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                     |  |
| MU.912.5.3.5:       | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| LAFS.1112.RST.2.4:  | context relevant to grades 11–12 texts and topics.   |
| LAFS.1112.SL.1.1:   | <ul> <li>12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li> </ul>   |
|                     | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed  |
| LAFS.1112.SL.1.2:   | decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.  |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.  |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.  |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.  |
| MAFS.K12.MP.5.1:    | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.<br><b>Standard Relation to Course: Supporting</b> |
| MAFS.K12.MP.6.1:    | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. Standard Relation to Course: Supporting  |
|                     | Look for and make use of structure.  |

| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see $7 \times 8$ equals the well remembered $7 \times 5 + 7 \times 3$ , in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as $2 \times 7$ and the 9 as $2 + 7$ . They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting |
|-------------------|---|
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

# VERSION DESCRIPTION

This year-long, intermediate-level course, designed for students who demonstrate proficiency in woodwind, brass and/or percussion techniques, music literacy, critical listening/aural skills, and ensemble performance skills, promotes greater engagement with and appreciation for music through performance and other experiences with a broad spectrum of music, as well as creativity through composition and/or arranging.. Study includes cultivation of well-developed instrumental ensemble techniques and skills, music literacy and theory, and deeper aesthetic engagement with a wide variety of high-quality repertoire.

## GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Notes: This course requires students to participate in extra rehearsals and performances beyond the school day. Additional experiences with small ensembles and solo performance may be available. Students who enjoy the challenges and successes of this course may wish to take an accelerated music class in the future. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# GENERAL INFORMATION

| Course Number: 1302330                       | Course Path: Section: Grades PreK to 12 Education<br>Courses > Grade Group: Grades 9 to 12 and Adult<br>Education Courses > Subject: Music Education ><br>SubSubject: Instrumental Music > |  |
|--|--|--|
|  | Abbreviated Title: BAND 4  |  |
| Number of Credits: One (1) credit            | Course Length: Year (Y)  |  |
| Course Type: Core Academic Course            | Course Level: 2  |  |
| Course Status: Course Approved               |  |  |
| Grade Level(s): 9,10,11,12                   |  |  |
| Graduation Requirement: Performing/Fine Arts |  |  |

## **Educator Certifications**

# Band 4 (#1302330) 2022 - And Beyond

| Name           | Description   |
|----------------|---|
|                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:  | Clarifications:   |
|                | e.g., listening maps, active listening, checklists  |
|                | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                |
|                | compare, using context music vocabulary, the adstrictle impact of two of more performances of a musical work to one s own hypothesis of the               |
| MU.912.C.1.2:  |   |
|                | clarifications:   |
|                | e.g., quanty recordings, individual and peer group performances, composer notes, instrumentation, expressive elements, the                                |
|                | Analyze instruments of the world and classify them by common traits.  |
| MU.912.C.1.3:  | Clarifications:   |
|                | e.g., classical and folk instruments from around the world  |
| MU.912.C.2.1:  | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:  | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.2.3:  | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.                                |
| MU 012 C 2 1   | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development     |
| 10.712.0.3.1.  | in music.   |
| MU.912.F.1.1:  | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.   |
|                | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.                                   |
| MU.912.F.2.2:  | Clarifications:   |
|                | e.g., community revitalization, industry choosing new locations, cultural and social enrichment   |
|                | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of     |
| MU.912.F.3.1:  | leadership in school and/or non-school settings.  |
|                | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and               |
| WIU.912.F.3.2. | technology.   |
| MIL 912 F 3 3. | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, |
| 10.712.1.3.3.  | demonstrating skills for use in the workplace.  |
| MU.912.F.3.4:  | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,        |
|                | and initiative to advance skills and/or knowledge.  |
|                | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:  | Clarifications:   |
|                | e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.                                       |
| MU.912.H.1.2:  | Clarifications:   |
|                | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|                | Compare two or more works of a composer across performance media.   |
| MIL 912 H 1 3· | Clarifications  |
| 10.712.11.1.3. | e.g., orchestral and choral; guitar and string guartet; piano solo and piano concerto   |
|                | Applying here. Western music has been influenced by historical and surrent world sultures   |
| MU.912.H.1.4:  | Analyze now western music has been initialized by historical and current world currents.  |
| MU.912.H.1.3.  | Analyze music within curdies to gain understanding of addientic performance practices.  |
| MIL 012 L 2 2  | Applyze current musical trends, including audience environments and music acquisition, to predict pessible directions of music                            |
| 10.712.11.2.2. | Analyze current musical trends, including addience environments and music acquisition, to predict possible directions of music.                           |
|                |   |
| MU.912.H.2.3:  |   |
|                | e.g., Jazz, bides   |
| MU.912.H.2.4:  | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects               |
| MU 912 H 3 1·  | musical performance.  |
|                | Clarifications:   |
|                | e.g., acoustics, sound amplification, materials, mechanics  |
|                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.0.1.1:  | Clarifications:   |
|                | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1:  | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.                                  |
| MU.912.0.2.2:  | Transpose melodies into different modalities through performance and composition.   |
|                | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied       |
|                | meaning of the composer/performer.  |
| MU.912.0.3.1:  | Clarifications:   |
| 1              |   |

|                                | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration   |
|--------------------------------|---|
| MU.912.0.3.2:                  | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
| MU.912.S.1.1:                  | Improvise rhythmic and melodic phrases over harmonic progressions.  Clarifications: e.g., using text or scat syllables  |
| MU.912.S.1.3:                  | Arrange a musical work by manipulating two or more aspects of the composition.         Clarifications:         e.g., texture, mode, form, tempo, voicing  |
| MU.912.S.1.4:                  | Perform and notate, independently and accurately, melodies by ear. Clarifications: e.g., singing, playing, writing  |
| MU.912.S.2.1:                  | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  Clarifications: e.g., memorization, sequential process   |
| MU.912.S.2.2:<br>MU.912.S.3.1: | Transfer expressive elements and performance techniques from one piece of music to another.<br>Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
| MU.912.S.3.2:                  | Sight-read music accurately and expressively to show synthesis of skills. Clarifications: e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.3:                  | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.  |
| MU.912.S.3.4:                  | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
| MU.912.S.3.5:                  | Clarifications:         e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| MA.K12.MTR.1.1:                | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li></ul>  |
| MA.K12.MTR.2.1:                | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li></ul> |
| MA.K12.MTR.3.1:                | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>• Select efficient and appropriate methods for solving problems within the given context.<br>• Maintain flexibility and accuracy while performing procedures and mental calculations.<br>• Complete tasks accurately and with confidence.<br>• Adapt procedures to apply them to a new context.<br>• Use feedback to improve efficiency when performing calculations.<br><b>Clarifications:</b><br>Teachers who encourage students to complete tasks with mathematical fluency:<br>• Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>• Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.   |

|                 | mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |
|-----------------|--|
| MA.K12.MTR.4.1: | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>   |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>   |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficience</li> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
| ELA.K12.EE.1.1: | <ul> <li>Cite evidence to explain and justify reasoning.</li> <li>Clarifications:</li> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> <li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li> </ul> |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently. Clarifications:  |

|                   | See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|-------------------|--|
| ELA.K12.EE.3.1:   | Make inferences to support comprehension.  |
|                   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.               |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
| ELA.K12.EE.5.1:   | Use the accepted rules governing a specific format to create quality work.   |
|                   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.   |
|                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

This year-long, intermediate-level course, designed for students who demonstrate proficiency in woodwind, brass and/or percussion techniques, music literacy, critical listening/aural skills, and ensemble performance skills, promotes greater engagement with and appreciation for music through performance and other experiences with a broad spectrum of music, as well as creativity through composition and/or arranging.. Study includes cultivation of well-developed instrumental ensemble techniques and skills, music literacy and theory, and deeper aesthetic engagement with a wide variety of high-quality repertoire.

# GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Notes: This course requires students to participate in extra rehearsals and performances beyond the school day. Additional experiences with small ensembles and solo performance may be available. Students who enjoy the challenges and successes of this course may wish to take an accelerated music class in the future. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# **Educator Certifications**

# Band 5 Honors (#1302340) 2020 - 2022 (current)

| Name            | Description  |
|-----------------|--|
|                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:   | Clarifications:<br>e.g., listening maps, active listening, checklists  |
|                 | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent.  |
| MU.912.C.1.2:   | Clarifications:<br>e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title   |
|                 | Analyze instruments of the world and classify them by common traits.   |
| MU.912.C.1.3:   | Clarifications:<br>e.g., classical and folk instruments from around the world  |
| MU.912.C.2.1:   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:   | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.2.3:   | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.   |
| MU.912.C.3.1:   | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.                                       |
| MU.912.F.1.1:   | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.  |
| MIL 912 E 2 1   | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training.  |
| 1010.712.1.2.1. | Clarifications:<br>e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills   |
|                 | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.  |
| MU.912.F.2.2:   | Clarifications:<br>e.g., community revitalization, industry choosing new locations, cultural and social enrichment   |
| MU.912.F.3.1:   | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.   |
| MU.912.F.3.2:   | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.3:   | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace. |
| MU.912.F.3.4:   | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.    |
|                 | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1:   | Clarifications:<br>e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                 | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU.912.H.1.2:   | Clarifications:<br>e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|                 | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:   | Clarifications:<br>e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.4:   | Analyze how Western music has been influenced by historical and current world cultures.  |
| MU.912.H.1.5:   | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.1:   | Evaluate the social impact of music on specific historical periods.  |
| MU.912.H.2.2:   | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.<br>Analyze the evolution of a music genre.                               |

| mo.712.0.0.0.           | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                         | Determine the meaning of sumbale, key terms, and other domain encoding upde and phrases as they are used in a specific scientific or technical              |
| LAFS.1112.RST.2.4:      | context relevant to grades 11–12 texts and tonics   |
|                         | Initiate and participate effectively in a range of collaborative discussions (one-on-one in groups, and teacher-led) with diverse partners on grades 11–    |
|                         | 12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.  |
|                         | a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from         |
|                         | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.  |
|                         | b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as           |
| Ι ΔES 1112 SL 1 1·      | needed.   |
| EAT 5.1112.5E.1.1.      | c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a        |
|                         | topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.                                       |
|                         | d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions            |
|                         | when possible; and determine what additional information or research is required to deepen the investigation or complete the task.                          |
|                         | Standard Pelation to Course: Supporting   |
|                         | Integrate multiple sources of information presented in diverse formate and mode (o.g., visually, quantitatively, arelly) in order to make informed          |
| LAFS.1112.SL.1.2:       | decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data                            |
|                         | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance premises links among ideas word choice points         |
| LAFS.1112.SL.1.3:       | of emphasis, and tone used.   |
|                         | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning,   |
| LAFS.1112.SL.2.4:       | alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience,           |
|                         | and a range of formal and informal tasks.   |
| LAFS.1112.WHST.2.4:     | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.                        |
| LAFS 1112 WHST 3 7      | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or          |
| 2.31 0.1 112. WHO1.0.7. | broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.           |
| LAFS.1112.WHST.3.9:     | Draw evidence from informational texts to support analysis, reflection, and research.   |
|                         | Use appropriate tools strategically.  |
|                         | · · · · · · · · · · · · · · · · · · ·   |
| MAFS.K12.MP.5.1:        | mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,            |
|                         | Concrete models, a ruler, a protractor, a calculator, a spreadsneer, a computer algebra system, a statistical package, or dynamic geometry sortware.        |
|                         | might be beinful recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze       |
|                         | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other            |
|                         | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varving                      |
|                         | assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify       |
|                         | relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use        |
|                         | technological tools to explore and deepen their understanding of concepts.  |
|                         | Standard Relation to Course: Supporting   |
|                         | Attend to precision.  |
| 1                       |   |

| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. <b>Standard Relation to Course: Supporting</b>   |
|-------------------|--|
|                   | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| SS.912.H.1.5:     | Examine artistic response to social issues and new ideas in various cultures.  |
|                   | Clarifications:<br>Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.   |
| SS.912.H.2.3:     | Apply various types of critical analysis (contextual, formal, and intuitive criticism) to works in the arts, including the types and use of symbolism within art forms and their philosophical implications.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

This year-long, advanced course, designed for wind and percussion students with extensive experience in solo performance and larger performing ensembles, promotes significant depth of engagement and lifelong appreciation of music through performance and other experiences with sophisticated instrumental music, as well as creativity through composition and/or arranging. The course includes the development of advanced instrumental ensemble techniques and skills, extended music literacy and theory, and deep aesthetic engagement with a broad spectrum of high-quality repertoire, ranging from early music to the contemporary. Musical independence and leadership are particularly encouraged in this setting.

# GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Notes: Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Additional experiences with small ensembles, solo performance, and leadership opportunities may be available. Students who enjoy the challenges and successes of this course may wish to take an accelerated music class in the future. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# GENERAL INFORMATION

Course Number: 1302340

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Number of Credits: One (1) credit

Abbreviated Title: BAND 5 HON Course Length: Year (Y) Course Attributes: • Honors Course Level: 3

Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts

## **Educator Certifications**

# Band 5 Honors (#1302340) 2022 - And Beyond

| Name                      | Description   |
|---------------------------|---|
|                           | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:             | Clarifications:   |
|                           | e.g., listening maps, active listening, checklists  |
|                           | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                        |
|                           | composer's intent.  |
| MU.912.C.1.2:             | Clarifications:   |
|                           | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                                     |
|                           | Analyze instruments of the world and classify them by common traits   |
| MU 010 0 1 0              |   |
| MU.912.C.1.3:             | clarifications:   |
|                           |   |
| MU.912.C.2.1:             | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:             | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.2.3:             | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.  |
| MU.912.C.3.1:             | make critical evaluations, based on exemplary models, or the quality and effectiveness of performances and apply the criteria to personal development<br>in music |
| MU 912 F 1 1 <sup>.</sup> | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music  |
|                           | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music               |
|                           | training.   |
| MU.912.F.2.1:             | Clarifications:   |
|                           | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills                               |
|                           | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions  |
|                           | And year the encer of the drist and encertainment industry on the economic and social neutrino communities and regions.   |
| WU.912.F.2.2:             | e.g. community revitalization, industry choosing new locations, cultural and social enrichment  |
|                           |   |
| MU.912.F.3.1:             | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of             |
|                           | Summarize convisiont laws that govern printed, recorded, and on line music to promote legal and responsible use of intellectual property and                      |
| MU.912.F.3.2:             | technology.   |
|                           | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,         |
| MU.912.F.3.3:             | demonstrating skills for use in the workplace.  |
|                           | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,                |
| 1/10.912.1.3.4.           | and initiative to advance skills and/or knowledge.  |
|                           | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:             | Clarifications:   |
|                           | e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                           | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.   |
| MU.912.H.1.2:             | Clarifications:   |
|                           | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|                           | Compare two or more works of a composer across performance media.   |
| MU 912 H 1 3              | Clarifications:   |
|                           | e.g., orchestral and choral; guitar and string guartet; piano solo and piano concerto   |
| MII 012 H 1 л.            | Analyze how Western music has been influenced by historical and current world cultures  |
| MU 912 H 1 5              | Analyze music within cultures to gain understanding of authentic performance practices  |
| MU.912.H.2.1:             | Evaluate the social impact of music on specific historical periods.   |
| MU.912.H.2.2:             | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.                                   |
|                           | Analyze the evolution of a music genre.   |

|                           | e.g., jazz, blues   |
| MII 912 H 2 Л·            | Evamine the effects of developing technology on composition, performance, and acquisition of music  |
| 10.712.11.2.4.            | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects                       |
|                           | musical performance.  |
| MU.912.H.3.1:             | Clarifications  |
|                           | e.g., acoustics, sound amplification, materials, mechanics  |
|                           | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure   |
| MU 012 O 1 1              |   |
| WIU.912.U.1.1:            | ciannications.<br>e a rhythm melody timbre form tonality harmony texture solo chamber ensemble large ensemble   |
|                           |   |
| MU.912.0.2.1:             | rransfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.  |

| MU.912.0.2.2:   | Transpose melodies into different modalities through performance and composition.  |
|-----------------|--|
|                 | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.   |
| MU.912.0.3.1:   | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration  |
| MU.912.O.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                 | Improvise rhythmic and melodic phrases over harmonic progressions.   |
| MU.912.S.1.1:   | Clarifications:<br>e.g., using text or scat syllables  |
|                 | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:   | Clarifications:<br>e.g., texture, mode, form, tempo, voicing   |
|                 | Perform and notate, independently and accurately, melodies by ear.   |
| MU.912.S.1.4:   | Clarifications:<br>e.g., singing, playing, writing   |
|                 | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
| MU.912.S.2.1:   | Clarifications:<br>e.g., memorization, sequential process  |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
|                 | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:   | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.3:   | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.   |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                 | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:   | Clarifications:  |
|                 | Mathematicians who participate in offertful learning both individually and with others:  |
|                 | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> </ul>  |
|                 | Ask questions that will help with solving the task.  |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.  |
|                 | Stay engaged and maintain a positive mindset when working to solve tasks.  |
| MA.K12.MTR.1.1: | Help and support each other when attempting a new method or approach.  |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                 | Cultivate a community of growth mindset learners.  |
|                 | Foster perseverance in students by choosing tasks that are challenging.  |
|                 | Develop students' ability to analyze and problem solve.  |
|                 | Recognize students' effort when solving challenging problems.  |
|                 | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                 | Build understanding through modeling and using manipulatives.  |
|                 | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.  |
|                 | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Eveness connections between consents and consecutations.</li> </ul>   |
| MA K12 MTR 2 1. | Choose a representation based on the given context or purpose.   |
| WD ((12.W) ( (  | Clarifications:  |
|                 | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:  |
|                 | Help students make connections between concepts and representations.   |
|                 | Provide opportunities for students to use manipulatives when investigating concepts.   |
|                 | <ul> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different numbers and can be useful in different situations.</li> </ul> |
|                 | Complete tasks with mathematical fluency.  |
|                 | Colort officient and entropying mathematical numbers:  |
|                 | <ul> <li>Select encient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations</li> </ul>   |
| MA.K12.MTR.3.1: | Complete tasks accurately and with confidence.   |
|                 | Adapt procedures to apply them to a new context.   |
|                 | Use feedback to improve efficiency when performing calculations.   |
|                 | Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:  |
|                 |  |

|                 | <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>  |
|-----------------|---|
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.   |
| MA.K12.MTR.4.1: | <ul> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> </li> </ul>  |
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:   |
| MA.K12.MTR.5.1: | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>  |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through justifications.  |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> |
|                 | Cite evidence to explain and justify reasoning.   |
| ELA.K12.EE.1.1: | <ul> <li>Clarifications:</li> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> </ul>   |
|                 | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |

|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|-------------------|--|
|                   | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                   | Make inferences to support comprehension.  |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.               |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |
|                   | build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
|                   | Examine artistic response to social issues and new ideas in various cultures.  |
| SS.912.H.1.5:     | Clarifications:<br>Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.   |
| SS.912.H.2.3:     | Apply various types of critical analysis (contextual, formal, and intuitive criticism) to works in the arts, including the types and use of symbolism within art forms and their philosophical implications.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

This year-long, advanced course, designed for wind and percussion students with extensive experience in solo performance and larger performing ensembles, promotes significant depth of engagement and lifelong appreciation of music through performance and other experiences with sophisticated instrumental music, as well as creativity through composition and/or arranging. The course includes the development of advanced instrumental ensemble techniques and skills, extended music literacy and theory, and deep aesthetic engagement with a broad spectrum of high-quality repertoire, ranging from early music to the contemporary. Musical independence and leadership are particularly encouraged in this setting.

# **GENERAL NOTES**

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Notes: Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Additional experiences with small ensembles, solo performance, and leadership opportunities may be available. Students who enjoy the challenges and successes of this course may wish to take an accelerated music class in the future. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit

https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

| Name           | Description   |
|----------------|---|
|                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:  | Clarifications:   |
|                | e.g., listening maps, active listening, checklists  |
|                | Compare using correct music version was hubble a settletic impact of two or more performances of a musical work to prove own hypothesis of the  |
|                | compare, using context music vocabulary, the aesthetic impact of two of more performances of a musical work to one s own hypothesis of the  |
| MU.912.C.1.2:  |   |
|                | Clarifications:   |
|                | e.g., quanty recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, inte   |
|                | Analyze instruments of the world and classify them by common traits.  |
| MU.912.C.1.3:  | Clarifications:   |
|                | e.g., classical and folk instruments from around the world  |
| MU.912.C.2.1:  | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:  | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.2.3:  | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.  |
| MIL 012 C 3 1. | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development   |
| 10.712.0.0.1.  | in music.   |
| MU.912.F.1.1:  | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.   |
|                | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music   |
| MIL 912 E 2 1. | training.   |
|                | Clarifications:   |
|                | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills   |
|                | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.   |
| MU.912.F.2.2:  | Clarifications:   |
|                | e.g., community revitalization, industry choosing new locations, cultural and social enrichment   |
|                | Compare the organizational structure of a professional orchestra, chorus, guintet, or other ensemble to that of a business.   |
| MUL 012 E 2 2  | Clarifications  |
| 10.712.1.2.3.  | e.g. leadership financial needs and structure marketing personnel matters manager travel  |
|                |   |
| MU.912.F.3.1:  | Analyze and describe now meeting one's responsibilities in music orners opportunities to develop leadership skills, and identity personal examples of leadership in school and/or non-school settings |
|                | Summarize convright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and   |
| MU.912.F.3.2:  | technology.   |
|                | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,   |
| MU.912.F.3.3:  | demonstrating skills for use in the workplace.  |
| MU 912 F 3 4·  | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,  |
| 10.712.1.0.1.  | and initiative to advance skills and/or knowledge.  |
|                | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:  | Clarifications:   |
|                | e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.   |
| MU.912.H.1.2:  | Clarifications:   |
|                | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|                | Compare two or more works of a composer across performance media.   |
| MIL 012 H 1 3. | Clarifications  |
| M0.712.11.1.3. | e.g., orchestral and choral; guitar and string guartet; piano solo and piano concerto   |
|                | Analyze how Wastern music has been influenced by bistorical and surrent world sultures  |
| MU.912.H.1.4:  | Analyze now western music has been initialized by historical and current world currents.  |
| MU.912.11.1.5. | Evaluate the social impact of music on specific historical periods  |
| MIL 012 H 2 2  | Analyze current musical trands, including audiance environments and music acquisition, to predict possible directions of music  |
| 10.712.11.2.2. | Analyze the evolution of a music genre  |
| MU 012 U 2 2   |   |
| MU.912.H.2.3:  |   |
|                | e.g., Jazz, blues   |
| MU.912.H.2.4:  | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects   |
| MU.912.H.3.1:  |   |
|                | Clarifications:   |
|                |   |
|                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |

| MU.912.O.1.1:       | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
|---------------------|---|
| MU.912.0.2.1:       | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.  |
| MU.912.O.2.2:       | Transpose melodies into different modalities through performance and composition.<br>Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.   |
| MU.912.O.3.1:       | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration   |
| MU.912.0.3.2:       | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                     | Improvise rhythmic and melodic phrases over harmonic progressions.  |
| MU.912.S.1.1:       | Clarifications:<br>e.g., using text or scat syllables   |
|                     | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:       | Clarifications:<br>e.g., texture, mode, form, tempo, voicing  |
|                     | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S.1.4:       | Clarifications:<br>e.g., singing, playing, writing  |
| MU 012 C 2 1.       | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   |
| MU.912.5.2.1:       | Clarifications:<br>e.g., memorization, sequential process   |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
|                     | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.5.3.2:       | clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.3:       | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.  |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
| MU.912.S.3.5:       | Develop and demonstrate proper vocal or instrumental technique.  Clarifications: e.g. posture breathing fingering embouchure bow technique tuning strumming   |
|                     | e.g., posture, breathing, inigening, embodicidie, bow technique, turning, strainming  |
| LAFS.1112.RST.2.4:  | context relevant to grades 11–12 texts and topics.  |
| LAFS.1112.SL.1.1:   | <ul> <li>12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li> </ul>  |
|                     | Standard Relation to Course: Supporting   |
| LAFS.1112.SL.1.2:   | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.   |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks  |
| LAFS.1112.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.1112.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate, synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation   |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use |

|                   | technological tools to explore and deepen their understanding of concepts.<br>Standard Relation to Course: Supporting  |
|-------------------|--|
| MAFS.K12.MP.6.1:  | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:  | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see $7 \times 8$ equals the well remembered $7 \times 5 + 7 \times 3$ , in preparation for learning about the distributive property. In the expression $x^2$<br>$+ 9x + 14$ , older students can see the 14 as $2 \times 7$ and the 9 as $2 + 7$ . They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |
| SS.912.H.1.5:     | Examine artistic response to social issues and new ideas in various cultures.  Clarifications: Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.   |

# VERSION DESCRIPTION

This year-long, highly advanced course, designed for students with substantial experience in solo performance and larger performing ensembles, promotes significant engagement with and appreciation for music through performance of sophisticated wind and percussion literature. Study focuses on mastery of highly advanced music skills, techniques, and processes, as well as creativity through composition and/or arranging and use of current technology to enhance creativity and performance effectiveness. This course also provides significant opportunities for student leadership through peer mentoring, solo work, and participation as a performer or coach in a small or large ensemble.

## GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Notes: Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Additional experiences with small ensembles, solo performance, and leadership opportunities may be available. Students who enjoy the challenges and successes of this course may wish to take an accelerated music class in the future. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# GENERAL INFORMATION

Course Number: 1302350

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Number of Credits: One (1) credit

Abbreviated Title: BAND 6 HON Course Length: Year (Y) Course Attributes: • Honors Course Level: 3

Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts

## **Educator Certifications**

# Band 6 Honors (#1302350) 2022 - And Beyond

| Name            | Description  |
|-----------------|--|
|                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:   | Clarifications:  |
|                 | e.g., listening maps, active listening, checklists   |
|                 | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the   |
|                 | composer's intent.   |
| MU.912.C.1.2:   | Clarifications:  |
|                 | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
|                 | Analyze instruments of the world and classify them by common traits  |
| MIL 912 C 1 3.  | Clarifications   |
| 1017121011101   | e.g., classical and folk instruments from around the world   |
| MIL 912 C 2 1·  | Evaluate and make appropriate adjustments to personal performance in solo and epsembles  |
| MU.912.C.2.2:   | Evaluate performance guality in recorded and/or live performances.   |
| MU.912.C.2.3:   | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.   |
|                 | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development  |
| MU.912.C.3.1:   | in music.  |
| MU.912.F.1.1:   | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.  |
|                 | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music  |
| MIL 012 E 2 1.  | training.  |
| 10.712.1.2.1.   | Clarifications:  |
|                 | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills  |
|                 | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.  |
| MU.912.F.2.2:   | Clarifications:  |
|                 | e.g., community revitalization, industry choosing new locations, cultural and social enrichment  |
|                 | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.  |
| MU.912.F.2.3:   | Clarifications:  |
|                 | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel   |
|                 | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of  |
| WIU.912.F.3.1:  | leadership in school and/or non-school settings.   |
| MU.912.F.3.2:   | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and  |
|                 | technology.<br>Define onicities and an and the constant to be added to individual environment of second states and the second technology is the second states and the second states are individual to the second states ar |
| MU.912.F.3.3:   | demonstrating skills for use in the workplace  |
|                 | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,   |
| MU.912.F.3.4:   | and initiative to advance skills and/or knowledge.   |
|                 | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1:   | Clarifications:  |
|                 | e.g., patriotic, folk, celebration, entertainment, spiritual   |
|                 | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU.912.H.1.2:   | Clarifications:  |
|                 | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
|                 | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:   | Clarifications:  |
|                 | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU.912.H.1.4:   | Analyze how Western music has been influenced by historical and current world cultures.  |
| MU.912.H.1.5:   | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.1:   | Evaluate the social impact of music on specific historical periods.  |
| MU.912.H.2.2:   | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.  |
|                 | Analyze the evolution of a music genre.  |
| MU.912.H.2.3:   | Clarifications:  |
|                 | e.g., jazz, blues  |
| MU.912.H.2.4:   | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|                 | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects  |
| MIL 010 11 0 1  | musical performance.   |
| IVIU.912.H.3.1: | Clarifications:  |
|                 | e.g., acoustics, sound amplification, materials, mechanics   |
|                 | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |

| MU.912.0.1.1:   | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
|-----------------|---|
| MU.912.0.2.1:   | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.  |
| MU.912.O.2.2:   | Transpose melodies into different modalities through performance and composition.<br>Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.   |
| MU.912.O.3.1:   | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration   |
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
| MU.912.S.1.1:   | Clarifications:<br>e.g., using text or scat syllables   |
|                 | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:   | Clarifications:<br>e.g., texture, mode, form, tempo, voicing  |
| MU.912.S.1.4:   | Perform and notate, independently and accurately, melodies by ear. Clarifications: e.g., singing, playing, writing  |
|                 | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature  |
| MU.912.S.2.1:   | Clarifications:<br>e.g., memorization, sequential process   |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
|                 | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.5.3.2:   | e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.3:   | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.  |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
| MU.912.S.3.5:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> <b>Clarifications:</b> <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations. Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> </ul></li></ul> |
|                 | <ul> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> </ul>  |

| MA.K12.MTR.3.1: | Adapt procedures to apply them to a new context.  |
|-----------------|---|
|                 | Use feedback to improve efficiency when performing calculations.  |
|                 | Clarifications:   |
|                 | Teachers who encourage students to complete tasks with mathematical fluency:  |
|                 | <ul> <li>Provide students with the nextbility to solve problems by selecting a procedure that allows them to solve enciently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> </ul>         |
|                 | Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used   |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others  |
|                 | Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  |
|                 | Communicate mathematical ideas, vocabulary and methods effectively.   |
|                 | Analyze the mathematical thinking of others.  |
|                 | Compare the efficiency of a method to those expressed by others.     Pecognize errors and suggest how to correctly solve the task   |
|                 | Justify results by explaining methods and processes.  |
| MA.K12.MTR.4.1: | Construct possible arguments based on evidence.   |
|                 | Clarifications:   |
|                 | Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:  |
|                 | • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.   |
|                 | <ul> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select conjugate and present student work to advance and degree understanding of correct and increasingly officient methods.</li> </ul>                                   |
|                 | <ul> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
|                 | Use patterns and structure to bells understand and compare mathematical consents  |
|                 | Mathematicians who use patterns and structure to help understand and connect mathematical concepts:   |
|                 | Focus on relevant details within a problem.   |
|                 | Create plans and procedures to logically order events, steps or ideas to solve problems.  |
|                 | Decompose a complex problem into manageable parts.  |
|                 | Relate previously learned concepts to new concepts.   |
| MA.K12.MTR.5.1: | <ul> <li>Look for similarities among problems.</li> <li>Connect colutions of problems to more complicated large scale situations.</li> </ul>  |
|                 | Connect solutions of problems to more complicated large-scale situations.   |
|                 | Clarifications:<br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:  |
|                 | <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> </ul>  |
|                 | • Support students to develop generalizations based on the similarities found among problems.   |
|                 | Provide opportunities for students to create plans and procedures to solve problems.  |
|                 | • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.   |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:   |
|                 |   |
|                 | Estimate to discover possible solutions.     Else banchmark quantities to determine if a solution makes sense.  |
|                 | Ose benchmark quantities to determine in a solution makes sense.     Check calculations when solving problems.  |
|                 | <ul> <li>Verify possible solutions by explaining the methods used.</li> </ul>   |
| MA.K12.MTR.6.1: | Evaluate results based on the given context.  |
|                 | Clarifications:   |
|                 | Teachers who encourage students to assess the reasonableness of solutions:  |
|                 | Have students estimate or predict solutions prior to solving.   |
|                 | <ul> <li>Prompt students to continually ask, Does this solution make sense? How do you know?</li> <li>Peinforce that students check their work as they progress within and after a task.</li> </ul>   |
|                 | <ul> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
|                 | Apply mathematics to real-world contexts.   |
|                 | Mathematicians who apply mathematics to real-world contexts:  |
|                 | Connect mathematical concepts to everyday experiences.  |
|                 | Use models and methods to understand, represent and solve problems.   |
|                 | Perform investigations to gather data or determine if a method is appropriate.     Redesign models and methods to improve accuracy or efficiency  |
| MA.K12.MTR.7.1: | Clarifications:   |
|                 | <ul> <li>Provide apportunities for students to greate models, both concrete and abstract, and perform investigations.</li> </ul>  |
|                 | <ul> <li>From exportantities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> </ul>  |
|                 | <ul> <li>Support students as they validate conclusions by comparing them to the given situation.</li> </ul>   |
|                 | <ul> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>  |
|                 | Cite evidence to explain and justify reasoning.   |
|                 | Clarifications:   |
|                 | K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details  |
|                 | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.   |
|                 | In 3rd grade, students should use a combination of direct and indirect citations.   |
| ELA.K12.EE.1.1: | 4.5 Students continue with previous skills and reference comments made by snapkers and nears. Students site toyte that they've directly   |
|                 | 4-5 students continue with previous skins and reference comments made by speakers and peers. Students cite texts that they ve directly  |

|                   | quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |  |
|-------------------|--|--|
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |  |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |  |
|                   | Read and comprehend grade-level complex texts proficiently.  |  |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |  |
|                   | Make inferences to support comprehension.  |  |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.               |  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |  |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |  |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |  |
|                   | Use the accepted rules governing a specific format to create quality work.   |  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |  |
|                   | Use appropriate voice and tone when speaking or writing.   |  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |  |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |  |
|                   | Examine artistic response to social issues and new ideas in various cultures.  |  |
| SS.912.H.1.5:     | Clarifications:<br>Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.   |  |

# VERSION DESCRIPTION

This year-long, highly advanced course, designed for students with substantial experience in solo performance and larger performing ensembles, promotes significant engagement with and appreciation for music through performance of sophisticated wind and percussion literature. Study focuses on mastery of highly advanced music skills, techniques, and processes, as well as creativity through composition and/or arranging and use of current technology to enhance creativity and performance effectiveness. This course also provides significant opportunities for student leadership through peer mentoring, solo work, and participation as a performer or coach in a small or large ensemble.

## **GENERAL NOTES**

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Notes: Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Additional experiences with small ensembles, solo performance, and leadership opportunities may be available. Students who enjoy the challenges and successes of this course may wish to take an accelerated music class in the future. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit

https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Marching Band (#1302355) 2020 - 2022 (current)

| Name               | Description   |
|--------------------|---|
|                    | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:      | Clarifications:   |
|                    | e.g., listening maps, active listening, checklists  |
| MU.912.C.2.1:      | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:      | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.2.3:      | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.  |
| MU.912.C.3.1:      | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.   |
| MU.912.F.3.3:      | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.  |
| MU.912.0.3.2:      | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
| MU.912.S.2.2:      | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:      | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
|                    | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:      | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
|                    | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:      | Clarifications:   |
|                    | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                    | Apply replication, physical rehearsal, and cognitive rehearsal to aid in the mental and physical retention of patterns, complex steps, and sequences performed by another dancer.   |
| DA.912.C.1.2:      | Clarifications:   |
|                    | e.g., mind/body connection, watching, following, marking, visualizing, imagery, using rhythmic clues  |
|                    | Analyze movement from varving perspectives and experiment with a variety of creative solutions to solve technical or choreographic challenges.  |
| DA 912 C 2 1       |   |
| 571772.0.2.11      | e.g., improvisation, trial and error, collaboration   |
|                    | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in  |
| DA.912.F.3.8:      | the work environment.   |
|                    | Dissect or assemble a step, pattern, or combination to show understanding of the movement, terminology, and progression.  |
| DA.912.0.1.3:      | Clarifications:   |
|                    | e.g., tendu-dégagé-grand battement-grand jeté   |
| DA.912.S.2.1:      | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
|                    | Apply corrections and concepts from previously learned steps to different material to improve processing of new information.  |
| DA.912.S.2.2:      | Clarifications:   |
|                    | e.g., repetition, revision, refinement, focus   |
|                    | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical   |
| LAFS.910.RST.2.4:  | context relevant to grades 9–10 texts and topics.   |
|                    | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10  |
|                    | topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.   |
|                    | a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from   |
|                    | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange or ideas.  |
|                    | b. Work with peers to set rules for collegial discussions and decision-making (e.g., mormal consensus, taking votes on key issues, presentation of<br>attornate views), clear goals and deadlines, and individual roles as peeded.                    |
| LAFS.910.SL.1.1:   | c. Provel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas: actively  |
|                    | incorporate others into the discussion: and clarify verify or challenge ideas and conclusions   |
|                    | d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, gualify or justify their  |
|                    | own views and understanding and make new connections in light of the evidence and reasoning presented.  |
|                    | Standard Relation to Course: Supporting   |
|                    | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and   |
| LAFS.910.SL.1.2:   | accuracy of each source.  |
| LAFS 910 SL 1 2.   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted   |
| LAI 3.710.3L.1.3.  | evidence.   |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task. |
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
|                    | Analyze the movement performance of self and others.  |

| PE.912.C.2.3:     | Clarifications:<br>Some examples are video analysis and checklist.   |  |
|-------------------|--|--|
| PE.912.C.2.7:     | Evaluate the effectiveness of specific warm-up and cool-down activities.   |  |
|                   | Explain the precautions to be taken when exercising in extreme weather and/or environmental conditions.  |  |
| PE.912.C.2.9:     | Clarifications:<br>Some examples of precautions are hydration and appropriate attire.  |  |
| PE.912.C.2.25:    | Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.   |  |
| PE.912.M.1.20:    | Perform complex combinations and sequences demonstrating smooth transitions while alone, with a partner or in a small group.   |  |
| PE.912.R.5.5:     | Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.   |  |
| MAFS.K12.MP.5.1:  | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. Standard Relation to Course: Supporting |  |
|                   | Attend to precision.   |  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |  |
|                   | Standard Relation to Course: Supporting  |  |
|                   | Look for and make use of structure.  |  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |  |
|                   | Standard Relation to Course: Supporting  |  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |  |

# VERSION DESCRIPTION

Students will participate in activities of their school's marching band. Activities may include, but are not limited to, the study of the chosen program of music for the season, rehearsals of the marching routine to accompany music. There are a variety of ways that students may participate and earn credit in this course. Some students may play instruments, some may work with flags, batons, or other apparatus, some may be dancers, etc.

# GENERAL NOTES

Special Note: This course may require students to participate in extra rehearsals and performances beyond the school day. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. |                           | Express connections between concepts and representations.   |
| MA.K12.MTR.2.1:           | <ul> <li>Choose a representation based on the given context or purpose.</li> </ul>  |
|                           | Clarifications:   |
|                           | leachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                           | Provide opportunities for students to use manipulatives when investigating concents   |
|                           | Guide students from concrete to nictorial to abstract representations as understanding progresses   |
|                           | <ul> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>   |
|                           | Complete tasks with methamatical fluonau  |
|                           | Complete tasks with mathematical nuelicy.<br>Mathematicians who complete tasks with mathematical fluency:   |
|                           |   |
|                           | Select efficient and appropriate methods for solving problems within the given context.   |
| MA.K12.MTR.3.1:           | <ul> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> </ul>  |
|                           | Complete tasks accurately and with confidence.  |
|                           | Adapt procedures to apply them to a new context.  |
|                           | Use reedback to improve efficiency when performing calculations.  |
|                           | Clarifications:   |
|                           | e Dravide students with the flavibility to eally a problems by calculating a more that allows there to ache afficiently and   |
|                           | <ul> <li>Provide students with the nextbility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple encertuations for students to practice efficient and generalizable methods.</li> </ul> |
|                           | Other multiple opportunities for students to reflect on the method they used and determine if a more afficient method could have been used  |
|                           | <ul> <li>Provide opportunities for students to renect on the method mey used and determine it a more encient method could have been used.</li> </ul>  |

| MA.K12.MTR.4.1: | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |
|-----------------|---|
|                 | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> </ul>  |
|                 | <ul> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>   |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |
|                 | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         • Support students to develop generalizations based on the similarities found among problems.         • Provide opportunities for students to create plans and procedures to solve problems.         • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.   |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.  |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> |
| DA.912.C.1.2:   | Apply replication, physical rehearsal, and cognitive rehearsal to aid in the mental and physical retention of patterns, complex steps, and sequences performed by another dancer.  Clarifications: e.g., mind/body connection, watching, following, marking, visualizing, imagery, using rhythmic clues   |
| DA.912.C.2.1:   | Analyze movement from varying perspectives and experiment with a variety of creative solutions to solve technical or choreographic challenges.<br>Clarifications:<br>e.g., improvisation, trial and error, collaboration  |
| DA.912.F.3.8:   | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.<br>Dissect or assemble a step, pattern, or combination to show understanding of the movement, terminology, and progression.  |
| DA.912.0.1.3:   | Clarifications:<br>e.g., tendu-dégagé-grand battement-grand jeté  |
| DA.912.S.2.1:   | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |

| DA.912.S.2.2:     | Apply corrections and concepts from previously learned steps to different material to improve processing of new information.                             |
|-------------------|--|
|                   | Clarifications:  |
|                   | e.g., repetition, revision, refinement, focus  |
|                   | Cite evidence to explain and justify reasoning.  |
|                   | Clarifications:  |
|                   | K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details             |
|                   | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.                                |
|                   | 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.             |
|                   | In 3rd grade, students should use a combination of direct and indirect citations.  |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly                  |
|                   | quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide         |
|                   | referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                   | 0.12 Students continue with provinus skills and should be aware of existing style guides and the ways in which they differ                               |
|                   | 7-12 Students continue with previous skills and should be aware or existing style guides and the ways in which they driver.                              |
|                   | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:   | Clarifications:  |
|                   | See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.  |
|                   | Clarifications:  |
| ELA.K12.EE.3.1:   | Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl      |
|                   | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and                |
|                   | beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.                            |
|                   | Clarifications:  |
|                   | In kindergarten, students learn to listen to one another respectfully.   |
| ELA.K12.EE.4.1:   | In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The                                 |
|                   | collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students       |
|                   | build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.   |
|                   | Clarifications:  |
| ELA.K12.EE.5.1:   | Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they        |
|                   | must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to         |
|                   | do quality work.   |
|                   | Use appropriate voice and tone when speaking or writing.   |
| FLA K12 FF 6 1    | Clarifications:  |
|                   | In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends           |
|                   | differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.           |
|                   | Analyze the movement performance of self and others.   |
| PE.912.C.2.3:     | Clarifications:  |
|                   | Some examples are video analysis and checklist.  |
| PE.912.C.2.7:     | Evaluate the effectiveness of specific warm-up and cool-down activities.   |
| PE.912.C.2.9:     | Explain the precautions to be taken when exercising in extreme weather and/or environmental conditions.  |
|                   | Clarifications:  |
|                   | Some examples of precautions are hydration and appropriate attire.   |
| PE.912.C.2.25:    | Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.                                       |
| PE.912.M.1.20:    | Perform complex combinations and sequences demonstrating smooth transitions while alone, with a partner or in a small group.                             |
| PE.912.R.5.5:     | Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities. |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

# VERSION DESCRIPTION

Students will participate in activities of their school's marching band. Activities may include, but are not limited to, the study of the chosen program of music for the season, rehearsals of the marching routine to accompany music. There are a variety of ways that students may participate and earn credit in this course. Some students may play instruments, some may work with flags, batons, or other apparatus, some may be dancers, etc.

# GENERAL NOTES

Special Note: This course may require students to participate in extra rehearsals and performances beyond the school day. Students in this class may need to obtain (e.g.,

borrow, rent, purchase) an instrument from an outside source.

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

GENERAL INFORMATION

# Orchestra 1 (#1302360) 2020 - 2022 (current)

| Name             | Description  |
|------------------|--|
| MU.912.C.1.1:    | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
|                  | Clarifications:  |
|                  | e.g., listening maps, active listening, checklists   |
|                  | Compare using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the  |
|                  | compare, using correct induce vocabulary, the aesthetic impact of two of more performances of a musical work to one s own hypothesis of the  |
| MU.912.C.1.2:    |  |
|                  | Clarifications:  |
|                  | e.g., quality recordings, individual and peer group performances, composer notes, instrumentation, expressive elements, the  |
|                  | Analyze instruments of the world and classify them by common traits.   |
| MU.912.C.1.3:    | Clarifications:  |
|                  | e.g., classical and folk instruments from around the world   |
| MU.912.C.2.1:    | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:    | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:    | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |
| MU.912.F.3.1:    | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.   |
| MU.912.F.3.2:    | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.3:    | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace. |
|                  | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1:    | Clarifications:  |
|                  | e.g., patriotic, folk, celebration, entertainment, spiritual   |
|                  | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MIL 012 LI 1 2.  | Clarifications   |
| 1010.912.11.1.2. | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
|                  | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:    | Clarifications:  |
|                  | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU.912.H.1.4:    | Analyze how Western music has been influenced by historical and current world cultures.  |
| MU.912.H.1.5:    | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.1:    | Evaluate the social impact of music on specific historical periods.  |
| MU.912.H.2.4:    | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|                  | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.O.1.1:    | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1:    | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
|                  | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied  |
|                  | meaning of the composer/performer.   |
| MU.912.0.3.1:    | Clarifications:  |
|                  | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,  |
|                  | orchestration  |
| MU.912.0.3.2:    | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                  | Perform and notate, independently and accurately, melodies by ear.   |
| MIL 912 S 1 4·   | Clarifications   |
| 10.712.0.1.1.    | e.g., singing, playing, writing  |
| MIL 012 5 2 2.   | Transfer expressive elements and performance techniques from one piece of music to another   |
| 110.712.3.2.2.   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and  |
| MU.912.S.3.1:    | Sinteste a broad range of musical skins by performing a valied repertoire with expression, appropriate styristic interpretation, technical accuracy, and kinesthetic energy.                             |
| MU.912.S.3.2:    | signt-read music accurately and expressively to snow synthesis of skills.  |
|                  | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
| MIL 912 S 3 4.   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques   |
|                  | Develop and demonstrate proper vocal or instrumental technique   |
| MU 010 6 0 5     |  |
| MU.912.S.3.5:    | Garnications:  |
|                  | e.g., postare, preatining, inigering, embouchare, pow technique, turning, strumming  |
| LAFS.910.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.   |
|--------------------|---|
| LAFS.910.SL.1.1:   | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> <li>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</li> </ul>                 |
|                    | Standard Relation to Course: Supporting   |
| LAFS.910.SL.1.2:   | accuracy of each source.  |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.   |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.   |
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                    | Attend to precision.  |
| MAFS.K12.MP.6.1:   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                    | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:   | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                    | Standard Relation to Course: Supporting   |
| DA.912.F.3.8:      | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.  |
| DA.912.S.2.1:      | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students who have little or no orchestral experience study and perform high-quality beginning orchestral literature of diverse times and styles. Rehearsals focus on the development of critical listening skills, rudimentary string techniques, music literacy, ensemble skills, and aesthetic awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

## GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level

words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: ORCH 1 Course Length: Year (Y) Course Level: 2

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts

### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

# Orchestra 1 (#1302360) 2022 - And Beyond

| Name           | Description  |
|----------------|--|
|                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:  | Clarifications:  |
|                | e.g., listening maps, active listening, checklists   |
|                | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the   |
|                | composer's intent.   |
| MU.912.C.1.2:  | Clarifications:  |
|                | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
|                | Analyze instruments of the world and classify them by common traits.   |
| MU.912.C.1.3:  | Clarifications:  |
|                | e.g., classical and folk instruments from around the world   |
| MU.912.C.2.1:  | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:  | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:  | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |
| MU.912.F.3.1:  | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.   |
| MU.912.F.3.2:  | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.3:  | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace. |
|                | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1:  | Clarifications:  |
|                | e.g., patriotic, folk, celebration, entertainment, spiritual   |
|                | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU.912.H.1.2:  | Clarifications:  |
|                | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
|                | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:  | Clarifications:<br>e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.4:  | Analyze how Western music has been influenced by historical and current world cultures.  |
| MU.912.H.1.5:  | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.1:  | Evaluate the social impact of music on specific historical periods.  |
| MU.912.H.2.4:  | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.O.1.1:  | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1:  | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
|                | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.                   |
| MU.912.O.3.1:  | Clarifications:  |
|                | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration  |
| MU.912.0.3.2:  | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                | Perform and notate, independently and accurately, melodies by ear.   |
| MU.912.S.1.4:  | Clarifications:<br>e.g., singing, playing, writing   |
| MU.912.S.2.2:  | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MIL 012 S 3 1. | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and  |
| WO.712.3.3.1.  | kinesthetic energy.  |
|                | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:  | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:  | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:  | Clarifications:  |
|                | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |

| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> </ul>  |
|-----------------|--|
| MA.K12.MTR.2.1: | <ul> <li>Recognize students errort when solving challenging problems.</li> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> </li> <li>Clarifications: <ul> <li>Help students make connections between concepts and representations.</li> <li>Help students make connections between concepts and representations.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul> </li> </ul>   |
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> <li>Clarifications:</li> <li>Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul> </li> </ul>   |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li></ul>                            |

|                    | Mathematicians who assess the reasonableness of solutions:  |
|--------------------|---|
|                    | Estimate to discover possible solutions.  |
|                    | Use benchmark quantities to determine if a solution makes sense.  |
|                    | Check calculations when solving problems.   |
|                    | Verify possible solutions by explaining the methods used.   |
| MA.K12.MTR.6.1:    | Evaluate results based on the given context.  |
|                    | Clarifications:   |
|                    | Have students estimate or predict solutions prior to solving.   |
|                    | <ul> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> </ul>   |
|                    | Reinforce that students check their work as they progress within and after a task.  |
|                    | Strengthen students' ability to verify solutions through justifications.  |
|                    | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
|                    | Connect mathematical concepts to everyday experiences.  |
|                    | Use models and methods to understand, represent and solve problems.   |
|                    | • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.   |
| MA.K12.MTR.7.1:    | Clarifications:   |
|                    | Teachers who encourage students to apply mathematics to real-world contexts:  |
|                    | Provide opportunities for students to create models, both concrete and abstract, and perform investigations.  |
|                    | Challenge students to question the accuracy of their models and methods.  |
|                    | <ul> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concents can be applied to other disciplines.</li> </ul>   |
|                    | <ul> <li>Indicate now various concepts can be applied to other disciplines.</li> </ul>  |
|                    | Cite evidence to explain and justify reasoning.   |
|                    | Clarifications:<br>K-1 Students include textual evidence in their eral communication with guidence and support from adults. The evidence can consist of details   |
|                    | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.   |
|                    | 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.  |
|                    | In 3rd grade, students should use a combination of direct and indirect citations.   |
| ELA.K12.EE.1.1:    | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly   |
|                    | quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide  |
|                    | referenced by the instructor.   |
|                    | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                    | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                    |   |
|                    | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:    | Clarifications:   |
|                    | See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                    | Make inferences to support comprehension.   |
|                    | Clarifications:   |
| ELA.K12.EE.3.1:    | Students will make interences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and |
|                    | beyond.   |
|                    | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations  |
|                    | Clarifications:   |
|                    | In kindergarten, students learn to listen to one another respectfully.  |
|                    | In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The  |
| ELA.KIZ.EE.4.I:    | collaborative conversations are becoming academic conversations.  |
|                    | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students  |
|                    | build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                    | Use the accepted rules governing a specific format to create guality work.  |
|                    | Clarifications:   |
| ELA.K12.EE.5.1:    | Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they   |
|                    | must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to  |
|                    | do quality work.  |
|                    | Use appropriate voice and tone when speaking or writing.  |
| ELΔ K12 EE 6 1.    | Clarifications:   |
| LLA.N. 12.LL.U. I. | In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends  |
|                    | differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.F.3.8:      | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in  |
|                    | the work environment.   |
| ELD.K12.FLL.SL 1   | English language learners communicate for social and instructional purposes within the school setting   |
|                    |   |

## VERSION DESCRIPTION

Students who have little or no orchestral experience study and perform high-quality beginning orchestral literature of diverse times and styles. Rehearsals focus on the development of critical listening skills, rudimentary string techniques, music literacy, ensemble skills, and aesthetic awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

## GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|                           | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development                                  |
| MU.912.C.3.1:             | in music.  |
| MU 912 F 3 1              | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of                                  |
|                           | leadership in school and/or non-school settings.   |
| MU.912.F.3.3:             | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,                              |
|                           | Investigate and discuss how a culture's traditions are reflected through its music   |
| MIL 012 LI 1 1.           |  |
| MU.912.H.1.1.             | e.g., patriotic, folk, celebration, entertainment, spiritual   |
|                           | Compare the work of and influences on two or more examplery comparers in the performance medium studied in class   |
|                           |  |
| MU.912.H.1.2:             | Clarifications:  |
|                           |  |
|                           | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:             | Clarifications:  |
|                           | e.g., orchestral and choral; guitar and string quartet; plano solo and plano concerto  |
| MU.912.H.1.4:             | Analyze how Western music has been influenced by historical and current world cultures.  |
| MU.912.H.2.1:             | Evaluate the social impact of music on specific historical periods.  |
|                           | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1:             | Clarifications:  |
|                           | e.g., myulin, melouy, unbre, torm, tonality, namony, texture, solo, chamber ensemble, large ensemble   |
| MU.912.0.2.1:             | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
|                           | Analyze expressive elements in a musical work and describe now the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. |
| MU 012 O 2 1.             |  |
| MU.912.U.3.1.             | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,  |
|                           | orchestration  |
| MU 912 O 3 2 <sup>.</sup> | Interpret and perform expressive elements indicated by the musical score and/or conductor  |
|                           | Perform and notate, independently and accurately, melodies by ear.   |
| MU.912.S.1.4:             | Clarifications:  |
|                           | e.g., singing, playing, writing  |
| MU.912.S.2.2:             | Transfer expressive elements and performance techniques from one piece of music to another.  |
|                           | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and                            |
| MU.912.S.3.1:             | kinesthetic energy.  |
|                           | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:             | Clarifications:  |
|                           | e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.4:             | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                           | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:             | Clarifications:  |
|                           | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                           | Mathematicians who participate in effortful learning both individually and with others:  |
|                           | Analyze the problem in a way that makes sense given the task.  |
|                           | Ask questions that will help with solving the task.  |
|                           | Build perseverance by modifying methods as needed while solving a challenging task.  |

|                 | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>   |
|-----------------|--|
| MA.K12.MTR.1.1: | Clarifications:  |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                 | <ul> <li>Cultivate a community of growth mindset learners.</li> <li>Easter perseverance in students by choosing tasks that are challenging.</li> </ul>   |
|                 | <ul> <li>Develop students' ability to analyze and problem solve.</li> </ul>  |
|                 | Recognize students' effort when solving challenging problems.  |
|                 | Demonstrate understanding by representing problems in multiple ways.<br>Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                 | Build understanding through modeling and using manipulatives.  |
|                 | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.  |
|                 | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> </ul>  |
| MA.K12.MTR.2.1: | <ul> <li>Choose a representation based on the given context or purpose.</li> </ul>   |
|                 | Clarifications:  |
|                 | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:  |
|                 | <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> </ul>   |
|                 | <ul> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> </ul>   |
|                 | Show students that various representations can have different purposes and can be useful in different situations.  |
|                 | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:  |
|                 | • Select efficient and appropriate methods for solving problems within the given context.  |
|                 | Maintain flexibility and accuracy while performing procedures and mental calculations.   |
|                 | Complete tasks accurately and with confidence.   |
| MA.K12.MTR.3.1: | <ul> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>   |
|                 | Clarifications:  |
|                 | Teachers who encourage students to complete tasks with mathematical fluency:   |
|                 | Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.   |
|                 | <ul> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Brovide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul> |
|                 | <ul> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>   |
|                 | Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |
|                 | Communicate mathematical ideas, vocabulary and methods effectively.  |
|                 | Analyze the mathematical thinking of others.   |
|                 | Compare the efficiency of a method to those expressed by others.   |
|                 | <ul> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes</li> </ul>   |
| MA.K12.MTR.4.1: | Construct possible arguments based on evidence.  |
|                 | Clarifications:  |
|                 | Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:   |
|                 | <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> </ul>                           |
|                 | <ul> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> </ul>   |
|                 | • Develop students' ability to justify methods and compare their responses to the responses of their peers.  |
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
|                 | Focus on relevant details within a problem.  |
|                 | Create plans and procedures to logically order events, steps or ideas to solve problems.   |
|                 | Decompose a complex problem into manageable parts.   |
|                 | Relate previously learned concepts to new concepts.     I ook for similarities among problems  |
| MA.K12.MTR.5.1: | Connect solutions of problems to more complicated large-scale situations.  |
|                 | Clarifications:  |
|                 | Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:  |
|                 | <ul> <li>Support students to develop generalizations based on the similarities found among problems.</li> </ul>  |
|                 | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> </ul>   |
|                 | • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
|                 | Estimate to discover possible solutions.   |
|                 | Use benchmark quantities to determine if a solution makes sense.   |

| MA K12 MTD 6 1-  | <ul> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context</li> </ul>  |
|--|--|
| WART2.WTR.0.T.   | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.         • Prompt students to continually ask, "Does this solution make sense? How do you know?"         • Reinforce that students check their work as they progress within and after a task.         • Strengthen students' ability to verify solutions through justifications.   |
|  | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |
|  | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul>  |
| MA.K12.MTR.7.1:  | Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         • Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         • Challenge students to question the accuracy of their models and methods.         • Support students as they validate conclusions by comparing them to the given situation.         • Indicate how various concepts can be applied to other disciplines.  |
|  | Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.   |
| ELA.K12.EE.1.1:  | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.   |
|  | <ul><li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li><li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li></ul>  |
| ELA.K12.EE.2.1:  | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
| ELA.K12.EE.3.1:  | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl  |
|  | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.  |
| ELA.K12.EE.4.1:  | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.         Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.         Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.   |
| ELA.K12.EE.4.1:  | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.         Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.         Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
| ELA.K12.EE.4.1:  | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.         Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.         Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment. |

## VERSION DESCRIPTION

Students who have little or no orchestral experience study and perform high-quality beginning orchestral literature of diverse times and styles. Rehearsals focus on the development of critical listening skills, rudimentary string techniques, music literacy, ensemble skills, and aesthetic awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

## **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|                    | Standard Relation to Course: Supporting   |
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.  |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.   |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.   |
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b>   |
|                    | Attend to precision.  |
| MAFS.K12.MP.6.1:   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                    | Standard Relation to Course: Supporting   |
|                    | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:   | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |
| DA.912.F.3.8:      | Standard Relation to Course: Supporting<br>Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in   |
|                    | the work environment.   |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students who have at least one year of orchestral experience study, rehearse, and perform high-quality orchestra literature. Rehearsals focus on the development of critical listening skills, basic string techniques, music literacy, ensemble skills, and aesthetic awareness in the context of relevant history and cultures. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

MU.912.O.1.1:       Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture: solo, chamber ensemble, large ensemble         MU.912.O.2.1:       Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.         Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.         MU.912.O.3.1:       Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration         MU.912.S.3.2:       Interpret and perform expressive elements indicated by the musical score and/or conductor.         Perform and notate, independently and accurately, melodies by ear.       Clarifications:<br>e.g., singling, playing, writing         MU.912.S.3.1:       Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthelic energy.         MU.912.S.3.2:       Clarifications:<br>e.g., musical elements, expressively to show synthesis of skills.         MU.912.S.3.4:       Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  | MU.912.H.2.3: | Clarifications:<br>e.g., jazz, blues   |
| MU.912.0.1.1:       Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture: solo, chamber ensemble, large ensemble         MU.912.0.2.1:       Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.<br>Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied<br>meaning of the composer/performer.         MU.912.0.3.1:       Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration         MU.912.0.3.2:       Interpret and perform expressive elements indicated by the musical score and/or conductor.<br>Perform and notate, independently and accurately, melodies by ear.         MU.912.S.1.4:       Clarifications:<br>e.g., singing, playing, writing         MU.912.S.2.2:       Transfer expressive elements and performance techniques from one piece of music to another.         MU.912.S.3.1:       Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and<br>kinesthetic energy.         MU.912.S.3.2:       Clarifications:<br>e.g., musical elements, expressive qualities, performance technique         MU.912.S.3.4:       Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   | MU.912.H.2.4: | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
| MU.912.0.2.1:       Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.         Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.         MU.912.0.3.1:       Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration         MU.912.0.3.2:       Interpret and perform expressive elements indicated by the musical score and/or conductor.         Perform and notate, independently and accurately, melodies by ear.         MU.912.S.1.4:       Clarifications:<br>e.g., singing, playing, writing         MU.912.S.3.1:       Transfer expressive elements and performance techniques from one piece of music to another.         MU.912.S.3.1:       Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and<br>kinesthetic energy.         MU.912.S.3.2:       Clarifications:<br>e.g., musical elements, expressive qualities, performance technique         MU.912.S.3.4:       Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   | MU.912.O.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.3.1:       Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.         MU.912.0.3.1:       Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration         MU.912.0.3.2:       Interpret and perform expressive elements indicated by the musical score and/or conductor.         Perform and notate, independently and accurately, melodies by ear.         MU.912.S.1.4:       Clarifications:<br>e.g., singing, playing, writing         MU.912.S.2.2:       Transfer expressive elements and performance techniques from one piece of music to another.         MU.912.S.3.1:       Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and<br>kinesthetic energy.         MU.912.S.3.2:       Clarifications:<br>e.g., musical elements, expressive qualities, performance technique         MU.912.S.3.4:       Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  | MU.912.0.2.1: | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
| meaning of the composer/performer.         MU.912.0.3.1:       Clarifications:         e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration         MU.912.0.3.2:       Interpret and perform expressive elements indicated by the musical score and/or conductor.         Perform and notate, independently and accurately, melodies by ear. MU.912.S.3.1:       Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.         MU.912.S.3.2:       Sight-read music accurately and expressively to show synthesis of skills.         MU.912.S.3.2:       Clarifications:         e.g., musical elements, expressive qualities, performance technique         MU.912.S.3.4:       Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   | MU.912.S.1.4: | Clarifications:<br>e.g., singing, playing, writing   |
| MU.912.S.3.1:       Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.         MU.912.S.3.2:       Sight-read music accurately and expressively to show synthesis of skills.         MU.912.S.3.2:       Clarifications:         e.g., musical elements, expressive qualities, performance technique         MU.912.S.3.4:       Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   | MU.912.S.2.2: | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.2:       Sight-read music accurately and expressively to show synthesis of skills.         MU.912.S.3.2:       Clarifications:<br>e.g., musical elements, expressive qualities, performance technique         MU.912.S.3.4:       Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  | MU.912.S.3.1: | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.                          |
| MU.912.S.3.2:       Clarifications:         e.g., musical elements, expressive qualities, performance technique         MU.912.S.3.4:       Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |               | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.4: Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   | MU.912.S.3.2: | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
|   | MU.912.S.3.4: | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |

|                 | Develop and demonstrate proper vocal or instrumental technique.  |
|-----------------|--|
| MU.912.S.3.5:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Bercongrize students' effort when solving challenging problems.</li> </ul>  |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>   |
| MA.K12.MTR.2.1: | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul> Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li></ul>   |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts. <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li></ul>   |

|                 | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>  |
|-----------------|--|
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |
| MA.K12.MTR.7.1: | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul> |
|                 | Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.   |
| ELA.K12.EE.1.1: | <ul> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> </ul>  |
|                 | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently.  Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.3.1: | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                 | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1: | In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.  |
|                 | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                 | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1: | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
|                 | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1: | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.F.3.8:   | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment  |
| DA.912.S.2.1:   | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |

#### VERSION DESCRIPTION

Students who have at least one year of orchestral experience study, rehearse, and perform high-quality orchestra literature. Rehearsals focus on the development of critical listening skills, basic string techniques, music literacy, ensemble skills, and aesthetic awareness in the context of relevant history and cultures. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

## **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

| MU.912.0.2.1:  | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.  |
| MU.912.0.2.2:  | Transpose melodies into different modalities through performance and composition.   |
|                | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied             |
|                | meaning of the composer/performer.  |
| MU.912.0.3.1:  | Clarifications:   |
|                | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,                           |
|                | orchestration   |
| MU.912.0.3.2:  | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S 1 4·  | Clarifications:   |
|                | e.g., singing, playing, writing   |
|                |   |

|                     | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation of performance of music literature.   |
|---------------------|---|
| MU.912.S.2.1:       | Clarifications:   |
|                     | e.g., memorization, sequential process  |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
|                     | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:       | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
| MU.912.S.3.5:       | Clarifications:   |
| LAFS.1112.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical   |
| LAFS.1112.SL.1.1:   | <ul> <li>Context relevant to grades 11–12 texts and topics.</li> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions</li> </ul>  |
|                     | when possible; and determine what additional information or research is required to deepen the investigation or complete the task.  |
| LAFS.1112.SL.1.2:   | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.   |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.   |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
| MAFS.K12.MP.6.1:    | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.<br>Standard Relation to Course: Supporting  |
| MAFS.K12.MP.7.1:    | <ul> <li>Look for and make use of structure.</li> <li>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression x<sup>2</sup> + 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y)<sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.</li> </ul>   |
| DA.912.F.3.8:       | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment   |
| DA.912.S.2.1:       | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1:   | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students build on previous orchestral experience through the study and performance of high-quality orchestra literature. Rehearsals focus on the strengthening of critical listening skills, musicianship, string techniques, ensemble skills, and aesthetic awareness in the context of relevant history and cultures. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

## GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

Course Number: 1302380

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: ORCH 3 Course Length: Year (Y) Course Level: 2

#### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

# Orchestra 3 (#1302380) 2022 - And Beyond

| Name                          | Description   |
|-------------------------------|---|
|                               | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |

| MII 912 H 2 Л·                | Examine the effects of developing technology on composition, performance, and acquisition of music  |
| 10.712.11.2.4.                | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects           |
|                               | musical performance.  |
| MU.912.H.3.1:                 | Clarifications:   |
|                               | e.g., acoustics, sound amplification, materials, mechanics  |
|                               | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MIL 912 O 1 1.                | Clarifications:   |
| 10.712.0.1.1.                 | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU 012 O 2 1·                 | Transfer accented composition conventions and performance practices of a specific style to a contrasting style of music                               |
| MU.912.0.2.1.                 | Transpose melodies into different modalities through performance and composition  |
| 10.712.0.2.2.                 | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support for the listener, the implied    |
|                               | meaning of the composer/performer.  |
| MU.912.0.3.1:                 | Clarifications:   |
|                               | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,                 |
|                               | orchestration   |
| MU.912.0.3.2:                 | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                               | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S.1.4:                 | Clarifications:   |
|                               | e.g., singing, playing, writing   |
|                               |   |

|                 | music literature.  |
|-----------------|--|
| MU.912.S.2.1:   | Clarifications:  |
|                 | e.g., memorization, sequential process   |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and  |
|                 | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:   | Clarifications:  |
|                 | e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                 | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:   | Clarifications:  |
|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |
|                 | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will belo with solving the task</li> </ul>  |
|                 | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> </ul>  |
|                 | Stay engaged and maintain a positive mindset when working to solve tasks.  |
|                 | Help and support each other when attempting a new method or approach.  |
| MA.K12.MIR.1.1: | Clarifications:  |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                 | <ul> <li>Cultivate a community of growth mindset reariers.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> </ul>   |
|                 | <ul> <li>Develop students' ability to analyze and problem solve.</li> </ul>  |
|                 | Recognize students' effort when solving challenging problems.  |
|                 | Demonstrate understanding by representing problems in multiple ways.   |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                 | Build understanding through modeling and using manipulatives.  |
|                 | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> </ul>  |

|                        | Relate previously learned concepts to new concepts.  |
| MA.K12.MTR.5.1:        | Look for similarities among problems.  |
|                        | Connect solutions of problems to more complicated large-scale situations.  |
|                        | Clarifications:  |
|                        | <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> </ul>   |
|                        | Support students to develop generalizations based on the similarities found among problems.  |
|                        | Provide opportunities for students to create plans and procedures to solve problems.   |
|                        | • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
|                        | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:  |
|                        | Estimate to discover possible solutions.   |
|                        | Use benchmark quantities to determine if a solution makes sense.   |
|                        | Check calculations when solving problems.  |
|                        | Verify possible solutions by explaining the methods used.  |
| MA.K12.MTR.6.1:        |  |
|                        | Teachers who encourage students to assess the reasonableness of solutions:   |
|                        | Have students estimate or predict solutions prior to solving.  |
|                        | <ul> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> </ul>  |
|                        | <ul> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications</li> </ul>  |
|                        | Apply mathematics to real-world contexts   |
|                        | Mathematicians who apply mathematics to real-world contexts:   |
|                        | Connect mathematical concepts to everyday experiences.   |
|                        | Use models and methods to understand, represent and solve problems.  |
|                        | <ul> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficience</li> </ul>  |
| WIA. N 12. WITK. 7. 1. | Clarifications:<br>Teachers who encourage students to apply mathematics to real-world contexts:  |
|                        | <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> </ul>   |
|                        | Challenge students to question the accuracy of their models and methods.   |
|                        | Support students as they validate conclusions by comparing them to the given situation.  |
|                        | Indicate how various concepts can be applied to other disciplines.   |
|                        |  |
|                        | K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details   |
|                        | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.  |
|                        | 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.   |
| ELA.K12.EE.1.1:        | 4. E Studente continue with providue civille and reference commente mode by speakers and peaks. Studente site toxite that they've directly   |
|                        | quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide   |
|                        | referenced by the instructor.  |
|                        | 6-8 Students continue with previous skills and use a style guide to create a proper citation.  |
|                        | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|                        | Read and comprehend grade-level complex texts proficiently.  |
| ELA.K12.EE.2.1:        | Clarifications:  |
|                        | Make inferences to support comprehension   |
|                        | Clarifications:  |
| ELA.K12.EE.3.1:        | Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl  |
|                        | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and  |
|                        | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations   |
| ELA.K12.EE.4.1:        | Clarifications:  |
|                        | In kindergarten, students learn to listen to one another respectfully.   |
|                        | In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The   |
|                        | collaborative conversations are becoming academic conversations.   |
|                        | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence |
|                        |  |
|                        | Use the accepted rules governing a specific format to create quality work.   |

| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |
|-------------------|--|
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students build on previous orchestral experience through the study and performance of high-quality orchestra literature. Rehearsals focus on the strengthening of critical listening skills, musicianship, string techniques, ensemble skills, and aesthetic awareness in the context of relevant history and cultures. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|                       | e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:         | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                       | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:         | Clarifications:   |
|                       | e.g., postare, breathing, imgering, embodchare, bow technique, taning, strainming   |
| LAFS.1112.RST.2.4:    | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and tonics.  |
|                       | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–   |
|                       | 12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.  |
|                       | a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from   |
|                       | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.  |
|                       | <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as<br/>needed</li>   |
| LAFS.1112.SL.1.1:     | c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a  |
|                       | topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.   |
|                       | d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions  |
|                       | when possible; and determine what additional information or research is required to deepen the investigation or complete the task.  |
|                       | Standard Relation to Course: Supporting   |
| LAFS.1112.SL.1.2:     | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed   |
|                       | decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |
| LAFS.1112.SL.1.3:     | of emphasis, and tone used.   |
|                       | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning,   |
| LAFS.1112.SL.2.4:     | alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience,   |
|                       | and a range of formal and informal tasks.   |
| LAI 3.1112.WII31.3.9. | Use appropriate tools strategically.  |
|                       |   |
|                       | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,  |
|                       | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.  |
|                       | might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze  |
| MAFS.K12.MP.5.1:      | graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other  |
|                       | mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying  |
|                       | relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use  |
|                       | technological tools to explore and deepen their understanding of concepts.  |
|                       | Standard Relation to Course: Supporting   |
|                       | Attend to precision.  |
|                       | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own   |
| MAFS.K12.MP.6.1:      | reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about   |
|                       | specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,<br>express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully              |
|                       | formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                       | Standard Relation to Course: Supporting   |
|                       | Look for and make use of structure.   |
|                       | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven   |
|                       | more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,  |
|                       | students will see 7 $\times$ 8 equals the well remembered 7 $\times$ 5 + 7 $\times$ 3, in preparation for learning about the distributive property. In the expression $x^2$   |
| MAFS.K12.MP.7.1:      | + 9x + 14, older students can see the 14 as $2 \times 7$ and the 9 as $2 + 7$ . They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an evention and shift perspective. They are can |
|                       | complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x  |
|                       |   |

|                   | - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.                   |
|-------------------|--|
|                   | Standard Relation to Course: Supporting  |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment. |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students with intermediate-level proficiency in string techniques, music literacy, critical listening skills, and musicianship study, rehearse, and perform high-quality orchestra literature. Student musicians strengthen their reflective, analytical, and problem-solving skills to self-diagnose solutions to performance challenges based on their structural, historical, and cultural understanding of the music. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

## GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Course Path: Section: Grades PreK to 12 Education

## GENERAL INFORMATION

| Course Number: 1302390                       | Courses > Grade Group: Grades 9 to 12 and Adult       |
|--|---|
|  | Education Courses > <b>Subject:</b> Music Education > |
|  | SubSubject: Instrumental Music >                      |
|  | Abbreviated Title: ORCH 4                             |
| Number of Credits: One (1) credit            | Course Length: Year (Y)                               |
| Course Type: Core Academic Course            | Course Level: 2                                       |
| Course Status: Course Approved               |   |
| Grade Level(s): 9,10,11,12                   |   |
| Graduation Requirement: Performing/Fine Arts |   |

| Music (Elementary and Secondary Grades K-12)              |  |
|---|--|
| Instrumental Music (Secondary Grades 7-12)                |  |
| Instrumental Music (Elementary and Secondary Grades K-12) |  |

# Orchestra 4 (#1302390) 2022 - And Beyond

| Name                            | Description  |
|---------------------------------|--|
|                                 | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:                   | Clarifications:  |
|                                 | e.g., listening maps, active listening, checklists   |
|                                 | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the   |
|                                 | composer's intent.   |
| MU.912.C.1.2:                   | Clarifications:  |
|                                 | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
|                                 | Analyze instruments of the world and classify them by common traits  |
| MU 012 C 1 2.                   |  |
| WIU.912.C.1.3:                  | clarifications:  |
|                                 |  |
| MU.912.C.2.1:                   | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:                   | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:                   | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development  |
| MIL 912 E 1 1.                  | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music   |
|                                 | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions   |
|                                 |  |
| WIU.912.F.2.2.                  | e.g. community revitalization industry choosing new locations, cultural and social enrichment  |
|                                 |  |
| MU.912.F.3.1:                   | Analyze and describe now meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of<br>leadership in school and/or non school settings |
|                                 | Summarize convright laws that govern printed, recorded, and on line music to promote legal and responsible use of intellectual property and  |
| MU.912.F.3.2:                   | technology.  |
|                                 | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,  |
| MU.912.F.3.3:                   | demonstrating skills for use in the workplace.   |
|                                 | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,   |
| WIU.912.F.3.4:                  | and initiative to advance skills and/or knowledge.   |
|                                 | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1:                   | Clarifications:  |
|                                 | e.g., patriotic, folk, celebration, entertainment, spiritual   |
|                                 | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU.912.H.1.2:                   | Clarifications:  |
|                                 | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
|                                 | Compare two or more works of a composer across performance media.  |
| MII 012 H 1 3-                  |  |
| 10.912.11.1.3.                  | e a corchestral and choral: quitar and string guartet: piano solo and piano concerto   |
|                                 |  |
| MU.912.H.1.4:                   | Analyze now western music has been influenced by historical and current world cultures.  |
| MU.912.П.1.5.<br>MII 012 H 2 1. | Figure the social impact of music on specific bistorical periods   |
| MIL 912 H 2 2                   | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music   |
| 10.712.11.2.2.                  | Analyze the evolution of a music genre   |
|                                 |  |
| 10.912.11.2.3.                  | e a jazz blues   |
|                                 | Evening the offects of developing technology on composition, performance, and convicition of music   |
| MU.912.H.2.4:                   | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|                                 | Apply knowledge of science, main, and music to demonstrate, through an acoustic of digital performance medium, now sound production affects musical performance.   |
| MU.912.H.3.1:                   |  |
|                                 | e a acoustics sound amplification materials mechanics  |
|                                 |  |
| MU.912.O.1.1:                   | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
|                                 | Clarifications:  |
|                                 | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
| MU.912.0.2.1:                   | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
| MU.912.0.2.2:                   | Transpose melodies into different modalities through performance and composition.  |
|                                 | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied  |
|                                 | meaning of the composer/performer.   |
| MU.912.0.3.1:                   | Clarifications:  |
|                                 | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>erchestration   |
|                                 | Jorenesit autori   |

| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|-----------------|--|
|                 | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:   | Clarifications:  |
|                 | e.g., texture, mode, form, tempo, voicing  |
|                 | Perform and notate, independently and accurately, melodies by ear.   |
| MU.912.S.1.4:   | Clarifications:  |
|                 | e.g., singing, playing, writing  |
|                 | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
| MU.912.S.2.1:   | Clarifications:  |
|                 | e.g., memorization, sequential process   |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and  |
|                 | kinesthetic energy.  |
| MU 012 5 2 2.   | Signt-read music accurately and expressively to show synthesis of skins.   |
| WIU.912.3.3.2.  | e.g., musical elements, expressive qualities, performance technique  |
| MU 912 S 3 4·   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques   |
| 10.712.0.0.1.   | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:   | Clarifications:  |
|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                 | Mathematicians who participate in effortful learning both individually and with others:  |
|                 | Analyze the problem in a way that makes sense given the task.  |
|                 | Ask questions that will help with solving the task.  |
|                 | <ul> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>   |
|                 | <ul> <li>Help and support each other when attempting a new method or approach.</li> </ul>  |
| MA.K12.MTR.1.1: | Clarifications:  |
|                 | Teachers who encourage students to participate actively in effortful learning both individually and with others:   |
|                 | Cultivate a community of growth mindset learners.  |
|                 | Foster perseverance in students by choosing tasks that are challenging.  |
|                 | <ul> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems</li> </ul>  |
|                 | Demonstrate understanding by representing problems in multiple years   |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                 | Build understanding through modeling and using manipulatives   |
|                 | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> </ul>  |
|                 | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>   |
|                 | Express connections between concepts and representations.  |
| MA.K12.MTR.2.1: | Choose a representation based on the given context or purpose.   |
|                 | Clarifications:  |
|                 | <ul> <li>Leachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concents and representations</li> </ul>   |
|                 | <ul> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> </ul>   |
|                 | Guide students from concrete to pictorial to abstract representations as understanding progresses.   |
|                 | Show students that various representations can have different purposes and can be useful in different situations.  |
|                 | Complete tasks with mathematical fluency.  |
|                 | Mathematicians who complete tasks with mathematical fluency:   |
|                 | Select efficient and appropriate methods for solving problems within the given context.  |
|                 | Maintain flexibility and accuracy while performing procedures and mental calculations.     Complete tasks accurately and with confidence   |
| MA.K12.MTR.3.1: | Adapt procedures to apply them to a new context.   |
|                 | Use feedback to improve efficiency when performing calculations.   |
|                 | Clarifications:  |
|                 | Teachers who encourage students to complete tasks with mathematical fluency:   |
|                 | Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.   |
|                 | <ul> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul> |
|                 | From a opportanties for statements to reflect on the method they used and determine if a more encient method could have been used.   |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  |
|                 | Communicate mathematical ideas, vocabulary and methods effectively   |
|                 | <ul> <li>Analyze the mathematical thinking of others.</li> </ul>   |
|                 | Compare the efficiency of a method to those expressed by others.   |
|                 | Recognize errors and suggest how to correctly solve the task.  |

| MA.K12.MTR.4.1: | Justify results by explaining methods and processes.  |
|-----------------|---|
|                 | Construct possible arguments based on evidence.   |
|                 | Clarifications:<br>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:   |
|                 | <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> </ul>   |
|                 | Create opportunities for students to discuss their thinking with peers.   |
|                 | • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.  |
|                 | • Develop students' ability to justify methods and compare their responses to the responses of their peers.   |
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:   |
|                 | Focus on relevant details within a problem.   |
|                 | Create plans and procedures to logically order events, steps or ideas to solve problems.  |
|                 | Decompose a complex problem into manageable parts.  |
|                 | Relate previously learned concepts to new concepts.   |
| MA.K12.MTR.5.1: | <ul> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |
|                 | Clarifications:   |
|                 | Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:   |
|                 | Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.  |
|                 | <ul> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Dravide apportunities for students to create plans and presedures to calve problems.</li> </ul>   |
|                 | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>   |
|                 | Assess the reasonableness of solutions  |
|                 | Mathematicians who assess the reasonableness of solutions:  |
|                 | Estimate to discover possible solutions   |
|                 | <ul> <li>Use benchmark quantities to determine if a solution makes sense.</li> </ul>  |
|                 | Check calculations when solving problems.   |
|                 | Verify possible solutions by explaining the methods used.   |
| MA.K12.MTR.6.1: | Evaluate results based on the given context.  |
|                 | Clarifications:   |
|                 | Have students estimate or predict solutions prior to solving.   |
|                 | <ul> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> </ul>   |
|                 | Reinforce that students check their work as they progress within and after a task.  |
|                 | Strengthen students' ability to verify solutions through justifications.  |
|                 | Apply mathematics to real-world contexts.   |
|                 | Mathematicians who apply mathematics to real-world contexts:  |
|                 | Connect mathematical concepts to everyday experiences.  |
|                 | <ul> <li>Use models and methods to understand, represent and solve problems.</li> <li>Deform investigations to gather data or determine if a method is appropriate a Redesign models and methods to improve accuracy or efficiency.</li> </ul>  |
| MA K12 MTR 7 1  | <ul> <li>Perform investigations to gatter data or determine in a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or enciency</li> </ul>   |
|                 | Teachers who encourage students to apply mathematics to real-world contexts:  |
|                 | Provide opportunities for students to create models, both concrete and abstract, and perform investigations.  |
|                 | Challenge students to question the accuracy of their models and methods.  |
|                 | Support students as they validate conclusions by comparing them to the given situation.   |
|                 | Indicate how various concepts can be applied to other disciplines.  |
|                 | Cite evidence to explain and justify reasoning.   |
|                 | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details   |
|                 | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.   |
|                 | 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.  |
| ELA.K12.EE.1.1: | In 3rd grade, students should use a combination of direct and indirect citations.   |
|                 | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly   |
|                 | quoted, paraphrased, or used for information, when writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                 | 6.9 Students continue with providus skills and use a style guide to create a proper sitetion  |
|                 | o-o students continue with previous skins and use a style guide to create a proper citation.  |
|                 | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently.   |
|                 | Clarifications:   |
|                 | See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                 | Make inferences to support comprehension.   |
|                 | Clarifications:   |
| LLA.NIZ.EE.J.I: | students will make interences before the words inter or interence are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and |
|                 | beyond.   |
|                 |   |

|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
|-------------------|--|
| ELA.K12.EE.4.1:   | Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | <b>Clarifications:</b><br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students with intermediate-level proficiency in string techniques, music literacy, critical listening skills, and musicianship study, rehearse, and perform high-quality orchestra literature. Student musicians strengthen their reflective, analytical, and problem-solving skills to self-diagnose solutions to performance challenges based on their structural, historical, and cultural understanding of the music. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

## GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

## GENERAL INFORMATION

Course Number: 1302390

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: ORCH 4 Course Length: Year (Y) Course Level: 2

|  | MU.912.0.2.2:  | Transpose melodies into different modalities through performance and composition.   |

|                       | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.  |
|-----------------------|---|
| MU.912.O.3.1:         | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration   |
| MU.912.0.3.2:         | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
| MU.912.S.1.3:         | Arrange a musical work by manipulating two or more aspects of the composition.  Clarifications:  e.g., texture, mode, form, tempo, voicing  |
| MU.912.S.1.4:         | Perform and notate, independently and accurately, melodies by ear.  Clarifications: e.g., singing, playing, writing   |
| MU.912.S.2.1:         | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   |
| MU.912.S.2.2:         | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:         | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
| MU.912.S.3.2:         | Signi-read music accurately and expressively to snow synthesis of skills.         Clarifications:         e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:         | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
| MU.912.S.3.5:         | Develop and demonstrate proper vocal or instrumental technique. Clarifications: e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| LAFS.1112.RST.2.4:    | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical   |
| LAFS.1112.SL.1.1:     | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li> </ul>                             |
|                       | Standard Relation to Course: Supporting   |
| LAFS.1112.SL.1.2:     | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |
| LAFS.1112.SL.1.3:     | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.   |
| LAFS.1112.SL.2.4:     | alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience,<br>and a range of formal and informal tasks.  |
| LAFS.1112.WHST.2.4:   | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.1112.WHST.3.7:   | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.  |
| EAT 5.1112. WHS1.5.7. | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:      | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                       | Attend to precision.  |
| MAFS.K12.MP.6.1:      | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |

|                   | Standard Relation to Course: Supporting  |
|-------------------|--|
|                   | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students with considerable orchestral experience advance their string and ensemble performance techniques, music literacy, music theory, and aesthetic engagement through high-quality orchestra literature. Student musicians use reflection and problem-solving skills to improve performance significantly based on structural, cultural, and historical understanding of the music. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

## GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1302400

Number of Credits: One (1) credit

Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: ORCH 5 HON Course Length: Year (Y) Course Attributes: • Honors Course Level: 3

| Music (Elementary and Secondary Grades K-12)              |
|---|

| Instrumental Music (Elementary and Secondary Grades K-12) |
# Orchestra 5 Honors (#1302400) 2022 - And Beyond

| Name           | Description   |
|----------------|---|
|                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:  | Clarifications:   |
|                | e.g., listening maps, active listening, checklists  |
|                | Compare using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                 |
|                | composer's intent.  |
| MU.912.C.1.2:  | Clarifications  |
|                | e.g., guality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                             |
|                |   |
|                | Analyze instruments of the world and classify them by common traits.  |
| MU.912.C.1.3:  | Clarifications:   |
|                | e.g., classical and folk instruments from around the world  |
| MU.912.C.2.1:  | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:  | Evaluate performance quality in recorded and/or live performances.  |
| MU 912 C 3 1·  | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development     |
| WI0.712.0.0.1. | in music.   |
| MU.912.F.1.1:  | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.   |
|                | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music       |
| MII 912 F 2 1. | training.   |
|                | Clarifications:   |
|                | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills                       |
|                | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.                                   |
| MU.912.F.2.2:  | Clarifications:   |
|                | e.g., community revitalization, industry choosing new locations, cultural and social enrichment   |
|                | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of     |
| MU.912.F.3.1:  | leadership in school and/or non-school settings.  |
|                | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and               |
| MU.912.F.3.2:  | technology.   |
|                | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, |
| WIU.912.F.3.3: | demonstrating skills for use in the workplace.  |
| MIL 912 E 3 /· | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,        |
| 10.712.1.3.4.  | and initiative to advance skills and/or knowledge.  |
|                | Investigate and discuss how a culture's traditions are reflected through its music.   |
| MU.912.H.1.1:  | Clarifications:   |
|                | e.g., patriotic, folk, celebration, entertainment, spiritual  |
|                | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.                                       |
| MU.912.H.1.2:  | Clarifications:   |
|                | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|                | Compare two or more works of a composer across performance media  |
|                |   |
| MU.912.H.1.3:  | Clarifications:   |
|                | e.g., orchestral and choral, guitar and string quarter, plano solo and plano concerto   |
| MU.912.H.1.4:  | Analyze how Western music has been influenced by historical and current world cultures.   |
| MU.912.H.1.5:  | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.1:  | Evaluate the social impact of music on specific historical periods.   |
| MU.912.H.2.2:  | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.                           |
|                | Analyze the evolution of a music genre.   |
| MU.912.H.2.3:  | Clarifications:   |
|                | e.g., jazz, blues   |
| MU.912.H.2.4:  | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects               |
|                | musical performance.  |
| MU.912.H.3.1:  | Clarifications:   |
|                | e.g., acoustics, sound amplification, materials, mechanics  |
|                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU 912 O 1 1·  | Clarifications:   |
|                | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU 012 0 2 1   | Transfor acconted composition conventions and performance practices of a specific style to a contracting style of music                                   |
| MU 012 0 2 2   | Transper accepted composition conventions and performance practices of a specific style to a contrasting style of music.                                  |
| 10.912.0.2.2:  | nanspose melouies into universit mouanties through performance and composition.   |

|                   | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.        |
|-------------------|---|
| MU.912.0.3.1:     | Clarifications:   |
|                   | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration   |
| MU.912.0.3.2:     | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                   | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.5.1.3:     | e.g., texture, mode, form, tempo, voicing   |
|                   | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S.1.4:     | Clarifications:   |
|                   | e.g., singing, praying, writing   |
|                   | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.                   |
| MU.912.S.2.1:     | Clarifications:   |
|                   | e.g., memorization, sequential process  |
| MU.912.S.2.2:     | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:     | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.               |
|                   | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:     | Clarifications:   |
|                   | e.g., musical elements, expressive qualities, performance technique   |
| MU.912.5.3.4:     | Analyze and describe the effect of renearsal sessions and/or strategies on refinement of skills and techniques.<br>Develop and demonstrate proper vocal or instrumental technique.            |
| MU.912.S.3.5:     | Clarifications:   |
|                   | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                   | Mathematicians who participate in effortful learning both individually and with others:   |
|                   | Analyze the problem in a way that makes sense given the task.   |
|                   | <ul> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as peeded while solving a challenging task.</li> </ul>                          |
|                   | <ul> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>   |
|                   | Help and support each other when attempting a new method or approach.   |
| MA.K12.MTR.1.1:   | Clarifications:   |
|                   | Teachers who encourage students to participate actively in effortful learning both individually and with others:  |
|                   | Cultivate a community of growth mindset learners.   |
|                   | <ul> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> </ul>                                  |
|                   | <ul> <li>Recognize students' effort when solving challenging problems.</li> </ul>   |
|                   | Demonstrate understanding by representing problems in multiple ways   |
|                   | Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
|                   | Build understanding through modeling and using manipulatives.   |
|                   | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.   |
|                   | Progress from modeling problems with objects and drawings to using algorithms and equations.  |
|                   | Express connections between concepts and representations.   |
| MA.K12.MTR.2.1:   | Choose a representation based on the given context or purpose.  |
|                   | Clarifications:<br>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:  |
|                   | <ul> <li>Help students make connections between concepts and representations.</li> </ul>  |
|                   | Provide opportunities for students to use manipulatives when investigating concepts.  |
|                   | Guide students from concrete to pictorial to abstract representations as understanding progresses.  |
|                   | Show students that various representations can have different purposes and can be useful in different situations.   |
|                   | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:   |
|                   | <ul> <li>Select efficient and appropriate methods for solving problems within the given context</li> </ul>  |
| MA. K12. MTR 3.1: | <ul> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> </ul>  |
|                   | Complete tasks accurately and with confidence.  |
|                   | Adapt procedures to apply them to a new context.  |
|                   | Use feedback to improve efficiency when performing calculations.  |
|                   | Clarifications:   |
|                   | <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> </ul>                                    |
|                   | Offer multiple opportunities for students to practice efficient and generalizable methods.  |
|                   | • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
|                   | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: |
|                   | inclusional source of gage in discussions that reneer on the mathematical timining of soil drid Utilets.  |

| MA.K12.MTR.4.1: | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li></ul> |
|-----------------|---|
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br>Clarifications:  |
|                 | <ul> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>   |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br>Clarifications:  |
|                 | <ul> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency</li> <li>Clarifications:</li> </ul>   |
|                 | <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
|                 | Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.  |
| ELA.K12.EE.1.1: | <ul> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> <li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li> </ul>  |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.  |

| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|-------------------|---|
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.<br>In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students<br>build on ideas, propel the conversation, and support claims and counterclaims with evidence. |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

Students with considerable orchestral experience advance their string and ensemble performance techniques, music literacy, music theory, and aesthetic engagement through high-quality orchestra literature. Student musicians use reflection and problem-solving skills to improve performance significantly based on structural, cultural, and historical understanding of the music. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

#### **GENERAL NOTES**

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

# Orchestra 6 Honors (#1302410) 2020 - 2022 (current)

| Name          | Description  |
|---------------|--|
|               | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1: | Clarifications:  |
|               | e.g., listening maps, active listening, checklists   |
|               | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the   |
| MU 010 0 1 0  | composer's intent.   |
| MU.912.C.1.2: | Clarifications:  |
|               | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
|               | Analyze instruments of the world and classify them by common traits.   |
| MU.912.C.1.3: | Clarifications:  |
|               | e.g., classical and folk instruments from around the world   |
| MU.912.C.2.1: | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2: | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1: | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.                                       |
| MU.912.F.1.1: | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.  |
|               | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music  |
|               | training.  |
| 10.712.1.2.1. | Clarifications:  |
|               | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills  |
|               | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.  |
| MU.912.F.2.2: | Clarifications:  |
|               | e.g., community revitalization, industry choosing new locations, cultural and social enrichment  |
|               | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.  |
| MU.912.F.2.3: | Clarifications:  |
|               | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel   |
| MU.912.F.3.1: | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.   |
| MU.912.F.3.2: | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.3: | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace. |
| MU.912.F.3.4: | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.    |
|               | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1: | Clarifications:  |
|               | e.g., patriotic, folk, celebration, entertainment, spiritual   |
|               | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU.912.H.1.2: | Clarifications:  |
|               | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
|               | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3: | Clarifications:  |
|               | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU.912.H.1.4: | Analyze how Western music has been influenced by historical and current world cultures.  |
| MU.912.H.1.5: | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.1: | Evaluate the social impact of music on specific historical periods.  |
| MU.912.H.2.2: | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.  |
|               | Analyze the evolution of a music genre.  |
| MU.912.H.2.3: | Clarifications:<br>e.g., jazz, blues   |
| MU.912.H.2.4: | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|               | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.   |
| MU.912.H.3.1: | Clarifications:  |
|               | e.g., acoustics, sound amplification, materials, mechanics   |
|               | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1: | Clarifications:  |
| 1             |  |

| MAFS.K12.MP.6.1:  | reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. <b>Standard Relation to Course: Supporting</b>   |
|-------------------|--|
|                   | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting |
|                   | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in   |
| DA.912.1.3.0.     | the work environment.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students with substantial orchestral experience focus on mastery of advanced music skills, techniques, and processes through study, rehearsal, and performance of high-quality orchestra literature. Advanced string players self-diagnose and consider multiple solutions to artistic challenges based on background knowledge of the repertoire, and explore creativity through composition, arranging, and/or use of technology. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

#### GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Orchestra 6 Honors (#1302410) 2022 - And Beyond

| Name          | Description  |
|---------------|--|
|               | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1: | Clarifications:  |
|               | e.g., listening maps, active listening, checklists   |
|               | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the   |
|               | composer's intent.   |
| MU.912.C.1.2: | Clarifications:  |
|               | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
|               | Analyze instruments of the world and classify them by common traits.   |
| MU.912.C.1.3: | Clarifications:  |
|               | e.g., classical and folk instruments from around the world   |
| MU.912.C.2.1: | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2: | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1: | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |
| MU.912.F.1.1: | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.  |
|               | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music  |
|               | training.  |
| MU.912.F.2.1: | Clarifications:  |
|               | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills  |
|               | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.  |
| MU.912.F.2.2: | Clarifications:  |
|               | e.g., community revitalization, industry choosing new locations, cultural and social enrichment  |
|               | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.  |
| MU.912.F.2.3: | Clarifications:  |
|               | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel   |
| MU.912.F.3.1: | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.   |
| MU.912.F.3.2: | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.3: | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace. |
| MU.912.F.3.4: | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.    |
|               | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1: | Clarifications:  |
|               | e.g., patriotic, folk, celebration, entertainment, spiritual   |
|               | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU.912.H.1.2: | Clarifications:  |
|               | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
|               | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3: | Clarifications:  |
|               | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU.912.H.1.4: | Analyze how Western music has been influenced by historical and current world cultures.  |
| MU.912.H.1.5: | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.1: | Evaluate the social impact of music on specific historical periods.  |
| MU.912.H.2.2: | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.  |
|               | Analyze the evolution of a music genre.  |
| MU.912.H.2.3: | Clarifications:<br>e.g., jazz, blues   |
| MU.912.H.2.4: | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|               | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.   |
| MU.912.H.3.1: | Clarifications:  |
|               | e.g., acoustics, sound amplification, materials, mechanics   |
|               | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.O.1.1: | Clarifications:  |

|                 | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
|-----------------|--|
| MU.912.0.2.1:   | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
| MU.912.0.2.2:   | Transpose melodies into different modalities through performance and composition.<br>Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.  |
| MU.912.O.3.1:   | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration  |
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
| MU.912.S.1.3:   | Arrange a musical work by manipulating two or more aspects of the composition. Clarifications: e.g., texture, mode, form, tempo, voicing   |
|                 | Perform and notate, independently and accurately, melodies by ear.   |
| MU.912.S.1.4:   | Clarifications:<br>e.g., singing, playing, writing   |
|                 | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
| MU.912.S.2.1:   | Clarifications:<br>e.g., memorization, sequential process  |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
| MUL 010 C 0 0   | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.5.3.2:   | e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.3:   | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.   |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
| MIL 912 S 3 5·  | Develop and demonstrate proper vocal or instrumental technique.  |
| 10.712.5.5.5.   | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| MA.K12.MTR.1.1: | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul>  |
|                 | <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul>   |
|                 | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> </ul>  |
| MA.K12.MTR.2.1: | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>  |
|                 | <ul> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul> |

| MA.K12.MTR.3.1: | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> </ul> </li> </ul>  |

|                 | • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
|-----------------|---|
| MA.K12.MTR.4.1: | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:   |
|                 | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul>   |
|                 | <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>   |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>   |
|                 | Clarifications:         Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:         Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.         Support students to develop generalizations based on the similarities found among problems.         Provide opportunities for students to create plans and procedures to solve problems.         Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.   |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.   |
|                 | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to guestion the accuracy of their models and methods.</li> </ul>  |
| ELA.K12.EE.1.1: | Support students as they validate conclusions by comparing them to the given situation.     Indicate how various concepts can be applied to other disciplines.  Cite evidence to explain and justify reasoning.  Clarifications:  K 1 Chardrate include to the set and comparison with multiplease and comparison doubte.  The suidance on consist of details.  |
|                 | <ul> <li>A students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly guoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide.</li> </ul> |
|                 | referenced by the instructor.<br>6-8 Students continue with previous skills and use a style guide to create a proper citation.<br>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |

|                   | Read and comprehend grade-level complex texts proficiently.  |
|-------------------|--|
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                   | Make inferences to support comprehension.  |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.               |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.  |
|                   | build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. |
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                    |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students with substantial orchestral experience focus on mastery of advanced music skills, techniques, and processes through study, rehearsal, and performance of high-quality orchestra literature. Advanced string players self-diagnose and consider multiple solutions to artistic challenges based on background knowledge of the repertoire, and explore creativity through composition, arranging, and/or use of technology. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

#### GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

# Instrumental Techniques 1 (#1302420) 2020 - 2022 (current)

| Name                | Description   |
|---------------------|---|
|                     | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:       | Clarifications:   |
|                     | e.g., listening maps, active listening, checklists  |
| MU 912 C 2 1·       | Evaluate and make appropriate adjustments to personal performance in solo and ensembles   |
| MU.912.C.2.2:       | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.3.1:       | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.   |
| MU.912.F.3.3:       | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.  |
| MU.912.0.2.1:       | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.  |
| MU.912.0.3.2:       | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                     | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:       | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                     | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical   |
| LAFS.910.RST.2.4:   | context relevant to grades 9–10 texts and topics.   |
| I AFS 910.SL 1.1:   | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> </ul>   |
| E/11 0.7 10.0E.1.11 | c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively  |
|                     | incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.  |
|                     | d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their  |
|                     | own views and understanding and make new connections in light of the evidence and reasoning presented.  |
|                     | Standard Relation to Course: Supporting   |
|                     | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, guantitatively, orally) evaluating the credibility and   |
| LAFS.910.SL.1.2:    | accuracy of each source.  |
| LAFS.910.SL.1.3:    | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.   |
| LAFS.910.SL.2.4:    | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.   |
| LAFS.910.SL.2.6:    | Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.   |
| LAFS.910.WHST.2.4:  | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
|                     | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                     | Attend to precision.  |
| MAFS.K12.MP.6.1:    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                     | Standard Relation to Course: Supporting   |
|                     | Look for and make use of structure.   |
|                     | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven   |

| MAFS.K12.MP.7.1:  | more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$ + 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x<br>- y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. |
|-------------------|---|
|                   | Standard Relation to Course: Supporting   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

Students in this entry-level class focus on the development of musical and technical skills on a specific instrument through etudes, scales, and selected music literature. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

The evidence can consist of details om the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. 3rd grade, students should use a combination of direct and indirect citations.</li> <li>5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly uoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide ferenced by the instructor.</li> <li>8 Students continue with previous skills and use a style guide to create a proper citation.</li> <li>12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li> </ul> </li> </ul> |
| ELA.K12.EE.2.1: CI   | ad and comprehend grade-level complex texts proficiently. arifications: De Text Complexity for grade-level complexity bands and a text complexity rubric. De leferences to support comprehension  |

| ELA.K12.EE.3.1:                    | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
|------------------------------------|--|
| ELA.K12.EE.4.1:                    | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully.   |
|                                    | In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.<br>In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |
| ELA.K12.EE.5.1:                    | Use the accepted rules governing a specific format to create quality work.<br>Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.                   |
| ELA.K12.EE.6.1:                    | Use appropriate voice and tone when speaking or writing.<br>Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.S.2.1:<br>ELD.K12.ELL.SI.1: | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.<br>English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students in this entry-level class focus on the development of musical and technical skills on a specific instrument through etudes, scales, and selected music literature. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Instrumental Music (Secondary Grades 7-12)

Instrumental Music (Elementary and Secondary Grades K-12)

# Instrumental Techniques 2 (#1302430) 2020 - 2022 (current)

| Name               | Description   |
|--------------------|---|
|                    | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:      | Clarifications:   |
|                    | e.g., listening maps, active listening, checklists  |
| MU 912 C 2 1·      | Evaluate and make appropriate adjustments to personal performance in solo and epsembles   |
| MU 912 C 2 2       | Evaluate and make appropriate adjustments to personal performances.   |
| MU.912.C.3.1:      | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.   |
| MU.912.F.3.3:      | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.  |
| MU.912.F.3.4:      | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.   |
| MU.912.0.2.1:      | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.  |
| MU.912.0.3.2:      | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
| MU.912.S.2.2:      | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:      | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
|                    | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:      | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.4:      | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                    | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:      | Clarifications:   |
|                    | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                    | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical   |
| LAFS.910.RST.2.4:  | context relevant to grades 9–10 texts and topics.   |
| LAFS.910.SL.1.1:   | <ul> <li>topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> <li>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</li> </ul>  |
|                    | Standard Relation to Course: Supporting   |
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.  |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.   |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.   |
| LAFS.910.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.   |
| LAFS.910.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| MAFS.K12.MP.5.1:   | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,<br>concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.<br>Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools<br>might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze<br>graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other<br>mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying<br>assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify<br>relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use<br>technological tools to explore and deepen their understanding of concepts.<br>Standard Relation to Course: Supporting |
|                    | Attend to precision.  |
| MAFS.K12.MP.6.1:   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,   |

|                   | express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. Standard Relation to Course: Supporting   |
|-------------------|---|
|                   | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see $7 \times 8$ equals the well remembered $7 \times 5 + 7 \times 3$ , in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as $2 \times 7$ and the 9 as $2 + 7$ . They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting |
| DA 912 S 2 1      | Sustain focused attention, respect, and discipline during class, rehearsal, and performance   |
|                   |   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

Students in this novice-level class continue to develop musical and technical skills on a specific instrument through developmentally appropriate solo literature, etudes, scales, and exercises. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills necessary to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:   |
| MA.K12.MTR.5.1: | <ul> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul>  |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>  |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.  |
| MA.K12.MTR.7.1: | Strengthen students' ability to verify solutions through justifications.     Apply mathematics to real-world contexts.     Mathematicians who apply mathematics to real-world contexts:         Connect mathematical concepts to everyday experiences.         Use models and methods to understand, represent and solve problems.         Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.         Clarifications:         Teachers who encourage students to apply mathematics to real-world contexts:         Provide opportunities for students to create models, both concrete and abstract, and perform investigations.         Challenge students to question the accuracy of their models and methods.   |
|                 | <ul> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.  Clarifications:  K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.  4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. |
|                 | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |

|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.  |
|-------------------|--|
| ELA.K12.EE.2.1:   | Read and comprehend grade-level complex texts proficiently.  |
|                   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
|                   | Make inferences to support comprehension.  |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  |
| ELA.K12.EE.4.1:   | Clarifications:         In kindergarten, students learn to listen to one another respectfully.         In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations.         In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |
|                   | Use the accepted rules governing a specific format to create quality work.   |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.   |
|                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students in this novice-level class continue to develop musical and technical skills on a specific instrument through developmentally appropriate solo literature, etudes, scales, and exercises. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills necessary to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

# Instrumental Techniques 3 (#1302440) 2020 - 2022 (current)

| Name                | Description  |
|---------------------|--|
|                     | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:       | Clarifications:<br>e.g., listening maps, active listening, checklists  |
| MU.912.C.2.1:       | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:       | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:       | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.   |
| MU.912.F.3.3:       | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.   |
| MU.912.F.3.4:       | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.  |
| MU.912.H.1.1:       | Investigate and discuss how a culture's traditions are reflected through its music. Clarifications: e.g., patriotic, folk, celebration, entertainment, spiritual   |
| MU.912.H.3.1:       | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.   |
|                     | e.g., acoustics, sound amplification, materials, mechanics   |
| MU.912.O.2.1:       | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.   |
|                     | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.   |
| MU.912.O.3.1:       | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration  |
| MU.912.O.3.2:       | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
| MU.912.S.3.2:       | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                     | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:       | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| LAFS.1112.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.   |
|                     | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as</li> </ul> |
| LAFS.1112.SL.1.1:   | <ul> <li>needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li> </ul>   |
| LAFS.1112.SL.1.2:   | Standard Relation to Course: Supporting<br>Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed   |
|                     | decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.  |
| LAFS.1112.SL.1.3:   | of emphasis, and tone used.  |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning,<br>alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience,<br>and a range of formal and informal tasks.  |
| LAFS.1112.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.  |
| LAFS.1112.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.<br>Use appropriate tools strategically.   |

| MAFS.K12.MP.5.1:  | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|-------------------|---|
|                   | Attend to precision.  |
| MAFS.K12.MP.6.1:  | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                   | Look for and make use of structure  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students in this intermediate-level class develop their musical and technical skills further on a specific instrument, and expand their technical and performance skills, enhanced by historical and cultural background knowledge of the music. Students explore more demanding solo literature, etudes, and technical exercises with increasing independence. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>Select efficient and appropriate methods for solving problems within the given context.<br>Maintain flexibility and accuracy while performing procedures and mental calculations.<br>Complete tasks accurately and with confidence.<br>Adapt procedures to apply them to a new context.<br>Use feedback to improve efficiency when performing calculations.<br>Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:<br>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>Offer multiple opportunities for students to practice efficient and generalizable methods.<br>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> </li> </ul></li></ul> |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>Focus on relevant details within a problem.<br>Create plans and procedures to logically order events, steps or ideas to solve problems.<br>Decompose a complex problem into manageable parts.<br>Relate previously learned concepts to new concepts.<br>Look for similarities among problems.<br>Connect solutions of problems to more complicated large-scale situations.<br>Clarifications:<br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>Support students to develop generalizations based on the similarities found among problems.<br>Provide opportunities for students to create plans and procedures to solve problems.<br>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.  |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>Have students estimate or predict solutions prior to solving.<br>Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>Reinforce that students check their work as they progress within and after a task.<br>Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> </ul> </li> </ul>   |

|                   | <ul><li>Support students as they validate conclusions by comparing them to the given situation.</li><li>Indicate how various concepts can be applied to other disciplines.</li></ul>  |
|-------------------|---|
|                   | Cite evidence to explain and justify reasoning.   |
| ELA.K12.EE.1.1:   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
|                   | 4-5 Students continue with previous skills and reference comments made by <b>speakers and peers. Students cite texts that they've directly</b><br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide<br>referenced by the instructor.   |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.  |
|                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students in this intermediate-level class develop their musical and technical skills further on a specific instrument, and expand their technical and performance skills, enhanced by historical and cultural background knowledge of the music. Students explore more demanding solo literature, etudes, and technical exercises with increasing independence. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

| MU.912.C.2.1:          | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.0.2.2:          | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:          | make critical evaluations, based on exemplary models, or the quality and effectiveness of performances and apply the criteria to personal development<br>in music                                      |
|                        | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music  |
|                        | training.  |
| MU.912.F.2.1:          | Clarifications   |
|                        | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills  |
|                        | Analyze and describe how meeting and/a responsibilities in music offers expertunities to develop leadership skills, and identify personal examples of  |
| MU.912.F.3.1:          | Analyze and describe now meeting one's responsibilities in music oners opportunities to develop readership skins, and identity personal examples of<br>leadership in school and/or non-school settings |
|                        | Define prioritize monitor and successfully complete tasks related to individual musical performance or project presentation, without direct oversight  |
| MU.912.F.3.3:          | demonstrating skills for use in the workplace.   |
|                        | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,   |
| MU.912.F.3.4:          | and initiative to advance skills and/or knowledge.   |
|                        | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1:          | Clarifications:  |
|                        | e.g., patriotic, folk, celebration, entertainment, spiritual   |
|                        | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects  |
|                        | musical performance.   |
| MU.912.H.3.1:          | Clarifications:  |
|                        | e.g., acoustics, sound amplification, materials, mechanics   |
| MIL 012 O 2 1.         | Transfer accented composition conventions and performance practices of a specific style to a contrasting style of music  |
| MU 912 0 2 2           | Transpose melodies into different modalities through performance and composition   |
|                        | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied  |
|                        | meaning of the composer/performer.   |
| MU.912.0.3.1:          | Clarifications:  |
|                        | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,  |
|                        | orchestration  |
| MU.912.0.3.2:          | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                        | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of  |
|                        | music literature.  |
| MU.912.S.2.1:          | Clarifications:  |
|                        | e.g., memorization, sequential process   |
| MU.912.S.2.2:          | Transfer expressive elements and performance techniques from one piece of music to another.  |
|                        | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and  |
| MU.912.S.3.1:          | kinesthetic energy.  |
|                        | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:          | Clarifications:  |
|                        | e.g., musical elements, expressive qualities, performance technique  |
| MII 912 S 3 <i>A</i> · | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques   |
| 1010.912.3.3.4:        | Develop and describe the encert of renearsal sessions and/or strategies on rennement of skins and techniques.  |
| MU.912.S.3.5:          |  |
|                        | e a posture breathing fingering embouchure bow technique tuning strumming  |
|                        |  |
| LAFS.1112.RST.2.4:     | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and tonics.     |
|                        | Initiate and participate effectively in a range of collaborative discussions (one on one in groups, and teacher led) with diverse partners on grades 11-   |
|                        | 12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively  |
|                        | a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from  |
|                        | texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.   |
|                        | b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as  |

|                     | needed  |
|---------------------|---|
| LAFS.1112.SL.1.1:   | requeu.   |
|                     | topic or issue: clarify, verify, or challenge ideas and conclusions: and promote divergent and creative perspectives  |
|                     | d. Respond thoughtfully to diverse perspectives: synthesize comments, claims, and evidence made on all sides of an issue: resolve contradictions  |
|                     | when possible; and determine what additional information or research is required to deepen the investigation or complete the task.  |
|                     | Standard Relation to Course: Supporting   |
|                     | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed   |
| LAF3.1112.3L.1.2.   | decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.   |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.   |
| LAFS.1112.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.   |
| LAFS.1112.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.1112.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or<br>broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.   |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
|                     | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                     | Attend to precision.  |
| MAFS.K12.MP.6.1:    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                     | Standard Relation to Course: Supporting   |
|                     | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:    | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |
|                     | Standard Relation to Course: Supporting   |
| DA.912.S.2.1:       | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1:   | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students in this advanced class refine their musicianship and performance skills on a specified instrument. Students prepare for post-secondary and community music experiences and develop artistry independently through a variety of advanced solos, etudes, and excerpts. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

### GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul>  |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.  |
|                 | <ul> <li>Connect solutions of problems to more complicated large-scale situations.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul> </li> </ul> |
| MA K12 MTD 6 1. | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context  |
|                 |   |

|                                    | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>  |
|------------------------------------|--|
| MA.K12.MTR.7.1:                    | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul>  |
| ELA.K12.EE.1.1:                    | <ul> <li>Cite evidence to explain and justify reasoning.</li> <li>Clarifications:</li> <li>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.</li> <li>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</li> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> <li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li> </ul> |
| ELA.K12.EE.2.1:                    | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
| ELA.K12.EE.3.1:                    | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
| ELA.K12.EE.4.1:                    | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
| ELA.K12.EE.5.1:                    | Use the accepted rules governing a specific format to create quality work.<br>Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.   |
| ELA.K12.EE.6.1:                    | Use appropriate voice and tone when speaking or writing.<br>Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.  |
| DA.912.S.2.1:<br>ELD.K12.ELL.SI.1: | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.<br>English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students in this advanced class refine their musicianship and performance skills on a specified instrument. Students prepare for post-secondary and community music experiences and develop artistry independently through a variety of advanced solos, etudes, and excerpts. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

# Instrumental Ensemble 1 (#1302460) 2020 - 2022 (current)

| Name               | Description   |
|--------------------|---|
|                    | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:      | Clarifications:   |
|                    | e.g., listening maps, active listening, checklists  |
| MU.912.C.2.1:      | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:      | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.3.1:      | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.   |
| MU.912.F.3.2:      | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.   |
| MU.912.H.1.5:      | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.4:      | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
| MU.912.0.3.2:      | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                    | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:      | Clarifications:<br>e.g., texture, mode, form, tempo, voicing  |
| MU.912.S.2.2:      | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU 012 S 2 1.      | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and   |
| 10.912.3.3.1.      | kinesthetic energy.   |
|                    | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:      | Clarifications:   |
|                    | e.g., musical elements, expressive qualities, performance technique   |
|                    | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:      | Clarifications:   |
|                    | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| LAFS.910.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.   |
| LAFS.910.SL.1.1:   | <ul> <li>topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> <li>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</li> </ul>  |
|                    | Standard Relation to Course: Supporting   |
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.  |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.   |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.   |
| LAFS.910.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.   |
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:   | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.  Standard Relation to Course: Supporting |
|                    | Attend to precision.  |
|                    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own   |

| MAFS.K12.MP.6.1:  | reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. <b>Standard Relation to Course: Supporting</b>   |
|-------------------|--|
|                   | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:  | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting |
|                   | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in   |
| DA.912.F.3.8:     | the work environment.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students with little or no experience in an instrumental ensemble develop basic musicianship and ensemble performance skills through the study of basic, high-quality music in diverse styles. Student musicians focus on building foundational music techniques, music literacy, listening skills, and aesthetic awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. |                 | Develop and demonstrate proper yogal or instrumental technique   |    |
|                 |  |    |
| MU.912.S.3.5:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |    |
|                 | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>  |    |
| MA.K12.MTR.1.1: | Clarifications:         Teachers who encourage students to participate actively in effortful learning both individually and with others:         • Cultivate a community of growth mindset learners.         • Foster perseverance in students by choosing tasks that are challenging.         • Develop students' ability to analyze and problem solve.         • Recognize students' effort when solving challenging problems.   |    |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> </li> </ul> |    |
|                 | Clarifications:<br>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:<br>Help students make connections between concepts and representations.<br>Provide opportunities for students to use manipulatives when investigating concepts.<br>Guide students from concrete to pictorial to abstract representations as understanding progresses.<br>Show students that various representations can have different purposes and can be useful in different situations.  |    |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>• Select efficient and appropriate methods for solving problems within the given context.<br>• Maintain flexibility and accuracy while performing procedures and mental calculations.<br>• Complete tasks accurately and with confidence.<br>• Adapt procedures to apply them to a new context.<br>• Use feedback to improve efficiency when performing calculations.   |    |
|                 | Clarifications:  |    |

|                 | <ul> <li>Teachers who encourage students to complete tasks with mathematical fluency:</li> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to practice efficient and generalizable methods.</li> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>   |
|-----------------|--|
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> </li> </ul> |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br><b>Clarifications:</b><br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.<br>• Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.   |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications:</li> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>  |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.<br>Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.<br>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly<br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide<br>referenced by the instructor.   |

|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |  |
|-------------------|---|--|
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |  |
|                   | Read and comprehend grade-level complex texts proficiently.   |  |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |  |
|                   | Make inferences to support comprehension.   |  |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |  |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.<br>In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students |  |
|                   | build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |  |
|                   | Use the accepted rules governing a specific format to create quality work.  |  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |  |
|                   | Use appropriate voice and tone when speaking or writing.  |  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |  |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.  |  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |  |

#### VERSION DESCRIPTION

Students with little or no experience in an instrumental ensemble develop basic musicianship and ensemble performance skills through the study of basic, high-quality music in diverse styles. Student musicians focus on building foundational music techniques, music literacy, listening skills, and aesthetic awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1302460

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: INSTRU ENS 1 
 Number of Credits: One (1) credit
 Course Length: Year (Y)

 Course Type: Core Academic Course
 Course Level: 2

 Course Status: State Board Approved
 Grade Level(s): 9,10,11,12

 Graduation Requirement: Performing/Fine Arts
 State Sta

Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

# Instrumental Ensemble 2 (#1302470) 2020 - 2022 (current)

| Name               | Description  |
|--------------------|--|
|                    | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:      | Clarifications:  |
|                    | e.g., listening maps, active listening, checklists   |
| MU.912.C.2.1:      | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:      | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.3.1:      | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |
| MU.912.F.3.2:      | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.H.1.5:      | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.4:      | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|                    | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.O.1.1:      | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
|                    | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.   |
| MU.912.O.3.1:      | Clarifications:<br>e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,<br>orchestration  |
| MU.912.0.3.2:      | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                    | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:      | Clarifications:<br>e.g., texture, mode, form, tempo, voicing   |
|                    | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
| MU.912.S.2.1:      | Clarifications:<br>e.g., memorization, sequential process  |
| MU.912.S.2.2:      | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:      | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
|                    | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:      | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
|                    | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:      | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
|                    | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–<br>12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.                              |
|                    | a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.                                       |
| LAFS.1112.SL.1.1:  | b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.  |
|                    | c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a   |
|                    | topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.  |
|                    | d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions   |
|                    | when possible; and determine what additional information or research is required to deepen the investigation or complete the task.   |
|                    | Standard Relation to Course: Supporting  |
| LAES 010 DST 2 4.  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical  |
| LAF3.910.K31.2.4.  | context relevant to grades 9–10 texts and topics.  |
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.   |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.  |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.  |
| LAFS.910.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.  |
| LAFS.910.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation. |

| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
|--------------------|---|
|                    | Use appropriate tools strategically.  |
| MAFS.K12.MP.5.1:   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                    | Attend to precision.  |
| MAFS.K12.MP.6.1:   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                    | Standard Relation to Course: Supporting   |
| MAFS.K12.MP.7.1:   | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven<br>more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,<br>students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$<br>+ 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and<br>can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see<br>complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x<br>- y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.<br>Standard Relation to Course: Supporting   |
|                    | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in  |
| DA.912.F.3.8:      | the work environment.   |
| DA.912.S.2.1:      | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students with previous instrumental ensemble experience continue building musicianship and performance skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant musical styles and time periods. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

## GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br>Clarifications:   |
|                 | <ul> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>  |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>Estimate to discover possible solutions.<br>Use benchmark quantities to determine if a solution makes sense.<br>Check calculations when solving problems.<br>Verify possible solutions by explaining the methods used.<br>Evaluate results based on the given context.  |
|                 | Clarifications:         Teachers who encourage students to assess the reasonableness of solutions:         • Have students estimate or predict solutions prior to solving.         • Prompt students to continually ask, "Does this solution make sense? How do you know?"         • Reinforce that students check their work as they progress within and after a task.         • Strengthen students' ability to verify solutions through justifications.   |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:  |
| MA.K12.MTR.7.1: | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> <li>Clarifications:</li> </ul>  |
|                 | <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> </ul>   |

|                   | <ul><li>Challenge students to question the accuracy of their models and methods.</li><li>Support students as they validate conclusions by comparing them to the given situation.</li><li>Indicate how various concepts can be applied to other disciplines.</li></ul>   |
|-------------------|---|
|                   | Cite evidence to explain and justify reasoning.   |
| ELA.K12.EE.1.1:   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
|                   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
| ELA.K12.EE.6.1:   | Use appropriate voice and tone when speaking or writing.  |
|                   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students with previous instrumental ensemble experience continue building musicianship and performance skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant musical styles and time periods. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area

concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1302470

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: INSTRU ENS 2 Course Length: Year (Y) Course Level: 2

# Instrumental Ensemble 3 (#1302480) 2020 - 2022 (current)

| Name                      | Description   |
|---------------------------|---|
|                           | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1:             | Clarifications:   |
|                           | e.g., listening maps, active listening, checklists  |
|                           | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                  |
|                           | composer's intent.  |
| MU.912.C.1.2:             | Clarifications:   |
|                           | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                               |
| MU.912.C.2.1:             | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:             | Evaluate performance quality in recorded and/or live performances.  |
| MIL 012 C 2 1.            | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development       |
| 10.712.0.3.1.             | in music.   |
|                           | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music         |
| MU.912.F.2.1:             |   |
|                           | Clarifications:   |
|                           | e.g., repertoire rists, technology-based work, ability to research and analyze, and examples or readership and conaborative skins                           |
|                           | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.                                 |
| MU.912.F.2.3:             | Clarifications:   |
|                           | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel  |
| MU.912.F.3.1:             | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of       |
|                           | readership in school and/or non-school settings.  |
| MU.912.F.3.2:             | technology.   |
|                           | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,   |
| MU.912.F.3.3:             | demonstrating skills for use in the workplace.  |
|                           | Compare two or more works of a composer across performance media.   |
| MU.912.H.1.3:             | Clarifications:   |
|                           | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.5:             | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.4:             | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
|                           | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.0.1.1:             | Clarifications:   |
|                           | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.2.1:             | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.                                    |
|                           | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied         |
|                           |   |
| MU.912.0.3.1:             | Clarifications:   |
|                           | orchestration   |
| MU 912 O 3 2 <sup>.</sup> | Interpret and perform expressive elements indicated by the musical score and/or conductor   |
|                           | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:             | Clarifications:   |
|                           | e.g., texture, mode, form, tempo, voicing   |
|                           | Perform and notate, independently and accurately, melodies by ear.  |
| MIL 912 S 1 4·            | Clarifications:   |
| MI0.712.0.1.1.            | e.g., singing, playing, writing   |
|                           | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of   |
|                           | music literature.   |
| MU.912.S.2.1:             | Clarifications:   |
|                           | e.g., memorization, sequential process  |
| MU.912.S.2.2:             | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU 010 6 0 1              | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and |
| IVIU.912.5.3.1:           | kinesthetic energy.   |
|                           | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:             | Clarifications:   |
|                           | e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:             | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |

|                     | Develop and demonstrate proper vocal or instrumental technique.   |  |
|---------------------|---|--|
| MU.912.S.3.5:       | Clarifications:   |  |
|                     | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |  |
| LAFS.1112.RST.2.4:  | T.2.4: Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.   |  |
|                     | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11– 12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with paper to promote civil, democratic discussions and decision making, set clear goals and deadlines, and establish individual roles as</li> </ul>   |  |
|                     | b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as   |  |
| LAFS.1112.SL.1.1:   | <ul> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. |                     | when possible; and determine what additional information or research is required to deepen the investigation or complete the task.  |  |
|                     | Standard Relation to Course: Supporting   |  |
| LAFS.1112.SL.1.2:   | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |  |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.   |  |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.   |  |
| LAFS.1112.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.   |  |
| LAFS.1112.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.  |  |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |  |
| MAFS.K12.MP.5.1:    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |  |
| MAFS.K12.MP.6.1:    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |  |
|                     | Standard Relation to Course: Supporting Look for and make use of structure.   |  |
| MAFS.K12.MP.7.1:    | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |  |
|                     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in  |  |
| DA.912.F.3.8:       | the work environment.   |  |
| DA.912.S.2.1:       | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |  |
| ELD.K12.ELL.SI.1:   | English language learners communicate for social and instructional purposes within the school setting.  |  |

#### VERSION DESCRIPTION

Students strengthen instrumental ensemble performance skills, music literacy, and analytical skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant history and cultures. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

#### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)

# Instrumental Ensemble 3 (#1302480) 2022 - And Beyond

| Name          | Description   |
|---------------|---|
|               | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
| MU.912.C.1.1: | Clarifications:   |
|               | e.g., listening maps, active listening, checklists  |
|               | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                        |
| MU 012 C 1 2- | composer's intent.  |
| 10.912.0.1.2. | Clarifications:   |
|               | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                                     |
| MU.912.C.2.1: | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2: | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.3.1: | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music |
|               | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music               |
|               | training.   |
| MU.912.F.2.1: | Clarifications:   |
|               | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills                               |
|               | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.                                       |
| MU.912.F.2.3: | Clarifications:   |
|               | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel  |
| MU.912.F.3.1: | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of             |
|               | leadership in school and/or non-school settings.  |
| MU.912.F.3.2: | technology.   |
|               | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,         |
| MU.912.F.3.3: | demonstrating skills for use in the workplace.  |
|               | Compare two or more works of a composer across performance media.   |
| MU.912.H.1.3: | Clarifications:   |
|               | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU.912.H.1.5: | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.4: | Examine the effects of developing technology on composition, performance, and acquisition of music.   |
| MU 010 O 1 1. |   |
| MU.912.0.1.1: | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU 912 O 2 1· | Transfer accented composition conventions and performance practices of a specific style to a contrasting style of music   |
| 10.712.0.2.11 | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied               |
|               | meaning of the composer/performer.  |
| MU.912.0.3.1: | Clarifications:   |
|               | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,                             |
|               | orchestration   |
| MU.912.0.3.2: | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|               | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3: | Clarifications:   |
|               | Deform and notate independently and ecourately maladies by ear  |
|               | Perform and hotate, independently and accurately, melodies by ear.  |
| MU.912.5.1.4: | e a singing plaving writing   |
|               | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of         |
|               | music literature.   |
| MU.912.S.2.1: | Clarifications:   |
|               | e.g., memorization, sequential process  |
| MU.912.S.2.2: | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU 012 S 2 1. | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and       |
| 10.712.3.3.1. | kinesthetic energy.   |
|               | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2: | Clarifications:   |
|               | e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4: | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |

|                 | Develop and demonstrate proper vocal or instrumental technique.  |
|-----------------|--|
| MU.912.S.3.5:   | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Bercongrize students' effort when solving challenging problems.</li> </ul>  |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul>   |
|                 | <ul> <li>Clarifications:</li> <li>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</li> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul>  |
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul> Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li></ul>   |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
| MA.K12.MTR.5.1: | <ul> <li>Use patterns and structure to help understand and connect mathematical concepts.</li> <li>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</li> <li>Focus on relevant details within a problem.</li> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> <li>Connect solutions of problems to more complicated large-scale situations.</li> </ul> Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: <ul> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li></ul>   |

|                 | <ul> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul>   |
|-----------------|---|
|                 | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:   |
| MA.K12.MTR.6.1: | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul>  |
|                 | Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through justifications.   |
|                 | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:   |
| MA.K12.MTR.7.1: | <ul> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> </ul> Clarifications: Teachers who encourage students to apply mathematics to real-world contexts: <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods. <ul> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul></li></ul> |
|                 | Cite evidence to explain and justify reasoning.   |
| ELA.K12.EE.1.1: | K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations.  |
|                 | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly<br>quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide<br>referenced by the instructor.  |
|                 | <ul><li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li><li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li></ul>   |
|                 | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1: | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                 | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1: | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                 | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1: | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                 | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                 | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1: | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                 | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1: | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.F.3.8:   | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.  |
| DA.912.S.2.1:   | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |

#### VERSION DESCRIPTION

Students strengthen instrumental ensemble performance skills, music literacy, and analytical skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant history and cultures. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### GENERAL NOTES

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. |                 | meaning of the composer/performer.  |
| MIL 912 O 3 1.  | Clarifications  |
| 10.712.0.3.1.   | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,                         |
|                 | orchestration   |
| MU.912.0.3.2:   | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                 | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:   | Clarifications:   |
|                 | e.g., texture, mode, form, tempo, voicing   |
|                 | Perform and notate, independently and accurately, melodies by ear.  |
| MU 912 S 1 4·   | Clarifications:   |
|                 | e.g., singing, playing, writing   |
|                 |   |

|                     | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
|---------------------|--|
| MU.912.S.2.1:       | Clarifications:<br>e.g., memorization, sequential process  |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
|                     | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:       | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
| MU.912.S.3.5:       | Develop and demonstrate proper vocal or instrumental technique. Clarifications: e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| LAFS.1112.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.   |
| LAFS.1112.SL.1.1:   | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li> </ul>  |
|                     | Standard Relation to Course: Supporting  |
| LAFS.1112.SL.1.2:   | decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.  |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.  |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.  |
| LAFS.1112.SL.2.6:   | Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.  |
| LAFS.1112.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.   |
| LAFS.1112.WHST.2.6: | including the interfect, to produce, publish, and update individual of shared writing products in response to ongoing reedback, including new arguments or information.  |
| LAFS.1112.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.   |
| MAFS.K12.MP.5.1:    | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. Standard Relation to Course: Supporting |
| MAFS.K12.MP.6.1:    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. Standard Relation to Course: Supporting Look for and make use of structure.  |
| MAFS.K12.MP.7.1:    | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. Standard Relation to Course: Supporting   |

|  | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in |

| DA.912.S.2.1:  | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: English language learners communicate for social and instructional purposes within the school setting. |  |

#### VERSION DESCRIPTION

Students with extensive instrumental ensemble experience refine their critical listening, music literacy, and ensemble skills through the study, rehearsal, and performance of high-quality, advanced literature. Students use reflection and problem-solving skills with increasing independence to improve their performance and musical expression. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

| Name           | Description   |
|----------------|---|
| MU.912.C.1.1:  | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
|                | Clarifications:   |
|                | e.g., listening maps, active listening, checklists  |
|                | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the                    |
| MU.912.C.1.2:  | composer's intent.  |
|                | Clarifications:   |
|                | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title                                 |
| MU.912.C.2.1:  | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:  | Evaluate performance quality in recorded and/or live performances.  |
| MU 912 C 3 1   | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development         |
| M0.712.0.3.1.  | in music.   |
| MU.912.F.1.1:  | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.   |
|                | Design or refine a resume for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training. |
| MU.912.F.2.1:  |   |
|                | e.g. repertoire lists technology-based work, ability to research and analyze, and examples of leadership and collaborative skills                             |
|                | Anglure the effect of the arts and extertainment industry on the companie and easial health of communities and regions  |
|                | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.                                       |
| MU.912.F.2.2:  | Clarifications:   |
|                |   |
|                | Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.                                   |
| MU.912.F.2.3:  | Clarifications:   |
|                | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel  |
| MU.912.F.3.1:  | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of         |
|                | leadership in school and/or hon-school settings.  |
| MU.912.F.3.2:  | technology.   |
|                | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,     |
| MU.912.F.3.3:  | demonstrating skills for use in the workplace.  |
| MII 912 F 3 4  | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making,            |
| 10.712.1.0.1.  | and initiative to advance skills and/or knowledge.  |
|                | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.   |
| MU.912.H.1.2:  | Clarifications:   |
|                | e.g., vocal, instrumental, guitar, keyboard, electronic, nandbells  |
|                | Compare two or more works of a composer across performance media.   |
| MU.912.H.1.3:  | Clarifications:   |
|                | e.g., orchestral and choral; guitar and string quartet; plano solo and plano concerto   |
| MU.912.H.1.5:  | Analyze music within cultures to gain understanding of authentic performance practices.   |
| MU.912.H.2.1:  | Evaluate the social impact of music on specific historical periods.   |
| MU.912.H.2.2:  | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.                               |
| WIU.912.H.2.4: | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure   |
|                |   |
| MU.912.0.1.1:  | clarifications:   |
|                |   |
| MU.912.0.2.1:  | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied           |
|                | meaning of the composer/performer.  |
| MU 912 O 3 1·  | Clarifications  |
| 10.712.0.3.1.  | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,                         |
|                | orchestration   |
| MU.912.0.3.2:  | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:  | Clarifications:   |
|                | e.g., texture, mode, form, tempo, voicing   |
|                | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S.1.4:  | Clarifications:   |
|                | e.g., singing, playing, writing   |
|                |   |

|                 | music literature.  |  |
|-----------------|--|--|
| MU.912.S.2.1:   | Clarifications:  |  |
|                 | e.g., memorization, sequential process   |  |
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.  |  |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuration is a second structure of the second structure |  |
|                 | Sight-read music accurately and expressively to show synthesis of skills.  |  |
| MU.912.S.3.2:   | Clarifications:  |  |
| 10.712.3.3.2.   | e.g., musical elements, expressive qualities, performance technique  |  |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |  |
|                 | Develop and demonstrate proper vocal or instrumental technique.  |  |
| MU.912.S.3.5:   | Clarifications:  |  |
|                 | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |  |
|                 | Mathematicians who participate in effortful learning both individually and with others: <ul> <li>Analyze the problem in a way that makes sense given the task</li> </ul>   |  |
|                 | <ul> <li>Ask questions that will help with solving the task.</li> </ul>  |  |
|                 | Build perseverance by modifying methods as needed while solving a challenging task.  |  |
|                 | Stay engaged and maintain a positive mindset when working to solve tasks.  |  |
| MA.K12.MTR.1.1: | Help and support each other when attempting a new method or approach.  |  |
|                 | Clarifications:  |  |
|                 | <ul> <li>Cultivate a community of growth mindset learners.</li> </ul>  |  |
|                 | Foster perseverance in students by choosing tasks that are challenging.  |  |
|                 | Develop students' ability to analyze and problem solve.  |  |
|                 | Recognize students' effort when solving challenging problems.  |  |
|                 | Demonstrate understanding by representing problems in multiple ways.   |  |
|                 | Mathematicians who demonstrate understanding by representing problems in multiple ways.  |  |
|                 | <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Depresent solutions to problems in multiple using objects deputings, tables, graphs and equations.</li> </ul>  |  |
|                 | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>  |  |
|                 | <ul> <li>Express connections between concepts and representations.</li> </ul>  |  |
| MA.K12.MTR.2.1: | Choose a representation based on the given context or purpose.   |  |
|                 | Clarifications:  |  |
|                 | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:  |  |
|                 | <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> </ul>   |  |
|                 | <ul> <li>Guide students for concrete to pictorial to abstract representations as understanding progresses.</li> </ul>  |  |
|                 | Show students that various representations can have different purposes and can be useful in different situations.  |  |
|                 | Complete tasks with mathematical fluency.  |  |
|                 | Mathematicians who complete tasks with mathematical fluency:   |  |
|                 | Select efficient and appropriate methods for solving problems within the given context.  |  |
|                 | Maintain flexibility and accuracy while performing procedures and mental calculations.   |  |
|                 | Complete tasks accurately and with confidence.   |  |
| MA.K12.MTR.3.1: | Adapt procedures to apply them to a new context.     Ise feedback to improve efficiency when performing calculations   |  |
|                 | Clarifications:  |  |
|                 | Teachers who encourage students to complete tasks with mathematical fluency:   |  |
|                 | • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.   |  |
|                 | Offer multiple opportunities for students to practice efficient and generalizable methods.   |  |
|                 | <ul> <li>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.</li> </ul>   |  |
|                 | Engage in discussions that reflect on the mathematical thinking of self and others.<br>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  |  |
| MA.K12.MTR.4.1: |  |  |
|                 | <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> </ul>  |  |
|                 | <ul> <li>Compare the efficiency of a method to those expressed by others.</li> </ul>   |  |
|                 | Recognize errors and suggest how to correctly solve the task.  |  |
|                 | Justify results by explaining methods and processes.   |  |
|                 | Construct possible arguments based on evidence.  |  |
|                 | Clarifications:  |  |
|                 | Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:  • Establish a culture in which students ask questions of the teacher and their poors, and error is an expectivality for learning   |  |
|                 | <ul> <li>Create opportunities for students to discuss their thinking with peers.</li> </ul>  |  |
|                 | <ul> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> </ul>   |  |
|                 | Develop students' ability to justify methods and compare their responses to the responses of their peers.  |  |
|                 |  |  |

|                 | Mathematicians who use patterns and structure to help understand and connect mathematical concepts:   |
|-----------------|---|
|                 | Focus on relevant details within a problem.   |
|                 | Create plans and procedures to logically order events, steps or ideas to solve problems.  |
|                 | Decompose a complex problem into manageable parts.  |
|                 | Relate previously learned concepts to new concepts.   |
|                 | Look for similarities among problems.   |
| MA.K12.MTR.5.1: | Connect solutions of problems to more complicated large-scale situations.   |
|                 | Clarifications:   |
|                 | Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:   |
|                 | Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.  |
|                 | Support students to develop generalizations based on the similarities found among problems.   |
|                 | Provide opportunities for students to create plans and procedures to solve problems.  |
|                 | • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.   |
|                 | Assess the reasonableness of solutions.   |
|                 | Mathematicians who assess the reasonableness of solutions:  |
|                 | Estimate to discover possible solutions   |
|                 | Lise benchmark quantities to determine if a solution makes sense  |
|                 | Check calculations when solving problems.   |
|                 | <ul> <li>Verify possible solutions by explaining the methods used.</li> </ul>   |
| MA.K12.MTR.6.1: | • Evaluate results based on the given context.  |
|                 | Clarifications  |
|                 | Teachers who encourage students to assess the reasonableness of solutions:  |
|                 | <ul> <li>Have students estimate or predict solutions prior to solving.</li> </ul>   |
|                 | <ul> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> </ul>   |
|                 | Reinforce that students check their work as they progress within and after a task.  |
|                 | • Strengthen students' ability to verify solutions through justifications.  |
|                 | Apply mathematics to real world contexts  |
|                 | Mathematicians who apply mathematics to real-world contexts:  |
|                 |   |
|                 | Connect mathematical concepts to everyday experiences.  |
|                 | Use models and methods to understand, represent and solve problems.   |
|                 | <ul> <li>Perform investigations to gather data or determine if a method is appropriate.</li> <li>Redesign models and methods to improve accuracy or efficience</li> </ul>               |
| MA.K12.M1R.7.1: | Clarifications:   |
|                 | Teachers who encourage students to apply mathematics to real-world contexts:  |
|                 | Provide opportunities for students to create models, both concrete and abstract, and perform investigations.  |
|                 | Challenge students to question the accuracy of their models and methods.  |
|                 | <ul> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> |
|                 | <ul> <li>Indicate now various concepts can be applied to other disciplines.</li> </ul>  |
|                 | Cite evidence to explain and justify reasoning.   |
|                 | Clarifications:   |
|                 | K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details  |
|                 | from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.   |
|                 | 2-3 students include relevant textual evidence in their written and oral communication. Students should have the text when they refer to it.  |
| ELA.K12.EE.1.1: |   |
|                 | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly   |
|                 | quoted, paraphrased, or used for information, when writing, students will use the form of citation dictated by the instructor of the style guide referenced by the instructor.          |
|                 | referenced by the instructor.   |
|                 | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                 | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                 |   |
|                 | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1: | Clarifications:   |
|                 | See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.3.1: | Make inferences to support comprehension.   |
|                 | Clarifications:   |
|                 | Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl                                     |
|                 | smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and   |
|                 | beyond.   |
|                 | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
|                 | Clarifications:   |
| ELA.K12.EE.4.1: | In kindergarten, students learn to listen to one another respectfully.  |
|                 | In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The  |
|                 | collaborative conversations are becoming academic conversations.  |
|                 | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students                                      |
|                 | build on ideas, propel the conversation, and support claims and counterclaims with evidence.  |
|                 |   |
|                 | Use the accepted rules governing a specific format to create quality work.  |

| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work. |
|-------------------|--|
|                   | Use appropriate voice and tone when speaking or writing.   |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.                          |
| DA.912.F.3.8:     | Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students with extensive instrumental ensemble experience refine their critical listening, music literacy, and ensemble skills through the study, rehearsal, and performance of high-quality, advanced literature. Students use reflection and problem-solving skills with increasing independence to improve their performance and musical expression. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

#### **GENERAL NOTES**

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12)

Graduation Requirement: Performing/Fine Arts

# Jazz Ensemble 1 (#1302500) 2020 - 2022 (current)

| Name              | Description  |  |
|-------------------|--|--|
|                   | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |  |
| MU.912.C.1.1:     | Clarifications:  |  |
|                   | e.g., listening maps, active listening, checklists   |  |
| MIL 012 C 2 1.    | Evaluate and make appropriate adjustments to personal performance in solo and ensembles  |  |
| MU 912 C 2 2      | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |  |
| MU 912 C 2 3      | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively  |  |
| 10.712.0.2.0.     | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development  |  |
| MU.912.C.3.1:     | in music.  |  |
| MU.912.F.3.2:     | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |  |
|                   | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |  |
| MU.912.H.1.2:     | Clarifications:  |  |
|                   | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |  |
|                   | Compare two or more works of a composer across performance modia   |  |
|                   |  |  |
| MU.912.H.1.3:     | Clarifications:<br>e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |  |
| MU.912.H.2.1:     | Evaluate the social impact of music on specific historical periods.  |  |
|                   | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |  |
| MU.912.O.1.1:     | Clarifications:  |  |
|                   | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |  |
| MU 912 O 3 2      | Interpret and perform expressive elements indicated by the musical score and/or conductor  |  |
|                   | Improvise rhythmic and melodic phrases over harmonic progressions.   |  |
| MU 012 C 1 1.     |  |  |
| WIU.912.3.1.1:    | e a using text or scat syllables   |  |
|                   |  |  |
|                   | Arrange a musical work by manipulating two or more aspects of the composition.   |  |
| MU.912.S.1.3:     | Clarifications:  |  |
|                   | e.g., texture, mode, form, tempo, voicing  |  |
|                   | Perform and notate, independently and accurately, melodies by ear.   |  |
| MU.912.S.1.4:     | Clarifications:  |  |
|                   | e.g., singing, playing, writing  |  |
| MU.912.S.2.2:     | Transfer expressive elements and performance techniques from one piece of music to another.  |  |
| MIL 012 S 3 1.    | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and  |  |
| 10.712.3.3.1.     | kinesthetic energy.  |  |
| MU.912.S.3.4:     | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |  |
|                   | Develop and demonstrate proper vocal or instrumental technique.  |  |
| MU.912.S.3.5:     | Clarifications:  |  |
|                   | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |  |
| LAFS.910.RST.2.4: | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical  |  |
|                   | context relevant to grades 9–10 texts and topics.  |  |
|                   | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, taxts, and issues, building on others' ideas and expressions their own clearly and participate. |  |
|                   | a. Come to discussions prepared, having read and researched material under study: explicitly draw on that preparation by referring to evidence from  |  |
|                   | texts and other research on the tonic or issue to stimulate a thoughtful, well-reasoned exchange of ideas  |  |
|                   | h. Work with pages to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of   |  |
|                   | alternate views) clear goals and deadlines, and individual roles as needed   |  |
| LAFS.910.SL.1.1:  | c Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas: actively  |  |
|                   | incorporate others into the discussion: and clarify verify or challenge ideas and conclusions  |  |
|                   | d Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and when warranted qualify or justify their  |  |
|                   | own views and understanding and make new connections in light of the evidence and reasoning presented  |  |
|                   |  |  |
|                   | Standard Relation to Course: Supporting  |  |
| LAFS.910.SL.1.2:  | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and  |  |
|                   | accuracy or each source.   |  |
| LAFS.910.SL.1.3:  | Evaluate a speaker's point or view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted  |  |
|                   | Present information findings and supporting evidence clearly concisely and logically such that listeners can follow the line of reasoning and the  |  |
| LAFS.910.SL.2.4:  | organization, development, substance, and style are appropriate to purpose, audience, and task   |  |
|                   |  |  |

| LAFS.910.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or<br>broaden the inquiry when appropriate: synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.  |
|--------------------|--|
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.  |
|                    | Use appropriate tools strategically.<br>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,   |
| MAFS.K12.MP.5.1:   | concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.<br>Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools<br>might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze<br>graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other<br>mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying<br>assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify<br>relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use<br>technological tools to explore and deepen their understanding of concepts.<br><b>Standard Relation to Course: Supporting</b> |
|                    | Attend to precision.   |
| MAFS.K12.MP.6.1:   | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|                    | Standard Relation to Course: Supporting  |
|                    | Look for and make use of structure.  |
| MAFS.K12.MP.7.1:   | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.   |
|                    | Standard Relation to Course: Supporting  |
| DA.912.S.2.1:      | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1:  | English language learners communicate for social and instructional purposes within the school setting.   |

#### VERSION DESCRIPTION

Students with experience on an instrument suited for jazz ensemble explore the fundamentals of performance practices, improvisation, and music theory through a diverse repertoire of high-quality jazz literature. Students learn the basics of foundational jazz styles, use chord symbols, develop knowledge of musical structure, and study the history of jazz and its iconic musicians. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

## GENERAL NOTES

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### **Educator Certifications**

Music (Elementary and Secondary Grades K-12) Instrumental Music (Secondary Grades 7-12) Instrumental Music (Elementary and Secondary Grades K-12)
# Jazz Ensemble 1 (#1302500) 2022 - And Beyond

| Name                   | Description  |
|------------------------|--|
|                        | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:          | Clarifications:  |
|                        | e.g., listening maps, active listening, checklists   |
| MU 912 C 2 1·          | Evaluate and make appropriate adjustments to personal performance in solo and ensembles  |
| MU.912.C.2.2:          | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.2.3:          | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.   |
|                        | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development  |
| MU.912.C.3.1:          | in music.  |
| MII 912 E 3 2.         | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and  |
| 10.712.1.0.2.          | technology.  |
|                        | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU.912.H.1.2:          | Clarifications:  |
|                        | e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
|                        | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:          | Clarifications:  |
|                        | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU.912.H.2.1:          | Evaluate the social impact of music on specific historical periods.  |
|                        | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1:          | Clarifications:  |
|                        | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
| MU.912.0.3.2:          | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|                        | Improvise rhythmic and melodic phrases over harmonic progressions.   |
| MU.912.S.1.1:          | Clarifications:  |
|                        | e.g., using text or scat syllables   |
|                        | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3:          | Clarifications:  |
|                        | e.g., texture, mode, form, tempo, voicing  |
|                        | Perform and notate, independently and accurately, melodies by ear.   |
| MU.912.S.1.4:          | Clarifications:  |
|                        | e.g., singing, playing, writing  |
| MU.912.S.2.2:          | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU 010 C 0 1           | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and  |
| MU.912.5.3.1:          | kinesthetic energy.  |
| MU.912.S.3.4:          | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                        | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:          | Clarifications:  |
|                        | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                        | Mathematicians who participate in effortful learning both individually and with others:  |
|                        | Analyze the problem in a way that makes sense given the task.  |
|                        | Ask questions that will help with solving the task.  |
|                        | Build perseverance by modifying methods as needed while solving a challenging task.  |
|                        | Stay engaged and maintain a positive mindset when working to solve tasks.  |
| MA.K12.MTR.1.1:        | Heip and support each other when attempting a new method or approach.  |
|                        | Clarifications:  |
|                        | Cultivate a community of growth mindset learners   |
|                        | Foster perseverance in students by choosing tasks that are challenging   |
|                        | <ul> <li>Develop students' ability to analyze and problem solve.</li> </ul>  |
|                        | <ul> <li>Recognize students' effort when solving challenging problems.</li> </ul>  |
|                        | Demonstrate understanding by representing problems in multiple ways  |
|                        | Mathematicians who demonstrate understanding by representing problems in multiple ways:  |
|                        |  |
|                        | Build understanding through modeling and using manipulatives.  |
|                        | <ul> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Decreases from modeling problems with objects and drawings to using algorithms and equations.</li> </ul> |
|                        | Frogress non-modeling problems with objects and drawings to using algorithms and equations.     Eveness connections between concents and representations.  |
| MA K12 MTD 2 1.        | Chaose a representation based on the given context or purpose  |
| NUT SIX 12.101113.2.1. | choose a tophosentation based on the given context of parpose.   |

|                 | Clarifications:         Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:         Help students make connections between concepts and representations.         Provide opportunities for students to use manipulatives when investigating concepts.         Guide students from concrete to pictorial to abstract representations as understanding progresses.         Show students that various representations can have different purposes and can be useful in different situations.   |
|-----------------|--|
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul> Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used. Teachers who are the task to reflect on the method they used and determine if a more efficient method could have been used.</li></ul>   |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> </li> </ul></li></ul> |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br><b>Clarifications:</b><br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.  |
| MA.K12.MTR.6.1: | Assess the reasonableness of solutions.<br>Mathematicians who assess the reasonableness of solutions:<br>• Estimate to discover possible solutions.<br>• Use benchmark quantities to determine if a solution makes sense.<br>• Check calculations when solving problems.<br>• Verify possible solutions by explaining the methods used.<br>• Evaluate results based on the given context.<br>Clarifications:<br>Teachers who encourage students to assess the reasonableness of solutions:<br>• Have students estimate or predict solutions prior to solving.<br>• Prompt students to continually ask, "Does this solution make sense? How do you know?"<br>• Reinforce that students check their work as they progress within and after a task.<br>• Strengthen students' ability to verify solutions through justifications.   |
| MA.K12.MTR.7.1: | Apply mathematics to real-world contexts.<br>Mathematicians who apply mathematics to real-world contexts:<br>• Connect mathematical concepts to everyday experiences.<br>• Use models and methods to understand, represent and solve problems.<br>• Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.<br>Clarifications:<br>Teachers who encourage students to apply mathematics to real-world contexts:   |

|                   | Provide opportunities for students to create models, both concrete and abstract, and perform investigations.  |
|-------------------|---|
|                   | <ul> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>   |
|                   | Cite evidence to explain and justify reasoning.   |
|                   | Clarifications:<br>K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details<br>from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.<br>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.<br>In 3rd grade, students should use a combination of direct and indirect citations. |
| ELA.K12.EE.1.1:   | 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  |
|                   | 6-8 Students continue with previous skills and use a style guide to create a proper citation.   |
|                   | 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.   |
|                   | Read and comprehend grade-level complex texts proficiently.   |
| ELA.K12.EE.2.1:   | Clarifications:<br>See Text Complexity for grade-level complexity bands and a text complexity rubric.   |
|                   | Make inferences to support comprehension.   |
| ELA.K12.EE.3.1:   | Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.  |
|                   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.   |
| ELA.K12.EE.4.1:   | Clarifications:<br>In kindergarten, students learn to listen to one another respectfully.<br>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The<br>collaborative conversations are becoming academic conversations.   |
|                   | In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
|                   | Use the accepted rules governing a specific format to create quality work.  |
| ELA.K12.EE.5.1:   | Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students with experience on an instrument suited for jazz ensemble explore the fundamentals of performance practices, improvisation, and music theory through a diverse repertoire of high-quality jazz literature. Students learn the basics of foundational jazz styles, use chord symbols, develop knowledge of musical structure, and study the history of jazz and its iconic musicians. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

#### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area

concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

| Course | Number: | 1302500 |

|--------|---------|---------|

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: JAZZ ENS 1 Course Length: Year (Y) Course Level: 2

#### **Educator Certifications**

# Jazz Ensemble 2 (#1302510) 2020 - 2022 (current)

| Name              | Description   |
|-------------------|---|
| MU.912.C.1.1:     | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
|                   | Clarifications:   |
|                   | e.g., listening maps, active listening, checklists  |
|                   | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent.   |
| MU.912.C.1.2:     | Clarifications:   |
|                   | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title   |
| MU.912.C.2.1:     | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:     | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.2.3:     | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.  |
| MU.912.C.3.1:     | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.                                       |
| MU.912.F.3.2:     | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.   |
| MU.912.F.3.4:     | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge. |
|                   | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.   |
| MU.912.H.1.2:     | Clarifications:<br>e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
|                   | Compare two or more works of a composer across performance media.   |
| MU.912.H.1.3:     | Clarifications:<br>e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU.912.H.2.1:     | Evaluate the social impact of music on specific historical periods.   |
|                   | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.                                      |
| MU.912.H.3.1:     | Clarifications:<br>e.g., acoustics, sound amplification, materials, mechanics   |
|                   | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.  |
| MU.912.0.1.1:     | Clarifications:   |
|                   | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.3.2:     | Interpret and perform expressive elements indicated by the musical score and/or conductor.  |
|                   | Improvise rhythmic and melodic phrases over harmonic progressions.  |
| MU.912.S.1.1:     | Clarifications:<br>e.g., using text or scat syllables   |
|                   | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:     | Clarifications:<br>e.g., texture, mode, form, tempo, voicing  |
|                   | Perform and notate, independently and accurately, melodies by ear.  |
| MU 912 S 1 4·     | Clarifications:   |
|                   | e.g., singing, playing, writing   |
|                   | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.                           |
| MU.912.S.2.1:     | Clarifications:   |
| MU.912.S 2 2      | Transfer expressive elements and performance techniques from one piece of music to another  |
|                   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and   |
| MU.912.S.3.1:     | kinesthetic energy.   |
|                   | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:     | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.4:     | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                   | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:     | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                   | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical   |
| LAF5.910.RS1.2.4: | context relevant to grades 9–10 texts and topics.   |

| LAFS.910.SL.1.1:   | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</li> <li>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</li> </ul>                 |
|--------------------|---|
|                    | Standard Relation to Course: Supporting   |
| LAFS.910.SL.1.2:   | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.  |
| LAFS.910.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.   |
| LAFS.910.SL.2.4:   | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.   |
| LAFS.910.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or<br>broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.   |
| LAFS.910.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.   |
| MAFS.K12.MP.5.1:   | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting</b> |
|                    | Attend to precision.<br>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own   |
| MAFS.K12.MP.6.1:   | reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.   |
|                    | Standard Relation to Course: Supporting   |
|                    | Look for and make use of structure.   |
| MAFS.K12.MP.7.1:   | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 - 3(x - y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                    | Standard Relation to Course: Supporting   |
| DA.912.S.2.1:      | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELU.NIZ.ELL.SI.I.  | english language learners communicate for social and instructional purposes within the school setting.  |

## VERSION DESCRIPTION

Students with jazz experience become conversant with basic chord progressions and the scale/chord relationship, strengthen aural skills, and learn to improvise and compose melodies over progressions as they rehearse, perform, and study high-quality jazz ensemble literature. Musicians study jazz history and become familiar with the cultural context of various compositions and artists. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

#### **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area

concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

### GENERAL INFORMATION

Course Number: 1302510

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: JAZZ ENS 2 Course Length: Year (Y) Course Level: 2

#### **Educator Certifications**

# Jazz Ensemble 2 (#1302510) 2022 - And Beyond

| Name           | Description   |
|----------------|---|
| MU.912.C.1.1:  | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.   |
|                | Clarifications:   |
|                | e.g., listening maps, active listening, checklists  |
|                | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the  |
|                | composer's intent.  |
| MU.912.C.1.2:  | Clarifications:   |
|                | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title   |
| MU.912.C.2.1:  | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.  |
| MU.912.C.2.2:  | Evaluate performance quality in recorded and/or live performances.  |
| MU.912.C.2.3:  | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.  |
| MU.912.C.3.1:  | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.                                       |
| MU.912.F.3.2:  | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.   |
| MU.912.F.3.4:  | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge. |
|                | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.   |
| MU.912.H.1.2:  | Clarifications:<br>e.g., vocal, instrumental, guitar, keyboard, electronic, handbells   |
|                | Compare two or more works of a composer across performance media.   |
| MU.912.H.1.3:  | Clarifications:   |
|                | Evaluate the social impact of music on specific historical pariods  |
| M0.912.n.2.1.  | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.                                      |
| MU.912.H.3.1:  | Clarifications:<br>e.g., acoustics, sound amplification, materials, mechanics   |
|                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure   |
| MIL 012 O 1 1. |   |
| 10.712.0.1.1.  | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU 912 O 3 2   | Interpret and perform expressive elements indicated by the musical score and/or conductor   |
|                | Improvise rhythmic and melodic phrases over harmonic progressions.  |
| MU.912.S.1.1:  | Clarifications:   |
|                | e.g., using text or scat syllables  |
|                | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:  | Clarifications:   |
|                | Derform and notate independently and accurately melodies by ear   |
| MU 012 S 1 4.  |   |
| WU.912.3.1.4:  | e.g., singing, playing, writing   |
|                | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.                           |
| MU.912.5.2.1:  | Clarifications:<br>e.g., memorization, sequential process   |
| MU.912.S.2.2:  | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:  | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.                       |
|                | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.S.3.2:  | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.4:  | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:  | Clarifications:<br>e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
|                | Mathematicians who participate in effortful learning both individually and with others  |
|                | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> </ul>   |

|                 | <ul> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul>  |
|-----------------|--|
| MA.K12.MTR.1.1: | <ul> <li>Help and support each other when attempting a new method or approach.</li> <li>Clarifications: <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul> </li> </ul>   |
| MA.K12.MTR.2.1: | <ul> <li>Demonstrate understanding by representing problems in multiple ways.</li> <li>Mathematicians who demonstrate understanding by representing problems in multiple ways:</li> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> <b>Clarifications:</b> Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li></ul>   |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.<br>Mathematicians who complete tasks with mathematical fluency:<br>Select efficient and appropriate methods for solving problems within the given context.<br>Maintain flexibility and accuracy while performing procedures and mental calculations.<br>Complete tasks accurately and with confidence.<br>Adapt procedures to apply them to a new context.<br>Use feedback to improve efficiency when performing calculations.<br>Clarifications:<br>Teachers who encourage students to complete tasks with mathematical fluency:<br>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.<br>Offer multiple opportunities for students to practice efficient and generalizable methods.<br>Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> |
| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:<br>• Focus on relevant details within a problem.<br>• Create plans and procedures to logically order events, steps or ideas to solve problems.<br>• Decompose a complex problem into manageable parts.<br>• Relate previously learned concepts to new concepts.<br>• Look for similarities among problems.<br>• Connect solutions of problems to more complicated large-scale situations.<br>Clarifications:<br>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:<br>• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.<br>• Support students to develop generalizations based on the similarities found among problems.<br>• Provide opportunities for students to create plans and procedures to solve problems.<br>• Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.<br>Assess the reasonableness of solutions.   |
|                 | Mathematicians who assess the reasonableness of solutions:   |

| MA.K12.MTR.6.1:                    | <ul> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul> Clarifications: Teachers who encourage students to assess the reasonableness of solutions: <ul> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li></ul>                               |
|------------------------------------|---|
|                                    | Strengthen students' ability to verify solutions through justifications.  Apply mathematics to real-world contexts.  Mathematicians who apply mathematics to real-world contexts:  Connect mathematical concepts to everyday experiences.  Use models and methods to understand, represent and solve problems.  |
| MA.K12.MTR.7.1:                    | <ul> <li>Perform investigations to gather data or determine if a method is appropriate.          <ul> <li>Redesign models and methods to improve accuracy or efficiency.</li> </ul> </li> <li>Clarifications:         <ul> <li>Teachers who encourage students to apply mathematics to real-world contexts:</li> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul> </li> </ul> |
|                                    | Cite evidence to explain and justify reasoning.  Clarifications:  K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.   |
| ELA.K12.EE.1.1:                    | <ul> <li>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</li> <li>6-8 Students continue with previous skills and use a style guide to create a proper citation.</li> <li>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</li> </ul>  |
| ELA.K12.EE.2.1:                    | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.3.1:                    | Make inferences to support comprehension. Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.   |
| ELA.K12.EE.4.1:                    | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
| ELA.K12.EE.5.1:                    | Use the accepted rules governing a specific format to create quality work.<br>Clarifications:<br>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they<br>must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to<br>do quality work.  |
| ELA.K12.EE.6.1:                    | Use appropriate voice and tone when speaking or writing.  Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.   |
| DA.912.S.2.1:<br>ELD.K12.ELL.SI.1: | Sustain tocused attention, respect, and discipline during class, rehearsal, and performance.<br>English language learners communicate for social and instructional purposes within the school setting.  |

### VERSION DESCRIPTION

Students with jazz experience become conversant with basic chord progressions and the scale/chord relationship, strengthen aural skills, and learn to improvise and compose melodies over progressions as they rehearse, perform, and study high-quality jazz ensemble literature. Musicians study jazz history and become familiar with the cultural context of various compositions and artists. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

#### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

| MU.912.S.2.1: Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. Clarifications:   | MU.912.S.1.4:          | Clarifications:  |
| MU.912.S.2.1: Clarifications:   |                        | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of  |
|   | MU.912.S.2.1:          | Clarifications:  |

|                     | e.g., memorization, sequential process   |
|---------------------|--|
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
|                     | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:       | Clarifications:<br>e.g., musical elements, expressive qualities, performance technique   |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
|                     | Develop and demonstrate proper vocal or instrumental technique.  |
| MU.912.S.3.5:       | Clarifications:  |
|                     | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| LAFS.1112.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.   |
| LAFS.1112.SL.1.1:   | <ul> <li>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li> </ul>  |
|                     | Standard Relation to Course: Supporting  |
| LAFS.1112.SL.1.2:   | decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.  |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.  |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning,<br>alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience,<br>and a range of formal and informal tasks.  |
| LAFS.1112.SL.2.5:   | Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.  |
| LAFS.1112.WHST.3.7: | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.   |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.  |
| MAFS.K12.MP.5.1:    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting Attend to precision.</b> |
| MAFS.K12.MP.6.1:    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.  |
|                     | Standard Relation to Course: Supporting Look for and make use of structure.  |
| MAFS.K12.MP.7.1:    | Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$ , older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.  |
|                     | Standard Relation to Course: Supporting  |
| DA.912.S.2.1:       | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| ELD.K12.ELL.SI.1:   | English language learners communicate for social and instructional purposes within the school setting.   |

## VERSION DESCRIPTION

Students with considerable jazz experience become conversant with more complex forms and harmonic progressions, and strengthen their aural and improvisational skills as they rehearse, perform, and study high-quality jazz ensemble literature. Musicians apply their theory skills to arranging, transposition, and composing; and study various periods, cultural contexts, compositions, and artists in jazz history. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

#### **GENERAL NOTES**

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1302520

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: Course Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: JAZZ ENS 3 Course Length: Year (Y) Course Level: 2

#### **Educator Certifications**

# Jazz Ensemble 3 (#1302520) 2022 - And Beyond

| Name          | Description  |
|---------------|--|
|               | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1: | Clarifications:<br>e.g., listening maps, active listening, checklists  |
|               | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent.  |
| MU.912.C.1.2: | Clarifications:<br>e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title   |
| MU.912.C.2.1: | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2: | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.2.3: | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.   |
| MU.912.C.3.1: | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |
|               | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training.  |
| MU.912.F.2.1: | Clarifications:<br>e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills   |
| MU.912.F.3.2: | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.4: | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.                      |
|               | Investigate and discuss how a culture's traditions are reflected through its music.  |
| MU.912.H.1.1: | Clarifications:<br>e.g., patriotic, folk, celebration, entertainment, spiritual  |
|               | Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class.  |
| MU.912.H.1.2: | Clarifications:<br>e.g., vocal, instrumental, guitar, keyboard, electronic, handbells  |
|               | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3: | Clarifications:<br>e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto   |
| MU 912 H 2 4· | Examine the effects of developing technology on composition, performance, and acquisition of music   |
|               | Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance.   |
| MU.912.H.3.1: | Clarifications:<br>e.g., acoustics, sound amplification, materials, mechanics  |
|               | Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of interest to demonstrate the ability to make transfers across contexts. |
| MU.912.H.3.2: | Clarifications:<br>e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public<br>speaking  |
|               | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1: | Clarifications:<br>e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble  |
| MU.912.0.3.2: | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |
|               | Improvise rhythmic and melodic phrases over harmonic progressions.   |
| MU.912.S.1.1: | Clarifications:<br>e.g., using text or scat syllables  |
| MU.912.S.1.2: | Compose music for voices and/or acoustic, digital, or electronic instruments.  |
|               | Arrange a musical work by manipulating two or more aspects of the composition.   |
| MU.912.S.1.3: | Clarifications:<br>e.g., texture, mode, form, tempo, voicing   |
|               | Perform and notate, independently and accurately, melodies by ear.   |
| MU.912.S.1.4: | Clarifications:<br>e.g., singing, playing, writing   |
|               | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.  |
| MU.912.S.2.1: | Clarifications:  |

|                 | e.g., memorization, sequential process   |
|-----------------|--|
| MU.912.S.2.2:   | Transfer expressive elements and performance techniques from one piece of music to another.  |
| MU.912.S.3.1:   | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.  |
|                 | Sight-read music accurately and expressively to show synthesis of skills.  |
| MU.912.S.3.2:   | Clarifications:  |
|                 | e.g., musical elements, expressive qualities, performance technique  |
| MU.912.S.3.4:   | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.  |
| MIL 012 S 2 5·  | Clarifications:  |
| 1010.912.3.3.3. | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming  |
| MA.K12.MTR.1.1: | <ul> <li>Mathematicians who participate in effortful learning both individually and with others:</li> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> <b>Clarifications:</b> <ul> <li>Teachers who encourage students to participate actively in effortful learning both individually and with others:</li> <li>Cultivate a community of growth mindset learners.</li> <li>Foster perseverance in students by choosing tasks that are challenging.</li> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems.</li> </ul> Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul> |
| MA.K12.MTR.2.1: | <ul> <li>Express connections between concepts and representations.</li> <li>Choose a representation based on the given context or purpose.</li> </ul> Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul> <li>Help students make connections between concepts and representations.</li> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses. <ul> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul></li></ul>  |
| MA.K12.MTR.3.1: | <ul> <li>Complete tasks with mathematical fluency.</li> <li>Mathematicians who complete tasks with mathematical fluency:</li> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> <li>Complete tasks accurately and with confidence.</li> <li>Adapt procedures to apply them to a new context.</li> <li>Use feedback to improve efficiency when performing calculations.</li> </ul> Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul> <li>Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.</li> <li>Offer multiple opportunities for students to reflect on the method they used and determine if a more efficient method could have been used. Encode and allows:</li></ul>  |
| MA.K12.MTR.4.1: | <ul> <li>Engage in discussions that reflect on the mathematical thinking of self and others.</li> <li>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul> <li>Communicate mathematical ideas, vocabulary and methods effectively.</li> <li>Analyze the mathematical thinking of others.</li> <li>Compare the efficiency of a method to those expressed by others.</li> <li>Recognize errors and suggest how to correctly solve the task.</li> <li>Justify results by explaining methods and processes.</li> <li>Construct possible arguments based on evidence.</li> </ul> </li> <li>Clarifications: <ul> <li>Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</li> <li>Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</li> <li>Create opportunities for students to discuss their thinking with peers.</li> <li>Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</li> <li>Develop students' ability to justify methods and compare their responses to the responses of their peers.</li> </ul> </li> </ul>   |
|                 | Use patterns and structure to help understand and connect mathematical concepts.<br>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  |
|                 | Focus on relevant details within a problem.  |

| MA.K12.MTR.5.1: | <ul> <li>Create plans and procedures to logically order events, steps or ideas to solve problems.</li> <li>Decompose a complex problem into manageable parts.</li> <li>Relate previously learned concepts to new concepts.</li> <li>Look for similarities among problems.</li> </ul>  |
|-----------------|---|
|                 | <ul> <li>Connect solutions of problems to more complicated large-scale situations.</li> <li>Clarifications:         <ul> <li>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</li> <li>Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.</li> <li>Support students to develop generalizations based on the similarities found among problems.</li> <li>Provide opportunities for students to create plans and procedures to solve problems.</li> <li>Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.</li> </ul> </li> <li>Assess the reasonableness of solutions.</li> </ul>  |
| MA.K12.MTR.6.1: | <ul> <li>Mathematicians who assess the reasonableness of solutions:</li> <li>Estimate to discover possible solutions.</li> <li>Use benchmark quantities to determine if a solution makes sense.</li> <li>Check calculations when solving problems.</li> <li>Verify possible solutions by explaining the methods used.</li> <li>Evaluate results based on the given context.</li> </ul> Clarifications: <ul> <li>Teachers who encourage students to assess the reasonableness of solutions:</li> <li>Have students estimate or predict solutions prior to solving.</li> <li>Prompt students to continually ask, "Does this solution make sense? How do you know?"</li> <li>Reinforce that students check their work as they progress within and after a task.</li> <li>Strengthen students' ability to verify solutions through justifications.</li> </ul>   |
| MA.K12.MTR.7.1: | <ul> <li>Apply mathematics to real-world contexts.</li> <li>Mathematicians who apply mathematics to real-world contexts:</li> <li>Connect mathematical concepts to everyday experiences.</li> <li>Use models and methods to understand, represent and solve problems.</li> <li>Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> </ul> Clarifications: Teachers who encourage students to apply mathematics to real-world contexts: <ul> <li>Provide opportunities for students to create models, both concrete and abstract, and perform investigations.</li> <li>Challenge students to question the accuracy of their models and methods.</li> <li>Support students as they validate conclusions by comparing them to the given situation.</li> <li>Indicate how various concepts can be applied to other disciplines.</li> </ul>  |
| ELA.K12.EE.1.1: | Cite evidence to explain and justify reasoning.  Clarifications:  K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.  4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  6-8 Students continue with previous skills and use a style guide to create a proper citation.  9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. |
| ELA.K12.EE.2.1: | Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.  |
| ELA.K12.EE.3.1: | Make inferences to support comprehension.<br>Clarifications:<br>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl<br>smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and<br>beyond.   |
| ELA.K12.EE.4.1: | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think because" The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.   |
| ELA.K12.EE.5.1: | Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they  |

|                   | must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.   |
|-------------------|---|
|                   | Use appropriate voice and tone when speaking or writing.  |
| ELA.K12.EE.6.1:   | Clarifications:<br>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends<br>differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.  |
| ELD.K12.ELL.SI.1: | English language learners communicate for social and instructional purposes within the school setting.  |

#### VERSION DESCRIPTION

Students with considerable jazz experience become conversant with more complex forms and harmonic progressions, and strengthen their aural and improvisational skills as they rehearse, perform, and study high-quality jazz ensemble literature. Musicians apply their theory skills to arranging, transposition, and composing; and study various periods, cultural contexts, compositions, and artists in jazz history. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

#### **GENERAL NOTES**

#### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This **course includes Florida's B.E.S.T. ELA Expectations (EE) and** Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST\_Standards.aspx and select the appropriate B.E.S.T. Standards package.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

Course Number: 1302520

Number of Credits: One (1) credit Course Type: Core Academic Course Course Status: State Board Approved Grade Level(s): 9,10,11,12 Graduation Requirement: Performing/Fine Arts Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Music Education > SubSubject: Instrumental Music > Abbreviated Title: JAZZ ENS 3 Course Length: Year (Y) Course Level: 2

#### **Educator Certifications**

# Jazz Ensemble 4 Honors (#1302530) 2020 - 2022 (current)

| Name           | Description  |
|----------------|--|
|                | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:  | Clarifications:  |
|                | e.g., listening maps, active listening, checklists   |
|                | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the   |
|                | composer's intent.   |
| MU.912.C.1.2:  | Clarifications:  |
|                | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
| MU 912 C 2 1·  | Evaluate and make appropriate adjustments to personal performance in solo and ensembles  |
| MU.912.C.2.2:  | Evaluate performance guality in recorded and/or live performances.   |
| MU.912.C.2.3:  | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.   |
| MU.912.C.3.1:  | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.  |
| MU.912.F.1.1:  | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.  |
|                | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training.  |
| MU.912.F.2.1:  | Clarifications   |
|                | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills  |
|                | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions   |
|                |  |
| WIU.912.F.2.2: | e.g. community revitalization, industry choosing new locations, cultural and social enrichment   |
|                |  |
|                | compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business.  |
| MU.912.F.2.3:  | Clarifications:  |
|                | e.g., leadership, mancial needs and structure, marketing, personner matters, manager, traver   |
| MU.912.F.3.1:  | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of<br>leadership in school and/or pap school settings                   |
|                | summarize converget laws that govern printed, recorded, and on line music to promote legal and responsible use of intellectual property and  |
| MU.912.F.3.2:  | technology.  |
|                | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight,  |
| WIU.912.F.3.3: | demonstrating skills for use in the workplace.   |
| MU.912.F.3.4:  | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.                      |
|                | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:  | Clarifications:  |
|                | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU.912.H.1.4:  | Analyze how Western music has been influenced by historical and current world cultures.  |
| MU.912.H.1.5:  | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.2:  | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.  |
|                | Analyze the evolution of a music genre.  |
| MU.912.H.2.3:  | Clarifications:<br>e.g., jazz, blues   |
| MU.912.H.2.4:  | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|                | Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of interest to demonstrate the ability to make transfers across contexts. |
| MU.912.H.3.2:  | Clarifications:  |
|                | e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public speaking  |
|                | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1:  | Clarifications:  |
|                | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
| MU 912 O 2 1·  | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music  |
| MU.912.0.2.2:  | Transpose melodies into different modalities through performance and composition.  |
|                | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.                                     |
| MU.912.0.3.1:  | Clarifications:  |
|                | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm,  |
|                | orchestration  |
| MU.912.0.3.2:  | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |

|                     | Improvise rhythmic and melodic phrases over harmonic progressions.  |
|---------------------|---|
| MU.912.S.1.1:       | Clarifications:<br>e.g., using text or scat syllables   |
| MU.912.S.1.2:       | Compose music for voices and/or acoustic, digital, or electronic instruments.   |
| MU.912.S.1.3:       | Arrange a musical work by manipulating two or more aspects of the composition. Clarifications: e.g., texture, mode, form, tempo, voicing  |
|                     | Perform and notate, independently and accurately, melodies by ear.  |
| MU.912.S.1.4:       | Clarifications:<br>e.g., singing, playing, writing  |
| MU.912.S.2.1:       | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   |
|                     | Clarifications:<br>e.g., memorization, sequential process   |
| MU.912.S.2.2:       | Transfer expressive elements and performance techniques from one piece of music to another.   |
| MU.912.S.3.1:       | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.   |
| MU.912.S.3.2:       | Clarifications:   |
| MU.912.S.3.3:       | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.  |
| MU.912.S.3.4:       | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
| MIL 012 S 2 5       | Develop and demonstrate proper vocal or instrumental technique.   |
| 1010.712.3.3.3.     | e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming   |
| LAFS.1112.RST.2.4:  | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.  |
| LAFS.1112.SL.1.1:   | <ul> <li>12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</li> <li>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</li> <li>b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.</li> <li>c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.</li> <li>d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.</li> </ul>  |
|                     | Standard Relation to Course: Supporting   |
| LAFS.1112.SL.1.2:   | Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.   |
| LAFS.1112.SL.1.3:   | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.   |
| LAFS.1112.SL.2.4:   | Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.   |
| LAFS.1112.SL.2.5:   | Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.   |
| LAFS.1112.WHST.2.4: | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LAFS.1112.WHST.2.6: | Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.  |
| LAFS.1112.WHST.3.7: | broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.   |
| LAFS.1112.WHST.3.9: | Draw evidence from informational texts to support analysis, reflection, and research.<br>Use appropriate tools strategically.   |
| MAFS.K12.MP.5.1:    | Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. <b>Standard Relation to Course: Supporting Attend to precision</b> . |
| MAFS.K12.MP.6.1:    | Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,   |

|                   | express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. Standard Relation to Course: Supporting  |
|-------------------|--|
|                   | Look for and make use of structure.<br>Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later,  |
| MAFS.K12.MP.7.1:  | students will see 7 × 8 equals the well remembered 7 × 5 + 7 × 3, in preparation for learning about the distributive property. In the expression $x^2$ + 9x + 14, older students can see the 14 as 2 × 7 and the 9 as 2 + 7. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see 5 – 3(x – y) <sup>2</sup> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. |
|                   |  |
| DA.912.S.2.1:     | Sustain focused attention, respect, and discipline during class, rehearsal, and performance.   |
| FLD K12 FLL SL 1. | English language learners communicate for social and instructional nurnoses within the school setting  |

#### VERSION DESCRIPTION

Students with significant jazz experience become highly conversant with complex harmonic structures; compose or arrange for small groups; improvise over various forms, keys, and styles; and are knowledgeable about the professional jazz scene and its icons. Musicians study the impact of technology on jazz and the music industry, and learn the basics of sound reinforcement for solo and ensemble performance. In keeping with the rigor expected in an Honors course, students undertake independent study that includes synthesis of learning and experience. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

#### GENERAL NOTES

Honors and Advanced Level Course Note: Academic rigor is more than simply assigning to students a greater quantity of work. Through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted, students are challenged to think and collaborate critically on the content they are learning.

#### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by **curriculum developers and teachers which maximizes an ELL's need for** communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/si.pdf

#### GENERAL INFORMATION

| Course Number: 1302530                       | Course Path: Section: Grades PreK to 12 Education<br>Courses > Grade Group: Grades 9 to 12 and Adult |
|--|--|
|  | Education Courses > Subject: Music Education >   |
|  | SubSubject: Instrumental Music >   |
|  | Abbreviated Title: JAZZ ENS 4 HON  |
| Number of Credits: One (1) credit            | Course Length: Year (Y)  |
|  | Course Attributes:   |
|  | Honors   |
| Course Type: Core Academic Course            | Course Level: 3  |
| Course Status: Course Approved               |  |
| Grade Level(s): 9,10,11,12                   |  |
| Graduation Requirement: Performing/Fine Arts |  |

# Jazz Ensemble 4 Honors (#1302530) 2022 - And Beyond

| Name                      | Description  |
|---------------------------|--|
|                           | Apply listening strategies to promote appreciation and understanding of unfamiliar musical works.  |
| MU.912.C.1.1:             | Clarifications:  |
|                           | e.g., listening maps, active listening, checklists   |
|                           | Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the   |
|                           | composer's intent.   |
| MU.912.C.1.2:             | Clarifications:  |
|                           | e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title  |
| MU.912.C.2.1:             | Evaluate and make appropriate adjustments to personal performance in solo and ensembles.   |
| MU.912.C.2.2:             | Evaluate performance quality in recorded and/or live performances.   |
| MU.912.C.2.3:             | Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.   |
| MU.912.C.3.1:             | Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development<br>in music.   |
| MU.912.F.1.1:             | Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.  |
|                           | Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training.  |
| MU.912.F.2.1:             | Clarifications:  |
|                           | e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills  |
|                           | Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions.  |
| MU.912.F.2.2:             | Clarifications:  |
|                           | e.g., community revitalization, industry choosing new locations, cultural and social enrichment  |
|                           | Compare the organizational structure of a professional orchestra, chorus, guintet, or other ensemble to that of a business.  |
| MII 912 F 2 3·            | Clarifications:  |
| WO.712.1.2.3.             | e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel   |
| MU.912.F.3.1:             | Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.                     |
| MU.912.F.3.2:             | Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.  |
| MU.912.F.3.3:             | Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.                   |
| MU.912.F.3.4:             | Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.                      |
|                           | Compare two or more works of a composer across performance media.  |
| MU.912.H.1.3:             | Clarifications:  |
|                           | e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto  |
| MU.912.H.1.4:             | Analyze how Western music has been influenced by historical and current world cultures.  |
| MU.912.H.1.5:             | Analyze music within cultures to gain understanding of authentic performance practices.  |
| MU.912.H.2.2:             | Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.  |
|                           | Analyze the evolution of a music genre.  |
| MU.912.H.2.3:             | Clarifications:<br>e.g., jazz, blues   |
| MU.912.H.2.4:             | Examine the effects of developing technology on composition, performance, and acquisition of music.  |
|                           | Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of interest to demonstrate the ability to make transfers across contexts. |
| MU.912.H.3.2:             | Clarifications:  |
|                           | e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public speaking  |
|                           | Evaluate the organizational principles and conventions in musical works and discuss their effect on structure.   |
| MU.912.0.1.1:             | Clarifications:  |
| 10.712.0.1.1.             | e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble   |
| MU 912 O 2 1 <sup>.</sup> | Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music  |
| MU.912.0.2.2:             | Transpose melodies into different modalities through performance and composition.  |
|                           | Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.                                     |
| MU.912.0.3.1:             | Clarifications:  |
|                           | e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration  |
| MU.912.0.3.2:             | Interpret and perform expressive elements indicated by the musical score and/or conductor.   |

| 1                         | Improvise rhythmic and melodic phrases over harmonic progressions.  |
|---------------------------|---|
| MU.912.S.1.1:             | Clarifications:<br>e.g., using text or scat syllables   |
| MU.912.S.1.2:             | Compose music for voices and/or acoustic, digital, or electronic instruments.   |
|                           | Arrange a musical work by manipulating two or more aspects of the composition.  |
| MU.912.S.1.3:             | Clarifications:   |
|                           | Perform and notate independently and accurately melodies by ear   |
| MU.912.S.1.4:             | Clarifications:   |
|                           | e.g., singing, playing, writing   |
|                           | Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature.   |
| MU.912.S.2.1:             | Clarifications:   |
| MU 912 S 2 2 <sup>.</sup> | Transfer expressive elements and performance techniques from one piece of music to another  |
| MU 012 S 2 1              | Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and   |
| MU.912.5.3.1:             | kinesthetic energy.   |
|                           | Sight-read music accurately and expressively to show synthesis of skills.   |
| MU.912.5.3.2:             | e.g., musical elements, expressive gualities, performance technique   |
| MU.912.S.3.3:             | Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.  |
| MU.912.S.3.4:             | Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.   |
|                           | Develop and demonstrate proper vocal or instrumental technique.   |
| MU.912.S.3.5:             | Clarifications:   |
|                           | e.g., posture, breathing, imgening, embodicidie, bow technique, tuning, strummig  |
|                           | <ul> <li>Analyze the problem in a way that makes sense given the task.</li> </ul>   |
|                           | Ask questions that will help with solving the task.   |
|                           | Build perseverance by modifying methods as needed while solving a challenging task.   |
|                           | Stay engaged and maintain a positive mindset when working to solve tasks.   |
| MA.K12.MTR.1.1:           | Heip and support each other when attempting a new method or approach.   |
|                           | Teachers who encourage students to participate actively in effortful learning both individually and with others:  |
|                           | Cultivate a community of growth mindset learners.   |
|                           | Foster perseverance in students by choosing tasks that are challenging.   |
|                           | <ul> <li>Develop students' ability to analyze and problem solve.</li> <li>Recognize students' effort when solving challenging problems</li> </ul>   |
|                           | Demonstrate understanding by representing problems in multiple ways   |
|                           | Mathematicians who demonstrate understanding by representing problems in multiple ways:   |
|                           | Build understanding through modeling and using manipulatives.   |
|                           | Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.   |
|                           | <ul> <li>Progress from modeling problems with objects and drawings to using algorithms and equations.</li> </ul>  |
| MA K12 MTD 2 1.           | <ul> <li>Express connections between concepts and representations.</li> <li>Chaose a representation based on the given context or purpose.</li> </ul>   |
| WIA. K 12. WITR. 2. 1.    | Clarifications:   |
|                           | Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:   |
|                           | Help students make connections between concepts and representations.  |
|                           | <ul> <li>Provide opportunities for students to use manipulatives when investigating concepts.</li> <li>Cuide students from concrete to nistorial to obstract conceptations as understanding progresses.</li> </ul>                                |
|                           | <ul> <li>Guide students from concrete to pictorial to abstract representations as understanding progresses.</li> <li>Show students that various representations can have different purposes and can be useful in different situations.</li> </ul> |
|                           | Complete tasks with mathematical fluency.   |
|                           |   |
| MA.K12.MTR.3.1:           | <ul> <li>Select efficient and appropriate methods for solving problems within the given context.</li> <li>Maintain flexibility and accuracy while performing procedures and mental calculations.</li> </ul>                                       |
|                           | <ul> <li>Complete tasks accurately and with confidence.</li> </ul>  |
