Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

### GENERAL INFORMATION

**Course Number:** 2104320

**Course Path: Section:** Grades PreK to 12 Education

Courses -> Grade Group: Grades 9 to 12 and Adult

Education Courses -> Subject: Social Studies ->

SubSubject: Interdisciplinary and Applied Social Studies ->

**Abbreviated Title:** GLOBAL STUDIES

**Number of Credits:** One (1) credit

**Course Length:** Year (Y)

**Course Type:** Elective Course

**Course Level:** 2

### Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.2:</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</td>
</tr>
<tr>
<td>SS.912.A.1.3:</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.4:</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.</td>
</tr>
<tr>
<td>SS.912.A.1.5:</td>
<td>Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</td>
</tr>
<tr>
<td>SS.912.A.1.6:</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.A.1.7:</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td>SS.912.A.3.10:</td>
<td>Review different economic and philosophic ideologies.</td>
</tr>
<tr>
<td>SS.912.A.7.11:</td>
<td>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</td>
</tr>
<tr>
<td>SS.912.A.7.12:</td>
<td>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</td>
</tr>
<tr>
<td>SS.912.A.7.14:</td>
<td>Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).</td>
</tr>
<tr>
<td>SS.912.C.4.1:</td>
<td>Explain how the world's nations are governed differently.</td>
</tr>
<tr>
<td>SS.912.C.4.2:</td>
<td>Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.</td>
</tr>
<tr>
<td>SS.912.C.4.3:</td>
<td>Assess human rights policies of the United States and other countries.</td>
</tr>
<tr>
<td>SS.912.E.3.4:</td>
<td>Assess the economic impact of negative and positive externalities on the international environment.</td>
</tr>
<tr>
<td>SS.912.E.3.5:</td>
<td>Compare the current United States economy with other developed and developing nations.</td>
</tr>
</tbody>
</table>
Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.

Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.

Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

Identify the physical characteristics and the human characteristics that define and differentiate regions.

Describe the factors and processes that contribute to the differences between developing and developed regions of the world.

Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.

Examples are desertification, global warming, cataclysmic natural disasters.

Interpret population growth and other demographic data for any given place.

Use geographic terms and tools to analyze case studies of issues in globalization.

Use geographic terms and tools to analyze case studies of issues in globalization.

Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.

Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.

Use geographic terms and tools to analyze case studies of issues in globalization.

Use political maps to describe the change in boundaries and governments within continents over time.

Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created.

Describe how historical events, social context, and culture impact forms, techniques, and purposes of works in the arts, including the relationship between a government and its citizens.

Relate works in the arts to various cultures.

Explain philosophical beliefs as they relate to works in the arts.

Examine artistic response to social issues and new ideas in various cultures.

Examples are Victor Hugo's 'Les Miserables', Langston Hughes' poetry, Pete Seeger's 'Bring 'Em Home'.

Analyze how current events are explained by artistic and cultural trends of the past.

Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.

Use timelines to establish cause and effect relationships of historical events.

Compare time measurement systems used by different cultures.

Interpret and evaluate primary and secondary sources.

Explain how historians use historical inquiry and other sciences to understand the past.

Examples are archaeology, economics, geography, forensic chemistry, political science, physics.

Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).

Evaluate the role of history in shaping identity and character.

Describe the rise and goals of nationalist leaders in the post-war era and the impact of their rule on their societies.

Examples are Mahatma Gandhi, Fidel Castro, Gamal Abdel Nasser, Francois 'Papa Doc' Duvalier, Jawaharlal Nehru.

Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.

Explain the impact of religious fundamentalism in the last half of the 20th century, and identify related events and forces in the Middle East over the
Assess the social and economic impact of pandemics on a global scale.

Describe the causes and effects of post-World War II economic and demographic changes.

Analyze the rise of regional trade blocs such as the European Union and NAFTA, and predict the impact of increased globalization in the 20th and 21st centuries.

Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

Describe the causes and effects of twentieth century nationalist conflicts.

Describe the causes and effects of pandemics on a global scale.

Describe the causes and effects of twentieth century nationalist conflicts.

Describe the impact of and global response to international terrorism.

Describe the impact of and global response to international terrorism.

Analyze the mathematical thinking of others.

Communicate mathematical ideas, vocabulary and methods effectively.

Select efficient and appropriate methods for solving problems within the given context.

Maintain flexibility and accuracy while performing procedures and mental calculations.

Complete tasks accurately and with confidence.

Use feedback to improve efficiency when performing calculations.

Select efficient and appropriate methods for solving problems within the given context.

Maintain flexibility and accuracy while performing procedures and mental calculations.

Complete tasks accurately and with confidence.

Use feedback to improve efficiency when performing calculations.

Complete tasks accurately and with confidence.

Use feedback to improve efficiency when performing calculations.

Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.

Communicate mathematical ideas, vocabulary and methods effectively.

Analyze the mathematical thinking of others.

Compare the efficiency of a method to those expressed by others.

Recognize errors and suggest how to correctly solve the task.
Justify results by explaining methods and processes.
Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students’ ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students’ ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students’ ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

Clarifications:
See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

Clarifications:
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the
### General Course Information and Notes

**GENERAL NOTES**

**Global Studies** - The grade 9-12 Global Studies course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content emphasis for this course pertains to the study of the commonalities and differences among the peoples and cultures of the world and the complex nature of individual, group and national interactions in today's world. Content should include, but is not limited to, global interdependence and challenges, culture, international systems and policies, pluralism, transnationalism, and cultural diffusion, global economics, and human-environment interactions.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

</tr>
<tr>
<td>SS.912.CG.4.1:</td>
<td>Analyze how liberty and economic freedom generate broad-based opportunity and prosperity in the United States.</td>
</tr>
<tr>
<td></td>
<td>• Students will differentiate between government systems (e.g., autocracy, democracy, monarchy, oligarchy republic, theocracy).</td>
</tr>
<tr>
<td></td>
<td>• Students will differentiate between economic systems (e.g., capitalism, communism, mixed market, socialism).</td>
</tr>
<tr>
<td></td>
<td>• Students will analyze the disadvantages of authoritarian control over the economy (e.g., communism and socialism) in generating broad-based economic prosperity for their population.</td>
</tr>
<tr>
<td>SS.912.CG.4.2:</td>
<td>Explain how the United States uses foreign policy to influence other nations.</td>
</tr>
<tr>
<td></td>
<td>• Students will explain how the policies of other nations influence U.S. policy and society.</td>
</tr>
<tr>
<td></td>
<td>• Students will identify agencies of the U.S. government that contribute to its foreign policy agenda (e.g., National Security Agency, Central Intelligence Agency).</td>
</tr>
<tr>
<td></td>
<td>• Students will explain the advantages and disadvantages of how nongovernmental organizations (NGOs) influence foreign policy (e.g., United States Agency for International Development, Red Cross, American Woman Suffrage Association, Amnesty International).</td>
</tr>
<tr>
<td></td>
<td>• Students will explain how U.S. trade policy influences its relationships with other nations (e.g., China, Saudi Arabia).</td>
</tr>
<tr>
<td>SS.912.CG.4.3</td>
<td>Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.</td>
</tr>
<tr>
<td>SS.912.E.3.4</td>
<td>Assess the economic impact of negative and positive externalities on the international environment.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</td>
</tr>
<tr>
<td>SS.912.E.3.5</td>
<td>Compare the current United States economy with other developed and developing nations.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples are standard of living, exchange rates, productivity, gross domestic product.</td>
</tr>
<tr>
<td>SS.912.G.1.1</td>
<td>Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.</td>
</tr>
<tr>
<td>SS.912.G.1.2</td>
<td>Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.</td>
</tr>
<tr>
<td>SS.912.G.1.3</td>
<td>Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.</td>
</tr>
<tr>
<td>SS.912.G.1.4</td>
<td>Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples are thematic, contour, and dot-density.</td>
</tr>
<tr>
<td>SS.912.G.2.1</td>
<td>Identify the physical characteristics and the human characteristics that define and differentiate regions.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</td>
</tr>
<tr>
<td>SS.912.G.2.2</td>
<td>Describe the factors and processes that contribute to the differences between developing and developed regions of the world.</td>
</tr>
<tr>
<td>SS.912.G.2.3</td>
<td>Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples are desertification, global warming, cataclysmic natural disasters.</td>
</tr>
<tr>
<td>SS.912.G.4.1</td>
<td>Interpret population growth and other demographic data for any given place.</td>
</tr>
<tr>
<td>SS.912.G.4.2</td>
<td>Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.</td>
</tr>
<tr>
<td>SS.912.G.4.3</td>
<td>Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.</td>
</tr>
<tr>
<td>SS.912.G.4.4</td>
<td>Use geographic terms and tools to analyze case studies of issues in globalization.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples are cultural imperialism, outsourcing.</td>
</tr>
<tr>
<td>SS.912.G.4.7</td>
<td>Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.</td>
</tr>
<tr>
<td>SS.912.G.4.9</td>
<td>Use political maps to describe the change in boundaries and governments within continents over time.</td>
</tr>
<tr>
<td>SS.912.H.1.1</td>
<td>Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples are Bronze Age, Ming Dynasty, Classical, Renaissance, Modern, and Contemporary.</td>
</tr>
<tr>
<td>SS.912.H.1.2</td>
<td>Describe how historical events, social context, and culture impact forms, techniques, and purposes of works in the arts, including the relationship between a government and its citizens.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples are imperial Roman sculpture; Palace of Versailles; Picasso's Guernica; layout of Washington, DC.</td>
</tr>
<tr>
<td>SS.912.H.1.3</td>
<td>Relate works in the arts to various cultures.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman.</td>
</tr>
<tr>
<td>SS.912.H.1.4</td>
<td>Explain philosophical beliefs as they relate to works in the arts.</td>
</tr>
<tr>
<td>SS.912.H.1.5</td>
<td>Examine artistic response to social issues and new ideas in various cultures.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.</td>
</tr>
<tr>
<td>SS.912.H.1.6</td>
<td>Analyze how current events are explained by artistic and cultural trends of the past.</td>
</tr>
<tr>
<td>SS.912.H.3.1</td>
<td>Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.</td>
</tr>
<tr>
<td>SS.912.W.1.1</td>
<td>Use timelines to establish cause and effect relationships of historical events.</td>
</tr>
<tr>
<td>SS.912.W.1.2</td>
<td>Compare time measurement systems used by different cultures.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.</td>
</tr>
<tr>
<td>SS.912.W.1.3</td>
<td>Interpret and evaluate primary and secondary sources.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples are artifacts, images, auditory and written sources.</td>
</tr>
<tr>
<td>SS.912.W.1.4</td>
<td>Explain how historians use historical inquiry and other sciences to understand the past.</td>
</tr>
<tr>
<td>SS.912.W.1.5</td>
<td>Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).</td>
</tr>
<tr>
<td>SS.912.W.1.6</td>
<td>Evaluate the role of history in shaping identity and character.</td>
</tr>
<tr>
<td>SS.912.W.8.8</td>
<td>Describe the rise and goals of nationalist leaders in the post-war era and the impact of their rule on their societies.</td>
</tr>
<tr>
<td>SS.912.W.8.9</td>
<td>Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.</td>
</tr>
<tr>
<td>SS.912.W.8.10</td>
<td>Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.</td>
</tr>
<tr>
<td>SS.912.W.9.1</td>
<td>Describe the causes and effects of twentieth century nationalist conflicts.</td>
</tr>
<tr>
<td>SS.912.W.9.2</td>
<td>Describe the impact of religious fundamentalism in the last half of the 20th century, and identify related events and forces in the Middle East over the last several decades.</td>

<tr>
<td>SS.912.W.9.6</td>
<td>Analyze the rise of regional trade blocs such as the European Union and NAFTA, and predict the impact of increased globalization in the 20th and 21st centuries.</td>
</tr>
<tr>
<td>SS.912.W.9.7</td>
<td>Describe the impact of and global response to international terrorism.</td>
</tr>
</tbody>
</table>

Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
### MA.K12.MTR.3.1:
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**Clarifications:**
Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

### MA.K12.MTR.4.1:
- Use patterns and structure to help understand and connect mathematical concepts.

**Clarifications:**
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

### MA.K12.MTR.5.1:
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.

### MA.K12.MTR.6.1:
- Assess the reasonableness of solutions.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students’ ability to verify solutions through justifications.

### MA.K12.MTR.7.1:
- Apply mathematics to real-world contexts.

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

### Cite evidence to explain and justify reasoning.

**Clarifications:**
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

**ELA.K12.EE.2.1:**

**Clarifications:**

Read and comprehend grade-level complex texts proficiently.

**ELA.K12.EE.3.1:**

**Clarifications:**

Make inferences to support comprehension.

**ELA.K12.EE.4.1:**

**Clarifications:**

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**ELA.K12.EE.5.1:**

**Clarifications:**

Use the accepted rules governing a specific format to create quality work.

**ELA.K12.EE.6.1:**

**Clarifications:**

Use appropriate voice and tone when speaking or writing.

**ELD.K12.ELL.SS.1:**

English language learners communicate information, ideas and concepts for social and instructional purposes within the school setting.

**ELD.K12.ELL.SI.1:**

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

**HE.912.C.2.4:**

**Clarifications:**

Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

---

**General Course Information and Notes**

**GENERAL NOTES**

**Global Studies** - The grade 9-12 Global Studies course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content emphasis for this course pertains to the study of the commonalities and differences among the peoples and cultures of the world and the complex nature of individual, group and national interactions in today's world. Content should include, but is not limited to, global interdependence and challenges, culture, international systems and policies, pluralism, transnationalism, and cultural diffusion, global economics, and human-environment interactions.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit [https://www.cpalms.org/Standards/BEST_Standards.aspx](https://www.cpalms.org/Standards/BEST_Standards.aspx) and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard
should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

**General Information**

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAFS.910.RH.2.4</td>
<td>Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.</td>
</tr>
<tr>
<td>LAFS.910.RH.3.7</td>
<td>Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.</td>
</tr>
<tr>
<td>LAFS.910.RH.3.8</td>
<td>Assess the extent to which the reasoning and evidence in a text support the author's claims.</td>
</tr>
<tr>
<td>LAFS.910.RH.3.9</td>
<td>Compare and contrast treatments of the same topic in several primary and secondary sources.</td>
</tr>
<tr>
<td>LAFS.910.SL.1.1</td>
<td>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</td>
</tr>
<tr>
<td></td>
<td>a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</td>
</tr>
<tr>
<td></td>
<td>b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.</td>
</tr>
<tr>
<td></td>
<td>c. Propose conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</td>
</tr>
<tr>
<td></td>
<td>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</td>
</tr>
<tr>
<td>LAFS.910.SL.1.2</td>
<td>Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.</td>
</tr>
<tr>
<td>LAFS.910.SL.1.3</td>
<td>Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.</td>
</tr>
<tr>
<td>LAFS.910.SL.2.4</td>
<td>Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.</td>
</tr>
<tr>
<td></td>
<td>a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.</td>
</tr>
<tr>
<td></td>
<td>b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.</td>
</tr>
<tr>
<td></td>
<td>c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts.</td>
</tr>
<tr>
<td></td>
<td>d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers.</td>
</tr>
<tr>
<td></td>
<td>e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.</td>
</tr>
<tr>
<td></td>
<td>f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).</td>
</tr>
<tr>
<td>LAFS.910.WHST.1.2</td>
<td>Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.</td>
</tr>
<tr>
<td>LAFS.910.WHST.2.5</td>
<td>Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.</td>
</tr>
<tr>
<td>LAFS.910.WHST.3.8</td>
<td>Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.</td>
</tr>
<tr>
<td>LAFS.910.WHST.3.9</td>
<td>Draw evidence from informational texts to support analysis, reflection, and research.</td>
</tr>
<tr>
<td>MAFS.912.S-IC.2.3</td>
<td>Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★</td>
</tr>
<tr>

<tr>
<td></td>
<td>In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</td>
</tr>
<tr>
<td></td>
<td>Standard Relation to Course: Supporting</td>
</tr>
</tbody>
</table>

Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation)
Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.

Evaluate the importance of political participation and civic participation.

SS.912.A.1.5:
Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.

SS.912.A.1.7:
Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.

SS.912.C.2.2:
Evaluate the importance of political participation and civic participation.

SS.912.C.2.3:
Experience the responsibilities of citizens at the local, state, or federal levels.

SS.912.C.2.5:
Conduct a service project to further the public good.

SS.912.C.2.5:
Analyze the impact of citizen participation as a means of achieving political and social change.
### General Course Information and Notes

**GENERAL NOTES**

**Voluntary School/Community Service** - The grade Voluntary School/Community Service course consists of the following content area strands: World History, American History, Geography, Humanities, Economics, and Civics and Government. The primary content emphasis for this course pertains to the concept of service to society and the engagement in activities that benefit communities. Content should include, but is not limited to, the identification of school or community challenges and needs, options for responding to identified needs, and the development and implementation of a personal plan for providing school or community service.

**Mathematics Benchmark Guidance** - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

**Special Note:** To receive credit for this course, documentation of at least 75 hours of school or community service must be provided.

**Literacy Standards in Social Studies**

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. <tr>
<td><strong>Clarifications:</strong></td>
<td>• Build understanding through modeling and using manipulatives.</td>
</tr>
<tr>
<td></td>
<td>• Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</td>
</tr>
</tbody>
</table>
Progress from modeling problems with objects and drawings to using algorithms and equations.
Express connections between concepts and representations.
Choose a representation based on the given context or purpose.

**Clarifications:**
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**Clarifications:**
Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clarifications:**
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
### MA.K12.MTR.7.1:
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

**Clariﬁcations:**
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

**Clariﬁcations:**
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

**Clariﬁcations:**
See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

**Clariﬁcations:**
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clariﬁcations:**
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think ________ because _______. ” The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills.
Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

Use the accepted rules governing a specific format to create quality work.

**Clariﬁcations:**
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

Use appropriate voice and tone when speaking or writing.

**Clariﬁcations:**
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

English language learners communicate for social and instructional purposes within the school setting.

**Clariﬁcations:**
Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

- Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

---

### General Course Information and Notes

**GENERAL NOTES**

**Voluntary School/Community Service** - The grade Voluntary School/Community Service course consists of the following content area strands: World History, American History, Geography, Humanities, Economics, and Civics and Government. The primary content emphasis for this course pertains to the concept of service to society and the engagement in activities that benefit communities. Content should include, but is not limited to, the identification of school or community challenges and needs, options for responding to identified needs, and the development and implementation of a personal plan for providing school or community service.

**Special Note:** To receive credit for this course, documentation of at least 75 hours of school or community service must be provided.
Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida’s B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

### GENERAL INFORMATION

**Course Number:** 2104330

**Course Path:** Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Interdisciplinary and Applied Social Studies >

**Abbreviated Title:** VOL SCH/COMMU SERV

**Number of Credits:** Half credit (.5)

**Course Type:** Elective Course

**Course Length:** Semester (S)

**Grade Level(s):** 9,10,11,12

**Course Status:** State Board Approved

**Course Level:** 2

**Educator Certifications**

**History (Grades 6-12)**

**Sociology (Grades 6-12)**

**Political Science (Grades 6-12)**

**Social Science (Grades 6-12)**
## Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>SS.912.A.1.5:</strong></td>
<td>Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</td>
</tr>
<tr>
<td><strong>Clariﬁcations:</strong></td>
<td>Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida’s research process model accessible at: <a href="http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf">http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf</a></td>
</tr>
<tr>
<td><strong>SS.912.A.1.7:</strong></td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td><strong>SS.912.CG.2.2:</strong></td>
<td>Explain the importance of political and civic participation to the success of the United States’ constitutional republic.</td>
</tr>
<tr>
<td></td>
<td>• Students will discuss various ways in which U.S. citizens can exercise political and civic participation.</td>
</tr>
<tr>
<td></td>
<td>• Students will identify historical examples of political and civic participation (e.g., Civil Rights Movement, Women’s Suffrage Movement).</td>
</tr>
<tr>
<td></td>
<td>• Students will describe the ways in which individuals can be denied and limited in their right to practice political and civic participation (e.g., losing voting rights for felony conviction, limitations on political contributions, limits on the type of protesting).</td>
</tr>
<tr>
<td><strong>SS.912.CG.2.3:</strong></td>
<td>Explain the responsibilities of citizens at the local, state and national levels.</td>
</tr>
<tr>
<td></td>
<td>• Students will identify various responsibilities held by citizens (e.g., voting, volunteering and being informed, respecting laws).</td>
</tr>
<tr>
<td></td>
<td>• Students will understand the process of registering or preregistering to vote and how to complete a ballot in Florida (e.g., uniform primary and general election ballot).</td>
</tr>
<tr>
<td></td>
<td>• Students will discuss appropriate methods of communication with public officials (e.g., corresponding, attending public meetings, requesting a meeting and providing information).</td>
</tr>
<tr>
<td></td>
<td>• Students will participate in classroom activities that simulate exercising the responsibilities of citizenship.</td>
</tr>
<tr>
<td><strong>SS.912.CG.2.7:</strong></td>
<td>Analyze the impact of civic engagement as a means of preserving or reforming institutions.</td>
</tr>
<tr>
<td></td>
<td>• Students will identify legal methods that citizens can use to promote social and political change (e.g., voting, peaceful protests, petitioning, demonstrations, contacting government offices).</td>
</tr>
<tr>
<td></td>
<td>• Students will identify historical examples of citizens achieving or preventing political and social change through civic engagement (e.g., the Abolitionist Movement).</td>
</tr>
<tr>
<td><strong>SS.912.CG.2.12:</strong></td>
<td>Explain how interest groups, the media and public opinion influence local, state and national decision-making related to public issues.</td>
</tr>
<tr>
<td></td>
<td>• Students will objectively discuss current public issues in Florida and use both the U.S. and Florida Constitutions to justify pro and con positions.</td>
</tr>
<tr>
<td></td>
<td>• Students will examine the relationship and responsibilities of both the state and national governments regarding these public issues.</td>
</tr>
<tr>
<td></td>
<td>• Students will analyze public policy solutions related to local, state and national issues.</td>
</tr>
<tr>
<td><strong>SS.912.CG.3.15:</strong></td>
<td>Explain how citizens are affected by the local, state and national governments.</td>
</tr>
<tr>
<td></td>
<td>• Students will identify local government officials and employees who affect the daily lives of citizens.</td>
</tr>
<tr>
<td></td>
<td>• Students will identify the role of state governmental officials and employees who affect the daily lives of citizens.</td>
</tr>
<tr>
<td></td>
<td>• Students will identify the role of national governmental officials and employees who affect the daily lives of citizens.</td>
</tr>
<tr>
<td></td>
<td>• Students will explain how government at all levels impacts the daily lives of citizens.</td>
</tr>
<tr>
<td><strong>SS.912.E.2.2:</strong></td>
<td>Use a decision-making model to analyze a public policy issue affecting the student’s community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.</td>
</tr>
<tr>
<td><strong>Clariﬁcations:</strong></td>
<td>Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</td>
</tr>
<tr>
<td><strong>SS.912.W.1.3:</strong></td>
<td>Interpret and evaluate primary and secondary sources.</td>
</tr>
<tr>
<td></td>
<td><strong>Clariﬁcations:</strong></td>
</tr>
<tr>
<td><strong>MA.K12.MTR.1.1:</strong></td>
<td>Mathematicians who participate in effortful learning both individually and with others:</td>
</tr>
<tr>
<td></td>
<td>• Analyze the problem in a way that makes sense given the task.</td>
</tr>
<tr>
<td></td>
<td>• Ask questions that will help with solving the task.</td>
</tr>
<tr>
<td></td>
<td>• Build perseverance by modifying methods as needed while solving a challenging task.</td>
</tr>
<tr>
<td></td>
<td>• Stay engaged and maintain a positive mindset when working to solve tasks.</td>
</tr>
<tr>
<td></td>
<td>• Help and support each other when attempting a new method or approach.</td>
</tr>
<tr>
<td><strong>MA.K12.MTR.1.1:</strong></td>
<td>Teachers who encourage students to participate actively in effortful learning both individually and with others:</td>
</tr>
<tr>
<td></td>
<td>• Cultivate a community of growth mindset learners.</td>
</tr>
<tr>
<td></td>
<td>• Foster perseverance in students by choosing tasks that are challenging.</td>
</tr>
<tr>
<td></td>
<td>• Develop students’ ability to analyze and problem solve.</td>
</tr>
</tbody>
</table>
MA.K12.MTR.2.1: Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students’ ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students’ ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

**ELA.K12.EE.1.1:**

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

**Clarifications:**
- K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
- 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
- 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
- 6-8 Students continue with previous skills and use a style guide to create a proper citation.
- 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

**ELA.K12.EE.2.1:**

**Clarifications:**
See Text Complexity for grade-level complexity bands and a text complexity rubric.

Read and comprehend grade-level complex texts proficiently.

**ELA.K12.EE.3.1:**

**Clarifications:**
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

**ELA.K12.EE.4.1:**

**Clarifications:**
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think ______ because ______." The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

**ELA.K12.EE.5.1:**

**Clarifications:**
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information in doing work quality.

Use the accepted rules governing a specific format to create quality work.

**ELA.K12.EE.6.1:**

**Clarifications:**
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

Use appropriate voice and tone when speaking or writing.

**ELD.K12.ELL.SI.1:**

**Clarifications:**
English language learners communicate for social and instructional purposes within the school setting.

**ELD.K12.ELL.SS.1:**

**Clarifications:**
English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

**HE.912.C.2.4:**

**Clarifications:**
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

| SS.912.A.3.5: | Identify significant inventors of the Industrial Revolution including African Americans and women.  
**Clarifications:** Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.4.8: | Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.  
**Clarifications:** This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.4.9: | Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.  
**Clarifications:** This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.5.7: | Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women.  
**Clarifications:** This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.5.9: | Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.  
**Clarifications:** Examples may include, but are not limited to, 100 Percent Americanism.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.5.10: | Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities.  
**Clarifications:** This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.7.3: | Examine the changing status of women in the United States from post-World War II to present.  
**Clarifications:** Examples may include, but are not limited to, increased numbers of women in the workforce, Civil Rights Act of 1964, The Feminine Mystique, National Organization for Women, Roe v. Wade, Equal Rights Amendment, Title IX, Betty Freidan, Gloria Steinem, Phyllis Schlafly, Billie Jean King, feminism.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.7.5: | Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.  
**Clarifications:** Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.7.9: | Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.  
**Clarifications:** Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-
**SS.912.A.7.11:** Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.

**Clarifications:**
Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.

**SS.912.A.7.12:** This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

**SS.912.A.7.13:** Describe the orders of medieval social hierarchy, the changing role of the Church, the emergence of feudalism, and the development of private property as a distinguishing feature of Western Civilization.

**SS.912.A.7.14:** Identify key figures, artistic, and intellectual achievements of the medieval period in Western Europe.

**SS.912.C.4.1:** Explain how the world's nations are governed differently.

**SS.912.C.4.2:** Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.

**SS.912.C.4.3:** Assess human rights policies of the United States and other countries.

**SS.912.G.1.1:** Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.

**SS.912.G.1.2:** Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

**SS.912.G.1.3:** Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.

**SS.912.G.1.4:** Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

**Clarifications:**
Examples are thematic, contour, and dot-density.

**SS.912.G.2.1:** Identify the physical characteristics and the human characteristics that define and differentiate regions.

**Clarifications:**
Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.

**SS.912.G.2.2:** Describe the factors and processes that contribute to the differences between developing and developed regions of the world.

**SS.912.G.2.3:** Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.

**Clarifications:**
Examples are desertification, global warming, cataclysmic natural disasters.

**SS.912.G.4.1:** Interpret population growth and other demographic data for any given place.

**SS.912.G.4.2:** Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.

**SS.912.G.4.3:** Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.

**SS.912.G.4.4:** Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.

**SS.912.G.4.9:** Use political maps to describe the change in boundaries and governments within continents over time.

**SS.912.H.1.4:** Explain philosophical beliefs as they relate to works in the arts.

**SS.912.H.3.1:** Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.

**SS.912.W.1.1:** Use timelines to establish cause and effect relationships of historical events.

**SS.912.W.1.2:** Compare time measurement systems used by different cultures.

**Clarifications:**
Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.

**SS.912.W.1.3:** Interpret and evaluate primary and secondary sources.

**Clarifications:**
Examples are artifacts, images, auditory and written sources.

**SS.912.W.1.4:** Explain how historians use historical inquiry and other sciences to understand the past.

**Clarifications:**
Examples are archaeology, economics, geography, forensic chemistry, political science, physics.

**SS.912.W.1.5:** Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).

**Clarifications:**
Examples are ethnic, cultural, personal, national, religious.

**SS.912.W.2.10:** Describe the orders of medieval social hierarchy, the changing role of the Church, the emergence of feudalism, and the development of private property as a distinguishing feature of Western Civilization.

**SS.912.W.2.13:** Explain how Western civilization arose from a synthesis of classical Greco-Roman civilization, Judeo-Christian influence, and the cultures of northern European peoples promoting a cultural unity in Europe.

**Clarifications:**
Examples are Anselm of Canterbury, Chaucer, Thomas Aquinas, Roger Bacon, Hildegard of Bingen, Dante, Code of Chivalry, Gothic architecture, illumination, universities, Natural Law Philosophy, Scholasticism.

**SS.912.W.2.17:** Examples are Anselm of Canterbury, Chaucer, Thomas Aquinas, Roger Bacon, Hildegard of Bingen, Dante, Code of Chivalry, Gothic architecture, illumination, universities, Natural Law Philosophy, Scholasticism.

**SS.912.W.3.2:** Compare the major beliefs and principles of Judaism, Christianity, and Islam.

**SS.912.W.3.13:** Compare economic, political, and social developments in East, West, and South Africa.
| SS.912.W.3.17: | Describe the roles of people in the Maya, Inca, and Aztec societies. |
| Clarifications: | Examples are class structure, family life, warfare, religious beliefs and practices, slavery. |
| SS.912.W.3.18: | Compare the key economic, cultural, and political characteristics of the major civilizations of Meso and South America. |
| Clarifications: | Examples are agriculture, architecture, astronomy, literature, mathematics, trade networks, government. |
| SS.912.W.4.3: | Identify the major artistic, literary, and technological contributions of individuals during the Renaissance. |
| SS.912.W.4.14: | Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas. |
| SS.912.W.4.15: | Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas. |
| SS.912.W.6.4: | Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America. |
| Clarifications: | Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws. |
| SS.912.W.9.4: | Describe the causes and effects of twentieth century nationalist conflicts. |
| Clarifications: | Examples are Cyprus, Kashmir, Tibet, Northern Ireland. |
| SS.912.W.9.5: | Assess the social and economic impact of pandemics on a global scale, particularly within the developing and under-developed world. |
| LAFS.910.RH.1.1: | Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information. |
| LAFS.910.RH.1.2: | Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text. |
| LAFS.910.RH.1.3: | Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them. |
| LAFS.910.RH.2.4: | Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science. |
| LAFS.910.RH.2.5: | Analyze how a text uses structure to emphasize key points or advance an explanation or analysis. |
| LAFS.910.RH.2.6: | Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts. |
| LAFS.910.RH.3.7: | Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text. |
| LAFS.910.RH.3.8: | Assess the extent to which the reasoning and evidence in a text support the author's claims. |
| LAFS.910.RH.3.9: | Compare and contrast treatments of the same topic in several primary and secondary sources. |
| LAFS.910.RH.4.10: | By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently. |
| LAFS.910.SL.1.1: | Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. |
| a. | Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. |
| b. | Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. |
| c. | Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. |
| d. | Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented. |
| LAFS.910.SL.1.2: | Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source. |
| LAFS.910.SL.1.3: | Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence. |
| LAFS.910.SL.2.4: | Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task. |
| LAFS.910.WHST.1.1: | Write arguments focused on discipline-specific content. |
| a. | Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence. |
| b. | Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns. |
| c. | Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. |
| d. | Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. |
| e. | Provide a concluding statement or section that follows from or supports the argument presented. |
| LAFS.910.WHST.1.2: | Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. |
| a. | Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. |
| b. | Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. |
| c. | Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts. |
d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers.

e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).

LAFS.910.WHST.2.4: Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

LAFS.910.WHST.2.5: Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

LAFS.910.WHST.2.6: Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology’s capacity to link to other information and to display information flexibly and dynamically.

LAFS.910.WHST.3.7: Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

LAFS.910.WHST.3.8: Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.

LAFS.910.WHST.3.9: Draw evidence from informational texts to support analysis, reflection, and research.

LAFS.910.WHST.4.10: Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

MAFS.912.S-ID.1.4: Use appropriate tools strategically.

MAFS.912.S-ID.1.2: Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each.

MAFS.912.S-IC.2.4: ★ Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling.

MAFS.912.S-IC.2.5: ★ Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant.

MAFS.912.S-IC.2.6: ★ Evaluate reports based on data.

MAFS.912.S-ID.1.1: ★ Represent data with plots on the real number line (dot plots, histograms, and box plots).

Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

Standard Relation to Course: Supporting

MAFS.912.S-ID.1.2: ★ Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.

Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

Standard Relation to Course: Supporting

MAFS.912.S-ID.1.3: ★ Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers).

Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

Standard Relation to Course: Supporting

MAFS.912.S-ID.1.4: ★ Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve.

Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

Standard Relation to Course: Supporting

MAFS.K12.MP.1.1: Make sense of problems and persevere in solving them.

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

MAFS.K12.MP.3.1: Construct viable arguments and critique the reasoning of others.

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

Use appropriate tools strategically.
Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

### GENERAL NOTES

**Women’s Studies** - The grade 9-12 Women's Studies course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the historical development of women in various cultures, the role of women in shaping history, and of contemporary issues that impact the lives of women.

**Mathematics Benchmark Guidance** - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Literacy Standards in Social Studies**

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://palmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

### GENERAL INFORMATION

**Course Number:** 2104340

**Course Path:** Section: Grades PreK to 12 Education
Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Interdisciplinary and Applied Social Studies >

**Abbreviated Title:** WOMEN’S STUDIES

**Number of Credits:** Half credit (.5)

**Course Length:** Semester (S)
### Educator Certifications

- History (Grades 6-12)
- Sociology (Grades 6-12)
- Political Science (Grades 6-12)
- Social Science (Grades 6-12)
## Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>

</thead>
</table>
| SS.912.A.3.5 | Identify significant inventors of the Industrial Revolution including African Americans and women.  
**Clarifications:** Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.4.8 | Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.  
**Clarifications:** Examples may include, but are not limited to, 100 Percent Americanism, 100 Percent America, 100 Percent American, 100 Percent America, 100 Percent America, 100 Percent Americanism.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.4.9 | Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.  
**Clarifications:** Examples may include, but are not limited to, increased numbers of women in the workforce, Civil Rights Act of 1964, Equal Rights Amendment, Title IX, Betty Freidan, Gloria Steinem, Phyllis Schlafly, Billie Jean King, 100 Percent America, 100 Percent Americanism, 100 Percent Americanism, 100 Percent Americanism.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.5.7 | Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women.  
**Clarifications:** Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 39-41. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.5.9 | Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.  
**Clarifications:** Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 39-41. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.5.10 | Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities.  
**Clarifications:** Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 39-41. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.7.3 | Examine the changing status of women in the United States from post-World War II to present.  
**Clarifications:** Examples may include, but are not limited to, increased numbers of women in the workforce, Civil Rights Act of 1964, The Feminine Mystique, National Organization for Women, Roe v. Wade, Equal Rights Amendment, Title IX, Betty Freidan, Gloria Steinem, Phyllis Schlafly, Billie Jean King, feminism.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.7.5 | Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.  
**Clarifications:** Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.7.9 | Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.  
**Clarifications:** Examples may include, but aren't limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-
### SS.912.A.7.11:
**Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.**

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated, view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

**Clariﬁcations:**
Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.

### SS.912.A.7.12:
**Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.**

**Clariﬁcations:**
Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.

### SS.912.A.7.13:
**Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.**

**Clariﬁcations:**
Examples are classical architecture, protest music, Native American dance, Japanese Noh.

### SS.912.A.7.14:
Use timelines to establish cause and effect relationships of historical events.

**Clariﬁcations:**
Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.

### SS.912.A.7.15:
**Evaluate the role of history in shaping identity and character.**

**Clariﬁcations:**
Examples are ethnic, cultural, personal, national, religious.

### SS.912.A.7.16:
Describe the origins of medieval social hierarchy, the changing role of the Church, the emergence of feudalism, and the development of private property as a distinguishing feature of Western Civilization.

**Clariﬁcations:**
Examples are Anselm of Canterbury, Chaucer, Thomas Aquinas, Roger Bacon, Hildegard of Bingen, Dante, Code of Chivalry, Gothic architecture, Illumination, universities, Natural Law Philosophy, Scholasticism.

### SS.912.A.7.17:
**Identify key ﬁgures, artistic, and intellectual achievements of the medieval period in Western Civilization.**

**Clariﬁcations:**
Examples are Anselm of Canterbury, Chaucer, Thomas Aquinas, Roger Bacon, Hildegard of Bingen, Dante, Code of Chivalry, Gothic architecture, Illumination, universities, Natural Law Philosophy, Scholasticism.
Recognize the practice of slavery and other forms of forced labor.

Assess the social and economic impact of pandemics on a global scale.

Identify the major artistic, literary, and technological contributions of individuals during the Renaissance.

Describe the roles of people in the Maya, Inca, and Aztec societies.

Examples are class structure, family life, warfare, religious beliefs and practices, slavery.

Compare the key economic, cultural, and political characteristics of the major civilizations of Meso and South America.

Examples are agriculture, architecture, astronomy, literature, mathematics, trade networks, government.

Identify the major artistic, literary, and technological contributions of individuals during the Renaissance.

Describe the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.

Examples are the efficiency of a method to those expressed by others.

Compare the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.

Examples are Cyprus, Kashmir, Tibet, Northern Ireland.

Compare the causes and effects of twentieth century nationalist conflicts.

Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women’s rights, labor laws.

Describe the causes and effects of twentieth century nationalist conflicts.

Examples are class structure, family life, warfare, religious beliefs and practices, slavery.

Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.

Examples are agriculture, architecture, astronomy, literature, mathematics, trade networks, government.

Describe the roles of people in the Maya, Inca, and Aztec societies.

Examples are class structure, family life, warfare, religious beliefs and practices, slavery.

Provide feedback to improve efficiency when performing calculations.

Identify the major artistic, literary, and technological contributions of individuals during the Renaissance.

Examples are Petrarch, Brunelleschi, Giotto, the Medici Family, Michelangelo, Leonardo da Vinci, Erasmus, Thomas More, Machiavelli, Shakespeare, Gutenberg, El Greco, Artemisia Gentileschi, Van Eyck.

Recognize the major artistic, literary, and technological contributions of individuals during the Renaissance.

Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.

Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.

Describe the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.

Examples are Cyprus, Kashmir, Tibet, Northern Ireland.

Describe the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.

Examples are the efficiency of a method to those expressed by others.

Compare the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.

Examples are Cyprus, Kashmir, Tibet, Northern Ireland.

Compare the causes and effects of twentieth century nationalist conflicts.

Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women’s rights, labor laws.

Describe the causes and effects of twentieth century nationalist conflicts.

Examples are class structure, family life, warfare, religious beliefs and practices, slavery.

Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.

Examples are agriculture, architecture, astronomy, literature, mathematics, trade networks, government.

Describe the roles of people in the Maya, Inca, and Aztec societies.

Examples are class structure, family life, warfare, religious beliefs and practices, slavery.

Provide feedback to improve efficiency when performing calculations.
### MA.K12.MTR.4.1:
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

<table>
<thead>
<tr>
<th>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.</td>
</tr>
<tr>
<td>- Create opportunities for students to discuss their thinking with peers.</td>
</tr>
<tr>
<td>- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.</td>
</tr>
<tr>
<td>- Develop students’ ability to justify methods and compare their responses to the responses of their peers.</td>
</tr>
</tbody>
</table>

### MA.K12.MTR.5.1:
Use patterns and structure to help understand and connect mathematical concepts.

<table>
<thead>
<tr>
<th>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Focus on relevant details within a problem.</td>
</tr>
<tr>
<td>- Create plans and procedures to logically order events, steps or ideas to solve problems.</td>
</tr>
<tr>
<td>- Decompose a complex problem into manageable parts.</td>
</tr>
<tr>
<td>- Relate previously learned concepts to new concepts.</td>
</tr>
<tr>
<td>- Look for similarities among problems.</td>
</tr>
<tr>
<td>- Connect solutions of problems to more complicated large-scale situations.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>

### ELA.K12.EE.1.1:
Cite evidence to explain and justify reasoning.

### ELA.K12.EE.2.1:
Read and comprehend grade-level complex texts proficiently.

| Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric. |

### ELA.K12.EE.3.1:
Make inferences to support comprehension.

| Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the...
General Course Information and Notes

### GENERAL NOTES

**Women's Studies** - The grade 9-12 Women's Studies course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the historical development of women in various cultures, the role of women in shaping history, and of contemporary issues that impact the lives of women.

**Institutional Practices**

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit [https://www.cpalms.org/Standards/BEST_Standards.aspx](https://www.cpalms.org/Standards/BEST_Standards.aspx) and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

</tbody>
</table>
Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.

**Clarifications:**
Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.

---

SS.912.A.7.12:

Analyze how liberty and economic freedom generate broad-based opportunity and prosperity in the United States.

**Clarifications:**
- Students will differentiate between government systems (e.g., autocracy, democracy, monarchy, oligarchy, theocracy).
- Students will differentiate between economic systems (e.g., capitalism, communism, mixed market, socialism).
- Students will analyze the disadvantages of authoritarian control over the economy (e.g., communism and socialism) in generating broad-based economic prosperity for their population.

---

SS.912.G.4.1:

Explain how the United States uses foreign policy to influence other nations.

**Clarifications:**
- Students will explain how the policies of other nations influence U.S. policy and society.
- Students will identify agencies of the U.S. government that contribute to its foreign policy agenda (e.g., National Security Agency, Central Intelligence Agency).
- Students will explain the advantages and disadvantages of how nongovernmental organizations (NGOs) influence foreign policy (e.g., United States Agency for International Development, Red Cross, American Woman Suffrage Association, Amnesty International).
- Students will explain how U.S. trade policy influences its relationships with other nations (e.g., China, Saudi Arabia).
- Students will explain how the use of embargos and economic sanctions by the United States has affected other nations (e.g., Cuba, Iran, Syria).
- Students will explain the U.S. response to international conflicts.

---

SS.912.G.5.1:

Identify the physical characteristics and the human characteristics that define and differentiate regions.

**Clarifications:**
- Examples of physical characteristics are climate, terrain, resources.
- Examples of human characteristics are religion, government, economy, demography.

---

SS.912.G.6.2:

Describe the factors and processes that contribute to the differences between developing and developed regions of the world.

**Clarifications:**
Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.

---

SS.912.G.7.4:

Explain how the United States supports democratic principles and protects human rights around the world.

**Clarifications:**
- Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.

---

SS.912.H.1.4:

Explain philosophical beliefs as they relate to works in the arts.

**Clarifications:**
Examples are classical architecture, protest music, Native American dance, Japanese Noh.

---

SS.912.H.3.1:

Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.

**Clarifications:**
Use timelines to establish cause and effect relationships of historical events.

---

SS.912.W.1.1:

Compare time measurement systems used by different cultures.

**Clarifications:**
Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.

---

SS.912.W.1.2:

Interpret and evaluate primary and secondary sources.

**Clarifications:**
Examples are artifacts, images, auditory and written sources.

---

SS.912.W.1.3:

Explain how historians use historical inquiry and other sciences to understand the past.

**Clarifications:**
Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
**SS.912.W.1.5:** Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).

**Clarifications:**
- Evaluate the role of history in shaping identity and character.

**SS.912.W.1.6:** Describe the orders of medieval social hierarchy, the changing role of the Church, the emergence of feudalism, and the development of private property as a distinguishing feature of Western Civilization.

**Clarifications:**
- Examples are class structure, family life, warfare, religious beliefs and practices, slavery.

**SS.912.W.2.10:** Explain how Western civilization arose from a synthesis of classical Greco-Roman civilization, Judeo-Christian influence, the cultures of northern European peoples promoting a cultural unity in Europe.

**Clarifications:**
- Examples are Petrarch, Brunelleschi, Giotto, the Medici Family, Michelangelo, Leonardo da Vinci, Erasmus, Thomas More, Machiavelli, Shakespeare, Gutenberg, El Greco, Artemisia Gentileschi, Van Eyck.

**SS.912.W.2.17:** Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).

**Clarifications:**
- Evaluate the role of history in shaping identity and character.

**SS.912.W.2.18:** Discuss the causes and effects of twentieth century nationalist conflicts.

**Clarifications:**
- Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.

**SS.912.W.3.2:** Compare the major beliefs and principles of Judaism, Christianity, and Islam.

**Clarifications:**
- Examples are agricultural, architecture, astronomy, literature, mathematics, trade networks, government.

**SS.912.W.3.13:** Compare economic, political, and social developments in East, West, and South Africa.

**Clarifications:**
- Examples are class structure, family life, warfare, religious beliefs and practices, slavery.

**SS.912.W.3.17:** Describe the roles of people in the Maya, Inca, and Aztec societies.

**Clarifications:**
- Examples are agriculture, architecture, astronomy, literature, mathematics, trade networks, government.

**SS.912.W.4.3:** Identify the major artistic, literary, and technological contributions of individuals during the Renaissance.

**Clarifications:**
- Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.

**SS.912.W.4.14:** Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.

**Clarifications:**
- Examples are agriculture, architecture, astronomy, literature, mathematics, trade networks, government.

**SS.912.W.4.15:** Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.

**Clarifications:**
- Examples are agricultural, architecture, astronomy, literature, mathematics, trade networks, government.

**SS.912.W.6.4:** Describe the major artistic, literary, and technological contributions of individuals during the Renaissance.

**Clarifications:**
- Examples are class structure, family life, warfare, religious beliefs and practices, slavery.

**SS.912.W.9.4:** Identify the major artistic, literary, and technological contributions of individuals during the Renaissance.

**Clarifications:**
- Examples are agriculture, architecture, astronomy, literature, mathematics, trade networks, government.

**SS.912.W.9.5:** Assess the social and economic impact of pandemics on a global scale, particularly within the developing and under-developed world.

**Clarifications:**
- Examples are agricultural, architecture, astronomy, literature, mathematics, trade networks, government.

**MA.K12.MTR.1.1:** Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

**Clarifications:**
- Teachers who encourage students to participate actively in effortful learning both individually and with others:
  - Cultivate a community of growth mindset learners.
  - Foster perseverance in students by choosing tasks that are challenging.
  - Develop students' ability to analyze and problem solve.
  - Recognize students' effort when solving challenging problems.

**MA.K12.MTR.2.1:** Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

**Clarifications:**
- Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
  - Help students make connections between concepts and representations.
  - Provide opportunities for students to use manipulatives when investigating concepts.
  - Guide students from concrete to pictorial to abstract representations as understanding progresses.
  - Show students that various representations can have different purposes and can be useful in different situations.

**Complete tasks with mathematical fluency:**
- Mathematicians who complete tasks with mathematical fluency:
  - Select efficient and appropriate methods for solving problems within the given context.
  - Maintain flexibility and accuracy while performing procedures and mental calculations.
  - Complete tasks accurately and with confidence.
### MA.K12.MTR.3.1:
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**Clarifications:**
- Teachers who encourage students to complete tasks with mathematical fluency:
  - Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
  - Offer multiple opportunities for students to practice efficient and generalizable methods.
  - Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

### MA.K12.MTR.4.1:
- Engage in discussions that reflect on the mathematical thinking of self and others.
- Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
  - Communicate mathematical ideas, vocabulary, and methods effectively.
  - Analyze the mathematical thinking of others.
  - Compare the efficiency of a method to those expressed by others.
  - Recognize errors and suggest how to correctly solve the task.
  - Justify results by explaining methods and processes.
  - Construct possible arguments based on evidence.

**Clarifications:**
- Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
  - Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
  - Create opportunities for students to discuss their thinking with peers.
  - Select, sequence, and present student work to advance and deepen understanding of correct and increasingly efficient methods.
  - Develop students' ability to justify methods and compare their responses to the responses of their peers.

### MA.K12.MTR.5.1:
- Use patterns and structure to help understand and connect mathematical concepts.
- Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
  - Focus on relevant details within a problem.
  - Create plans and procedures to logically order events, steps, or ideas to solve problems.
  - Decompose a complex problem into manageable parts.
  - Relate previously learned concepts to new concepts.
  - Look for similarities among problems.
  - Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
- Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
  - Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
  - Support students to develop generalizations based on the similarities found among problems.
  - Provide opportunities for students to create plans and procedures to solve problems.
  - Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

### MA.K12.MTR.6.1:
- Assess the reasonableness of solutions.
- Mathematicians who assess the reasonableness of solutions:
  - Estimate to discover possible solutions.
  - Use benchmark quantities to determine if a solution makes sense.
  - Check calculations when solving problems.
  - Verify possible solutions by explaining the methods used.
  - Evaluate results based on the given context.

**Clarifications:**
- Teachers who encourage students to assess the reasonableness of solutions:
  - Have students estimate or predict solutions prior to solving.
  - Prompt students to continually ask, “Does this solution make sense? How do you know?”
  - Reinforce that students check their work as they progress within and after a task.
  - Strengthen students' ability to verify solutions through justifications.

### MA.K12.MTR.7.1:
- Apply mathematics to real-world contexts.
- Mathematicians who apply mathematics to real-world contexts:
  - Connect mathematical concepts to everyday experiences.
  - Use models and methods to understand, represent and solve problems.
  - Perform investigations to gather data or determine if a method is appropriate.
  - Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**
- Teachers who encourage students to apply mathematics to real-world contexts:
  - Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
  - Challenge students to question the accuracy of their models and methods.
  - Support students as they validate conclusions by comparing them to the given situation.
  - Indicate how various concepts can be applied to other disciplines.

### MA.K12.MTR.8.1:
- Cite evidence to explain and justify reasoning.

**Clarifications:**
- Students should include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
- Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
ELA.K12.EE.1.1: 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1: Read and comprehend grade-level complex texts proficiently.

Clarifications:
See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.3.1: Make inferences to support comprehension.

Clarifications:
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.4.1: Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:
In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _____ because ______.” The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.5.1: Use the accepted rules governing a specific format to create quality work.

Clarifications:
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.6.1: Use appropriate voice and tone when speaking or writing.

Clarifications:
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

ELD.K12.ELL.SS.1: English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

ELD.K12.ELL.SS.1: English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

HE.912.C.2.4: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

Women's Studies - The grade 9-12 Women's Studies course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the historical development of women in various cultures, the role of women in shaping history, and of contemporary issues that impact the lives of women.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and
social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

GENERAL INFORMATION

Course Number: 2104340

Number of Credits: Half credit (.5)
Course Type: Elective Course
Course Status: Draft - Course Pending Approval
Grade Level(s): 9,10,11,12

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Interdisciplinary and Applied Social Studies > Abbreviated Title: WOMEN'S STUDIES
Course Length: Semester (S)
Course Level: 2

Make sense of problems and persevere in solving them.

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

Construct viable arguments and critique the reasoning of others.

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read arguments or explanations, ask useful questions to clarify or improve the arguments.

Use appropriate tools strategically.

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other
mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

**Attend to precision.**

Mathematically proficient students try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

**Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.**

**Clarifications:**
Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf

**Compare how different nongovernmental organizations and progressives worked to shape public policy, restore economic opportunities, and correct injustices in American life.**

**Clarifications:**

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated see the United States History End-of-Course Assessment Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

**Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.**

**Clarifications:**
Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated see the United States History End-of-Course Assessment Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

**Evaluate the importance of political participation and civic participation.**

**Clarifications:**
Examples are school, community, state, national, international.

**Conduct a service project to further the public good.**

**Clarifications:**
Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mocking election.

**Analyze the impact of citizen participation as a means of achieving political and social change.**

**Clarifications:**
Examples are e-mail campaigns, boycotts, blogs, podcasts, protests, demonstrations, letters to editors.

**Monitor current public issues in Florida.**

**Clarifications:**
Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.

**Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.**

**Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing potential consequences, and considering the alternatives.**

**Use geographic terms and tools to analyze case studies of policies and programs for resource use and management.**

**Interpret and evaluate primary and secondary sources.**

**Clarifications:**
Examples are artifacts, images, auditory and written sources.

**Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grades 9–10 reading and content, choosing flexibly from a range of strategies.**

a. Use context (e.g., the overall meaning of a sentence, paragraph, or text; a word's position or function in a sentence) as a clue to the meaning of a word or phrase.

b. Identify and correctly use patterns of word changes that indicate different meanings or parts of speech (e.g., analyze, analysis, analytical; advocate, advocacy).

c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning, its part of speech, or its etymology.

d. Verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).

**Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.**

By the end of grade 9, read and comprehend literary nonfiction in the grades 9–10 text complexity band proficiently, with scaffolding as needed at the high end of the range.
By the end of grade 10, read and comprehend literary nonfiction at the high end of the grades 9-10 text complexity band independently and proficiently.

Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9-10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.

a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.

b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.

c. Propose strategies to reduce or prevent injuries and health problems.

d. Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities.

Evaluating a speaker’s point of view, reasoning, and use of evidence and English language learners communicate information, ideas and concepts clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.

Evaluate a speaker’s point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.

Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.

Identify appropriate methods to resolve physical conflict.

Identify appropriate methods to resolve physical conflict.

Propose strategies to reduce or prevent injuries and health problems.

Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.

Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.

Identify appropriate methods to resolve physical conflict.

Evaluate a speaker’s point of view, reasoning, and use of evidence and English language learners communicate information, ideas and concepts clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.

Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities.

Propose strategies to reduce or prevent injuries and health problems.

Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities.

Interpersonal, financial, emotional factors, and accessibility of health information.

Write routines over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.

Appraise the potential short-term and long-term outcomes of each alternative on self and others.

Examine barriers that can hinder healthy decision making.

Propose strategies to reduce or prevent injuries and health problems.

Mandatory passenger-restraint/helmet laws, refusal skills, mandatory immunizations, healthy relationship skills, and improved inspection of food sources.

English language learners communicate for social and instructional purposes within the school setting.

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

General Course Information and Notes

GENERAL NOTES

This course provides an introduction and opportunities for leadership in the areas of service-learning and civic responsibility. Academic, personal, and career skills needed for effective service-learning project implementation will be taught and applied through structured service projects that meet real school and/or community needs. Students will actively participate in meaningful service-learning experiences of at least 30 hours’ duration.

The content should include, but not be limited to, the following:

1. Students, working individually or in small or large groups, will investigate, quantify, and choose among issues and needs that can be addressed.

2. Students will design and then implement one or more service-learning projects to address identified needs through direct, indirect, advocacy, or research-focused action.

3. Students will conduct reflection activities to measure and record information about the service-learning activities and their impacts.

4. Students will demonstrate KSAs (knowledge, skills, or abilities) gained from projects through project-developed products and public presentations that educate others.
about the needs/issues addressed, activities conducted, impacts measured, and/or how others can also meet needs through service.

All of the above activities may be counted toward the service-learning 30-hour requirement. Activities can range widely and occur within or beyond the school. For more information about service-learning, see the Florida Department of Education Web site at www.fldoe.org/family/learnserve.asp.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Language Arts benchmarks are addressed as students read, write, create documents, and make public presentations about needs and activities to address them. Social Studies benchmarks include analyzing community issues, coming up with solutions, and conducting service projects. Math benchmarks are met as students chart and graph data as part of issue investigation, project design, demonstration, and/or reflection. Health and Physical Education are addressed as projects include discussion and learning related to safety, liability, interpersonal skills, conflict avoidance, appraising outcomes and impacts on others, maintaining appropriate behavior, etc., in the students’ interaction with others.

After successfully completing this course, the student will:

1. Demonstrate an understanding of service-learning, the types of service-learning, and its importance in a participatory democracy.
2. Demonstrate the ability to identify school/community needs and propose solutions that can be implemented through service-learning.
3. Demonstrate the ability to identify and analyze different points of view to gain an understanding of diverse backgrounds and perspectives and their value.
4. Demonstrate the ability to investigate significant needs, plan and implement service-learning projects to address them, evaluate project effectiveness, and present the information to an authentic audience.
5. Demonstrate use of effective self-assessment and reflection strategies (e.g., verbal, written, artistic, and non-verbal activities to demonstrate learning, understanding, and changes in students’ knowledge, skills and/or abilities).
6. Demonstrate effective use of facilitative communication skills (e.g., writing, speaking, listening, questioning, paraphrasing, non-verbal communication, non-judgmental response).

Provide documentation of activities and the minimum 30 hours of participation in one or more approved service-learning project.

Literacy Standards in Social Studies
Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

QUALIFICATIONS
As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

GENERAL INFORMATION

Course Number: 2104350
Course Type: Elective Course
Course Status: Course Approved
Grade Level(s): 9,10,11,12
Number of Credits: Half credit (.5)
Course Path: Section: Grades PreK to 12 Education
Courses > Grade Group: Grades 9 to 12 and Adult
Education Courses > Subject: Social Studies >
SubSubject: Interdisciplinary and Applied Social Studies >
Abbreviated Title: ENG CITIZ SERV LRNG1
Course Length: Semester (S)
Course Level: 2

Any field when certification reflects a bachelor or higher degree.
### Course Standards

| SS.912.C.2.2: | Evaluate the importance of political participation and civic participation.  
Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election. |
| SS.912.C.2.3: | Experience the responsibilities of citizens at the local, state, or federal levels.  
Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election. |
| SS.912.C.2.5: | Conduct a service project to further the public good.  
Clarifications: Examples are school, community, state, national, international. |
| SS.912.C.2.8: | Analyze the impact of citizen participation as a means of achieving political and social change.  
Clarifications: Examples are e-mail campaigns, boycotts, blogs, podcasts, protests, demonstrations, letters to editors. |
| SS.912.C.2.10: | Monitor current public issues in Florida.  
Clarifications: Examples are On-line Sunshine, media, e-mails to government officials, political text messaging. |
| SS.912.C.2.11: | Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.  
Clarifications: Examples are school, community, state, national, international. |
| SS.912.E.2.2: | Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.  
Clarifications: Examples are school, community, state, national, international. |
| SS.912.G.5.5: | Use geographic terms and tools to analyze case studies of policies and programs for resource use and management.  
Clarifications: Examples are school, community, state, national, international. |
| SS.912.W.1.3: | Interprets and evaluates primary and secondary sources.  
Clarifications: Examples are artifacts, images, auditory and written sources. |
| MA.K12.MTR.1.1: | Mathematicians who participate in effortful learning both individually and with others:  
- Analyze the problem in a way that makes sense given the task.  
- Ask questions that will help with solving the task.  
- Build perseverance by modifying methods as needed while solving a challenging task.  
- Stay engaged and maintain a positive mindset when working to solve tasks.  
- Help and support each other when attempting a new method or approach.  
Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:  
- Cultivate a community of growth mindset learners.  
- Foster perseverance in students by choosing tasks that are challenging.  
- Develop students' ability to analyze and problem solve. |
Recognize students’ effort when solving challenging problems.

MA.K12.MTR.2.1: Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

**Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students’ ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students’ ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**Clarifications:** Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
Identify appropriate methods to resolve physical conflict.
Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

Clarifications:
See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

Clarifications:
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _______ because _______." The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

Use the accepted rules governing a specific format to create quality work.

Clarifications:
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

Use appropriate voice and tone when speaking or writing.

Clarifications:
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

Identify appropriate methods to resolve physical conflict.

Clarifications:
Examine barriers that can hinder healthy decision making.

Propose strategies to reduce or prevent injuries and health problems.

Clarifications:
Interpersonal, financial, environmental factors, and accessibility of health information.
General Course Information and Notes

GENERAL NOTES

This course provides an introduction and opportunities for leadership in the areas of service-learning and civic responsibility. Academic, personal, and career skills needed for effective service-learning project implementation will be taught and applied through structured service projects that meet real school and/or community needs. Students will actively participate in meaningful service-learning experiences of at least 30 hours' duration.

The content should include, but not be limited to, the following:

1. Students, working individually or in small or large groups, will investigate, quantify, and choose among issues and needs that can be addressed.
2. Students will design and then implement one or more service-learning projects to address identified needs through direct, indirect, advocacy, or research-focused action. Projects will involve meaningful partnerships.
3. Students will conduct reflection activities to measure and record information about the service-learning activities and their impacts.
4. Students will demonstrate KSAs (knowledge, skills, or abilities) gained from projects through project-developed products and public presentations that educate others about the needs/issues addressed, activities conducted, impacts measured, and/or how others can also meet needs through service.

All of the above activities may count toward the service-learning 30-hour requirement. Activities can range widely and occur within or beyond the school. For more information about service-learning, see the Florida Department of Education Web site at www.fldoe.org/family/learnserve.asp.

Language Arts benchmarks are addressed as students read, write, create documents, and make public presentations about needs and activities to address them. Social Studies benchmarks include analyzing community issues, coming up with solutions, and conducting service projects. Math benchmarks are met as students chart and graph data as part of issue investigation, project design, demonstration, and/or reflection. Health and Physical Education are addressed as projects include discussion and learning related to safety, liability, interpersonal skills, conflict avoidance, appraising outcomes and impacts on others, maintaining appropriate behavior, etc., in the students' interaction with others.

After successfully completing this course, the student will:

1. Demonstrate an understanding of service-learning, the types of service-learning, and its importance in a participatory democracy.
2. Demonstrate the ability to identify school/community needs and propose solutions that can be implemented through service-learning.
3. Demonstrate the ability to identify and analyze different points of view to gain an understanding of diverse backgrounds and perspectives and their value.
4. Demonstrate the ability to investigate significant needs, plan and implement service-learning projects to address them, evaluate project effectiveness, and present the information to an authentic audience.
5. Demonstrate use of effective self-assessment and reflection strategies (e.g., verbal, written, artistic, and non-verbal activities to demonstrate learning, understanding, and changes in students' knowledge, skills and/or abilities).
6. Demonstrate effective use of facilitative communication skills (e.g., writing, speaking, listening, questioning, paraphrasing, non-verbal communication, non-judgmental response).

Provide documentation of activities and the minimum 30 hours of participation in one or more approved service-learning project.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.cors-windows.net/uploads/docs/standards/eld/ss.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

<tr>
<td>Clarifications:</td>
<td>Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: <a href="http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf">http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf</a></td>
</tr>
<tr>
<td>SS.912.A.3.12:</td>
<td>Compare how different nongovernmental organizations and progressives worked to shape public policy, restore economic opportunities, and correct injustices in American life.</td>
</tr>
<tr>
<td>SS.912.A.7.12:</td>
<td>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</td>
</tr>
<tr>
<td>SS.912.CG.2.2:</td>
<td>Explain the importance of political and civic participation to the success of the United States' constitutional republic.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>• Students will discuss various ways in which U.S. citizens can exercise political and civic participation.</td>
</tr>
<tr>
<td></td>
<td>• Students will identify historical examples of political and civic participation (e.g., Civil Rights Movement, Women's Suffrage Movement).</td>
</tr>
<tr>
<td></td>
<td>• Students will describe the ways in which individuals can be denied and limited in their right to practice political and civic participation (e.g., losing voting rights for felony conviction, limitations on political participation, limits on the type of protesting).</td>
</tr>
<tr>
<td>SS.912.CG.2.3:</td>
<td>Explain the responsibilities of citizens at the local, state and national levels.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>• Students will identify various responsibilities held by citizens (e.g., voting, volunteering and being informed, respecting laws).</td>
</tr>
<tr>
<td></td>
<td>• Students will understand the process of registering or preregistering to vote and how to complete a ballot in Florida (e.g., uniform primary and general election ballot).</td>
</tr>
<tr>
<td></td>
<td>• Students will discuss appropriate methods of communication with public officials (e.g., corresponding, attending public meetings, requesting a meeting and providing information).</td>
</tr>
<tr>
<td></td>
<td>• Students will participate in classroom activities that simulate exercising the responsibilities of citizenship.</td>
</tr>
<tr>
<td>SS.912.CG.2.7:</td>
<td>Analyze the impact of civic engagement as a means of preserving or reforming institutions.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>• Students will identify legal methods that citizens can use to promote social and political change (e.g., voting, peaceful protests, petitioning, demonstrations, contacting government offices).</td>
</tr>
<tr>
<td></td>
<td>• Students will identify historical examples of citizens achieving or preventing political and social change through civic engagement (e.g., the Abolitionist Movement).</td>
</tr>
<tr>
<td>SS.912.CG.2.12:</td>
<td>Explain how interest groups, the media and public opinion influence local, state and national decision-making related to public issues.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>• Students will objectively discuss current public issues in Florida and use both the U.S. and Florida Constitutions to justify pro and con positions.</td>
</tr>
<tr>
<td></td>
<td>• Students will examine the relationship and responsibilities of both the state and national governments regarding these public issues.</td>
</tr>
<tr>
<td></td>
<td>• Students will analyze public policy solutions related to local, state and national issues.</td>
</tr>
<tr>
<td>SS.912.E.2.2:</td>
<td>Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.</td>
</tr>
<tr>
<td>SS.912.G.5.5:</td>
<td>Use geographic terms and tools to analyze case studies of policies and programs for resource use and management.</td>
</tr>
<tr>
<td>SS.912.W.1.3:</td>
<td>Interpret and evaluate primary and secondary sources.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples are artifacts, images, auditory and written sources.</td>
</tr>
</tbody>
</table>

Mathematicians who participate in effortful learning both individually and with others:

• Analyze the problem in a way that makes sense given the task.  
• Ask questions that will help with solving the task.  
• Build perseverance by modifying methods as needed while solving a challenging task.  
• Stay engaged and maintain a positive mindset when working to solve tasks.
**MA.K12.MTR.1.1:**

- Help and support each other when attempting a new method or approach.

**Clarifications:**

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

**MA.K12.MTR.2.1:**

- Demonstrate understanding by representing problems in multiple ways.

Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

**Clarifications:**

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

**MA.K12.MTR.3.1:**

- Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**Clarifications:**

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

**MA.K12.MTR.4.1:**

- Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clarifications:**

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

**MA.K12.MTR.5.1:**

- Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

**MA.K12.MTR.5.1:**

- Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
<table>

<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Verify possible solutions by explaining the methods used.</td>
<td></td>
</tr>
<tr>
<td>Evaluate results based on the given context.</td>
<td></td>
</tr>
</tbody>
</table>

**Clarifications:**  
Teachers who encourage students to assess the reasonableness of solutions:  
- Have students estimate or predict solutions prior to solving.  
- Prompt students to continually ask, “Does this solution make sense? How do you know?”  
- Reinforce that students check their work as they progress within and after a task.  
- Strengthen students’ ability to verify solutions through justifications.

|  | - Connect mathematical concepts to everyday experiences.  
  - Use models and methods to understand, represent and solve problems.  
  - Perform investigations to gather data or determine if a method is appropriate.  
  - Redesign models and methods to improve accuracy or efficiency. |

**Clarifications:**  
Teachers who encourage students to apply mathematics to real-world contexts:  
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.  
- Challenge students to question the accuracy of their models and methods.  
- Support students as they validate conclusions by comparing them to the given situation.  
- Indicate how various concepts can be applied to other disciplines.

| K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.  
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.  
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  
6-8 Students continue with previous skills and use a style guide to create a proper citation.  
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. |

## Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAFS.K12.S-ID.1.1:</td>
<td>In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</td>
</tr>
<tr>
<td>MAFS.K12.S-ID.1.2:</td>
<td>In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</td>
</tr>
<tr>
<td>MAFS.K12.S-ID.1.3:</td>
<td>In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</td>
</tr>
<tr>
<td>MAFS.K12.S-ID.1.4:</td>
<td>Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve.</td>
</tr>
<tr>
<td>MAFS.K12.MP.1.1:</td>
<td>Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</td>
</tr>
<tr>
<td>MAFS.K12.MP.3.1:</td>
<td>Construct viable arguments and critique the reasoning of others. Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read arguments they find convincing, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</td>
</tr>
</tbody>
</table>
| MAFS.K12.MP.5.1: | Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other
mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

Attend to precision.

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.

Clariﬁcations:
Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bli/library_media/pdf/12totalfinds.pdf

Compare how different nongovernmental organizations and progressives worked to shape public policy, restore economic opportunities, and correct injustices in American life.

Clariﬁcations:

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.

Clariﬁcations:
Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Evaluate the importance of political participation and civic participation.

Clariﬁcations:
Examples are school, community, state, national, international.

Conduct a service project to further the public good.

Clariﬁcations:
Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.

Analyze the impact of citizen participation as a means of achieving political and social change.

Clariﬁcations:
Examples are e-mail campaigns, boycotts, blogs, podcasts, protests, demonstrations, letters to editors.

Monitor current public issues in Florida.

Clariﬁcations:
Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.

Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.

Clariﬁcations:
Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.

Use geographic terms and tools to analyze case studies of policies and programs for resource use and management.

Interpret and evaluate primary and secondary sources.

Clariﬁcations:
Examples are artifacts, images, auditory and written sources.

Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grades 9-10 reading and content, choosing flexibly from a range of strategies.

a. Use context (e.g., the overall meaning of a sentence, paragraph, or text; a word's position or function in a sentence) as a clue to the meaning of a word or phrase.

b. Identify and correctly use patterns of word changes that indicate different meanings or parts of speech (e.g., analyze, analytical, advocate, advocacy).

c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning, its part of speech, or its etymology.

d. Verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).

Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.

By the end of grade 9, read and comprehend literary nonfiction in the grades 9–10 text complexity band proficiently, with scaffolding as needed at the high end of the range.
By the end of grade 10, read and comprehend literary nonfiction at the high end of the grades 9-10 text complexity band independently and proficiently.

- Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9-10 topics, texts, and issues, building on others’ ideas and expressing their own clearly and persuasively.
  - Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.
  - Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.
  - Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.
  - Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

- Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.

- Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.

- Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, and style are appropriate to purpose, audience, and task.

- Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence.
  - Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among claim(s), counterclaims, reasons, and evidence.
  - Develop claim(s) and counterclaims fairly, supplying evidence for each while pointing out the strengths and limitations of both in a manner that anticipates the audience's knowledge level and concerns.
  - Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.
  - Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.
  - Provide a concluding statement or section that follows from and supports the argument presented.

- Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.

- Identify appropriate methods to resolve physical conflict.

- Apply strategies for self improvement based on individual strengths and needs.

- Describe ways to act independently of peer pressure during physical activities.

- Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities.

  **Clarifications:**
  Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.

- Nutrition plan based on personal needs and preferences, impact of chronic health condition on individual and family, weapons on campus, and use of stress management and coping skills.

- Examine barriers that can hinder healthy decision making.

- Interpersonal, financial, environmental factors, and accessibility of health information.

- Propose strategies to reduce or prevent injuries and health problems.

  **Clarifications:**
  Mandatory passenger-restraint/helmet laws, refusal skills, mandatory immunizations, healthy relationship skills, and improved inspection of food sources.

- English language learners communicate for social and instructional purposes within the school setting.

- English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

---

**General Course Information and Notes**

**GENERAL NOTES**

This course provides applications and opportunities for leadership in the areas of service-learning, civic responsibility, and civic engagement. Academic, personal, and career skills needed for effective service-learning project implementation will be taught and applied through structured service projects that meet real school and/or community needs. Students will actively participate in meaningful service-learning experiences of at least 40 hours’ duration.

The content should include, but not be limited to, the following:

1. Students, working individually or in small or large groups, will investigate, quantify, and choose among issues and needs that can be addressed.
2. Students will design and then implement one or more service-learning projects to address identified needs through direct, indirect, advocacy, or research-focused action. Projects will involve meaningful partnerships.
3. Students will conduct reflection activities to measure and record information about the service-learning activities and their impacts.
4. Students will demonstrate KSAs (knowledge, skills, or abilities) gained from projects through project-developed products and public presentations that educate others about the needs/issues addressed, activities conducted, impacts measured, and/or how others can also meet needs through service.
All of the above activities may be counted toward the service-learning 40-hour requirement. Activities can range widely and occur within or beyond the school. For more information about service-learning, see the Florida Department of Education Web site at www.fldoe.org/family/learnserv.asp.

Language Arts benchmarks are addressed as students read, write, create documents, and make public presentations about needs and activities to address them. Social Studies benchmarks include analyzing community issues, coming up with solutions, and conducting service projects. Math benchmarks are met as students chart and graph data as part of issue investigation, project design, demonstration, and/or reflection. Health and Physical Education are addressed as projects include discussion and learning related to safety, liability, interpersonal skills, conflict avoidance, appraising outcomes and impacts on others, maintaining appropriate behavior, etc., in the students’ interaction with others.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

After successfully completing this course, the student will:

1. Demonstrate an understanding of service-learning, the types of service-learning, and its importance in a participatory democracy.
2. Demonstrate the ability to identify school/community needs and propose solutions that can be implemented through service-learning.
3. Demonstrate the ability to identify and analyze different points of view to gain an understanding of diverse backgrounds and perspectives and their value.
4. Demonstrate the ability to investigate significant needs, plan and implement service-learning projects to address them, evaluate project effectiveness, and present the information to an authentic audience.
5. Demonstrate use of effective self-assessment and reflection strategies (e.g., verbal, written, artistic, and non-verbal activities to demonstrate learning, understanding, and changes in students’ knowledge, skills and/or abilities).
6. Demonstrate effective use of facilitative communication skills (e.g., writing, speaking, listening, questioning, paraphrasing, non-verbal communication, non-judgmental response).
7. Assess and evaluate impacts of their efforts, measuring outputs and impacts not only on the communities being served, but also on her/himself.
8. Provide documentation of activities and the minimum 40 hours of participation in one or more approved service-learning projects.

For this second-level high school course, the expectation is that students will not only engage in more service-learning hours and activities than students in the first level, but will also show higher levels of responsibility and leadership in project design and implementation. Additional roles can include helping other students or teachers with aspects of project design and implementation, and teaching/presenting to other groups inside and beyond the school about course-based projects.

**Literacy Standards in Social Studies**

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

**QUALIFICATIONS**

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

**Any field when certification reflects a bachelor or higher degree.**

---

**GENERAL INFORMATION**

**Course Number:** 2104360

**Course Path:** Section: Grades PreK to 12 Education
Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Interdisciplinary and Applied Social Studies >

**Abbreviated Title:** ENG CITIZ SERV LRG2

**Course Length:** Semester (S)

**Course Level:**

**Number of Credits:** Half credit (.5)

**Course Type:** Elective Course

**Course Status:** Course Approved

**Grade Level(s):** 9,10,11,12
## Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
</table>
| **SS.912.A.1.5:** | Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.  
**Clarifications:** Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf |
| **SS.912.A.3.12:** | Compare how different nongovernmental organizations and progressives worked to shape public policy, restore economic opportunities, and correct injustices in American life.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| **SS.912.A.7.12:** | Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.  
**Clarifications:** Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| **SS.912.C.2.2:** | Evaluate the importance of political participation and civic participation.  
**Clarifications:** Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election. |
| **SS.912.C.2.3:** | Experience the responsibilities of citizens at the local, state, or federal levels.  
**Clarifications:** Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election. |
| **SS.912.C.2.5:** | Conduct a service project to further the public good.  
**Clarifications:** Examples are school, community, state, national, international. |
| **SS.912.C.2.8:** | Analyze the impact of citizen participation as a means of achieving political and social change.  
**Clarifications:** Examples are e-mail campaigns, boycotts, blogs, podcasts, protests, demonstrations, letters to editors. |
| **SS.912.C.2.10:** | Monitor current public issues in Florida.  
**Clarifications:** Examples are On-line Sunshine, media, e-mails to government officials, political text messaging. |
| **SS.912.C.2.11:** | Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.  
**Clarifications:** Examples are school, community, state, national, international. |
| **SS.912.E.2.2:** | Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives. |
| **SS.912.G.5.5:** | Use geographic terms and tools to analyze case studies of policies and programs for resource use and management.  
**Clarifications:** Examples are artifacts, images, auditory and written sources. |
| **SS.912.W.1.3:** | Interpret and evaluate primary and secondary sources.  
**Clarifications:** Examples are artifacts, images, auditory and written sources. |

## Additional Resources

- Teachers who encourage students to participate actively in effortful learning both individually and with others:
  - **Clarifications:**  
  - Analyze the problem in a way that makes sense given the task.  
  - Ask questions that will help with solving the task.  
  - Build perseverance by modifying methods as needed while solving a challenging task.  
  - Stay engaged and maintain a positive mindset when working to solve tasks.  
  - Help and support each other when attempting a new method or approach.

- Teachers who encourage students to participate actively in effortful learning both individually and with others:
  - **Clarifications:**  
  - Cultivate a community of growth mindset learners.  
  - Foster perseverance in students by choosing tasks that are challenging.  
  - Develop students’ ability to analyze and problem solve.
Recognize students’ effort when solving challenging problems.

**MA.K12.MTR.2.1:**
Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

**Clarifications:**
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**Clarifications:**
Teachers who encourage students to complete tasks with mathematical fluency:
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clarifications:**
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students’ ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students’ ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

**MA.K12.MTR.7.1:**
Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent, and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

**ELA.K12.EE.1.1:**
Cite evidence to explain and justify reasoning.

**Clarifications:**
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

**ELA.K12.EE.2.1:**
Read and comprehend grade-level complex texts proficiently.

**Clarifications:**
See Text Complexity for grade-level complexity bands and a text complexity rubric.

**ELA.K12.EE.3.1:**
Make inferences to support comprehension.

**Clarifications:**
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

**ELA.K12.EE.4.1:**
Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clarifications:**
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _______ because _______. “ The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills.
Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

**ELA.K12.EE.5.1:**
Use the accepted rules governing a specific format to create quality work.

**Clarifications:**
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

**ELA.K12.EE.6.1:**
Use appropriate voice and tone when speaking or writing.

**Clarifications:**
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

**PE.912.C.2.20:**
Identify appropriate methods to resolve physical conflict.

**PE.912.M.1.5:**
Apply strategies for self-improvement based on individual strengths and needs.

**PE.912.R.5.1:**
Describe ways to act independently of peer pressure during physical activities.

**PE.912.R.5.4:**
Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities.

**Clarifications:**
Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.

**HE.912.B.5.3:**
Nutrition plan based on personal needs and preferences, impact of chronic health condition on individual and family, weapons on campus, and use of stress management and coping skills.

**Clarifications:**
Examine barriers that can hinder healthy decision making.

**HE.912.B.5.5:**
Propose strategies to reduce or prevent injuries and health problems.
General Course Information and Notes

GENERAL NOTES

This course provides applications and opportunities for leadership in the areas of service-learning, civic responsibility, and civic engagement. Academic, personal, and career skills needed for effective service-learning project implementation will be taught and applied through structured service projects that meet real school and/or community needs. Students will actively participate in meaningful service-learning experiences of at least 40 hours' duration.

The content should include, but be limited to, the following:

1. Students, working individually or in small or large groups, will investigate, quantify, and choose among issues and needs that can be addressed.
2. Students will design and then implement one or more service-learning projects to address identified needs through direct, indirect, advocacy, or research-focused action. Projects will involve meaningful partnerships.
3. Students will conduct reflection activities to measure and record information about the service-learning activities and their impacts.
4. Students will demonstrate KSAs (knowledge, skills, or abilities) gained from projects through project-developed products and public presentations that educate others about the needs/issues addressed; activities conducted, impacts measured, and/or how others can also meet needs through service.

All of the above activities may be counted toward the service-learning 40-hour requirement. Activities can range widely and occur within or beyond the school. For more information about service-learning, see the Florida Department of Education Web site at www.fldoe.org/family/learnserve.asp.

Language Arts benchmarks are addressed as students read, write, create documents, and make public presentations about needs and activities to address them. Social Studies benchmarks include analyzing community issues, coming up with solutions, and conducting service projects. Math benchmarks are met as students chart and graph data as part of issue investigation, project design, demonstration, and/or reflection. Health and Physical Education are addressed as projects include discussion and learning related to safety, liability, interpersonal skills, conflict avoidance, appraising outcomes and impacts on others, maintaining appropriate behavior, etc., in the students' interaction with others.

After successfully completing this course, the student will:

1. Demonstrate an understanding of service-learning, the types of service-learning, and its importance in a participatory democracy.
2. Demonstrate the ability to identify school/community needs and propose solutions that can be implemented through service-learning.
3. Demonstrate the ability to identify and analyze different points of view to gain an understanding of diverse backgrounds and perspectives and their value.
4. Demonstrate the ability to investigate significant needs, plan and implement service-learning projects to address them, evaluate project effectiveness, and present the information to an authentic audience.
5. Demonstrate use of effective self-assessment and reflection strategies (e.g., verbal, written, artistic, and non-verbal activities to demonstrate learning, understanding, and changes in students' knowledge, skills, and/or abilities).
6. Demonstrate effective use of facilitative communication skills (e.g., writing, speaking, listening, questioning, paraphrasing, non-verbal communication, non-judgmental response).
7. Assess and evaluate impacts of their efforts, measuring outputs and impacts not only on the communities being served, but also on her/himself.
8. Provide documentation of activities and the minimum 40 hours of participation in one or more approved service-learning projects.

For this second-level high school course, the expectation is that students will not only engage in more service-learning hours and activities than students in the first level, but will also show higher levels of responsibility and leadership in project design and implementation. Additional roles can include helping other students or teachers with aspects of project design and implementation, and teaching/presenting to other groups inside and beyond the school about course-based projects.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EE and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.
Course Number: 2104360

Number of Credits: Half credit (.5)
Course Type: Elective Course
Course Status: State Board Approved
Grade Level(s): 9,10,11,12

### MA.K12.MTR.1.1: Help and support each other when attempting a new method or approach.

**Clarifications:**
- Teachers who encourage students to participate actively in effortful learning both individually and with others:
  - Cultivate a community of growth mindset learners.
  - Foster perseverance in students by choosing tasks that are challenging.
  - Develop students’ ability to analyze and problem solve.
  - Recognize students’ effort when solving challenging problems.

### MA.K12.MTR.2.1: Demonstrate understanding by representing problems in multiple ways.

**Mathematicians who demonstrate understanding by representing problems in multiple ways:**
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

**Clarifications:**
- Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
  - Help students make connections between concepts and representations.
  - Provide opportunities for students to use manipulatives when investigating concepts.
  - Guide students from concrete to pictorial to abstract representations as understanding progresses.
  - Show students that various representations can have different purposes and can be useful in different situations.

### MA.K12.MTR.3.1: Complete tasks with mathematical fluency.

**Mathematicians who complete tasks with mathematical fluency:**
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**Clarifications:**
- Teachers who encourage students to complete tasks with mathematical fluency:
  - Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
  - Offer multiple opportunities for students to practice efficient and generalizable methods.
  - Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

### MA.K12.MTR.4.1: Engage in discussions that reflect on the mathematical thinking of self and others.

**Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:**
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clarifications:**
- Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
  - Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
  - Create opportunities for students to discuss their thinking with peers.
  - Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
  - Develop students’ ability to justify methods and compare their responses to the responses of their peers.

### MA.K12.MTR.5.1: Use patterns and structure to help understand and connect mathematical concepts.

**Mathematicians who use patterns and structure to help understand and connect mathematical concepts:**
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
- Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
  - Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
  - Support students to develop generalizations based on the similarities found among problems.
  - Provide opportunities for students to create plans and procedures to solve problems.
  - Develop students’ ability to construct relationships between their current understanding and more sophisticated ways of thinking.

### MA.K12.MTR.1.1: Assess the reasonableness of solutions.

**Mathematicians who assess the reasonableness of solutions:**
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
### MA.K12.MTR.6.1
**Identify appropriate methods to resolve physical conflict.**
*Clarifications:*
- Teachers who encourage students to assess the reasonableness of solutions:
  - Have students estimate or predict solutions prior to solving.
  - Prompt students to continually ask, “Does this solution make sense? How do you know?”
  - Reinforce that students check their work as they progress within and after a task.
  - Strengthen students’ ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
*Mathematicians who apply mathematics to real-world contexts:*
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

### MA.K12.MTR.7.1
**Cite evidence to explain and justify reasoning.**
*Clarifications:*
- K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
- 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
- 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
- 6-8 Students continue with previous skills and use a style guide to create a proper citation.
- 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

### ELA.K12.EE.1.1
**Read and comprehend grade-level complex texts proficiently.**
*Clarifications:*
- See Text Complexity for grade-level complexity bands and a text complexity rubric.

### ELA.K12.EE.2.1
**Make inferences to support comprehension.**
*Clarifications:*
- Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

### ELA.K12.EE.3.1
**Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.**
*Clarifications:*
- In kindergarten, students learn to listen to one another respectfully.
- In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think ______ because ______.” The collaborative conversations are becoming academic conversations.
- In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

### ELA.K12.EE.4.1
**Use the accepted rules governing a specific format to create quality work.**
*Clarifications:*
- Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

### ELA.K12.EE.5.1
**Use appropriate voice and tone when speaking or writing.**
*Clarifications:*
- In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

### ELA.K12.EE.6.1
**Identify appropriate methods to resolve physical conflict.**
*Clarifications:*
- Appraise the potential short-term and long-term outcomes of each alternative on self and others.

### PE.912.C.2.20:
**Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities.**
*Clarifications:*
- Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.

### HE.912.B.5.3:
**Nutrition plan based on personal needs and preferences, impact of chronic health condition on individual and family, weapons on campus, and**
General Course Information and Notes

GENERAL NOTES

This course provides applications and opportunities for leadership in the areas of service-learning, civic responsibility, and civic engagement. Academic, personal, and career skills needed for effective service-learning project implementation will be taught and applied through structured service projects that meet real school and/or community needs. Students will actively participate in meaningful service-learning experiences of at least 40 hours' duration.

The content should include, but not be limited to, the following:

1. Students, working individually or in small or large groups, will investigate, quantify, and choose among issues and needs that can be addressed.
2. Students will design and then implement one or more service-learning projects to address identified needs through direct, indirect, advocacy, or research-focused action. Projects will involve meaningful partnerships.
3. Students will conduct reflection activities to measure and record information about the service-learning activities and their impacts.
4. Students will demonstrate KSAs (knowledge, skills, or abilities) gained from projects through project-developed products and public presentations that educate others about the needs/issues addressed, activities conducted, impacts measured, and/or how others can also meet needs through service.

All of the above activities may be counted toward the service-learning 40-hour requirement. Activities can range widely and occur within or beyond the school. For more information about service-learning, see the Florida Department of Education Web site at www.fldoe.org/family/learnserve.asp.

Language Arts benchmarks are addressed as students read, write, create documents, and make public presentations about needs and activities to address them. Social Studies benchmarks include analyzing community issues, coming up with solutions, and conducting service projects. Math benchmarks are met as students chart and graph data as part of issue investigation, project design, demonstration, and/or reflection. Health and Physical Education are addressed as projects include discussion and learning related to safety, liability, interpersonal skills, conflict avoidance, appraising outcomes and impacts on others, maintaining appropriate behavior, etc., in the students' interaction with others.

After successfully completing this course, the student will:

1. Demonstrate an understanding of service-learning, the types of service-learning, and its importance in a participatory democracy.
2. Demonstrate the ability to identify school/community needs and propose solutions that can be implemented through service-learning.
3. Demonstrate the ability to identify and analyze different points of view to gain an understanding of diverse backgrounds and perspectives and their value.
4. Demonstrate the ability to investigate significant needs, plan and implement service-learning projects to address them, evaluate project effectiveness, and present the information to an authentic audience.
5. Demonstrate use of effective self-assessment and reflection strategies (e.g., verbal, written, artistic, and non-verbal activities to demonstrate learning, understanding, and changes in students' knowledge, skills and/or abilities).
6. Demonstrate effective use of facilitative communication skills (e.g., writing, speaking, listening, questioning, paraphrasing, non-verbal communication, non-judgmental response).
7. Assess and evaluate impacts of their efforts, measuring outputs and impacts not only on the communities being served, but also on her/himself.
8. Provide documentation of activities and the minimum 40 hours of participation in one or more approved service-learning projects.

For this second-level high school course, the expectation is that students will not only engage in more service-learning hours and activities than students in the first level, but will also show higher levels of responsibility and leadership in project design and implementation. Additional roles can include helping other students or teachers with aspects of project design and implementation, and teaching/presenting to other groups inside and beyond the school about course-based projects.

**Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EE and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

**QUALIFICATIONS**

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

- [Use of stress management and coping skills.](#)
- [Examine barriers that can hinder healthy decision making.](#)
- [Propose strategies to reduce or prevent injuries and health problems.](#)
- [Mandatory passenger-restraint/helmet laws, refusal skills, mandatory immunizations, healthy relationship skills, and improved inspection of food sources.](#)

### Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.2:</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</td>
</tr>
<tr>
<td>SS.912.A.3:</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.4:</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.</td>
</tr>
<tr>
<td>SS.912.A.5:</td>
<td>Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</td>
</tr>
<tr>
<td>SS.912.A.6:</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.A.7:</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td>SS.912.A.8:</td>
<td>Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution.</td>
</tr>
<tr>
<td>SS.912.A.9:</td>
<td>Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups.</td>
</tr>
<tr>
<td>SS.912.A.10:</td>
<td>Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States.</td>
</tr>
<tr>
<td>SS.912.A.11:</td>
<td>Review the Native American experience.</td>
</tr>
<tr>
<td>SS.912.A.12:</td>
<td>Identify significant inventors of the Industrial Revolution including African Americans and women.</td>
</tr>
<tr>
<td>SS.912.A.13:</td>
<td>Analyze changes that occurred as the United States shifted from agrarian to an industrial society.</td>
</tr>
</tbody>
</table>

**Clarifications:**

- SS.912.A.1: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
- SS.912.A.2: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf
- SS.912.A.6: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection.
- SS.912.A.7: Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups.
- SS.912.A.8: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf
- SS.912.A.9: Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, angel Island, push-pull factors.
<table>
<thead>
<tr>
<th>Benchmark</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.3.7:</td>
<td>Compare the experience of European immigrants in the east to that of Asian immigrants in the west (the Chinese Exclusion Act, Gentlemen's Agreement with Japan).</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples may include, but are not limited to nativism, integration of immigrants into society when comparing &quot;Old&quot; [before 1890] and &quot;New&quot; immigrants [after 1890], Immigration Act of 1924.  This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.3.10:</td>
<td>Review different economic and philosophic ideologies.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.  This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.3.11:</td>
<td>Analyze the impact of political machines in United States cities in the late 19th and early 20th centuries.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples may include, but aren ot limited to, Boss Tweed, Tammany Hall, George Washington Plunkitt, Washington Gladden, Thomas Nast.  This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.3.12:</td>
<td>Compare how different nongovernmental organizations and progressives worked to shape public policy, restore economic opportunities, and correct injustices in American life.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples may include, but are not limited to, NAACP, YMCA, Women's Christian Temperance Union, National Women's Suffrage Association, National Women's Party, Robert LaFollette, Florence Kelley, Ida M. Tarbell, Eugene Debs, Carrie Chapman Catt, Alice Paul, Theodore Roosevelt, William Taft, Woodrow Wilson, Upton Sinclair, Booker T. Washington, W.E.B. DuBois, Gifford Pinchot, William Jennings Bryan.  This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.3.13:</td>
<td>Examine key events and peoples in Florida history as they relate to United States history.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples may include, but are not limited to, the railroad industry, bridge construction in the Florida Keys, the cattle industry, the cigar industry, the influence of Cuban, Greek and Italian immigrants, Henry B. Plant, William Chipley, Henry Flagler, George Proctor, Thomas DeSaille Tucker, Hamilton Disston.  This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.4.1:</td>
<td>Analyze the major factors that drove United States imperialism.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples may include, but are not limited to, the Monroe Doctrine, Manifest Destiny, The Influence of Sea Power Upon History, Turner's thesis, the Roosevelt Corollary, natural resources, markets for resources, elimination of spheres of influence in China.  This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.4.8:</td>
<td>Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.4.9:</td>
<td>Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. </tbody>
</table>
SS.912.A.7.8: Analyze significant Supreme Court decisions relating to integration, busing, affirmative action, the rights of the accused, and reproductive rights.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.912.A.7.9: Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.

**Clariﬁcations:** Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.912.A.7.10: Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.

SS.912.A.7.11: Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.

**Clariﬁcations:** This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.912.A.7.12: Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

**Clariﬁcations:** This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.912.A.7.13: Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).

**Clariﬁcations:** Examples may include, but are not limited to, NAFTA, World Trade Organization.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.912.A.7.14: Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.

**Clariﬁcations:** Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.912.A.7.15: Examine the attempts to extend New Deal legislation through the Great Society and the successes and failures of these programs to promote social and economic stability.

**Clariﬁcations:** Examples may include, but are not limited to, Civil Rights Act of 1964, Voting Rights Act of 1965, War on Poverty, Medicare, Medicaid, Headstart.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.912.A.7.16: Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).

**Clariﬁcations:** Examples may include, but are not limited to, NAFTA, World Trade Organization.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.912.A.7.17: Examine changes in immigration policy and attitudes toward immigration since 1950.

**Clariﬁcations:** This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.912.A.7.18: Examine key events and key people in Florida history as they relate to United States history.

**Clariﬁcations:** Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the 2000 election, migration and Immigration, Sunbelt state.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.912.C.4.1: Explain how the world's nations are governed differently.

SS.912.C.4.2: Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.

SS.912.C.4.3: Assess human rights policies of the United States and other countries.

SS.912.G.1.2: Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

SS.912.G.1.3: Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.

SS.912.G.1.4: Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

**Clariﬁcations:** Examples are thematic, contour, and dot-density.

Identify the physical characteristics and the human characteristics that define and differentiate regions.
SS.912.G.2.1: Clarifications:
Examples of physical characteristics are climate, terrain, resources.
Examples of human characteristics are religion, government, economy, demography.

SS.912.G.2.2: Describe the factors and processes that contribute to the differences between developing and developed regions of the world.

SS.912.G.2.3: Clarifications:
Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.

SS.912.G.4.1: Interpret population growth and other demographic data for any given place.

SS.912.G.4.2: Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.

SS.912.G.4.3: Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.

SS.912.G.4.4: Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.

SS.912.G.4.9: Use political maps to describe the change in boundaries and governments within continents over time.

SS.912.H.1.4: Clarifications:
Examples are classical architecture, protest music, Native American dance, Japanese Noh.

SS.912.H.3.1: Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.

SS.912.W.1.1: Use timelines to establish cause and effect relationships of historical events.

SS.912.W.1.2: Clarifications:
Compare time measurement systems used by different cultures.

SS.912.W.1.3: Clarifications:
Examples are artifacts, images, auditory and written sources.

SS.912.W.1.4: Explain how historians use historical inquiry and other sciences to understand the past.

SS.912.W.1.5: Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).

SS.912.W.1.6: Clarifications:
Examples are ethnic, cultural, personal, national, religious.

LAFS.910.RH.1.1: Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.

LAFS.910.RH.1.2: Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.

LAFS.910.RH.1.3: Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.

LAFS.910.RH.2.4: Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.

LAFS.910.RH.2.5: Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.

LAFS.910.RH.2.6: Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.

LAFS.910.RH.3.7: Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.

LAFS.910.RH.3.8: Assess the extent to which the reasoning and evidence in a text support the author's claims.

LAFS.910.RH.3.9: Compare and contrast treatments of the same topic in several primary and secondary sources.

LAFS.910.RH.4.10: By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.

LAFS.910.SL.1.1: Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.

LAFS.910.SL.1.2: Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.

LAFS.910.SL.1.3: Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.

LAFS.910.SL.2.4: Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.

LAFS.910.WHST.1.1: Write arguments focused on discipline-specific content.

a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence.

b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns.

c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and
d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

e. Provide a concluding statement or section that follows from or supports the argument presented.

LAFS.910.WHST.1.2:

- Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.
  a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.
  b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.
  c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts.
  d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers.
  e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.
  f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).

LAFS.910.WHST.2.4:

- Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

LAFS.910.WHST.2.5:

- Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

LAFS.910.WHST.2.6:

- Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.

LAFS.910.WHST.3.7:

- Conduct short as well as more sustained research projects to answer a question including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate: synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

LAFS.910.WHST.3.8:

- Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.

LAFS.910.WHST.3.9:

- Draw evidence from informational texts to support analysis, reflection, and research.

LAFS.910.WHST.4.10:

- Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

MAFS.912.S-ID.1.4:

- Use statistics appropriate to the shape of the data distribution, such as the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

MAFS.912.S-ID.1.3:

- Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers).

MAFS.912.S-ID.1.2:

- Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.

MAFS.912.S-ID.1.1:

- Provide a conclusion statement or section that follows from or supports the information or explanation presented.

MAFS.912.S-ID.1.1:

- Make sense of problems and persevere in solving them.

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

MAFS.K12.MP.1.1:

- Construct viable arguments and critique the reasoning of others.
Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

**MAFS.K12.MP.3.1:** Use appropriate tools strategically.

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and its limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

**MAFS.K12.MP.5.1:** Attend to precision.

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

**MAFS.K12.MP.6.1:** Various cultures' dietary patterns, rites of passage, courtship practices, family roles, personal relationships, ethics, and parenting.

**ELD.K12.ELL.SI.1:** Various cultures' dietary patterns, rites of passage, courtship practices, family roles, personal relationships, ethics, and parenting.

**ELD.K12.ELL.SS.1:** English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies. They analyze how culture supports and challenges health beliefs, practices, and behaviors.

**ELD.K12.ELL.SS.1:** Analyze how culture supports and challenges health beliefs, practices, and behaviors.

**HE.912.C.2.7:** The grade 9-12 Multicultural Studies course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of multicultural and multiethnic groups in the United States and their influence on the development of American culture. Content should include, but is not limited to, the influence of geography on the social and economic development of Native American culture, the influence of major historical events on the development of a multicultural American society and a study of the political, economic and social aspects of Native American, Hispanic American, African American and Asian American culture.

**Mathematics Benchmark Guidance:** Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Literacy Standards in Social Studies**

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile located at the top of this page.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and
social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

<tbody>
<tr>
<td>SS.912.A.1.1</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
</tbody>
</table>
| SS.912.A.1.2 | Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.  
**Clarifications:** Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection. |
| SS.912.A.1.3 | Utilize timelines to identify the time sequence of historical data. |
| SS.912.A.1.4 | Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.  
**Clarifications:** Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. |
| SS.912.A.1.5 | Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida’s research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf |
| SS.912.A.1.6 | Use case studies to explore social, political, legal, and economic relationships in history. |
| SS.912.A.1.7 | Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications. |
| SS.912.A.2.4 | Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution.  
**Clarifications:** Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.2.5 | Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups.  
**Clarifications:** This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.2.6 | Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States.  
**Clarifications:** This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.2.7 | Review the Native American experience.  
**Clarifications:** Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.3.5 | Identify significant inventors of the Industrial Revolution including African Americans and women.  
**Clarifications:** Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.3.6 | Analyze changes that occurred as the United States shifted from agrarian to an industrial society.  
**Clarifications:** Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, angel Island, push-pull factors.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. </table>
### SS.912.A.5.6:
Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s.

**Clarifications:**
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated, view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.5.7:
Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women.

**Clarifications:**
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated, view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.5.8:

**Clarifications:**
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated, view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.5.9:
Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.

**Clarifications:**
Examples may include, but are not limited to, 100 Percent Americanism.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated, view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.5.10:
Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities.

**Clarifications:**
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated, view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.6.9:
Describe the rationale for the formation of the United Nations, including the contribution of Mary McLeod Bethune.

**Clarifications:**
Examples may include, but are not limited to, the Declaration of Human Rights.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated, view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.7.4:
Evaluate the success of 1960s era presidents' foreign and domestic policies.

**Clarifications:**
Examples may include, but are not limited to, civil rights legislation, Space Race, Great Society, War on Poverty.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated, view the United States History End-of-Course Assessment Test Item Specifications pages 49-50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.7.5:
Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.

**Clarifications:**
Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated, view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.7.6:
Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement.

**Clarifications:**
Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X (El-Haj Malik El-Shabazz), Stokely Carmichael (Kwame Ture), H. Rap Brown (Jamal Abdullah Al-Amin), the Black Panther Party (e.g., Huey P. Newton, Bobby Seale).

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated, view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.7.7:
Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.

**Clarifications:**
Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated, view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.

- **Clarifications:** Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.

- **Clarifications:** Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Analyze the attempts to extend New Deal legislation through the Great Society and the successes and failures of these programs to promote social and economic stability.

- **Clarifications:** Examples may include, but are not limited to, Civil Rights Act of 1964, Voting Rights Act of 1965, War on Poverty, Medicare, Medicaid, Headstart.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).

- **Clarifications:** Examples may include, but are not limited to, NAFTA, World Trade Organization.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Examine changes in immigration policy and attitudes toward immigration since 1950.

- **Clarifications:** This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Examine key events and key people in Florida history as they relate to United States history.

- **Clarifications:** Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Bicentennial of 2000, migration and immigration, Sunbelt state.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

- **Clarifications:** Identify the physical characteristics and the human characteristics that define and differentiate regions.
Clarifications:
Examples of physical characteristics are climate, terrain, resources.
Examples of human characteristics are religion, government, economy, demography.

SS.912.G.2.2: Describe the factors and processes that contribute to the differences between developing and developed regions of the world.

SS.912.G.2.3: Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.

SS.912.G.4.1: Interpreting population growth and other demographic data for any given place.

SS.912.G.4.2: Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.

SS.912.G.4.3: Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.

SS.912.G.4.7: Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.

SS.912.G.4.9: Use political maps to describe the change in boundaries and governments within continents over time.

SS.912.H.1.4: Explain philosophical beliefs as they relate to works in the arts.

SS.912.H.3.1: Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.

SS.912.W.1.1: Use timelines to establish cause and effect relationships of historical events.

SS.912.W.1.2: Compare time measurement systems used by different cultures.

SS.912.W.1.3: Interpret and evaluate primary and secondary sources.

SS.912.W.1.5: Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).

SS.912.W.1.6: Evaluate the role of history in shaping identity and character.

Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Teachers who encourage students to complete tasks with mathematical fluency:

Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.
Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.  
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:  
Read and comprehend grade-level complex texts proficiently.  
**Clarifications:**  
See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.3.1:  
Make inferences to support comprehension.  
**Clarifications:**  
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.4.1:  
Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  
**Clarifications:**  
In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think ______ because ___. ” The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.5.1:  
Use the accepted rules governing a specific format to create quality work.  
**Clarifications:**  
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.6.1:  
Use appropriate voice and tone when speaking or writing.  
**Clarifications:**  
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

ELD.K12.ELL.SS.1:  
English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SS.1:  
English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

HE.912.C2.7:  
Analyze how culture supports and challenges health beliefs, practices, and behaviors.  
**Clarifications:**  
Various cultures’ dietary patterns, rites of passage, courtship practices, family roles, personal relationships, ethics, and parenting.

---

**General Course Information and Notes**

**GENERAL NOTES**

**Multicultural Studies** - The grade 9-12 Multicultural Studies course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of multicultural and multiethnic groups in the United States and their influence on the development of American culture. Content should include, but is not limited to, the influence of geography on the social and economic development of Native American culture, the influence of major historical events on the development of a multicultural American society and a study of the political, economic and social aspects of Native American, Hispanic American, African American and Asian American culture.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EE and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and
social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

### GENERAL INFORMATION

**Course Number:** 2104600

**Course Path:** Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Multicultural Studies

**Abbreviated Title:** MULTICLTRL STUDIES

**Course Length:** Semester (S)

**Course Type:** Elective Course

**Course Level:** 2

**Course Status:** State Board Approved

**Grade Level(s):** 9,10,11,12

## Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.2:</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</td>
</tr>
<tr>
<td>SS.912.A.1.3:</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.4:</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</td>
</tr>
<tr>
<td>SS.912.A.1.5:</td>
<td>Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: <a href="http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf">http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf</a></td>
</tr>
<tr>
<td>SS.912.A.1.6:</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.A.1.7:</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td>SS.912.A.2.4:</td>
<td>Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.2.5:</td>
<td>Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.2.6:</td>
<td>Review the Native American experience.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo.</td>
</tr>
<tr>
<td>SS.912.A.2.7:</td>
<td>Identify significant inventors of the Industrial Revolution including African Americans and women.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.</td>
</tr>
<tr>
<td>SS.912.A.3.6:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, angel Island, push-pull factors.</td>
</tr>
<tr>
<td>SS.912.A.3.5:</td>
<td>Analyze changes that occurred as the United States shifted from agrarian to an industrial society.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>Benchmark</td>
<td>Description</td>
</tr>
<tr>
<td>-----------</td>
<td>-------------</td>
</tr>
<tr>
<td>SS.912.A.3.7:</td>
<td>Compare the experience of European immigrants in the east to that of Asian immigrants in the west (the Chinese Exclusion Act, Gentlemen's Agreement with Japan).</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples may include, but are not limited to nativism, integration of immigrants into society when comparing &quot;Old&quot; [before 1890] and &quot;New&quot; immigrants [after 1890], Immigration Act of 1924. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.4.8:</td>
<td>Review different economic and philosophic ideologies.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.3.11:</td>
<td>Analyze the impact of political machines in United States cities in the late 19th and early 20th centuries.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples may include, but are not limited to, Boss Tweed, Tammany Hall, George Washington Plunkitt, Washington Gladden, Thomas Nast. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.3.12:</td>
<td>Compare how different nongovernmental organizations and progressives worked to shape public policy, restore economic opportunities, and correct injustices in American life.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples may include, but are not limited to, NAACP, YMCA, Women's Christian Temperance Union, National Women's Suffrage Association, National Women's Party, Robert LaFollette, Florence Kelley, Ida M. Tarbell, Eugene Debs, Carrie Chapman Catt, Alice Paul, Theodore Roosevelt, William Taft, Woodrow Wilson, Upton Sinclair, Booker T. Washington, W.E.B. DuBois, Gifford Pinchot, William Jennings Bryan. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.3.13:</td>
<td>Examine key events and peoples in Florida history as they relate to United States history.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples may include, but are not limited to, the railroad industry, bridge construction in the Florida Keys, the cattle industry, the cigar industry, the influence of Cuban, Greek and Italian immigrants, Henry B. Plant, William Chipley, Henry Flagler, George Proctor, Thomas DeSaille Tucker, Hamilton Disston. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.4.1:</td>
<td>Analyze the major factors that drove United States imperialism.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Examples may include, but are not limited to, the Monroe Doctrine, Manifest Destiny, The Influence of Sea Power Upon History, Turner's thesis, the Roosevelt Corollary, natural resources, markets for resources, elimination of spheres of influence in China. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. </table>
### SS.912.A.5.6:

Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s.

**Clarifications:**
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.5.7:

Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women.

**Clarifications:**
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.5.8:

**Clarifications:**
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.5.9:

Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.

**Clarifications:**
Examples may include, but are not limited to, 100 Percent Americanism.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.5.10:

Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities.

**Clarifications:**
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.6.9:

Describe the rationale for the formation of the United Nations, including the contribution of Mary McLeod Bethune.

**Clarifications:**
Examples may include, but are not limited to, the Declaration of Human Rights.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.7.4:

Evaluate the success of 1960s era presidents' foreign and domestic policies.

**Clarifications:**
Examples may include, but are not limited to, civil rights legislation, Space Race, Great Society, War on Poverty.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.7.5:

Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.

**Clarifications:**
Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.7.6:

Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement.

**Clarifications:**
Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamal Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.7.7:

Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.

**Clarifications:**
Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.

**Clariﬁcations:**

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.

**Clariﬁcations:**
Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.

**Clariﬁcations:**
Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Analyze the attempts to extend New Deal legislation through the Great Society and the successes and failures of these programs to promote social and economic stability.

**Clariﬁcations:**
Examples may include, but are not limited to, Civil Rights Act of 1964, Voting Rights Act of 1965, War on Poverty, Medicare, Medicaid, Headstart.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).

**Clariﬁcations:**
Examples may include, but are not limited to, NAFTA, World Trade Organization.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Examine changes in immigration policy and attitudes toward immigration since 1950.

**Clariﬁcations:**
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Examine key events and key people in Florida history as they relate to United States history.

**Clariﬁcations:**
Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Bection of 2000, migration and Immigration, Sunbelt state.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Analyze how liberty and economic freedom generate broad-based opportunity and prosperity in the United States.

- Students will differentiate between government systems (e.g., autocracy, democracy, monarchy, oligarchy republic, theocracy).
- Students will differentiate between economic systems (e.g., capitalism, communism, mixed market, socialism).
- Students will analyze the disadvantages of authoritarian control over the economy (e.g., communism and socialism) in generating broad-based economic prosperity for their population.

**SS.912.CG.4.1:**

Students will explain how the United States uses foreign policy to influence other nations.

- Students will explain how the policies of other nations influence U.S. policy and society.
- Students will identify agencies of the U.S. government that contribute to its foreign policy agenda (e.g., National Security Agency, Central Intelligence Agency).
- Students will explain the advantages and disadvantages of how nongovernmental organizations (NGOs) influence foreign policy (e.g., United States Agency for International Development, Red Cross, American Woman Suffrage Association, Amnesty International).
- Students will explain how U.S. trade policy influences its relationships with other nations (e.g., China, Saudi Arabia).
- Students will explain how the use of embargos and economic sanctions by the United States has affected other nations (e.g., Cuba, Iran, Syria).
- Students will explain how U.S. foreign policy supports democratic principles and protects human rights around the world.
- Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.

| SS.912.CG.4.3: | Explain how U.S. foreign policy supports democratic principles and protects human rights around the world. |
| SS.912.G.1.2: | Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place. |
| SS.912.G.1.3: | Employ applicable units of measurement and scale to solve simple locational problems using maps and globes. |
| SS.912.G.1.4: | Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. |

### Clarifications:
- Examples are thematic, contour, and dot-density.
- Identify the physical characteristics and the human characteristics that define and differentiate regions.

| SS.912.G.2.1: | Clarifications: |
| SS.912.G.2.2: | Describe the factors and processes that contribute to the differences between developing and developed regions of the world. |

### Clarifications:
- Examples of physical characteristics are climate, terrain, resources.
- Examples of human characteristics are religion, government, economy, demography.

| SS.912.G.2.3: | Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. |

### Clarifications:
- Examples are desertification, global warming, catastrophic natural disasters.

| SS.912.G.4.1: | Interpret population growth and other demographic data for any given place. |
| SS.912.G.4.2: | Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places. |
| SS.912.G.4.3: | Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas. |
| SS.912.G.4.7: | Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world. |

### Clarifications:
- Use political maps to describe the change in boundaries and governments within continents over time.

| SS.912.H.1.4: | Clarifications: |
| SS.912.H.3.1: | Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture. |
| SS.912.W.1.1: | Use timelines to establish cause and effect relationships of historical events. |

### Clarifications:
- Examples are classical architecture, protest music, Native American dance, Japanese Noh.

| SS.912.W.1.2: | Compare time measurement systems used by different cultures. |
| SS.912.W.1.3: | Interpret and evaluate primary and secondary sources. |
| SS.912.W.1.4: | Explain how historians use historical inquiry and other sciences to understand the past. |
| SS.912.W.1.5: | Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). |

### Clarifications:
- Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
- Examples are artifacts, images, auditory and written sources.
- Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
- Evaluate the role of history in shaping identity and character.

| SS.912.W.1.6: | Mathematicians who participate in effortful learning both individually and with others: |
| MA.K12.MTR.1.1: | Clarifications: |

### Clarifications:
- Mathematics who demonstrate understanding by representing problems in multiple ways.
- Mathematicians who participate actively in effortful learning both individually and with others:
  - Analyze the problem in a way that makes sense given the task.
  - Ask questions that will help with solving the task.
  - Build perseverance by modifying methods as needed while solving a challenging task.
  - Stay engaged and maintain a positive mindset when working to solve tasks.
  - Help and support each other when attempting a new method or approach.

| MA.K12.MTR.2.1: | Teachers who encourage students to participate actively in effortful learning both individually and with others: |

### Clarifications:
- Teachers who encourage students to participate actively in effortful learning both individually and with others:
  - Cultivate a community of growth mindset learners.
  - Foster perseverance in students by choosing tasks that are challenging.
  - Develop students' ability to analyze and problem solve.
  - Recognize students' effort when solving challenging problems.

| MA.K12.MTR.1.1: | Demonstrate understanding by representing problems in multiple ways. |
| MA.K12.MTR.2.1: | Clarifications: |

### Clarifications:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.
### Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

#### MA.K12.MTR.3.1:
**Complete tasks with mathematical fluency.**

**Mathematicians who complete tasks with mathematical fluency:**
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**Clarifications:**
Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

### Engage in discussions that reflect on the mathematical thinking of self and others:

**Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:**
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clarifications:**
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

### Use patterns and structure to help understand and connect mathematical concepts:

**Mathematicians who use patterns and structure to help understand and connect mathematical concepts:**
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

### Assess the reasonableness of solutions.

**Mathematicians who assess the reasonableness of solutions:**
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students’ ability to verify solutions through justifications.

### Apply mathematics to real-world contexts.

**Mathematicians who apply mathematics to real-world contexts:**
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

**Clarifications:**

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

5-6 Students continue with previous skills and use a guide to create a proper citation.

6-8 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

<table>
<thead>
<tr>
<th>ELA.K12.EE.1.1:</th>
<th>Read and comprehend grade-level complex texts proficiently.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Clarifications:</strong></td>
<td>See Text Complexity for grade-level complexity bands and a text complexity rubric.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ELA.K12.EE.3.1:</th>
<th>Make inferences to support comprehension.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ELA.K12.EE.4.1:</th>
<th>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Clarifications:</strong></td>
<td>In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _____ because _____.” The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ELA.K12.EE.5.1:</th>
<th>Use the accepted rules governing a specific format to create quality work.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ELA.K12.EE.6.1:</th>
<th>Use appropriate voice and tone when speaking or writing.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Clarifications:</strong></td>
<td>In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</td>
</tr>

**General Course Information and Notes**

**GENERAL NOTES**

**Multicultural Studies** - The grade 9-12 Multicultural Studies course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of multicultural and multiethnic groups in the United States and their influence on the development of American culture. Content should include, but is not limited to, the influence of geography on the social and economic development of Native American culture, the influence of major historical events on the development of a multicultural American society and a study of the political, economic and social aspects of Native American, Hispanic American, African American and Asian American culture.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. |
| SS.912.G.2.3: | Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.  
**Clarifications:**  
Examples are desertification, global warming, cataclysmic natural disasters. |
| SS.912.G.2.4: | Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places. |
| SS.912.G.2.5: | Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.  
**Clarifications:**  
Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas. |
| SS.912.G.2.6: | Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.  
**Clarifications:**  
Examples are thematic, contour, and dot-density. |
| SS.912.G.4.1: | Interpret population growth and other demographic data for any given place. |
| SS.912.G.4.2: | Describe the impact of Constantine the Great's establishment of "New Rome" (Constantinople) and his recognition of Christianity as a legal religion.  
**Clarifications:**  
Examples of physical characteristics are climate, terrain, resources.  
Examples of human characteristics are religion, government, economy, demography. |
| SS.912.G.4.3: | Identify key figures associated with the Byzantine Empire.  
**Clarifications:**  
Examples are Justianin the Great, Theodora, Belisarius, John of Damascus, Anna Comnena, Cyril and Methodius. |
| SS.912.G.4.4: | Evaluate the role of history in shaping identity and character.  
**Clarifications:**  
Examples are ethnic, cultural, personal, national, religious. |
| SS.912.G.4.5: | Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). |
| SS.912.H.1.3: | Relate works in the arts to various cultures.  
**Clarifications:**  
Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman. |
| SS.912.H.1.4: | Clarify philosophical beliefs as they relate to works in the arts.  
**Clarifications:**  
Examples are classical architecture, protest music, Native American dance, Japanese Noh. |
| SS.912.H.1.5: | Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture. |
| SS.912.H.1.6: | Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture. |
| SS.912.H.2.1: | Use timelines to establish cause and effect relationships of historical events.  
**Clarifications:**  
Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era. |
| SS.912.H.2.2: | Interpret and evaluate primary and secondary sources.  
**Clarifications:**  
Examples are artifacts, images, auditory and written sources. |
| SS.912.H.2.3: | Explain how historians use historical inquiry and other sciences to understand the past.  
**Clarifications:**  
Examples are archaeology, economics, geography, forensic chemistry, political science, physics. |
| SS.912.H.2.4: | Describe the impact of Constantine the Great's establishment of "New Rome" (Constantinople) and his recognition of Christianity as a legal religion.  
**Clarifications:**  
Examples are Justianin the Great, Theodora, Belisarius, John of Damascus, Anna Comnena, Cyril and Methodius. |
| SS.912.H.2.5: | Explain the contributions of the Byzantine Empire.  
**Clarifications:**  
Examples are Justianin's Code, the preservation of ancient Greek and Roman learning and culture, artistic and architectural achievements, the empire's impact on the development of Western Europe, Islamic civilization, and Slavic peoples. |
| SS.912.H.2.6: | Describe the causes and effects of the Iconoclast controversy of the 8th and 9th centuries and the 11th century Christian schism between the churches of Constantinople and Rome. |
Analyze causes (Justinian's Plague, ongoing attacks from the "barbarians," the Crusades, and internal political turmoil) of the decline of the Byzantine Empire.

Describe the rise of the Ottoman Turks, the conquest of Constantinople in 1453, and the subsequent growth of the Ottoman Empire under the sultanate including Mehmet the Conqueror and Suleyman the Magnificent.

Describe the orders of medieval social hierarchy, the changing role of the Church, the emergence of feudalism, and the development of private property as a distinguishing feature of Western Civilization.

Recognize the importance of Christian monasteries and convents as centers of education, charitable and missionary activity, economic productivity, and political power.

Explain how Western civilization arose from a synthesis of classical Greco-Roman civilization, Judeo-Christian influence, and the cultures of northern European peoples promoting a cultural unity in Europe.

Describe the impact of Japan's physiography on its economic and political development.

Summarize the major cultural, economic, political, and religious developments in medieval Japan.

Examples are Pillow Book, Tale of Genji, Shinto and Japanese Buddhism, the rise of feudalism, the development of the shogunate, samurai, and social hierarchy.

Describe Japan's cultural and economic relationship to China and Korea.

Discuss significant people and beliefs associated with Islam.

Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.

Compare the major beliefs and principles of Judaism, Christianity, and Islam.

Determine the causes, effects, and extent of Islamic military expansion through Central Asia, North Africa, and the Iberian Peninsula.

Describe the expansion of Islam into India and the relationship between Muslims and Hindus.

Examples are Al-Ma'mun, Avicenna, Averroes, Algebra, Al-Razi, Alhambra, The Thousand and One Nights.

Describe key economic, political, and social developments in Islamic history.

Examples are growth of the caliphate, division of Sunni and Shi'a, role of trade, dhimmitude, Islamic slave trade.

Analyze the causes, key events, and effects of the European response to Islamic expansion beginning in the 7th century.

Examples are Crusades, Reconquista.

Identify important figures associated with the Crusades.

Examples are Alexius Comnenus, Pope Urban, Bernard of Clairvaux, Godfrey of Bouillon, Saladin, Richard the Lionheart, Baybars, Louis IX.

Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

Examples are Marie Curie, Albert Einstein, Enrico Fermi, Sigmund Freud, Wright Brothers, Charles R. Drew, mass vaccination, atomic energy, transistor, microchip, space exploration, Internet, discovery of DNA, Human Genome Project.

Discuss cultural, historical, and economic factors and governmental policies that created the opportunities for ethnic cleansing or genocide in Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them.

Examples are prejudice, racism, stereotyping, economic competition.

Analyze the causes, key events, and effects of the European response to Islamic expansion beginning in the 7th century.

Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

Examples are Marie Curie, Albert Einstein, Enrico Fermi, Sigmund Freud, Wright Brothers, Charles R. Drew, mass vaccination, atomic energy, transistor, microchip, space exploration, Internet, discovery of DNA, Human Genome Project.

Determine the specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.

Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.

Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.

Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.

Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.

Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.

Assess the extent to which the reasoning and evidence in a text support the author's claims.

Compare and contrast treatments of the same topic in several primary and secondary sources.

By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.

Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.

a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.

b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.

</table>
MAFS.K12.S-ID.1.4: Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve.

MAFS.K12.MP.1.1: Make sense of problems and persevere in solving them.

MAFS.K12.MP.1.4: Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

MAFS.K12.MP.3.1: Construct viable arguments and critique the reasoning of others.

MAFS.K12.MP.5.1: Use appropriate tools strategically.

MAFS.K12.MP.5.3: Attend to precision.

ELD.K12.ELL.SS.1: English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SS.5: English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

HE.912.C.2.7: Various cultures' dietary patterns, rites of passage, courtship practices, family roles, personal relationships, ethics, and parenting.

General Course Information and Notes

GENERAL NOTES

World Religions - The grade 9-12 World Religions course consists of the following content area strands: World History, Geography and Humanities. The primary content emphasis for this course pertains to the study of major world religious traditions of Buddhism, Christianity, Confucianism, Hinduism, Islam, Judaism, Shintoism and Taoism. Students will identify criteria upon which religious beliefs are based, analyze relationships between religious and social and political institutions, trace the major developments of the world’s living religions, distinguish the similarities and differences among the world's major religious traditions, synthesize information and ideas from conflicting religious beliefs, and interpret the development of a society as reflected by its religious beliefs.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Literacy Standards in Social Studies**

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

<tr>
<td>SS.912.G.1.3:</td>
<td>Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.</td>
</tr>
</tbody>
</table>
| SS.912.G.1.4: | Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.  
  **Clarifications:**  
  Examples are thematic, contour, and dot-density. |
| SS.912.G.2.1: | Identify the physical characteristics and the human characteristics that define and differentiate regions.  
  **Clarifications:**  
  Examples of physical characteristics are climate, terrain, resources.  
  Examples of human characteristics are religion, government, economy, demography. |
| SS.912.G.2.2: | Describe the factors and processes that contribute to the differences between developing and developed regions of the world.  
  **Clarifications:**  
  Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. |
| SS.912.G.2.3: | Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.  
  **Clarifications:**  
  Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.  
  Examples are desertification, global warming, cataclysmic natural disasters. |
| SS.912.G.4.1: | Interpret population growth and other demographic data for any given place.  
  **Clarifications:**  
  Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.  
  Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world. |
| SS.912.G.4.2: | Use political maps to describe the change in boundaries and governments within continents over time.  
  **Clarifications:**  
  Use geographic terms and tools to explain the change in boundaries and governments within continents over time. |
| SS.912.H.1.3: | Relate works in the arts to various cultures.  
  **Clarifications:**  
  Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman. |
| SS.912.H.1.4: | Explain philosophical beliefs as they relate to works in the arts.  
  **Clarifications:**  
  Examples are classical architecture, protest music, Native American dance, Japanese Noh. |
| SS.912.H.3.1: | Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.  
  **Clarifications:**  
  Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture. |
| SS.912.H.3.2: | Use timelines to establish cause and effect relationships of historical events.  
  **Clarifications:**  
  Compare time measurement systems used by different cultures.  
  Interpret and evaluate primary and secondary sources.  
  Explain how historians use historical inquiry and other sciences to understand the past.  
  Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).  
  Evaluate the role of history in shaping identity and character.  
  Identify key figures associated with the Byzantine Empire.  
  Explain the contributions of the Byzantine Empire.  
  Explain the causes and effects of the Iconoclast controversy of the 8th and 9th centuries and the 11th century Christian schism between the churches of Constantinople and Rome. |
Analyze causes (Justinian’s Plague, ongoing attacks from the “barbarians,” the Crusades, and internal political turmoil) of the decline of the Byzantine Empire.

Describe the rise of the Ottoman Turks, the conquest of Constantinople in 1453, and the subsequent growth of the Ottoman Empire under the sultans including Mehmet the Conqueror and Suleyman the Magnificent.

Describe the orders of medieval social hierarchy, the changing role of the Church, the emergence of feudalism, and the development of private property as a distinguishing feature of Western Civilization.

Recognize the importance of Christian monasteries and convents as centers of education, charitable and missionary activity, economic productivity, and political power.

Analyze the causes, key events, and effects of the European response to Islamic expansion beginning in the 7th century.

Describe key economic, political, and social developments in Islamic history.

Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

Discuss significant people and beliefs associated with Islam.

Identify important figures associated with the Crusades.

Describe the achievements, contributions, and key figures associated with the Islamic Golden Age.

Analyze the causes, key events, and effects of the European response to Islamic expansion beginning in the 7th century.

Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

Express connections between concepts and representations.

SS.912.W.2.1: Analyze causes (Justinian’s Plague, ongoing attacks from the “barbarians,” the Crusades, and internal political turmoil) of the decline of the Byzantine Empire.

SS.912.W.2.2: Describe the rise of the Ottoman Turks, the conquest of Constantinople in 1453, and the subsequent growth of the Ottoman Empire under the sultans including Mehmet the Conqueror and Suleyman the Magnificent.

SS.912.W.2.3: Describe the orders of medieval social hierarchy, the changing role of the Church, the emergence of feudalism, and the development of private property as a distinguishing feature of Western Civilization.

SS.912.W.2.4: Recognize the importance of Christian monasteries and convents as centers of education, charitable and missionary activity, economic productivity, and political power.

SS.912.W.2.5: Analyze the causes, key events, and effects of the European response to Islamic expansion beginning in the 7th century.

SS.912.W.2.6: Describe key economic, political, and social developments in Islamic history.

SS.912.W.2.7: Identify important figures associated with the Crusades.

SS.912.W.2.8: Describe the achievements, contributions, and key figures associated with the Islamic Golden Age.

SS.912.W.2.9: Analyze the causes, key events, and effects of the European response to Islamic expansion beginning in the 7th century.

SS.912.W.2.10: Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

Mathematicians who participate in effortful learning both individually and with others: Anomalous understanding by representing problems in multiple ways.

Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
### MA.K12.MTR.2.1: Choose a representation based on the given context or purpose.

**Clarifications:**
- Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
  - Help students make connections between concepts and representations.
  - Provide opportunities for students to use manipulatives when investigating concepts.
  - Guide students from concrete to pictorial to abstract representations as understanding progresses.
  - Show students that various representations can have different purposes and can be useful in different situations.

### MA.K12.MTR.3.1: Complete tasks with mathematical fluency.

**Clarifications:**
- Teachers who encourage students to complete tasks with mathematical fluency:
  - Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
  - Offer multiple opportunities for students to practice efficient and generalizable methods.
  - Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

### MA.K12.MTR.4.1: Engage in discussions that reflect on the mathematical thinking of self and others.

**Clarifications:**
- Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
  - Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
  - Support students to develop generalizations based on the similarities found among problems.
  - Provide opportunities for students to create plans and procedures to solve problems.
  - Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

### MA.K12.MTR.5.1: Use patterns and structure to help understand and connect mathematical concepts.

**Clarifications:**
- Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
  - Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
  - Support students to develop generalizations based on the similarities found among problems.
  - Provide opportunities for students to create plans and procedures to solve problems.
  - Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

### MA.K12.MTR.6.1: Assess the reasonableness of solutions.

**Clarifications:**
- Teachers who encourage students to assess the reasonableness of solutions:
  - Have students estimate or predict solutions prior to solving.
  - Prompt students to continually ask, “Does this solution make sense? How do you know?”
  - Reinforce that students check their work as they progress within and after a task.
  - Strengthen students' ability to verify solutions through justifications.

### Apply mathematics to real-world contexts.

**Clarifications:**
- Teachers who encourage students to apply mathematics to real-world contexts:
  - Connect mathematical concepts to everyday experiences.
  - Use models and methods to understand, represent and solve problems.
  - Perform investigations to gather data or determine if a method is appropriate.
  - Redesign models and methods to improve accuracy or
General Course Information and Notes

GENERAL NOTES

World Religions - The grade 9-12 World Religions course consists of the following content area strands: World History, Geography and Humanities. The primary content emphasis for this course pertains to the study of major world religious traditions of Buddhism, Christianity, Confucianism, Hinduism, Islam, Judaism, Shintoism and Taoism. Students will identify criteria upon which religious beliefs are based, analyze relationships between religious and social and political institutions, trace the major developments of the world’s living religions, distinguish the similarities and differences among the world’s major religious traditions, synthesize information and ideas from conflicting religious beliefs, and interpret the development of a society as reflected by its religious beliefs.

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students’ content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:
1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

<td>SS.912.A.1.1</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
</tbody>
</table>
| SS.912.A.1.2 | Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.  
**Clarifications:** Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection. |
| SS.912.A.1.3 | Utilize timelines to identify the time sequence of historical data. |
| SS.912.A.1.4 | Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.  
**Clarifications:** Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. |
| SS.912.A.1.5 | Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf |
| SS.912.A.1.6 | Use case studies to explore social, political, legal, and economic relationships in history. |
| SS.912.A.1.7 | Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications. |
| SS.912.A.3.10 | Review different economic and philosophic ideologies.  
**Clarifications:** Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchism. |
| SS.912.A.7.5 | This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.  
**Clarifications:** Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches. |
| SS.912.C.1.1 | Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government. |
| SS.912.C.1.2 | Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights. |
| SS.912.C.1.3 | Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy. |
| SS.912.C.1.4 | Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights. |
| SS.912.C.1.5 | Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism. |
| SS.912.C.2.6 | Evaluate, take, and defend positions about rights protected by the Constitution and Bill of Rights. |
| SS.912.C.3.1 | Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights.  
**Clarifications:** Evolve the significance and outcomes of landmark Supreme Court cases.  
| SS.912.C.3.15 | Identify and examine how power and responsibility are distributed, shared, and limited by the Constitution.  
**Clarifications:** Evaluate the physical characteristics and the human characteristics that define and differentiate regions. |
| SS.912.G.2.1 | Examine the physical characteristics and climate, terrain, resources.  
**Examples:** Physical characteristics are climate, government, economy, demography. |
| SS.912.G.2.2 | Describe the factors and processes that contribute to the differences between developing and developed regions of the world.  
**Clarifications:** Use geographic terms and processes that contribute to the differences between developing and developed regions of the world.  
**Examples:** Desertification, global warming, catastrophic natural disasters. |
| SS.912.G.2.3 | Explain philosophical beliefs as they relate to works in the arts. |
### SS.912.H.1.4: Clarifications
- Examples are classical architecture, protest music, Native American dance, Japanese Noh.

### SS.912.H.2.3: Clarifications
- Apply various types of critical analysis (contextual, formal, and intuitive criticism) to works in the arts, including the types and use of symbolism within art forms and their philosophical implications.

### SS.912.H.3.1: Clarifications
- Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.

### SS.912.H.3.2: Clarifications
- Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.

### SS.912.W.1.1: Clarifications
- Use timelines to establish cause and effect relationships of historical events.

### SS.912.W.1.2: Clarifications
- Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.

### SS.912.W.1.3: Clarifications
- Examples are artifacts, images, auditory and written sources.

### SS.912.W.1.4: Clarifications
- Explain how historians use historical inquiry and other sciences to understand the past.

### SS.912.W.1.5: Clarifications
- Examples are archaeology, economics, geography, forensic chemistry, political science, physics.

### SS.912.W.1.6: Clarifications
- Evaluate the role of history in shaping identity and character.

### SS.912.W.2.2: Clarifications
- Describe Japan's cultural and economic relationship to China and Korea.

### SS.912.W.3.1: Clarifications
- Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.

### SS.912.W.3.2: Clarifications
- Compare the major beliefs and principles of Judaism, Christianity, and Islam.

### SS.912.W.3.4: Clarifications
- Describe the expansion of Islam into India and the relationship between Muslims and Hindus.

### SS.912.W.4.10: Clarifications
- Examples are Francis Bacon, Nicholas Copernicus, Galileo Galilei, Johannes Kepler, Isaac Newton, Blaise Pascal, Vesalius.

### SS.912.W.5.2: Clarifications
- Identify major causes of the Enlightenment.

### SS.912.W.5.3: Clarifications
- Examples are ideas from the Renaissance, Scientific Revolution, Reformation, and resistance to absolutism.

### SS.912.W.5.4: Clarifications
- Summarize the major ideas of Enlightenment philosophers.

### SS.912.W.5.5: Clarifications
- Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.

### SS.912.W.6.3: Clarifications
- Analyze the extent to which the Enlightenment impacted the American and French Revolutions.

### SS.912.W.6.4: Clarifications
- Compare the philosophies of capitalism, socialism, and communism as described by Adam Smith, Robert Owen, and Karl Marx.

### SS.912.W.6.6: Clarifications
- Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.

### SS.912.W.6.8: Clarifications
- Describe the rise and goals of nationalist leaders in the post-war era and the impact of their rule on their societies.

### SS.912.W.8.8: Clarifications
- Examples are Mahatma Gandhi, Fidel Castro, Gamal Abdel Nasser, Francois 'Papa Doc' Duvalier, Jawaharlal Nehru.

### SS.912.W.8.9: Clarifications
- Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.

### SS.912.W.8.10: Clarifications
- Explain the impact of religious fundamentalism in the last half of the 20th century, and identify related events and forces in the Middle East over the last several decades.

### SS.912.W.9.1: Clarifications
- Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

### SS.912.W.9.7: Clarifications
- Describe the impact of and global response to international terrorism.
Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.

Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.

Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.

Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.

Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.

Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.

Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.

Assess the extent to which the reasoning and evidence in a text support the author's claims.

Compare and contrast treatments of the same topic in several primary and secondary sources.

By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.

Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.

a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.

b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.

c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.

d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.

Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.

Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.

Write arguments focused on discipline-specific content.

a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence.

b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns.

c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.

d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

e. Provide a concluding statement or section that follows from or supports the argument presented.

Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.

Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes.

a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.

b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.

c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts.

d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers.

e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.

Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

Gather relevant information from multiple authoritative print and digital sources, using advance searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.

Draw evidence from informational texts to support analysis, reflection, and research.

Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★

Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★
MAFS.912.S-IC.2.5: Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★

Standard Relation to Course: Supporting

MAFS.912.S-IC.2.6: Evaluate reports based on data. ★

Standard Relation to Course: Supporting

Represent data with plots on the real number line (dot plots, histograms, and box plots). ★

MAFS.912.S-ID.1.1: In grades 6–8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. ★

Clarifications:
- Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★

Standard Relation to Course: Supporting

MAFS.912.S-ID.1.2: In grades 6–8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. ★

Clarifications:
- Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★

Standard Relation to Course: Supporting

Make sense of problems and persevere in solving them.

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze given data, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get further information they need. Mathematically proficient students explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

MAFS.K12.MP.3.1:

Mathematically proficient students use concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Older students learn to identify and construct domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

MAFS.K12.MP.1.1:

Construct viable arguments and critique the reasoning of others.

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They can analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Older students learn to identify and construct domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

Use appropriate tools strategically.

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, protractor, calculator, spreadsheet, computer algebra system, statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant mathematical mathematics, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

Attend to precision.

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

MAFS.K12.MP.6.1:

MAFS.912.S-ID.1.3: In grades 6–8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. ★

Clarifications:
- Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★

Standard Relation to Course: Supporting

MAFS.912.S-ID.1.4: Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★

Standard Relation to Course: Supporting

ELD.K12.ELL.SI.1: English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SS.1: English language learners communicate information, ideas, and concepts necessary for academic success in the content area of Social Studies.

HE.912.C.2.7: Clarifications:
- Various cultures' dietary patterns, rites of passage, courtship practices, family roles, personal relationships, ethics, and parenting.
GENERAL NOTES

Philosophy - The grade 9-12 Philosophy course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the fundamental questions pertinent to all areas of human activity and inquiries. Content should include, but is not limited to, an introduction to classical and modern philosophies, the fundamental principles of philosophical thought, such as semantics, logic, inductive and deductive reasoning, and social, political and religious philosophies.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

GENERAL INFORMATION

Course Number: 2105340
Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Philosophy and Religion > Abbreviated Title: PHILOS
Number of Credits: Half credit (.5)
Course Type: Elective Course
Course Status: Course Approved
Grade Level(s): 9,10,11,12
Course Length: Semester (S)
Course Level: 2

Educator Certifications

History (Grades 6-12)
Humanities (Elementary and Secondary Grades K-12)
Social Science (Grades 6-12)
## Philosophy (#2105340) 2022 - 2023

<td>Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).</td>
</tr>
<tr>
<td>SS.912.W.1.6:</td>
<td>Evaluate the role of history in shaping identity and character.</td>
</tr>
<tr>
<td>SS.912.W.2.12:</td>
<td>Recognize the importance of Christian monasteries and convents as centers of education, charitable and missionary activity, economic productivity, and political power.</td>
</tr>
<tr>
<td>SS.912.W.2.13:</td>
<td>Explain how Western civilization arose from a synthesis of classical Greco-Roman civilization, Judeo-Christian influence, and the cultures of northern European peoples promoting a cultural unity in Europe.</td>
</tr>
<tr>
<td>SS.912.W.2.20:</td>
<td>Summarize the major cultural, economic, political, and religious developments in medieval Japan.</td>
</tr>
<tr>
<td>SS.912.W.3.1:</td>
<td>Discuss significant people and beliefs associated with Islam.</td>
</tr>
<tr>
<td>SS.912.W.3.2:</td>
<td>Compare the major beliefs and principles of Judaism, Christianity, and Islam.</td>
</tr>
<tr>
<td>SS.912.W.3.4:</td>
<td>Describe the expansion of Islam into India and the relationship between Muslims and Hindus.</td>
</tr>
<tr>
<td>SS.912.W.4.10:</td>
<td>Identify the major contributions of individuals associated with the Scientific Revolution.</td>
</tr>
<tr>
<td>SS.912.W.5.2:</td>
<td>Identify major causes of the Enlightenment.</td>
</tr>
<tr>
<td>SS.912.W.5.3:</td>
<td>Summarize the major ideas of Enlightenment philosophers.</td>
</tr>
<tr>
<td>SS.912.W.5.4:</td>
<td>Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.</td>
</tr>
<tr>
<td>SS.912.W.5.5:</td>
<td>Analyze the extent to which the Enlightenment impacted the American and French Revolutions.</td>
</tr>
<tr>
<td>SS.912.W.6.3:</td>
<td>Compare the philosophies of capitalism, socialism, and communism as described by Adam Smith, Robert Owen, and Karl Marx.</td>
</tr>
<tr>
<td>SS.912.W.6.4:</td>
<td>Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.</td>
</tr>
<tr>
<td>SS.912.W.8.8:</td>
<td>Describe the rise and goals of nationalist leaders in the post-war era and the impact of their rule on their societies.</td>
</tr>
<tr>
<td>SS.912.W.8.9:</td>
<td>Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.</td>
</tr>
<tr>
<td>SS.912.W.8.10:</td>
<td>Explain the impact of religious fundamentalism in the last half of the 20th century, and identify related events and forces in the Middle East over the last several decades.</td>
</tr>
<tr>
<td>SS.912.W.9.1:</td>
<td>Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.</td>
</tr>
<tr>
<td>SS.912.W.9.7:</td>
<td>Describe the impact of and global response to international terrorism.</td>
</tr>
</tbody>
</table>

Mathematicians who participate in effortful learning both individually and with others:
MA.K12.MTR.1.1: Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

**Clarifications:**
- Teachers who encourage students to participate actively in effortful learning both individually and with others:
  - Cultivate a community of growth mindset learners.
  - Foster perseverance in students by choosing tasks that are challenging.
  - Develop students' ability to analyze and problem solve.
  - Recognize students' effort when solving challenging problems.

**Mathematicians who demonstrate understanding by representing problems in multiple ways:**
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

**Clarifications:**
- Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
  - Help students make connections between concepts and representations.
  - Provide opportunities for students to use manipulatives when investigating concepts.
  - Guide students from concrete to pictorial to abstract representations as understanding progresses.
  - Show students that various representations can have different purposes and can be useful in different situations.

**Mathematicians who complete tasks with mathematical fluency:**
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**Clarifications:**
- Teachers who encourage students to complete tasks with mathematical fluency:
  - Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
  - Offer multiple opportunities for students to practice efficient and generalizable methods.
  - Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

**Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:**
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clarifications:**
- Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
  - Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
  - Create opportunities for students to discuss their thinking with peers.
  - Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
  - Develop students' ability to analyze and problem solve.

**Mathematicians who use patterns and structure to help understand and connect mathematical concepts:**
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
- Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
  - Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
  - Support students to develop generalizations based on the similarities found among problems.
  - Provide opportunities for students to create plans and procedures to solve problems.
  - Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

**Assess the reasonableness of solutions.**
- Mathematicians who assess the reasonableness of solutions:
MA.K12.MTR.6.1:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:
- Apply mathematics to real-world contexts.
  Mathematicians who apply mathematics to real-world contexts:
  - Connect mathematical concepts to everyday experiences.
  - Use models and methods to understand, represent and solve problems.
  - Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.
  
Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:
- Read and comprehend grade-level complex texts proficiently.

Clarifications:
See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

Clarifications:
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _____ because ______.” The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

Use the accepted rules governing a specific format to create quality work.

Clarifications:
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

Use appropriate voice and tone when speaking or writing.

Clarifications:
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

ELD.K12.ELL.SL.1:
English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SS.1:
English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

HE.912.C.2.7:
Analyze how culture supports and challenges health beliefs, practices, and behaviors.

Clarifications:
Various cultures' dietary patterns, rites of passage, courtship practices, family roles, personal relationships, ethics, and parenting.
GENERAL NOTES

Philosophy - The grade 9-12 Philosophy course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the fundamental questions pertinent to all areas of human activity and inquiries. Content should include, but is not limited to, an introduction to classical and modern philosophies, the fundamental principles of philosophical thought, such as semantics, logic, inductive and deductive reasoning, and social, political and religious philosophies.

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida’s Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida’s B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

## Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.2</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. <strong>Clarifications:</strong> Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</td>
</tr>
<tr>
<td>SS.912.A.1.3</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.4</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past. <strong>Clarifications:</strong> Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</td>
</tr>
<tr>
<td>SS.912.A.1.5</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.A.1.6</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td>SS.912.A.1.7</td>
<td>Review different economic and philosophic ideologies. <strong>Clarifications:</strong> Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchism.</td>
</tr>
<tr>
<td>SS.912.A.3.10</td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.7.5</td>
<td>Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights. <strong>Clarifications:</strong> Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</td>
</tr>
<tr>
<td>SS.912.CG.1.2</td>
<td>Explain the influence of Enlightenment ideas on the Declaration of Independence. <strong>Clarifications:</strong> Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</td>
</tr>
<tr>
<td>SS.912.CG.1.3</td>
<td>Explain arguments presented in the Federalist Papers in support of ratifying the U.S. Constitution and a republican form of government. <strong>Clarifications:</strong> Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</td>
</tr>
<tr>
<td>SS.912.CG.1.4</td>
<td>Analyze how the ideals and principles expressed in the founding documents shape America as a constitutional republic. <strong>Clarifications:</strong> Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</td>
</tr>
<tr>
<td>SS.912.CG.1.5</td>
<td>Explain how the U.S. Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers. <strong>Clarifications:</strong> Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</td>
</tr>
<tr>
<td>SS.912.CG.3.1</td>
<td>Analyze how certain political ideologies conflict with the principles of freedom and democracy. <strong>Clarifications:</strong> Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</td>
</tr>
<tr>
<td>SS.912.CG.3.11: Identify the physical characteristics and the human characteristics that define and differentiate regions.</td>
<td></td>
</tr>
<tr>
<td>---</td>
<td></td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td></td>
</tr>
<tr>
<td>Examples of physical characteristics are climate, terrain, resources.</td>
<td></td>
</tr>
<tr>
<td>Examples of human characteristics are religion, government, economy, demography.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.G.2.1: Describe the factors and processes that contribute to the differences between developing and developed regions of the world.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Clarifications:</strong></td>
</tr>
<tr>
<td>Examples are desertification, global warming, cataclysmic natural disasters.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.G.2.2: Compare the major beliefs and principles of Judaism, Christianity, and Islam.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Clarifications:</strong></td>
</tr>
<tr>
<td>Examples are Jewish monotheism, the Ten Commandments, the New Testament, the Gospels, the Quran, the Hadith.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.H.3.1: Compare time measurement systems used by different cultures.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Clarifications:</strong></td>
</tr>
<tr>
<td>Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.H.3.2: Identify the major contributions of individuals associated with the Scientific Revolution.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Clarifications:</strong></td>
</tr>
<tr>
<td>Examples are Francis Bacon, Nicholas Copernicus, Rene Descartes, Galileo Galilei, Johannes Kepler, Isaac Newton, Blaise Pascal, Vesalius.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.H.4.2: Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Clarifications:</strong></td>
</tr>
<tr>
<td>Examples are the impact of the printing press, the development of the steam engine, the development of the telephone, the Internet.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.W.4.10: Evaluate how historians use historical inquiry and other sciences to understand the past.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Clarifications:</strong></td>
</tr>
<tr>
<td>Examples are the development of the scientific method, the use of comparative history, the use of primary sources.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.W.5.2: Summarize the major ideas of Enlightenment philosophers.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Clarifications:</strong></td>
</tr>
<tr>
<td>Examples are ideas from the Renaissance, Scientific Revolution, Reformation, and resistance to absolutism.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.W.5.3: Evaluate the impact of Enlightenment ideas on the development of economic, political, and religious structures in the Western world.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Clarifications:</strong></td>
</tr>
<tr>
<td>Examples are the development of capitalism, socialism, and communism.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.W.5.5: Identify social, moral, ethical, religious, and legal issues arising in works of arts within a culture.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Clarifications:</strong></td>
</tr>
<tr>
<td>Examples are the impact of the Reformation on art, the influence of the Renaissance on art, the impact of the Enlightenment on art.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.W.6.3: Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Clarifications:</strong></td>
</tr>
<tr>
<td>Examples are the development of the, the development of the, the development of the.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.H.1.4: Identify major causes of the Enlightenment.</th>
</tr>
</thead>
<tbody>
<tr>

</table>
| SS.912.W.6.4: | Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.  
**Clarifications:** Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws. |
| SS.912.W.8.8: | Describe the rise and goals of nationalist leaders in the post-war era and the impact of their rule on their societies.  
**Clarifications:** Examples are Mahatma Ghandi, Fidel Castro, Gamal Abdel Nasser, Francois ‘Papa Doc’ Duvalier, Jawaharlal Nehru. |
| SS.912.W.8.9: | Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.  
**Clarifications:** Examples are Iranian Revolution, Mujahideen in Afghanistan, Persian Gulf War. |
| SS.912.W.8.10: | Explain the impact of religious fundamentalism in the last half of the 20th century, and identify related events and forces in the Middle East over the last several decades.  
**Clarifications:** Examples are Marie Curie, Albert Einstein, Enrico Fermi, Sigmund Freud, Wright Brothers, Charles R. Drew, mass vaccination, atomic energy, transistor, microchip, space exploration, Internet, discovery of DNA, Human Genome Project. |
| MA.K12.MTR.1.1: | Mathematics who participate in effortful learning both individually and with others:  
- Analyze the problem in a way that makes sense given the task.  
- Ask questions that will help with solving the task.  
- Build perseverance by modifying methods as needed while solving a challenging task.  
- Stay engaged and maintain a positive mindset when working to solve tasks.  
- Help and support each other when attempting a new method or approach.  
**Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others:  
- Cultivate a community of growth mindset learners.  
- Foster perseverance in students by choosing tasks that are challenging.  
- Develop students' ability to analyze and problem solve.  
- Recognize students' effort when solving challenging problems. |
| MA.K12.MTR.2.1: | Demonstrate understanding by representing problems in multiple ways.  
Mathematicians who demonstrate understanding by representing problems in multiple ways:  
- Build understanding through modeling and using manipulatives.  
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.  
- Progress from modeling problems with objects and drawings to using algorithms and equations.  
- Express connections between concepts and representations.  
- Choose a representation based on the given context or purpose.  
**Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:  
- Help students make connections between concepts and representations.  
- Provide opportunities for students to use manipulatives when investigating concepts.  
- Guide students from concrete to pictorial to abstract representations as understanding progresses.  
- Show students that various representations can have different purposes and can be useful in different situations. |
| MA.K12.MTR.3.1: | Complete tasks with mathematical fluency.  
Mathematicians who complete tasks with mathematical fluency:  
- Select efficient and appropriate methods for solving problems within the given context.  
- Maintain flexibility and accuracy while performing procedures and mental calculations.  
- Complete tasks accurately and with confidence.  
- Adapt procedures to apply them to a new context.  
- Use feedback to improve efficiency when performing calculations.  
**Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency:  
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.  
- Offer multiple opportunities for students to practice efficient and generalizable methods.  
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used. |
| MA.K12.MTR.4.1: | Engage in discussions that reflect on the mathematical thinking of self and others.  
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  
- Communicate mathematical ideas, vocabulary and methods effectively.  
- Analyze the mathematical thinking of others.  
- Compare the efficiency of a method to those expressed by others.  
- Recognize errors and suggest how to correctly solve the task.  
- Justify results by explaining methods and processes.  
- Construct possible arguments based on evidence.  
**Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:  
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.  
- Create opportunities for students to discuss their thinking with peers. |
• Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
• Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
• Focus on relevant details within a problem.
• Create plans and procedures to logically order events, steps or ideas to solve problems.
• Decompose a complex problem into manageable parts.
• Relate previously learned concepts to new concepts.
• Look for similarities among problems.
• Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
• Support students to develop generalizations based on the similarities found among problems.
• Provide opportunities for students to create plans and procedures to solve problems.
• Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:
• Estimate to discover possible solutions.
• Use benchmark quantities to determine if a solution makes sense.
• Check calculations when solving problems.
• Verify possible solutions by explaining the methods used.
• Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:
• Have students estimate or predict solutions prior to solving.
• Prompt students to continually ask, "Does this solution make sense? How do you know?"
• Reinforce that students check their work as they progress within and after a task.
• Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
• Connect mathematical concepts to everyday experiences.
• Use models and methods to understand, represent and solve problems.
• Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:
• Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
• Challenge students to question the accuracy of their models and methods.
• Support students as they validate conclusions by comparing them to the given situation.
• Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

Clarifications:
See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

Clarifications:
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think ________ because _______." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

**Use the accepted rules governing a specific format to create quality work.**

**ELA.K12.EE.5.1:**

**Clarifications:**
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

**ELA.K12.EE.6.1:**

**Clarifications:**
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

**Use appropriate voice and tone when speaking or writing.**

**ELD.K12.ELL.SS.1:**

**English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.**

**ELD.K12.ELL.SI.1:**

**English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.**

**ELA.K12.EE.4.1:**

**Clarifications:**
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think ________ because _______." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

**General Course Information and Notes**

**GENERAL NOTES**

**Philosophy:** The grade 9-12 Philosophy course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the fundamental questions pertinent to all areas of human activity and inquiries. Content should include, but is not limited to, an introduction to classical and modern philosophies, the fundamental principles of philosophical thought, such as semantics, logic, inductive and deductive reasoning, and social, political and religious philosophies.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students’ content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida’s B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EE and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

**GENERAL INFORMATION**

**Course Number:** 2105340

**Course Path:** Section: Grades PreK to 12 Education
Courses > Grade Group: Grades 9 to 12 and Adult
Education Courses > Subject: Social Studies >
SubSubject: Philosophy and Religion >
Abbreviated Title: PHILOS

**Course Length:** Semester (S)

**Course Type:** Elective Course

**Course Status:** Draft - Course Pending Approval

**Number of Credits:** Half credit (.5)

**Grade Level(s):** 9,10,11,12

<tr>
<td>------</td>
<td>-------------</td>
</tr>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.2:</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</td>
</tr>
<tr>
<td>SS.912.A.1.3:</td>
<td>Analyze various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td>SS.912.A.1.4:</td>
<td>Evaluate the influence of American foreign policy on other nations and assess human rights policies of the United States and other countries.</td>
</tr>
<tr>
<td>SS.912.A.1.5:</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.A.1.6:</td>
<td>Use secondary sources to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.7:</td>
<td>Apply various types of critical analysis (contextual, formal, and intuitive criticism) to works in the arts, including the types and use of symbolism within art forms and their philosophical implications.</td>
</tr>
<tr>
<td>SS.912.A.2.1:</td>
<td>Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.</td>
</tr>
<tr>
<td>SS.912.A.2.2:</td>
<td>Evaluate the significance and outcomes of landmark Supreme Court cases.</td>
</tr>
<tr>
<td>SS.912.A.2.3:</td>
<td>Examine the controversy surrounding the proliferation of nuclear technology in the United States and the world.</td>
</tr>
<tr>
<td>SS.912.A.2.4:</td>
<td>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.</td>
</tr>
<tr>
<td>SS.912.A.2.5:</td>
<td>Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</td>
</tr>
<tr>
<td>SS.912.A.2.6:</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.2.7:</td>
<td>Review different economic and philosophic ideologies.</td>
</tr>
<tr>
<td>SS.912.A.3.10:</td>
<td>Utilize primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</td>
</tr>
<tr>
<td>SS.912.C.1.1:</td>
<td>Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.</td>
</tr>
<tr>
<td>SS.912.C.1.2:</td>
<td>Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.</td>
</tr>
<tr>
<td>SS.912.C.1.3:</td>
<td>Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.</td>

<tr>
<td>Standards</td>
<td>Description</td>
</tr>
<tr>
<td>----------</td>
<td>-------------</td>
</tr>
<tr>
<td>SS.912.H.3.1</td>
<td>Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.</td>
</tr>
<tr>
<td>SS.912.H.3.2</td>
<td>Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.</td>
</tr>
<tr>
<td>SS.912.W.1.1</td>
<td>Use timelines to establish cause and effect relationships of historical events.</td>
</tr>
<tr>
<td>SS.912.W.1.2</td>
<td>Compare time measurement systems used by different cultures.</td>
</tr>
<tr>
<td>SS.912.W.1.3</td>
<td>Interpret and evaluate primary and secondary sources.</td>
</tr>
<tr>
<td>SS.912.W.1.4</td>
<td>Explain how historians use historical inquiry and other sciences to understand the past.</td>
</tr>
<tr>
<td>SS.912.W.1.5</td>
<td>Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).</td>
</tr>
<tr>
<td>SS.912.W.1.6</td>
<td>Evaluate the role of history in shaping identity and character.</td>
</tr>
<tr>
<td>SS.912.W.2.13</td>
<td>Explain how Western civilization arose from a synthesis of classical Greco-Roman civilization, Judeo-Christian influence, and the cultures of northern European peoples promoting a cultural unity in Europe.</td>
</tr>
<tr>
<td>SS.912.W.2.20</td>
<td>Summarize the major cultural, economic, political, and religious developments in medieval Japan.</td>
</tr>
<tr>
<td>SS.912.W.2.22</td>
<td>Describe Japan's cultural and economic relationship to China and Korea.</td>
</tr>
<tr>
<td>SS.912.W.3.1</td>
<td>Discuss significant people and beliefs associated with Islam.</td>
</tr>
<tr>
<td>SS.912.W.3.2</td>
<td>Compare the major beliefs and principles of Judaism, Christianity, and Islam.</td>
</tr>
<tr>
<td>SS.912.W.3.4</td>
<td>Describe the expansion of Islam into India and the relationship between Muslims and Hindus.</td>
</tr>
<tr>
<td>SS.912.W.4.14</td>
<td>Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.</td>
</tr>
<tr>
<td>SS.912.W.5.2</td>
<td>Identify major causes of the Enlightenment.</td>
</tr>
<tr>
<td>SS.912.W.5.3</td>
<td>Summarize the major ideas of Enlightenment philosophers.</td>
</tr>
<tr>
<td>SS.912.W.5.4</td>
<td>Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.</td>
</tr>
<tr>
<td>SS.912.W.6.4</td>
<td>Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.</td>
</tr>
<tr>
<td>SS.912.W.7.10</td>
<td>Summarize the causes and effects of President Truman's decision to drop the atomic bombs on Japan.</td>
</tr>
<tr>
<td>SS.912.W.8.6</td>
<td>Explain the 20th century background for the establishment of the modern state of Israel in 1948, including the Zionist movement led by Theodor Herzl, and the ongoing military and political conflicts between Israel and the Arab-Muslim world.</td>
</tr>
<tr>
<td>SS.912.W.9.3</td>
<td>Explain cultural, historical, and economic factors and governmental policies that created the opportunities for ethnic cleansing or genocide in Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them.</td>
</tr>
<tr>
<td>SS.912.W.9.7</td>
<td>Describe the impact of and global response to international terrorism.</td>
</tr>
<tr>
<td>LAFS.910.RH.1.1</td>
<td>Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.</td>
</tr>
<tr>
<td>LAFS.910.RH.1.2</td>
<td>Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.</td>
</tr>
<tr>
<td>LAFS.910.RH.1.3</td>
<td>Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.</td>
</tr>
<tr>
<td>LAFS.910.RH.2.4</td>
<td>Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.</td>
</tr>
<tr>
<td>LAFS.910.RH.2.5</td>
<td>Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.</td>
</tr>
<tr>
<td>LAFS.910.RH.2.6</td>
<td>Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.</td>
</tr>
<tr>
<td>LAFS.910.RH.3.7</td>
<td>Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.</td>
</tr>
<tr>
<td>LAFS.910.RH.3.8</td>
<td>Assess the extent to which the reasoning and evidence in a text support the author's claims.</td>
</tr>
<tr>
<td>LAFS.910.RH.3.9</td>
<td>Compare and contrast treatments of the same topic in several primary and secondary sources.</td>
</tr>
<tr>
<td>LAFS.910.RH.4.10</td>
<td>By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.</td>
</tr>
</tbody>
</table>

Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others’ ideas and expressing their own clearly and persuasively.

- a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.
LAFS.910.SL.1.1: Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.

LAFS.910.SL.1.2: Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.

LAFS.910.SL.1.3: Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.

LAFS.910.SL.2.4: Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.

Write arguments focused on discipline-specific content.

a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence.

b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience’s knowledge level and concerns.

c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.

d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

e. Provide a concluding statement or section that follows from or supports the argument presented.

LAFS.910.SL.1.1: Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience’s knowledge of the topic.

c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts.

d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as the expertise of likely readers.

e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).

LAFS.910.SL.2.5: Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the credibility and significance of the sources on the subject, demonstrating understanding of the subject under investigation.

LAFS.910.SL.2.6: Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling.

LAFS.910.SL.2.7: Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant.

LAFS.910.SL.2.8: Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

LAFS.910.SL.2.9: Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence.

LAFS.910.WHST.1.2: Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes.

a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.

b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience’s knowledge of the topic.

c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts.

d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as the expertise of likely readers.

e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).

LAFS.910.WHST.2.5: Develop and strengthen writing as needed by planning, revising, and rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

LAFS.910.WHST.2.6: Use technology, including the Internet, to produce, publish, and update writing products, taking advantage of technology’s capacity to link to other information and to display information flexibly and dynamically.

LAFS.910.WHST.3.8: Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each.

MAFS.912.S.IC.2.3: Represent data with plots on the real number line (dot plots, histograms, and box plots).

Standard Relation to Course: Supporting

MAFS.912.S.IC.2.4: Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling.

Standard Relation to Course: Supporting

MAFS.912.S.IC.2.5: Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant.

Standard Relation to Course: Supporting

MAFS.912.S.IC.2.6: Evaluate reports based on data.

Standard Relation to Course: Supporting

MAFS.912.S-ID.1.1: Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers).

Clari...
In grades 6–8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

**MAFS.912.S-ID.1.3**: Make sense of problems and persevere in solving them.

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

**MAFS.912.S-ID.1.4**: Construct viable arguments and critique the reasoning of others.

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

**MAFS.912.S-ID.1.3**: Use appropriate tools strategically.

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.

Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

**MAFS.912.S-ID.1.3**: Attend to precision.

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

**MAFS.912.C.2.7**: Clarifications:

Various cultures’ dietary patterns, rites of passage, courtship practices, family roles, personal relationships, ethics, and parenting.

**MAFS.912.C.2.7**: English language learners communicate for social and instructional purposes within the school setting.

**MAFS.912.C.2.7**: English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

**MAFS.912.C.2.7**: Analyze how culture supports and challenges health beliefs, practices, and behaviors.

**MAFS.912.C.2.7**: General Course Information and Notes

**GENERAL NOTES**

**Ethics**: The grade 9-12 Ethics course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the foundations of ethical thought and theories and the process of moral development. Content should include, but is not limited to, the sources of ethical beliefs and practices, traditional ethical theories, the strengths and weaknesses of the principal models of moral development, the typical fallacies in flawed moral arguments, the difference between an ethical choice and a legal decision, major ethical questions in American society such as public service, law, the workplace, bioethics, and new technologies, and current ethical issues in the local and national arena.

**Mathematics Benchmark Guidance**: Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:
1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Literacy Standards in Social Studies**

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

## Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history. Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. <strong>Clarifications:</strong> Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</td>
</tr>
<tr>
<td>SS.912.A.1.2</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history. Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past. Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. <strong>Clarifications:</strong> Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: <a href="http://www.fldoe.org/bil/library_media/pdf/12totalfinds.pdf">http://www.fldoe.org/bil/library_media/pdf/12totalfinds.pdf</a></td>
</tr>
<tr>
<td>SS.912.A.1.3</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.4</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications. Review different economic and philosophic ideologies. <strong>Clarifications:</strong> Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchism.</td>
</tr>
<tr>
<td>SS.912.A.3.10</td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.6.11</td>
<td>Examine the controversy surrounding the proliferation of nuclear technology in the United States and the world. <strong>Clarifications:</strong> This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.C.2.4</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good. Identify the expansion of civil rights and liberties by examining the principles contained in primary documents. <strong>Clarifications:</strong> Examples are Preamble, Declaration of Independence, Constitution, Emancipation Proclamation, 13th, 14th, 15th, 19th, 24th, and 26th Amendments, Voting Rights Act of 1965.</td>
</tr>
<tr>
<td>SS.912.C.2.9</td>
<td>Monitor current public issues in Florida. <strong>Clarifications:</strong> Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.</td>
</tr>
<tr>
<td>SS.912.C.2.10</td>
<td>Analyze public policy solutions or courses of action to resolve a local, state, or federal issue. <strong>Clarifications:</strong> Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media.</td>
</tr>
<tr>
<td>SS.912.C.2.13</td>
<td>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.</td>
</tr>
<tr>
<td>SS.912.C.4.2</td>
<td>Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society. Assess human rights policies of the United States and other countries. <strong>Clarifications:</strong> Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.</td>
</tr>
<tr>
<td>SS.912.C.4.3</td>
<td>Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. <strong>Clarifications:</strong> Examples are desertification, global warming, cataclysmic natural disasters.</td>
</tr>
<tr>
<td>SS.912.G.2.3</td>
<td>Examine the controversy surrounding the proliferation of nuclear technology in the United States and the world. <strong>Clarifications:</strong> This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.H.1.4</td>
<td>Conduct an extensive research study using a variety of primary and secondary sources to develop an essay or presentation on a historical topic. <strong>Clarifications:</strong> Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</td>
</tr>
<tr>
<td>SS.912.H.2.3</td>
<td>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal. <strong>Clarifications:</strong> Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media.</td>
</tr>
</tbody>
</table>
SS.912.H.3.1: Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.

SS.912.H.3.2: Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.

SS.912.W.1.1: Use timelines to establish cause and effect relationships of historical events.

SS.912.W.1.2: Compare time measurement systems used by different cultures.

**Clariﬁcations:** Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.

SS.912.W.1.3: Interpret and evaluate primary and secondary sources.

**Clariﬁcations:** Examples are artifacts, images, auditory and written sources.

SS.912.W.1.4: Explain how historians use historical inquiry and other sciences to understand the past.

**Clariﬁcations:** Examples are archaeology, economics, geography, forensic chemistry, political science, physics.

SS.912.W.1.5: Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).

**Clariﬁcations:** Examples are Pillow Book, Tale of Genji, Shinto and Japanese Buddhism, the rise of feudalism, the development of the shogunate, samurai, and social hierarchy.

SS.912.W.1.6: Evaluate the role of history in shaping identity and character.

**Clariﬁcations:** Examples are ethnic, cultural, personal, national, religious.

SS.912.W.2.13: Explain how Western civilization arose from a synthesis of classical Greco-Roman civilization, Judeo-Christian influence, and the cultures of northern European peoples promoting a cultural unity in Europe.

**Clariﬁcations:** Examples are Islamic law, the relationship between government and religion in Islam.

SS.912.W.2.20: Summarize the major cultural, economic, political, and religious developments in medieval Japan.

**Clariﬁcations:** Examples are Pillow Book, Tale of Genji, Shinto and Japanese Buddhism, the rise of feudalism, the development of the shogunate, samurai, and social hierarchy.

SS.912.W.3.1: Describe signiﬁcant people and beliefs associated with Islam.

**Clariﬁcations:** Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.

SS.912.W.3.2: Compare the major beliefs and principles of Judaism, Christianity, and Islam.

SS.912.W.3.3: Compare the expansion of Islam into India and the relationship between Muslims and Hindus.

SS.912.W.4.14: Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.

SS.912.W.5.2: Identify major causes of the Enlightenment.

**Clariﬁcations:** Examples are ideas from the Renaissance, Scientific Revolution, Reformation, and resistance to absolutism.

SS.912.W.5.3: Summarize the major ideas of Enlightenment philosophers.

SS.912.W.5.4: Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.

**Clariﬁcations:** Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.

SS.912.W.6.4: Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.

SS.912.W.7.10: Summarize the causes and effects of President Truman's decision to drop the atomic bombs on Japan.

SS.912.W.8.6: Explain the 20th century background for the establishment of the modern state of Israel in 1948, including the Zionist movement led by Theodor Herzl, and the ongoing military and political conflicts between Israel and the Arab-Muslim world.

SS.912.W.9.3: Describe the impact of and global response to international terrorism.

**Clariﬁcations:** Examples are prejudice, racism, stereotyping, economic competition.

SS.912.W.9.7: Describe the impact of and global response to international terrorism.

**Clariﬁcations:** Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

**MA.K12.MTR.1.1:** Demonstrate understanding by representing problems in multiple ways.

**Examples:** Build understanding through modeling and using manipulatives.

**Examples:** Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
**MA.K12.MTR.2.1:**
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

**Clarifications:**
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

**MA.K12.MTR.3.1:**
Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**Clarifications:**
Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

**MA.K12.MTR.4.1:**
Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clarifications:**
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

**MA.K12.MTR.5.1:**
Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

**MA.K12.MTR.6.1:**
Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

**MA.K12.MTR.7.1:**
Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
• Use models and methods to understand, represent and solve problems.
• Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

### Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:
• Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
• Challenge students to question the accuracy of their models and methods.
• Support students as they validate conclusions by comparing them to the given situation.
• Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

### Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

### General Course Information and Notes

**Ethics** - The grade 9-12 Ethics course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the foundations of ethical thought and theories and the process of moral development. Content should include, but is not limited to, the sources of ethical beliefs and practices, traditional ethical theories, the strengths and weaknesses of the principal models of moral development, the typical fallacies in flawed moral arguments, the difference between an ethical choice and a legal decision, major ethical questions in American society such as public service, law, the workplace, bioethics, and new technologies, and current ethical issues in the local and national arena.

### Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students’ content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:
1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

</tbody>
</table>
| SS.912.CG.2.4 | Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the public good.  
- Students will examine situations when individuals’ rights have been restricted for the public good (e.g., limits on speech or rationing of goods during wartime, enactment of the Patriot Act).  
- Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good.  
- Students will explain how different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response). |
| SS.912.CG.2.6 | Explain how the principles contained in foundational documents contributed to the expansion of civil rights and liberties over time.  
- Students will explain how different groups of people (e.g., African Americans, Immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman's desegregation of the army, Lincoln's Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault).  
- Students will explain the role founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights. |
| SS.912.CG.2.11 | Evaluate political communication for bias, factual accuracy, omission and emotional appeal.  
- Students will compare the reporting on the same political event or issue from multiple perspectives.  
- Students will identify various forms of propaganda (e.g., plain folks, glittering generalities, testimonial, fear, logical fallacies).  
- Students will discuss the historical impact of political communication on American political process and public opinion.  
- Examples of political communication may include, but are not limited to, political cartoons, propaganda, campaign advertisements, political speeches, bumper stickers, blogs, press and social media. |
| SS.912.CG.2.12 | Explain how interest groups, the media and public opinion influence local, state and national decision-making related to public issues.  
- Students will objectively discuss current public issues in Florida and use both the U.S. and Florida Constitutions to justify pro and con positions.  
- Students will examine the relationship and responsibilities of both the state and national governments regarding these public issues.  
- Students will analyze public policy solutions related to local, state and national issues. |
| SS.912.CG.3.11 | Evaluate how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution.  
- Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; McCulloch v. Maryland; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; Korematsu v. United States; Mapp v. Ohio; In re Gault; United States v. Nixon; Regents of the University of California v. Bakke; Hazelwood v. Kuhlmeier; District of Columbia v. Heller).  
- Students will explain the foundational constitutional issues underlying landmark Supreme Court decisions related to the Bill of Rights and other amendments.  
- Students will explain the outcomes of landmark Supreme Court cases related to the Bill of Rights and other amendments. |

### Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them.

**Examples are prejudice, racism, stereotyping, economic competition.**

### Describe the impact of and global response to international terrorism.

Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

**Mathematicians who use patterns and structure to help understand and connect mathematical concepts:**

- Use patterns and structure to help understand and connect mathematical concepts.
- Engage in discussions that reflect on the mathematical thinking of self and others.
- Complete tasks with mathematical fluency.
- Use feedback to improve efficiency when performing calculations.
- Adapt procedures to apply them to a new context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Choose a representation based on the given context or purpose.
- Recognize the efficiency of a method to those expressed by others.
- Communicate mathematical ideas, vocabulary and methods effectively.
- Express connections between concepts and representations.
- Show students that various representations can have different purposes and can be useful in different situations.

**Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:**

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Construct possible arguments based on evidence.
- Justify results by explaining methods and processes.
- Choose a representation based on the given context or purpose.

**Mathematicians who complete tasks with mathematical fluency:**

- Select efficient and appropriate methods for solving problems within the given context.
- Complete tasks accurately and with confidence.
- Construct possible arguments based on evidence.
- Show students that various representations can have different purposes and can be useful in different situations.

**Mathematicians who participate in effortful learning both individually and with others:**

- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

**Teachers who encourage students to participate actively in effortful learning both individually and with others:**

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

**Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:**

- Help students make connections between concepts and representations.
- Provide opportunities for students to practice efficient and generalizable methods.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

**Teachers who encourage students to complete tasks with mathematical fluency:**

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to participate in effortful learning both individually and with others.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

**Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:**

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

**Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:**

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**MA.K12.MTR.6.1:**

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

**MA.K12.MTR.7.1:**

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

**ELA.K12.EE.1.1:**

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

**ELA.K12.EE.2.1:**

Read and comprehend grade-level complex texts proficiently.

**ELA.K12.EE.3.1:**

Students make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

**ELA.K12.EE.4.1:**

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**ELA.K12.EE.5.1:**

Use the accepted rules governing a specific format to create quality work.

**ELA.K12.EE.6.1:**

Use appropriate voice and tone when speaking or writing.

**ELD.K12.ELL.SI.1:**

English language learners communicate for social and instructional purposes within the school setting.
General Course Information and Notes

GENERAL NOTES

Ethics - The grade 9-12 Ethics course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the foundations of ethical thought and theories and the process of moral development. Content should include, but is not limited to, the sources of ethical beliefs and practices, traditional ethical theories, the strengths and weaknesses of the principal models of moral development, the typical fallacies in flawed moral arguments, the difference between an ethical choice and a legal decision, major ethical questions in American society such as public service, law, the workplace, bioethics, and new technologies, and current ethical issues in the local and national arena.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

GENERAL INFORMATION

Course Number: 2105350
Course Path: Section: Grades PreK to 12 Education
Courses: Grade Group: Grades 9 to 12 and Adult
Education Courses: Subject: Social Studies
SubSubject: Philosophy and Religion
Abbreviated Title: ETHICS
Course Length: Semester (S)
Course Level: 2
Grade Level(s): 9,10,11,12

Educator Certifications

History (Grades 6-12)
Social Science (Grades 6-12)
Humanities (Elementary and Secondary Grades K-12)
### Course Standards

<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.3.10:</td>
<td>Evaluate the constitutional provisions establishing citizenship, and explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights.</td>
</tr>
<tr>
<td>SS.912.A.7.5:</td>
<td>Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.</td>
</tr>
<tr>
<td>SS.912.C.1.1:</td>
<td>Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.</td>
</tr>
<tr>
<td>SS.912.C.1.2:</td>
<td>Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights.</td>
</tr>
<tr>
<td>SS.912.C.1.3:</td>
<td>Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.</td>
</tr>
<tr>
<td>SS.912.C.2.1:</td>
<td>Analyze the constitutional provisions establishing citizenship, and assess the criteria among citizens by birth, naturalized citizens, and non-citizens.</td>
</tr>
<tr>
<td>SS.912.C.3.1:</td>
<td>Evaluate the importance of political participation and civic participation.</td>
</tr>
<tr>
<td>SS.912.C.3.2:</td>
<td>Experience the responsibilities of citizens at the local, state, or federal levels.</td>
</tr>
<tr>
<td>SS.912.C.4.1:</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.5.1:</td>
<td>Explain why rights have limits and are not absolute.</td>
</tr>
<tr>
<td>SS.912.C.6.1:</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change.</td>
</tr>
<tr>
<td>SS.912.C.7.1:</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</td>
</tr>
<tr>
<td>SS.912.C.8.1:</td>
<td>Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</td>
</tr>
<tr>
<td>SS.912.C.9.1:</td>
<td>Clarifications: Examples include registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</td>
</tr>
<tr>
<td>SS.912.C.10.1:</td>
<td>Clarifications: Examples may include e-mail campaigns, boycotts, blogs, podcasts, protests, demonstrations, letters to editors.</td>
</tr>
<tr>
<td>SS.912.C.11.1:</td>
<td>Clarifications: Examples may include the use of traditional media, social media, and digital platforms for campaigning and communicating with constituents.</td>
</tr>
<tr>
<td>SS.912.C.12.1:</td>
<td>Clarifications: Examples include speech, search and seizure, religion, gun possession.</td>
</tr>
<tr>
<td>SS.912.C.13.1:</td>
<td>Clarifications: Examples may include evaluating the impact of citizen participation on political outcomes.</td>
</tr>
<tr>
<td>SS.912.C.14.1:</td>
<td>Clarifications: Examples may include analyzing the role of public opinion in shaping policy.</td>
</tr>
<tr>
<td>SS.912.C.15.1:</td>
<td>Clarifications: Examples may include examining the impact of citizen participation on political outcomes.</td>
</tr>
<tr>
<td>Task</td>
<td>Clarifications</td>
</tr>
<tr>
<td>---------------------------------------------------------------------</td>
<td>--------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Contrast how the Constitution safeguards and limits individual rights.</td>
<td>Examples are education, transportation, crime prevention, funding of services.</td>
</tr>
<tr>
<td>Illustrate examples of how government affects the daily lives of citizens at the local, state, and national levels.</td>
<td>Examples are classical architecture, protest music, Native American dance, Japanese Noh.</td>
</tr>
<tr>
<td>Examine constitutional powers (expressed, implied, concurrent, reserved).</td>
<td>Examples are Anthropology, Economics, Geography, Forensic Chemistry, Political Science, Physics.</td>
</tr>
<tr>
<td>Examine how power and responsibility are distributed, shared, and limited by the Constitution.</td>
<td>Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.</td>
</tr>
<tr>
<td>Explain how the world's nations are governed differently.</td>
<td>Examples are the Council of Trent, Thomas Aquinas, Roger Bacon, Hildegard of Bingen, Dante, Code of Chivalry, Gothic architecture, illumination, universities, Natural Law Philosophy, Scholasticism.</td>
</tr>
<tr>
<td>Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.</td>
<td>Examples are Wycliffe, Hus and Erasmus and their impact on later reformers.</td>
</tr>
<tr>
<td>Assess human rights policies of the United States and other countries.</td>
<td>Examples are Al-Ma'mun, Avicenna, Averroes, Algebra, Al-Razi, Alhambra, The Thousand and One Nights.</td>
</tr>
<tr>
<td>Evaluate the role of history in shaping identity and character.</td>
<td>Examples are Anselm of Canterbury, Chaucer, Thomas Aquinas, Roger Bacon, Hildegard of Bingen, Dante, Code of Chivalry, Gothic architecture, illumination, universities, Natural Law Philosophy, Scholasticism.</td>
</tr>
<tr>
<td>Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.</td>
<td>Examples are the Roman Catholic Church's response to the Protestant Reformation in the forms of the Counter and Catholic Reformation.</td>
</tr>
<tr>
<td>Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.</td>
<td>Examples are scientific, technological, and religious developments, and examine their influence on works of arts within a culture.</td>
</tr>
<tr>
<td>Explain philosophical beliefs as they relate to works in the arts.</td>
<td>Identify key figures, artistic, and intellectual achievements of the medieval period in Western Europe.</td>
</tr>
<tr>
<td>Apply various types of critical analysis (contextual, formal, and intuitive criticism) to works in the arts, including the types and use of symbolism within art forms and their philosophical implications.</td>
<td>Discuss significant people and beliefs associated with Islam.</td>
</tr>
<tr>
<td>Examine the effects that works in the arts have on groups, individuals, and cultures.</td>
<td>Examples are the achievements, contributions, and key figures associated with the Islamic Golden Age.</td>
</tr>
<tr>
<td>Identify major causes of the Enlightenment.</td>
<td>Examples are Al-Ma'mun, Avicenna, Averroes, Algebra, Al-Razi, Alhambra, The Thousand and One Nights.</td>
</tr>
<tr>
<td>Identify major causes of the Enlightenment.</td>
<td>Describe how ideas from the Middle Ages and Renaissance led to the Scientific Revolution.</td>
</tr>
<tr>
<td>Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.</td>
<td>Describe how ideas from the Middle Ages and Renaissance led to the Scientific Revolution.</td>
</tr>
<tr>
<td>Summarize religious reforms associated with Luther, Calvin, Zwingli, Henry VIII, and John of Leyden and the effects of the Reformation on Europe.</td>
<td>Summarize religious reforms associated with Luther, Calvin, Zwingli, Henry VIII, and John of Leyden and the effects of the Reformation on Europe.</td>
</tr>
<tr>
<td>Illustrate examples of how government affects the daily lives of citizens at the local, state, and national levels.</td>
<td>Analyze the Roman Catholic Church's response to the Protestant Reformation in the forms of the Counter and Catholic Reformation.</td>
</tr>
<tr>
<td>Identify major contributions of individuals associated with the Scientific Revolution.</td>
<td>Identify major contributions of individuals associated with the Scientific Revolution.</td>
</tr>
<tr>
<td>Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.</td>
<td>Identify major causes of the Enlightenment.</td>
</tr>
<tr>
<td>Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.</td>
<td>Summarize the major ideas of Enlightenment philosophers.</td>
</tr>
</tbody>
</table>
Analyze the extent to which the Enlightenment impacted the American and French Revolutions.

Explain the 20th century background for the establishment of the modern organization, development, substance, and style are appropriate to purpose, audience, and task.

Compare the philosophies of capitalism, socialism, and communism as described by Adam Smith, Robert Owen, and Karl Marx.

Summarize the causes and effects of President Truman's decision to drop the atomic bombs on Japan.

Describe the rise and goals of nationalist leaders in the post-war era and the impact of their rule on their societies.

Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.

Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

Describe the causes and effects of twentieth century nationalist conflicts.

Describe the impact of and global response to international terrorism.

Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

Describe the rise and goals of nationalist leaders in the post-war era and the impact of their rule on their societies.

Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.
Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes.

a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include format (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.

b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.

c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts.

d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers.

e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).

LAFS.910.WHST.1.2:

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

LAFS.910.WHST.2.4:

Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

LAFS.910.WHST.2.6:

Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.

LAFS.910.WHST.3.7:

Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

LAFS.910.WHST.3.8:

Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.

LAFS.910.WHST.3.9:

Draw evidence from informational texts to support analysis, reflection, and research.

LAFS.910.WHST.4.10:

Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

MAFS.912.S-ID.1.4:

Use the mean and standard deviation of a data set to fit it to a normal distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

MAFS.912.S-ID.1.2:

Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers).

MAFS.912.S-ID.1.3:

Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers).

MAFS.912.S-ID.1.1:

Make sense of problems and persevere in solving them.

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze given constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

Construct viable arguments and critique the reasoning of others.

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from
MAFS.K12.MP.3.1: which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

Use appropriate tools strategically.

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

ATTEND TO PRECISION.

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give precise calculations, but as they develop the ability they are always supposed to be thinking about the sense of their results. In this way, they achieve precision even without calculations.

MAFS.K12.MP.5.1: Use appropriate tools strategically.

MAFS.K12.MP.6.1: Attend to precision.

General Course Information and Notes

**GENERAL NOTES**

The learner, building on the foundations of Philosophy, Honors as a prerequisite, will explore, understand, and apply the important ethical theories in philosophy to present day issues, and will focus on the ethical theories of the great thinkers, from the ancient era through the modern era, with the purpose of providing the students with the tools necessary to analyze, critique and evaluate current issues and to formulate a personal value system with which to evaluate any present day issue. Special emphasis will be on character education.

**Honors and Advanced Level Course Note:** Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

**Mathematics Benchmark Guidance:** Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

**Special Notes: Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Literacy Standards in Social Studies**

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

| SS.912.A.3.10: | Review different economic and philosophic ideologies.  
**Clarifications:** Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.7.5: | Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.  
**Clarifications:** Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.C.1.1: | Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government. |
| SS.912.C.1.2: | Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights. |
| SS.912.C.1.3: | Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy. |
| SS.912.C.1.4: | Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights. |
| SS.912.C.1.5: | Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism. |
| SS.912.C.2.1: | Evaluate the constitutional provisions establishing citizenship, and assess the criteria among citizens by birth, naturalized citizens, and non-citizens. |
| SS.912.C.2.2: | Evaluate the importance of political participation and civic participation.  
**Clarifications:** Experience the responsibilities of citizens at the local, state, or federal levels. |
| SS.912.C.2.3: | Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good. |
| SS.912.C.2.4: | Explain why rights have limits and are not absolute. |
| SS.912.C.2.5: | Analyze the impact of citizen participation as a means of achieving political and social change.  
**Clarifications:** Examples are speech, search and seizure, religion, gun possession. |
| SS.912.C.2.6: | Analyze public policy solutions or courses of action to resolve a local, state, or federal issue. |
| SS.912.C.2.7: | Explain the changing roles of television, radio, press, and Internet in political communication. |
| SS.912.C.2.8: | Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.  
**Clarifications:** Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media. |
| SS.912.C.2.9: | Monitor current public issues in Florida.  
**Clarifications:** Examples are On-line Sunshine, media, e-mails to government officials, political text messaging. |
| SS.912.C.2.10: | Analyze the processes and results of an election at the state or federal level. |
| SS.912.C.2.11: | Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.C.2.12: | Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights. |
| SS.912.C.2.13: | Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.  
| SS.912.C.3.10: | Evaluate the significance and outcomes of landmark Supreme Court cases.  
| SS.912.C.3.11: | Contrast how the Constitution safeguards and limits individual rights. |
| SS.912.C.3.13: | Clarifications: Examples are education, transportation, crime prevention, funding of services. |
| SS.912.C.3.14: | Examine constitutional powers (expressed, implied, concurrent, reserved). |
| SS.912.C.3.15: | Examine how power and responsibility are distributed, shared, and limited by the Constitution. |
| SS.912.C.4.1: | Explain how the world's nations are governed differently. |
| SS.912.C.4.2: | Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society. |
| SS.912.C.4.3: | Assess human rights policies of the United States and other countries. |
| SS.912.G.1.1: | Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions. |
| SS.912.H.1.4: | Explain philosophical beliefs as they relate to works in the arts. |
| SS.912.H.2.3: | Apply various types of critical analysis (contextual, formal, and intuitive criticism) to works in the arts, including the types and use of symbolism within art forms and their philosophical implications. |
| SS.912.H.2.4: | Examine the effects that works in the arts have on groups, individuals, and cultures. |
| SS.912.H.3.2: | Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture. |
| SS.912.W.1.1: | Use timelines to establish cause and effect relationships of historical events. |
| SS.912.W.1.3: | Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh. |
| SS.912.W.1.4: | Clarifications: Examples are artifacts, images, auditory and written sources. |
| SS.912.W.1.5: | Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). |
| SS.912.W.1.6: | Clarifications: Examples are ethnic, cultural, personal, national, religious. |
| SS.912.W.2.12: | Recognize the importance of Christian monasteries and convents as centers of education, charitable and missionary activity, economic productivity, and political power. |
| SS.912.W.2.13: | Explain how Western civilization arose from a synthesis of classical Greco-Roman civilization, Judeo-Christian influence, and the cultures of northern European peoples promoting a cultural unity in Europe. |
| SS.912.W.3.1: | Discuss significant people and beliefs associated with Islam. |
| SS.912.W.3.2: | Clarifications: Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam. |
| SS.912.W.3.5: | Describe the achievements, contributions, and key figures associated with the Islamic Golden Age. |
| SS.912.W.4.5: | Describe how ideas from the Middle Ages and Renaissance led to the Scientific Revolution. |
| SS.912.W.4.7: | Identify criticisms of the Roman Catholic Church by individuals such as Wycliffe, Hus and Erasmus and their impact on later reformers. |
| SS.912.W.4.8: | Clarifications: Examples are Catholic and Counter Reformation, political and religious fragmentation, military conflict, expansion of capitalism. |
| SS.912.W.4.9: | Analyze the Roman Catholic Church's response to the Protestant Reformation in the forms of the Counter and Catholic Reformation. |
| SS.912.W.4.10: | Identify the major contributions of individuals associated with the Scientific Revolution. |
| SS.912.W.4.14: | Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas. |
| SS.912.W.5.2: | Identify major causes of the Enlightenment. |
| SS.912.W.5.3: | Clarifications: Examples are ideas from the Renaissance, Scientific Revolution, Reformation, and resistance to absolutism. |
| SS.912.W.5.3: | Summarize the major ideas of Enlightenment philosophers. |
### SS.912.W.5.5:
Analyze the extent to which the Enlightenment impacted the American and French Revolutions.

### SS.912.W.6.3:
Compare the philosophies of capitalism, socialism, and communism as described by Adam Smith, Robert Owen, and Karl Marx.

### SS.912.W.6.6:
**Clarifications:**
Examples are social impact on indigenous peoples, the Crimean War, development of the Suez Canal, Spheres of Influence.

### SS.912.W.7.10:
Summarize the causes and effects of President Truman's decision to drop the atomic bombs on Japan.

### SS.912.W.8.6:
Describe the rise and goals of nationalist leaders in the post-war era and the impact of their rule on their societies.

### SS.912.W.8.8:
**Clarifications:**
Examples are Mahatma Gandhi, Fidel Castro, Gamal Abdel Nasser, Francois ‘Papa Doc’ Duvalier, Jawaharlal Nehru.

### SS.912.W.8.9:
Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.

### SS.912.W.8.10:
**Clarifications:**
Examples are Iranian Revolution, Mujahideen in Afghanistan, Persian Gulf War.

### SS.912.W.9.1:
Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

### SS.912.W.9.3:
**Clarifications:**
Examples are Marie Curie, Albert Einstein, Enrico Fermi, Sigmund Freud, Wright Brothers, Charles R. Drew, mass vaccination, atomic energy, transistor, microchip, space exploration, Internet, discovery of DNA, Human Genome Project.

### SS.912.W.9.7:
Describe the impact of and global response to international terrorism.

### MA.K12.MTR.1.1:
**Teachers who encourage students to complete tasks with mathematical fluency:**
- Provide multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

### MA.K12.MTR.2.1:
**Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:**
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

### MA.K12.MTR.3.1:
**Teachers who encourage students to develop perseverance in students by modifying methods as needed while solving a challenging task:**
- Help and support each other when attempting a new method or approach.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Build perseverance by modifying methods needed while solving a challenging task.
- Ask questions that will help with solving the task.
- Analyze the problem in a way that makes sense given the task.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Use feedback to improve efficiency when performing calculations.
- Adapt procedures to apply them to a new context.

### MA.K12.MTR.4.1:
**Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:**
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.
- Help and support each other when attempting a new method or approach.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Build perseverance by modifying methods needed while solving a challenging task.
- Ask questions that will help with solving the task.
- Analyze the problem in a way that makes sense given the task.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Use feedback to improve efficiency when performing calculations.
- Adapt procedures to apply them to a new context.
Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clarifications:**
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students’ ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students’ ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students’ ability to verify solutions through justifications.

Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

**Clarifications:**
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.
General Course Information and Notes

GENERAL NOTES

The learner, building on the foundations of Philosophy Honors as a prerequisite, will explore, understand, and apply the important ethical theories in philosophy to present day issues, and will focus on the ethical theories of the great thinkers, from the ancient era through the modern era, with the purpose of providing the students with the tools necessary to analyze, critique and evaluate current issues and to formulate a personal value system with which to evaluate any present day issue. Special emphasis will be on character education.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes: Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EE and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf
Course Number: 2105355

Number of Credits: One (1) credit

Course Type: Elective Course

Course Status: State Board Approved

Grade Level(s): 9, 10, 11, 12

<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</td>
</tr>
<tr>
<td><strong>SS.912.A.10:</strong></td>
<td>Explain the influence of Enlightenment ideas on the Declaration of Independence.</td>
</tr>
<tr>
<td></td>
<td>Students will identify grievances listed in the Declaration of Independence in terms of due process of law, individual rights, natural rights, popular sovereignty and social contract.</td>
</tr>
<tr>
<td></td>
<td>Students will explain national sovereignty, natural law, self-evident truth, equality of all persons, due process of law, limited government, popular sovereignty, and unalienable rights of life, liberty and property as they relate to Enlightenment ideas in the Declaration of Independence.</td>
</tr>
<tr>
<td></td>
<td>Students will recognize that national sovereignty, due process of law, natural law, self-evident truth, equality of all persons, limited government, popular sovereignty, and unalienable rights of life, liberty and property form the philosophical foundation of our government.</td>
</tr>
<tr>
<td><strong>SS.912.CG.2.1:</strong></td>
<td>Explain the importance of political and civic participation to the success of the United States' constitutional republic.</td>
</tr>
<tr>
<td></td>
<td>Students will identify various responsibilities held by citizens (e.g., voting, volunteering and being informed, respecting laws).</td>
</tr>
<tr>
<td></td>
<td>Students will understand the process of registering or preregistering to vote and how to complete a ballot in Florida (e.g., uniform primary and general election ballot).</td>
</tr>
<tr>
<td></td>
<td>Students will discuss appropriate methods of communication with public officials (e.g., corresponding, attending public meetings, requesting a meeting and providing information).</td>
</tr>
<tr>
<td></td>
<td>Students will participate in classroom activities that simulate exercising the responsibilities of citizenship.</td>
</tr>
<tr>
<td><strong>SS.912.CG.2.2:</strong></td>
<td>Analyze how the ideas and principles expressed in the founding documents shape America as a constitutional republic.</td>
</tr>
<tr>
<td></td>
<td>Students will differentiate among the documents and determine how each one was individually significant to the founding of the United States.</td>
</tr>
<tr>
<td></td>
<td>Students will evaluate how the documents are connected to one another.</td>
</tr>
<tr>
<td></td>
<td>Students will identify key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason).</td>
</tr>
<tr>
<td><strong>SS.912.CG.2.3:</strong></td>
<td>Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td></td>
<td>Students will examine situations when individuals' rights have been restricted for the public good (e.g., limits on speech or rationing of goods.</td>
</tr>
</tbody>
</table>
during wartime, enactment of the Patriot Act).
- Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good.
- Students will explain different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response).

Analyze contemporary and historical examples of government-imposed restrictions on rights.
- Students will identify historical examples of government-imposed restrictions on rights (e.g., suspension of habeas corpus, rationing during wartime and limitations on speech).
- Students will examine the rationale for government-imposed restrictions on rights (e.g., inciting a crime, campaign contributions, defamation, military secrets).

Explain how the principles contained in foundational documents contributed to the expansion of civil rights and liberties over time.
- Students will explain how different groups of people (e.g., African Americans, immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman's desegregation of the army, Lincoln's Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault).
- Students will explain the role founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights.

Evaluate the impact of civic engagement as a means of preserving or reforming institutions.
- Students will identify legal methods that citizens can use to promote social and political change (e.g., voting, peaceful protests, petitioning, demonstrations, contacting government offices).
- Students will identify historical examples of citizens achieving or preventing political and social change through civic engagement (e.g., the Abolitionist Movement).

Explain the impact of political parties, interest groups, media and individuals on determining and shaping public policy.
- Students will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy.
- Students will identify historical examples of interest groups, media and individuals influencing public policy.
- Students will compare and contrast how the free press influenced politics at major points in U.S. history (e.g., Vietnam War Era, Civil Rights Era).

Explain the process and procedures of elections at the state and national levels.
- Students will identify the different primary formats and how political parties nominate candidates using primaries.
- Students will compare and contrast the different ways in which elections are decided (e.g., Electoral College, proportional representation, popular vote, winner-take-all).
- Students will explain the process by which candidates register to be part of state and national elections.
- Students will describe the different methods used to tabulate election results in state and national elections (i.e., electronic voting, punch cards, fill-in ballots).
- Students will evaluate the role of debates in elections.

Evaluate political communication for bias, factual accuracy, omission and emotional appeal.
- Students will compare the reporting on the same political event or issue from multiple perspectives.
- Students will identify various forms of propaganda (e.g., plain folks, glittering generalities, testimonial, fear, logical fallacies).
- Students will discuss the historical impact of political communication on American political process and public opinion.
- Examples of political communication may include, but are not limited to, political cartoons, propaganda, campaign advertisements, political speeches, bumper stickers, blogs, press and social media.

Explain how interest groups, the media and public opinion influence local, state and national decision-making related to public issues.
- Students will objectively discuss current public issues in Florida and use both the U.S. and Florida Constitutions to justify pro and con positions.
- Students will examine the relationship and responsibilities of both the state and national governments regarding these public issues.
- Students will analyze public policy solutions related to local, state and national issues.

Analyze the influence and effects of various forms of media and the internet in political communication.
- Students will explain how the methods of political communication has changed over time (e.g., television, radio, press, social media).
- Students will describe how the methods used by political officials to communicate with the public has changed over time.
- Students will discuss the strengths and weaknesses of different methods of political communication.

Analyze how certain political ideologies conflict with the principles of freedom and democracy.
- Students will identify political ideologies that conflict with the principles of freedom and democracy (e.g., communism and totalitarianism).
- Students will analyze how the principles of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republican, rule of law and separation of powers contribute to the nation's longevity and its ability to overcome challenges, and distinguish the United States' constitutional republic from authoritarian and totalitarian nations.

Explain how the U.S. Constitution safeguards and limits individual rights.
- Students will identify the individual rights protected by the U.S. Constitution, the Bill of Rights and other constitutional amendments.
- Students will describe the role of the Supreme Court in further defining the safeguards and limits of constitutional rights.

Explain expressed, implied, concurrent and reserved powers in the U.S. Constitution.
- Students will identify powers that are expressed in the U.S. Constitution to Congress (e.g., coin money, declare war, assess taxes, citizenship).
- Students will identify that expressed powers are also known as enumerated powers found in Article I of the U.S. Constitution.
- Students will analyze the role of the “general welfare clause” and “necessary and proper clause” in granting Congress implied powers.
- Students will describe examples of concurrent powers as those powers shared by both state and national governments (e.g., build roads, tax citizens, make laws).
- Students will explain how reserved powers define issues as matters for the people or the state governments.
- Students will compare the roles of expressed, implied, concurrent and reserved powers in United States' federalism.

Evaluate how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution.
- Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; McCulloch v. Maryland; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; Korematsu v. United States; Mapp v. Ohio; In re Gault; United States v. Nixon; Regents of the University of California v. Bakke; Hazelwood v. Kuhlmeier; District of Columbia v. Heller).
- Students will explain the foundational constitutional issues underlying landmark Supreme Court decisions related to the Bill of Rights and other
### SS.912.CG.3.12:
- Students will explain the outcomes of landmark Supreme Court cases related to the Bill of Rights and other amendments.
- Analyze the concept of federalism in the United States and its role in establishing the relationship between the state and national governments.
- Students will identify examples of the powers reserved and shared among state and the national governments in the American federal system of government.
- Students will examine the role the Great Compromise had on the eventual establishment of a federal system of fifty equal states.
- Students will explain specific rights that are granted to the states in the language of the U.S. Constitution and its amendments (e.g., 10th Amendment, defense and extradition).
- Students will analyze how states have challenged the national government regarding states' rights (e.g., Civil War, the New Deal, No Child Left Behind, Affordable Health Care Act, Civil Rights Movement).

### SS.912.CG.3.15:
- Explain how citizens are affected by the local, state and national governments.
- Students will identify local government officials and employees who affect the daily lives of citizens.
- Students will identify the role of state governmental officials and employees who affect the daily lives of citizens.
- Students will identify the role of national governmental officials and employees who affect the daily lives of citizens.
- Students will explain how government at all levels impacts the daily lives of citizens.

### SS.912.CG.3.16:
- Analyze how liberty and economic freedom generate broad-based opportunity and prosperity in the United States.
- Students will differentiate between government systems (e.g., autocracy, democracy, monarchy, oligarchy republic, theocracy).
- Students will differentiate between economic systems (e.g., capitalism, communism, mixed market, socialism).
- Students will analyze the disadvantages of authoritarian control over the economy (e.g., communism and socialism) in generating broad-based economic prosperity for their population.

### SS.912.CG.4.1:
- Explain how the United States uses foreign policy to influence other nations.
- Students will explain how the policies of other nations influence U.S. policy and society.
- Students will identify agencies of the U.S. government that contribute to its foreign policy agenda (e.g., National Security Agency, Central Intelligence Agency).
- Students will explain the advantages and disadvantages of how nongovernmental organizations (NGOs) influence foreign policy (e.g., United States Agency for International Development, Red Cross, American Woman Suffrage Association, Amnesty International).
- Students will explain how U.S. trade policy influences its relationships with other nations (e.g., China, Saudi Arabia).
- Students will explain how the use of embargos and economic sanctions by the United States has affected other nations (e.g., Cuba, Iran, Syria).
- Students will explain the U.S. response to international conflicts.

### SS.912.CG.4.2:
- Analyze how U.S. foreign policy supports democratic principles and protects human rights around the world.
- Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.

### SS.912.CG.4.3:
- Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
- Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.

### SS.912.H.1.4:
- Clarifications: Examples are religious, cultural, personal, national, social.

### SS.912.H.2.3:
- Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.

### SS.912.H.2.4:
- Clarifications: Examples are artifacts, images, auditory and written sources.

### SS.912.H.3.2:
- Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.

### SS.912.W.1.1:
- Use timelines to establish cause and effect relationships of historical events.
- Clarifications: Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.

### SS.912.W.1.4:
- Clarifications: Examples are Anselm of Canterbury, Chaucer, Thomas Aquinas, Roger Bacon, Hildegard of Bingen, Dante, Code of Chivalry, Gothic architecture, illumination, universities, Natural Law Philosophy, Scholasticism.

### SS.912.W.2.12:
- Discuss significant people and beliefs associated with Islam.
- Clarifications: Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.

### SS.912.W.3.1:
- Compare the major beliefs and principles of Judaism, Christianity, and Islam.
- Describe the achievements, contributions, and key figures associated with the Islamic Golden Age.
SS.912.W.3.5: Clarifications:
Examples are Al-Ma'mun, Avicenna, Averroes, Algebra, Al-Razi, Alhambra, The Thousand and One Nights.

SS.912.W.4.5: Describe how ideas from the Middle Ages and Renaissance led to the Scientific Revolution.

SS.912.W.4.7: Identify criticisms of the Roman Catholic Church by individuals such as Wycliffe, Hus and Erasmus and their impact on later reformers.

SS.912.W.4.8: Summarize religious reforms associated with Luther, Calvin, Zwingli, Henry VIII, and John of Leyden and the effects of the Reformation on Europe.

SS.912.W.4.9: Clarifications:
Examples are Council of Trent, Thomas More, Ignatius of Loyola and the Jesuits, Teresa of Avila, Charles V.

SS.912.W.4.10: Identify the major contributions of individuals associated with the Scientific Revolution.

SS.912.W.4.14: Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.

SS.912.W.5.2: Clarifications:
Examples are ideas from the Renaissance, Scientific Revolution, Reformation, and resistance to absolutism.

SS.912.W.5.3: Summarize the major ideas of Enlightenment philosophers.

SS.912.W.5.5: Analyze the extent to which the Enlightenment impacted the American and French Revolutions.

SS.912.W.6.3: Compare the philosophies of capitalism, socialism, and communism as described by Adam Smith, Robert Owen, and Karl Marx.

SS.912.W.6.6: Clarifications:
Examples are social impact on indigenous peoples, the Crimean War, development of the Suez Canal, Spheres of Influence.

SS.912.W.7.10: Summarize the causes and effects of President Truman's decision to drop the atomic bombs on Japan.

SS.912.W.8.6: Explain the 20th century background for the establishment of the modern state of Israel in 1948, including the Zionist movement led by Theodor Herzl, and the ongoing military and political conflicts between Israel and the Arab-Muslim world.

SS.912.W.8.8: Clarifications:
Examples are Mahatma Ghandi, Fidel Castro, Gamal Abdel Nasser, Francois 'Papa Doc' Duvalier, Jawaharlal Nehru.

SS.912.W.8.9: Describe the rise and goals of nationalist leaders in the post-war era and the impact of their rule on their societies.

SS.912.W.8.10: Clarifications:
Examples are Iranian Revolution, Mujahideen in Afghanistan, Persian Gulf War.

SS.912.W.9.1: Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

SS.912.W.9.3: Clarifications:
Examples are Marie Curie, Albert Einstein, Enrico Fermi, Sigmund Freud, Wright Brothers, Charles R. Drew, mass vaccination, atomic energy, transistor, microchip, space exploration, Internet, discovery of DNA, Human Genome Project.

SS.912.W.9.7: Describe the impact of and global response to international terrorism.

SS.912.W.9.8: Clarifications:
Examples are prejudice, racism, stereotyping, economic competition.

SS.912.W.9.9: Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.

MA.K12.MTR.1.1: Clarifications:
Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
### MA.K12.MTR.2.1: Choose a representation based on the given context or purpose.

**Clarifications:**
- Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
  - Help students make connections between concepts and representations.
  - Provide opportunities for students to use manipulatives when investigating concepts.
  - Guide students from concrete to pictorial to abstract representations as understanding progresses.
  - Show students that various representations can have different purposes and can be useful in different situations.

<table>
<thead>
<tr>
<th>Choose a representation based on the given context or purpose.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Complete tasks with mathematical fluency.</td>
</tr>
<tr>
<td>Mathematics who complete tasks with mathematical fluency:</td>
</tr>
<tr>
<td>- Select efficient and appropriate methods for solving problems within the given context.</td>
</tr>
<tr>
<td>- Maintain flexibility and accuracy while performing procedures and mental calculations.</td>
</tr>
<tr>
<td>- Complete tasks accurately and with confidence.</td>
</tr>
<tr>
<td>- Adapt procedures to apply them to a new context.</td>
</tr>
<tr>
<td>- Use feedback to improve efficiency when performing calculations.</td>
</tr>
</tbody>
</table>

**Clarifications:**
- Teachers who encourage students to complete tasks with mathematical fluency:
  - Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
  - Offer multiple opportunities for students to practice efficient and generalizable methods.
  - Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

### MA.K12.MTR.3.1: Complete tasks with mathematical fluency.

**Clarifications:**
- Teachers who encourage students to complete tasks with mathematical fluency:
  - Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
  - Offer multiple opportunities for students to practice efficient and generalizable methods.
  - Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

### MA.K12.MTR.4.1: Engage in discussions that reflect on the mathematical thinking of self and others.

**Clarifications:**
- Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
  - Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
  - Create opportunities for students to discuss their thinking with peers.
  - Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
  - Develop students' ability to justify methods and compare their responses to the responses of their peers.

### MA.K12.MTR.5.1: Use patterns and structure to help understand and connect mathematical concepts.

**Clarifications:**
- Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
  - Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
  - Support students to develop generalizations based on the similarities found among problems.
  - Provide opportunities for students to create plans and procedures to solve problems.
  - Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

### MA.K12.MTR.6.1: Assess the reasonableness of solutions.

**Clarifications:**
- Teachers who encourage students to assess the reasonableness of solutions:
  - Have students estimate or predict solutions prior to solving.
  - Prompt students to continually ask, "Does this solution make sense? How do you know?"
  - Reinforce that students check their work as they progress within and after a task.
  - Strengthen students' ability to verify solutions through justifications.

**Apply mathematics to real-world contexts.**

Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or
### MA.K12.MTR.7.1:

**Clarifications:**
- Teachers who encourage students to apply mathematics to real-world contexts:
  - Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
  - Challenge students to question the accuracy of their models and methods.
  - Support students as they validate conclusions by comparing them to the given situation.
  - Indicate how various concepts can be applied to other disciplines.

### ELA.K12.F.1.1:

**Clarifications:**
- Students engage in collaborative conversations discussing claims and justifying their reasoning, refining and applying skills.
- Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

### ELA.K12.F.1.2:

**Clarifications:**
- Students will make inferences before the words infer or inference are introduced.
- Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page.
- Students will use the terms and apply them in 2nd grade and beyond.

### ELA.K12.F.1.3:

**Clarifications:**
- Students include textual evidence in their written and oral communication.
- Students should name the text when they refer to it. In kindergarten and 1st grade, students learn the difference between quoting, paraphrasing, or using information.
- When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
- The evidence can consist of details from the text without naming the text.
- During 1st grade, students learn how to incorporate the evidence in their writing.
- In 2nd grade, students should use a combination of direct and indirect citations.

### ELA.K12.F.1.4:

**Clarifications:**
- In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think ________ because _______."
- The collaborative conversations are becoming academic conversations.
- In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills.

### ELA.K12.F.1.5:

**Clarifications:**
- Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction.
- A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

### ELA.K12.F.1.6:

**Clarifications:**
- In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

### ELD.K12.FL.1.1:

**Clarifications:**
- English language learners communicate for social and instructional purposes within the school setting.

### ELD.K12.FL.5.5.1:

**Clarifications:**
- English language learners communicate information, ideas, and concepts necessary for academic success in the content area of Social Studies.

### HE.912.C.2.7:

**Clarifications:**
- Analyze how culture supports and challenges health beliefs, practices, and behaviors.
- Various cultures’ dietary patterns, rites of passage, courtship practices, family roles, personal relationships, ethics, and parenting.

### General Course Information and Notes

**GENERAL NOTES**

The learner, building on the foundations of Philosophy Honors as a prerequisite, will explore, understand, and apply the important ethical theories in philosophy to present day issues, and will focus on the ethical theories of the great thinkers, from the ancient era through the modern era, with the purpose of providing the students with the tools necessary to analyze, critique and evaluate current issues and to formulate a personal value system with which to evaluate any present day issue. Special emphasis will be on character education.

**Honors and Advanced Level Course Note:** Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

**Special Notes: Instructional Practices**
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

</thead>
</table>
| **MA.K12.MTR.1.1:** | Mathematicians who participate in effortful learning both individually and with others:  
- Analyze the problem in a way that makes sense given the task.  
- Ask questions that will help with solving the task.  
- Build perseverance by modifying methods as needed while solving a challenging task.  
- Stay engaged and maintain a positive mindset when working to solve tasks.  
- Help and support each other when attempting a new method or approach.  

**Clarifications:**  
Teachers who encourage students to participate actively in effortful learning both individually and with others:  
- Cultivate a community of growth mindset learners.  
- Foster perseverance in students by choosing tasks that are challenging.  
- Develop students’ ability to analyze and problem solve.  
- Recognize students’ effort when solving challenging problems. |
| **MA.K12.MTR.2.1:** | Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:  
- Build understanding through modeling and using manipulatives.  
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.  
- Progress from modeling problems with objects and drawings to using algorithms and equations.  
- Express connections between concepts and representations.  
- Choose a representation based on the given context or purpose.  

**Clarifications:**  
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:  
- Help students make connections between concepts and representations.  
- Provide opportunities for students to use manipulatives when investigating concepts.  
- Guide students from concrete to pictorial to abstract representations as understanding progresses.  
- Show students that various representations can have different purposes and can be useful in different situations. |
| **MA.K12.MTR.3.1:** | Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:  
- Select efficient and appropriate methods for solving problems within the given context.  
- Maintain flexibility and accuracy while performing procedures and mental calculations.  
- Complete tasks accurately and with confidence.  
- Adapt procedures to apply them to a new context.  
- Use feedback to improve efficiency when performing calculations.  

**Clarifications:**  
Teachers who encourage students to complete tasks with mathematical fluency:  
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.  
- Offer multiple opportunities for students to practice efficient and generalizable methods.  
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used. |
| **MA.K12.MTR.4.1:** | Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  
- Communicate mathematical ideas, vocabulary and methods effectively.  
- Analyze the mathematical thinking of others.  
- Compare the efficiency of a method to those expressed by others.  
- Recognize errors and suggest how to correctly solve the task.  
- Justify results by explaining methods and processes.  
- Construct possible arguments based on evidence.  

**Clarifications:**  
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:  
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.  
- Create opportunities for students to discuss their thinking with peers.  
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.  
- Develop students’ ability to justify methods and compare their responses to the responses of their peers.  

Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  
- Focus on relevant details within a problem. |
MA.K12.MTR.5.1:

- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:
Read and comprehend grade-level complex texts proficiently.

Clarifications:
See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:
Make inferences to support comprehension.

Clarifications:
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:
Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because ______." The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.4.1:
Use the accepted rules governing a specific format to create quality work.

Clarifications:
ELA.K12.EE.5.1: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.6.1: Use appropriate voice and tone when speaking or writing.

Clarifications:
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

</table>
SS.912.C.3.9: Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them. Evaluate the significance and outcomes of landmark Supreme Court cases.

SS.912.C.3.10: Clarifications:

SS.912.C.3.11: Contrast how the Constitution safeguards and limits individual rights.

SS.912.C.3.12: Illustrate examples of how government affects the daily lives of citizens at the local, state, and national levels.

SS.912.C.3.13: Clarifications:
Examples are education, transportation, crime prevention, funding of services.

SS.912.C.3.14: Examine constitutional powers (expressed, implied, concurrent, reserved).

SS.912.C.3.15: Examine how power and responsibility are distributed, shared, and limited by the Constitution.

SS.912.C.4.1: Clarifications:
Explain how the world's nations are governed differently.

SS.912.C.4.2: Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.

SS.912.C.4.3: Clarifications:
Assess human rights policies of the United States and other countries.

SS.912.C.4.4: Compare indicators of democratization in multiple countries.

SS.912.G.4.1: Interpret population growth and other demographic data for any given place.

SS.912.G.5.5: Use geographic terms and tools to analyze case studies of policies and programs for resource use and management.

LAFS.1112.RH.1.1: Cite specific textual evidence to support analysis of primary and secondary sources, connecting insights gained from specific details to an understanding of the text as a whole.

LAFS.1112.RH.1.2: Evaluate the central ideas or information of a primary or secondary source; provide an accurate summary that makes clear the relationships among the key details and ideas.

LAFS.1112.RH.1.3: Determine the meaning of words and phrases as they are used in a text, including analyzing how an author uses and refines the meaning of a key term over the course of a text (e.g., how Madison defines faction in Federalist No. 10).

LAFS.1112.RH.2.4: Analyze in detail how a complex primary source is structured, including how key sentences, paragraphs, and larger portions of the text contribute to the whole.

LAFS.1112.RH.2.5: Evaluate authors' differing points of view on the same historical event or issue by assessing the authors' claims, reasoning, and evidence.

LAFS.1112.RH.2.6: Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, as well as in words) in order to address a question or solve a problem.

LAFS.1112.RH.3.8: Evaluate an author's premises, claims, and evidence by corroborating or challenging them with other information.

LAFS.1112.RH.4.10: By the end of grade 12, read and comprehend history/social studies texts in the grades 11–CCR text complexity band independently and proficiently.

LAFS.1112.RH.4.10: Clarifications:
Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.

LAFS.1112.RH.4.10: a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.

LAFS.1112.RH.4.10: b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.

LAFS.1112.RH.4.10: c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.

LAFS.1112.RH.4.10: d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.

LAFS.1112.RH.4.10: e. Propose and participate in locating, evaluating, and using external information sources to respond to the task or solve the problem (e.g., by accessing multimedia for research and reference)."
c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts.
d. Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers.
e. Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).

LAFS.1112.WHST.2.4: Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

LAFS.1112.WHST.2.5: Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

LAFS.1112.WHST.2.6: Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.

LAFS.1112.WHST.3.7: Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

LAFS.1112.WHST.3.8: Draw evidence from informational texts to support analysis, reflection, and research.

LAFS.1112.WHST.4.10: Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

MAFS.K12.S-ID.1.3: Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.

MAFS.K12.S-ID.1.4: Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve.

MAFS.K12.MP.1.1: Make sense of problems and persevere in solving them.
Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

MAFS.K12.MP.3.1: Construct viable arguments and critique the reasoning of others.
Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
Use appropriate tools strategically.

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

Attend to precision.

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

Clarifications:

Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

United States Government - The grade 9-12 United States Government course consists of the following content area strands: Geography, Civics and Government. The primary content for the course pertains to the study of government institutions and political processes and their historical impact on American society. Content should include, but is not limited to, the functions and purpose of government, the function of the state, the constitutional framework, federalism, separation of powers, functions of the three branches of government at the local, state, and national level, and the political decision-making process.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Special Notes:

Additional content that may be included in the Grade 12 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- United States, major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at http://www.nagb.org/publications/frameworks/civicsframework.pdf

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in
GENERAL INFORMATION

**Course Number:** 2106310

**Number of Credits:** Half credit (.5)

**Course Type:** Core Academic Course

**Course Status:** Course Approved

**Grade Level(s):** 9, 10, 11, 12

**Graduation Requirement:** United States Government

**Course Path:** Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Political Sciences >

**Abbreviated Title:** US GOVT

**Course Length:** Semester (S)

**Course Attributes:**
- Class Size Core Required

**Course Level:** 2

<tbody>
<tr>
<td>SS.912.C.1.1:</td>
<td>Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.1.2:</td>
<td>Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.1.3:</td>
<td>Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.</td>
</tr>
<tr>
<td>SS.912.C.1.4:</td>
<td>Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights.</td>
</tr>
<tr>
<td>SS.912.C.1.5:</td>
<td>Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.</td>
</tr>
<tr>
<td>SS.912.C.2.1:</td>
<td>Evaluate the constitutional provisions establishing citizenship, and assess the criteria among citizens by birth, naturalized citizens, and non-citizens.</td>
</tr>
<tr>
<td>SS.912.C.2.2:</td>
<td>Evaluate the importance of political participation and civic participation.</td>
</tr>
<tr>
<td>SS.912.C.2.3:</td>
<td>Experience the responsibilities of citizens at the local, state, or federal levels.</td>
</tr>
<tr>
<td>SS.912.C.2.4:</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.5:</td>
<td>Conduct a service project to further the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.6:</td>
<td>Evaluate, take, and defend positions about rights protected by the Constitution and Bill of Rights.</td>
</tr>
<tr>
<td>SS.912.C.2.7:</td>
<td>Explain why rights have limits and are not absolute.</td>
</tr>
<tr>
<td>SS.912.C.2.8:</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change.</td>
</tr>
<tr>
<td>SS.912.C.2.9:</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</td>
</tr>
<tr>
<td>SS.912.C.2.10:</td>
<td>Monitor current public issues in Florida.</td>
</tr>
<tr>
<td>SS.912.C.2.11:</td>
<td>Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.</td>
</tr>
<tr>
<td>SS.912.C.2.12:</td>
<td>Explain the changing roles of television, radio, press, and Internet in political communication.</td>
</tr>
<tr>
<td>SS.912.C.2.13:</td>
<td>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.</td>
</tr>
<tr>
<td>SS.912.C.2.14:</td>
<td>Evaluate the processes and results of an election at the state or federal level.</td>
</tr>
<tr>
<td>SS.912.C.2.15:</td>
<td>Evaluate the origins and roles of political parties, interest groups, media, and individuals in determining and shaping public policy.</td>
</tr>
<tr>
<td>SS.912.C.2.16:</td>
<td>Analyze trends in voter turnout.</td>
</tr>
<tr>
<td>SS.912.C.3.1:</td>
<td>Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.3.2:</td>
<td>Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.</td>
</tr>
<tr>
<td>SS.912.C.3.3:</td>
<td>Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.3.4:</td>
<td>Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.3.5:</td>
<td>Identify the impact of independent regulatory agencies in the federal bureaucracy.</td>
</tr>
<tr>
<td>SS.912.C.3.6:</td>
<td>Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.3.7:</td>
<td>Describe the role of judicial review in American constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.3.8:</td>
<td>Compare the role of judges on the state and federal level with other elected officials.</td>
</tr>
<tr>
<td>SS.912.C.3.9:</td>
<td>Examples are decisions based on the law vs. will of the majority.</td>
</tr>
</tbody>
</table>
Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them. Evaluate the significance and outcomes of landmark Supreme Court cases.

Clariﬁcations:

Contrast how the Constitution safeguards and limits individual rights.

Simulate the judicial decision-making process in interpreting law at the state and federal level.

Illustrate examples of how government affects the daily lives of citizens at the local, state, and national levels.

Mathematicians who participate in eﬀortful learning both individually and with others:
• Analyze the problem in a way that makes sense given the task.
• Ask questions that will help with solving the task.
• Build perseverance by modifying methods as needed while solving a challenging task.
• Stay engaged and maintain a positive mindset when working to solve tasks.
• Help and support each other when attempting a new method or approach.

Clarifications:
Teachers who encourage students to participate actively in eﬀortful learning both individually and with others:
• Cultivate a community of growth mindset learners.
• Foster perseverance in students by choosing tasks that are challenging.
• Develop students’ ability to analyze and problem solve.
• Recognize students’ eﬀort when solving challenging problems.

Mathematicians who demonstrate understanding by representing problems in multiple ways:
• Build understanding through modeling and using manipulatives.
• Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
• Progress from modeling problems with objects and drawings to using algorithms and equations.
• Express connections between concepts and representations.
• Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
• Help students make connections between concepts and representations.
• Provide opportunities for students to use manipulatives when investigating concepts.
• Guide students from concrete to pictorial to abstract representations as understanding progresses.
• Show students that various representations can have different purposes and can be useful in diﬀerent situations.

Complete tasks with mathematical ﬂuency.
Mathematicians who complete tasks with mathematical ﬂuency:
• Select eﬃcient and appropriate methods for solving problems within the given context.
• Maintain ﬂexibility and accuracy while performing procedures and mental calculations.
• Complete tasks accurately and with conﬁdence.
• Adapt procedures to apply them to a new context.
• Use feedback to improve eﬃciency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical ﬂuency:
• Provide students with the ﬂexibility to solve problems by selecting a procedure that allows them to solve eﬃciently and accurately.
• Offer multiple opportunities for students to practice eﬃcient and generalizable methods.
• Provide opportunities for students to reﬂect on the method they used and determine if a more eﬃcient method could have been used.

Engage in discussions that reﬂect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reﬂect on the mathematical thinking of self and others:
• Communicate mathematical ideas, vocabulary and methods eﬀectively.
• Analyze the mathematical thinking of others.
• Compare the eﬃciency of a method to those expressed by others.
• Recognize errors and suggest how to correctly solve the task.
• Justify results by explaining methods and processes.
• Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reﬂect on the mathematical thinking of self and others:
Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.

- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**Clarifications:**

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

**Clarifications:**

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

**Clarifications:**

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

**Clarifications:**

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clarifications:**
### General Course Information and Notes

**GENERAL NOTES**

**United States Government** - The grade 9-12 United States Government course consists of the following content area strands: Geography, Civics, and Government. The primary content for the course pertains to the study of government institutions and political processes and their historical impact on American society. Content should include, but is not limited to, the functions and purpose of government, the function of the state, the constitutional framework, federalism, separation of powers, functions of the three branches of government at the local, state, and national level, and the political decision-making process.

**Special Notes:**

Additional content that may be included in the Grade 12 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- United States, major governmental, nongovernmental international organizations

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students’ content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida’s Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida’s B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit [https://www.cpalms.org/Standards/BEST_Standards.aspx](https://www.cpalms.org/Standards/BEST_Standards.aspx) and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: [https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf](https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf)

**Additional Instructional Resources:**

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: [http://www.fasa.net/4DCGI/cms/review.html?Action=CMSDocument&DocID=339](http://www.fasa.net/4DCGI/cms/review.html?Action=CMSDocument&DocID=339). Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

<th>Name</th>
<th>Description</th>
</tr>
</thead>
</table>
| SS.912.CG.1.1: | Examine how intellectual influences in primary documents contributed to the ideas in the Declaration of Independence, the U.S. Constitution and the Bill of Rights.  
- Students will recognize the influence of the Judeo-Christian tradition, republicanism, the English Constitution and common law, and the European Enlightenment in establishing the organic laws of the United States in primary documents (e.g., Magna Carta (1215); the Mayflower Compact (1620); the English Bill of Rights (1689); Common Sense (1776); Declaration of Independence (1776); the Constitution of Massachusetts (1780); the Articles of Confederation (1781); the Northwest Ordinance (1787); U.S. Constitution (1789)). |
| SS.912.CG.1.2: | Explain the influence of Enlightenment ideas on the Declaration of Independence.  
- Students will identify grievances listed in the Declaration of Independence in terms of due process of law, individual rights, natural rights, popular sovereignty and social contract.  
- Students will explain national sovereignty, natural law, self-evident truth, equality of all persons, due process of law, limited government, popular sovereignty, and unalienable rights of life, liberty and property as they relate to Enlightenment ideas in the Declaration of Independence.  
- Students will recognize that national sovereignty, due process of law, natural law, self-evident truth, equality of all persons, limited government, popular sovereignty, and unalienable rights of life, liberty and property form the philosophical foundation of our government. |
| SS.912.CG.1.3: | Explain arguments presented in the Federalist Papers in support of ratifying the U.S. Constitution and a republican form of government.  
- Students will recognize that the Federalist Papers argued for a federal system of government, separation of powers and a representative form of government that is accountable to its citizens.  
- Students will analyze Federalist and Anti-Federalist arguments concerning ratification of the U.S. Constitution and inclusion of a bill of rights. |
| SS.912.CG.1.4: | Analyze how the ideals and principles expressed in the founding documents shape America as a constitutional republic.  
- Students will differentiate among the documents and determine how each one was individually significant to the founding of the United States.  
- Students will evaluate how the documents are connected to one another.  
- Documents include, but are not limited to, the Declaration of Independence, Articles of Confederation, Federalist Papers (e.g., No. 10. No. 14. No. 31, No. 39, No. 51) and the U.S. Constitution.  
- Students will identify key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason). |
| SS.912.CG.1.5: | Explain how the U.S. Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers.  
- Students will explain how the structure and function of the U.S. government reflects these political principles.  
- Students will differentiate between republicanism and democracy, and discuss how the United States reflects both.  
- Students will describe compromises made during the Constitutional Convention (e.g., the Great Compromise, the Three-Fifths Compromise, the Electoral College). |
| SS.912.CG.2.1: | Explain the constitutional provisions that establish and affect citizenship.  
- Students will explain how the concept of citizenship in the United States has changed over the course of history (i.e., 13th, 14th, 15th and 19th Amendments).  
- Students will compare birthright citizenship, permanent residency and naturalization in the United States.  
- Students will differentiate the rights held by native-born citizens, permanent residents and naturalized citizens (e.g., running for public office). |
| SS.912.CG.2.2: | Explain the importance of political and civic participation to the success of the United States’ constitutional republic.  
- Students will discuss various ways in which U.S. citizens can exercise political and civic participation.  
- Students will identify historical examples of political and civic participation (e.g., Civil Rights Movement, Women’s Suffrage Movement).  
- Students will describe the ways in which individuals can be denied and limited in their right to practice political and civic participation (e.g., losing voting rights for felony conviction, limitations on political contributions, limits on the type of protesting). |
| SS.912.CG.2.3: | Explain the responsibilities of citizens at the local, state and national levels.  
- Students will identify various responsibilities held by citizens (e.g., voting, volunteering and being informed, respecting laws).  
- Students will understand the process of registering or preregistering to vote and how to complete a ballot in Florida (e.g., uniform primary and general election ballot).  
- Students will discuss appropriate methods of communication with public officials (e.g., corresponding, attending public meetings, requesting a meeting and providing information).  
- Students will participate in classroom activities that simulate exercising the responsibilities of citizenship. |
| SS.912.CG.2.4: | Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the public good.  
- Students will examine situations when individuals’ rights have been restricted for the public good (e.g., limits on speech or rationing of goods during wartime, enactment of the Patriot Act).  
- Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good.  
- Students will explain different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response). |
| SS.912.CG.2.5: | Analyze contemporary and historical examples of government-imposed restrictions on rights.  
- Students will identify historical examples of government-imposed restrictions on rights (e.g., suspension of habeas corpus, rationing during wartime and limitations on speech).  
- Students will examine the rationale for government-imposed restrictions on rights (e.g., inciting a crime, campaign contributions, defamation, military secrets). |
Students will describe the impeachment process. Describe how independent regulatory agencies interact with the three branches of government and with citizens.
SS.912.CG.3.5: Students will identify independent regulatory agencies (e.g., Federal Communications Commission, Federal Election Commission, National Labor Relations Board) and explain their purpose and effect.
• Students will describe the advantages and disadvantages of delegating power to independent regulatory agencies.

SS.912.CG.3.6: Explain expressed, implied, concurrent and reserved powers in the U.S. Constitution.
• Students will identify powers that are expressed in the U.S. Constitution to Congress (e.g., coin money, declare war, assess taxes, citizenship).
• Students will identify that expressed powers are also known as enumerated powers found in Article I of the U.S. Constitution.
• Students will analyze the role of the “general welfare clause” and “necessary and proper clause” in granting Congress implied powers.
• Students will describe examples of concurrent powers as those powers shared by both state and national governments (e.g., build roads, tax citizens, make laws).
• Students will explain how reserved powers define issues as matters for the people or the state governments.
• Students will compare the roles of expressed, implied, concurrent and reserved powers in United States’ federalism.

SS.912.CG.3.7: Analyze the structures, functions and processes of the judicial branch as described in Article III of the U.S. Constitution.
• Students will examine the role of the judicial branch in terms of its relationship with the legislative and executive branches of the government.
• Students will describe the role of the Supreme Court and lesser federal courts.
• Students will explain what Article III says about judicial tenure, appointment and salaries.
• Students will describe the powers delegated to the courts by Article III including, but not limited to, treason, jurisdiction and trial by jury.

SS.912.CG.3.8: Describe the purpose and function of judicial review in the American constitutional government.
• Students will examine the role of district courts, the courts of appeals and the Supreme Court in the judicial review process.
• Students will explain the relationship between the concept of judicial review and the language of the Supremacy Clause in Article VI of the U.S. Constitution.

SS.912.CG.3.9: Compare the role of state and federal judges with other elected officials.
• Students will compare the ways state and federal judges are appointed compared to other elected officials.
• Students will distinguish the qualifications needed for a judge at the state or federal level versus other elected officials.
• Students will compare the decision-making process of judges compared to other political figures.

SS.912.CG.3.10: Analyze the levels and responsibilities of state and federal courts.
• Students will describe what Article III of the U.S. Constitution states about the relationship between state and federal courts.
• Students will recognize the role of the Federal Judiciary Act of 1789 in establishing the structure and jurisdiction of the federal court system.
• Students will contrast the differences among civil trials and criminal trials at the state level.
• Students will describe the relationship among the Supreme Court, federal appellate courts and federal district courts (e.g., Erie Doctrine, Rooker-Feldman Doctrine).

SS.912.CG.3.11: Evaluate how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution.
• Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; McGillicuddy v. Maryland; Dred Scott v. Sandford; Piessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; Korematsu v. United States; Mapp v. Ohio; In re Gault; United States v. Nixon; Regents of the University of California v. Bakke; Hazelwood v. Kuhlmeier; District of Columbia v. Heller).
• Students will explain the foundational constitutional issues underlying landmark Supreme Court decisions related to the Bill of Rights and other amendments.
• Students will explain the outcomes of landmark Supreme Court cases related to the Bill of Rights and other amendments.

SS.912.CG.3.12: Analyze the concept of federalism in the United States and its role in establishing the relationship between the state and national governments.
• Students will identify examples of the powers reserved and shared among state and the national governments in the American federal system of government.
• Students will examine the role the Great Compromise had on the eventual establishment of a federal system of fifty equal states.
• Students will explain specific rights that are granted to the states in the language of the U.S. Constitution and its amendments (e.g., 10th Amendment, defense and extradition).
• Students will analyze how states have challenged the national government regarding states’ rights (e.g., Civil War, the New Deal, No Child Left Behind, Affordable Health Care Act, Civil Rights Movement).

SS.912.CG.3.13: Explain how issues between Florida, other states and the national government are resolved.
• Students will explain the concept of federalism as it applies to each issue.
• Students will use historical and issue-based scenarios to demonstrate understanding of how disputes between Florida, other states and the national government are resolved (e.g., water rights arguments between Florida and Georgia, national and state conflict over rights to adjacent waters and seabeds, civil rights).

SS.912.CG.3.14: Explain the judicial decision-making process in interpreting law at the state and national levels.
• Students will explain the role of the U.S. Constitution in interpreting law at the state and national levels.
• Students will explain the process used by judges at the state and national levels when making a decision or writing summary opinions.
• Students will incorporate language from the U.S. Constitution or court briefs to justify a legal decision when interpreting state or national law.

SS.912.CG.3.15: Explain how citizens are affected by the local, state and national governments.
• Students will identify local government officials and employees who affect the daily lives of citizens.
• Students will identify the role of state governmental officials and employees who affect the daily lives of citizens.
• Students will identify the role of national governmental officials and employees who affect the daily lives of citizens.
• Students will explain how government at all levels impacts the daily lives of citizens.

SS.912.CG.4.1: Analyze how liberty and economic freedom generate broad-based opportunity and prosperity in the United States.
• Students will differentiate between government systems (e.g., autocracy, democracy, monarchy, oligarchy republic, theocracy).
• Students will differentiate between economic systems (e.g., capitalism, communism, mixed market, socialism).
• Students will analyze the disadvantages of authoritarian control over the economy (e.g., communism and socialism) in generating broad-based economic prosperity for their population.

SS.912.CG.4.2: Explain how the United States uses foreign policy to influence other nations.
• Students will explain how the policies of other nations influence U.S. policy and society.
• Students will identify agencies of the U.S. government that contribute to its foreign policy agenda (e.g., National Security Agency, Central Intelligence Agency).
• Students will explain the advantages and disadvantages of how nongovernmental organizations (NGOs) influence foreign policy (e.g., United States Peace Corps).
Students will explain how the use of embargos and economic sanctions by the United States has affected other nations (e.g., Cuba, Iran, Syria).

Students will explain the U.S. response to international conflicts.

**SS.912.CG.4.3:** Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.
- Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.

**SS.912.CG.4.4:** Identify indicators of democratization in foreign countries.
- Students will recognize indicators of democratization as a system of free and fair elections, active civic participation, the protection of human rights, and the rule of law.

**SS.912.G.4.1:** Interpret population growth and other demographic data for any given place.
- Use geographic terms and tools to analyze case studies of policies and programs for resource use and management.

**MA.K12.MTR.1.1:** Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

### Clarifications:
- Teachers who encourage students to participate actively in effortful learning both individually and with others:
  - Cultivate a community of growth mindset learners.
  - Foster perseverance in students by choosing tasks that are challenging.
  - Develop students' ability to analyze and problem solve.
  - Recognize students' effort when solving challenging problems.

**MA.K12.MTR.2.1:** Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

### Clarifications:
- Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
  - Help students make connections between concepts and representations.
  - Provide opportunities for students to use manipulatives when investigating concepts.
  - Guide students from concrete to pictorial to abstract representations as understanding progresses.
  - Show students that various representations can have different purposes and can be useful in different situations.

**MA.K12.MTR.3.1:** Complete tasks with mathematical fluency.
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

### Clarifications:
- Teachers who encourage students to complete tasks with mathematical fluency:
  - Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
  - Offer multiple opportunities for students to practice efficient and generalizable methods.
  - Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

**MA.K12.MTR.4.1:** Engage in discussions that reflect on the mathematical thinking of self and others.
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

### Clarifications:
- Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
  - Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
  - Create opportunities for students to discuss their thinking with peers.
  - Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
  - Develop students' ability to justify methods and compare their responses to the responses of their peers.

**MA.K12.MTR.5.1:** Use patterns and structure to help understand and connect mathematical concepts.
- Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
  - Focus on relevant details within a problem.
MA.K12.MTR.5.1:
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:
- Assess the reasonableness of solutions.
- Mathematics who assess the reasonableness of solutions:
  - Estimate to discover possible solutions.
  - Use benchmark quantities to determine if a solution makes sense.
  - Check calculations when solving problems.
  - Verify possible solutions by explaining the methods used.
  - Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:
- Apply mathematics to real-world contexts.
- Mathematics who apply mathematics to real-world contexts:
  - Connect mathematical concepts to everyday experiences.
  - Use models and methods to understand, represent and solve problems.
  - Perform investigations to gather data or determine if a method is appropriate.
  - Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1:
- Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:
- Read and comprehend grade-level complex texts proficiently.

Clarifications:
See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.3.1:
- Make inferences to support comprehension.

Clarifications:
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.4.1:
- Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think ______ because ______." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

Clarifications:
Use the accepted rules governing a specific format to create quality work.
General Course Information and Notes

VERSION DESCRIPTION

Civic education is essential in the development of informed citizenry who are equipped to participate in civic life and preserve a government of the people, by the people, and for the people. The Civics and Government (CG) standards in this class were revised in 2021 as a result of the House Bill (2019) civics standards review and reflect the following priorities for K-12 Civics and Government teaching and learning in Florida schools.

- Students study primary source documents to understand the philosophical underpinnings of the American Republic and the root cause of American exceptionalism.
- Students compare the success of the United States and the success or failure of other nations’ governing philosophies to evaluate their past, present and likely future effects.
- Students have a sense of civic pride and participate regularly in all levels of government.
- Students reflect upon United States civic history, so they understand their rights and responsibilities as citizens, including the process of advocating properly with government officials.

This course must include a comparative discussion of political ideologies, such as communism and totalitarianism, that conflict with the principles of freedom and democracy essential to the founding principles of the United States.

GENERAL NOTES

United States Government - The grade 9-12 United States Government course consists of the following content area strands: Geography, Civics and Government. The primary content for the course pertains to the study of government institutions and political processes and their historical impact on American society. Content should include, but is not limited to, the functions and purpose of government, the function of the state, the constitutional framework, federalism, separation of powers, functions of the three branches of government at the local, state and national level, and the political decision-making process.

Special Notes:

Additional content that may be included in the Grade 12 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- United States, major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at http://www.nagb.org/publications/frameworks/civicsframework.pdf

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EE and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.C.1:</td>
<td>Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.2:</td>
<td>Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.3:</td>
<td>Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.</td>
</tr>
<tr>
<td>SS.912.C.4:</td>
<td>Evaluate and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights.</td>
</tr>
<tr>
<td>SS.912.C.5:</td>
<td>Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.</td>
</tr>
<tr>
<td>SS.912.C.6:</td>
<td>Evaluate the constitutional provisions establishing citizenship, and assess the criteria among citizens by birth, naturalized citizens, and non-citizens.</td>
</tr>
<tr>
<td>SS.912.C.7:</td>
<td>Evaluate the importance of political participation and civic participation.</td>
</tr>
<tr>
<td>SS.912.C.8:</td>
<td>Experience the responsibilities of citizens at the local, state, or federal levels.</td>
</tr>
<tr>
<td>SS.912.C.9:</td>
<td>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</td>
</tr>
<tr>
<td>SS.912.C.10:</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.11:</td>
<td>Conduct a service project to further the public good.</td>
</tr>
<tr>
<td>SS.912.C.12:</td>
<td>Clarifications: Examples are school, community, state, national, international.</td>
</tr>
<tr>
<td>SS.912.C.13:</td>
<td>Evaluate, take, and defend positions about rights protected by the Constitution and Bill of Rights.</td>
</tr>
<tr>
<td>SS.912.C.14:</td>
<td>Explain why rights have limits and are not absolute.</td>
</tr>
<tr>
<td>SS.912.C.15:</td>
<td>Clarifications: Examples are speech, search and seizure, religion, gun possession.</td>
</tr>
<tr>
<td>SS.912.C.16:</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change.</td>
</tr>
<tr>
<td>SS.912.C.17:</td>
<td>Clarifications: Examples are e-mail campaigns, boycotts, blogs, podcasts, protests, demonstrations, letters to editors.</td>
</tr>
<tr>
<td>SS.912.C.18:</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</td>
</tr>
<tr>
<td>SS.912.C.20:</td>
<td>Monitor current public issues in Florida.</td>
</tr>
<tr>
<td>SS.912.C.21:</td>
<td>Clarifications: Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.</td>
</tr>
<tr>
<td>SS.912.C.22:</td>
<td>Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.</td>
</tr>
<tr>
<td>SS.912.C.23:</td>
<td>Explain the changing roles of television, radio, press, and Internet in political communication.</td>
</tr>
<tr>
<td>SS.912.C.24:</td>
<td>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.</td>
</tr>
<tr>
<td>SS.912.C.25:</td>
<td>Clarifications: Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media.</td>
</tr>
<tr>
<td>SS.912.C.26:</td>
<td>Evaluate the processes and results of an election at the state or federal level.</td>
</tr>
<tr>
<td>SS.912.C.27:</td>
<td>Evaluate the origins and roles of political parties, interest groups, media, and individuals in determining and shaping public policy.</td>
</tr>
<tr>
<td>SS.912.C.29:</td>
<td>Clarifications: Examples are youth voter turnout, issue-based voting.</td>
</tr>
<tr>
<td>SS.912.C.30:</td>
<td>Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.31:</td>
<td>Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.</td>
</tr>
<tr>
<td>SS.912.C.32:</td>

</tbody>
</table>
Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.

Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the specific task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.

Draw evidence from informational texts to support analysis, reflection, and research.

Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each.

Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling.

Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant.

Evaluate reports based on data.

Represent data with plots on the real number line (dot plots, histograms, and box plots).

Mathematically proficient students make sense of problems and persevere in solving them.

Mathematically proficient students use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are limitations of each source in terms of the specific task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.

Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.

Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers).

Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are limitations of each source in terms of the specific task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.

Make sense of problems and persevere in solving them.

Mathematically proficient students make sense of problems and persevere in solving them. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships; graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

Construct viable arguments and critique the reasoning of others.

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve
Use appropriate tools strategically.

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they may know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

Attend to precision.

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

English language learners communicate for social and instructional purposes within the school setting.

Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

Clarifications:
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

United States Government - The grade 9-12 United States Government course consists of the following content area strands: Geography, Civics and Government. The primary content for the course pertains to the study of government institutions and political processes and their historical impact on American society. Content should include, but is not limited to, the functions and purpose of government, the function of the state, the constitutional framework, federalism, separation of powers, functions of the three branches of government at the local, state and national level, and the political decision-making process.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Special Notes:

Credit Recovery courses are credit bearing courses with specific content requirements defined by Next Generation Sunshine State Standards and/or Florida Standards. Students enrolled in a Credit Recovery course must have previously attempted the corresponding course (and/or End-of-Course assessment) since the course requirements for the Credit Recovery course are exactly the same as the previously attempted corresponding course. For example, Geometry (1206310) and Geometry for Credit Recovery (1206315) have identical content requirements. It is important to note that Credit Recovery courses are not bound by Section 1003.436(1)(a), Florida Statutes, requiring a minimum of 135 hours of bona fide instruction (120 hours in a school/district implementing block scheduling) in a designed course of study that contains student performance standards, since the students have previously attempted successful completion of the corresponding course. Additionally, Credit Recovery courses should ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.

Additional content that may be included in the Grade 12 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- United States, major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at http://www.nagb.org/publications/frameworks/civicsframework.pdf

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students’ content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

### GENERAL INFORMATION

**Course Number:** 2106315  
**Course Path:** Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies >  
**SubSubject:** Political Sciences >  
**Abbreviated Title:** US GOVT CR  
**Course Length:** Credit Recovery (R)  
**Course Level:** 2  
**Number of Credits:** Half credit (.5)  
**Course Type:** Credit Recovery  
**Course Status:** Course Approved  
**Grade Level(s):** 9,10,11,12

<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.C.1.1:</td>
<td>Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.1.2:</td>
<td>Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.1.3:</td>
<td>Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.</td>
</tr>
<tr>
<td>SS.912.C.1.4:</td>
<td>Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights.</td>
</tr>
<tr>
<td>SS.912.C.1.5:</td>
<td>Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.</td>
</tr>
<tr>
<td>SS.912.C.2.1:</td>
<td>Evaluate the constitutional provisions establishing citizenship, and assess the criteria among citizens by birth, naturalized citizens, and non-citizens.</td>
</tr>
<tr>
<td>SS.912.C.2.2:</td>
<td>Evaluate the importance of political participation and civic participation.</td>
</tr>
<tr>
<td>SS.912.C.2.3:</td>
<td>Experience the responsibilities of citizens at the local, state, or federal levels. <strong>Clarifications:</strong> Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</td>
</tr>
<tr>
<td>SS.912.C.2.4:</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.5:</td>
<td>Conduct a service project to further the public good. <strong>Clarifications:</strong> Examples are school, community, state, national, international.</td>
</tr>
<tr>
<td>SS.912.C.2.6:</td>
<td>Evaluate, take, and defend positions about rights protected by the Constitution and Bill of Rights.</td>
</tr>
<tr>
<td>SS.912.C.2.7:</td>
<td>Explain why rights have limits and are not absolute. <strong>Clarifications:</strong> Examples are speech, search and seizure, religion, gun possession.</td>
</tr>
<tr>
<td>SS.912.C.2.8:</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change. <strong>Clarifications:</strong> Examples are e-mail campaigns, boycotts, blogs, podcasts, protests, demonstrations, letters to editors.</td>
</tr>
<tr>
<td>SS.912.C.2.9:</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents. <strong>Clarifications:</strong> Examples are Preamble, Declaration of Independence, Constitution, Emancipation Proclamation, 13th, 14th, 15th, 19th, 24th, and 26th Amendments, Voting Rights Act of 1965.</td>
</tr>
<tr>
<td>SS.912.C.2.10:</td>
<td>Monitor current public issues in Florida. <strong>Clarifications:</strong> Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.</td>
</tr>
<tr>
<td>SS.912.C.2.11:</td>
<td>Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.</td>
</tr>
<tr>
<td>SS.912.C.2.12:</td>
<td>Explain the changing roles of television, radio, press, and Internet in political communication. <strong>Clarifications:</strong> Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.</td>
</tr>
<tr>
<td>SS.912.C.2.13:</td>
<td>Analyze the processes and results of an election at the state or federal level. <strong>Clarifications:</strong> Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media.</td>
</tr>
<tr>
<td>SS.912.C.2.14:</td>
<td>Evaluate the origins and roles of political parties, interest groups, media, and individuals in determining and shaping public policy. <strong>Clarifications:</strong> Analyze trends in voter turnout. Examples are youth voter turnout, issue-based voting.</td>
</tr>
<tr>
<td>SS.912.C.3.1:</td>
<td>Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.3.2:</td>
<td>Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.</td>
</tr>
<tr>
<td>SS.912.C.3.3:</td>
<td>Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.3.4:</td>
<td>Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution. <strong>Clarifications:</strong> Identify the impact of independent regulatory agencies in the federal bureaucracy. Examples are Federal Reserve, Food and Drug Administration, Federal Communications Commission.</td>
</tr>
<tr>
<td>SS.912.C.3.5:</td>
<td>Describe the role of judicial review in American constitutional government. <strong>Clarifications:</strong> Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.3.6:</td>
<td>Compare the role of judges on the state and federal level with other elected officials. <strong>Clarifications:</strong> Examples are Federal Reserve, Food and Drug Administration, Federal Communications Commission.</td>
</tr>
</tbody>
</table>
Clarifications:
Examples are decisions based on the law vs. will of the majority.

SS.912.C.3.8:
Analyze various levels and responsibilities of courts in the federal and state judicial system and the relationships among them.
Evaluate the significance and outcomes of landmark Supreme Court cases.

SS.912.C.3.9:
Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them.
Evaluate the significance and outcomes of landmark Supreme Court cases.

SS.912.C.3.10:
Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them.
Evaluate the significance and outcomes of landmark Supreme Court cases.

SS.912.C.3.11:
Contrast how the Constitution safeguards and limits individual rights.
SS.912.C.3.12:
Simulate the judicial decision-making process in interpreting law at the state and federal level.
SS.912.C.3.13:
Illustrate examples of how government affects the daily lives of citizens at the local, state, and national levels.

SS.912.C.3.14:
Examine constitutional powers (expressed, implied, concurrent, reserved).
SS.912.C.3.15:
Examine how power and responsibility are distributed, shared, and limited by the Constitution.
SS.912.C.3.16:
Explain how the world’s nations are governed differently.
SS.912.C.4.1:
Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.
SS.912.C.4.3:
Assess human rights policies of the United States and other countries.
SS.912.C.4.4:
Compare indicators of democratization in multiple countries.
SS.912.G.4.1:
Interpret population growth and other demographic data for any given place.
SS.912.G.5.5:
Use geographic terms and tools to analyze case studies of policies and programs for resource use and management.

Clarifications:
Examples are education, transportation, crime prevention, funding of services.

MA.K12.MTR.1.1:
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Engage in discussions that reflect on the mathematical thinking of self and others.
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
- Examples are decisions based on the law vs. will of the majority.
- Examples are education, transportation, crime prevention, funding of services.

Clarifications:
- Teachers who encourage students to participate actively in effortful learning both individually and with others:
  - Cultivate a community of growth mindset learners.
  - Foster perseverance in students by choosing tasks that are challenging.
  - Develop students’ ability to analyze and problem solve.
  - Recognize students’ effort when solving challenging problems.

Clarifications:
- Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
  - Help students make connections between concepts and representations.
  - Guide students from concrete to pictorial to abstract representations as understanding progresses.
  - Show students that various representations can have different purposes and can be useful in different situations.

Clarifications:
- Teachers who encourage students to complete tasks with mathematical fluency:
  - Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
  - Provide opportunities for students to practice efficient and generalizable methods.
  - Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Clarifications:
- Teachers who encourage students to complete tasks with mathematical fluency:
Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students’ ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Clarifications:
Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.7.1:

Clarifications:
Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1:

Clarifications:
Cite evidence to explain and justify reasoning.
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:

Clarifications:
Read and comprehend grade-level complex texts proficiently.
See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.3.1:

Clarifications:
Make inferences to support comprehension.
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Clarifications:
Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.
General Course Information and Notes

GENERAL NOTES

United States Government - The grade 9-12 United States Government course consists of the following content area strands: Geography, Civics and Government. The primary content for the course pertains to the study of government institutions and political processes and their historical impact on American society. The course should include, but is not limited to, the functions and purpose of government, the function of the state, the constitutional framework, federalism, separation of powers, functions of the three branches of government at the local, state, and national level, and the political decision-making process.

Special Notes:

Credit Recovery courses are credit bearing courses with specific content requirements defined by Next Generation Sunshine State Standards and/or Florida Standards. Students enrolled in a Credit Recovery course must have previously attempted the corresponding course (and/or End-of-Course assessment) since the course requirements for the Credit Recovery course are exactly the same as the previously attempted corresponding course. For example, Geometry (1206310) and Geometry for Credit Recovery (1206315) have identical content requirements. It is important to note that Credit Recovery courses are not bound by Section 1003.436(1)(a), Florida Statutes, requiring a minimum of 135 hours of bona fide instruction (120 hours in a school/district implementing block scheduling) in a designed course of study that contains student performance standards, since the students have previously attempted successful completion of the corresponding course. Additionally, Credit Recovery courses should ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.

Additional content that may be included in the Grade 12 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- United States, major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at http://www.nagb.org/publications/frameworks/civicsframework.pdf

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students’ content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps students learn:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida’s Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida’s B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EE and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

- History (Grades 6-12)
- Social Science (Grades 6-12)
## Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.CG.1.1:</td>
<td>Examine how intellectual influences in primary documents contributed to the ideas in the Declaration of Independence, the U.S. Constitution and the Bill of Rights. Students will recognize the influence of the Judeo-Christian tradition, republicanism, the English Constitution and common Law, and the European Enlightenment in establishing the organic laws of the United States in primary documents (e.g., Magna Carta (1215); the Mayflower Compact (1620); the English Bill of Rights (1689); Common Sense (1776); Declaration of Independence (1776); the Constitution of Massachusetts (1780); the Articles of Confederation (1781); the Northwest Ordinance (1787); U.S. Constitution (1789)). Explain the influence of Enlightenment ideas on the Declaration of Independence. Students will identify grievances listed in the Declaration of Independence in terms of due process of law, individual rights, natural rights, popular sovereignty and social contract. Students will explain national sovereignty, natural law, self-evident truth, equality of all persons, due process of law, limited government, popular sovereignty, and unalienable rights of life, liberty and property as they relate to Enlightenment ideas in the Declaration of Independence. Students will recognize that national sovereignty, due process of law, natural law, self-evident truth, equality of all persons, limited government, popular sovereignty, and unalienable rights of life, liberty and property form the philosophical foundation of our government.</td>
</tr>
<tr>
<td>SS.912.CG.1.2:</td>
<td>Explain arguments presented in the Federalist Papers in support of ratifying the U.S. Constitution and a republican form of government. Students will recognize the Federalist Papers argued for a federal system of government, separation of powers and a representative form of government that is accountable to its citizens. Students will analyze Federalist and Anti-Federalist arguments concerning ratification of the U.S. Constitution and inclusion of a bill of rights.</td>
</tr>
<tr>
<td>SS.912.CG.1.3:</td>
<td>Analyze how the ideals and principles expressed in the founding documents shape America as a constitutional republic. Students will differentiate among the documents and determine how each one was individually significant to the founding of the United States. Students will evaluate how the documents are connected to one another. Students will explain key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason).</td>
</tr>
<tr>
<td>SS.912.CG.1.5:</td>
<td>Explain how the U.S. Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers. Students will explain how the structure and function of the U.S. government reflects these political principles. Students will differentiate between republicanism and democracy, and discuss how the United States reflects both. Students will describe compromises made during the Constitutional Convention (e.g., the Great Compromise, the Three-Fifths Compromise, the Electoral College).</td>
</tr>
<tr>
<td>SS.912.CG.2.1:</td>
<td>Explain the constitutional provisions that establish and affect citizenship. Students will explain how the concept of citizenship in the United States has changed over the course of history (i.e., 13th, 14th, 15th and 19th Amendments). Students will compare birthright citizenship, permanent residency and naturalization in the United States. Students will differentiate the rights held by native-born citizens, permanent residents and naturalized citizens (e.g., running for public office).</td>
</tr>
<tr>
<td>SS.912.CG.2.2:</td>
<td>Explain the importance of political and civic participation to the success of the United States' constitutional republic. Students will discuss various ways in which U.S. citizens can exercise political and civic participation. Students will identify historical examples of political and civic participation (e.g., Civil Rights Movement, Women's Suffrage Movement). Students will describe the ways in which individuals can be denied and limited in their right to practice political and civic participation (e.g., losing voting rights for felony conviction, limitations on political contributions, limits on the type of protesting).</td>
</tr>
<tr>
<td>SS.912.CG.2.3:</td>
<td>Explain the responsibilities of citizens at the local, state and national levels. Students will identify various responsibilities held by citizens (e.g., voting, volunteering and being informed, respecting laws). Students will understand the process of registering or preregistering to vote and how to complete a ballot in Florida (e.g., uniform primary and general election ballot). Students will discuss appropriate methods of communication with public officials (e.g., corresponding, attending public meetings, requesting a meeting and providing information). Students will participate in classroom activities that simulate exercising the responsibilities of citizenship.</td>
</tr>
<tr>
<td>SS.912.CG.2.4:</td>
<td>Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the public good. Students will examine situations when individuals' rights have been restricted for the public good (e.g., limits on speech or rationing of goods during wartime, enactment of the Patriot Act). Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good. Students will explain different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response). Analyze contemporary and historical examples of government-imposed restrictions on rights. Students will identify historical examples of government-imposed restrictions on rights (e.g., suspension of habeas corpus, rationing during wartime, enactment of the Patriot Act).</td>
</tr>
</tbody>
</table>
SS.912.CG.2.5: Students will examine the rationale for government-imposed restrictions on rights (e.g., inciting a crime, campaign contributions, defamation, military secrets).

SS.912.CG.2.6: Students will explain how different groups of people (e.g., African Americans, immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman's desegregation of the army, Lincoln's Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault).

SS.912.CG.2.7: Students will examine the rationale for government-imposed restrictions on rights (e.g., inciting a crime, campaign contributions, defamation, military secrets).

SS.912.CG.2.8: Students will analyze how the principles of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers contribute to the nation's longevity and its ability to overcome challenges, and distinguish the United States' constitutional republic from authoritarian and totalitarian nations.

SS.912.CG.2.9: Students will analyze the roles of the legislative, executive, and judicial branches of government (e.g., bicameral legislative body and how the House of Representatives and Senate functions differently from the Senate).

SS.912.CG.2.10: Students will analyze the influence and effects of various forms of media and the internet in political communication.

SS.912.CG.2.11: Students will analyze how the methods of political communication has changed over time (e.g., television, radio, press, social media).

SS.912.CG.2.12: Students will analyze the impact of political parties, interest groups, media, and individuals on determining and shaping public policy.

SS.912.CG.2.13: Students will analyze the influence and effects of various forms of media and the internet in political communication.

SS.912.CG.3.1: Students will analyze the structures, functions, and processes of the legislative branch as described in Article I of the U.S. Constitution.

SS.912.CG.3.2: Students will identify political ideologies that conflict with the principles of freedom and democracy (e.g., communism and totalitarianism).

SS.912.CG.3.3: Students will analyze how the principles of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers contribute to the nation's longevity and its ability to overcome challenges, and distinguish the United States' constitutional republic from authoritarian and totalitarian nations.

SS.912.CG.3.4: Students will analyze the structures, functions, and processes of the legislative branch as described in Article I of the U.S. Constitution.

SS.912.CG.3.5: Students will analyze the impact of political parties, interest groups, media, and individuals on determining and shaping public policy.

SS.912.CG.3.6: Students will analyze how the principles of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers contribute to the nation's longevity and its ability to overcome challenges, and distinguish the United States' constitutional republic from authoritarian and totalitarian nations.

SS.912.CG.3.7: Students will analyze the role of the executive branch in terms of its relationship with the judicial and executive branches of the government.

SS.912.CG.3.8: Students will analyze the role of the executive branch in terms of its relationship with the judicial and executive branches of the government.

SS.912.CG.3.9: Students will analyze the role of the executive branch in terms of its relationship with the judicial and executive branches of the government.

SS.912.CG.3.10: Students will analyze the role of the executive branch in terms of its relationship with the judicial and executive branches of the government.
| SS.912.CG.3.5 | Describe how independent regulatory agencies interact with the three branches of government and with citizens. 
- Students will identify independent regulatory agencies (e.g., Federal Communications Commission, Federal Election Commission, National Labor Relations Board) and explain their purpose and effect. 
- Students will describe the advantages and disadvantages of delegating power to independent regulatory agencies. |
| SS.912.CG.3.6 | Explain expressed, implied, concurrent and reserved powers in the U.S. Constitution. 
- Students will identify the powers that are expressed in the U.S. Constitution to Congress (e.g., coin money, declare war, assess taxes, citizenship). 
- Students will identify that expressed powers are also known as enumerated powers found in Article I of the U.S. Constitution. 
- Students will analyze the role of the “general welfare clause” and “necessary and proper clause” in granting Congress implied powers. 
- Students will describe examples of concurrent powers as those powers shared by both state and national governments (e.g., build roads, tax citizens, make laws). 
- Students will explain how reserved powers define issues as matters for the people or the state governments. 
- Students will compare the roles of expressed, implied, concurrent and reserved powers in United States’ federalism. |
| SS.912.CG.3.7 | Analyze the structures, functions and processes of the judicial branch as described in Article III of the U.S. Constitution. 
- Students will examine the role of the judicial branch in terms of its relationship with the legislative and executive branches of the government. 
- Students will describe the role of the Supreme Court and lesser federal courts. 
- Students will explain what Article III says about judicial tenure, appointment and salaries. 
- Students will describe the powers delegated to the courts by Article III including, but not limited to, treason, jurisdiction and trial by jury. |
| SS.912.CG.3.8 | Describe the purpose and function of judicial review in the American constitutional government. 
- Students will examine the role of district courts, the courts of appeals and the Supreme Court in the judicial review process. 
- Students will explain the relationship between the concept of judicial review and the language of the Supremacy Clause in Article VI of the U.S. Constitution. |
| SS.912.CG.3.9 | Compare the role of state and federal judges with other elected officials. 
- Students will compare the ways state and federal judges are appointed compared to other elected officials. 
- Students will distinguish the qualifications needed for a judge at the state or federal level versus other elected officials. 
- Students will compare the decision-making process of judges compared to other political figures. |
| SS.912.CG.3.10 | Analyze the levels and responsibilities of state and federal courts. 
- Students will describe what Article III of the U.S. Constitution states about the relationship between state and federal courts. 
- Students will recognize the role of the Federal Judiciary Act of 1789 in establishing the structure and jurisdiction of the federal court system. 
- Students will contrast the differences among civil trials and criminal trials at the state level. 
- Students will describe the relationship among the Supreme Court, federal appellate courts and federal district courts (e.g., Erie Doctrine, Rooker-Feldman Doctrine). |
| SS.912.CG.3.11 | Evaluate how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution. 
- Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; McCulloch v. Maryland; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; Korematsu v. United States; Mapp v. Ohio; In re Gault; United States v. Nixon; Regents of the University of California v. Bakke; Hazelwood v. Kuhlmeier; District of Columbia v. Heller). 
- Students will explain the foundational constitutional issues underlying landmark Supreme Court decisions related to the Bill of Rights and other amendments. 
- Students will explain the outcomes of landmark Supreme Court cases related to the Bill of Rights and other amendments. |
| SS.912.CG.3.12 | Analyze the concept of federalism in the United States and its role in establishing the relationship between the state and national governments. 
- Students will explain the concept of federalism as it applies to each issue. 
- Students will use historical and issue-based scenarios to demonstrate understanding of how disputes between Florida, other states and the national government are resolved (e.g., water rights arguments between Florida and Georgia, national and state conflict over rights to adjacent waters and seabeds, civil rights). |
| SS.912.CG.3.13 | Explain how issues between Florida, other states and the national government are resolved. 
- Students will explain the concept of federalism as it applies to each issue. 
- Students will use historical and issue-based scenarios to demonstrate understanding of how disputes between Florida, other states and the national government are resolved (e.g., water rights arguments between Florida and Georgia, national and state conflict over rights to adjacent waters and seabeds, civil rights). |
| SS.912.CG.3.14 | Explain the judicial decision-making process in interpreting law at the state and national levels. 
- Students will explain the role of the U.S. Constitution in interpreting law at the state and national levels. 
- Students will explain the process used by judges at the state and national levels when making a decision or writing summary opinions. 
- Students will incorporate language from the U.S. Constitution or court briefs to justify a legal decision when interpreting state or national law. |
| SS.912.CG.3.15 | Explain how citizens are affected by the local, state and national governments. 
- Students will identify local government officials and employees who affect the daily lives of citizens. 
- Students will identify the role of state governmental officials and employees who affect the daily lives of citizens. 
- Students will identify the role of national governmental officials and employees who affect the daily lives of citizens. 
- Students will explain how government at all levels impacts the daily lives of citizens. |
| SS.912.CG.4.1 | Analyze how liberty and economic freedom generate broad-based opportunity and prosperity in the United States. 
- Students will differentiate between government systems (e.g., autocracy, democracy, monarchy, oligarchy republic, theocracy). 
- Students will differentiate between economic systems (e.g., capitalism, communism, mixed market, socialism). 
- Students will analyze the disadvantages of authoritarian control over the economy (e.g., communism and socialism) in generating broad-based economic prosperity for their population. |
| | Explain how the United States uses foreign policy to influence other nations.
- Students will explain how the policies of other nations influence U.S. policy and society. |
Interpret population growth and other demographic data for any given place.

Students will explain the advantages and disadvantages of how nongovernmental organizations (NGOs) influence foreign policy (e.g., United States Agency for International Development, Red Cross, American Woman Suffrage Association, Amnesty International).

Students will explain how U.S. trade policy influences its relationships with other nations (e.g., China, Saudi Arabia).

Students will explain the U.S. response to international conflicts.

Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.

Identify indicators of democratization in foreign countries.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.
### MA.K12.MTR.5.1:
Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

### MA.K12.MTR.6.1:
Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

### MA.K12.MTR.7.1:
Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

### ELA.K12.EE.1.1:
Cite evidence to explain and justify reasoning.

**Clarifications:**
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

### ELA.K12.EE.2.1:
Read and comprehend grade-level complex texts proficiently.

**Clarifications:**
See Text Complexity for grade-level complexity bands and a text complexity rubric.

### ELA.K12.EE.3.1:
Make inferences to support comprehension.

**Clarifications:**
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

### ELA.K12.EE.4.1:
Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clarifications:**
In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think ______ because _______." The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
### ELA.K12.EE.5.1:
Use the accepted rules governing a specific format to create quality work.

**Clarifications:**
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

### ELA.K12.EE.6.1:
Use appropriate voice and tone when speaking or writing.

**Clarifications:**
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

### ELD.K12.ELL.SL.1:
English language learners communicate for social and instructional purposes within the school setting.

### ELD.K12.ELL.SS.1:
English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

### ELD.K12.ELL.SI.1:
English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

### HE.912.C.2.4:
Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

**Clarifications:**
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

---

**General Course Information and Notes**

### General Notes

**United States Government** - The grade 9-12 United States Government course consists of the following content area strands: Geography, Civics and Government. The primary content for the course pertains to the study of government institutions and political processes and their historical impact on American society. Content should include, but is not limited to, the functions and purpose of government, the function of the state, the constitutional framework, federalism, separation of powers, functions of the three branches of government at the local, state and national level, and the political decision-making process.

**Special Notes:**
Credit Recovery courses are credit bearing courses with specific content requirements defined by Next Generation Sunshine State Standards and/or Florida Standards. Students enrolled in a Credit Recovery course must have previously attempted the corresponding course (and/or End-of-Course assessment) since the course requirements for the Credit Recovery course are exactly the same as the previously attempted corresponding course. For example, Geometry (1206310) and Geometry for Credit Recovery (1206315) have identical content requirements. It is important to note that Credit Recovery courses are not bound by Section 1003.436(1)(a), Florida Statutes, requiring a minimum of 135 hours of bona fide instruction (120 hours in a school/district implementing block scheduling) in a designed course of study that contains student performance standards, since the students have previously attempted successful completion of the corresponding course. Additionally, Credit Recovery courses should ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.

Additional content that may be included in the Grade 12 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- United States, major governmental, nongovernmental international organizations

### Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

### Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit [https://www.cpalms.org/Standards/BEST_Standards.aspx](https://www.cpalms.org/Standards/BEST_Standards.aspx) and select the appropriate B.E.S.T. Standards package.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: [https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf](https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf)

<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.C.1.1:</td>
<td>Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.1.2:</td>
<td>Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.1.3:</td>
<td>Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.</td>
</tr>
<tr>
<td>SS.912.C.1.4:</td>
<td>Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights.</td>
</tr>
<tr>
<td>SS.912.C.1.5:</td>
<td>Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.</td>
</tr>
<tr>
<td>SS.912.C.2.1:</td>
<td>Evaluate the constitutional provisions establishing citizenship, and assess the criteria among citizens by birth, naturalized citizens, and non-citizens.</td>
</tr>
<tr>
<td>SS.912.C.2.2:</td>
<td>Evaluate the importance of political participation and civic participation.</td>
</tr>
<tr>
<td>SS.912.C.2.3:</td>
<td>Experience the responsibilities of citizens at the local, state, or federal levels.</td>
</tr>
<tr>
<td>SS.912.C.2.4:</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.5:</td>
<td>Conduct a service project to further the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.6:</td>
<td>Evaluate, take, and defend positions about rights protected by the Constitution and Bill of Rights.</td>
</tr>
<tr>
<td>SS.912.C.2.7:</td>
<td>Explain why rights have limits and are not absolute.</td>
</tr>
<tr>
<td>SS.912.C.2.8:</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change.</td>
</tr>
<tr>
<td>SS.912.C.2.9:</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</td>
</tr>
<tr>
<td>SS.912.C.2.10:</td>
<td>Monitor current public issues in Florida.</td>
</tr>
<tr>
<td>SS.912.C.2.11:</td>
<td>Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.</td>
</tr>
<tr>
<td>SS.912.C.2.12:</td>
<td>Explain the changing roles of television, radio, press, and Internet in political communication.</td>
</tr>
<tr>
<td>SS.912.C.2.13:</td>
<td>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.</td>
</tr>
<tr>
<td>SS.912.C.2.14:</td>
<td>Evaluate the processes and results of an election at the state or federal level.</td>
</tr>
<tr>
<td>SS.912.C.2.15:</td>
<td>Evaluate the origins and roles of political parties, interest groups, media, and individuals in determining and shaping public policy.</td>
</tr>
<tr>
<td>SS.912.C.2.16:</td>
<td>Analyze trends in voter turnout.</td>
</tr>
<tr>
<td>SS.912.C.3.1:</td>
<td>Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.3.2:</td>
<td>Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.</td>
</tr>
<tr>
<td>SS.912.C.3.3:</td>
<td>Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.3.4:</td>
<td>Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.3.5:</td>
<td>Identify the impact of independent regulatory agencies in the federal bureaucracy.</td>
</tr>
<tr>
<td>SS.912.C.3.6:</td>
<td>Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.3.7:</td>
<td>Describe the role of judicial review in American constitutional government.</td>
</tr>
</tbody>
</table>
Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them.

Evaluate the significance and outcomes of landmark Supreme Court cases.

Contrast how the Constitution safeguards and limits individual rights.

Simulate the judicial decision-making process in interpreting law at the state and federal level.

Illustrate examples of how government affects the daily lives of citizens at the local, state, and national levels.

Compare the role of judges on the state and federal level with other elected officials.

Examples are decisions based on the law vs. will of the majority.

Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.

Examples are decisions based on the law vs. will of the majority.

Evaluate various explanations for actions or events and determine which evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.

Evaluate the significance and outcomes of landmark Supreme Court cases.

Interpret population growth and other demographic data for any given place.

Use geographic terms and tools to analyze case studies of policies and programs for resource use and management.

Cite specific textual evidence to support analysis of primary and secondary sources, connecting insights gained from specific details to an understanding of the text as a whole.

Determine the central ideas or information of a primary or secondary source; provide an accurate summary that makes clear the relationships among the key details and ideas.

Determine the meaning of words and phrases as they are used in a text, including analyzing how an author uses and refines the meaning of a key term over the course of a text (e.g., how Madison defines faction in Federalist No. 10).

Evaluate in detail how a complex primary source is structured, including how key sentences, paragraphs, and larger portions of the text contribute to the whole.

Evaluate authors' differing points of view on the same historical event or issue by assessing the authors' claims, reasoning, and evidence.

Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, as well as in words) in order to address a question or solve a problem.

Integrate information from diverse sources, both primary and secondary, into a coherent understanding of an idea or event, noting discrepancies among sources.

By the end of grade 12, read and comprehend history/social studies texts in the grades 11–CCR text complexity band independently and proficiently.

Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.

a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation when responding to others' ideas and reading-related information.

b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.

c. Propose and defend multiple perspectives and ideas fairly and thoroughly, preparing and responding to the comments of others.

d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.

Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.

Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.

Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.

Write arguments focused on discipline-specific content.

a. Introduce precise, knowledgeable claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that logically sequences the claim(s), counterclaims, reasons, and evidence.

b. Develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form that anticipates the audience's knowledge level, concerns, values, and possible biases.

Use words, phrases, and clauses as well as varied syntax to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.

d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

e. Provide a concluding statement or section that follows from or supports the argument presented.

Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes.

a. Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.
### LAFS.1112.WHST.1.2:

- Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.

- Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts.

- Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers.

- Provide a concluding section or statement that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).

### LAFS.1112.WHST.2.4:

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

### LAFS.1112.WHST.2.5:

Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

### LAFS.1112.WHST.2.6:

Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.

### LAFS.1112.WHST.3.7:

Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

### MAFS.K12.MP.3.1:

MAFS.K12.MP.3.1:

MAFS.912.S-ID.1.3:

Use the mean and standard deviation (outliers).

- MAFS.912.S-ID.1.2:

- MAFS.912.S-ID.1.1:

<table>

### MAFS.912.S-ID.5.1.1:

**Standard Relation to Course:** Supporting

Represent data with plots on the real number line (dot plots, histograms, and box plots).

### MAFS.912.S-ID.5.1.2:

**Standard Relation to Course:** Supporting

Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.

### MAFS.912.S-ID.5.1.3:

**Standard Relation to Course:** Supporting

Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers).

### MAFS.912.S-ID.5.1.4:

**Standard Relation to Course:** Supporting

Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve.

### MAFS.912.S-ID.5.1.5:

**Standard Relation to Course:** Supporting

Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.

### MAFS.912.S-ID.5.1.6:

**Standard Relation to Course:** Supporting

Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers).

### MAFS.912.S-ID.5.1.7:

**Standard Relation to Course:** Supporting

Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve.

### MAFS.912.S-ID.5.1.8:

**Standard Relation to Course:** Supporting

Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.

### MAFS.6.S-ID.5.1.1:

**Standard Relation to Course:** Supporting

Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers).

### MAFS.6.S-ID.5.1.2:

**Standard Relation to Course:** Supporting

Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve.

### MAFS.6.S-ID.5.1.3:

**Standard Relation to Course:** Supporting

Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.

**Clarifications:**

In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

### MAFS.6.S-ID.5.1.4:

**Standard Relation to Course:** Supporting

Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve.

### MAFS.6.S-ID.5.1.5:

**Standard Relation to Course:** Supporting

Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.

### MAFS.6.S-ID.5.1.6:

**Standard Relation to Course:** Supporting

Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers).

### MAFS.6.S-ID.5.1.7:

**Standard Relation to Course:** Supporting

Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve.

### MAFS.6.S-ID.5.1.8:

**Standard Relation to Course:** Supporting

Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.

**Clarifications:**

In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

### MAFS.912.S-ID.5.1.1:

**Standard Relation to Course:** Supporting

Represent data with plots on the real number line (dot plots, histograms, and box plots).

### Make sense of problems and persevere in solving them.

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

### Construct viable arguments and critique the reasoning of others.

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and — if there is a flaw in an argument — explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies.
Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

<table>
<thead>
<tr>
<th>MAFS.K12.MP.5.1:</th>
<th>Use appropriate tools strategically.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>MAFS.K12.MP.6.1:</th>
<th>Attend to precision.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</td>
</tr>

### GENERAL COURSE INFORMATION AND NOTES

**GENERAL NOTES**

**United States Government** - The grade 9-12 United States Government course consists of the following content area strands: Geography, Civics and Government. The primary content for the course pertains to the study of government institutions and political processes and their historical impact on American society. Content should include, but is not limited to, the functions and purpose of government, the function of the state, the constitutional framework, federalism, separation of powers, functions of the three branches of government at the local, state and national level, and the political decision-making process.

**Honors and Advanced Level Course Note:** Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

**Mathematics Benchmark Guidance** - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

**Special Notes:**

Additional content that may be included in the Grade 12 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- United States, major governmental, nongovernmental international organizations

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students’ content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Literacy Standards in Social Studies**

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and
concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

Additional Instructional Resources:
A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4D CGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2106320

Number of Credits: Half credit (.5)

Course Type: Core Academic Course
Course Status: Course Approved
Grade Level(s): 9,10,11,12
Graduation Requirement: United States Government

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Political Sciences > Abbreviated Title: US GOVT HON

Course Length: Semester (S)
Course Attributes:
- Honors
- Class Size Core Required
Course Level: 3

<td>Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.1.3:</td>
<td>Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.</td>
</tr>
<tr>
<td>SS.912.C.1.4:</td>
<td>Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights.</td>
</tr>
<tr>
<td>SS.912.C.1.5:</td>
<td>Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.</td>
</tr>
<tr>
<td>SS.912.C.1.6:</td>
<td>Evaluate the constitutional provisions establishing citizenship, and assess the criteria among citizens by birth, naturalized citizens, and non-citizens.</td>
</tr>
<tr>
<td>SS.912.C.1.7:</td>
<td>Evaluate the importance of political participation and civic participation.</td>
</tr>
<tr>
<td>SS.912.C.2.1:</td>
<td>Experience the responsibilities of citizens at the local, state, or federal levels.</td>
</tr>
<tr>
<td>SS.912.C.2.2:</td>
<td>Conduct a service project to further the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.3:</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.4:</td>
<td>Explain why rights have limits and are not absolute.</td>
</tr>
<tr>
<td>SS.912.C.2.5:</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change.</td>
</tr>
<tr>
<td>SS.912.C.2.6:</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</td>
</tr>
<tr>
<td>SS.912.C.2.7:</td>
<td>Monitor current public issues in Florida.</td>
</tr>
<tr>
<td>SS.912.C.2.8:</td>
<td>Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.</td>
</tr>
<tr>
<td>SS.912.C.2.9:</td>
<td>Explain the changing roles of television, radio, press, and Internet in political communication.</td>
</tr>
<tr>
<td>SS.912.C.3.1:</td>
<td>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.</td>
</tr>
<tr>
<td>SS.912.C.3.2:</td>
<td>Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.3.3:</td>
<td>Identify the impact of independent regulatory agencies in the federal bureaucracy.</td>
</tr>
<tr>
<td>SS.912.C.3.4:</td>
<td>Determine the role of judicial review in American constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.3.5:</td>
<td>Compare the role of judges on the state and federal level with other elected officials.</td>
</tr>
<tr>
<td>SS.912.C.3.6:</td>
<td>Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.3.7:</td>
<td>Describe the role of judicial review in American constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.3.8:</td>
<td>Examples are decisions based on the law vs. will of the majority.</td>
</tr>
</tbody>
</table>
Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them.

Evaluate the influence of American foreign policy on other nations and society.

Contrast how the Constitution safeguards and limits individual rights.

Simulate the judicial decision-making process in interpreting law at the state and federal level.

Examine how power and responsibility are distributed, shared, and limited by the Constitution.

Use geographic terms and tools to analyze case studies of policies and programs for resource use and management.

Examine constitutional powers (expressed, implied, concurrent, reserved).

Illustrate how different nations are governed in practice.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students’ ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students’ ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

**Clarifications:**
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

**Clarifications:**
See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

**Clarifications:**
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clarifications:**
General Course Information and Notes

GENERAL NOTES

United States Government - The grade 9-12 United States Government course consists of the following content area strands: Geography, Civics and Government. The primary content for the course pertains to the study of government institutions and political processes and their historical impact on American society. Content should include, but is not limited to, the functions and purpose of government, the function of the state, the constitutional framework, federalism, separation of powers, functions of the three branches of government at the local, state and national level, and the political decision-making process.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes:

Additional content that may be included in the Grade 12 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- United States, major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at http://www.naegb.org/publications/frameworks/civicsframework.pdf

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students’ content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.fldoe.org/standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

Additional Instructional Resources:
A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CM5_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

## GENERAL INFORMATION

**Course Number:** 2106320

**Course Path:** Section: Grades PreK to 12 Education
Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Political Sciences

**Abbreviated Title:** US GOVT HON

**Number of Credits:** Half credit (.5)

**Course Length:** Semester (S)

**Course Attributes:**
- Honors
- Class Size Core Required

**Course Type:** Core Academic Course

**Course Status:** Course Approved

**Grade Level(s):** 9,10,11,12

**Graduation Requirement:** United States Government

## Educator Certifications

</thead>
</table>
| SS.912.CG.1.1: | Examine how intellectual influences in primary documents contributed to the ideas in the Declaration of Independence, the U.S. Constitution and the Bill of Rights.  
- Students will recognize the influence of the Judeo-Christian tradition, republicanism, the English Constitution and common law, and the European Enlightenment in establishing the organic laws of the United States in primary documents (e.g., Magna Carta (1215); the Mayflower Compact (1620); the English Bill of Rights (1689); Common Sense (1776); Declaration of Independence (1776); the Constitution of Massachusetts (1780); the Articles of Confederation (1781); the Northwest Ordinance (1787); U.S. Constitution (1789)). |
| SS.912.CG.1.2: | Explain the influence of Enlightenment ideas on the Declaration of Independence.  
- Students will identify grievances listed in the Declaration of Independence in terms of due process of law, individual rights, natural rights, popular sovereignty and social contract.  
- Students will explain national sovereignty, natural law, self-evident truth, equality of all persons, due process of law, limited government, popular sovereignty, and unalienable rights of life, liberty and property as they relate to Enlightenment ideas in the Declaration of Independence.  
- Students will recognize that national sovereignty, due process of law, natural law, self-evident truth, equality of all persons, limited government, popular sovereignty, and unalienable rights of life, liberty and property form the philosophical foundation of our government. |
| SS.912.CG.1.3: | Explain arguments presented in the Federalist Papers in support of ratifying the U.S. Constitution and a republican form of government.  
- Students will recognize that the Federalist Papers argued for a federal system of government, separation of powers and a representative form of government that is accountable to its citizens.  
- Students will analyze Federalist and Anti-Federalist arguments concerning ratification of the U.S. Constitution and inclusion of a bill of rights. |
| SS.912.CG.1.4: | Analyze how the ideals and principles expressed in the founding documents shape America as a constitutional republic.  
- Students will differentiate among the documents and determine how each one was individually significant to the founding of the United States.  
- Students will evaluate how the documents are connected to one another.  
- Documents include, but are not limited to, the Declaration of Independence, Articles of Confederation, Federalist Papers (e.g., No. 10. No. 14, No. 31, No. 39, No. 51) and the U.S. Constitution.  
- Students will identify key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason). |
| SS.912.CG.1.5: | Explain how the U.S. Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers.  
- Students will explain how the structure and function of the U.S. government reflects these political principles.  
- Students will differentiate between republicanism and democracy, and discuss how the United States reflects both.  
- Students will describe compromises made during the Constitutional Convention (e.g., the Great Compromise, the Three-Fifths Compromise, the Electoral College). |
| SS.912.CG.2.1: | Explain the constitutional provisions that establish and affect citizenship.  
- Students will explain how the concept of citizenship in the United States has changed over the course of history (i.e., 13th, 14th, 15th and 19th Amendments).  
- Students will compare birthright citizenship, permanent residency and naturalization in the United States.  
- Students will differentiate the rights held by native-born citizens, permanent residents and naturalized citizens (e.g., running for public office). |
| SS.912.CG.2.2: | Explain the importance of political and civic participation to the success of the United States' constitutional republic.  
- Students will discuss various ways in which U.S. citizens can exercise political and civic participation.  
- Students will identify historical examples of political and civic participation (e.g., Civil Rights Movement, Women's Suffrage Movement).  
- Students will describe the ways in which individuals can be denied and limited in their right to practice political and civic participation (e.g., losing voting rights for felony conviction, limitations on political contributions, limits on the type of protesting). |
| SS.912.CG.2.3: | Explain the responsibilities of citizens at the local, state and national levels.  
- Students will identify various responsibilities held by citizens (e.g., voting, volunteering and being informed, respecting laws).  
- Students will understand the process of registering or preregistering to vote and how to complete a ballot in Florida (e.g., uniform primary and general election ballot).  
- Students will discuss appropriate methods of communication with public officials (e.g., corresponding, attending public meetings, requesting a meeting and providing information).  
- Students will participate in classroom activities that simulate exercising the responsibilities of citizenship. |
| SS.912.CG.2.4: | Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the public good.  
- Students will examine situations when individuals’ rights have been restricted for the public good (e.g., limits on speech or rationing of goods during wartime, enactment of the Patriot Act).  
- Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good.  
- Students will explain different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response). |
| SS.912.CG.2.5: | Analyze contemporary and historical examples of government-imposed restrictions on rights.  
- Students will identify historical examples of government-imposed restrictions on rights (e.g., suspension of habeas corpus, rationing during wartime and limitations on speech).  
- Students will examine the rationale for government-imposed restrictions on rights (e.g., inciting a crime, campaign contributions, defamation, military secrets). |
SS.912.CG.2.6: Explain how the principles contained in foundational documents contributed to the expansion of civil rights and liberties over time.
- Students will explain how different groups of people (e.g., African Americans, Immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman's desegregation of the army, Lincoln's Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault).
- Students will explain the role founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights.

SS.912.CG.2.7: Analyze the impact of civic engagement as a means of preserving or reforming institutions.
- Students will identify legal methods that citizens can use to promote social and political change (e.g., voting, peaceful protests, petitioning, demonstrations, contacting government offices).
- Students will identify historical examples of citizens achieving or preventing political and social change through civic engagement (e.g., the Abolitionist Movement).

SS.912.CG.2.8: Explain the impact of political parties, interest groups, media, and individuals on determining and shaping public policy.
- Students will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy.
- Students will identify historical examples of interest groups, media, and individuals influencing public policy.
- Students will compare and contrast how the free press influenced politics at major points in U.S. history (e.g., Vietnam War Era, Civil Rights Era).

SS.912.CG.2.9: Explain the process and procedures of elections at the state and national levels.
- Students will identify the different primary formats and how political parties nominate candidates using primaries.
- Students will compare and contrast the different ways in which elections are decided (e.g., Electoral College, proportional representation, popular vote, winner-take-all).
- Students will explain the process by which candidates register to be part of state and national elections.
- Students will describe the different methods used to tabulate election results in state and national elections (i.e., electronic voting, punch cards, fill-in ballots).
- Students will evaluate the role of debates in elections.

SS.912.CG.2.10: Analyze factors that contribute to voter turnout in local, state and national elections.
- Students will explain trends in voter turnout.
- Students will discuss attempts to increase voter turnout (e.g., get out the vote campaigns, social movements).
- Students will explain how governmental action has affected voter participation (e.g., 15th, 19th and 26th Amendments; Jim Crow laws; poll tax; efforts to suppress voters).

SS.912.CG.2.11: Evaluate political communication for bias, factual accuracy, omission and emotional appeal.
- Students will compare the reporting on the same political event or issue from multiple perspectives.
- Students will identify various forms of propaganda (e.g., plain folks, glittering generalities, testimonial, fear, logical fallacies).
- Students will discuss the historical impact of political communication on American political process and public opinion.
- Examples of political communication may include, but are not limited to, political cartoons, propaganda, campaign advertisements, political speeches, bumper stickers, blogs, press, and social media.

SS.912.CG.2.12: Explain how interest groups, the media, and public opinion influence local, state and national decision-making related to public issues.
- Students will objectively discuss current public issues in Florida and use both the U.S. and Florida Constitutions to justify pro and con positions.
- Students will examine the relationship and responsibilities of both the state and national governments regarding these public issues.
- Students will analyze public policy solutions related to local, state, and national issues.

SS.912.CG.2.13: Analyze the influence and effects of various forms of media and the internet in political communication.
- Students will explain how the methods of political communication has changed over time (e.g., television, radio, press, social media).
- Students will describe how the methods used by political officials to communicate with the public has changed over time.
- Students will discuss the strengths and weaknesses of different methods of political communication.

SS.912.CG.3.1: Analyze how certain political ideologies conflict with the principles of freedom and democracy.
- Students will identify political ideologies that conflict with the principles of freedom and democracy (e.g., communism and totalitarianism).
- Students will analyze how the principles of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republican, rule of law and separation of powers contribute to the nation's longevity and its ability to overcome challenges, and distinguish the United States' constitutional republic from authoritarian and totalitarian nations.

SS.912.CG.3.2: Explain how the U.S. Constitution safeguards and limits individual rights.
- Students will identify the individual rights protected by the U.S. Constitution, the Bill of Rights and other constitutional amendments.
- Students will describe the role of the Supreme Court in further defining the safeguards and limits of constitutional rights.

SS.912.CG.3.3: Analyze the structures, functions and processes of the legislative branch as described in Article I of the U.S. Constitution.
- Students will explain why Article I of the U.S. Constitution established a bicameral legislative body and how the House of Representatives functions differently from the Senate.
- Students will identify the methods for determining the number of members in the House of Representatives and the Senate.
- Students will identify and describe the "enumerated powers" delegated to Congress (e.g., assess taxes, borrow money, declare war, make laws).
- Students will analyze the role of the legislative branch in terms of its relationship with the judicial and executive branch of the government.
- Students will describe constitutional amendments that changed the role of Congress from its original description in Article I of the U.S. Constitution (i.e., 10th, 14th, 16th, 17th and 27th Amendments).

SS.912.CG.3.4: Analyze the structures, functions and processes of the executive branch as described in Article II of the U.S. Constitution.
- Students will explain the qualifications one must have to seek the office of president and the process of presidential elections.
- Students will explain different presidential responsibilities outlined in Article II (e.g., receiving foreign heads of state, delivering the State of the Union address, carrying out faithful execution of the law).
- Students will examine the role of the executive branch in terms of its relationship with the judicial and legislative branches of the government.
- Students will describe constitutional amendments (i.e., 12th, 20th, 22nd and 25th) that have changed the role of the executive branch from its original description in Article II.
- Students will describe the impeachment process.

Describe how independent regulatory agencies interact with the three branches of government and with citizens.
SS.912.CG.3.5: Students will identify independent regulatory agencies (e.g., Federal Communications Commission, Federal Election Commission, National Labor Relations Board) and explain their purpose and effect.
Students will describe the advantages and disadvantages of delegating power to independent regulatory agencies.

SS.912.CG.3.6: Explain expressed, implied, concurrent and reserved powers in the U.S. Constitution.
Students will identify powers that are expressed in the U.S. Constitution to Congress (e.g., coin money, declare war, assess taxes, citizenship).
Students will identify that expressed powers are also known as enumerated powers found in Article I of the U.S. Constitution.
Students will analyze the role of the “general welfare clause” and “necessary and proper clause” in granting Congress implied powers.
Students will describe examples of concurrent powers as those powers shared by both state and national governments (e.g., build roads, tax citizens, make laws).
Students will explain how reserved powers define issues as matters for the people or the state governments.
Students will compare the roles of expressed, implied, concurrent and reserved powers in United States’ federalism.

SS.912.CG.3.7: Analyze the structures, functions and processes of the judicial branch as described in Article III of the U.S. Constitution.
Students will examine the role of the judicial branch in terms of its relationship with the legislative and executive branches of the government.
Students will describe the role of the Supreme Court and lesser federal courts.
Students will explain what Article III says about judicial tenure, appointment and salaries.
Students will describe the powers delegated to the courts by Article III including, but not limited to, treason, jurisdiction and trial by jury.

SS.912.CG.3.8: Describe the purpose and function of judicial review in the American constitutional government.
Students will examine the role of district courts, the courts of appeals and the Supreme Court in the judicial review process.
Students will explain the relationship between the concept of judicial review and the language of the Supremacy Clause in Article VI of the U.S. Constitution.

SS.912.CG.3.9: Compare the role of state and federal judges with other elected officials.
Students will compare the ways state and federal judges are appointed compared to other elected officials.
Students will distinguish the qualifications needed for a judge at the state or federal level versus other elected officials.
Students will compare the decision-making process of judges compared to other political figures.

SS.912.CG.3.10: Analyze the levels and responsibilities of state and federal courts.
Students will describe what Article III of the U.S. Constitution states about the relationship between state and federal courts.
Students will recognize the role of the Federal Judiciary Act of 1789 in establishing the structure and jurisdiction of the federal court system.
Students will contrast the differences among civil trials and criminal trials at the state level.
Students will describe the relationship among the Supreme Court, federal appellate courts and federal district courts (e.g., Erie Doctrine, Rooker-Feldman Doctrine).

SS.912.CG.3.11: Evaluate how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution.
Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; McCulloch v. Maryland; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; Korematsu v. United States; Mapp v. Ohio; In re Gault; United States v. Nixon; Regents of the University of California v. Bakke; Hazelwood v. Kuhlmeier; District of Columbia v. Heller).
Students will explain the foundational constitutional issues underlying landmark Supreme Court decisions related to the Bill of Rights and other amendments.
Students will explain the outcomes of landmark Supreme Court cases related to the Bill of Rights and other amendments.

SS.912.CG.3.12: Analyze the concept of federalism in the United States and its role in establishing the relationship between the state and national governments.
Students will identify examples of the powers reserved and shared among state and the national governments in the American federal system of government.
Students will examine the role the Great Compromise had on the eventual establishment of a federal system of fifty equal states.
Students will explain specific rights that are granted to the states in the language of the U.S. Constitution and its amendments (e.g., 10th Amendment, defense and extradition).
Students will analyze how states have challenged the national government regarding states’ rights (e.g., Civil War, the New Deal, No Child Left Behind, Affordable Health Care Act, Civil Rights Movement).

SS.912.CG.3.13: Explain how issues between Florida, other states and the national government are resolved.
Students will explain the concept of federalism as it applies to each issue.
Students will use historical and issue-based scenarios to demonstrate understanding of how disputes between Florida, other states and the national government are resolved (e.g., water rights arguments between Florida and Georgia, national and state conflict over rights to adjacent waters and seabeds, civil rights).

SS.912.CG.3.14: Explain the judicial decision-making process in interpreting law at the state and national levels.
Students will explain the role of the U.S. Constitution in interpreting law at the state and national levels.
Students will explain the process used by judges at the state and national levels when making a decision or writing summary opinions.
Students will incorporate language from the U.S. Constitution or court briefs to justify a legal decision when interpreting state or national law.

SS.912.CG.3.15: Explain how citizens are affected by the local, state and national governments.
Students will identify local government officials and employees who affect the daily lives of citizens.
Students will identify the role of state governmental officials and employees who affect the daily lives of citizens.
Students will identify the role of national governmental officials and employees who affect the daily lives of citizens.
Students will explain how government at all levels impacts the daily lives of citizens.

SS.912.CG.4.1: Analyze how liberty and economic freedom generate broad-based opportunity and prosperity in the United States.
Students will differentiate between government systems (e.g., autocracy, democracy, monarchy, oligarchy republic, theocracy).
Students will differentiate between economic systems (e.g., capitalism, communism, mixed market, socialism).
Students will analyze the disadvantages of authoritarian control over the economy (e.g., communism and socialism) in generating broad-based economic prosperity for their population.

SS.912.CG.4.2: Explain how the United States uses foreign policy to influence other nations.
Students will explain how the policies of other nations influence U.S. policy and society.
Students will identify agencies of the U.S. government that contribute to its foreign policy agenda (e.g., National Security Agency, Central Intelligence Agency).
Students will explain the advantages and disadvantages of how nongovernmental organizations (NGOs) influence foreign policy (e.g., United Nations, International Monetary Fund, World Trade Organization).
Interpret population growth and other demographic data for any given place.

States Agency for International Development, Red Cross, American Woman Suffrage Association, Amnesty International.

- Students will explain how U.S. trade policy influences its relationships with other nations (e.g., China, Saudi Arabia).
- Students will explain how the use of embargos and economic sanctions by the United States has affected other nations (e.g., Cuba, Iran, Syria).
- Students will explain the U.S. response to international conflicts.

**SS.912.CG.4.3:** Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.

- Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.

**SS.912.CG.4.4:** Identify indicators of democratization in foreign countries.

- Students will recognize indicators of democratization as a system of free and fair elections, active civic participation, the protection of human rights, and the rule of law.

**SS.912.G.4.1:** Interpret population growth and other demographic data for any given place.

**SS.912.G.5.5:** Use geographic terms and tools to analyze case studies of policies and programs for resource use and management.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

**MA.K12.MTR.1.1:**

- Teachers who encourage students to participate actively in effortful learning both individually and with others:
  - Cultivate a community of growth mindset learners.
  - Foster perseverance in students by choosing tasks that are challenging.
  - Develop students' ability to analyze and problem solve.
  - Recognize students' effort when solving challenging problems.

**Clariﬁcations:**

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

**MA.K12.MTR.2.1:**

- Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
  - Build understanding through modeling and using manipulatives.
  - Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
  - Progress from modeling problems with objects and drawings to using algorithms and equations.
  - Express connections between concepts and representations.
  - Choose a representation based on the given context or purpose.

**Clariﬁcations:**

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

**MA.K12.MTR.3.1:**

- Complete tasks with mathematical ﬂuency.

Mathematicians who complete tasks with mathematical ﬂuency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain ﬂexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with conﬁdence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efﬁciency when performing calculations.

**Clariﬁcations:**

Teachers who encourage students to complete tasks with mathematical ﬂuency:

- Provide students with the ﬂexibility to solve problems by selecting a procedure that allows them to solve efﬁciently and accurately.
- Offer multiple opportunities for students to practice efﬁcient and generalizable methods.
- Provide opportunities for students to reﬂect on the method they used and determine if a more efﬁcient method could have been used.

**MA.K12.MTR.4.1:**

- Engage in discussions that reﬂect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reﬂect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efﬁciency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clariﬁcations:**

Teachers who encourage students to engage in discussions that reﬂect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efﬁcient methods.
- Develop students’ ability to justify methods and compare their responses to the responses of their peers.

**MA.K12.MTR.5.1:**

- Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
**MA.K12.MTR.5.1:**
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

**MA.K12.MTR.6.1:**
- Assess the reasonableness of solutions.
- Mathematicians who assess the reasonableness of solutions:
  - Estimate to discover possible solutions.
  - Use benchmark quantities to determine if a solution makes sense.
  - Check calculations when solving problems.
  - Verify possible solutions by explaining the methods used.
  - Evaluate results based on the given context.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

**MA.K12.MTR.7.1:**
- Apply mathematics to real-world contexts.
- Mathematicians who apply mathematics to real-world contexts:
  - Connect mathematical concepts to everyday experiences.
  - Use models and methods to understand, represent and solve problems.
  - Perform investigations to gather data or determine if a method is appropriate.
  - Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

**ELA.K12.EE.1.1:**
- Cite evidence to explain and justify reasoning.

**Clarifications:**
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

**ELA.K12.EE.2.1:**
- Read and comprehend grade-level complex texts proficiently.

**Clarifications:**
See Text Complexity for grade-level complexity bands and a text complexity rubric.

**ELA.K12.EE.3.1:**
- Make inferences to support comprehension.

**Clarifications:**
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

**ELA.K12.EE.4.1:**
- Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clarifications:**
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____.” The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

**Clarifications:**
Use the accepted rules governing a specific format to create quality work.
General Course Information and Notes

VERSION DESCRIPTION

Civic education is essential in the development of informed citizenry who are equipped to participate in civic life and preserve a government of the people, by the people, and for the people. The Civics and Government (CG) standards in this class were revised in 2021 as a result of the House Bill (2019) civics standards review and reflect the following priorities for K-12 Civics and Government teaching and learning in Florida schools.

- Students study primary source documents to understand the philosophical underpinnings of the American Republic and the root cause of American exceptionalism.
- Students compare the success of the United States and the success or failure of other nations' governing philosophies to evaluate their past, present and likely future effects.
- Students have a sense of civic pride and participate regularly in all levels of government.
- Students reflect upon United States civic history, so they understand their rights and responsibilities as citizens, including the process of advocating properly with government officials.

This course must include a comparative discussion of political ideologies, such as communism and totalitarianism, that conflict with the principles of freedom and democracy essential to the founding principles of the United States.

GENERAL NOTES

United States Government - The grade 9-12 United States Government course consists of the following content area strands: Geography, Civics and Government. The primary content for the course pertains to the study of government institutions and political processes and their historical impact on American society. Content should include, but is not limited to, the functions and purpose of government, the function of the state, the constitutional framework, federalism, separation of powers, functions of the three branches of government at the local, state and national level, and the political decision-making process.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes:

Additional content that may be included in the Grade 12 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- United States, major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at http://www.nagb.org/publications/frameworks/civicsframework.pdf

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EE and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.
English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

Additional Instructional Resources:
A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CM5_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2106320
Course Path: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Political Sciences
Abbreviated Title: US GOVT HON
Number of Credits: Half credit (.5)
Course Length: Semester (S)
Course Attributes:
- Honors
- Class Size Core Required
Course Type: Core Academic Course
Course Status: Course Approved
Grade Level(s): 9,10,11,12
Graduation Requirement: United States Government

## Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
</table>
| SS.912.CG.1.1:  | Examine how intellectual influences in primary documents contributed to the ideas in the Declaration of Independence, the U.S. Constitution and the Bill of Rights.  
  - Students will recognize the influence of the Judeo-Christian tradition, republicanism, the English Constitution and common Law, and the European Enlightenment in establishing the organic laws of the United States in primary documents (e.g., Magna Carta (1215); the Mayflower Compact (1620); the English Bill of Rights (1689); Common Sense (1776); Declaration of Independence (1776); the Constitution of Massachusetts (1780); the Articles of Confederation (1781); the Northwest Ordinance (1787); U.S. Constitution (1789)). |
| SS.912.CG.1.2:  | Explain the influence of Enlightenment ideas on the Declaration of Independence.  
  - Students will identify grievances listed in the Declaration of Independence in terms of due process of law, individual rights, natural rights, popular sovereignty and social contract.  
  - Students will explain national sovereignty, natural law, self-evident truth, equality of all persons, due process of law, limited government, popular sovereignty, and unalienable rights of life, liberty and property as they relate to Enlightenment ideas in the Declaration of Independence.  
  - Students will recognize that national sovereignty, due process of law, natural law, self-evident truth, equality of all persons, limited government, popular sovereignty, and unalienable rights of life, liberty and property form the philosophical foundation of our government. |
| SS.912.CG.1.3:  | Explain arguments presented in the Federalist Papers in support of ratifying the U.S. Constitution and a republican form of government.  
  - Students will recognize that the Federalist Papers argued for a federal system of government, separation of powers and a representative form of government that is accountable to its citizens.  
  - Students will analyze Federalist and Anti-Federalist arguments concerning ratification of the U.S. Constitution and inclusion of a bill of rights. |
| SS.912.CG.1.4:  | Analyze how the ideas and principles expressed in the founding documents shape America as a constitutional republic.  
  - Students will differentiate among the documents and determine how each one was individually significant to the founding of the United States.  
  - Students will evaluate how the documents are connected to one another.  
  - Documents include, but are not limited to, the Declaration of Independence, Articles of Confederation, Federalist Papers (e.g., No. 10. No. 14. No. 31, No. 39, No. 51) and the U.S. Constitution.  
  - Students will identify key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason). |
| SS.912.CG.1.5:  | Explain how the U.S. Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers.  
  - Students will explain how the structure and function of the U.S. government reflects these political principles.  
  - Students will differentiate between republicanism and democracy, and discuss how the United States reflects both.  
  - Students will describe compromises made during the Constitutional Convention (e.g., the Great Compromise, the Three-Fifths Compromise, the Electoral College). |
| SS.912.CG.2.1:  | Explain the constitutional provisions that establish and affect citizenship.  
  - Students will explain how the concept of citizenship in the United States has changed over the course of history (i.e., 13th, 14th, 15th and 19th Amendments).  
  - Students will compare birthright citizenship, permanent residency and naturalization in the United States.  
  - Students will differentiate the rights held by native-born citizens, permanent residents and naturalized citizens (e.g., running for public office). |
| SS.912.CG.2.2:  | Explain the importance of political and civic participation to the success of the United States' constitutional republic.  
  - Students will discuss various ways in which U.S. citizens can exercise political and civic participation.  
  - Students will identify historical examples of political and civic participation (e.g., Civil Rights Movement, Women's Suffrage Movement).  
  - Students will describe the ways in which individuals can be denied and limited in their right to practice political and civic participation (e.g., losing voting rights for felony conviction, limitations on political contributions, limits on the type of protesting). |
| SS.912.CG.2.3:  | Explain the responsibilities of citizens at the local, state and national levels.  
  - Students will identify various responsibilities held by citizens (e.g., voting, volunteering and being informed, respecting laws).  
  - Students will understand the process of registering or preregistering to vote and how to complete a ballot in Florida (e.g., uniform primary and general election ballot).  
  - Students will discuss appropriate methods of communication with public officials (e.g., corresponding, attending public meetings, requesting a meeting and providing information).  
  - Students will participate in classroom activities that simulate exercising the responsibilities of citizenship. |
| SS.912.CG.2.4:  | Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the public good.  
  - Students will examine situations when individuals' rights have been restricted for the public good (e.g., limits on speech or rationing of goods during wartime, enactment of the Patriot Act).  
  - Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good.  
  - Students will explain different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response). |
| SS.912.CG.2.5:  | Analyze contemporary and historical examples of government-imposed restrictions on rights.  
  - Students will identify historical examples of government-imposed restrictions on rights (e.g., suspension of habeas corpus, rationing during wartime, enactment of the Patriot Act). |
| SS.912.CG.2.6:  | Explain how the U.S. Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers.  
  - Students will explain how the structure and function of the U.S. government reflects these political principles.  
  - Students will differentiate between republicanism and democracy, and discuss how the United States reflects both.  
  - Students will describe compromises made during the Constitutional Convention (e.g., the Great Compromise, the Three-Fifths Compromise, the Electoral College). |
| SS.912.CG.2.7:  | Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the public good.  
  - Students will examine situations when individuals' rights have been restricted for the public good (e.g., limits on speech or rationing of goods during wartime, enactment of the Patriot Act).  
  - Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good.  
  - Students will explain different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response). |
| SS.912.CG.2.8:  | Analyze contemporary and historical examples of government-imposed restrictions on rights.  
  - Students will identify historical examples of government-imposed restrictions on rights (e.g., suspension of habeas corpus, rationing during wartime, enactment of the Patriot Act). |
<table>
<thead>
<tr>
<th>SS.912.CG.2.5:</th>
<th>wartime and limitations on speech.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Students</strong> will examine the rationale for government-imposed restrictions on rights (e.g., inciting a crime, campaign contributions, defamation, military secrets).</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.2.6:</th>
<th>Explain how the principles contained in foundational documents contributed to the expansion of civil rights and liberties over time.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Students</strong> will explain how different groups of people (e.g., African Americans, Immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman's desegregation of the army, Lincoln's Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault).</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will explain the role founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.2.7:</th>
<th>Analyze the impact of civic engagement as a means of preserving or reforming institutions.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Students</strong> will identify legal methods that citizens can use to promote social and political change (e.g., voting, peaceful protests, petitioning, demonstrations, contacting government offices).</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will identify historical examples of citizens achieving or preventing political and social change through civic engagement (e.g., the Abolitionist Movement).</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.2.8:</th>
<th>Explain the impact of political parties, interest groups, media and individuals on determining and shaping public policy.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Students</strong> will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy.</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will identify historical examples of interest groups, media and individuals influencing public policy.</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will compare and contrast how the free press influenced politics at major points in U.S. history (e.g., Vietnam War Era, Civil Rights Era).</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.2.9:</th>
<th>Explain the process and procedures of elections at the state and national levels.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Students</strong> will identify the different primary formats and how political parties nominate candidates using primaries.</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will compare and contrast the different ways in which elections are decided (e.g., Electoral College, proportional representation, popular vote, winner-take-all).</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will identify political examples of interest groups, media and individuals influencing public policy.</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will evaluate the role of debate in elections.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.2.10:</th>
<th>Analyze factors that contribute to voter turnout in local, state and national elections.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Students</strong> will explain trends in voter turnout.</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will discuss attempts to increase voter turnout (e.g., get out the vote campaigns, social movements).</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will explain how governmental action has affected voter participation (e.g., 15th, 19th and 26th Amendments; Jim Crow laws; poll tax; efforts to suppress voters).</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.2.11:</th>
<th>Evaluate political communication for bias, factual accuracy, omission and emotional appeal.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Students</strong> will compare the reporting on the same political event or issue from multiple perspectives.</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will identify various forms of propaganda (e.g., plain folks, glittering generalities, testimonial, fear, logical fallacies).</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will discuss the historical impact of political communication on American political process and public opinion.</td>
<td></td>
</tr>
<tr>
<td><strong>Examples</strong> of political communication may include, but are not limited to, political cartoons, propaganda, campaign advertisements, political speeches, bumper stickers, blogs, press and social media.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.2.12:</th>
<th>Explain how interest groups, the media and public opinion influence local, state and national decision-making related to public issues.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Students</strong> will objectively discuss current public issues in Florida and use both the U.S. and Florida Constitutions to justify pro and con positions.</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will examine the relationship and responsibilities of both the state and national governments regarding these public issues.</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will analyze public policy solutions related to local, state and national issues.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.2.13:</th>
<th>Analyze the influence and effects of various forms of media and the internet in political communication.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Students</strong> will explain how the methods of political communication has changed over time (e.g., television, radio, press, social media).</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will describe how the methods used by political officials to communicate with the public has changed over time.</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will discuss the strengths and weaknesses of different methods of political communication.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.3.1:</th>
<th>Analyze how certain political ideologies conflict with the principles of freedom and democracy.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Students</strong> will identify political ideologies that conflict with the principles of freedom and democracy (e.g., communism and totalitarianism).</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will analyze how the principles of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers contribute to the nation's longevity and its ability to overcome challenges, and distinguish the United States' constitutional republic from authoritarian and totalitarian nations.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.3.2:</th>
<th>Explain how the U.S. Constitution safeguards and limits individual rights.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Students</strong> will identify the individual rights protected by the U.S. Constitution, the Bill of Rights and other constitutional amendments.</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will describe the role of the Supreme Court in further defining the safeguards and limits of constitutional rights.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.3.3:</th>
<th>Analyze the structures, functions and processes of the legislative branch as described in Article I of the U.S. Constitution.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Students</strong> will explain why Article I of the U.S. Constitution established a bicameral legislative body and how the House of Representatives functions differently from the Senate.</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will identify the methods for determining the number of members in the House of Representatives and the Senate.</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will identify and describe the “enumerated powers” delegated to Congress (e.g., assess taxes, borrow money, declare war, make laws).</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will analyze the role of the legislative branch in terms of its relationship with the judicial and executive branch of the government.</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will describe constitutional amendments that changed the role of Congress from its original description in Article I of the U.S. Constitution (i.e., 10th, 14th, 16th, 17th and 27th Amendments).</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.3.4:</th>
<th>Analyze the structures, functions and processes of the executive branch as described in Article II of the U.S. Constitution.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Students</strong> will explain the qualifications one must have to seek the office of president and the process of presidential elections.</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will explain different presidential responsibilities outlined in Article II (e.g., receiving foreign heads of state, delivering the State of the Union address, carrying out faithful execution of the law).</td>
<td></td>
</tr>
<tr>
<td><strong>Students</strong> will examine the role of the executive branch in terms of its relationship with the judicial and legislative branches of the government.</td>
<td></td>
</tr>
</tbody>
</table>
| **Students** will describe constitutional amendments (i.e., 12th, 20th, 22nd and 25th) that have changed the role of the executive branch from its
original description in Article II.

- Students will describe the impeachment process.

**SS.912.CG.3.5:**

Describe how independent regulatory agencies interact with the three branches of government and with citizens.

- Students will identify independent regulatory agencies (e.g., Federal Communications Commission, Federal Election Commission, National Labor Relations Board) and explain their purpose and effect.
- Students will describe the advantages and disadvantages of delegating power to independent regulatory agencies.

**SS.912.CG.3.6:**

Explain expressed, implied, concurrent and reserved powers in the U.S. Constitution.

- Students will identify powers that are expressed in the U.S. Constitution to Congress (e.g., coin money, declare war, assess taxes, citizenship).
- Students will identify that expressed powers are also known as enumerated powers found in Article I of the U.S. Constitution.
- Students will analyze the role of the “general welfare clause” and “necessary and proper clause” in granting Congress implied powers.
- Students will describe examples of concurrent powers as those powers shared by both state and national governments (e.g., build roads, tax citizens, make laws).
- Students will explain how reserved powers define issues as matters for the people or the state governments.
- Students will compare the roles of expressed, implied, concurrent and reserved powers in United States’ federalism.

**SS.912.CG.3.7:**

Analyze the structures, functions and processes of the judicial branch as described in Article III of the U.S. Constitution.

- Students will examine the role of the judicial branch in terms of its relationship with the legislative and executive branches of the government.
- Students will describe the role of the Supreme Court and lesser federal courts.
- Students will explain what Article III says about judicial tenure, appointment and salaries.
- Students will describe the powers delegated to the courts by Article III including, but not limited to, treason, jurisdiction and trial by jury.

**SS.912.CG.3.8:**

Describe the purpose and function of judicial review in the American constitutional government.

- Students will examine the role of district courts, the courts of appeals and the Supreme Court in the judicial review process.
- Students will explain the relationship between the concept of judicial review and the language of the Supremacy Clause in Article VI of the U.S. Constitution.

**SS.912.CG.3.9:**

Compare the role of state and federal judges with other elected officials.

- Students will compare the ways state and federal judges are appointed compared to other elected officials.
- Students will distinguish the qualifications needed for a judge at the state or federal level versus other elected officials.
- Students will compare the decision-making process of judges compared to other political figures.

**SS.912.CG.3.10:**

Analyze the levels and responsibilities of state and federal courts.

- Students will describe what Article III of the U.S. Constitution states about the relationship between state and federal courts.
- Students will recognize the role of the Federal Judiciary Act of 1789 in establishing the structure and jurisdiction of the federal court system.
- Students will contrast the differences among civil trials and criminal trials at the state level.
- Students will describe the relationship among the Supreme Court, federal appellate courts and federal district courts (e.g., Erie Doctrine, Rooker-Feldman Doctrine).

**SS.912.CG.3.11:**

Evaluate how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution.

- Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; McCulloch v. Maryland; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; Korematsu v. United States; Mapp v. Ohio; In re Gault; United States v. Nixon; Regents of the University of California v. Bakke; Hazelwood v. Kuhlmeier; District of Columbia v. Heller).
- Students will explain the foundational constitutional issues underlying landmark Supreme Court decisions related to the Bill of Rights and other amendments.
- Students will explain the outcomes of landmark Supreme Court cases related to the Bill of Rights and other amendments.

**SS.912.CG.3.12:**

Analyze the concept of federalism in the United States and its role in establishing the relationship between the state and national governments.

- Students will explain examples of the powers reserved and shared among state and the national governments in the American federal system of government.
- Students will examine the role the Great Compromise had on the eventual establishment of a federal system of fifty equal states.
- Students will explain specific rights that are granted to the states in the language of the U.S. Constitution and its amendments (e.g., 10th Amendment, defense and extradition).
- Students will analyze how states have challenged the national government regarding states’ rights (e.g., Civil War, the New Deal, No Child Left Behind, Affordable Health Care Act, Civil Rights Movement).

**SS.912.CG.3.13:**

Explain how issues between Florida, other states and the national government are resolved.

- Students will explain the concept of federalism as it applies to each issue.
- Students will use historical and issue-based scenarios to demonstrate understanding of how disputes between Florida, other states and the national government are resolved (e.g., water rights arguments between Florida and Georgia, national and state conflict over rights to adjacent waters and seabeds, civil rights).

**SS.912.CG.3.14:**

Explain the judicial decision-making process in interpreting law at the state and national levels.

- Students will explain the role of the U.S. Constitution in interpreting law at the state and national levels.
- Students will explain the process used by judges at the state and national levels when making a decision or writing summary opinions.
- Students will incorporate language from the U.S. Constitution or court briefs to justify a legal decision when interpreting state or national law.

**SS.912.CG.3.15:**

Explain how citizens are affected by the local, state and national governments.

- Students will identify local government officials and employees who affect the daily lives of citizens.
- Students will identify the role of state governmental officials and employees who affect the daily lives of citizens.
- Students will explain how government at all levels impacts the daily lives of citizens.

**SS.912.CG.4.1:**

Analyze liberty and economic freedom generate broad-based opportunity and prosperity in the United States.

- Students will differentiate between government systems (e.g., autocracy, democracy, monarchy, oligarchy republic, theocracy).
- Students will differentiate between economic systems (e.g., capitalism, communism, mixed market, socialism).
- Students will analyze the disadvantages of authoritarian control over the economy (e.g., communism and socialism) in generating broad-based economic prosperity for their population.

**SS.912.CG.4.1:**

Explain how the United States uses foreign policy to influence other nations.

- Students will explain how the policies of other nations influence U.S. policy and society.
- Students will identify agencies of the U.S. government that contribute to its foreign policy agenda (e.g., National Security Agency, Central Intelligence Agency).
- Students will explain the advantages and disadvantages of how nongovernmental organizations (NGOs) influence foreign policy (e.g., United States Agency for International Development, Red Cross, American Woman Suffrage Association, Amnesty International).
- Students will explain how U.S. trade policy influences its relationships with other nations (e.g., China, Saudi Arabia).
- Students will explain how the use of embargos and economic sanctions by the United States has affected other nations (e.g., Cuba, Iran, Syria).
- Students will explain the U.S. response to international conflicts.

**SS.912.CG.4.2:**
- Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.
- Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.

**SS.912.CG.4.4:**
- Students will recognize indicators of democratization as a system of free and fair elections, active civic participation, the protection of human rights, and the rule of law.

**SS.912.G.4.1:**
- Interpret population growth and other demographic data for any given place.

**SS.912.G.5.5:**
- Use geographic terms and tools to analyze case studies of policies and programs for resource use and management.

**Mathematicians who participate in effortful learning both individually and with others:**
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

**Clarifications:**
- Teachers who encourage students to participate actively in effortful learning both individually and with others:
  - Cultivate a community of growth mindset learners.
  - Foster perseverance in students by choosing tasks that are challenging.
  - Develop students' ability to analyze and problem solve.
  - Recognize students' effort when solving challenging problems.

**Demonstrate understanding by representing problems in multiple ways.**

**Mathematicians who demonstrate understanding by representing problems in multiple ways:**
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

**Clarifications:**
- Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
  - Help students make connections between concepts and representations.
  - Provide opportunities for students to use manipulatives when investigating concepts.
  - Guide students from concrete to pictorial to abstract representations as understanding progresses.
  - Show students that various representations can have different purposes and can be useful in different situations.

**Complete tasks with mathematical fluency.**

**Mathematicians who complete tasks with mathematical fluency:**
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**Clarifications:**
- Teachers who encourage students to complete tasks with mathematical fluency:
  - Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
  - Offer multiple opportunities for students to practice efficient and generalizable methods.
  - Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

**Engage in discussions that reflect on the mathematical thinking of self and others.**

**Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:**
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clarifications:**
- Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
  - Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
  - Create opportunities for students to discuss their thinking with peers.
  - Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
  - Develop students' ability to justify methods and compare their responses to the responses of their peers.
| MA.K12.MTR.5.1 | Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  
- Focus on relevant details within a problem.  
- Create plans and procedures to logically order events, steps or ideas to solve problems.  
- Decompose a complex problem into manageable parts.  
- Relate previously learned concepts to new concepts.  
- Look for similarities among problems.  
- Connect solutions of problems to more complicated large-scale situations.  

**Clarifications:**  
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:  
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.  
- Support students to develop generalizations based on the similarities found among problems.  
- Provide opportunities for students to create plans and procedures to solve problems.  
- Develop students’ ability to construct relationships between their current understanding and more sophisticated ways of thinking. |
| MA.K12.MTR.6.1 | Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:  
- Estimate to discover possible solutions.  
- Use benchmark quantities to determine if a solution makes sense.  
- Check calculations when solving problems.  
- Verify possible solutions by explaining the methods used.  
- Evaluate results based on the given context.  

**Clarifications:**  
Teachers who encourage students to assess the reasonableness of solutions:  
- Have students estimate or predict solutions prior to solving.  
- Prompt students to continually ask, “Does this solution make sense? How do you know?”  
- Reinforce that students check their work as they progress within and after a task.  
- Strengthen students’ ability to verify solutions through justifications. |
| MA.K12.MTR.7.1 | Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:  
- Connect mathematical concepts to everyday experiences.  
- Use models and methods to understand, represent and solve problems.  
- Perform investigations to gather data or determine if a method is appropriate.  
- Redesign models and methods to improve accuracy or efficiency.  

**Clarifications:**  
Teachers who encourage students to apply mathematics to real-world contexts:  
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.  
- Challenge students to question the accuracy of their models and methods.  
- Support students as they validate conclusions by comparing them to the given situation.  
- Indicate how various concepts can be applied to other disciplines. |
| ELA.K12.EE.1.1 | Cite evidence to explain and justify reasoning.  

**Clarifications:**  
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.  
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.  
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.  
6-8 Students continue with previous skills and use a style guide to create a proper citation.  
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. |
| ELA.K12.EE.2.1 | Read and comprehend grade-level complex texts proficiently.  

**Clarifications:**  
See Text Complexity for grade-level complexity bands and a text complexity rubric. |
| ELA.K12.EE.3.1 | Make inferences to support comprehension.  

**Clarifications:**  
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. |
| ELA.K12.EE.4.1 | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.  

**Clarifications:**  
In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _____ because _____.” The collaborative conversations are becoming academic conversations.  
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |
Use the accepted rules governing a specific format to create quality work.

**ElA.K12.EE.5.1:**

<table>
<thead>
<tr>
<th>Clarifications:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</td>
</tr>
</tbody>
</table>

Use appropriate voice and tone when speaking or writing.

**ElA.K12.EE.6.1:**

<table>

### General Course Information and Notes

**General Notes**

**General Notes**

**United States Government** - The grade 9-12 United States Government course consists of the following content area strands: Geography, Civics and Government. The primary content for the course pertains to the study of government institutions and political processes and their historical impact on American society. Content should include, but is not limited to, the functions and purpose of government, the function of the state, the constitutional framework, federalism, separation of powers, functions of the three branches of government at the local, state and national level, and the political decision-making process.

**Honors and Advanced Level Course Note:** Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

**Special Notes:**

Additional content that may be included in the Grade 12 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- United States, major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at http://www.nagb.org/publications/frameworks/civicsframework.pdf

### Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EE and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

### English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

### Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4Dcgi/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.
GENERAL INFORMATION

Course Number: 2106320
Number of Credits: Half credit (.5)

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Political Sciences >
Abbreviated Title: US GOVT HON
Course Length: Semester (S)
Course Attributes:
• Honors
• Class Size Core Required
Course Level: 3

Course Type: Core Academic Course
Course Status: Draft - Course Pending Approval
Grade Level(s): 9,10,11,12
Graduation Requirement: United States Government

<tbody>
<tr>
<td>SS.912.A.1.1</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.2</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</td>
</tr>
<tr>
<td>SS.912.A.1.3</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.4</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.</td>
</tr>
<tr>
<td>SS.912.A.1.5</td>
<td>Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</td>
</tr>
<tr>
<td>SS.912.A.1.6</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.A.1.7</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td>SS.912.A.2.4</td>
<td>Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.1.1</td>
<td>Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.1.2</td>
<td>Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.1.3</td>
<td>Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.</td>
</tr>
<tr>
<td>SS.912.C.1.4</td>
<td>Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights.</td>
</tr>
<tr>
<td>SS.912.C.1.5</td>
<td>Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.</td>
</tr>
<tr>
<td>SS.912.C.2.1</td>
<td>Evaluate the constitutional provisions establishing citizenship, and assess the criteria among citizens by birth, naturalized citizens, and non-citizens.</td>
</tr>
<tr>
<td>SS.912.C.2.2</td>
<td>Evaluate the importance of political participation and civic participation.</td>
</tr>
<tr>
<td>SS.912.C.2.3</td>
<td>Experience the responsibilities of citizens at the local, state, or federal levels.</td>
</tr>
<tr>
<td>SS.912.C.2.4</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.5</td>
<td>Evaluate, take, and defend positions about rights protected by the Constitution and Bill of Rights.</td>
</tr>
<tr>
<td>SS.912.C.2.6</td>
<td>Explain why rights have limits and are not absolute.</td>
</tr>
<tr>
<td>SS.912.C.2.7</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change.</td>
</tr>
<tr>
<td>SS.912.C.2.8</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</td>
</tr>
<tr>
<td>SS.912.C.2.9</td>
<td>Monitor current public issues in Florida.</td>
</tr>
<tr>
<td>SS.912.C.2.10</td>
<td>Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.</td>
</tr>
<tr>
<td>SS.912.C.2.11</td>
<td>Explain the changing roles of television, radio, press, and Internet in political communication.</td>
</tr>
<tr>
<td>SS.912.C.2.12</td>
<td>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.</td>
</tr>
<tr>
<td>SS.912.C.2.13</td>
<td>Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media.</td>
</tr>
</tbody>
</table>
Evaluate the processes and results of an election at the state or federal level.

Evaluate the origins and roles of political parties, interest groups, media, and individuals in determining and shaping public policy.

Analyze trends in voter turnout.

Clarifications:
Examples are youth voter turnout, issue-based voting.

Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights.

Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.

Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.

Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.

Identify the impact of independent regulatory agencies in the federal bureaucracy.

Clarifications:
Examples are Federal Reserve, Food and Drug Administration, Federal Communications Commission.

Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.

Simulate the judicial decision-making process in interpreting law at the state and federal level.

Evaluate the influence of American foreign policy on other nations and political and cultural change.

Contrast how the Constitution safeguards and limits individual rights.

Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them.

Evaluate the significance and outcomes of landmark Supreme Court cases.

Clarifications:

Contrast how the Constitution safeguards and limits individual rights.

Simulate the judicial decision-making process in interpreting law at the state and federal level.

Illustrate examples of how government affects the daily lives of citizens at the local, state, and national levels.

Examine constitutional powers (expressed, implied, concurrent, reserved).

Explain how power and responsibility are distributed, shared, and limited by the Constitution.

Examine the world's nations are governed differently.

Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.

Assess human rights policies of the United States and other countries.

Compare indicators of democratization in multiple countries.

Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.

Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States.

Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.

Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

Clarifications:
Examples are thematic, contour, and dot-density.

Interpret population growth and other demographic data for any given place.

Analyze how current events are explained by artistic and cultural trends of the past.

Use timelines to establish cause and effect relationships of historical events.

Compare time measurement systems used by different cultures.

Clarifications:
Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.

Interpret and evaluate primary and secondary sources.

Clarifications:
Examples are artifacts, images, auditory and written sources.

Explain how historians use historical inquiry and other sciences to understand the past.

Clarifications:
Examples are archaeology, economics, geography, forensic chemistry, political science, physics.

Evaluate the role of history in shaping identity and character.

Clarifications:
Examples are ethnic, cultural, personal, national, religious.

Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.

Clarifications:
Examples are Magna Carta, parliament, habeas corpus.
Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.

Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.  

Determine the central ideas or primary source of a text; provide an accurate summary of how key events or ideas develop over the course of the text.  

Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.  

Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.  

Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.  

Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.  

Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.  

By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.  

Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.  

a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.  

b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.  

c. Propose conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.  

d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.  

Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.  

Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.  

Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.  

Write arguments focused on discipline-specific content.  

a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence.  

b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns.  

Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes.  

a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.  

b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.  

c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts.  

d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers.  

e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.  

f. Provide a concluding statement or section that follows from and supports the argument presented.  

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  

Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.  

Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.  

Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.  

Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.  

Draw evidence from informational texts to support analysis, reflection, and research.  

Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.  

Recognize the purposes and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each.  

Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling.  

Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling.

Represent data with plots on the real number line (dot plots, histograms, and box plots). ★

---

**Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

**Standard Relation to Course: Supporting**

Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★

**Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

**Standard Relation to Course: Supporting**

Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★

**Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

**Standard Relation to Course: Supporting**

Make sense of problems and persevere in solving them.

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze given information, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

**Construct viable arguments and critique the reasoning of others.**

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

**Use appropriate tools strategically.**

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

**Attend to precision.**

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

**Clarifications:** Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.
General Course Information and Notes

GENERAL NOTES

Political Science - The grade 9-12 Political Science course consists of the following content strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content for the course pertains to the study of government institutions and political processes and their influence on American society. Content should include, but is not limited to, the types of government, the functions and purpose of government, the function of the state, exercise of power, policy making and public opinion, political control and the economy, political ideologies, civil liberties, international relations, and the evolution of political change.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students’ content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

GENERAL INFORMATION

Course Number: 2106340
Number of Credits: Half credit (.5)
Course Type: Elective Course
Course Status: Course Approved
Grade Level(s): 9,10,11,12

Educator Certifications

Political Science (Grades 6-12)
Social Science (Grades 6-12)
## Political Science (#2106340) 2022 - 2023

### Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history. <strong>Clarifications</strong>: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: <a href="http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf">http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf</a>.</td>
</tr>
<tr>
<td>SS.912.A.1.2</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. <strong>Clarifications</strong>: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</td>
</tr>
<tr>
<td>SS.912.A.1.3</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.4</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past. <strong>Clarifications</strong>: Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</td>
</tr>
<tr>
<td>SS.912.A.1.5</td>
<td><strong>Clarifications</strong>: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: <a href="http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf">http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf</a>.</td>
</tr>
<tr>
<td>SS.912.A.1.6</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.A.1.7</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications. <strong>Clarifications</strong>: Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution.</td>
</tr>
<tr>
<td>SS.912.A.2.4</td>
<td><strong>Clarifications</strong>: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection.</td>
</tr>
<tr>
<td>SS.912.C.1.1</td>
<td>Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.1.2</td>
<td>Explain how the Declaration of Independence reflected the political principles of popular sovereignty; social contract, natural rights, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.1.3</td>
<td>Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.</td>
</tr>
<tr>
<td>SS.912.C.1.4</td>
<td>Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights.</td>
</tr>
<tr>
<td>SS.912.C.1.5</td>
<td>Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.</td>
</tr>
<tr>
<td>SS.912.C.2.1</td>
<td>Evaluate the constitutional provisions establishing citizenship, and assess the criteria among citizens by birth, naturalized citizens, and non-citizens.</td>
</tr>
<tr>
<td>SS.912.C.2.2</td>
<td>Evaluate the importance of political participation and civic participation. Experience the responsibilities of citizens at the local, state, or federal levels. <strong>Clarifications</strong>: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</td>
</tr>
<tr>
<td>SS.912.C.2.3</td>
<td><strong>Clarifications</strong>: Examples are speech, search and seizure, religion, gun possession.</td>
</tr>
<tr>
<td>SS.912.C.2.4</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.5</td>
<td>Evaluate, take, and defend positions about rights protected by the Constitution and Bill of Rights. <strong>Clarifications</strong>: Why rights have limits and are not absolute.</td>
</tr>
<tr>
<td>SS.912.C.2.6</td>
<td><strong>Clarifications</strong>: Analyze the impact of citizen participation as a means of achieving political and social change.</td>
</tr>
<tr>
<td>SS.912.C.2.7</td>
<td><strong>Clarifications</strong>: Analyze the expansion of civil rights and liberties by examining the principles contained in primary documents.</td>
</tr>
</tbody>
</table>
SS.912.C.2.14: Evaluate the processes and results of an election at the state or federal level.

SS.912.C.2.15: Evaluate the origins and roles of political parties, interest groups, media, and individuals in determining and shaping public policy.

SS.912.C.2.16: Analyze trends in voter turnout.

SS.912.C.3.1: Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights.

SS.912.C.3.2: Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.

SS.912.C.3.3: Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.

SS.912.C.3.4: Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.

SS.912.C.3.5: Identify the impact of independent regulatory agencies in the federal bureaucracy.

SS.912.C.3.6: Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.

SS.912.C.3.7: Describe the role of judicial review in American constitutional government.

SS.912.C.3.8: Compare the role of judges on the state and federal level with other elected officials.

SS.912.C.3.9: Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them.

SS.912.C.3.10: Evaluate the significance and outcomes of landmark Supreme Court cases.

SS.912.C.3.11: Contrast how the Constitution safeguards and limits individual rights.

SS.912.C.3.12: Illustrate examples of how government affects the daily lives of citizens at the local, state, and national levels.

SS.912.C.3.13: Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

SS.912.G.1.2: Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

SS.912.G.1.3: Analyze how current events are explained by artistic and cultural trends of the past.

SS.912.G.1.4: Use timelines to establish cause and effect relationships of historical events.

SS.912.G.4.1: Interpret population growth and other demographic data for any given place.

SS.912.H.1.6: Explore how history is used to understand the past.

SS.912.W.1.1: Evaluate the role of history in shaping identity and character.

SS.912.W.1.2: Evaluate the role of history in shaping identity and character.

SS.912.W.1.3: Evaluate the role of history in shaping identity and character.

SS.912.W.1.4: Evaluate the role of history in shaping identity and character.

SS.912.W.1.5: Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.

SS.912.W.2.18: Examples are Magna Carta, parliament, habeas corpus.
Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.

**MA.K12.MTR.1.1:**
Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

**Clariﬁcations:**
Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

**MA.K12.MTR.2.1:**
Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

**Clariﬁcations:**
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

**MA.K12.MTR.3.1:**
Complete tasks with mathematical ﬂuency. Mathematicians who complete tasks with mathematical ﬂuency:
- Select efﬁcient and appropriate methods for solving problems within the given context.
- Maintain ﬂexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with conﬁdence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efﬁciency when performing calculations.

**Clariﬁcations:**
Teachers who encourage students to complete tasks with mathematical ﬂuency:
- Provide students with the ﬂexibility to solve problems by selecting a procedure that allows them to solve efﬁciently and accurately.
- Offer multiple opportunities for students to practice efﬁcient and generalizable methods.
- Provide opportunities for students to reﬂect on the method they used and determine if a more efﬁcient method could have been used.

**MA.K12.MTR.4.1:**
Engage in discussions that reﬂect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reﬂect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efﬁciency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clariﬁcations:**
Teachers who encourage students to engage in discussions that reﬂect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efﬁcient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

**MA.K12.MTR.5.1:**
Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clariﬁcations:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students’ ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

**Clarifications:**
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

**Clarifications:**
See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

**Clarifications:**
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clarifications:**
In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think ________ because ________. “ The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

Use the accepted rules governing a specific format to create quality work.

**Clarifications:**
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

Use appropriate voice and tone when speaking or writing.

**Clarifications:**
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

**Clarifications:**
English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

Political Science - The grade 9-12 Political Science course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content for the course pertains to the study of government institutions and political processes and their influence on American society. Content should include, but is not limited to, the types of government, the functions and purpose of government, the function of the state, exercise of power, policy making and public opinion, political control and the economy, political ideologies, civil liberties, international relations, and the evolution of political change.

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

</tr>
<tr>
<td>SS.912.A.1.6:</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.A.1.7:</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td>SS.912.CG.1.2:</td>
<td>Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution.</td>
</tr>
<tr>
<td></td>
<td><strong>Clarifications:</strong> Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection.</td>
</tr>
<tr>
<td>SS.912.CG.1.3:</td>
<td>Explain the influence of Enlightenment ideas on the Declaration of Independence.</td>
</tr>
<tr>
<td></td>
<td>- Students will identify grievances listed in the Declaration of Independence in terms of due process of law, individual rights, popular sovereignty and social contract.</td>
</tr>
<tr>
<td></td>
<td>- Students will explain national sovereignty, natural law, self-evident truth, equality of all persons, due process of law, limited government, popular sovereignty, and unalienable rights of life, liberty and property as they relate to Enlightenment ideas in the Declaration of Independence.</td>
</tr>
<tr>
<td></td>
<td>- Students will recognize that national sovereignty, due process of law, natural law, self-evident truth, equality of all persons, limited government, popular sovereignty, and unalienable rights of life, liberty and property form the philosophical foundation of our government.</td>
</tr>
<tr>
<td>SS.912.CG.1.4:</td>
<td>Explain arguments presented in the Federalist Papers in support of ratifying the U.S. Constitution and a republican form of government.</td>
</tr>
<tr>
<td></td>
<td>- Students will recognize that the Federalist Papers argued for a federal system of government, separation of powers and a representative form of government that is accountable to its citizens.</td>
</tr>
<tr>
<td></td>
<td>- Students will analyze Federalist and Anti-Federalist arguments concerning ratification of the U.S. Constitution and inclusion of a bill of rights.</td>
</tr>
<tr>
<td>SS.912.CG.1.5:</td>
<td>Analyze how the ideals and principles expressed in the founding documents shape America as a constitutional republic.</td>
</tr>
<tr>
<td></td>
<td>- Students will differentiate among the documents and determine how each one was individually significant to the founding of the United States.</td>
</tr>
<tr>
<td></td>
<td>- Students will evaluate how the documents are connected to one another.</td>
</tr>
<tr>
<td></td>
<td>- Documents include, but are not limited to, the Declaration of Independence, Articles of Confederation, Federalist Papers (e.g., No. 10. No. 14. No. 31, No. 39. No. 51) and the U.S. Constitution.</td>
</tr>
<tr>
<td></td>
<td>- Students will identify key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason).</td>
</tr>
<tr>
<td>SS.912.CG.1.6:</td>
<td>Explain how the U.S. Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers.</td>
</tr>
<tr>
<td></td>
<td>- Students will explain how the structure and function of the U.S. government reflects these political principles.</td>
</tr>
<tr>
<td></td>
<td>- Students will differentiate between republicanism and democracy, and discuss how the United States reflects both.</td>
</tr>
<tr>
<td></td>
<td>- Students will describe compromises made during the Constitutional Convention (e.g., the Great Compromise, the Three-Fifths Compromise, the Electoral College).</td>
</tr>
<tr>
<td>SS.912.CG.2.1:</td>
<td>Explain the constitutional provisions that establish and affect citizenship.</td>
</tr>
<tr>
<td></td>
<td>- Students will explain how the concept of citizenship in the United States has changed over the course of history (i.e., 13th, 14th, 15th and 19th Amendments).</td>
</tr>
<tr>
<td></td>
<td>- Students will compare birthright citizenship, permanent residency and naturalization in the United States.</td>
</tr>
<tr>
<td></td>
<td>- Students will differentiate the rights held by native-born citizens, permanent residents and naturalized citizens (e.g., running for public office).</td>
</tr>
<tr>
<td>SS.912.CG.2.2:</td>
<td>Explain the importance of political and civic participation to the success of the United States' constitutional republic.</td>
</tr>
<tr>
<td></td>
<td>- Students will discuss various ways in which U.S. citizens can exercise political and civic participation.</td>
</tr>
<tr>
<td></td>
<td>- Students will identify historical examples of political and civic participation (e.g., Civil Rights Movement, Women's Suffrage Movement).</td>
</tr>
<tr>
<td></td>
<td>- Students will describe the ways in which individuals can be denied and limited in their right to practice political and civic participation (e.g., losing voting rights for felony conviction, limitations on political contributions, limits on the type of protesting).</td>
</tr>
<tr>
<td></td>
<td>Explain the responsibilities of citizens at the local, state and national levels.</td>
</tr>
</tbody>
</table>
SS.912.CG.2.3: Students will identify various responsibilities held by citizens (e.g., voting, volunteering and being informed, respecting laws).

Students will understand the process of registering or preregistering to vote and how to complete a ballot in Florida (e.g., uniform primary and general election ballot).

Students will discuss appropriate methods of communication with public officials (e.g., corresponding, attending public meetings, requesting a meeting and providing information).

Students will participate in classroom activities that simulate exercising the responsibilities of citizenship.

SS.912.CG.2.4: Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the public good.

Students will examine situations when individuals' rights have been restricted for the public good (e.g., limits on speech or rationing of goods during wartime, enactment of the Patriot Act).

Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good.

Students will explain different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response).

SS.912.CG.2.5: Analyze contemporary and historical examples of government-imposed restrictions on rights.

Students will identify historical examples of government-imposed restrictions on rights (e.g., suspension of habeas corpus, rationing during wartime and limitations on speech).

Students will examine the rationale for government-imposed restrictions on rights (e.g., inciting a crime, campaign contributions, defamation, military secrets).

SS.912.CG.2.6: Explain how the principles contained in foundational documents contributed to the expansion of civil rights and liberties over time.

Students will explain how different groups of people (e.g., African Americans, immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman's desegregation of the army, Lincoln's Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault).

Students will explain the role founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights.

SS.912.CG.2.7: Analyze the impact of civic engagement as a means of preserving or reforming institutions.

Students will identify legal methods that citizens can use to promote social and political change (e.g., voting, peaceful protests, petitioning, demonstrations, contacting government offices).

Students will identify historical examples of citizens achieving or preventing political and social change through civic engagement (e.g., the Abolitionist Movement).

SS.912.CG.2.8: Explain the impact of political parties, interest groups, media and individuals on determining and shaping public policy.

Students will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy.

Students will identify historical examples of interest groups, media and individuals influencing public policy.

Students will compare and contrast how the free press influenced politics at major points in U.S. history (e.g., Vietnam War Era, Civil Rights Era).

SS.912.CG.2.9: Explain the process and procedures of elections at the state and national levels.

Students will identify the different primary formats and how political parties nominate candidates using primaries.

Students will compare and contrast the different ways in which elections are decided (e.g., Electoral College, proportional representation, popular vote, winner-take-all).

Students will explain the process by which candidates register to be part of state and national elections.

Students will describe the different methods used to tabulate election results in state and national elections (i.e., electronic voting, punch cards, fill-in ballots).

Students will evaluate the role of debates in elections.

SS.912.CG.2.10: Analyze factors that contribute to voter turnout in local, state and national elections.

Students will explain trends in voter turnout.

Students will discuss attempts to increase voter turnout (e.g., get out the vote campaigns, social movements).

Students will explain how governmental action has affected voter participation (e.g., 15th, 19th and 26th Amendments; Jim Crow laws; poll tax; efforts to suppress voters).

SS.912.CG.2.11: Evaluate political communication for bias, factual accuracy, omission and emotional appeal.

Students will compare the reporting on the same political event or issue from multiple perspectives.

Students will identify various forms of propaganda (e.g., plain folks, glittering generalities, testimonial, fear, logical fallacies).

Students will discuss the historical impact of political communication on American political process and public opinion.

Examples of political communication may include, but are not limited to, political cartoons, propaganda, campaign advertisements, political speeches, bumper stickers, blogs, press and social media.

SS.912.CG.2.12: Explain how interest groups, the media and public opinion influence local, state and national decision-making related to public issues.

Students will objectively discuss current public issues in Florida and use both the U.S. and Florida Constitutions to justify pro and con positions.

Students will examine the relationship and responsibilities of both the state and national governments regarding these public issues.

Students will analyze public policy solutions related to local, state and national issues.

SS.912.CG.2.13: Analyze the influence and effects of various forms of media and the internet in political communication.

Students will explain how the methods of political communication has changed over time (e.g., television, radio, press, social media).

Students will describe how the methods used by political officials to communicate with the public has changed over time.

Students will discuss the strengths and weaknesses of different methods of political communication.

SS.912.CG.3.1: Analyze how certain political ideologies conflict with the principles of freedom and democracy.

Students will identify political ideologies that conflict with the principles of freedom and democracy (e.g., communism and totalitarianism).

Students will analyze how the principles of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers contribute to the nation's longevity and its ability to overcome challenges, and distinguish the United States' constitutional republic from authoritarian and totalitarian nations.

SS.912.CG.3.2: Explain how the U.S. Constitution safeguards and limits individual rights.

Students will identify the individual rights protected by the U.S. Constitution, the Bill of Rights and other constitutional amendments.
Students will describe the role of the Supreme Court in further defining the safeguards and limits of constitutional rights.

Analyze the structures, functions and processes of the legislative branch as described in Article I of the U.S. Constitution.

- Students will explain why Article I of the U.S. Constitution established a bicameral legislative body and how the House of Representatives functions differently from the Senate.
- Students will identify the methods for determining the number of members in the House of Representatives and the Senate.
- Students will identify and describe the "enumerated powers" delegated to Congress (e.g., assess taxes, borrow money, declare war, make laws).
- Students will analyze the role of the legislative branch in terms of its relationship with the judicial and executive branch of the government.
- Students will describe constitutional amendments that changed the role of Congress from its original description in Article I of the U.S. Constitution (i.e., 10th, 14th, 16th, 17th and 27th Amendments).

Analyze the structures, functions and processes of the executive branch as described in Article II of the U.S. Constitution.

- Students will explain the qualifications one must have to seek the office of president and the process of presidential elections.
- Students will explain different presidential responsibilities outlined in Article II (e.g., receiving foreign heads of state, delivering the State of the Union address, carrying out faithful execution of the law).
- Students will examine the role of the executive branch in terms of its relationship with the judicial and legislative branches of the government.
- Students will describe constitutional amendments (i.e., 12th, 20th, 22nd and 25th) that have changed the role of the executive branch from its original description in Article II.
- Students will describe the impeachment process.

Analyze the structures, functions and processes of the judicial branch as described in Article III of the U.S. Constitution.

- Students will discuss the role of the Supreme Court and lesser federal courts.
- Students will compare the roles of expressed, implied, concurrent and reserved powers in United States' federalism.
- Students will explain expressed, implied, concurrent and reserved powers in the U.S. Constitution.
- Students will identify powers that are expressed in the U.S. Constitution to Congress (e.g., coin money, declare war, assess taxes, citizenship).
- Students will identify that expressed powers are also known as enumerated powers found in Article I of the U.S. Constitution.
- Students will analyze the role of the "general welfare clause" and "necessary and proper clause" in granting Congress implied powers.
- Students will describe examples of concurrent powers as those powers shared by both state and national governments (e.g., build roads, tax citizens, make laws).
- Students will explain how reserved powers define issues as matters for the people or the state governments.
- Students will compare the roles of expressed, implied, concurrent and reserved powers in United States' federalism.
- Students will describe the relationship among the Supreme Court, federal appellate courts and federal district courts (e.g., Erie Doctrine, Rooker-Feldman Doctrine).

Analyze the purpose and function of judicial review in the American constitutional government.

- Students will examine the role of district courts, the courts of appeals and the Supreme Court in the judicial review process.
- Students will explain the relationship between the concept of judicial review and the language of the Supremacy Clause in Article VI of the U.S. Constitution.
- Students will examine the role of the judicial branch in terms of its relationship with the legislative and executive branches of the government.
- Students will describe the role of the Supreme Court and lesser federal courts.
- Students will explain the foundational constitutional issues underlying landmark Supreme Court decisions related to the Bill of Rights and other amendments.
- Students will explain why Article I of the U.S. Constitution established a bicameral legislative body and how the House of Representatives functions differently from the Senate.
- Students will identify the methods for determining the number of members in the House of Representatives and the Senate.
- Students will identify and describe the "enumerated powers" delegated to Congress (e.g., assess taxes, borrow money, declare war, make laws).
- Students will analyze the role of the legislative branch in terms of its relationship with the judicial and executive branch of the government.
- Students will describe constitutional amendments that changed the role of Congress from its original description in Article I of the U.S. Constitution (i.e., 10th, 14th, 16th, 17th and 27th Amendments).

Evaluate how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution.

- Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; McCulloch v. Maryland; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; Korematsu v. United States; Mapp v. Ohio; In re Gault; United States v. Nixon; Regents of the University of California v. Bakke; Hazel v. Kuhlmeier; District of Columbia v. Heller).
- Students will explain different presidential responsibilities outlined in Article II (e.g., receiving foreign heads of state, delivering the State of the Union address, carrying out faithful execution of the law).
- Students will examine the role of the executive branch in terms of its relationship with the judicial and legislative branches of the government.
- Students will describe constitutional amendments (i.e., 12th, 20th, 22nd and 25th) that have changed the role of the executive branch from its original description in Article II.
- Students will describe the impeachment process.

Analyze the levels and responsibilities of state and federal courts.

- Students will describe what Article III of the U.S. Constitution states about the relationship between state and federal courts.
- Students will recognize the role of the Federal Judiciary Act of 1789 in establishing the structure and jurisdiction of the federal court system.
- Students will contrast the differences among civil trials and criminal trials at the state level.
- Students will describe the relationship among the Supreme Court, federal appellate courts and federal district courts (e.g., Erie Doctrine, Rooker-Feldman Doctrine).

Analyze the concept of federalism in the United States and its role in establishing the relationship between the state and national governments.

- Students will identify examples of the powers reserved and shared among state and the national governments in the American federal system of government.
- Students will examine the role the Great Compromise had on the eventual establishment of a federal system of fifty equal states.
- Students will explain specific rights that are granted to the states in the language of the U.S. Constitution and its amendments (e.g., 10th Amendment, defense and extradition).
- Students will analyze how states have challenged the national government regarding states' rights (e.g., Civil War, the New Deal, No Child Left Behind, Affordable Health Care Act, Civil Rights Movement).

Explain the judicial decision-making process in interpreting law at the state and national levels.

- Students will explain the role of the U.S. Constitution in interpreting law at the state and national levels.
- Students will explain the process used by judges at the state and national levels when making a decision or writing summary opinions.
- Students will incorporate language from the U.S. Constitution or court briefs to justify a legal decision when interpreting state or national law.

Explain how citizens are affected by the local, state and national governments.

- Students will identify local government officials and employees who affect the daily lives of citizens.
| SS.912.G.3.15: | • Students will identify the role of state governmental officials and employees who affect the daily lives of citizens.  
• Students will identify the role of national governmental officials and employees who affect the daily lives of citizens.  
• Students will explain how government at all levels impacts the daily lives of citizens. |
| SS.912.G.4.1: | Analyze how liberty and economic freedom generate broad-based opportunity and prosperity in the United States.  
• Students will differentiate between government systems (e.g., autocracy, democracy, monarchy, oligarchy republic, theocracy).  
• Students will differentiate between economic systems (e.g., capitalism, communism, mixed market, socialism).  
• Students will analyze the disadvantages of authoritarian control over the economy (e.g., communism and socialism) in generating broad-based economic prosperity for their population. |
| SS.912.G.4.2: | Explain how the United States uses foreign policy to influence other nations.  
• Students will explain how the policies of other nations influence U.S. policy and society.  
• Students will identify agencies of the U.S. government that contribute to its foreign policy agenda (e.g., National Security Agency, Central Intelligence Agency).  
• Students will explain how the United States uses foreign policy to influence other nations (e.g., Cuba, Iran, Syria).  
• Students will explain the use of embargos and economic sanctions by the United States has affected other nations (e.g., China, Saudi Arabia). |
| SS.912.G.4.3: | Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.  
• Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind. |
| SS.912.G.4.4: | Identify indicators of democratization in foreign countries.  
• Students will recognize indicators of democratization as a system of free and fair elections, active civic participation, the protection of human rights, and the rule of law. |
| SS.912.E.2.2: | Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives. |
| SS.912.E.2.3: | Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States. |
| SS.912.G.1.1: | Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place. |
| SS.912.G.1.3: | Employ applicable units of measurement and scale to solve simple locational problems using maps and globes. |
| SS.912.G.1.4: | Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.  
**Clarifications:**  
Examples are thematic, contour, and dot-density. |
| SS.912.G.4.1: | Interpret population growth and other demographic data for any given place. |
| SS.912.H.1.6: | Analyze how current events are explained by artistic and cultural trends of the past. |
| SS.912.W.1.1: | Use timelines to establish cause and effect relationships of historical events. |
| SS.912.W.1.2: | Compare time measurement systems used by different cultures.  
**Clarifications:**  
Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era. |
| SS.912.W.1.3: | Interpret and evaluate primary and secondary sources.  
**Clarifications:**  
Examples are artifacts, images, auditory and written sources. |
| SS.912.W.1.4: | Explain how historians use historical inquiry and other sciences to understand the past.  
**Clarifications:**  
Examples are archaeology, economics, geography, forensic chemistry, political science, physics. |
| SS.912.W.1.6: | Evaluate the role of history in shaping identity and character.  
**Clarifications:**  
Examples are ethnic, cultural, personal, national, religious. |
| SS.912.W.2.18: | Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.  
**Clarifications:**  
Examples are Magna Carta, parliament, habeas corpus. |
| SS.912.W.3.4: | Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.  
Mathematicians who participate in effortful learning both individually and with others:  
• Analyze the problem in a way that makes sense given the task.  
• Ask questions that will help with solving the task.  
• Build perseverance by modifying methods as needed while solving a challenging task.  
• Stay engaged and maintain a positive mindset when working to solve tasks.  
• Help and support each other when attempting a new method or approach.  
**Clarifications:**  
Examples are special education, government, community, international, social studies, economics. |
| MA.K12.MTR.1.1: | Teachers who encourage students to participate actively in effortful learning both individually and with others:  
• Cultivate a community of growth mindset learners.  
• Foster perseverance in students by choosing tasks that are challenging.  
• Develop students' ability to analyze and problem solve.  
• Recognize students' effort when solving challenging problems.  
**Clarifications:**  
Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era. |
| MA.K12.MTR.1.1: | Demonstrate understanding by representing problems in multiple ways. |
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

**Clarifications:**
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**Clarifications:**
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clarifications:**
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.
### GENERAL NOTES

**Political Science** - The grade 9-12 Political Science course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content for the course pertains to the study of government institutions and political processes and their influence on American society. Content should include, but is not limited to, the types of government, the functions and purpose of government, the function of the state, exercise of power, policy making and public opinion, political control and the economy, political ideologies, civil liberties, international relations, and the evolution of political change.

**Instructional Practices**
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida’s B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

## Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.2:</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.3:</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</td>
</tr>
<tr>
<td>SS.912.A.1.4:</td>
<td>Evaluate, take, and defend positions about rights protected by the Constitution and Bill of Rights.</td>
</tr>
<tr>
<td>SS.912.A.1.5:</td>
<td>Evaluate how the Constitution and its amendments reflect the political and social change.</td>
</tr>
<tr>
<td>SS.912.A.1.6:</td>
<td>Explain how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.</td>
</tr>
<tr>
<td>SS.912.A.1.7:</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change.</td>
</tr>
<tr>
<td>SS.912.A.1.8:</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</td>
</tr>
<tr>
<td>SS.912.A.1.9:</td>
<td>Monitor current public issues in Florida.</td>
</tr>
<tr>
<td>SS.912.A.2.5:</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td>SS.912.C.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.C.1.2:</td>
<td>Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.1.3:</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</td>
</tr>
<tr>
<td>SS.912.C.1.4:</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.1.5:</td>
<td>Explain why rights have limits and are not absolute.</td>
</tr>
<tr>
<td>SS.912.C.1.6:</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change.</td>
</tr>
<tr>
<td>SS.912.C.1.7:</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</td>
</tr>
<tr>
<td>SS.912.C.1.8:</td>
<td>Monitor current public issues in Florida.</td>
</tr>
<tr>
<td>SS.912.C.1.9:</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td>SS.912.C.1.10:</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.C.1.11:</td>
<td>Experience the responsibilities of citizens at the local, state, or federal levels.</td>
</tr>
<tr>
<td>SS.912.C.1.12:</td>
<td>Differentiate the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.2.1:</td>
<td>Evaluate how the Constitution and its amendments reflect the political and social change.</td>
</tr>
<tr>
<td>SS.912.C.2.2:</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.</td>
</tr>
<tr>
<td>SS.912.C.2.3:</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.4:</td>
<td>Explain why rights have limits and are not absolute.</td>
</tr>
<tr>
<td>SS.912.C.2.5:</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change.</td>
</tr>
<tr>
<td>SS.912.C.2.6:</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</td>
</tr>
<tr>
<td>SS.912.C.2.7:</td>
<td>Monitor current public issues in Florida.</td>
</tr>
<tr>
<td>SS.912.C.2.8:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.C.2.9:</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.10:</td>
<td>Explain why rights have limits and are not absolute.</td>
</tr>
<tr>
<td>SS.912.C.2.11:</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change.</td>
</tr>
<tr>
<td>SS.912.C.2.12:</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</td>
</tr>
<tr>
<td>SS.912.C.2.14:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.C.2.15:</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.16:</td>
<td>Explain why rights have limits and are not absolute.</td>
</tr>
<tr>
<td>SS.912.C.2.17:</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change.</td>
</tr>
<tr>
<td>SS.912.C.2.18:</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</td>
</tr>
<tr>
<td>SS.912.C.2.19:</td>
<td>Monitor current public issues in Florida.</td>
</tr>
</tbody>
</table>
Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.

Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.

Analyze the changing roles of television, radio, press, and Internet in political communication.

Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.

Explain the origins and roles of political parties, interest groups, media, and individuals in determining and shaping public policy.

Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.

Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.

Identify the impact of independent regulatory agencies in the federal bureaucracy.

Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.

Describe the role of judicial review in American constitutional government.

Compare the role of judges on the state and federal level with other elected officials.

Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them.

Interpret and evaluate primary and secondary sources.

Explain how historians use historical inquiry and other sciences to understand the past.

Evaluate the significance and outcomes of landmark Supreme Court cases.

Contrast how the Constitution safeguards and limits individual rights.

Simulate the judicial decision-making process in interpreting law at the state and federal level.

Illustrate examples of how government affects the daily lives of citizens at the local, state, and national levels.

Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

Interpret population growth and other demographic data for any given place.

Analyze how current events are explained by artistic and cultural trends of the past.

Compare time measurement systems used by different cultures.

Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.
Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.

LAFS.910.RH.2.4: Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.

LAFS.910.RH.2.6: Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.

LAFS.910.RH.3.7: Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.

LAFS.910.RH.3.8: Assess the extent to which the reasoning and evidence in a text support the author's claims.

LAFS.910.RH.4.10: By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.

Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.

a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.

b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.

c. Propose conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.

d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.

Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.

Present information, findings, and supporting evidence clearly, concisely, and logically so that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.

Write arguments focused on discipline-specific content:

a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence.

b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaim(s) in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns.

c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaim(s).

d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

e. Provide a concluding statement or section that follows from and supports the argument presented.

Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.

a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.

b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.

c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts.

d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers.

e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

Use technology, including the internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.

Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.

Draw evidence from informational texts to support analysis, reflection, and research.

Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each.

★ Standard Relation to Course: Supporting

Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling.

★ Standard Relation to Course: Supporting

Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant.

★ Standard Relation to Course: Supporting

Evaluate reports based on data.

★ Standard Relation to Course: Supporting
Represent data with plots on the real number line (dot plots, histograms, and box plots). ★

**MAFS.912.S-ID.1.1:**

**Clarifications:**
In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

**Standard Relation to Course: Supporting**

Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★

**MAFS.912.S-ID.1.2:**

**Clarifications:**
In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

**Standard Relation to Course: Supporting**

Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★

**MAFS.912.S-ID.1.3:**

**Clarifications:**
In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

**Standard Relation to Course: Supporting**

Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★

**MAFS.912.S-ID.1.4:**

**Make sense of problems and persevere in solving them.**

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

**Construct viable arguments and critique the reasoning of others.**

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

**Use appropriate tools strategically.**

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about which of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

**Attend to precision.**

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

**MAFS.K12.MP.3.1:**

**MAFS.K12.MP.5.1:**

**MAFS.K12.MP.6.1:**

**ELD.K12.ELL.SS.1:**

**ELD.K12.ELL.SS.1:**

**HE.912.C2.4:**

**Clarifications:**
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.
Law Studies - The grade 9-12 Law Studies course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content for the course pertains to the study of the American legal system as the foundation of American society by examining those laws which have an impact on citizens' lives and an introduction to fundamental civil and criminal justice procedures. Content should include, but is not limited to, the need for law, the basis for our legal system, civil and criminal law, adult and juvenile courts, family and consumer law, causes and consequences of crime, individual rights and responsibilities, and career opportunities in the legal system.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies
Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf
### Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.2:</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</td>
</tr>
<tr>
<td>SS.912.A.1.3:</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.4:</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past. Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</td>
</tr>
<tr>
<td>SS.912.A.1.5:</td>
<td>Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: <a href="http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf">http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf</a></td>
</tr>
<tr>
<td>SS.912.A.1.6:</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.A.1.7:</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td>SS.912.A.2.1:</td>
<td>Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups.</td>
</tr>
<tr>
<td>SS.912.A.2.2:</td>
<td>Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution.</td>
</tr>
<tr>
<td>SS.912.A.2.3:</td>
<td>Analyze why rights have limits and are not absolute.</td>
</tr>
<tr>
<td>SS.912.A.2.4:</td>
<td>Clarifications: Examples include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.2.5:</td>
<td>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.C.1.1:</td>
<td>Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.1.2:</td>
<td>Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.1.3:</td>
<td>Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.</td>
</tr>
<tr>
<td>SS.912.C.1.4:</td>
<td>Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights.</td>
</tr>
<tr>
<td>SS.912.C.1.5:</td>
<td>Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.</td>
</tr>
<tr>
<td>SS.912.C.2.1:</td>
<td>Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.2.2:</td>
<td>Evaluate the importance of political participation and civic participation: Experience the responsibilities of citizens at the local, state, or federal levels.</td>
</tr>
<tr>
<td>SS.912.C.2.3:</td>
<td>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</td>
</tr>
<tr>
<td>SS.912.C.2.4:</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.6:</td>
<td>Evaluate, take, and defend positions about rights protected by the Constitution and Bill of Rights.</td>
</tr>
<tr>
<td>SS.912.C.2.7:</td>
<td>Clarifications: Examples are speech, search and seizure, religion, gun possession.</td>
</tr>
<tr>
<td>SS.912.C.2.8:</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</td>
</tr>
<tr>
<td>SS.912.C.2.10:</td>
<td>Monitor current public issues in Florida.</td>
</tr>
<tr>
<td>Standard</td>
<td>Description</td>
</tr>
<tr>
<td>----------</td>
<td>-------------</td>
</tr>
<tr>
<td>SS.912.C.2.11</td>
<td>Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.</td>
</tr>
<tr>
<td>SS.912.C.2.12</td>
<td>Explain the changing roles of television, radio, press, and Internet in political communication.</td>
</tr>
<tr>
<td>SS.912.C.2.13</td>
<td>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.</td>
</tr>
<tr>
<td>SS.912.C.2.15</td>
<td>Evaluate the role of history in shaping identity and character.</td>
</tr>
<tr>
<td>SS.912.C.2.17</td>
<td>Analyze the significance and outcomes of landmark Supreme Court cases.</td>
</tr>
<tr>
<td>SS.912.C.2.18</td>
<td>Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.</td>
</tr>
<tr>
<td>SS.912.C.2.19</td>
<td>Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.</td>
</tr>
</tbody>
</table>

Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.
MA.K12.MTR.1.1: 
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

**Clarifications:**
Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students’ ability to analyze and problem solve.
- Recognize students’ effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

**Clarifications:**
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**Clarifications:**
Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clarifications:**
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students’ ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students’ ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**Clarifications:**
- Teachers who encourage students to assess the reasonableness of solutions:
  - Have students estimate or predict solutions prior to solving.
  - Prompt students to continually ask, “Does this solution make sense? How do you know?”
  - Reinforce that students check their work as they progress within and after a task.
  - Strengthen students’ ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**
- Teachers who encourage students to apply mathematics to real-world contexts:
  - Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
  - Challenge students to question the accuracy of their models and methods.
  - Support students as they validate conclusions by comparing them to the given situation.
  - Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

**Clarifications:**
- K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
- 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
- 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
- 6-8 Students continue with previous skills and use a style guide to create a proper citation.
- 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

**Clarifications:**
- See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

**Clarifications:**
- Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clarifications:**
- In kindergarten, students learn to listen to one another respectfully.
- In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _____ because ______.” The collaborative conversations are becoming academic conversations.
- In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

Use the accepted rules governing a specific format to create quality work.

**Clarifications:**
- Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

Use appropriate voice and tone when speaking or writing.

**Clarifications:**
- In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

**Clarifications:**
- Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

English language learners communicate for social and instructional purposes within the school setting.

**Clarifications:**
- English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

**Clarifications:**
- Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.
General Course Information and Notes

**GENERAL NOTES**

**Law Studies** - The grade 9-12 Law Studies course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content for the course pertains to the study of the American legal system as the foundation of American society by examining those laws which have an impact on citizens’ lives and an introduction to fundamental civil and criminal justice procedures. Content should include, but is not limited to, the need for law, the basis for our legal system, civil and criminal law, adult and juvenile courts, family and consumer law, causes and consequences of crime, individual rights and responsibilities, and career opportunities in the legal system.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students’ content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

**GENERAL INFORMATION**

**Course Number:** 2106350

**Course Path:** Section: Grades PreK to 12 Education  Course > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Political Sciences > Abbreviated Title: LAW STUDIES

**Number of Credits:** Half credit (.5)

**Course Type:** Elective Course

**Course Status:** State Board Approved

**Grade Level(s):** 9,10,11,12

**Course Length:** Semester (S)

**Course Level:** 2

**Educator Certifications**

<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td><strong>SS.912.A.1.4:</strong></td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past. Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. <strong>Clarifications:</strong> Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: <a href="http://www.fldoe.org/bill/library_media/pdf/12totalfinds.pdf">http://www.fldoe.org/bill/library_media/pdf/12totalfinds.pdf</a></td>
</tr>
<tr>
<td><strong>SS.912.A.1.5:</strong></td>
<td>Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. <strong>Clarifications:</strong> Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection.</td>
</tr>
<tr>
<td><strong>SS.912.A.1.6:</strong></td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td><strong>SS.912.A.1.7:</strong></td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td><strong>SS.912.A.2.4:</strong></td>
<td>Explain the influence of Enlightenment ideas on the Declaration of Independence. • Students will identify grievances listed in the Declaration of Independence in terms of due process of law, individual rights, natural rights, popular sovereignty and social contract. • Students will explain national sovereignty, natural law, self-evident truth, equality of all persons, due process of law, limited government, popular sovereignty, and unalienable rights of life, liberty and property as they relate to Enlightenment ideas in the Declaration of Independence. • Students will recognize that national sovereignty, due process of law, natural law, self-evident truth, equality of all persons, limited government, popular sovereignty, and unalienable rights of life, liberty and property form the philosophical foundation of our government.</td>
</tr>
<tr>
<td><strong>SS.912.A.2.5:</strong></td>
<td>Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. <strong>Clarifications:</strong> This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td><strong>SS.912.CG.1.2:</strong></td>
<td>Explain how the ideals and principles expressed in the founding documents shape America as a constitutional republic. • Students will identify key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason). • Students will analyze Federalist and Anti-Federalist arguments concerning ratification of the U.S. Constitution and inclusion of a bill of rights. • Students will recognize that the Federalist Papers argued for a federal system of government, separation of powers and a representative form of government that is accountable to its citizens.</td>
</tr>
<tr>
<td><strong>SS.912.CG.1.3:</strong></td>
<td>Analyze how the ideas and principles expressed in the founding documents shape America as a constitutional republic. • Students will differentiate among the documents and determine how each one was individually significant to the founding of the United States. • Students will evaluate how the documents are connected to one another. • Documents include, but are not limited to, the Declaration of Independence, Articles of Confederation, Federalist Papers (e.g., No. 10. No. 14, No. 31, No. 39, No. 51) and the U.S. Constitution. • Students will identify key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason).</td>
</tr>
<tr>
<td><strong>SS.912.CG.1.4:</strong></td>
<td>Explain how the U.S. Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers. • Students will explain how the structure and function of the U.S. government reflects these political principles. • Students will differentiate between republicanism and democracy, and discuss how the United States reflects both. • Students will describe compromises made during the Constitutional Convention (e.g., the Great Compromise, the Three-Fifths Compromise, the Electoral College).</td>
</tr>
<tr>
<td><strong>SS.912.CG.1.5:</strong></td>
<td>Explain the constitutional provisions that establish and affect citizenship. • Students will explain how the concept of citizenship in the United States has changed over the course of history (i.e., 13th, 14th, 15th and 19th Amendments). • Students will compare birthright citizenship, permanent residency and naturalization in the United States. • Students will differentiate the rights held by native-born citizens, permanent residents and naturalized citizens (e.g., running for public office).</td>
</tr>
<tr>
<td><strong>SS.912.CG.1.6:</strong></td>
<td>Explain the importance of political and civic participation to the success of the United States’ constitutional republic.</td>
</tr>
<tr>
<td>SS.912.CG.2.2:</td>
<td>Students will discuss various ways in which U.S. citizens can exercise political and civic participation.</td>
</tr>
<tr>
<td>-------------------------</td>
<td>----------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>SS.912.CG.2.3:</td>
<td>Explain the responsibilities of citizens at the local, state and national levels.</td>
</tr>
<tr>
<td></td>
<td>• Students will identify various responsibilities held by citizens (e.g., voting, volunteering and being informed, respecting laws).</td>
</tr>
<tr>
<td></td>
<td>• Students will discuss the process of registering or preregistering to vote and how to complete a ballot in Florida (e.g., uniform primary and general election ballot).</td>
</tr>
<tr>
<td></td>
<td>• Students will discuss appropriate methods of communication with public officials (e.g., corresponding, attending public meetings, requesting a meeting and providing information).</td>
</tr>
<tr>
<td></td>
<td>• Students will participate in classroom activities that simulate exercising the responsibilities of citizenship.</td>
</tr>
<tr>
<td>SS.912.CG.2.4:</td>
<td>Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td></td>
<td>• Students will examine situations when individuals' rights have been restricted for the public good (e.g., limits on speech or rationing of goods during wartime, enactment of the Patriot Act).</td>
</tr>
<tr>
<td></td>
<td>• Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good.</td>
</tr>
<tr>
<td></td>
<td>• Students will explain different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response).</td>
</tr>
<tr>
<td>SS.912.CG.2.5:</td>
<td>Analyze contemporary and historical examples of government-imposed restrictions on rights.</td>
</tr>
<tr>
<td></td>
<td>• Students will identify historical examples of government-imposed restrictions on rights (e.g., suspension of habeas corpus, rationing during wartime and limitations on speech).</td>
</tr>
<tr>
<td></td>
<td>• Students will examine the rationale for government-imposed restrictions on rights (e.g., inciting a crime, campaign contributions, defamation, military secrets).</td>
</tr>
<tr>
<td>SS.912.CG.2.6:</td>
<td>Explain how the principles contained in foundational documents contributed to the expansion of civil rights and liberties over time.</td>
</tr>
<tr>
<td></td>
<td>• Students will explain how different groups of people (e.g., African Americans, immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman’s desegregation of the army, Lincoln’s Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault).</td>
</tr>
<tr>
<td></td>
<td>• Students will explain the role founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights.</td>
</tr>
<tr>
<td>SS.912.CG.2.7:</td>
<td>Analyze the impact of civic engagement as a means of preserving or reforming institutions.</td>
</tr>
<tr>
<td></td>
<td>• Students will identify legal methods that citizens can use to promote social and political change (e.g., voting, peaceful protests, petitioning, demonstrations, contacting government offices).</td>
</tr>
<tr>
<td></td>
<td>• Students will identify historical examples of citizens achieving or preventing political and social change through civic engagement (e.g., the Abolitionist Movement).</td>
</tr>
<tr>
<td>SS.912.CG.2.8:</td>
<td>Explain the impact of political parties, interest groups, media and individuals on determining and shaping public policy.</td>
</tr>
<tr>
<td></td>
<td>• Students will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy.</td>
</tr>
<tr>
<td></td>
<td>• Students will identify historical examples of interest groups, media and individuals influencing public policy.</td>
</tr>
<tr>
<td></td>
<td>• Students will compare and contrast how the free press influenced politics at major points in U.S. history (e.g., Vietnam War Era, Civil Rights Era).</td>
</tr>
<tr>
<td>SS.912.CG.2.11:</td>
<td>Evaluate political communication for bias, factual accuracy, omission and emotional appeal.</td>
</tr>
<tr>
<td></td>
<td>• Students will compare the reporting on the same political event or issue from multiple perspectives.</td>
</tr>
<tr>
<td></td>
<td>• Students will identify various forms of propaganda (e.g., plain folks, glittering generalities, testimonial, fear, logical fallacies).</td>
</tr>
<tr>
<td></td>
<td>• Students will discuss the historical impact of political communication on American political process and public opinion.</td>
</tr>
<tr>
<td></td>
<td>• Examples of political communication may include, but are not limited to, political cartoons, propaganda, campaign advertisements, political speeches, bumper stickers, blogs, press and social media.</td>
</tr>
<tr>
<td>SS.912.CG.2.12:</td>
<td>Explain how interest groups, the media and public opinion influence local, state and national decision-making related to public issues.</td>
</tr>
<tr>
<td></td>
<td>• Students will objectively discuss current public issues in Florida and use both the U.S. and Florida Constitutions to justify pro and con positions.</td>
</tr>
<tr>
<td></td>
<td>• Students will examine the relationship and responsibilities of both the state and national governments regarding these public issues.</td>
</tr>
<tr>
<td></td>
<td>• Students will analyze public policy solutions related to local, state and national issues.</td>
</tr>
<tr>
<td>SS.912.CG.2.13:</td>
<td>Analyze the influence and effects of various forms of media and the internet in political communication.</td>
</tr>
<tr>
<td></td>
<td>• Students will explain how the methods of political communication has changed over time (e.g., television, radio, press, social media).</td>
</tr>
<tr>
<td></td>
<td>• Students will describe how the methods used by political officials to communicate with the public has changed over time.</td>
</tr>
<tr>
<td></td>
<td>• Students will discuss the strengths and weaknesses of different methods of political communication.</td>
</tr>
<tr>
<td>SS.912.CG.3.1:</td>
<td>Analyze how certain political ideologies conflict with the principles of freedom and democracy.</td>
</tr>
<tr>
<td></td>
<td>• Students will identify political ideologies that conflict with the principles of freedom and democracy (e.g., communism and totalitarianism).</td>
</tr>
<tr>
<td></td>
<td>• Students will analyze how the principles of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers contribute to the nation's longevity and its ability to overcome challenges, and distinguish the United States' constitutional republic from authoritarian and totalitarian nations.</td>
</tr>
<tr>
<td>SS.912.CG.3.2:</td>
<td>Explain how the U.S. Constitution safeguards and limits individual rights.</td>
</tr>
<tr>
<td></td>
<td>• Students will identify the individual rights protected by the U.S. Constitution, the Bill of Rights and other constitutional amendments.</td>
</tr>
<tr>
<td></td>
<td>• Students will describe the role of the Supreme Court in further defining the safeguards and limits of constitutional rights.</td>
</tr>
<tr>
<td>SS.912.CG.3.3:</td>
<td>Analyze the structures, functions and processes of the legislative branch as described in Article I of the U.S. Constitution.</td>
</tr>
<tr>
<td></td>
<td>• Students will explain why Article I of the U.S. Constitution established a bicameral legislative body and how the House of Representatives functions differently from the Senate.</td>
</tr>
<tr>
<td></td>
<td>• Students will identify the methods for determining the number of members in the House of Representatives and the Senate.</td>
</tr>
<tr>
<td></td>
<td>• Students will identify and describe the &quot;enumerated powers&quot; delegated to Congress (e.g., assess taxes, borrow money, declare war, make laws).</td>
</tr>
<tr>
<td></td>
<td>• Students will analyze the role of the legislative branch in terms of its relationship with the judicial and executive branch of the government.</td>
</tr>
</tbody>
</table>
|                         | • Students will describe constitutional amendments that changed the role of Congress from its original description in Article I of the U.S.
<table>
<thead>
<tr>
<th>Standards</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.CG.3.4:</td>
<td>Analyze the structures, functions and processes of the executive branch as described in Article II of the U.S. Constitution. Students will explain the qualifications one must have to seek the office of president and the process of presidential elections. Students will explain different presidential responsibilities outlined in Article II (e.g., receiving foreign heads of state, delivering the State of the Union address, carrying out faithful execution of the law). Students will examine the role of the executive branch in terms of its relationship with the judicial and legislative branches of the government. Students will describe constitutional amendments (i.e., 12th, 20th, 22nd and 25th) that have changed the role of the executive branch from its original description in Article II. Students will describe the impeachment process.</td>
</tr>
<tr>
<td>SS.912.CG.3.5:</td>
<td>Describe how independent regulatory agencies interact with the three branches of government and with citizens. Students will identify independent regulatory agencies (e.g., Federal Communications Commission, Federal Election Commission, National Labor Relations Board) and explain their purpose and effect. Students will describe the advantages and disadvantages of delegating power to independent regulatory agencies.</td>
</tr>
<tr>
<td>SS.912.CG.3.6:</td>
<td>Explain expressed, implied, concurrent and reserved powers in the U.S. Constitution. Students will identify powers that are expressed in the U.S. Constitution to Congress (e.g., coin money, declare war, assess taxes, citizenship). Students will identify expressed powers that are also known as enumerated powers found in Article I of the U.S. Constitution. Students will analyze the role of the “general welfare clause” and “necessary and proper clause” in granting Congress implied powers. Students will describe examples of concurrent powers as those powers shared by both state and national governments (e.g., build roads, tax citizens, make laws). Students will explain how reserved powers define issues as matters for the people or the state governments. Students will compare the roles of expressed, implied, concurrent and reserved powers in United States’ federalism.</td>
</tr>
<tr>
<td>SS.912.CG.3.7:</td>
<td>Analyze the structures, functions and processes of the judicial branch as described in Article III of the U.S. Constitution. Students will examine the role of the judicial branch in terms of its relationship with the legislative and executive branches of the government. Students will describe the role of the Supreme Court and lesser federal courts. Students will explain what Article III says about judicial tenure, appointment and salaries. Students will describe the powers delegated to the courts by Article III including, but not limited to, treason, jurisdiction and trial by jury.</td>
</tr>
<tr>
<td>SS.912.CG.3.8:</td>
<td>Describe the purpose and function of judicial review in the American constitutional government. Students will examine the role of district courts, the courts of appeals and the Supreme Court in the judicial review process. Students will explain the relationship between the concept of judicial review and the language of the Supremacy Clause in Article VI of the U.S. Constitution.</td>
</tr>
<tr>
<td>SS.912.CG.3.9:</td>
<td>Compare the role of state and federal judges with other elected officials. Students will compare the ways state and federal judges are appointed compared to other elected officials. Students will distinguish the qualifications needed for a judge at the state or federal level versus other elected officials. Students will compare the decision-making process of judges compared to other political figures.</td>
</tr>
<tr>
<td>SS.912.CG.3.10:</td>
<td>Analyze the levels and responsibilities of state and federal courts. Students will describe what Article III of the U.S. Constitution states about the relationship between state and federal courts. Students will recognize the role of the Federal Judiciary Act of 1789 in establishing the structure and jurisdiction of the federal court system. Students will contrast the differences among civil trials and criminal trials at the state level. Students will describe the relationship among the Supreme Court, federal appellate courts and federal district courts (e.g., Erie Doctrine, Rooker-Feldman Doctrine).</td>
</tr>
<tr>
<td>SS.912.CG.3.11:</td>
<td>Evaluate how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution. Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; McCulloch v. Maryland; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Miranda v. Arizona; Korematsu v. United States; Mapp v. Ohio; In re Gault; United States v. Nixon; Regents of the University of California v. Bakke; Hazelwood v. Kuhlmeier; District of Columbia v. Heller). Students will explain the foundational constitutional issues underlying landmark Supreme Court decisions related to the Bill of Rights and other amendments. Students will explain the outcomes of landmark Supreme Court cases related to the Bill of Rights and other amendments.</td>
</tr>
<tr>
<td>SS.912.CG.3.12:</td>
<td>Analyze the concept of federalism in the United States and its role in establishing the relationship between the state and national governments. Students will identify examples of the powers reserved and shared among state and the national governments in the American federal system of government. Students will examine the role the Great Compromise had on the eventual establishment of a federal system of fifty equal states. Students will explain specific rights that are granted to the states in the language of the U.S. Constitution and its amendments (e.g., 10th Amendment, defense and extradition). Students will analyze how states have challenged the national government regarding states’ rights (e.g., Civil War, the New Deal, No Child Left Behind, Affordable Health Care Act, Civil Rights Movement).</td>
</tr>
<tr>
<td>SS.912.CG.3.14:</td>
<td>Explain the judicial decision-making process in interpreting law at the state and national levels. Students will explain the role of the U.S. Constitution in interpreting law at the state and national levels. Students will explain the process used by judges at the state and national levels when making a decision or writing summary opinions. Students will incorporate language from the U.S. Constitution or court briefs to justify a legal decision when interpreting state or national law.</td>
</tr>
<tr>
<td>SS.912.CG.3.15:</td>
<td>Explain how citizens are affected by the local, state and national governments. Students will identify local government officials and employees who affect the daily lives of citizens. Students will identify the role of state governmental officials and employees who affect the daily lives of citizens. Students will identify the role of national governmental officials and employees who affect the daily lives of citizens. Students will explain how government at all levels impacts the daily lives of citizens.</td>
</tr>
<tr>
<td>SS.912.CG.4.3:</td>
<td>Explain how U.S. foreign policy supports democratic principles and protects human rights around the world. Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.</td>
</tr>
<tr>
<td>SS.912.E.2.2:</td>
<td>Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.</td>

</tbody>
</table>
Communicate mathematical ideas, vocabulary and methods effectively.
• Analyze the mathematical thinking of others.
• Compare the efficiency of a method to those expressed by others.
• Recognize errors and suggest how to correctly solve the task.
• Justify results by explaining methods and processes.
• Construct possible arguments based on evidence.

**Clarifications:**
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
• Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
• Create opportunities for students to discuss their thinking with peers.
• Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
• Develop students’ ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
• Focus on relevant details within a problem.
• Create plans and procedures to logically order events, steps or ideas to solve problems.
• Decompose a complex problem into manageable parts.
• Relate previously learned concepts to new concepts.
• Look for similarities among problems.
• Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
• Support students to develop generalizations based on the similarities found among problems.
• Provide opportunities for students to create plans and procedures to solve problems.
• Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:
• Estimate to discover possible solutions.
• Use benchmark quantities to determine if a solution makes sense.
• Check calculations when solving problems.
• Verify possible solutions by explaining the methods used.
• Evaluate results based on the given context.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:
• Have students estimate or predict solutions prior to solving.
• Prompt students to continually ask, “Does this solution make sense? How do you know?”
• Reinforce that students check their work as they progress within and after a task.
• Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:
• Connect mathematical concepts to everyday experiences.
• Use models and methods to understand, represent and solve problems.
• Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:
• Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
• Challenge students to question the accuracy of their models and methods.
• Support students as they validate conclusions by comparing them to the given situation.
• Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

**Clarifications:**
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
English language learners communicate for social and instructional purposes within the school setting.

ELA.K12.EE.3.1: Make inferences to support comprehension.

| Clarifications: | Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. |

ELA.K12.EE.4.1: Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

| Clarifications: | In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _______ because _______.” The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |

ELA.K12.EE.5.1: Use the accepted rules governing a specific format to create quality work.

| Clarifications: | Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. |

ELA.K12.EE.6.1: Use appropriate voice and tone when speaking or writing.

| Clarifications: | In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. |

ELD.K12.ELL.SS.1: English language learners communicate for social and instructional purposes within the school setting.

| Clarifications: | Students build on ideas, propel the conversation, and support claims and justifying their reasoning, refining and applying skills. In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |

ELD.K12.ELL.SS.5.1: English language learners communicate information, ideas and concepts for academic success in the content area of Social Studies.

| Clarifications: | Students build on ideas, propel the conversation, and support claims and justifying their reasoning, refining and applying skills. In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. |

HE.912.C.2.4: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

Law Studies - The grade 9-12 Law Studies course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content for the course pertains to the study of the American legal system as the foundation of American society by examining those laws which have an impact on citizens’ lives and an introduction to fundamental civil and criminal justice procedures. Content should include, but is not limited to, the need for law, the basis for our legal system, civil and criminal law, adult and juvenile courts, family and consumer law, causes and consequences of crime, individual rights and responsibilities, and career opportunities in the legal system.

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida’s B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

## Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.2</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</td>
</tr>
<tr>
<td>SS.912.A.1.3</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.4</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</td>
</tr>
<tr>
<td>SS.912.A.1.5</td>
<td>Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: <a href="http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf">http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf</a></td>
</tr>
<tr>
<td>SS.912.A.6.7</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.C.1.1</td>
<td>Describe the attempts to promote international justice through the Nuremberg Trials.</td>
</tr>
<tr>
<td>SS.912.C.1.2</td>
<td>Explain the compatibility of human rights with the principles of popular sovereignty, social contract, natural rights, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.1.3</td>
<td>Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.</td>
</tr>
<tr>
<td>SS.912.C.1.4</td>
<td>Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Experience the responsibilities of citizens at the local, state, or federal levels.</td>
</tr>
<tr>
<td>SS.912.C.2.3</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change.</td>
</tr>
<tr>
<td>SS.912.C.2.4</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.5</td>
<td>Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</td>
</tr>
<tr>
<td>SS.912.C.2.6</td>
<td>Evaluate, take, and defend positions about rights protected by the Constitution and Bill of Rights.</td>
</tr>
<tr>
<td>SS.912.C.2.7</td>
<td>Explain why rights have limits and are not absolute.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are speech, search and seizure, religion, gun possession.</td>
</tr>
<tr>
<td>SS.912.C.2.8</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are Preamble, Declaration of Independence, Constitution, Emancipation Proclamation, 13th, 14th, 15th, 19th, 24th, and 26th Amendments, Voting Rights Act of 1965.</td>
</tr>
<tr>
<td>SS.912.C.2.9</td>
<td>Explain the changing roles of television, radio, press, and Internet in political communication.</td>
</tr>
<tr>
<td>SS.912.C.2.10</td>
<td>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.</td>
</tr>
<tr>
<td>SS.912.C.2.11</td>
<td>Evaluate the origins and roles of political parties, interest groups, media, and individuals in determining and shaping public policy.</td>
</tr>
<tr>
<td>SS.912.C.2.12</td>
<td>Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights.</td>
</tr>
</tbody>
</table>
Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.

Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.

Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.

Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.

Simulate the judicial decision-making process in interpreting law at the state and federal level.

Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.

Evaluate the impact of Enlightenment ideas on the development of economic, political, and religious structures in the Western world.

Compare the philosophies of capitalism, socialism, and communism as described by Adam Smith, Robert Owen, and Karl Marx.

Evaluate the rise of authoritarian governments in the Soviet Union, Italy, Germany, and Spain, and analyze the policies and main ideas of Vladimir Lenin, Joseph Stalin, Benito Mussolini, Adolf Hitler, and Francisco Franco.

Analyze the restriction of individual rights and the use of mass terror against populations in the Soviet Union, Nazi Germany, and occupied territories.

Analyze cultural, historical, and economic factors and governmental policies that created the opportunities for ethnic cleansing or genocide in Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them.

Examine constitutional powers (expressed, implied, concurrent, reserved).

Examine how power and responsibility are distributed, shared, and limited by the Constitution.

Analyze how current events are explained by artistic and cultural trends of the past.

Analyze how historians use historical inquiry and other sciences to understand the past.

Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

Evaluate the role of identity in shaping identity and character.

Analyze the impact of judicial review in American constitutional government.

Identify the impact of independent regulatory agencies in the federal bureaucracy.

Compare the role of judges on the state and federal level with other elected officials.

Contrast how the Constitution safeguards and limits individual rights.

Evaluate the significance and outcomes of landmark Supreme Court cases.

Explain how historians use historical inquiry and other sciences to understand the past.

Analyze how current events are explained by artistic and cultural trends of the past.

Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

Explain how historians use historical inquiry and other sciences to understand the past.

Interpret population growth and other demographic data for any given place.

Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

Evaluate the role of history in shaping identity and character.

Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.

Explain how historians use historical inquiry and other sciences to understand the past.

Understand and apply the role of history in shaping identity and character.

Explain the role of history in shaping identity and character.

Describe the impact of and global response to international terrorism.

Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.

<tr>
<th>Standard Relation to Course: Supporting ★</th>
<th>MAFS.912.S-IC.2.6: Evaluate reports based on data. ★</th>
</tr>
</thead>
<tbody>
<tr>
<td>Clarifications:</td>
<td>Represent data with plots on the real number line (dot plots, histograms, and box plots). ★</td>
</tr>
<tr>
<td>Standard Relation to Course: Supporting</td>
<td>MAFS.912.S-ID.1.1: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★</td>
</tr>
<tr>
<td>Standard Relation to Course: Supporting</td>
<td>MAFS.912.S-ID.1.2: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★</td>
</tr>
<tr>
<td>Standard Relation to Course: Supporting</td>
<td>MAFS.912.S-ID.1.3: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★</td>
</tr>
<tr>
<td>Standard Relation to Course: Supporting</td>
<td>MAFS.K12.MP.1.1: Make sense of problems and persevere in solving them.</td>
</tr>
<tr>
<td>Make sense of problems and persevere in solving them.</td>
<td>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</td>
</tr>
<tr>
<td>Construct viable arguments and critique the reasoning of others.</td>
<td>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</td>
</tr>
<tr>
<td>Use appropriate tools strategically.</td>
<td>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</td>
</tr>
<tr>
<td>Attend to precision.</td>
<td>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</td>
</tr>
<tr>
<td>MAFS.K12.MP.6.1:</td>
<td>ELD.K12.ELL.SI.1: English language learners communicate for social and instructional purposes within the school setting.</td>
</tr>
<tr>
<td>Clarifications:</td>
<td>ELD.K12.ELL.SS.1: English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</td>
</tr>
<tr>
<td>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</td>
<td>HE.912.C.2.4: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</td>
</tr>
</tbody>
</table>

General Course Information and Notes
GENERAL NOTES

International Law – The grade 9-12 International Law course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content for the course pertains to the analysis and comparison of the different legal and political concepts, systems, and operations across countries and ideologies; how these structures affect international relations, and how legal disputes between countries are settled. Content should include, but is not limited to, the comparison of major political ideologies (communism, fascism, socialism, and democracy) from historical and ideological perspectives, an evaluation of the fundamental characteristics of legal and governmental systems throughout the world emphasizing specific elements of constitutionalism including: rule of law, the rights of the people, the separation and sharing of powers, an independent judiciary with the power of judicial or constitutional review, the role and function of government and the citizen in each system, the nation-state system, the need for laws, adversarial versus inquisitorial systems of justice, and the role and function of the international court system.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies
Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

</table>
Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.

Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.

Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.

Identify the impact of independent regulatory agencies in the federal bureaucracy.

Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.

Describe the role of judicial review in American constitutional government.

Compare the philosophies of capitalism, socialism, and communism as described by Adam Smith, Robert Owen, and Karl Marx.

Contrast how the Constitution safeguards and limits individual rights.

Describe the impact of international terrorism.

Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them.

Evaluate the significance and outcomes of landmark Supreme Court cases.

Contrast how the Constitution safeguards and limits individual rights.

Analyze the problem in a way that makes sense given the task.

Ask questions that will help with solving the task.
• Build perseverance by modifying methods as needed while solving a challenging task.
• Stay engaged and maintain a positive mindset when working to solve tasks.
• Help and support each other when attempting a new method or approach.

MA.K12.MTR.1.1:

 Clarifications:
Teachers who encourage students to participate actively in effortful learning both individually and with others:
• Cultivate a community of growth mindset learners.
• Foster perseverance in students by choosing tasks that are challenging.
• Develop students’ ability to analyze and problem solve.
• Recognize students’ effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:
• Build understanding through modeling and using manipulatives.
• Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
• Progress from modeling problems with objects and drawings to using algorithms and equations.
• Express connections between concepts and representations.
• Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1:

 Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
• Help students make connections between concepts and representations.
• Provide opportunities for students to use manipulatives when investigating concepts.
• Guide students from concrete to pictorial to abstract representations as understanding progresses.
• Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:
• Select efficient and appropriate methods for solving problems within the given context.
• Maintain flexibility and accuracy while performing procedures and mental calculations.
• Complete tasks accurately and with confidence.
• Adapt procedures to apply them to a new context.
• Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

 Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:
• Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
• Offer multiple opportunities for students to practice efficient and generalizable methods.
• Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
• Communicate mathematical ideas, vocabulary and methods effectively.
• Analyze the mathematical thinking of others.
• Compare the efficiency of a method to those expressed by others.
• Recognize errors and suggest how to correctly solve the task.
• Justify results by explaining methods and processes.
• Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

 Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
• Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
• Create opportunities for students to discuss their thinking with peers.
• Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
• Develop students’ ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
• Focus on relevant details within a problem.
• Create plans and procedures to logically order events, steps or ideas to solve problems.
• Decompose a complex problem into manageable parts.
• Relate previously learned concepts to new concepts.
• Look for similarities among problems.
• Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

 Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
• Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
• Support students to develop generalizations based on the similarities found among problems.
• Provide opportunities for students to create plans and procedures to solve problems.
• Develop students’ ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:
• Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students’ ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

**Clarifications:**
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

**Clarifications:**
See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

**Clarifications:**
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clarifications:**
In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think ______ because _______.” The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

Use the accepted rules governing a specific format to create quality work.

**Clarifications:**
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

Use appropriate voice and tone when speaking or writing.

**Clarifications:**
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

**Clarifications:**
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

English language learners communicate for social and instructional purposes within the school setting.

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

**Clarifications:**
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.
GENERAL NOTES

International Law - The grade 9-12 International Law course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content for the course pertains to the analysis and comparison of the different legal and political concepts, systems, and operations across countries and ideologies; how these structures affect international relations, and how legal disputes between countries are settled. Content should include, but is not limited to, the comparison of major political ideologies (communism, fascism, socialism, and democracy) from historical and ideological perspectives, an evaluation of the fundamental characteristics of legal and governmental systems throughout the world emphasizing specific elements of constitutionalism including: rule of law, the rights of the people, the separation and sharing of powers, an independent judiciary with the power of judicial or constitutional review, the role and function of government and the citizen in each system, the nation-state system, the need for laws, adversarial versus inquisitorial systems of justice, and the role and function of the international court system.

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida’s B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

GENERAL INFORMATION

Course Number: 2106355
Number of Credits: Half credit (.5)
Course Type: Elective Course
Course Status: State Board Approved
Grade Level(s): 9,10,11,12

Course Path: Sections: Grades PreK to 12 Education
Courses > Grade Group: Grades 9 to 12 and Adult
Education Courses > Subject: Social Studies >
SubSubject: Political Sciences >
Abbreviated Title: INTL LAW
Course Length: Semester (S)
Course Level: 2

Educator Certifications
Political Science (Grades 6-12)
Social Science (Grades 6-12)
Law (Secondary Grades 7-12)
### International Law (#2106355) 2023 - And Beyond

#### Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
</tbody>
</table>
| SS.912.A.1.2: | Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.  
**Clarifications:** Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection. |
| SS.912.A.1.3: | Utilize timelines to identify the time sequence of historical data. |
| SS.912.A.1.4: | Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.  
**Clarifications:** Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. |
| SS.912.A.1.5: | Use case studies to explore social, political, legal, and economic relationships in history.  
**Clarifications:** Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf |
| SS.912.A.1.6: | Define and describe compromises made during the Constitutional Convention.  
**Clarifications:** This benchmark is annually evaluated on the United States History End-of-Course Assessment Test. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.1.7: | Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.  
**Clarifications:** Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War. |
| SS.912.A.1.8: | Explain the influence of Enlightenment ideas on the Declaration of Independence.  
- Students will participate in classroom activities that simulate exercising the responsibilities of citizenship.  
- Students will explain national sovereignty, due process of law, individual rights, natural rights, popular sovereignty, and unalienable rights of life, liberty and property as they relate to Enlightenment ideas in the Declaration of Independence.  
- Students will recognize that national sovereignty, due process of law, natural law, self-evident truth, equality of all persons, limited government, popular sovereignty, and unalienable rights of life, liberty and property form the philosophical foundation of our government. |
| SS.912.CG.1.2: | Analyze how the ideals and principles expressed in the founding documents shape America as a constitutional republic.  
- Students will participate in classroom activities that simulate exercising the responsibilities of citizenship.  
- Students will identify key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason). |
| SS.912.CG.1.4: | Explain how the U.S. Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers.  
- Students will participate in classroom activities that simulate exercising the responsibilities of citizenship.  
- Students will describe compromises made during the Constitutional Convention (e.g., the Great Compromise, the Three-Fifths Compromise, the Electoral College). |
| SS.912.CG.1.6: | Explain the responsibilities of citizens at the local, state and national levels.  
- Students will participate in classroom activities that simulate exercising the responsibilities of citizenship.  
- Students will examine situations when individuals' rights have been restricted for the public good (e.g., limits on speech or rationing of goods) |

---

Additional resources and clarifications are available on the FLDOE Social Studies website and in the Item Specifications pages 40-42. Students should consult these resources for a comprehensive understanding of the course standards.
SS.912.CG.2.4: during wartime, enactment of the Patriot Act).
- Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good.
- Students will explain different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response).

SS.912.CG.2.5: Analyze contemporary and historical examples of government-imposed restrictions on rights.
- Students will identify historical examples of government-imposed restrictions on rights (e.g., suspension of habeas corpus, rationing during wartime and limitations on speech).
- Students will examine the rationale for government-imposed restrictions on rights (e.g., inciting a crime, campaign contributions, defamation, military secrets).

SS.912.CG.2.6: Explain how the principles contained in foundational documents contributed to the expansion of civil rights and liberties over time.
- Students will explain how different groups of people (e.g., African Americans, immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman's desegregation of the army, Lincoln's Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault).
- Students will explain the role founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights.

SS.912.CG.2.7: Analyze the impact of civic engagement as a means of preserving or reforming institutions.
- Students will identify legal methods that citizens can use to promote social and political change (e.g., voting, peaceful protests, petitioning, demonstrations, contacting government offices).
- Students will identify historical examples of citizens achieving or preventing political and social change through civic engagement (e.g., the Abolitionist Movement).

SS.912.CG.2.8: Explain the impact of political parties, interest groups, media and individuals on determining and shaping public policy.
- Students will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy.
- Students will identify historical examples of interest groups, media and individuals influencing public policy.
- Students will compare and contrast how the free press influenced politics at major points in U.S. history (e.g., Vietnam War Era, Civil Rights Era).

SS.912.CG.2.11: Evaluate political communication for bias, factual accuracy, omission and emotional appeal.
- Students will compare the reporting on the same political event or issue from multiple perspectives.
- Students will identify various forms of propaganda (e.g., plain folk, glittering generalities, testimonial, fear, logical fallacies).
- Students will discuss the historical impact of political communication on American political process and public opinion.
- Examples of political communication may include, but are not limited to, political cartoons, propaganda, campaign advertisements, political speeches, bumper stickers, blogs, press and social media.

SS.912.CG.2.13: Analyze the influence and effects of various forms of media and the internet in political communication.
- Students will explain how the methods of political communication has changed over time (e.g., television, radio, press, social media).
- Students will describe how the methods used by political officials to communicate with the public has changed over time.
- Students will discuss the strengths and weaknesses of different methods of political communication.

SS.912.CG.3.1: Analyze how certain political ideologies conflict with the principles of freedom and democracy.
- Students will identify political ideologies that conflict with the principles of freedom and democracy (e.g., communism and totalitarianism).
- Students will analyze how the principles of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers contribute to the nation's longevity and its ability to overcome challenges, and distinguish the United States' constitutional republic from authoritarian and totalitarian nations.

SS.912.CG.3.2: Explain how the U.S. Constitution safeguards and limits individual rights.
- Students will identify the individual rights protected by the U.S. Constitution, the Bill of Rights and other constitutional amendments.
- Students will describe the role of the Supreme Court in further defining the safeguards and limits of constitutional rights.

SS.912.CG.3.3: Analyze the structures, functions and processes of the legislative branch as described in Article I of the U.S. Constitution.
- Students will explain why Article I of the U.S. Constitution established a bicameral legislative body and how the House of Representatives functions differently from the Senate.
- Students will identify the methods for determining the number of members in the House of Representatives and the Senate.
- Students will identify and describe the "enumerated powers" delegated to Congress (e.g., assess taxes, borrow money, declare war, make laws).
- Students will analyze the role of the legislative branch in terms of its relationship with the judicial and executive branch of the government.
- Students will describe constitutional amendments that changed the role of Congress from its original description in Article I of the U.S. Constitution (i.e., 10th, 14th, 16th, 17th and 27th Amendments).

SS.912.CG.3.4: Analyze the structures, functions and processes of the executive branch as described in Article II of the U.S. Constitution.
- Students will explain the qualifications one must have to seek the office of president and the process of presidential elections.
- Students will explain different presidential responsibilities outlined in Article II (e.g., receiving foreign heads of state, delivering the State of the Union address, carrying out faithful execution of the law).
- Students will examine the role of the executive branch in terms of its relationship with the judicial and legislative branches of the government.
- Students will describe constitutional amendments (i.e., 12th, 20th, 22nd and 25th) that have changed the role of the executive branch from its original description in Article II.
- Students will describe the impeachment process.

SS.912.CG.3.5: Describe how independent regulatory agencies interact with the three branches of government and with citizens.
- Students will identify independent regulatory agencies (e.g., Federal Communications Commission, Federal Election Commission, National Labor Relations Board) and explain their purpose and effect.
- Students will describe the advantages and disadvantages of delegating power to independent regulatory agencies.

SS.912.CG.3.6: Explain expressed, implied, concurrent and reserved powers in the U.S. Constitution.
- Students will identify powers that are expressed in the U.S. Constitution to Congress (e.g., coin money, declare war, assess taxes, citizenship).
- Students will identify that expressed powers are also known as enumerated powers found in Article I of the U.S. Constitution.
- Students will analyze the role of the "general welfare clause" and "necessary and proper clause" in granting Congress implied powers.
- Students will describe examples of concurrent powers as those powers shared by both state and national governments (e.g., build roads, tax
Students will explain how reserved powers define issues as matters for the people or the state governments.
Students will explain how reserved powers define issues as matters for the people or the state governments.

SS.912.CG.3.7: Analyze the structures, functions and processes of the judicial branch as described in Article III of the U.S. Constitution.
Students will analyze the role of the judicial branch in terms of its relationship with the legislative and executive branches of the government.
Students will analyze the role of the Supreme Court and lesser federal courts.
Students will explain what Article III says about judicial tenure, appointment and salaries.
Students will describe the powers delegated to the courts by Article III including, but not limited to, treason, jurisdiction and trial by jury.

SS.912.CG.3.8: Describe the purpose and function of judicial review in the American constitutional government.
Students will examine the role of district courts, the courts of appeals and the Supreme Court in the judicial review process.
Students will explain the relationship between the concept of judicial review and the language of the Supremacy Clause in Article VI of the U.S. Constitution.

SS.912.CG.3.9: Compare the role of state and federal judges with other elected officials.
Students will compare the ways state and federal judges are appointed compared to other elected officials.
Students will distinguish the qualifications needed for a judge at the state or federal level versus other elected officials.
Students will compare the decision-making process of judges compared to other political figures.

SS.912.CG.3.10: Analyze the levels and responsibilities of state and federal courts.
Students will describe what Article III of the U.S. Constitution states about the relationship between state and federal courts.
Students will recognize the role of the Federal judiciary Act of 1789 in establishing the structure and jurisdiction of the federal court system.
Students will contrast the differences among civil trials and criminal trials at the state level.
Students will describe the relationship among the Supreme Court, federal appellate courts and federal district courts (e.g., Erie Doctrine, Rooker-Feldman Doctrine).

SS.912.CG.3.11: Evaluate how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution.
Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; McCulloch v. Maryland; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; Korematsu v. United States; Mapp v. Ohio; In re Gault; United States v. Nixon; Regents of the University of California v. Bakke; Hazelwood v. Kuhlmeier; District of Columbia v. Heller).
Students will explain the foundational constitutional issues underlying landmark Supreme Court decisions related to the Bill of Rights and other amendments.
Students will explain the outcomes of landmark Supreme Court cases related to the Bill of Rights and other amendments.

SS.912.CG.3.12: Analyze the concept of federalism in the United States and its role in establishing the relationship between the state and national governments.
Students will identify examples of the powers reserved and shared among state and the national governments in the American federal system of government.
Students will examine the role the Great Compromise had on the eventual establishment of a federal system of fifty equal states.
Students will explain specific rights that are granted to the states in the language of the U.S. Constitution and its amendments (e.g., 10th Amendment, defense and extradition).
Students will analyze how states have challenged the national government regarding states’ rights (e.g., Civil War, the New Deal, No Child Left Behind, Affordable Health Care Act, Civil Rights Movement).

SS.912.CG.3.13: Explain the judicial decision-making process in interpreting law at the state and national levels.
Students will explain the role of the U.S. Constitution in interpreting law at the state and national levels.
Students will explain the process used by judges at the state and national levels when making a decision or writing summary opinions.
Students will incorporate language from the U.S. Constitution or court briefs to justify a legal decision when interpreting state or national law.

SS.912.CG.3.14: Explain how citizens are affected by the local, state and national governments.
Students will identify local government officials and employees who affect the daily lives of citizens.
Students will identify the role of state governmental officials and employees who affect the daily lives of citizens.
Students will identify the role of national governmental officials and employees who affect the daily lives of citizens.
Students will explain how government at all levels impacts the daily lives of citizens.

SS.912.CG.4.3: Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.
Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.

SS.912.E.2.2: Use a decision-making model to analyze a public policy issue affecting the student’s community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.

SS.912.G.1.2: Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

SS.912.G.1.4: Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

SS.912.G.4.1: Interpret population growth and other demographic data for any given place.

SS.912.H.1.6: Analyze how current events are explained by artistic and cultural trends of the past.

SS.912.W.1.1: Use timelines to establish cause and effect relationships of historical events.

Compare time measurement systems used by different cultures.

SS.912.W.1.2: Interpret and evaluate primary and secondary sources.

SS.912.W.1.3: Explain how historians use historical inquiry and other sciences to understand the past.

SS.912.W.1.4: Extend of
Evaluate the role of history in shaping identity and character.

SS.912.W.1.6: **Clarifications:**
Examples are archaeology, economics, geography, forensic chemistry, political science, physics.

SS.912.W.2.18: **Clarifications:**
Examples are Magna Carta, parliament, habeas corpus.

SS.912.W.5.4: Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.

SS.912.W.6.3: Compare the philosophies of capitalism, socialism, and communism as described by Adam Smith, Robert Owen, and Karl Marx.

SS.912.W.7.5: Describe the rise of authoritarian governments in the Soviet Union, Italy, Germany, and Spain, and analyze the policies and main ideas of Vladimir Lenin, Joseph Stalin, Benito Mussolini, Adolf Hitler, and Francisco Franco.

SS.912.W.7.6: Analyze the restriction of individual rights and the use of mass terror against populations in the Soviet Union, Nazi Germany, and occupied territories.

SS.912.W.9.3: **Clarifications:**
Examples are prejudice, racism, stereotyping, economic competition.

SS.912.W.9.7: Describe the impact of and global response to international terrorism.

SS.912.W.9.3: **Clarifications:**
Examples are Magna Carta, parliament, habeas corpus.

Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students’ ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**MA.K12.MTR.5.1:**

**Clarifications:**

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students’ ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**MA.K12.MTR.6.1:**

**Clarifications:**

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students’ ability to verify solutions through justifications.

Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

**MA.K12.MTR.7.1:**

**Clarifications:**

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

**ELA.K12.EE.1.1:**

**Clarifications:**

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

**ELA.K12.EE.2.1:**

Read and comprehend grade-level complex texts proficiently.

**Clarifications:**

See Text Complexity for grade-level complexity bands and a text complexity rubric.

**ELA.K12.EE.3.1:**

Make inferences to support comprehension.

**Clarifications:**

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clarifications:**

In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _______ because _______.” The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

**ELA.K12.EE.5.1:**
Use the accepted rules governing a specific format to create quality work.

**Clarifications:**
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

**ELA.K12.EE.6.1:**
Use appropriate voice and tone when speaking or writing.

**Clarifications:**
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

**ELD.K12.ELL.SS.1:**
English language learners communicate information, ideas and concepts for academic success in the content area of Social Studies.

**HE.912.C.2.4:**
Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

**Clarifications:**
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

### General Course Information and Notes

**GENERAL NOTES**

**International Law** – The grade 9-12 International Law course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content for the course pertains to the analysis and comparison of the different legal and political concepts, systems, and operations across countries and ideologies; how these structures affect international relations, and how legal disputes between countries are settled. Content should include, but is not limited to, the comparison of major political ideologies (communism, fascism, socialism, and democracy) from historical and ideological perspectives, an evaluation of the fundamental characteristics of legal and governmental systems throughout the world emphasizing specific elements of constitutionalism including: rule of law; the rights of the people, the separation and sharing of powers, an independent judiciary with the power of judicial or constitutional review, the role and function of government and the citizen in each system, the nation-state system, the need for laws, adversarial versus inquisitorial systems of justice, and the role and function of the international court system.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students’ content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida’s Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida’s B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

### GENERAL INFORMATION

- **Course Number:** 2106355
- **Course Type:** Elective Course
- **Course Status:** Draft - Course Pending Approval
- **Grade Levels:** 9,10,11,12
- **Course Path:** Section: Grades PreK to 12 Education
  Courses >> Grade Group: Grades 9 to 12 and Adult
  Education Courses >> Subject: Social Studies >> SubSubject: Political Sciences >>
- **Abbreviated Title:** INTL LAW
- **Number of Credits:** Half credit (.5)
- **Course Length:** Semester (S)
- **Course Level:** 2

## Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.2:</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. <strong>Clarifications:</strong> Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</td>
</tr>
<tr>
<td>SS.912.A.1.3:</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.4:</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past. Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. <strong>Clarifications:</strong> Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: <a href="http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf">http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf</a></td>
</tr>
<tr>
<td>SS.912.A.1.5:</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history. Describe the attempts to promote international justice through the Nuremberg Trials.</td>
</tr>
<tr>
<td>SS.912.A.1.6:</td>
<td>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East. <strong>Clarifications:</strong> This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.C.1.1:</td>
<td>Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.1.2:</td>
<td>Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.1.3:</td>
<td>Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.</td>
</tr>
<tr>
<td>SS.912.C.1.5:</td>
<td>Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism. Experience the responsibilities of citizens at the local, state, or federal levels. <strong>Clarifications:</strong> Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</td>
</tr>
<tr>
<td>SS.912.C.2.3:</td>
<td>Evaluate, take, and defend positions about rights protected by the Constitution and Bill of Rights.</td>
</tr>
<tr>
<td>SS.912.C.2.4:</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change. <strong>Clarifications:</strong> Examples are speech, search and seizure, religion, gun possession.</td>
</tr>
<tr>
<td>SS.912.C.2.5:</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents. <strong>Clarifications:</strong> Examples are Preamble, Declaration of Independence, Constitution, Emancipation Proclamation, 13th, 14th, 15th, 19th, 24th, and 26th Amendments; Voting Rights Act of 1965.</td>
</tr>
<tr>
<td>SS.912.C.2.12:</td>
<td>Evaluate the changing roles of television, radio, press, and Internet in political communication.</td>
</tr>
<tr>
<td>SS.912.C.2.13:</td>
<td>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal. <strong>Clarifications:</strong> Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media.</td>
</tr>
<tr>
<td>SS.912.C.2.15:</td>
<td>Evaluate the origins and roles of political parties, interest groups, media, and individuals in determining and shaping public policy.</td>
</tr>
<tr>
<td>SS.912.C.3.1:</td>
<td>Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights.</td>
</tr>
</tbody>
</table>
Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.

Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.

Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.

Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.

Examine constitutional powers (expressed, implied, concurrent, reserved).

Analyze how current events are explained by artistic and cultural trends of the past.

Evaluate the impact of Enlightenment ideals on the development of democratic institutions and procedures.

Evaluate the role of history in shaping identity and character.

Identify the impact of independent regulatory agencies in the federal bureaucracy.

Compare the role of judges on the state and federal level with other elected officials.

Simulate the judicial decision-making process in interpreting law at the state and federal level.

Contrast how the Constitution safeguards and limits individual rights.

Describe the rise of authoritarian governments in the Soviet Union, Nazi Germany, and occupied territories.

Assess human rights policies of the United States and other countries.

Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.

Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.

Interpret population growth and other demographic data for any given place.

Simulate the judicial decision-making process in interpreting law at the state and federal level.

Assess the extent to which the reasoning and evidence in a text support the author's claims.

Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.

Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others’ ideas and expressing their own clearly and persuasively.
a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.

b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.

c. Propose conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.

d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

<table>
<thead>
<tr>
<th>LAFS.910.SL.1.2:</th>
<th>Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAFS.910.SL.1.3:</td>
<td>Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.</td>
</tr>
<tr>
<td>LAFS.910.SL.2.4:</td>
<td>Write arguments focused on discipline-specific content.</td>
</tr>
<tr>
<td>LAFS.910.WHST.1.1:</td>
<td>Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes.</td>
</tr>
<tr>
<td>LAFS.910.WHST.1.2:</td>
<td>Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant.</td>
</tr>
<tr>
<td>LAFS.910.WHST.2.5:</td>
<td>Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.</td>
</tr>
<tr>
<td>LAFS.910.WHST.4.10:</td>
<td>Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.</td>
</tr>
<tr>
<td>MAFS.912.S-ID.1.1:</td>
<td>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.</td>
</tr>
<tr>
<td>MAFS.912.S-ID.1.2:</td>
<td>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.</td>
</tr>
</tbody>
</table>

| LAFS.910.WHST.1.1: | Write arguments focused on discipline-specific content. |
| LAFS.910.WHST.1.2: | Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes. |

General Course Information and Notes

**GENERAL NOTES**

**Comparative Political Systems** - The grade 9-12 Comparative Political Systems course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content for the course pertains to the study of the major political systems of the world and compare and contrast their operation with the American democratic system. Content should include, but is not limited to, the comparison of major political ideologies (communism, fascism, socialism, and democracy) from historical and ideological perspectives and the role and function of the government and the citizen in each political system.

**Mathematics Benchmark Guidance** - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer,
complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Literacy Standards in Social Studies**

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. </tbody>
</table>
Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.

Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.

Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.

Identify the impact of independent regulatory agencies in the federal bureaucracy.

Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them.

Determine the role of judicial review in American constitutional government.

Examine how power and responsibility are distributed, shared, and limited by the Constitution.

Simulate the judicial decision-making process in interpreting law at the state and federal level.

Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.

Identify the impact of independent regulatory agencies in the federal bureaucracy.

Compare the role of judges on the state and federal level with other elected officials.

Compare the role of judges on the state and federal level with other elected officials.

Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.

Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.

Explain how historians use historical inquiry and other sciences to understand the past.

Evaluate the role of history in shaping identity and character.

Interpret and evaluate primary and secondary sources.

Evaluate the role of history in shaping identity and character.

Compare time measurement systems used by different cultures.

Compare time measurement systems used by different cultures.

Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.

Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.

Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Mathematicians who demonstrate understanding by representing problems in multiple ways.
Build understanding through modeling and using manipulatives.
Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
Progress from modeling problems with objects and drawings to using algorithms and equations.
Express connections between concepts and representations.
Choose a representation based on the given context or purpose.

### Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

### Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

### Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

### Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

### Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
### General Course Information and Notes

**Comparative Political Systems** - The grade 9-12 Comparative Political Systems course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content for the course pertains to the study of the major political systems of the world and compare and contrast their operation with the American democratic system. Content should include, but is not limited to, the comparison of major political ideologies (communism, fascism, socialism, and democracy) from historical and ideological perspectives and the role and function of the government and the citizen in each political system.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

#### MA.K12.MTR.7.1:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**

Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

#### MA.K12.MTR.7.1:
Cite evidence to explain and justify reasoning.

**Clarifications:**

- K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
- 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
- 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
- 6-8 Students continue with previous skills and use a style guide to create a proper citation.
- 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

#### ELA.K12.EE.1.1:
Read and comprehend grade-level complex texts proficiently.

**Clarifications:**

See Text Complexity for grade-level complexity bands and a text complexity rubric.

#### ELA.K12.EE.2.1:
Make inferences to support comprehension.

**Clarifications:**

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

#### ELA.K12.EE.3.1:
Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clarifications:**

In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _______ because _______." The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

#### ELA.K12.EE.4.1:
Use the accepted rules governing a specific format to create quality work.

**Clarifications:**

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

#### ELA.K12.EE.5.1:
Use appropriate voice and tone when speaking or writing.

**Clarifications:**

In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

#### ELD.K12.EL.5.1:
English language learners communicate for social and instructional purposes within the school setting.

**Clarifications:**

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

#### HE.912.C.2.4:
Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

**Clarifications:**

Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.
1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

</thead>
<tbody>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
</tbody>
</table>
| SS.912.A.1.2:          | Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.  
**Clariifications:** Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection. |
| SS.912.A.1.3:          | Utilize timelines to identify the time sequence of historical data.                                                                                                                                          |
| SS.912.A.1.4:          | Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.  
**Clariifications:** Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. |
| SS.912.A.1.5:          | Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf |
| SS.912.A.1.6:          | Use case studies to explore social, political, legal, and economic relationships in history.                                                                                                                  |
| SS.912.A.6.7:          | This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.7.11:         | Explain the influence of Enlightenment ideas on the Declaration of Independence.  
- Students will identify grievances listed in the Declaration of Independence in terms of due process of law, individual rights, popular sovereignty and social contract.  
- Students will explain national sovereignty, natural law, self-evident truth, equality of all persons, due process of law, limited government, popular sovereignty, and unalienable rights of life, liberty and property as they relate to Enlightenment ideas in the Declaration of Independence.  
- Students will recognize that national sovereignty, due process of law, natural law, self-evident truth, equality of all persons, limited government, popular sovereignty, and unalienable rights of life, liberty and property form the philosophical foundation of our government. |
| SS.912.CG.1.2:         | Students will explain the ideals and principles expressed in the founding documents that shape America as a constitutional republic.  
- Students will differentiate among the documents and determine how each one was individually significant to the founding of the United States.  
- Students will evaluate how the documents are connected to one another.  
- Documents include, but are not limited to, the Declaration of Independence, Articles of Confederation, Federalist Papers (e.g., No. 10. No. 14, No. 31, No. 39, No. 51) and the U.S. Constitution.  
- Students will identify key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason). |
| SS.912.CG.1.4:         | Analyze how the principles of the U.S. Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers.  
- Students will explain the structure and function of the U.S. government reflects these political principles.  
- Students will differentiate between republicanism and democracy, and discuss how the United States reflects both.  
- Students will describe compromises made during the Constitutional Convention (e.g., the Great Compromise, the Three-Fifths Compromise, the Electoral College). |
| SS.912.CG.1.5:         | Students will explain various responsibilities held by citizens (e.g., voting, volunteering and being informed, respecting laws).  
- Students will understand the process of registering or preregistering to vote and how to complete a ballot in Florida (e.g., uniform primary and general election ballot).  
- Students will discuss appropriate methods of communication with public officials (e.g., corresponding, attending public meetings, requesting a meeting and providing information).  
- Students will participate in classroom activities that simulate exercising the responsibilities of citizenship. |
| SS.912.CG.2.3:         | Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the public good.  
- Students will examine situations when individual rights have been restricted for the public good (e.g., limits on speech or rationing of goods |

Additional resources may be found on FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.CG.2.4: during wartime, enactment of the Patriot Act).
- Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good.
- Students will explain different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response).

SS.912.CG.2.5: Analyze contemporary and historical examples of government-imposed restrictions on rights.
- Students will identify historical examples of government-imposed restrictions on rights (e.g., suspension of habeas corpus, rationing during wartime and limitations on speech).
- Students will examine the rationale for government-imposed restrictions on rights (e.g., inciting a crime, campaign contributions, defamation, military secrets).

SS.912.CG.2.6: Explain how the principles contained in foundational documents contributed to the expansion of civil rights and liberties over time.
- Students will explain how different groups of people (e.g., African Americans, immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman's desegregation of the army, Lincoln's Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault).
- Students will explain the role founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights.

SS.912.CG.2.7: Analyze the impact of civic engagement as a means of preserving or reforming institutions.
- Students will identify legal methods that citizens can use to promote social and political change (e.g., voting, peaceful protests, petitioning, demonstrations, contacting government offices).
- Students will identify historical examples of citizens achieving or preventing political and social change through civic engagement (e.g., the Abolitionist Movement).

SS.912.CG.2.8: Explain the impact of political parties, interest groups, media and individuals on determining and shaping public policy.
- Students will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy.
- Students will compare and contrast how the free press influenced politics at major points in U.S. history (e.g., Vietnam War Era, Civil Rights Era).

SS.912.CG.2.11: Evaluate political communication for bias, factual accuracy, omission and emotional appeal.
- Students will compare the reporting on the same political event or issue from multiple perspectives.
- Students will discuss the historical impact of political communication on American political process and public opinion.
- Examples of political communication may include, but are not limited to, political cartoons, propaganda, campaign advertisements, political speeches, bumper stickers, blogs, press and social media.

SS.912.CG.2.13: Analyze the influence and effects of various forms of media and the internet in public communication.
- Students will explain how the methods of political communication has changed over time (e.g., television, radio, press, social media).
- Students will describe how the methods used by political officials to communicate with the public has changed over time.
- Students will discuss the strengths and weaknesses of different methods of political communication.

SS.912.CG.3.1: Analyze how certain political ideologies conflict with the principles of freedom and democracy.
- Students will identify political ideologies that conflict with the principles of freedom and democracy (e.g., communism and totalitarianism).
- Students will analyze how the principles of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republican use of law and separation of powers contribute to the nation's longevity and its ability to overcome challenges, and distinguish the United States' constitutional republic from authoritarian and totalitarian nations.

SS.912.CG.3.2: Explain how the U.S. Constitution safeguards and limits individual rights.
- Students will identify the individual rights protected by the U.S. Constitution, the Bill of Rights and other constitutional amendments.
- Students will describe the role of the Supreme Court in further defining the safeguards and limits of constitutional rights.

SS.912.CG.3.3: Anayze the structures, functions and processes of the legislative branch as described in Article I of the U.S. Constitution.
- Students will explain why Article I of the U.S. Constitution established a bicameral legislative body and how the House of Representatives functions differently from the Senate.
- Students will identify the methods for determining the number of members in the House of Representatives and the Senate.
- Students will identify and describe the "enumerated powers" delegated to Congress (e.g., assess taxes, borrow money, declare war, make laws).
- Students will analyze the role of the legislative branch in terms of its relationship with the judicial and executive branch of the government.
- Students will describe constitutional amendments that changed the role of Congress from its original description in Article I of the U.S. Constitution (i.e., 10th, 14th, 16th, 17th and 27th Amendments).

SS.912.CG.3.4: Analyze the structures, functions and processes of the executive branch as described in Article II of the U.S. Constitution.
- Students will explain the qualifications one must have to seek the office of president and the process of presidential elections.
- Students will explain different presidential responsibilities outlined in Article II (e.g., receiving foreign heads of state, delivering the State of the Union address, carrying out faithful execution of the law).
- Students will examine the role of the executive branch in terms of its relationship with the judicial and legislative branches of the government.
- Students will describe constitutional amendments (i.e., 12th, 20th, 22nd and 25th) that have changed the role of the executive branch from its original description in Article II.
- Students will describe the impeachment process.

SS.912.CG.3.5: Describe how independent regulatory agencies interact with the three branches of government and with citizens.
- Students will identify independent regulatory agencies (e.g., Federal Communications Commission, Federal Election Commission, National Labor Relations Board) and explain their purpose and effect.
- Students will describe the advantages and disadvantages of delegating power to independent regulatory agencies.

SS.912.CG.3.6: Explain expressed, implied, concurrent and reserved powers in the U.S. Constitution.
- Students will identify powers that are expressed in the U.S. Constitution to Congress (e.g., coin money, declare war, assess taxes, citizenship).
- Students will identify that expressed powers are also known as enumerated powers found in Article I of the U.S. Constitution.
- Students will analyze the role of the "general welfare clause" and "necessary and proper clause" in granting Congress implied powers.
- Students will describe examples of concurrent powers as those powers shared by both state and national governments (e.g., build roads, tax
- Students will explain how reserved powers define issues as matters for the people or the state governments.
- Students will compare the roles of expressed, implied, concurrent and reserved powers in United States' federalism.

**SS.912.CG.3.7:** Analyze the structures, functions and processes of the judicial branch as described in Article III of the U.S. Constitution.
- Students will examine the role of the judicial branch in terms of its relationship with the legislative and executive branches of the government.
- Students will describe the role of the Supreme Court and lesser federal courts.
- Students will explain what Article III says about judicial tenure, appointment and salaries.
- Students will describe the powers delegated to the courts by Article III including, but not limited to, treason, jurisdiction and trial by jury.

**SS.912.CG.3.8:** Describe the purpose and function of judicial review in the American constitutional government.
- Students will examine the role of district courts, the courts of appeals and the Supreme Court in the judicial review process.
- Students will explain the relationship between the concept of judicial review and the language of the Supremacy Clause in Article VI of the U.S. Constitution.

**SS.912.CG.3.9:** Compare the role of state and federal judges with other elected officials.
- Students will compare the ways state and federal judges are appointed compared to other elected officials.
- Students will distinguish the qualifications needed for a judge at the state or federal level versus other elected officials.
- Students will compare the decision-making process of judges compared to other political figures.

**SS.912.CG.3.10:** Analyze the levels and responsibilities of state and federal courts.
- Students will describe what Article III of the U.S. Constitution states about the relationship between state and federal courts.
- Students will recognize the role of the Federal Judiciary Act of 1789 in establishing the structure and jurisdiction of the federal court system.
- Students will contrast the differences among civil trials and criminal trials at the state level.
- Students will describe the relationship among the Supreme Court, federal appellate courts and federal district courts (e.g., Erie Doctrine, Rooker-Feldman Doctrine).

**SS.912.CG.3.12:** Analyze the concept of federalism in the United States and its role in establishing the relationship between the state and national governments.
- Students will identify examples of the powers reserved and shared among state and the national governments in the American federal system of government.
- Students will examine the role the Great Compromise had on the eventual establishment of a federal system of fifty equal states.
- Students will explain specific rights that are granted to the states in the language of the U.S. Constitution and its amendments (e.g., 10th Amendment, defense and extradition).
- Students will analyze how states have challenged the national government regarding states' rights (e.g., Civil War, the New Deal, No Child Left Behind, Affordable Health Care Act, Civil Rights Movement).

**SS.912.CG.3.14:** Explain the judicial decision-making process in interpreting law at the state and national levels.
- Students will explain the role of the U.S. Constitution in interpreting law at the state and national levels.
- Students will explain the process used by judges at the state and national levels when making a decision or writing summary opinions.
- Students will incorporate language from the U.S. Constitution or court briefs to justify a legal decision when interpreting state or national law.

**SS.912.CG.3.15:** Explain how citizens are affected by the local, state and national governments.
- Students will identify local government officials and employees who affect the daily lives of citizens.
- Students will identify the role of state governmental officials and employees who affect the daily lives of citizens.
- Students will identify the role of national governmental officials and employees who affect the daily lives of citizens.
- Students will explain how government at all levels impacts the daily lives of citizens.

**SS.912.CG.4.3:** Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.
- Students will explain why U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.

**SS.912.G.1.2:** Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

**SS.912.G.1.4:** Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

**SS.912.G.4.1:** Interpret population growth and other demographic data for any given place.

**SS.912.H.1.6:** Analyze how current events are explained by artistic and cultural trends of the past.

**SS.912.W.1.1:** Use timelines to establish cause and effect relationships of historical events.

**SS.912.W.1.2:** Compare time measurement systems used by different cultures.

**SS.912.W.1.3:** Interpret and evaluate primary and secondary sources.

**SS.912.W.1.4:** Explain how historians use historical inquiry and other sciences to understand the past.

**SS.912.W.1.6:** Evaluate the role of history in shaping identity and character.

**SS.912.W.2.18:** Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.
| SS.912.W.5.4: | Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world. |
| SS.912.W.6.3: | Compare the philosophies of capitalism, socialism, and communism as described by Adam Smith, Robert Owen, and Karl Marx. |
| SS.912.W.7.5: | Describe the rise of authoritarian governments in the Soviet Union, Italy, Germany, and Spain, and analyze the policies and main ideas of Vladimir Lenin, Joseph Stalin, Benito Mussolini, Adolf Hitler, and Francisco Franco. |
| SS.912.W.7.6: | Analyze the restriction of individual rights and the use of mass terror against populations in the Soviet Union, Nazi Germany, and occupied territories. |

Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

**Clarifications:**
Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

**Clarifications:**
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**Clarifications:**
Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clarifications:**
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
**MA.K12.MTR.6.1:**

Clarifications:
- Teachers who encourage students to assess the reasonableness of solutions:
  - Have students estimate or predict solutions prior to solving.
  - Prompt students to continually ask, "Does this solution make sense? How do you know?"
  - Reinforce that students check their work as they progress within and after a task.
  - Strengthen students' ability to verify solutions through justifications.

**MA.K12.MTR.7.1:**

Clarifications:
- Teachers who encourage students to apply mathematics to real-world contexts:
  - Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
  - Challenge students to question the accuracy of their models and methods.
  - Support students as they validate conclusions by comparing them to the given situation.
  - Indicate how various concepts can be applied to other disciplines.

**ELA.K12.EE.1.1:**

Clarifications:
- K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
- 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

**ELA.K12.EE.2.1:**

Clarifications:
- See Text Complexity for grade-level complexity bands and a text complexity rubric.

**ELA.K12.EE.3.1:**

Clarifications:
- Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

**ELA.K12.EE.4.1:**

Clarifications:
- In kindergarten, students learn to listen to one another respectfully.
  - In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.
  - In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

**ELA.K12.EE.5.1:**

Clarifications:
- Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

**ELA.K12.EE.6.1:**

Clarifications:
- In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
General Course Information and Notes

**Comparative Political Systems** - The grade 9-12 Comparative Political Systems course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content for the course pertains to the study of the major political systems of the world and compare and contrast their operation with the American democratic system. Content should include, but is not limited to, the comparison of major political ideologies (communism, fascism, socialism, and democracy) from historical and ideological perspectives and the role and function of the government and the citizen in each political system.

**Instructional Practices**
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**
This course includes Florida’s B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

**GENERAL INFORMATION**

- **Course Number:** 2106360
- **Course Path:** Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Political Sciences >
- **Abbreviated Title:** COMPA POLI SYSTEMS
- **Number of Credits:** Half credit (.5)
- **Course Type:** Elective Course
- **Course Status:** Draft - Course Pending Approval
- **Grade Level(s):** 9,10,11,12
- **Course Length:** Semester (S)
- **Course Level:** 2

**Educator Certifications**

- Political Science (Grades 6-12)
- Social Science (Grades 6-12)

<td>Evaluate the role of history in shaping identity and character.</td>
</tr>
<tr>
<td>SS.912.C.5.3</td>
<td>Clarifications: Examples are ethnic, cultural, personal, national, religious.</td>
</tr>
<tr>
<td>SS.912.C.5.4</td>
<td>Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.</td>
</tr>
<tr>
<td>SS.912.C.5.5</td>
<td>Clarifications: Examples are Magna Carta, parliament, habeas corpus.</td>
</tr>
<tr>
<td>SS.912.C.5.6</td>
<td>Evaluate the impact of Enlightenment ideas on the development of economic, political, and religious structures in the Western world.</td>
</tr>
<tr>
<td>LAFS.910.RH.1.1</td>
<td>Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.</td>
</tr>
<tr>
<td>LAFS.910.RH.1.2</td>
<td>Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.</td>
</tr>
<tr>
<td>LAFS.910.RH.1.3</td>
<td>Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.</td>
</tr>
<tr>
<td>LAFS.910.RH.2.4</td>
<td>Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.</td>
</tr>
</tbody>
</table>
Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.

Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.

Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.

Assess the extent to which the reasoning and evidence in a text support the author's claims.

Compare and contrast treatments of the same topic in several primary and secondary sources.

By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.

Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.

a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.

b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.

c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.

d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.

Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.

Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.

Write arguments focused on discipline-specific content.

a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence.

b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns.

c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.

d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

e. Provide a concluding statement or section that follows from and supports the argument presented.

Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.

a. Introduce a topic or idea, organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.

b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.

c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts.

d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers.

e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.

Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.

Draw evidence from informational texts to support analysis, reflection, and research.

Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each.

Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling.

Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant.

Evaluate reports based on data.

Represent data with plots on the real number line (dot plots, histograms, and box plots).
In grades 6–8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

**MAFS.912.S-ID.1.1:** Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★

**Standard Relation to Course:** Supporting

**Clarifications:**
In grades 6–8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

**MAFS.912.S-ID.1.2:** Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★

**Standard Relation to Course:** Supporting

**Clarifications:**
In grades 6–8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

**MAFS.912.S-ID.1.3:** Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★

**Standard Relation to Course:** Supporting

**Make sense of problems and persevere in solving them.**

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might rely on understanding explicit statements about relationships in a given problem. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

**MAFS.912.S-ID.1.4:**

**Construct viable arguments and critique the reasoning of others.**

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

**MAFS.912.S-ID.1.5:**

**Use appropriate tools strategically.**

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

**MAFS.912.S-ID.1.6:**

**Attend to precision.**

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students use measurement tools to make precise calculations.

**MAFS.912.S-ID.1.7:**

**ELD.K12.ELL.SI.1:** English language learners communicate for social and instructional purposes within the school setting.

**ELD.K12.ELL.SS.1:** English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

**GENERAL NOTES**

**Comprehensive Law Studies:** The grade 9–12 Comprehensive Law Studies course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content for the course pertains to the study of the components and processes associated with the American legal system and the comprehensive examination of the civil and criminal justice systems. Content should include, but is not limited to, the historical antecedents for law, reason for laws, civil and criminal law, social values and their impact on the establishment and interpretation of laws, causes and consequences of...
crime, comparison of adult and juvenile justice systems, significance of the Bill of Rights to the American legal system, family and consumer law, rights and responsibilities under the law, and importance of the adversarial relationship in American jurisprudence.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies
Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
https://cpalmsmediaprod.blob.core.windows.net uploads/docs/standards/eld/ss.pdf

GENERAL INFORMATION

Course Number: 2106370
Course Path: Section: Grades PreK to 12 Education
Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies >
SubSubject: Political Sciences >
Abbreviated Title: COMPRE LAW STUDIES
Course Length: Year (Y)
Course Level: 2

Number of Credits: One (1) credit
Course Status: Course Approved
Course Type: Elective Course
Grade Level(s): 9,10,11,12

Educator Certifications
Political Science (Grades 6-12)
Social Science (Grades 6-12)
Law (Secondary Grades 7-12)

<td>Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.</td>
</tr>
<tr>
<td>SS.912.C.3.16:</td>
<td>Simulate the judicial decision-making process in interpreting law at the state and federal level.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are Magna Carta, parliament, habeas corpus.</td>
</tr>
<tr>
<td>SS.912.C.3.17:</td>
<td>Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.</td>
</tr>
<tr>
<td>SS.912.C.3.18:</td>
<td>Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are thematic, contour, and dot-density.</td>
</tr>
<tr>
<td>SS.912.C.3.19:</td>
<td>Evaluate the role of history in shaping identity and character.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are ethnic, cultural, personal, national, religious.</td>
</tr>
<tr>
<td>SS.912.C.3.20:</td>
<td>Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are Magna Carta, parliament, habeas corpus.</td>
</tr>
<tr>
<td>SS.912.C.3.21:</td>
<td>Evaluate the impact of Enlightenment ideas on the development of economic, political, and religious structures in the Western world.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.</td>
</tr>
<tr>
<td>SS.912.C.3.22:</td>
<td>Mathematicians who participate in effortful learning both individually and with others:</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.</td>
</tr>
<tr>
<td>SS.912.C.3.23:</td>
<td>Help and support each other when attempting a new method or approach.</td>
</tr>
<tr>
<td>SS.912.C.3.24:</td>
<td>Evaluate the role of history in shaping identity and character.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are Magna Carta, parliament, habeas corpus.</td>
</tr>
<tr>
<td>SS.912.C.3.25:</td>
<td>Compare the role of judges on the state and federal level with other elected officials.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are decisions based on the law vs. will of the majority.</td>
</tr>
<tr>
<td>SS.912.C.3.26:</td>
<td>Identify the impact of independent regulatory agencies in the federal bureaucracy.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are Magna Carta, parliament, habeas corpus.</td>
</tr>
<tr>
<td>SS.912.C.3.27:</td>
<td>Evaluate the role of history in shaping identity and character.</td>

</tbody>
</table>

| Demonstrate understanding by representing problems in multiple ways. |
| Mathematically demonstrate understanding by representing problems in multiple ways: |
| • Build understanding through modeling and using manipulatives. |
| • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. |
| • Progress from modeling problems with objects and drawings to using algorithms and equations. |
| • Express connections between concepts and representations. |
| • Choose a representation based on the given context or purpose. |

**Clarifications:**

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

| Complete tasks with mathematical fluency. |
| Mathematically complete tasks with mathematical fluency: |
| • Select efficient and appropriate methods for solving problems within the given context. |
| • Maintain flexibility and accuracy while performing procedures and mental calculations. |
| • Complete tasks accurately and with confidence. |
| • Adapt procedures to apply them to a new context. |
| • Use feedback to improve efficiency when performing calculations. |

**Clarifications:**

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

| Engage in discussions that reflect on the mathematical thinking of self and others. |
| Mathematically engage in discussions that reflect on the mathematical thinking of self and others: |
| • Communicate mathematical ideas, vocabulary and methods effectively. |
| • Analyze the mathematical thinking of others. |
| • Compare the efficiency of a method to those expressed by others. |
| • Recognize errors and suggest how to correctly solve the task. |
| • Justify results by explaining methods and processes. |
| • Construct possible arguments based on evidence. |

**Clarifications:**

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

| Use patterns and structure to help understand and connect mathematical concepts. |
| Mathematically use patterns and structure to help understand and connect mathematical concepts: |
| • Focus on relevant details within a problem. |
| • Create plans and procedures to logically order events, steps or ideas to solve problems. |
| • Decompose a complex problem into manageable parts. |
| • Relate previously learned concepts to new concepts. |
| • Look for similarities among problems. |
| • Connect solutions of problems to more complicated large-scale situations. |

**Clarifications:**

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

| Assess the reasonableness of solutions. |
| Mathematically assess the reasonableness of solutions: |
| • Estimate to discover possible solutions. |
| • Use benchmark quantities to determine if a solution makes sense. |
| • Check calculations when solving problems. |
| • Verify possible solutions by explaining the methods used. |
| • Evaluate results based on the given context. |

**Clarifications:**

Teachers who encourage students to assess the reasonableness of solutions:
Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1:

Cite evidence to explain and justify reasoning.
- Clarifications:
  - K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
  - 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
  - 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
  - 6-8 Students continue with previous skills and use a style guide to create a proper citation.
  - 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:

Read and comprehend grade-level complex texts proficiently.
- Clarifications:
  - See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.3.1:

Make inferences to support comprehension.
- Clarifications:
  - Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.4.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.
- Clarifications:
  - In kindergarten, students learn to listen to one another respectfully.
  - In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think ______ because ______." The collaborative conversations are becoming academic conversations.
  - In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.5.1:

Use the accepted rules governing a specific format to create quality work.
- Clarifications:
  - Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.6.1:

Use appropriate voice and tone when speaking or writing.
- Clarifications:
  - In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

ELD.K12.ELL.SL.1:

English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SS.1:

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

HE.912.C.2.4:

Evaluate how public health policies and government regulations can influence health promotion and disease prevention.
- Clarifications:
  - Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes
Comprehensive Law Studies: The grade 9-12 Comprehensive Law Studies course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content for the course pertains to the study of the components and processes associated with the American legal system and the comprehensive examination of the civil and criminal justice systems. Content should include, but is not limited to, the historical antecedents for law, reason for laws, civil and criminal law, social values and their impact on the establishment and interpretation of laws, causes and consequences of crime, comparison of adult and juvenile justice systems, significance of the Bill of Rights to the American legal system, family and consumer law, rights and responsibilities under the law, and importance of the adversarial relationship in American jurisprudence.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

GENERAL INFORMATION

Course Number: 2106370
Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Political Sciences > Abbreviated Title: COMPRE LAW STUDIES Course Length: Year (Y) Course Level: 2
Grade Level(s): 9,10,11,12

Educator Certifications

Political Science (Grades 6-12)
Social Science (Grades 6-12)
Law (Secondary Grades 7-12)
SS.912.A.1.1: Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.

SS.912.A.1.2: Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.

SS.912.A.1.3: Utilize timelines to identify the time sequence of historical data.

SS.912.A.1.4: Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.

SS.912.A.1.5: Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.

SS.912.A.1.6: Use case studies to explore social, political, legal, and economic relationships in history.

SS.912.A.1.7: Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.

SS.912.A.2.4: Explain the influence of Enlightenment ideas on the Declaration of Independence.

SS.912.CG.1.2: Students will explain national sovereignty, natural law, self-evident truth, equality of all persons, and unalienable rights of life, liberty and property as they relate to Enlightenment ideas in the Declaration of Independence.

SS.912.CG.1.3: Explain arguments presented in the Federalist Papers in support of ratifying the U.S. Constitution and a republican form of government.

SS.912.CG.1.4: Analyze the ideals and principles expressed in the founding documents that shape America as a constitutional republic.

SS.912.CG.1.5: Students will evaluate how the documents are connected to one another.

SS.912.CG.1.6: Evaluate additional resources may be found on various websites such as the site for The Kinsey Collection.

SS.912.CG.1.7: Students will identify key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason).

SS.912.CG.1.8: Students will analyze Federalist and Anti-Federalist arguments concerning ratification of the U.S. Constitution and inclusion of a bill of rights.

SS.912.CG.1.9: Students will analyze how the Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, and representative government.

SS.912.CG.1.10: Students will explain how the Constitution and its amendments establish and affect citizenship.

SS.912.CG.2.1: Students will evaluate the importance of political and civic participation to the success of the United States' constitutional republic.
<table>
<thead>
<tr>
<th>Standard</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.CG.2.2</td>
<td>Students will discuss various ways in which U.S. citizens can exercise political and civic participation. Students will identify historical examples of political and civic participation (e.g., Civil Rights Movement, Women's Suffrage Movement). Students will describe the ways in which individuals can be denied and limited in their right to practice political and civic participation (e.g., losing voting rights for felony conviction, limitations on political contributions, limits on the type of protesting).</td>
</tr>
<tr>
<td>SS.912.CG.2.3</td>
<td>Explain the responsibilities of citizens at the local, state and national levels. Students will identify various responsibilities held by citizens (e.g., voting, volunteering and being informed, respecting laws). Students will understand the process of registering or preregistering to vote and how to complete a ballot in Florida (e.g., uniform primary and general election ballot). Students will discuss appropriate methods of communication with public officials (e.g., corresponding, attending public meetings, requesting a meeting and providing information). Students will participate in classroom activities that simulate exercising the responsibilities of citizenship.</td>
</tr>
<tr>
<td>SS.912.CG.2.4</td>
<td>Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the public good. Students will examine situations when individuals' rights have been restricted for the public good (e.g., limits on speech or rationing of goods during wartime, enactment of the Patriot Act). Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good. Students will explain different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response). Analyze contemporary and historical examples of government-imposed restrictions on rights. Students will identify historical examples of government-imposed restrictions on rights (e.g., suspension of habeas corpus, rationing during wartime and limitations on speech). Students will examine the rationale for government-imposed restrictions on rights (e.g., inciting a crime, campaign contributions, defamation, military secrets). Analyze how the principles contained in foundational documents contributed to the expansion of civil rights and liberties over time. Students will explain how different groups of people (e.g., African Americans, immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman's desegregation of the army, Lincoln's Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault). Students will explain the role founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights. Analyze the impact of civic engagement as a means of preserving or reforming institutions. Students will identify legal methods that citizens can use to promote social and political change (e.g., voting, peaceful protests, petitioning, demonstrations, contacting government offices). Students will identify historical examples of citizens achieving or preventing political and social change through civic engagement (e.g., the Abolitionist Movement). Explain how the principles of checks and balances, consent of the people, separation of powers, limited government, representative government, republicanism, rule of law and separation of powers contribute to the nation's longevity and its ability to overcome challenges, and distinguish the United States' constitutional republic from authoritarian and totalitarian nations. Students will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy. Students will identify historical examples of interest groups, media and individuals influencing public policy. Students will compare and contrast how the free press influenced politics at major points in U.S. history (e.g., Vietnam War Era, Civil Rights Era). Evaluate political communication for bias, factual accuracy, omission and emotional appeal. Students will compare the reporting on the same political event or issue from multiple perspectives. Students will identify various forms of propaganda (e.g., plain folks, glittering generalities, testimonial, fear, logical fallacies). Students will discuss the historical impact of political communication on American political process and public opinion. Examples of political communication may include, but are not limited to, political cartoons, propaganda, campaign advertisements, political speeches, bumper stickers, blogs, press and social media. Explain how interest groups, the media and public opinion influence local, state and national decision-making related to public issues. Students will objectively discuss current public issues in Florida and use both the U.S. and Florida Constitutions to justify pro and con positions. Students will examine the relationship and responsibilities of both the state and national governments regarding these public issues. Students will analyze public policy solutions related to local, state and national issues. Analyze the influence and effects of various forms of media and the internet in political communication. Students will explain how the methods of political communication has changed over time (e.g., television, radio, press, social media). Students will describe how the methods used by political officials to communicate with the public has changed over time. Students will discuss the strengths and weaknesses of different methods of political communication. Analyze the structure, functions and processes of the legislative branch as described in Article I of the U.S. Constitution. Students will explain why Article I of the U.S. Constitution established a bicameral legislative body and how the House of Representatives functions differently from the Senate. Students will identify the methods for determining the number of members in the House of Representatives and the Senate. Students will identify and describe the &quot;enumerated powers&quot; delegated to Congress (e.g., assess taxes, borrow money, declare war, make laws). Students will analyze the role of the legislative branch in terms of its relationship with the judicial and executive branch of the government. Students will describe constitutional amendments that changed the role of Congress from its original description in Article I of the U.S.</td>
</tr>
</tbody>
</table>
Analyze the structures, functions and processes of the executive branch as described in Article II of the U.S. Constitution.

- Students will explain the qualifications one must have to seek the office of president and the process of presidential elections.
- Students will explain how checks and balances work within the executive branch.
- Students will examine the role of the executive branch in terms of its relationship with the judicial and legislative branches of the government.
- Students will analyze the concept of federalism in the United States and its role in establishing the relationship between the state and national governments.
- Students will identify that expressed powers are also known as enumerated powers found in Article I of the U.S. Constitution.
- Students will explain how U.S. foreign policy supports democratic principles and protects human rights around the world.
- Students will describe the roles of expressed, implied, concurrent and reserved powers in the U.S. Constitution.
- Students will analyze the structures, functions and processes of the judicial branch as described in Article III of the U.S. Constitution.
- Students will recognize the role of the Federal Judiciary Act of 1789 in establishing the structure and jurisdiction of the federal court system.
- Students will contrast the differences among civil trials and criminal trials at the state level.
- Students will describe how federal courts interpret and apply the law at the state level.
- Students will explain the relationship among the Supreme Court, federal appellate courts and federal district courts (e.g., Erie Doctrine, Rooker-Feldman Doctrine).
- Students will describe the purpose and function of judicial review in the American constitutional government.
- Students will examine the role of district courts, the courts of appeals and the Supreme Court in the judicial review process.
- Students will describe the relationship between the concept of judicial review and the language of the Supremacy Clause in Article VI of the U.S. Constitution.
- Students will analyze the levels and responsibilities of state and federal courts.
- Students will describe what Article III of the U.S. Constitution states about the relationship between state and federal courts.
- Students will contrast the differences among civil trials and criminal trials at the state level.
- Students will describe the relationship among the Supreme Court, federal appellate courts and federal district courts (e.g., Erie Doctrine, Rooker-Feldman Doctrine).
- Students will evaluate how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution.
- Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; McCulloch v. Maryland; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; Korematsu v. United States; Mapp v. Ohio; In re Gault; United States v. Nixon; Regents of the University of California v. Bakke; Hazelwood v. Kuhlmeier; District of Columbia v. Heller).
- Students will explain the foundational constitutional issues underlying landmark Supreme Court decisions related to the Bill of Rights and other amendments.
- Students will analyze how federalism in the United States and its role in establishing the relationship between the state and national governments.
- Students will identify examples of the powers reserved and shared among state and the national governments in the American federal system of government.
- Students will examine the role of the Great Compromise had on the eventual establishment of a federal system of fifty equal states.
- Students will explain specific rights that are granted to the states in the language of the U.S. Constitution and its amendments (e.g., 10th Amendment, defense and extradition).
- Students will analyze how states have challenged the national government regarding states' rights (e.g., Civil War, the New Deal, No Child Left Behind, Affordable Health Care Act, Civil Rights Movement).
- Students will explain the judicial decision-making process in interpreting law at the state and national levels.
- Students will explain how citizens are affected by the local, state and national governments.
- Students will explain the process used by judges at the state and national levels when making a decision or writing summary opinions.
- Students will incorporate language from the U.S. Constitution or court briefs to justify a legal decision when interpreting state or national law.
- Students will explain how U.S. foreign policy supports democratic principles and protects human rights around the world.
- Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.

Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.
SS.912.G.1.2: Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

SS.912.G.1.4: Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

SS.912.G.4.1: Interpret population growth and other demographic data for any given place.

SS.912.H.1.6: Analyze how current events are explained by artistic and cultural trends of the past.

SS.912.W.1.1: Use timelines to establish cause and effect relationships of historical events.

SS.912.W.1.3: Interpret and evaluate primary and secondary sources.

SS.912.W.1.4: Explain how historians use historical inquiry and other sciences to understand the past.

SS.912.W.1.6: Evaluate the role of history in shaping identity and character.

SS.912.W.2.18: Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.

SS.912.W.5.4: Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.

MA.K12.MTR.1.1: Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

MA.K12.MTR.2.1: Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.3.1: Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
MA.K12.MTR.4.1:
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:
Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:
Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:
Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1:
Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:
Read and comprehend grade-level complex texts proficiently.

Clarifications:
See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

Clarifications:

### Students

English language learners communicate for social and instructional purposes within the school setting.

#### ELA.K12.EE.3.1

**Clariifications:**
- In kindergarten, students learn to listen to one another respectfully.
- In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _______ because _______.” The collaborative conversations are becoming academic conversations.
- In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

#### ELA.K12.EE.4.1

**Clariifications:**
- Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

#### ELA.K12.EE.5.1

**Clariifications:**
- Use the accepted rules governing a specific format to create quality work.

#### ELA.K12.EE.6.1

**Clariifications:**
- Use appropriate voice and tone when speaking or writing.

### General Course Information and Notes

#### GENERAL NOTES

**Comprehensive Law Studies:** The grade 9-12 Comprehensive Law Studies course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content for the course pertains to the study of the components and processes associated with the American legal system and the comprehensive examination of the civil and criminal justice systems. Content should include, but is not limited to, the historical antecedents for law, reason for laws, civil and criminal law, social values and their impact on the establishment and interpretation of laws, causes and consequences of crime, comparison of adult and juvenile justice systems, significance of the Bill of Rights to the American legal system, family and consumer law, rights and responsibilities under the law, and importance of the adversarial relationship in American jurisprudence.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students’ content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. **Reading assignments from longer text passages as well as shorter ones when text is extremely complex.**
2. **Making close reading and rereading of texts central to lessons.**
3. **Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.**
4. **Requiring students to support answers with evidence from the text.**
5. **Providing extensive text-based research and writing opportunities (claims and evidence).**

**Florida’s Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida’s B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EE and MTRs, please visit [https://www.cpalms.org/Standards/BEST_Standards.aspx](https://www.cpalms.org/Standards/BEST_Standards.aspx) and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: [https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf](https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf)

</table>
Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.

Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.

Evaluate the changing roles of television, radio, press, and Internet in political communication.

Evaluate the significance and outcomes of landmark Supreme Court cases.

Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights.

Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.

Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.

Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.

Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them.

Illustrate examples of how government affects the daily lives of citizens at the local, state, and national levels.

Evaluate the significance and outcomes of landmark Supreme Court cases.

Contrast how the Constitution safeguards and limits individual rights.

Simulate the judicial decision-making process in interpreting law at the state and federal level.

Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

Examine constitutional powers (expressed, implied, concurrent, reserved).

Analyze the role of judicial review in American constitutional government.

Examine how power and responsibility are distributed, shared, and limited by the Constitution.

Interpret and evaluate primary and secondary sources.

Analyze the origins and roles of political parties, interest groups, media, and individuals in determining and shaping public policy.

Explain how historians use historical inquiry and other sciences to understand the past.

Identify the impact of independent regulatory agencies in the federal bureaucracy.

Contrast how the Constitution safeguards and limits individual rights.

Evaluate the role of history in shaping identity and character.

Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.

Examine the role of judicial review in American constitutional government.

Describe developments in medieval English legal and constitutional history.

Compare the role of judges on the state and federal level with other elected officials.

Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

Explain how historians use historical inquiry and other sciences to understand the past.

Analyze the role of judicial review in American constitutional government.

Evaluate the significance and outcomes of landmark Supreme Court cases.

Identify the impact of independent regulatory agencies in the federal bureaucracy.

Analyze the role of judicial review in American constitutional government.

Describe developments in medieval English legal and constitutional history.

Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

Explain how historians use historical inquiry and other sciences to understand the past.

Evaluate the role of history in shaping identity and character.

Describe developments in medieval English legal and constitutional history.

Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

Explain how historians use historical inquiry and other sciences to understand the past.

Evaluate the role of history in shaping identity and character.

Explain how historians use historical inquiry and other sciences to understand the past.

Evaluate the role of history in shaping identity and character.

Describe developments in medieval English legal and constitutional history.

Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

Explain how historians use historical inquiry and other sciences to understand the past.

Evaluate the role of history in shaping identity and character.

Describe developments in medieval English legal and constitutional history.

Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

Explain how historians use historical inquiry and other sciences to understand the past.

Evaluate the role of history in shaping identity and character.

Describe developments in medieval English legal and constitutional history.

Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

Explain how historians use historical inquiry and other sciences to understand the past.

Evaluate the role of history in shaping identity and character.

Describe developments in medieval English legal and constitutional history.

Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

Explain how historians use historical inquiry and other sciences to understand the past.

Evaluate the role of history in shaping identity and character.

Describe developments in medieval English legal and constitutional history.

Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

Explain how historians use historical inquiry and other sciences to understand the past.

Evaluate the role of history in shaping identity and character.

Describe developments in medieval English legal and constitutional history.

Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

Explain how historians use historical inquiry and other sciences to understand the past.

Evaluate the role of history in shaping identity and character.
Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.

Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.

Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.

Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.

Assess the extent to which the reasoning and evidence in a text support the author’s claims.

Compare and contrast treatments of the same topic in several primary and secondary sources.

By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.

Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others’ ideas and expressing their own clearly and persuasively.

a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.

b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.

c. Propose conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.

d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility accuracy of each source.

Evaluate a speaker’s point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.

Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.

Write arguments focused on discipline-specific content:

a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence.

b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience’s knowledge level and concerns.

c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.

d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

ea. Provide a concluding statement or section that follows from and supports the argument presented.

Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.

a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.

b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience’s knowledge of the topic.

c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts.

d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as the expertise of likely readers.

e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology’s capacity to link to other information and to display information flexibly and dynamically.

Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.

Draw evidence from informational texts to support analysis, reflection, and research.

Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each.

★ Standard Relation to Course: Supporting

Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★ Standard Relation to Course: Supporting

Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★ Standard Relation to Course: Supporting

Evaluate reports based on data. ★ Standard Relation to Course: Supporting
Represent data with plots on the real number line (dot plots, histograms, and box plots). ★

Clarifications:
In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

Standard Relation to Course: Supporting

Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★

Clarifications:
In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

Standard Relation to Course: Supporting

Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★

Clarifications:
In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

Standard Relation to Course: Supporting

Make sense of problems and persevere in solving them.

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze given, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get a better sense of what is happening. Mathematically proficient students check their answers to problems using different methods, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

Construct viable arguments and critique the reasoning of others.

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

Use appropriate tools strategically.

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

Attend to precision.

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

English language learners communicate for social and instructional purposes within the school setting.

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

Clarifications:
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.
Comprehensive Law - The grade 9-12 Comprehensive Law course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content for the course pertains to the study of the components and processes associated with the American legal system and the comprehensive examination of the civil and criminal justice systems. Content should include, but is not limited to, the historical antecedents and purpose for laws, the impact of social values on the establishment and interpretation of laws, causes and consequences of crime, evaluation of the adult and juvenile justice systems, significance of the Bill of Rights to the American legal system and elements of constitutionalism, civil and criminal law, family and consumer law, rights and responsibilities under the law, and the adversarial versus inquisitorial systems of justice. This course will incorporate the development of a written appellate brief addressing a contemporary legal question and the presentation of oral arguments to defend their position legally.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:
1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies
Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.6</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.A.1.7</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td>SS.912.A.2.4</td>
<td>Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. <strong>Clarifications:</strong> Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.2.5</td>
<td>Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. <strong>Clarifications:</strong> This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.C.1.1</td>
<td>Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.1.2</td>
<td>Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.1.3</td>
<td>Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.</td>
</tr>
<tr>
<td>SS.912.C.1.4</td>
<td>Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights.</td>
</tr>
<tr>
<td>SS.912.C.1.5</td>
<td>Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.</td>
</tr>
<tr>
<td>SS.912.C.2.1</td>
<td>Evaluate the constitutional provisions establishing citizenship, and assess the criteria among citizens by birth, naturalized citizens, and non-citizens.</td>
</tr>
<tr>
<td>SS.912.C.2.2</td>
<td>Evaluate the importance of political participation and civic participation. Experience the responsibilities of citizens at the local, state, or federal levels.</td>
</tr>
<tr>
<td>SS.912.C.2.3</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.4</td>
<td>Evaluate, take, and defend positions about rights protected by the Constitution and Bill of Rights. <strong>Clarifications:</strong> Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</td>
</tr>
<tr>
<td>SS.912.C.2.5</td>
<td>Explain why rights have limits and are not absolute. <strong>Clarifications:</strong> Examples are speech, search and seizure, religion, gun possession.</td>
</tr>
<tr>
<td>SS.912.C.2.6</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.7</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change. <strong>Clarifications:</strong> Examples are e-mail campaigns, boycotts, blogs, podcasts, protests, demonstrations, letters to editors.</td>
</tr>
<tr>
<td>SS.912.C.2.8</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents. <strong>Clarifications:</strong> Examples are Preamble, Declaration of Independence, Constitution, Emancipation Proclamation, 13th, 14th, 15th, 19th, 24th, and 26th Amendments, Voting Rights Act of 1965.</td>
</tr>
<tr>
<td>SS.912.C.2.9</td>
<td>Monitor current public issues in Florida. <strong>Clarifications:</strong> Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. </tr>
<tr>
<td>SS.912.C.2.10</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents. <strong>Clarifications:</strong> Examples are Preamble, Declaration of Independence, Constitution, Emancipation Proclamation, 13th, 14th, 15th, 19th, 24th, and 26th Amendments, Voting Rights Act of 1965.</td>
</tr>
</tbody>
</table>
### SS.912.C.2.11:
Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.

### SS.912.C.2.12:
Explain the changing roles of television, radio, press, and Internet in political communication.

### SS.912.C.2.13:
Analyze the various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.

**Clarifications:**
- Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media.

### SS.912.C.2.14:
Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.

### SS.912.C.2.15:
Evaluate the origins and roles of political parties, interest groups, media, and individuals in determining and shaping public policy.

### SS.912.C.3.11:
Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights.

### SS.912.C.3.12:
Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.

### SS.912.C.3.13:
Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.

### SS.912.C.3.14:
Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.

**Clarifications:**
- Examples are Federal Reserve, Food and Drug Administration, Federal Communications Commission.

### SS.912.C.3.15:
Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.

### SS.912.C.3.16:
Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights.

### SS.912.C.3.17:
Contrast how the Constitution safeguards and limits individual rights.

### SS.912.C.3.18:
Simulate the judicial decision-making process in interpreting law at the state and federal level.

### SS.912.C.3.19:
Explain the changing roles of television, radio, press, and Internet in political communication.

### SS.912.C.4.12:
Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

### SS.912.C.4.13:
Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

### SS.912.C.4.14:
Clarifications:
- Examples are thematic, contour, and dot-density.

### SS.912.C.4.15:
Interpret population growth and other demographic data for any given place.

### SS.912.H.1.6:
Analyze how current events are explained by artistic and cultural trends of the past.

### SS.912.W.1.1:
Use timelines to establish cause and effect relationships of historical events.

### SS.912.W.1.2:
Compare time measurement systems used by different cultures.

**Clarifications:**
- Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.

### SS.912.W.1.3:
Interpret and evaluate primary and secondary sources.

**Clarifications:**
- Examples are artifacts, images, auditory and written sources.

### SS.912.W.1.4:
Explain how historians use historical inquiry and other sciences to understand the past.

**Clarifications:**
- Examples are archaeology, economics, geography, forensic chemistry, political science, physics.

### SS.912.W.1.5:
Evaluate the role of history in shaping identity and character.

**Clarifications:**
- Examples are ethnic, cultural, personal, national, religious.

### SS.912.W.2.18:
Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.

**Clarifications:**
- Examples are Magna Carta, parliament, habeas corpus.

### SS.912.W.5.4:
Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.

**Mathematicians who participate in effortful learning both individually and with others:**
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
**MA.K12.MTR.1.1:**
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

**Clarifications:**
Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

**MA.K12.MTR.2.1:**
Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

**Clarifications:**
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

**MA.K12.MTR.3.1:**
Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**Clarifications:**
Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the methods they used and determine if a more efficient method could have been used.

**MA.K12.MTR.4.1:**
Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clarifications:**
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

**MA.K12.MTR.5.1:**
Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
Use benchmark quantities to determine if a solution makes sense.
Check calculations when solving problems.
Verify possible solutions by explaining the methods used.
Evaluate results based on the given context.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:
- Reinforce that students check their work as they progress within and after a task.
- Reinforce that students check their work as they progress within and after a task.
- Reinforce that students check their work as they progress within and after a task.
- Reinforce that students check their work as they progress within and after a task.

**Cite evidence to explain and justify reasoning.**

**Clarifications:**
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

**Clarifications:**
See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

**Clarifications:**
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clarifications:**
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think ______ because _______." The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

Use the accepted rules governing a specific format to create quality work.

**Clarifications:**
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

Use appropriate voice and tone when speaking or writing.

**Clarifications:**
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

English language learners communicate for social and instructional purposes within the school setting.

**Clarifications:**
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

**Clarifications:**
English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
GENERAL NOTES

Comprehensive Law - The grade 9-12 Comprehensive Law course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content for the course pertains to the study of the components and processes associated with the American legal system and the comprehensive examination of the civil and criminal justice systems. Content should include, but is not limited to, the historical antecedents and purpose for laws, the impact of social values on the establishment and interpretation of laws, causes and consequences of crime, evaluation of the adult and juvenile justice systems, significance of the Bill of Rights to the American legal system and elements of constitutionalism, civil and criminal law, family and consumer law, rights and responsibilities under the law, and the adversarial versus inquisitorial systems of justice. This course will incorporate the development of a written appellate brief addressing a contemporary legal question and the presentation of oral arguments to defend their position legally.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EE and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.

Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.

Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.

Utilize timelines to identify the time sequence of historical data.

Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.

Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.

Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bi/library_media/pdf/12totalfinds.pdf

Use case studies to explore social, political, legal, and economic relationships in history.

Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.

Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Explain the influence of Enlightenment ideas on the Declaration of Independence.

- Students will identify grievances listed in the Declaration of Independence in terms of due process of law, individual rights, natural rights, popular sovereignty and social contract.
- Students will explain national sovereignty, natural law, self-evident truth, equality of all persons, due process of law, limited government, popular sovereignty, and unalienable rights of life, liberty and property as they relate to Enlightenment ideas in the Declaration of Independence.
- Students will recognize that national sovereignty, due process of law, natural law, self-evident truth, equality of all persons, limited government, popular sovereignty, and unalienable rights of life, liberty and property form the philosophical foundation of our government.

Explain arguments presented in the Federalist Papers in support of ratifying the U.S. Constitution and a republican form of government.

- Students will recognize that the Federalist Papers argued for a federal system of government, separation of powers and a representative form of government that is accountable to its citizens.
- Students will analyze Federalist and Anti-Federalist arguments concerning ratification of the U.S. Constitution and inclusion of a bill of rights.

Analyze how the ideals and principles expressed in the founding documents shape America as a constitutional republic.

- Students will differentiate among the documents and determine how each one was individually significant to the founding of the United States.
- Students will evaluate how the documents are connected to one another.
- Documents include, but are not limited to, the Declaration of Independence, Articles of Confederation, Federalist Papers (e.g., No. 10. No. 14, No. 31, No. 39, No. 51) and the U.S. Constitution.
- Students will identify key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason).

Explain how the U.S. Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers.

- Students will explain how the structure and function of the U.S. government reflects these political principles.
- Students will differentiate between republicanism and democracy, and discuss how the United States reflects both.
- Students will describe compromises made during the Constitutional Convention (e.g., the Great Compromise, the Three-Fifths Compromise, the Electoral College).

Explain the constitutional provisions that establish and affect citizenship.

- Students will explain how the concept of citizenship in the United States has changed over the course of history (i.e., 13th, 14th, 15th and 19th Amendments).
- Students will compare birthright citizenship, permanent residency, and naturalization in the United States.
- Students will differentiate the rights held by native-born citizens, permanent residents and naturalized citizens (e.g., running for public office).

Explain the importance of political and civic participation to the success of the United States' constitutional republic.

<td>SS.912.CG.2.2:</td>
<td>Students will discuss various ways in which U.S. citizens can exercise political and civic participation. Students will identify historical examples of political and civic participation (e.g., Civil Rights Movement, Women’s Suffrage Movement). Students will describe the ways in which individuals can be denied and limited in their right to practice political and civic participation (e.g., losing voting rights for felony conviction, limitations on political contributions, limits on the type of protesting).</td>
</tr>
<tr>
<td>SS.912.CG.2.3:</td>
<td>Explain the responsibilities of citizens at the local, state and national levels. Students will identify various responsibilities held by citizens (e.g., voting, volunteering and being informed, respecting laws). Students will understand the process of registering or preregistering to vote and how to complete a ballot in Florida (e.g., uniform primary and general election ballot). Students will discuss appropriate methods of communication with public officials (e.g., corresponding, attending public meetings, requesting a meeting and providing information). Students will participate in classroom activities that simulate exercising the responsibilities of citizenship.</td>
</tr>
<tr>
<td>SS.912.CG.2.4:</td>
<td>Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the public good. Students will examine situations when individuals’ rights have been restricted for the public good (e.g., limits on speech or rationing of goods during wartime, enactment of the Patriot Act). Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good. Students will explain different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response).</td>
</tr>
<tr>
<td>SS.912.CG.2.5:</td>
<td>Analyze contemporary and historical examples of government-imposed restrictions on rights. Students will identify historical examples of government-imposed restrictions on rights (e.g., suspension of habeas corpus, rationing during wartime and limitations on speech). Students will examine the rationale for government-imposed restrictions on rights (e.g., inciting a crime, campaign contributions, defamation, military secrets). Students will explain how foundational documents contributed to the expansion of civil rights and liberties over time. Students will explain how different groups of people (e.g., African Americans, immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman’s desegregation of the army, Lincoln’s Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault). Students will explain the role founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights.</td>
</tr>
<tr>
<td>SS.912.CG.2.6:</td>
<td>Analyze the impact of civic engagement as a means of preserving or reforming institutions. Students will identify legal methods that citizens can use to promote social and political change (e.g., voting, peaceful protests, petitioning, demonstrations, contacting government offices). Students will identify historical examples of citizens achieving or preventing political and social change through civic engagement (e.g., the Abolitionist Movement). Students will examine the role of the legislative branch in terms of its ability to overcome challenges, and distinguish the United States’ bicameral legislative body and how the House of Representatives and Senate functions differently from the Senate.</td>
</tr>
<tr>
<td>SS.912.CG.2.7:</td>
<td>Analyze the impact of political parties, interest groups, media and individuals on determining and shaping public policy. Students will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy. Students will identify historical examples of interest groups, media and individuals influencing public policy. Students will explain how different groups of people (e.g., African Americans, immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman’s desegregation of the army, Lincoln’s Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault). Students will examine the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy. Students will identify historical examples of interest groups, media and individuals influencing public policy. Students will compare and contrast how the free press influenced politics at major points in U.S. history (e.g., Vietnam War Era, Civil Rights Era).</td>
</tr>
<tr>
<td>SS.912.CG.2.8:</td>
<td>Evaluate political communication for bias, factual accuracy, omission and emotional appeal. Students will compare the reporting on the same political event or issue from multiple perspectives. Students will identify various forms of propaganda (e.g., plain folks, glittering generalities, testimonial, fear, logical fallacies). Students will discuss the historical impact of political communication on American political process and public opinion. Examples of political communication may include, but are not limited to, political cartoons, propaganda, campaign advertisements, political speeches, bumper stickers, blogs, press and social media. Examples of political communication may include, but are not limited to, political cartoons, propaganda, campaign advertisements, political speeches, bumper stickers, blogs, press and social media.</td>
</tr>
<tr>
<td>SS.912.CG.2.9:</td>
<td>Analyze how interest groups, the media and public opinion influence local, state and national decision-making related to public issues. Students will objectively discuss current public issues in Florida and use both the U.S. and Florida Constitutions to justify pro and con positions. Students will examine the relationship and responsibilities of both the state and national governments regarding these public issues. Students will analyze public policy solutions related to local, state and national issues. Students will analyze public policy solutions related to local, state and national issues.</td>
</tr>
<tr>
<td>SS.912.CG.2.10:</td>
<td>Analyze the influence and effects of various forms of media and the internet in political communication. Students will explain how the methods of political communication has changed over time (e.g., television, radio, press, social media). Students will describe how the methods used by political officials to communicate with the public has changed over time. Students will discuss the strengths and weaknesses of different methods of political communication.</td>
</tr>
<tr>
<td>SS.912.CG.3.1:</td>
<td>Analyze how certain political ideologies conflict with the principles of freedom and democracy. Students will identify political ideologies that conflict with the principles of freedom and democracy (e.g., communism and totalitarianism). Students will analyze how the principles of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers contribute to the nation's longevity and its ability to overcome challenges, and distinguish the United States’ constitutional republic from authoritarian and totalitarian nations.</td>
</tr>
<tr>
<td>SS.912.CG.3.2:</td>
<td>Explain how the U.S. Constitution safeguards and limits individual rights. Students will identify the individual rights protected by the U.S. Constitution, the Bill of Rights and other constitutional amendments. Students will describe the role of the Supreme Court in further defining the safeguards and limits of constitutional rights. Students will describe the role of the Supreme Court in further defining the safeguards and limits of constitutional rights.</td>
</tr>
<tr>
<td>SS.912.CG.3.3:</td>
<td>Analyze the structures, functions and processes of the legislative branch as described in Article I of the U.S. Constitution. Students will explain why Article I of the U.S. Constitution established a bicameral legislative body and how the House of Representatives functions differently from the Senate. Students will identify the methods for determining the number of members in the House of Representatives and the Senate. Students will identify and describe the “enumerated powers” delegated to Congress (e.g., assess taxes, borrow money, declare war, make laws). Students will analyze the role of the legislative branch in terms of its relationship with the judicial and executive branch of the government. Students will describe constitutional amendments that changed the role of Congress from its original description in Article I of the U.S. Constitution. Students will describe constitutional amendments that changed the role of Congress from its original description in Article I of the U.S. Constitution.</td>
</tr>
</tbody>
</table>
Analyze the structures, functions and processes of the executive branch as described in Article II of the U.S. Constitution.

- Students will explain the qualifications one must have to seek the office of president and the process of presidential elections.
- Students will explain different presidential responsibilities outlined in Article II (e.g., receiving foreign heads of state, delivering the State of the Union address, carrying out faithful execution of the law).
- Students will examine the role of the executive branch in terms of its relationship with the judicial and legislative branches of the government.
- Students will describe constitutional amendments (i.e., 12th, 20th, 22nd and 25th) that have changed the role of the executive branch from its original description in Article II.
- Students will describe the impeachment process.

Describe how independent regulatory agencies interact with the three branches of government and with citizens.

- Students will identify independent regulatory agencies (e.g., Federal Communications Commission, Federal Election Commission, National Labor Relations Board) and explain their purpose and effect.
- Students will describe the advantages and disadvantages of delegating power to independent regulatory agencies.

Explain expressed, implied, concurrent and reserved powers in the U.S. Constitution.

- Students will identify powers that are expressed in the U.S. Constitution to Congress (e.g., coin money, declare war, assess taxes, citizenship).
- Students will express that expressed powers are also known as enumerated powers found in Article I of the U.S. Constitution.
- Students will analyze the role of the “general welfare clause” and “necessary and proper clause” in granting Congress implied powers.
- Students will describe examples of concurrent powers as those powers shared by both state and national governments (e.g., build roads, tax citizens, make laws).
- Students will explain how reserved powers define issues as matters for the people or the state governments.
- Students will compare the roles of expressed, implied, concurrent and reserved powers in United States' federalism.

Analyze the structures, functions and processes of the judicial branch as described in Article III of the U.S. Constitution.

- Students will examine the role of the judicial branch in terms of its relationship with the legislative and executive branches of government.
- Students will describe the role of the Supreme Court and lesser federal courts.
- Students will explain what Article III says about judicial tenure, appointment and salaries.
- Students will describe the powers delegated to the courts by Article III including, but not limited to, treason, jurisdiction and trial by jury.

Explain the judicial decision-making process in interpreting law at the state and national levels.

- Students will explain the role of the U.S. Constitution in interpreting law at the state and national levels.
- Students will explain the process used by judges at the state and national levels when making a decision or writing summary opinions.
- Students will incorporate language from the U.S. Constitution or court briefs to justify a legal decision when interpreting state or national law.

Analyze how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution.

- Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; McCulloch v. Maryland; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; Korematsu v. United States; Mapp v. Ohio; In re Gault; United States v. Nixon; Regents of the University of California v. Bakke; Hazelwood v. Kuhlmeier; District of Columbia v. Heller).
- Students will explain the foundational constitutional issues underlying landmark Supreme Court decisions related to the Bill of Rights and other amendments.
- Students will explain the outcomes of landmark Supreme Court cases related to the Bill of Rights and other amendments.

Analyze the concept of federalism in the United States and its role in establishing the relationship between the state and national governments.

- Students will identify examples of the powers reserved and shared among state and the national governments in the American federal system of government.
- Students will examine the role the Great Compromise had on the eventual establishment of a federal system of fifty equal states.
- Students will explain specific rights that are granted to the states in the language of the U.S. Constitution and its amendments (e.g., 10th Amendment, defense and extradition).
- Students will analyze how states have challenged the national government regarding states’ rights (e.g., Civil War, the New Deal, No Child Left Behind, Affordable Health Care Act, Civil Rights Movement).

Evaluate how citizens are affected by the local, state and national governments.

- Students will identify local government officials and employees who affect the daily lives of citizens.
- Students will identify the role of state governmental officials and employees who affect the daily lives of citizens.
- Students will identify the role of national governmental officials and employees who affect the daily lives of citizens.
- Students will explain how government at all levels impacts the daily lives of citizens.

Analyze how U.S. foreign policy supports democratic principles and protects human rights around the world.

- Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.

Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.
SS.912.G.1.2: Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

SS.912.G.1.4: Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

SS.912.G.1.4: Clarifications:
- Examples are thematic, contour, and dot-density.

SS.912.G.4.1: Interpret population growth and other demographic data for any given place.

SS.912.H.1.6: Analyze how current events are explained by artistic and cultural trends of the past.

SS.912.W.1.1: Use timelines to establish cause and effect relationships of historical events.

SS.912.W.1.2: Compare time measurement systems used by different cultures.

SS.912.W.1.3: Interpret and evaluate primary and secondary sources.

SS.912.W.1.4: Explain how historians use historical inquiry and other sciences to understand the past.

SS.912.W.1.6: Evaluate the role of history in shaping identity and character.

SS.912.W.2.18: Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.

SS.912.W.5.4: Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.

MA.K12.MTR.1.1: Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

MA.K12.MTR.1.1: Clarifications:
- Teachers who encourage students to participate actively in effortful learning both individually and with others:
  - Cultivate a community of growth mindset learners.
  - Foster perseverance in students by choosing tasks that are challenging.
  - Develop students' ability to analyze and problem solve.
  - Recognize students' effort when solving challenging problems.

MA.K12.MTR.2.1: Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1: Clarifications:
- Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
  - Help students make connections between concepts and representations.
  - Provide opportunities for students to use manipulatives when investigating concepts.
  - Guide students from concrete to pictorial to abstract representations as understanding progresses.
  - Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1: Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1: Clarifications:
- Teachers who encourage students to complete tasks with mathematical fluency:
  - Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
  - Offer multiple opportunities for students to practice efficient and generalizable methods.
  - Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clarifications:**
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

**MA.K12.MTR.4.1:**
Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

**MA.K12.MTR.5.1:**
Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

**MA.K12.MTR.6.1:**
Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

**MA.K12.MTR.7.1:**
Cite evidence to explain and justify reasoning.

**Clarifications:**
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

**ELA.K12.EE.1.1:**
Read and comprehend grade-level complex texts proficiently.

**Clarifications:**
See Text Complexity for grade-level complexity bands and a text complexity rubric.
### Make inferences to support comprehension.

**Clarifications:**

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

### Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clarifications:**

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think ______ because ______.” The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic discussions discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

### Use the accepted rules governing a specific format to create quality work.

**Clarifications:**

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

### Use appropriate voice and tone when speaking or writing.

**Clarifications:**

In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

### English language learners communicate for social and instructional purposes within the school setting.

**Clarifications:**

ELD.K12.ELL.SS.1: 

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

ELD.K12.ELL.SI.1: 

Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

HE.912.C.2.4: 

Clarifications:

Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

---

### General Course Information and Notes

#### GENERAL NOTES

**Comprehensive Law** - The grade 9-12 Comprehensive Law course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content for the course pertains to the study of the components and processes associated with the American legal system and the comprehensive examination of the civil and criminal justice systems. Content should include, but is not limited to, the historical antecedents and purpose for laws, the impact of social values on the establishment and interpretation of laws, causes and consequences of crime, evaluation of the adult and juvenile justice systems, significance of the Bill of Rights to the American legal system and elements of constitutionalism, civil and criminal law, family and consumer law, rights and responsibilities under the law, and the adversarial versus inquisitorial systems of justice. This course will incorporate the development of a written appellate brief addressing a contemporary legal question and the presentation of oral arguments to defend their position legally.

**Honors and Advanced Level Course Note:** Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students’ content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida’s Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida’s B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit [https://www.cpalms.org/Standards/BEST_Standards.aspx](https://www.cpalms.org/Standards/BEST_Standards.aspx) and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: [https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf](https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf)
**Course Number:** 2106375

**Number of Credits:** One (1) credit

**Course Type:** Elective Course

**Course Status:** Draft - Course Pending Approval

**Grade Level(s):** 9,10,11,12

**Course Path:** Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Political Sciences

**Abbreviated Title:** COMPRE LAW HON

**Course Length:** Year (Y)

**Course Attributes:**
- Honors

**Course Level:** 3

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
</tbody>
</table>
| SS.912.A.1.2: | Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.  
**Clarifications:** Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection. |
| SS.912.A.1.3: | Utilize timelines to identify the time sequence of historical data. |
| SS.912.A.1.4: | Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.  
**Clarifications:** Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. |
| SS.912.A.1.5: | Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf  
**Clarifications:** |
| SS.912.A.1.6: | Use case studies to explore social, political, legal, and economic relationships in history. |
| SS.912.A.1.7: | Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.  
**Clarifications:** |
| SS.912.A.2.4: | Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution.  
**Clarifications:** Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.2.5: | Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups.  
**Clarifications:** This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.C.1.1: | Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government. |
| SS.912.C.1.2: | Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights. |
| SS.912.C.1.3: | Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy. |
| SS.912.C.1.4: | Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights. |
| SS.912.C.1.5: | Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism. |
| SS.912.C.2.1: | Evaluate the constitutional provisions establishing citizenship, and assess the criteria among citizens by birth, naturalized citizens, and non-citizens. |
| SS.912.C.2.2: | Evaluate the importance of political participation and civic participation.  
Experience the responsibilities of citizens at the local, state, or federal levels.  
**Clarifications:** Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election. |
| SS.912.C.2.3: | Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good. |
| SS.912.C.2.4: | Evaluate, take, and defend positions about rights protected by the Constitution and Bill of Rights. |
| SS.912.C.2.5: | Explain why rights have limits and are not absolute.  
**Clarifications:** Examples are speech, search and seizure, religion, gun possession. |
| SS.912.C.2.6: | Analyze the impact of citizen participation as a means of achieving political and social change.  
**Clarifications:** Examples are e-mail campaigns, boycotts, blogs, podcasts, protests, demonstrations, letters to editors. |
| SS.912.C.2.7: | Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.  
**Clarifications:** Examples are Preamble, Declaration of Independence, Constitution, Emancipation Proclamation, 13th, 14th, 15th, 19th, 24th, and 26th Amendments, Voting Rights Act of 1965. |
| SS.912.C.2.8: | Monitor current public issues in Florida.  
**Clarifications:** |
**SS.912.C.2.11:** Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.

**SS.912.C.2.12:** Explain the changing roles of television, radio, press, and Internet in political communication.

**SS.912.C.2.13:** Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.

**SS.912.C.2.14:** Clarifications: Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media.

**SS.912.C.2.15:** Evaluate the origins and roles of political parties, interest groups, media, and individuals in determining and shaping public policy.

**SS.912.C.3.1:** Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights.

**SS.912.C.3.2:** Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.

**SS.912.C.3.3:** Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.

**SS.912.C.3.4:** Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.

**SS.912.C.3.5:** Identify the impact of independent regulatory agencies in the federal bureaucracy.

**SS.912.C.3.6:** Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.

**SS.912.C.3.7:** Describe the role of judicial review in American constitutional government.

**SS.912.C.3.8:** Clarifications: Examples are decisions based on the law vs. will of the majority.

**SS.912.C.3.9:** Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them.

**SS.912.C.3.10:** Evaluate the significance and outcomes of landmark Supreme Court cases.

**SS.912.C.3.11:** Clarifications: Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.

**SS.912.C.3.12:** Interpret population growth and other demographic data for any given place.

**SS.912.C.3.13:** Clarifications: Examples are Magna Carta, parliament, habeas corpus.

**SS.912.C.3.14:** Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

**SS.912.C.3.16:** Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

**SS.912.C.3.17:** Clarifications: Examples are thematic, contour, and dot-density.

**SS.912.C.3.18:** Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

**SS.912.C.3.19:** Clarifications: Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media.

**SS.912.C.3.20:** Use timelines to establish cause and effect relationships of historical events.

**SS.912.C.3.21:** Interpret and evaluate primary and secondary sources.

**SS.912.C.3.22:** Clarifications: Examples are artifacts, images, auditory and written sources.

**SS.912.C.3.23:** Analyze how events are explained by artistic and cultural trends of the past.

**SS.912.C.3.24:** Clarifications: Examples are education, transportation, crime prevention, funding of services.

**SS.912.C.3.25:** Interpret and evaluate primary and secondary sources.

**SS.912.C.3.26:** Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.

**SS.912.C.3.27:** Evaluate the role of history in shaping identity and character.

**SS.912.C.3.28:** Clarifications: Examples are ethnic, cultural, personal, national, religious.

**SS.912.C.3.29:** Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.

**SS.912.C.3.30:** Clarifications: Examples are Magna Carta, parliament, habeas corpus.

**SS.912.C.3.31:** Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.

**LAFS.910.RH.1.1:** Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.

**LAFS.910.RH.1.2:** Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.

**LAFS.910.RH.1.3:** Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.

**LAFS.910.RH.2.4:** Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.

<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAFS.910.RH.2.5:</td>
<td>Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.</td>
</tr>
<tr>
<td>LAFS.910.RH.2.6:</td>
<td>Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.</td>
</tr>
<tr>
<td>LAFS.910.RH.3.7:</td>
<td>Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.</td>
</tr>
<tr>
<td>LAFS.910.RH.3.8:</td>
<td>Assess the extent to which the reasoning and evidence in a text support the author's claims.</td>
</tr>
<tr>
<td>LAFS.910.RH.3.9:</td>
<td>Compare and contrast treatments of the same topic in several primary and secondary sources.</td>
</tr>
<tr>
<td>LAFS.910.RH.4.10:</td>
<td>By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.</td>
</tr>
<tr>
<td>LAFS.910.SL.1.1:</td>
<td>Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.</td>
</tr>
<tr>
<td>LAFS.910.SL.1.2:</td>
<td>Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.</td>
</tr>
<tr>
<td>LAFS.910.SL.2.4:</td>
<td>Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.</td>
</tr>
<tr>
<td>LAFS.910.WHST.1.1:</td>
<td>Write arguments focused on discipline-specific content.</td>
</tr>
<tr>
<td>a.</td>
<td>Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence.</td>
</tr>
<tr>
<td>b.</td>
<td>Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns.</td>
</tr>
<tr>
<td>C.</td>
<td>Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.</td>
</tr>
<tr>
<td>d.</td>
<td>Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.</td>
</tr>
<tr>
<td>e.</td>
<td>Provide a concluding statement or section that follows from or supports the argument presented.</td>
</tr>
<tr>
<td>LAFS.910.WHST.2.4:</td>
<td>Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes.</td>
</tr>
<tr>
<td>a.</td>
<td>Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.</td>
</tr>
<tr>
<td>b.</td>
<td>Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.</td>
</tr>
<tr>
<td>C.</td>
<td>Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts.</td>
</tr>
<tr>
<td>d.</td>
<td>Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers.</td>
</tr>
<tr>
<td>e.</td>
<td>Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.</td>
</tr>
<tr>
<td>f.</td>
<td>Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).</td>
</tr>
<tr>
<td>LAFS.910.WHST.2.5:</td>
<td>Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.</td>
</tr>
<tr>
<td>LAFS.910.WHST.2.6:</td>
<td>Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.</td>
</tr>
<tr>
<td>LAFS.910.WHST.2.7:</td>
<td>Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.</td>
</tr>
<tr>
<td>LAFS.910.WHST.3.7:</td>
<td>Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.</td>
</tr>
<tr>
<td>LAFS.910.WHST.3.8:</td>
<td>Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively, assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.</td>
</tr>
<tr>
<td>LAFS.910.WHST.3.9:</td>
<td>Draw evidence from informational texts to support analysis, reflection, and research.</td>
</tr>
<tr>
<td>LAFS.910.WHST.4.10:</td>
<td>Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.</td>
</tr>
<tr>
<td>MAFS.912.S-IC.2.3:</td>
<td>Represent data with plots on the real number line (dot plots, histograms, and box plots). ★</td>
</tr>
<tr>
<td>MAFS.912.S-IC.2.4:</td>
<td>Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★</td>
</tr>
<tr>
<td>MAFS.912.S-IC.2.5:</td>
<td>Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★</td>
</tr>

</tr>
</tbody>
</table>

**MAFS.912.S-ID.1.3:** Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★

**Standard Relation to Course: Supporting |

**Make sense of problems and persevere in solving them.**
Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

**Construct viable arguments and critique the reasoning of others.**
Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and— if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

**Use appropriate tools strategically.**
Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

**Attend to precision.**
Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

**ELD.K12.ELL.SL.1:** English language learners communicate for social and instructional purposes within the school setting.

**ELD.K12.ELL.SL.5:** English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

**HE.912.C.2.4:** Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

**Clarifications:**
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.
Legal Systems and Concepts - The grade 9-12 Legal Systems and Concepts course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, Civics and Government. The primary content for the course pertains to the examination of the American legal system and the nature of specific rights granted under the United States Constitution. Content should include, but is not limited to, the historical antecedents of laws and the basis for the creation of laws, the background, principles and applications of the United States Constitution, the rights protected by the Constitution and precedent-setting cases related to these rights, the process for enacting criminal laws at the state and local levels, the stages of the criminal justice system, the government and private agencies which provide services to individuals accused of crimes, the citizen's role in the legal system, the role of women and diverse cultural groups within the justice system, and careers in the justice system.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies
Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

GENERAL INFORMATION

Course Number: 2106380
Course Path: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Political Sciences >
Abbreviated Title: LEGAL SYSS & CONCS
Course Length: Semester (S)
Course Level: 2

Educator Certifications
Political Science (Grades 6-12)
Social Science (Grades 6-12)
Law (Secondary Grades 7-12)
<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.2</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. <strong>Clarifications:</strong> Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</td>
</tr>
<tr>
<td>SS.912.A.1.3</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.4</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past. Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. <strong>Clarifications:</strong> Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: <a href="http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf">http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf</a></td>
</tr>
<tr>
<td>SS.912.A.1.5</td>
<td><strong>Clarifications:</strong> Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDoe End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.1.6</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.A.1.7</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications. Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. <strong>Clarifications:</strong> Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. <strong>Clarifications:</strong> Examples include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDoe End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.2.1</td>
<td><strong>Clarifications:</strong> Examples are e-mail campaigns, boycotts, blogs, podcasts, protests, demonstrations, letters to editors. Explain why rights have limits and are not absolute.</td>
</tr>
<tr>
<td>SS.912.C.2.11</td>
<td>Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.</td>
</tr>
<tr>
<td>SS.912.C.12</td>
<td>Explain the changing roles of television, radio, press, and Internet in political communication.</td>
</tr>
<tr>
<td>SS.912.C.13</td>
<td>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media.</td>
</tr>
<tr>
<td>SS.912.C.15</td>
<td>Evaluate the origins and roles of political parties, interest groups, media, and individuals in determining and shaping public policy.</td>
</tr>
<tr>
<td>SS.912.C.31</td>
<td>Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.32</td>
<td>Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.</td>
</tr>
<tr>
<td>SS.912.C.33</td>
<td>Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.34</td>
<td>Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.35</td>
<td>Identify the impact of independent regulatory agencies in the federal bureaucracy.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are Federal Reserve, Food and Drug Administration, Federal Communications Commission.</td>
</tr>
<tr>
<td>SS.912.C.36</td>
<td>Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.37</td>
<td>Describe the role of judicial review in American constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.38</td>
<td>Compare the role of judges on the state and federal level with other elected officials.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are decisions based on the law vs. will of the majority.</td>
</tr>
<tr>
<td>SS.912.C.39</td>
<td>Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them.</td>
</tr>
<tr>
<td>SS.912.C.310</td>
<td>Evaluate the significance and outcomes of landmark Supreme Court cases.</td>
</tr>
<tr>
<td>SS.912.C.311</td>
<td>Contrast how the Constitution safeguards and limits individual rights.</td>
</tr>
<tr>
<td>SS.912.C.312</td>
<td>Simulate the judicial decision-making process in interpreting law at the state and federal level.</td>
</tr>
<tr>
<td>SS.912.C.313</td>
<td>Illustrate examples of how government affects the daily lives of citizens at the local, state, and national levels.</td>
</tr>
<tr>
<td>SS.912.C.314</td>
<td>Examine constitutional powers (expressed, implied, concurrent, reserved).</td>
</tr>
<tr>
<td>SS.912.C.315</td>
<td>Examine how power and responsibility are distributed, shared, and limited by the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.313</td>
<td>Assess human rights policies of the United States and other countries.</td>
</tr>
<tr>
<td>SS.912.C.312</td>
<td>Use a decision-making model to analyze a public policy issue affecting the student’s community that incorporates defining a problem, analyzing potential consequences, and considering the alternatives.</td>
</tr>
<tr>
<td>SS.912.C.312</td>
<td>Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.</td>
</tr>
<tr>
<td>SS.912.C.312</td>
<td>Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.</td>
</tr>
<tr>
<td>SS.912.C.312</td>
<td><strong>Clarifications:</strong> Examples are thematic, contour, and dot-density.</td>
</tr>
<tr>
<td>SS.912.C.312</td>
<td>Interpret population growth and other demographic data for any given place.</td>
</tr>
<tr>
<td>SS.912.C.312</td>
<td><strong>Clarifications:</strong> Examples are ethnic, cultural, personal, national, religious.</td>
</tr>
<tr>
<td>SS.912.C.312</td>
<td>Analyze how current events are explained by artistic and cultural trends of the past.</td>
</tr>
<tr>
<td>SS.912.C.312</td>
<td>Use timelines to establish cause and effect relationships of historical events.</td>
</tr>
<tr>
<td>SS.912.C.312</td>
<td>Interpret and evaluate primary and secondary sources.</td>
</tr>
<tr>
<td>SS.912.C.312</td>
<td>Explain how historians use historical inquiry and other sciences to understand the past.</td>
</tr>
<tr>
<td>SS.912.C.312</td>
<td><strong>Clarifications:</strong> Examples are artifacts, images, auditory and written sources.</td>
</tr>
<tr>
<td>SS.912.C.312</td>
<td>Evaluate the role of history in shaping identity and character.</td>
</tr>
<tr>
<td>SS.912.C.312</td>
<td><strong>Clarifications:</strong> Examples are ethnic, cultural, personal, national, religious.</td>
</tr>
<tr>
<td>SS.912.C.312</td>
<td>Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.</td>
</tr>
<tr>
<td>SS.912.C.312</td>
<td><strong>Clarifications:</strong> Examples are Magna Carta, parliament, habeas corpus.</td>
</tr>
<tr>
<td>SS.912.C.312</td>
<td>Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Mathematicians who participate in effortful learning both individually and with others:</td>
</tr>
<tr>
<td></td>
<td>• Analyze the problem in a way that makes sense given the task.</td>
</tr>
<tr>
<td></td>
<td>• Ask questions that will help with solving the task.</td>
</tr>
<tr>
<td></td>
<td>• Build perseverance by modifying methods as needed while solving a challenging task.</td>
</tr>
<tr>
<td></td>
<td>• Stay engaged and maintain a positive mindset when working to solve tasks.</td>
</tr>
<tr>
<td></td>
<td>• Help and support each other when attempting a new method or approach.</td>
</tr>
</tbody>
</table>
Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

**MA.K12.MTR.6.1:**
- Assess the reasonableness of solutions.
  - Estimate to discover possible solutions.
  - Use benchmark quantities to determine if a solution makes sense.
  - Check calculations when solving problems.
  - Verify possible solutions by explaining the methods used.
  - Evaluate results based on the given context.

### Demonstrate understanding by representing problems in multiple ways.

Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

**MA.K12.MTR.2.1:**
- Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts.
- Teachers who engage in discussions that reflect on the mathematical thinking of self and others.
- Teachers who complete tasks with mathematical fluency.
- Teachers who demonstrate understanding by representing problems in multiple ways.
- Teachers who encourage students to participate actively in effortful learning both individually and with others.

### Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**MA.K12.MTR.3.1:**
- Clarifications:
  - Teachers who encourage students to complete tasks with mathematical fluency:
    - Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
    - Offer multiple opportunities for students to practice efficient and generalizable methods.
    - Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

### Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**MA.K12.MTR.4.1:**
- Clarifications:
  - Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
    - Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
    - Create opportunities for students to discuss their thinking with peers.
    - Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
    - Develop students' ability to analyze and problem solve.
    - Foster perseverance in students by choosing tasks that are challenging.

### Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**MA.K12.MTR.5.1:**
- Clarifications:
  - Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
    - Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
    - Support students to develop generalizations based on the similarities found among problems.
    - Provide opportunities for students to create plans and procedures to solve problems.
    - Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

### Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.
### General Course Information and Notes

**GENERAL NOTES**

### Clarifications:

**Teachers who encourage students to assess the reasonableness of solutions:**
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

**Clarifications:**

- Mathematically who apply mathematics to real-world contexts:
  - Connect mathematical concepts to everyday experiences.
  - Use models and methods to understand, represent and solve problems.
  - Perform investigations to gather data or determine if a method is appropriate.
  - Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**

- Teachers who encourage students to apply mathematics to real-world contexts:
  - Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
  - Challenge students to question the accuracy of their models and methods.
  - Support students as they validate conclusions by comparing them to the given situation.
  - Indicate how various concepts can be applied to other disciplines.

**Cite evidence to explain and justify reasoning.**

### Clarifications:

**K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.**

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

### Read and comprehend grade-level complex texts proficiently.

**Clarifications:**

See Text Complexity for grade-level complexity bands and a text complexity rubric.

### Make inferences to support comprehension.

**Clarifications:**

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

### Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clarifications:**

In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think ________ because ________." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

### Use the accepted rules governing a specific format to create quality work.

**Clarifications:**

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

### Use appropriate voice and tone when speaking or writing.

**Clarifications:**

In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

**English language learners communicate for social and instructional purposes within the school setting.**

**English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.**

**Evaluate how public health policies and government regulations can influence health promotion and disease prevention.**

**Clarifications:**

Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.
Legal Systems and Concepts - The grade 9-12 Legal Systems and Concepts course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, Civics and Government. The primary content for the course pertains to the examination of the American legal system and the nature of specific rights granted under the United States Constitution. Content should include, but is not limited to, the historical antecedents of laws and the basis for the creation of laws, the background, principles and applications of the United States Constitution, the rights protected by the Constitution and precedent-setting cases related to these rights, the process for enacting criminal laws at the state and local levels, the stages of the criminal justice system, the government and private agencies which provide services to individuals accused of crimes, the citizen’s role in the legal system, the role of women and diverse cultural groups within the justice system, and careers in the justice system.

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

GENERAL INFORMATION

Course Number: 2106380
Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Political Sciences > Abbreviated Title: LEGAL SYSS & CONCS
Course Length: Semester (S)
Course Type: Elective Course
Course Status: State Board Approved
Grade Level(s): 9,10,11,12
Number of Credits: Half credit (.5)

Educator Certifications
- Political Science (Grades 6-12)
- Social Science (Grades 6-12)
- Law (Secondary Grades 7-12)
## Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
</tbody>
</table>
| SS.912.A.1.2: | Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.  
**Clarifications:**  
Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection. |
| SS.912.A.1.3: | Utilize timelines to identify the time sequence of historical data. |
| SS.912.A.1.4: | Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.  
**Clarifications:**  
Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. |
| SS.912.A.1.5: | Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bil/library_media/pdf/12totalfinds.pdf |
| SS.912.A.1.6: | Use case studies to explore social, political, legal, and economic relationships in history. |
| SS.912.A.1.7: | Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.  
**Clarifications:**  
Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. |
| SS.912.A.2.4: | Explain the influence of Enlightenment ideas on the Declaration of Independence.  
- Students will identify grievances listed in the Declaration of Independence in terms of due process of law, individual rights, natural rights, popular sovereignty and social contract.  
- Students will explain national sovereignty, natural law, self-evident truth, equality of all persons, due process of law, limited government, popular sovereignty, and unalienable rights of life, liberty and property as they relate to Enlightenment ideas in the Declaration of Independence.  
- Students will recognize that national sovereignty, due process of law, natural law, self-evident truth, equality of all persons, limited government, popular sovereignty, and unalienable rights of life, liberty and property form the philosophical foundation of our government.  
| SS.912.A.2.5: | Explain arguments presented in the Federalist Papers in support of ratifying the U.S. Constitution and a republican form of government.  
- Students will recognize that the Federalist Papers argued for a federal system of government, separation of powers and a representative form of government that is accountable to its citizens.  
- Students will analyze Federalist and Anti-Federalist arguments concerning ratification of the U.S. Constitution and inclusion of a bill of rights. |
| SS.912.CG.1.2: | Explain how the ideas and principles expressed in the founding documents shape America as a constitutional republic.  
- Students will differentiate among the documents and determine how each one was individually significant to the founding of the United States.  
- Students will evaluate how the documents are connected to one another.  
- Documents include, but are not limited to, the Declaration of Independence, Articles of Confederation, Federalist Papers (e.g., No. 10. No. 14, No. 31, No. 39, No. 51) and the U.S. Constitution.  
- Students will identify key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason). |
| SS.912.CG.1.3: | Explain how the U.S. Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers.  
- Students will explain how the structure and function of the U.S. government reflects these political principles.  
- Students will differentiate between republicanism and democracy, and discuss how the United States reflects both.  
- Students will describe compromises made during the Constitutional Convention (e.g., the Great Compromise, the Three-Fifths Compromise, the Electoral College). |
| SS.912.CG.1.5: | Explain the constitutional provisions that establish and affect citizenship.  
- Students will explain how the concept of citizenship in the United States has changed over the course of history (i.e., 13th, 14th, 15th and 19th Amendments).  
- Students will compare birthright citizenship, permanent residency and naturalization in the United States.  
- Students will differentiate the rights held by native-born citizens, permanent residents and naturalized citizens (e.g., running for public office). |
| SS.912.CG.2.1: | Explain the importance of political and civic participation to the success of the United States’ constitutional republic. |
SS.912.CG.2.2: Students will discuss various ways in which U.S. citizens can exercise political and civic participation.

SS.912.CG.2.3: Explain the responsibilities of citizens at the local, state and national levels.

SS.912.CG.2.4: Students will discuss the ways in which individuals can be denied and limited in their right to practice political and civic participation (e.g., losing voting rights for felony conviction, limitations on political contributions, limits on the type of protesting).

SS.912.CG.2.5: Analyze contemporary and historical examples of government-imposed restrictions on rights.

SS.912.CG.2.6: Explain how the principles contained in foundational documents contributed to the expansion of civil rights and liberties over time.

SS.912.CG.2.7: Analyze the impact of civic engagement as a means of preserving or reforming institutions.

SS.912.CG.2.8: Explain the impact of political parties, interest groups, media and individuals on determining and shaping public policy.

SS.912.CG.2.9: Evaluate political communication for bias, factual accuracy, omission and emotional appeal.

SS.912.CG.2.10: Explain how interest groups, the media and public opinion influence local, state and national decision-making related to public issues.

SS.912.CG.2.11: Analyze the influence and effects of various forms of media and the internet in political communication.

SS.912.CG.2.12: Analyze how certain political ideologies conflict with the principles of freedom and democracy.

SS.912.CG.2.13: Explain how the U.S. Constitution safeguards and limits individual rights.

SS.912.CG.2.14: Analyze the structures, functions and processes of the legislative branch as described in Article I of the U.S. Constitution.

SS.912.CG.3.1: Students will explain why Article I of the U.S. Constitution established a bicameral legislative body and how the House of Representatives functions differently from the Senate.

SS.912.CG.3.2: Students will identify the methods for determining the number of members in the House of Representatives and the Senate.

SS.912.CG.3.3: Students will describe the ways in which citizens can exercise political and civic participation (e.g., voting, volunteering and being informed, respecting laws).
### Analyze the structures, functions and processes of the executive branch as described in Article II of the U.S. Constitution.
- Students will explain the qualifications one must have to seek the office of president and the process of presidential elections.
- Students will explain different presidential responsibilities outlined in Article II (e.g., receiving foreign heads of state, delivering the State of the Union address, carrying out faithful execution of the law).
- Students will examine the role of the executive branch in terms of its relationship with the judicial and legislative branches of the government.
- Students will describe constitutional amendments (i.e., 12th, 20th, 22nd and 25th) that have changed the role of the executive branch from its original description in Article II.
- Students will describe the impeachment process.

### Describe how independent regulatory agencies interact with the three branches of government and with citizens.
- Students will identify independent regulatory agencies (e.g., Federal Communications Commission, Federal Election Commission, National Labor Relations Board) and explain their purpose and effect.
- Students will describe the advantages and disadvantages of delegating power to independent regulatory agencies.

### Explain expressed, implied, concurrent and reserved powers in the U.S. Constitution.
- Students will identify powers that are expressed in the U.S. Constitution to Congress (e.g., coin money, declare war, assess taxes, citizenship).
- Students will explain that expressed powers are also known as enumerated powers found in Article I of the U.S. Constitution.
- Students will analyze the role of the “general welfare clause” and “necessary and proper clause” in granting Congress implied powers.
- Students will describe examples of concurrent powers as those powers shared by both state and national governments (e.g., build roads, tax citizens, make laws).
- Students will explain how reserved powers define issues as matters for the people or the state governments.
- Students will compare the roles of expressed, implied, concurrent and reserved powers in United States’ federalism.

### Analyze the structures, functions and processes of the judicial branch as described in Article III of the U.S. Constitution.
- Students will examine the role of the judicial branch in terms of its relationship with the legislative and executive branches of government.
- Students will describe the role of the Supreme Court and lesser federal courts.
- Students will explain what Article III says about judicial tenure, appointment and salaries.
- Students will describe the powers delegated to the courts by Article III including, but not limited to, treason, jurisdiction and trial by jury.

### Describe the purpose and function of judicial review in the American constitutional government.
- Students will examine the role of district courts, the courts of appeals and the Supreme Court in the judicial review process.
- Students will explain the relationship between the concept of judicial review and the language of the Supremacy Clause in Article VI of the U.S. Constitution.

### Compare the role of state and federal judges with other elected officials.
- Students will compare the ways state and federal judges are appointed compared to other elected officials.
- Students will distinguish the qualifications needed for a judge at the state or federal level versus other elected officials.
- Students will compare the decision-making process of judges compared to other political figures.

### Analyze the levels and responsibilities of state and federal courts.
- Students will describe what Article III of the U.S. Constitution states about the relationship between state and federal courts.
- Students will recognize the role of the Federal Judiciary Act of 1789 in establishing the structure and jurisdiction of the federal court system.
- Students will contrast the differences among civil trials and criminal trials at the state level.
- Students will describe the relationship among the Supreme Court, federal appellate courts and federal district courts (e.g., Erie Doctrine, Rooker-Feldman Doctrine).

### Evaluate how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution.
- Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; McCulloch v. Maryland; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; Korematsu v. United States; Mapp v. Ohio; In re Gault; United States v. Nixon; Regents of the University of California v. Bakke; Hazelwood v. Kuhlmeier; District of Columbia v. Heller).
- Students will explain the foundational constitutional issues underlying landmark Supreme Court decisions related to the Bill of Rights and other amendments.
- Students will explain the outcomes of landmark Supreme Court cases related to the Bill of Rights and other amendments.

### Analyze the concept of federalism in the United States and its role in establishing the relationship between the state and national governments.
- Students will identify examples of the powers reserved and shared among state and the national governments in the American federal system of government.
- Students will examine the role the Great Compromise had on the eventual establishment of a federal system of fifty equal states.
- Students will explain specific rights that are granted to the states in the language of the U.S. Constitution and its amendments (e.g., 10th Amendment, defense and extradition).
- Students will analyze how states have challenged the national government regarding states’ rights (e.g., Civil War, the New Deal, No Child Left Behind, Affordable Health Care Act, Civil Rights Movement).

### Explain the judicial decision-making process in interpreting law at the state and national levels.
- Students will explain the role of the U.S. Constitution in interpreting law at the state and national levels.
- Students will explain the process used by judges at the state and national levels when making a decision or writing summary opinions.
- Students will incorporate language from the U.S. Constitution or court briefs to justify a legal decision when interpreting state or national law.

### Explain how citizens are affected by the local, state and national governments.
- Students will identify local government officials and employees who affect the daily lives of citizens.
- Students will identify the role of state governmental officials and employees who affect the daily lives of citizens.
- Students will identify the role of national governmental officials and employees who affect the daily lives of citizens.
- Students will explain how government at all levels impacts the daily lives of citizens.

### Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.
- Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.

### Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.
Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

SS.912.G.1.4: Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

**Clarifications:**
Examples are thematic, contour, and dot-density.

SS.912.G.4.1: Interpret population growth and other demographic data for any given place.

SS.912.H.1.6: Analyze how current events are explained by artistic and cultural trends of the past.

SS.912.W.1.1: Use timelines to establish cause and effect relationships of historical events.

SS.912.W.1.3: Interpret and evaluate primary and secondary sources.

**Clarifications:**
Examples are artifacts, images, auditory and written sources.

SS.912.W.1.4: Explain how historians use historical inquiry and other sciences to understand the past.

**Clarifications:**
Examples are archaeology, economics, geography, forensic chemistry, political science, physics.

SS.912.W.1.6: Evaluate the role of history in shaping identity and character.

**Clarifications:**
Examples are ethnic, cultural, personal, national, religious.

SS.912.W.2.18: Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures.

**Clarifications:**
Examples are Magna Carta, parliament, habeas corpus.

SS.912.W.5.4: Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.

**Clarifications:**
Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

**Clarifications:**
Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students’ ability to analyze and problem solve.
- Recognize students’ effort when solving challenging problems.

Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

**Clarifications:**
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**Clarifications:**
Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- MA.K12.MTR.4.1: Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence.

**Clarifications:**
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

- Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
  - Focus on relevant details within a problem.
  - Create plans and procedures to logically order events, steps or ideas to solve problems.
  - Decompose a complex problem into manageable parts.
  - Relate previously learned concepts to new concepts.
  - Look for similarities among problems.
  - Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

- Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:
  - Estimate to discover possible solutions.
  - Use benchmark quantities to determine if a solution makes sense.
  - Check calculations when solving problems.
  - Verify possible solutions by explaining the methods used.
  - Evaluate results based on the given context.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

- Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:
  - Connect mathematical concepts to everyday experiences.
  - Use models and methods to understand, represent and solve problems.
  - Perform investigations to gather data or determine if a method is appropriate. Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

- Cite evidence to explain and justify reasoning.

**Clarifications:**
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

- Read and comprehend grade-level complex texts proficiently.

**Clarifications:**
See Text Complexity for grade-level complexity bands and a text complexity rubric.

- Make inferences to support comprehension.

**Clarifications:**
 Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ElA.K12.EE.3.1: Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clariﬁcations:
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _______ because ________” The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, reﬁning and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ElA.K12.EE.4.1: Use the accepted rules governing a speciﬁc format to create quality work.

Clariﬁcations:
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ElA.K12.EE.5.1: Use appropriate voice and tone when speaking or writing.

Clariﬁcations:
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

ElA.K12.EE.6.1: Evaluate how public health policies and government regulations can inﬂuence health promotion and disease prevention.

Clariﬁcations:
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

General Information

Course Number: 2106380
Course Path: Section: Grades PreK to 12 Education
Courses > Grade Group: Grades 9 to 12 and Adult
Education Courses > Subject: Social Studies >
SubSubject: Political Sciences >

General NOTES

Legal Systems and Concepts – The grade 9-12 Legal Systems and Concepts course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, Civics and Government. The primary content for the course pertains to the examination of the American legal system and the nature of specific rights granted under the United States Constitution. Content should include, but is not limited to, the historical antecedents of laws and the basis for the creation of laws, the background, principles and applications of the United States Constitution, the rights protected by the Constitution and precedent-setting cases related to these rights, the process for enacting criminal laws at the state and local levels, the stages of the criminal justice system, the government and private agencies which provide services to individuals accused of crimes, the citizen’s role in the legal system, the role of women and diverse cultural groups within the justice system, and careers in the justice system.

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students’ content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
3. Asking high-level, text-speciﬁc questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida’s Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida’s B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EE and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proﬁciency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

</table>
SS.912.C.3.15: Examine how power and responsibility are distributed, shared, and limited by the Constitution.

SS.912.C.4.3: Assess human rights policies of the United States and other countries.

SS.912.E.2.2: Use a decision-making model to analyze a public policy issue affecting the student’s community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.

SS.912.G.1.4: Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

SS.912.G.4.1: Interpret population growth and other demographic data for any given place.

SS.912.H.1.6: Analyze how current events are explained by artistic and cultural trends of the past.

SS.912.W.1.1: Use timelines to establish cause and effect relationships of historical events.

SS.912.W.1.3: Interpret and evaluate primary and secondary sources.

SS.912.W.1.4: Explain how historians use historical inquiry and other sciences to understand the past.

Clarifications:
Examples are archaeology, economics, geography, forensic chemistry, political science, physics.

LAFS.910.RH.1.1: Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.

LAFS.910.RH.1.2: Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.

LAFS.910.RH.1.3: Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.

LAFS.910.RH.2.4: Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.

LAFS.910.RH.2.5: Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.

LAFS.910.RH.2.6: Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.

LAFS.910.RH.3.7: Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.

LAFS.910.RH.3.8: Assess the extent to which the reasoning and evidence in a text support the author's claims.

LAFS.910.RH.3.9: Compare and contrast treatments of the same or similar events in several primary and secondary sources.

LAFS.910.RH.4.10: By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.

LAFS.910.RH.1.2: Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others’ ideas and expressing their own clearly and persuasively.

a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.

b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.

c. Propose conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.

d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

LAFS.910.RH.1.3: Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.

LAFS.910.RH.2.4: Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.

LAFS.910.RH.1.3: Write arguments focused on discipline-specific content.

a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence.

b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns.

c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.

d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

e. Provide a concluding statement or section that follows from or supports the argument presented.

LAFS.910.RH.1.1: Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes.

a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.

b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.

c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts.

d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers.

e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
LAFS.910.WHST.4.10: Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

| MAFS.912.S-IC.1.1: | Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★ Standard Relation to Course: Supporting |
| MAFS.912.S-IC.1.2: | Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ Standard Relation to Course: Supporting |
| MAFS.912.S-IC.1.3: | Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★ Standard Relation to Course: Supporting |
| MAFS.912.S-IC.1.4: | Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★ Standard Relation to Course: Supporting |
| MAFS.912.S-ID.1.1: | In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting |
| MAFS.912.S-ID.1.2: | Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ Standard Relation to Course: Supporting |
| MAFS.912.S-ID.1.3: | Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★ Standard Relation to Course: Supporting |
| MAFS.912.S-ID.1.4: | Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★ Standard Relation to Course: Supporting |

**Construct viable arguments and critique the reasoning of others.**

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and— if there is a flaw in an argument— explain what is right. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other strategies. Older students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

<tr>
<th>MAFS.K12.MP.6.1:</th>
<th>Attend to precision.</th>
</tr>
</thead>
<tbody>
<tr>
<td>English language learners sometimes communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</td>

General Course Information and Notes

**GENERAL NOTES**

**Court Procedures** – The grade 9-12 Court Procedures course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content for the course pertains to the study of the structure, processes and procedures of the judicial systems of the United States and Florida. Content should include, but not be limited to, the structure, processes and procedures of county, circuit and federal courts, civil and criminal procedures, juvenile law, the rights of the accused, evolution of court procedures, comparative study of the structure, processes and procedures of the judicial systems of countries, and career choices in the judicial system.

**Mathematics Benchmark Guidance** – Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Literacy Standards in Social Studies**

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

<tr>
<td>SS.912.C.3.13</td>
<td>Clarifications: Examples are education, transportation, crime prevention, funding of services.</td>
</tr>
<tr>
<td>SS.912.C.3.14</td>
<td>Examine constitutional powers (expressed, implied, concurrent, reserved).</td>
</tr>
</tbody>
</table>
Examine how power and responsibility are distributed, shared, and limited by the Constitution.

Assess human rights policies of the United States and other countries.

Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.

Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

Clarifications:
Examples are thematic, contour, and dot-density.

Interpret population growth and other demographic data for any given place.

Analyze how current events are explained by artistic and cultural trends of the past.

Use timelines to establish cause and effect relationships of historical events.

Interpret and evaluate primary and secondary sources.

Clarifications:
Examples are artifacts, images, auditory and written sources.

SS.912.W.1.4:

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Mathematicians who participate in effortful learning both individually and with others:

Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Mathematicians who demonstrate understanding by representing problems in multiple ways:

Complete tasks with mathematical fluency:

Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

Clarifications:
See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

Clarifications:
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _______ because _______.” The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

Use the accepted rules governing a specific format to create quality work.

Use appropriate voice and tone when speaking or writing.

In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

**GENERAL INFORMATION**

**Course Number:** 2106390

**Number of Credits:** Half credit (.5)

**Course Type:** Elective Course

**Course Status:** State Board Approved

**Grade Levels:** 9,10,11,12

**Course Path:** Grades PreK to 12 Education

**Courses > Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Social Studies > **SubSubject:** Political Sciences >

**Abbreviated Title:** COURT PROCED

**Course Length:** Semester (S)

**Course Level:** 2

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.2</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</td>
</tr>
<tr>
<td>SS.912.A.1.3</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.4</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.</td>
</tr>
<tr>
<td>SS.912.A.1.5</td>
<td>Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</td>
</tr>
<tr>
<td>SS.912.A.1.6</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.A.1.7</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td>SS.912.CG.1.4</td>
<td>Analyze how the ideals and principles expressed in the founding documents shape America as a constitutional republic.</td>
</tr>
<tr>
<td>SS.912.CG.2.3</td>
<td>Explain the responsibilities of citizens at the local, state and national levels.</td>
</tr>
<tr>
<td>SS.912.CG.2.5</td>
<td>Analyze contemporary and historical examples of government-imposed restrictions on rights.</td>
</tr>
<tr>
<td>SS.912.CG.2.6</td>
<td>Explain how the principles contained in foundational documents contributed to the expansion of civil rights and liberties over time.</td>
</tr>
<tr>
<td>SS.912.CG.2.12</td>
<td>Explain how interest groups, the media and public opinion influence local, state and national decision-making related to public issues.</td>
</tr>
<tr>
<td>SS.912.CG.3.1</td>
<td>Analyze how certain political ideologies conflict with the principles of freedom and democracy.</td>
</tr>
<tr>
<td>SS.912.CG.3.2</td>
<td>Explain the U.S. Constitution safeguards and limits individual rights.</td>
</tr>
<tr>
<td>SS.912.CG.3.5</td>
<td>Describe how independent regulatory agencies interact with the three branches of government and with citizens.</td>
</tr>
</tbody>
</table>

**Clarifications:**
- Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf
- Documents include, but are not limited to, the Declaration of Independence, Articles of Confederation, Federalist Papers (e.g., No. 10, No. 14, No. 31, No. 39, No. 51) and the U.S. Constitution.
- Students will identify key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason).
- Students will objectively discuss current public issues in Florida and use both the U.S. and Florida Constitutions to justify pro and con positions.
- Students will examine the role of Founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights.
- Students will explain the role of Founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights.
- Students will examine the relationship and responsibilities of both the state and national governments regarding these public issues.
- Students will analyze public policy solutions related to local, state and national issues.
- Students will examine how different groups of people (e.g., African Americans, immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman's desegregation of the army, Lincoln's Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault).
- Students will analyze how the principles of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers contribute to the nation's longevity and its ability to overcome challenges, and distinguish the United States' constitutional republic from authoritarian and totalitarian nations.
- Students will identify that expressed powers are also known as enumerated powers found in Article I of the U.S. Constitution.
- Students will analyze the role of the "general welfare clause" and "necessary and proper clause" in granting Congress implied powers.
- Students will describe examples of concurrent powers as those powers shared by both state and national governments (e.g., build roads, tax citizens, make laws).
- Students will explain how reserved powers define issues as matters for the people or the state governments.
- Students will compare the roles of expressed, implied, concurrent and reserved powers in United States' federalism.

**SS.912.CG.3.6:**
Analyze the structures, functions, and processes of the judicial branch as described in Article III of the U.S. Constitution.

- Students will examine the role of the judicial branch in terms of its relationship with the legislative and executive branches of the government.
- Students will describe the role of the Supreme Court and lesser federal courts.
- Students will explain what Article III says about judicial tenure, appointment and salaries.
- Students will describe the powers delegated to the courts by Article III including, but not limited to, treason, jurisdiction and trial by jury.

**SS.912.CG.3.7:**
Describe the purpose and function of judicial review in the American constitutional government.

- Students will examine the role of district courts, the courts of appeals and the Supreme Court in the judicial review process.
- Students will explain the relationship between the concept of judicial review and the language of the Supremacy Clause in Article VI of the U.S. Constitution.

**SS.912.CG.3.8:**
Compare the role of state and federal judges with other elected officials.

- Students will compare the ways state and federal judges are appointed compared to other elected officials.
- Students will distinguish the qualifications needed for a judge at the state or federal level versus other elected officials.
- Students will compare the decision-making process of judges compared to other political figures.

**SS.912.CG.3.9:**
Analyze the levels and responsibilities of state and federal courts.

- Students will describe what Article III of the U.S. Constitution states about the relationship between state and federal courts.
- Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; McCulloch v. Maryland; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; Korematsu v. United States; Mapp v. Ohio; In re Gault; United States v. Nixon; Regents of the University of California v. Bakke; Hazelwood v. Kuhlmeier; District of Columbia v. Heller).
- Students will describe the role of the Supreme Court and federal appellate courts and federal district courts (e.g., Erie Doctrine, Rooker-Feldman Doctrine).

Evaluate how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution.

- Students will identify examples of the powers reserved and shared among state and the national governments in the American federal system of government.
- Students will examine the role the Great Compromise had on the eventual establishment of a federal system of fifty equal states.
- Students will explain specific rights that are granted to the states in the language of the U.S. Constitution and its amendments (e.g., 10th Amendment, defense and extradition).
- Students will analyze how states have challenged the national government regarding states' rights (e.g., Civil War, the New Deal, No Child Left Behind, Affordable Health Care Act, Civil Rights Movement).

**SS.912.CG.3.10:**
Analyze the concept of federalism in the United States and its role in establishing the relationship between the state and national governments.

- Students will identify examples of the powers reserved and shared among state and the national governments in the American federal system of government.
- Students will examine the role the Great Compromise had on the eventual establishment of a federal system of fifty equal states.
- Students will explain specific rights that are granted to the states in the language of the U.S. Constitution and its amendments (e.g., 10th Amendment, defense and extradition).
- Students will analyze how states have challenged the national government regarding states' rights (e.g., Civil War, the New Deal, No Child Left Behind, Affordable Health Care Act, Civil Rights Movement).

**SS.912.CG.3.11:**
Explain the judicial decision-making process in interpreting law at the state and national levels.

- Students will explain the role of the U.S. Constitution in interpreting law at the state and national levels.
- Students will explain the process used by judges at the state and national levels when making a decision or writing summary opinions.
- Students will incorporate language from the U.S. Constitution or court briefs to justify a legal decision when interpreting state or national law.

**SS.912.CG.3.12:**
Explain how citizens are affected by the local, state and national governments.

- Students will identify local government offices and employees who affect the daily lives of citizens.
- Students will identify the role of state governmental officials and employees who affect the daily lives of citizens.
- Students will identify how government at all levels impacts the daily lives of citizens.

**SS.912.CG.3.13:**
Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.

- Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.

**SS.912.CG.3.14:**
Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.

- Students will use geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

**SS.912.G.1.4:**
Claroifications:
Examples are thematic, contour, and dot-density.

**SS.912.G.4.1:**
Interpret population growth and other demographic data for any given place.

**SS.912.H.1.6:**
Analyze how current events are explained by artistic and cultural trends of the past.

**SS.912.W.1.1:**
Use timelines to establish cause and effect relationships of historical events.

**SS.912.W.1.3:**
Interpret and evaluate primary and secondary sources.

**SS.912.W.1.4:**
Explain how historians use historical inquiry and other sciences to understand the past.

Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

**MA.K12.MTR.1.1:**

<table>
<thead>
<tr>
<th>Clarifications:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Teachers who encourage students to participate actively in effortful learning both individually and with others:</td>

</tbody>
</table>
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**MA.K12.MTR.6.1:**

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students’ ability to verify solutions through justifications.

- Apply mathematics to real-world contexts.
- Mathematicians who apply mathematics to real-world contexts:
  - Connect mathematical concepts to everyday experiences.
  - Use models and methods to understand, represent and solve problems.
  - Perform investigations to gather data or determine if a method is appropriate.
  - Redesign models and methods to improve accuracy or efficiency.

**MA.K12.MTR.7.1:**

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

- Cite evidence to explain and justify reasoning.

**ELA.K12.EE.1.1:**

**Clarifications:**
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

**ELA.K12.EE.2.1:**

**Clarifications:**
See Text Complexity for grade-level complexity bands and a text complexity rubric.

- Read and comprehend grade-level complex texts proficiently.

**ELA.K12.EE.3.1:**

**Clarifications:**
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

- Make inferences to support comprehension.

**ELA.K12.EE.4.1:**

**Clarifications:**
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _______ because _______.” The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

- Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**ELA.K12.EE.5.1:**

**Clarifications:**
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

- Use the accepted rules governing a specific format to create quality work.

**ELA.K12.EE.6.1:**

**Clarifications:**
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

- Use appropriate voice and tone when speaking or writing.

**ELD.K12.ELL.SI.1:**

- English language learners communicate for social and instructional purposes within the school setting.

**ELD.K12.ELL.SS.1:**

- English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

**HE.912.C.2.4:**

- Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

**Clarifications:**
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.
**Court Procedures** - The grade 9-12 Court Procedures course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content for the course pertains to the study of the structure, processes and procedures of the judicial systems of the United States and Florida. Content should include, but not be limited to, the structure, processes and procedures of county, circuit and federal courts, civil and criminal procedures, juvenile law, the rights of the accused, evolution of court procedures, comparative legal systems, and career choices in the judicial system.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

## Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
</tbody>
</table>
| SS.912.A.1.2: | Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.  
Clariﬁcations: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection. |
| SS.912.A.1.4: | Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.  
Clariﬁcations: Review causes and consequences of the Civil War. |
| SS.912.A.2.1: | Assess the inﬂuence of signiﬁcant people or groups on Reconstruction.  
Clariﬁcations: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Speciﬁcations pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.2.2: | Compare the ﬁrst and second Industrial Revolutions in the United States.  
Clariﬁcations: Examples may include, but are not limited to, nationalism, imperialism, militarism, entangling alliances vs. neutrality, Zimmerman Note, the Lusitania, the Selective Service Act, the homefront, the American Expeditionary Force, Wilson's Fourteen Points, the Treaty of Versailles (and opposition to it), isolationism. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Speciﬁcations pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.3.2: | Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century.  
Clariﬁcations: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Speciﬁcations pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.3.3: | Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).  
Clariﬁcations: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Speciﬁcations page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.3.10: | Review different economic and philosophic ideologies.  
Clariﬁcations: Economic examples may include, but are not limited to, capitalism, socialism, communism, anarchy. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Speciﬁcations page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.4.5: | Examine causes, course, and consequences of United States involvement in World War I.  
Clariﬁcations: Examples may include, but are not limited to, nationalism, imperialism, militarism, entangling alliances vs. neutrality, Zimmerman Note, the Lusitania, the Selective Service Act, the homefront, the American Expeditionary Force, Wilson's Fourteen Points, the Treaty of Versailles (and opposition to it), isolationism. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Speciﬁcations pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
Identify causes for Post-World War II prosperity and its effects on American society.

**Clarifications:** Examples may include, but are not limited to, G.I. Bill, Baby Boom, growth of suburbs, Beatnik movement, youth culture, religious revivalism (e.g., Billy Graham and Bishop Fulton J. Sheen), conformity of the 1950s and the protest in the 1960s.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLODE End-of-Course (EOC) Assessments webpage and the FLODE Social Studies webpage.

| SS.912.A.7.1: | Identify causes for Post-World War II prosperity and its effects on American society. |
| SS.912.A.7.1: | **Clarifications:** Examples may include, but are not limited to, G.I. Bill, Baby Boom, growth of suburbs, Beatnik movement, youth culture, religious revivalism (e.g., Billy Graham and Bishop Fulton J. Sheen), conformity of the 1950s and the protest in the 1960s. District of Columbia v. Heller.

SS.912.C.3.11: Contrast how the Constitution safeguards and limits individual rights.

SS.912.C.3.12: Simulate the judicial decision-making process in interpreting law at the state and federal level.

SS.912.C.3.13: Illustrate examples of how government affects the daily lives of citizens at the local, state, and national levels.

Clarifications:
Examples are education, transportation, crime prevention, funding of services.

SS.912.C.3.14: Examine constitutional powers (expressed, implied, concurrent, reserved).

SS.912.C.3.15: Examine how power and responsibility are distributed, shared, and limited by the Constitution.

SS.912.C.4.1: Explain how the world's nations are governed differently.

SS.912.C.4.2: Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.

SS.912.C.4.4: Compare indicators of democratization in multiple countries.

LAFS.910.RH.1.1: Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.

LAFS.910.RH.1.2: Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.

LAFS.910.RH.1.3: Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.

LAFS.910.RH.2.4: Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.

LAFS.910.RH.2.5: Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.

LAFS.910.RH.2.6: Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.

LAFS.910.RH.3.7: Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.

LAFS.910.RH.3.8: Assess the extent to which the reasoning and evidence in a text support the author's claims.

LAFS.910.RH.3.9: Compare and contrast treatments of the same topic in several primary and secondary sources.

LAFS.910.RH.4.10: By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.

LAFS.910.SL.1.1: Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.

a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation when responding to others.

b. Work with peers to set rules for collaborative discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate ideas), clear goals and deadlines, and individual roles as needed.

c. Propet conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.

d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

LAFS.910.SL.1.2: Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.

LAFS.910.SL.1.3: Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.

LAFS.910.SL.2.4: Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.

LAFS.910.WHST.1.1: Write arguments focused on discipline-specific content.

a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence.

b. Develop claim(s) and counterclaim(s) fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaim(s) in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and needs.

c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaim(s).

d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

e. Provide a concluding statement or section that follows from or supports the argument presented.

LAFS.910.WHST.1.2: Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.

a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.

b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the discipline's knowledge of the topic.

c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts.

d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers.

e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).

LAFS.910.WHST.2.4: Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

LAFS.910.WHST.2.5: Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

LAFS.910.WHST.2.6: Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.

Draw evidence from informational texts to support analysis, reflection, and research.

Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each.

Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling.

Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant.

Use the mean and standard deviation of a data set to fit it to a normal distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

Use calculators, spreadsheets, and tables to estimate areas under the normal curve.

★ Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each.

★ Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling.

★ Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant.

★ Use the mean and standard deviation of a data set to fit it to a normal distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

★ Use calculators, spreadsheets, and tables to estimate areas under the normal curve.

Make sense of problems and persevere in solving them.

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

Construct viable arguments and critique the reasoning of others.

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Elementary students construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

Attend to precision.

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

English language learners communicate for social and instructional purposes within the school setting.

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.
The Humane Letters 1 -History course has content strands of Geography, Civics and Government, and History. Goal of the course is understanding the foundational principles of the American Republic and the structures and frameworks of government that supports the constitutional republic. It will explore the philosophical ideas around the function of the state, civil society, political movements, and ideologies as well as comparative forms of government. Additionally, the course pertains to the study of government institutions and political processes and their historical impact on American society. Content should include philosophical influences of the American Founders, the fundamental ideas and events that shaped the founding of the United States, the functions and purpose of government, the function of the state, the constitutional framework, federalism, separation of powers, functions of the three branches of government at the local, state and national level, and the political decision-making process.

This course must include a comparative discussion of political ideologies, such as communism and totalitarianism, that conflict with the principles of freedom and democracy essential to the founding principles of the United States.

**GENERAL NOTES**

**Instructional Practices**

Teaching from well-written, instructional materials enhance students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Usage of primary source documents
2. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
3. Making close reading and rereading of texts central to lessons.
4. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
5. Requiring students to support answers with evidence from the text.
6. Providing extensive text-based research and writing opportunities (claims and evidence).

**Literacy Standards in Social Studies**

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

**GENERAL INFORMATION**

**Course Number:** 2106410

**Number of Credits:** One (1) credit

**Course Type:** Core Academic Course

**Course Status:** Course Approved

**Graduation Requirement:** United States Government

**Course Path:** Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Political Sciences > Abbreviated Title: HUM LET 1 HISTORY

**Course Length:** Year (Y)

**Course Attributes:**
- Class Size Core Required

**Course Level:** 2

**Educator Certifications**

Political Science (Grades 6-12)

History (Grades 6-12)

Social Science (Grades 6-12)
### Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
</tbody>
</table>
| SS.912.A.1.2: | Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.  
**Clarifications:**  
Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection. |
| SS.912.A.1.4: | Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.  
**Review causes and consequences of the Civil War.**  
**Clarifications:**  
Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.2.2: | Assess the influence of significant people or groups on Reconstruction.  
**Clarifications:**  
Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.3.2: | Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century.  
**Clarifications:**  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.3.3: | Compare the first and second Industrial Revolutions in the United States.  
**Clarifications:**  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.  
Examples may include, but are not limited to, trade, development of new industries. |
| SS.912.A.3.8: | Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).  
**Clarifications:**  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.3.10: | Review different economic and philosophic ideologies.  
**Clarifications:**  
Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.4.5: | Examine causes, course, and consequences of United States involvement in World War I.  
**Clarifications:**  
Examples may include, but are not limited to, nationalism, imperialism, militarism, entangling alliances vs. neutrality, Zimmerman Note, the Lusitania, the Selective Service Act, the homefront, the American Expeditionary Force, Wilson's Fourteen Points, the Treaty of Versailles (and opposition to it), isolationism.  
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.A.7.1 | Identify causes for Post-World War II prosperity and its effects on American society. |
| SS.912.A.7.7 | This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FDOE End-of-Course (EOC) Assessments webpage and the FDOE Social Studies webpage. |
| SS.912.C.1.1 | Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government. |
| SS.912.C.1.2 | Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights. |
| SS.912.C.1.3 | Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy. |
| SS.912.C.1.4 | Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights. |
| SS.912.C.1.5 | Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism. |
| SS.912.C.1.6 | Evaluate the constitutional provisions establishing citizenship, and assess the criteria among citizens by birth, naturalized citizens, and non-citizens. |
| SS.912.C.2.2 | Evaluate the importance of political participation and civic participation. |
| SS.912.C.2.3 | Experience the responsibilities of citizens at the local, state, or federal levels. |
| SS.912.C.2.4 | Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good. |
| SS.912.C.2.5 | Conduct a service project to further the public good. |
| SS.912.C.2.6 | Evaluate, take, and defend positions about rights protected by the Constitution and Bill of Rights. |
| SS.912.C.2.7 | Explain why rights have limits and are not absolute. |
| SS.912.C.2.8 | Analyze the impact of citizen participation as a means of achieving political and social change. |
| SS.912.C.2.9 | Identify the expansion of civil rights and liberties by examining the principles contained in primary documents. |
| SS.912.C.2.10 | Monitor current public issues in Florida. |
| SS.912.C.2.11 | Analyze public policy solutions or courses of action to resolve a local, state, or federal issue. |
| SS.912.C.2.12 | Explain the changing roles of television, radio, press, and Internet in political communication. |
| SS.912.C.2.13 | Evaluate the processes and results of an election at the state or federal level. |
| SS.912.C.2.14 | Evaluate the origins and roles of political parties, interest groups, media, and individuals in determining and shaping public policy. |
| SS.912.C.2.15 | Analyze trends in voter turnout. |
| SS.912.C.2.16 | Examples are On-line Sunshine, media, e-mails to government officials, political text messaging. |
| SS.912.C.2.17 | Examples include, but are not limited to, G.I. Bill, Baby Boom, growth of suburbs, Beatnik movement, youth culture, religious revivalism (e.g., Billy Graham and Bishop Fulton J. Sheen), conformity of the 1950s and the protest in the 1960s. |
| SS.912.C.3.1 | Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights. |
| SS.912.C.3.2 | Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government. |
| SS.912.C.3.3 | Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution. |
| SS.912.C.3.4 | Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution. |
| SS.912.C.3.5 | Identify the impact of independent regulatory agencies in the federal bureaucracy. |
| SS.912.C.3.6 | Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution. |
| SS.912.C.3.7 | Describe the role of judicial review in American constitutional government. |
| SS.912.C.3.8 | Compare the role of judges on the state and federal level with other elected officials. |
| SS.912.C.3.9 | Identify causes for Post-World War II prosperity and its effects on American society. |
| SS.912.C.3.10 | Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them. |
| SS.912.C.3.11 | Evaluate the significance and outcomes of landmark Supreme Court cases. |
Contrast how the Constitution safeguards and limits individual rights.

Simulate the judicial decision-making process in interpreting law at the state and federal level.

Illustrate examples of how government affects the daily lives of citizens at the local, state, and national levels.

Examples are education, transportation, crime prevention, funding of services.

Examine constitutional powers (expressed, implied, concurrent, reserved).

Examine how power and responsibility are distributed, shared, and limited by the Constitution.

Compare indicators of democratization in multiple countries.

Explain how the world's nations are governed differently.

Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.

Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Clarifications:
- Teachers who encourage students to participate actively in effortful learning both individually and with others:
  - Cultivate a community of growth mindset learners.
  - Foster perseverance in students by choosing tasks that are challenging.
  - Develop students' ability to analyze and problem solve.
  - Recognize students' effort when solving challenging problems.

Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:
- Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
  - Help students make connections between concepts and representations.
  - Provide opportunities for students to use manipulatives when investigating concepts.
  - Guide students from concrete to pictorial to abstract representations as understanding progresses.
  - Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
- Teachers who encourage students to complete tasks with mathematical fluency:
  - Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
  - Offer multiple opportunities for students to practice efficient and generalizable methods.
  - Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
- Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
  - Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
  - Create opportunities for students to discuss their thinking with peers.
  - Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
  - Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
MA.K12.MTR.5.1:
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
- Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
  - Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
  - Support students to develop generalizations based on the similarities found among problems.
  - Provide opportunities for students to create plans and procedures to solve problems.
  - Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:
- Assess the reasonableness of solutions.
- Mathematicians who assess the reasonableness of solutions:
  - Estimate to discover possible solutions.
  - Use benchmark quantities to determine if a solution makes sense.
  - Check calculations when solving problems.
  - Verify possible solutions by explaining the methods used.
  - Evaluate results based on the given context.

**Clarifications:**
- Teachers who encourage students to assess the reasonableness of solutions:
  - Have students estimate or predict solutions prior to solving.
  - Prompt students to continually ask, "Does this solution make sense? How do you know?"
  - Reinforce that students check their work as they progress within and after a task.
  - Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:
- Apply mathematics to real-world contexts.
- Mathematicians who apply mathematics to real-world contexts:
  - Connect mathematical concepts to everyday experiences.
  - Use models and methods to understand, represent and solve problems.
  - Perform investigations to gather data or determine if a method is appropriate.
  - Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**
- Teachers who encourage students to apply mathematics to real-world contexts:
  - Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
  - Challenge students to question the accuracy of their models and methods.
  - Support students as they validate conclusions by comparing them to the given situation.
  - Indicate how various concepts can be applied to other disciplines.

---

ELA.K12.EE.1.1:
- Cite evidence to explain and justify reasoning.
- K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
- 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
- 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
- 6-8 Students continue with previous skills and use a style guide to create a proper citation.
- 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

**Clarifications:**
- 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

---

ELA.K12.EE.2.1:
- Read and comprehend grade-level complex texts proficiently.

**Clarifications:**
- See Text Complexity for grade-level complexity bands and a text complexity rubric.

---

ELA.K12.EE.3.1:
- Make inferences to support comprehension.

**Clarifications:**
- Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

---

ELA.K12.EE.4.1:
- Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clarifications:**
- In kindergarten, students learn to listen to one another respectfully.
- In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think ______ because ______." The collaborative conversations are becoming academic conversations.
- In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

**Clarifications:**
- Use the accepted rules governing a specific format to create quality work.
General Course Information and Notes

VERSION DESCRIPTION

The Humane Letters 1 -History course has content strands of Geography, Civics and Government, and History. Goal of the course is understanding the foundational principles of the American Republic and the structures and frameworks of government that supports the constitutional republic. It will explore the philosophical ideas around the function of the state, civil society, political movements, and ideologies as well as comparative forms of government. Additionally, the course pertains to the study of government institutions and political processes and their historical impact on American society. Content should include philosophical influences of the American Founders, the fundamental ideas and events that shaped the founding of the United States, the functions and purpose of government, the function of the state, the constitutional framework, federalism, separation of powers, functions of the three branches of government at the local, state and national level, and the political decision-making process.

This course must include a comparative discussion of political ideologies, such as communism and totalitarianism, that conflict with the principles of freedom and democracy essential to the founding principles of the United States.

GENERAL NOTES

Instructional Practices

Teaching from well-written, instructional materials enhance students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Usage of primary source documents
2. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
3. Making close reading and rereading of texts central to lessons.
4. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
5. Requiring students to support answers with evidence from the text.
6. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

GENERAL INFORMATION

Course Number: 2106410

Course Path: Section: Grades PreK to 12 Education
Courses > Grade Group: Grades 9 to 12 and Adult
Education Courses > Subject: Social Studies >
SubSubject: Political Sciences >
Abbreviated Title: HUM LET 1 HISTORY

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Attributes:
- Class Size Core Required
Course Type: Core Academic Course
Course Level: 2
Graduation Requirement: United States Government

Educator Certifications

- Political Science (Grades 6-12)
- History (Grades 6-12)
- Social Science (Grades 6-12)
### Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.2</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</td>
</tr>
<tr>
<td>SS.912.A.1.4</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Review causes and consequences of the Civil War.</td>
</tr>
<tr>
<td>SS.912.A.2.1</td>
<td>Assess the influence of significant people or groups on Reconstruction.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman.</td>
</tr>
<tr>
<td>SS.912.A.3.2</td>
<td>Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.3.3</td>
<td>Compare the first and second Industrial Revolutions in the United States.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.3.8</td>
<td>Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.3.10</td>
<td>Review different economic and philosophic ideologies.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchism.</td>
</tr>
<tr>
<td>SS.912.A.4.5</td>
<td>Examine causes, course, and consequences of United States involvement in World War I.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples may include, but are not limited to, nationalism, imperialism, militarism, entangling alliances vs. neutrality, Zimmerman Note, the Lusitania, the Selective Service Act, the homefront, the American Expeditionary Force, Wilson's Fourteen Points, the Treaty of Versailles (and opposition to it), isolationism.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
</tbody>
</table>
### SS.912.A.7.1:

**Identify causes for Post-World War II prosperity and its effects on American society.**

**Clarifications:**
Examples may include, but are not limited to, G.I. Bill, Baby Boom, growth of suburbs, Beatnik movement, youth culture, religious revivalism (e.g., Billy Graham and Bishop Fulton J. Sheen), conformity of the 1950s and the protest in the 1960s.

**Specifications pages**
- The U.S. History End-of-Course Assessment.
- This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated, view the United States History End-of-Course Assessment Specifications pages 47-48. Additional resources may be found on the FDOE End-of-Course (EOC) Assessments webpage and the FDOE Social Studies webpage.

| SS.912.CG.1.1: | Examine how influential ideas in primary documents contributed to the ideas in the Declaration of Independence, the U.S. Constitution and the Bill of Rights. |
| SS.912.CG.1.2: | Explain the influence of Enlightenment ideas on the Declaration of Independence. |
| SS.912.CG.1.3: | Explain arguments presented in the Federalist Papers in support of ratifying the U.S. Constitution and a republican form of government. |
| SS.912.CG.1.4: | Analyze how the ideals and principles expressed in the founding documents shape America as a constitutional republic. |
| SS.912.CG.1.5: | Explain how the U.S. Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, majority rule, representative government, republicanism, rule of law and separation of powers. |
| SS.912.CG.2.1: | Explain the constitutional provisions that establish and affect citizenship. |
| SS.912.CG.2.2: | Explain the importance of political and civic participation to the success of the United States' constitutional republic. |
| SS.912.CG.2.3: | Explain the responsibilities of citizens at the local, state and national levels. |
| SS.912.CG.2.4: | Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the public good. |
| SS.912.CG.2.5: | Analyze contemporary and historical examples of government-imposed restrictions on rights. |
SS.912.CG.2.6:
- Students will explain how different groups of people (e.g., African Americans, immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman's desegregation of the army, Lincoln's Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault).
- Students will explain the role founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights.

SS.912.CG.2.7:
- Analyze the impact of civic engagement as a means of preserving or reforming institutions.
- Students will identify legal methods that citizens can use to promote social and political change (e.g., voting, peaceful protests, petitioning, demonstrations, contacting government offices).
- Students will identify historical examples of citizens achieving or preventing political and social change through civic engagement (e.g., the Abolitionist Movement).

SS.912.CG.2.8:
- Explain the impact of political parties, interest groups, media and individuals on determining and shaping public policy.
- Students will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy.
- Students will identify historical examples of interest groups, media and individuals influencing public policy.
- Students will compare and contrast how the free press influenced politics at major points in U.S. history (e.g., Vietnam War Era, Civil Rights Era).

SS.912.CG.2.9:
- Explain the process and procedures of elections at the state and national levels.
- Students will identify the different primary formats and how political parties nominate candidates using primaries.
- Students will compare and contrast the different ways in which elections are decided (e.g., Electoral College, proportional representation, popular vote, winner-take-all).
- Students will explain the process by which candidates register to be part of state and national elections.
- Students will describe the different methods used to tabulate election results in state and national elections (i.e., electronic voting, punch cards, fill-in ballots).
- Students will evaluate the role of debates in elections.

SS.912.CG.2.10:
- Analyze factors that contribute to voter turnout in local, state and national elections.
- Students will explain trends in voter turnout.
- Students will discuss attempts to increase voter turnout (e.g., get out the vote campaigns, social movements).
- Students will explain how governmental action has affected voter participation (e.g., 15th, 19th and 26th Amendments; Jim Crow laws; poll tax; efforts to suppress voters).

SS.912.CG.2.11:
- Evaluate political communication for bias, factual accuracy, omission and emotional appeal.
- Students will compare the reporting on the same political event or issue from multiple perspectives.
- Students will identify various forms of propaganda (e.g., plain folks, glittering generalities, testimonial, fear, logical fallacies).
- Students will discuss the historical impact of political communication on American political process and public opinion.
- Examples of political communication may include, but are not limited to, political cartoons, propaganda, campaign advertisements, political speeches, bumper stickers, blogs, press and social media.

SS.912.CG.2.12:
- Explain how interest groups, the media and public opinion influence local, state and national decision-making related to public issues.
- Students will objectively discuss current public issues in Florida and use both the U.S. and Florida Constitutions to justify pro and con positions.
- Students will examine the relationship and responsibilities of both the state and national governments regarding these public issues.
- Students will analyze public policy solutions related to local, state and national issues.

SS.912.CG.2.13:
- Analyze the influence and effects of various forms of media and the internet in political communication.
- Students will explain how the methods of political communication has changed over time (e.g., television, radio, press, social media).
- Students will describe how the methods used by political officials to communicate with the public has changed over time.
- Students will discuss the strengths and weaknesses of different methods of political communication.

SS.912.CG.3.1:
- Analyze how certain political ideologies conflict with the principles of freedom and democracy.
- Students will identify political ideologies that conflict with the principles of freedom and democracy (e.g., communism and totalitarianism).
- Students will analyze how the principles of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers contribute to the nation's longevity and its ability to overcome challenges, and distinguish the United States' constitutional republic from authoritarian and totalitarian nations.

SS.912.CG.3.2:
- Explain how the U.S. Constitution safeguards and limits individual rights.
- Students will identify the individual rights protected by the U.S. Constitution, the Bill of Rights and other constitutional amendments.
- Students will describe the role of the Supreme Court in further defining the safeguards and limits of constitutional rights.

SS.912.CG.3.3:
- Analyze the structures, functions and processes of the legislative branch as described in Article I of the U.S. Constitution.
- Students will explain why Article I of the U.S. Constitution established a bicameral legislative body and how the House of Representatives functions differently from the Senate.
- Students will identify the methods for determining the number of members in the House of Representatives and the Senate.
- Students will identify and describe the "enumerated powers" delegated to Congress (e.g., assess taxes, borrow money, declare war, make laws).
- Students will analyze the role of the legislative branch in terms of its relationship with the judicial and executive branch of the government.
- Students will describe constitutional amendments that changed the role of Congress from its original description in Article I of the U.S. Constitution (i.e., 10th, 14th, 16th, 17th and 27th Amendments).

SS.912.CG.3.4:
- Analyze the structures, functions and processes of the executive branch as described in Article II of the U.S. Constitution.
- Students will explain the qualifications one must have to seek the office of president and the process of presidential elections.
- Students will explain different presidential responsibilities outlined in Article II (e.g., receiving foreign heads of state, delivering the State of the Union address, carrying out faithful execution of the law).
- Students will examine the role of the executive branch in terms of its relationship with the judicial and legislative branches of the government.
- Students will describe constitutional amendments (i.e., 12th, 20th, 22nd and 25th) that have changed the role of the executive branch from its original description in Article II.
- Students will describe the impeachment process.

Describe how independent regulatory agencies interact with the three branches of government and with citizens.
| SS.912.CG.3.5: | Students will identify independent regulatory agencies (e.g., Federal Communications Commission, Federal Election Commission, National Labor Relations Board) and explain their purpose and effect.  
Students will describe the advantages and disadvantages of delegating power to independent regulatory agencies. |
| SS.912.CG.3.6: | Explain expressed, implied, concurrent and reserved powers in the U.S. Constitution.  
Students will identify powers that are expressed in the U.S. Constitution to Congress (e.g., coin money, declare war, assess taxes, citizenship).  
Students will identify that expressed powers are also known as enumerated powers found in Article I of the U.S. Constitution.  
Students will analyze the role of the “general welfare clause” and “necessary and proper clause” in granting Congress implied powers.  
Students will describe examples of concurrent powers as those powers shared by both state and national governments (e.g., build roads, tax citizens, make laws).  
Students will explain how reserved powers define issues as matters for the people or the state governments.  
Students will compare the roles of expressed, implied, concurrent and reserved powers in United States’ federalism. |
| SS.912.CG.3.7: | Analyze the structures, functions and processes of the judicial branch as described in Article III of the U.S. Constitution.  
Students will examine the role of the judicial branch in terms of its relationship with the legislative and executive branches of the government.  
Students will describe the role of the Supreme Court and lesser federal courts.  
Students will explain what Article III says about judicial tenure, appointment and salaries.  
Students will describe the powers delegated to the courts by Article III including, but not limited to, treason, jurisdiction and trial by jury. |
| SS.912.CG.3.8: | Describe the purpose and function of judicial review in the American constitutional government.  
Students will examine the role of district courts, the courts of appeals and the Supreme Court in the judicial review process.  
Students will explain the relationship between the concept of judicial review and the language of the Supremacy Clause in Article VI of the U.S. Constitution. |
| SS.912.CG.3.9: | Compare the role of state and federal judges with other elected officials.  
Students will compare the ways state and federal judges are appointed compared to other elected officials.  
Students will distinguish the qualifications needed for a judge at the state or federal level versus other elected officials.  
Students will compare the decision-making process of judges compared to other political figures. |
| SS.912.CG.3.10: | Analyze the levels and responsibilities of state and federal courts.  
Students will describe what Article III of the U.S. Constitution states about the relationship between state and federal courts.  
Students will recognize that the role of the Federal Judiciary Act of 1789 in establishing the structure and jurisdiction of the federal court system.  
Students will contrast the differences among civil trials and criminal trials at the state level.  
Students will describe the relationship among the Supreme Court, federal appellate courts and federal district courts (e.g., Erie Doctrine, Rooker-Feldman Doctrine). |
| SS.912.CG.3.11: | Evaluate how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution.  
Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; McCulloch v. Maryland; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; Korematsu v. United States; Mapp v. Ohio; In re Gault; United States v. Nixon; Regents of the University of California v. Bakke; Hazelwood v. Kuhlmeier; District of Columbia v. Heller).  
Students will explain the foundational constitutional issues underlying landmark Supreme Court decisions related to the Bill of Rights and other amendments.  
Students will explain the outcomes of landmark Supreme Court cases related to the Bill of Rights and other amendments. |
| SS.912.CG.3.12: | Analyze the concept of federalism in the United States and its role in establishing the relationship between the state and national governments.  
Students will identify examples of the powers reserved and shared among state and the national governments in the American federal system of government.  
Students will examine the role the Great Compromise had on the eventual establishment of a federal system of fifty equal states.  
Students will explain specific rights that are granted to the states in the language of the U.S. Constitution and its amendments (e.g., 10th Amendment, defense and extradition).  
Students will analyze how states have challenged the national government regarding states' rights (e.g., Civil War, the New Deal, No Child Left Behind, Affordable Health Care Act, Civil Rights Movement). |
| SS.912.CG.3.13: | Explain how issues between Florida, other states and the national government are resolved.  
Students will explain the concept of federalism as it applies to each issue.  
Students will use historical and issue-based scenarios to demonstrate understanding of how disputes between Florida, other states and the national government are resolved (e.g., water rights arguments between Florida and Georgia, national and state conflict over rights to adjacent waters and seaboards, civil rights). |
| SS.912.CG.3.14: | Explain the judicial decision-making process in interpreting law at the state and national levels.  
Students will explain the role of the U.S. Constitution in interpreting law at the state and national levels.  
Students will explain the process used by judges at the state and national levels when making a decision or writing summary opinions.  
Students will incorporate language from the U.S. Constitution or court briefs to justify a legal decision when interpreting state or national law. |
| SS.912.CG.3.15: | Explain how citizens are affected by the local, state and national governments.  
Students will identify local government officials and employees who affect the daily lives of citizens.  
Students will identify the role of state governmental officials and employees who affect the daily lives of citizens.  
Students will identify the role of national governmental officials and employees who affect the daily lives of citizens.  
Students will explain how government at all levels impacts the daily lives of citizens. |
| SS.912.CG.4.1: | Analyze how liberty and economic freedom generate broad-based opportunity and prosperity in the United States.  
Students will differentiate between government systems (e.g., autocracy, democracy, monarchy, oligarchy republic, theocracy).  
Students will differentiate between economic systems (e.g., capitalism, communism, mixed market, socialism).  
Students will analyze the disadvantages of authoritarian control over the economy (e.g., communism and socialism) in generating broad-based economic prosperity for their population. |
| SS.912.CG.4.2: | Explain how the United States uses foreign policy to influence other nations.  
Students will explain how the policies of other nations influence U.S. policy and society.  
Students will identify agencies of the U.S. government that contribute to its foreign policy agenda (e.g., National Security Agency, Central Intelligence Agency).  
Students will explain the advantages and disadvantages of how nongovernmental organizations (NGOs) influence foreign policy (e.g., United States Agency for International Development). |
### SS.912.CG.4.3:
**States Agency for International Development, Red Cross, American Woman Suffrage Association, Amnesty International.**
- Students will explain how U.S. trade policy influences its relationships with other nations (e.g., China, Saudi Arabia).
- Students will explain how the use of embargos and economic sanctions by the United States has affected other nations (e.g., Cuba, Iran, Syria).
- Students will explain the U.S. response to international conflicts.

**Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.**
- Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.

### SS.912.CG.4.4:
**Identify indicators of democratization in foreign countries.**
- Students will recognize indicators of democratization as a system of free and fair elections, active civic participation, the protection of human rights, and the rule of law.

### Mathematics Standards

#### MA.K12.MTR.1.1:
- **Mathematicians who participate in effortful learning both individually and with others:**
  - Analyze the problem in a way that makes sense given the task.
  - Ask questions that will help with solving the task.
  - Build perseverance by modifying methods as needed while solving a challenging task.
  - Stay engaged and maintain a positive mindset when working to solve tasks.
  - Help and support each other when attempting a new method or approach.

#### MA.K12.MTR.2.1:
- **Mathematicians who demonstrate understanding by representing problems in multiple ways:**
  - Build understanding through modeling and using manipulatives.
  - Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
  - Progress from modeling problems with objects and drawings to using algorithms and equations.
  - Express connections between concepts and representations.
  - Choose a representation based on the given context or purpose.

### Clarifications:

#### MA.K12.MTR.1.1:
- **Teachers who encourage students to participate actively in effortful learning both individually and with others:**
  - Cultivate a community of growth mindset learners.
  - Foster perseverance in students by choosing tasks that are challenging.
  - Develop students’ ability to analyze and problem solve.
  - Recognize students’ effort when solving challenging problems.

#### MA.K12.MTR.2.1:
- **Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:**
  - Help students make connections between concepts and representations.
  - Provide opportunities for students to use manipulatives when investigating concepts.
  - Guide students from concrete to pictorial to abstract representations as understanding progresses.
  - Show students that various representations can have different purposes and can be useful in different situations.

### Complete tasks with mathematical fluency.

- **Mathematicians who complete tasks with mathematical fluency:**
  - Select efficient and appropriate methods for solving problems within the given context.
  - Maintain flexibility and accuracy while performing procedures and mental calculations.
  - Complete tasks accurately and with confidence.
  - Adapt procedures to apply them to a new context.
  - Use feedback to improve efficiency when performing calculations.

#### MA.K12.MTR.3.1:
- **Teachers who encourage students to complete tasks with mathematical fluency:**
  - Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
  - Offer multiple opportunities for students to practice efficient and generalizable methods.
  - Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

### Engage in discussions that reflect on the mathematical thinking of self and others.

- **Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:**
  - Communicate mathematical ideas, vocabulary and methods effectively.
  - Analyze the mathematical thinking of others.
  - Compare the efficiency of a method to those expressed by others.
  - Recognize errors and suggest how to correctly solve the task.
  - Justify results by explaining methods and processes.
  - Construct possible arguments based on evidence.

#### MA.K12.MTR.4.1:
- **Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:**
  - Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
  - Create opportunities for students to discuss their thinking with peers.
  - Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
  - Develop students’ ability to justify methods and compare their responses to the responses of their peers.

### Use patterns and structure to help understand and connect mathematical concepts.

- **Mathematicians who use patterns and structure to help understand and connect mathematical concepts:**
  - Focus on relevant details within a problem.
  - Create plans and procedures to logically order events, steps or ideas to solve problems.
  - Decompose a complex problem into manageable parts.
MA.K12.MTR.5.1:
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:
Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:
- Students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:
Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1:
Cite evidence to explain and justify reasoning.

**Clarifications:**
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:
Read and comprehend grade-level complex texts proficiently.

**Clarifications:**
See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.3.1:
Make inferences to support comprehension.

**Clarifications:**
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.4.1:
Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clarifications:**
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _____ because _______.” The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.5.1:
Use the accepted rules governing a specific format to create quality work.

**Clarifications:**
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to
The Humane Letters 1 – History course has content strands of Geography, Civics, and Government, and History. Goal of the course is understanding the foundational principles of the American Republic and the constitutional republic. It will explore the philosophical ideas around the function of the state, civil society, political movements, and ideologies as well as comparative forms of government. Additionally, the course pertains to the study of government institutions and processes and their historical impact on American society. Content should include philosophical influences of the American Founders, the fundamental ideas and events that shaped the founding of the United States, the functions and purpose of government, the function of the state, the constitutional framework, federalism, separation of powers, functions of the three branches of government at the local, state, and national level, and the political decision-making process.

Eld.K12 Ell.Sl.1: English language learners communicate for social and instructional purposes within the school setting.

Eld.K12 Ell.Ss.1: English language learners communicate information, ideas, and concepts necessary for academic success in the content area of Social Studies.

Eld.K12 Ell.Ss.2: English language learners communicate quality work.

ElA.K12.Ee.6.1: Use appropriate voice and tone when speaking or writing.

Clarifications:
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

ELA.K12.EE.6.1:
Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

He.912.C.2.4:
Clarifications:
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

Version Description

Civic education is essential in the development of informed citizenry who are equipped to participate in civic life and preserve a government of the people, by the people, and for the people. The Civics and Government (CG) standards in this class were revised in 2021 as a result of the House Bill (2019) civics standards review and reflect the following priorities for K-12 Civics and Government teaching and learning in Florida schools:

- Students study primary source documents to understand the philosophical underpinnings of the American Republic and the root cause of American exceptionalism.
- Students compare the success of the United States and the success or failure of other nations’ governing philosophies to evaluate their past, present, and likely future effects.
- Students have a sense of civic pride and participate regularly in all levels of government.
- Students reflect upon United States civic history, so they understand their rights and responsibilities as citizens, including the process of advocating properly with government officials.

This course must include a comparative discussion of political ideologies, such as communism and totalitarianism, that conflict with the principles of freedom and democracy essential to the founding principles of the United States.

General Notes

Instructional Practices

Teaching from well-written, instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Usage of primary source documents
2. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
3. Making close reading and re-reading of texts central to lessons.
4. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
5. Requiring students to support answers with evidence from the text.
6. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EE's and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading, and writing instruction that allows English language learners (ELL) to communicate information, ideas, and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

## Course Standards

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
</tbody>
</table>
| SS.912.A.1.2: | Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.  
**Clarifications:** Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection. |
| SS.912.A.1.3: | Utilize timelines to identify the time sequence of historical data. |
| SS.912.A.1.4: | Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.  
**Clarifications:** Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. |
| SS.912.A.1.5: | Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score) Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf |
| SS.912.A.1.6: | Use case studies to explore social, political, legal, and economic relationships in history. |
| SS.912.A.1.7: | Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications. |
| SS.912.A.3.10: | Review different economic and philosophic ideologies.  
**Clarifications:** Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy. |
| SS.912.A.7.11: | Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.  
**Clarifications:** Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War. |
| SS.912.A.7.12: | Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.  
**Clarifications:** Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations. |
| SS.912.A.7.14: | Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).  
**Clarifications:** Examples may include, but are not limited to, NAFTA, World Trade Organization. |
| SS.912.A.7.15: | Analyze the effects of foreign and domestic terrorism on the American people.  
**Clarifications:** Examples may include, but are not limited to, Oklahoma City bombing, attack of September 11, 2001, Patriot Act, wars in Afghanistan and Iraq. |
| SS.912.A.7.16: | Examine changes in immigration policy and attitudes toward immigration since 1950.  
**Clarifications:** This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies page.
<table>
<thead>
<tr>
<th>Standard</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.C.4.1</td>
<td>Explain how the world's nations are governed differently.</td>
</tr>
<tr>
<td>SS.912.C.4.2</td>
<td>Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.</td>
</tr>
<tr>
<td>SS.912.C.4.3</td>
<td>Assess human rights policies of the United States and other countries.</td>
</tr>
</tbody>
</table>
| SS.912.E.3.1 | Demonstrate the impact of inflation on world economies.  
**Clarifications:**  
Examples are oil prices, 1973 oil crisis, Great Depression, World War II. |
| SS.912.E.3.4 | Assess the economic impact of negative and positive externalities on the international environment.  
**Clarifications:**  
Examples of negative are pollution, global warming.  
Examples of positive are pure water, better air quality. |
| SS.912.E.3.5 | Compare the current United States economy with other developed and developing nations.  
**Clarifications:**  
Examples are standard of living, exchange rates, productivity, gross domestic product. |
| SS.912.G.4.1 | Interpret population growth and other demographic data for any given place. |
| SS.912.G.4.2 | Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places. |
| SS.912.G.4.3 | Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas. |
| SS.912.G.4.4 | Use geographic terms and tools to analyze case studies of issues in globalization.  
**Clarifications:**  
Examples are cultural imperialism, outsourcing. |
| SS.912.G.4.7 | Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world. |
| SS.912.G.4.9 | Use political maps to describe the change in boundaries and governments within continents over time. |
| SS.912.H.1.1 | Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created.  
**Clarifications:**  
Examples are Bronze Age, Ming Dynasty, Classical, Renaissance, Modern, and Contemporary. |
| SS.912.H.1.2 | Describe how historical events, social context, and culture impact forms, techniques, and purposes of works in the arts, including the relationship between a government and its citizens.  
**Clarifications:**  
Examples are imperial Roman sculpture; Palace of Versailles; Picasso's Guernica; layout of Washington, DC. |
| SS.912.H.1.3 | Relate works in the arts to various cultures.  
**Clarifications:**  
Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman. |
| SS.912.H.1.4 | Explain philosophical beliefs as they relate to works in the arts.  
**Clarifications:**  
Examples are classical architecture, protest music, Native American dance, Japanese Noh. |
| SS.912.H.1.5 | Examine artistic response to social issues and new ideas in various cultures.  
**Clarifications:**  
Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home. |
| SS.912.H.1.6 | Analyze how current events are explained by artistic and cultural trends of the past. |
| SS.912.H.3.1 | Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture. |
| SS.912.W.1.1 | Use timelines to establish cause and effect relationships of historical events. |
| SS.912.W.1.2 | Compare time measurement systems used by different cultures.  
**Clarifications:**  
Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era. |
SS.912.W.1.3: Clarifications:
Examples are artifacts, images, auditory and written sources.

SS.912.W.1.4: Clarifications:
Examples are archaeology, economics, geography, forensic chemistry, political science, physics.

SS.912.W.1.5: Clarifications:
Examples are competing interpretations or schools of thought about world events and individual contributions to history (historiography).

SS.912.W.1.6: Clarifications:
Examples are ethnic, cultural, personal, national, religious.

SS.912.W.8.1: Identify the United States and Soviet aligned states of Europe, and contrast their political and economic characteristics.

SS.912.W.8.2: Clarifications:
Examples are containment policy, Truman Doctrine, Marshall Plan, NATO, Iron Curtain, Berlin Airlift, Warsaw Pact.

SS.912.W.8.3: Clarifications:
Examples are Chinese Civil War, communist victory, Great Leap Forward, Cultural Revolution, China’s subsequent rise as a world power.

SS.912.W.8.4: Summarize the causes and effects of the arms race and proxy wars in Africa, Asia, Latin America, and the Middle East.

SS.912.W.8.5: Clarifications:
Examples are the arms race, Soviet invasion of Afghanistan, growing internal resistance to communism, perestroika and glasnost, United States influence.

SS.912.W.8.6: Explain the 20th century background for the establishment of the modern state of Israel in 1948, including the Zionist movement led by Theodor Herzl, and the ongoing military and political conflicts between Israel and the Arab-Muslim world.

SS.912.W.8.7: Compare post-war independence movements in African, Asian, and Caribbean countries.

SS.912.W.8.8: Clarifications:
Examples are Mahatma Ghandi, Fidel Castro, Gamal Abdel Nasser, Francois ‘Papa Doc’ Duvalier, Jawaharlal Nehru.

SS.912.W.8.9: Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.

SS.912.W.8.10: Clarifications:
Examples are Iranian Revolution, Mujahideen in Afghanistan, Persian Gulf War.

SS.912.W.9.1: Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

SS.912.W.9.2: Clarifications:
Examples are Marie Curie, Albert Einstein, Enrico Fermi, Sigmund Freud, Wright Brothers, Charles R. Drew, mass vaccination, atomic energy, transistor, microchip, space exploration, Internet, discovery of DNA, Human Genome Project.

SS.912.W.9.3: Explain cultural, historical, and economic factors and governmental policies that created the opportunities for ethnic cleansing or genocide in Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them.

SS.912.W.9.4: Clarifications:
Examples are prejudice, racism, stereotyping, economic competition.

SS.912.W.9.5: Assess the social and economic impact of pandemics on a global scale, particularly within the developing and under-developed world.

SS.912.W.9.6: Analyze the rise of regional trade blocs such as the European Union and NAFTA, and predict the impact of increased globalization in the 20th and 21st centuries.

LAFS.910.RH.1.1: Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.

LAFS.910.RH.1.2: Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.

LAFS.910.RH.1.3: Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.

LAFS.910.RH.2.4: Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.

LAFS.910.RH.2.5: Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.

LAFS.910.RH.2.6: Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.

LAFS.910.RH.3.7: Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.

LAFS.910.RH.3.8: Assess the extent to which the reasoning and evidence in a text support the author’s claims.

LAFS.910.RH.3.9: Compare and contrast treatments of the same topic in several primary and secondary sources.

LAFS.910.RH.4.10: By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently, initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–
Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.

Evaluate the speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.

Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.

Write arguments focused on discipline-specific content.

Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes.

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.

Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.

Draw evidence from informational texts to support analysis, reflection, and research.

Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.

- Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.
- Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.
- Propose conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.
- Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.
**MAFS.912.S-ID.1.3:** Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★

**Clariﬁcations:**
In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

**MAFS.912.S-ID.1.4:** Use the mean and standard deviation of a data set to ﬁt it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★

**Standard Relation to Course: Supporting**

**Make sense of problems and persevere in solving them.**

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

**MAFS.K12.MP.1.1:** Construct viable arguments and critique the reasoning of others.

Mathematically proficient students understand and use stated assumptions, deﬁnitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

**MAFS.K12.MP.3.1:** Use appropriate tools strategically.

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

**MAFS.K12.MP.5.1:** Attend to precision.

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

**MAFS.K12.MP.6.1:**

**MAFS.K12.MP.1.1:**

**MAFS.K12.MP.3.1:**

**MAFS.K12.MP.5.1:**

**MAFS.K12.MP.6.1:**

**ELD.K12.ELL.SI.1:** English language learners communicate for social and instructional purposes within the school setting.

**ELD.K12.ELL.SS.1:** English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

**HE.912.C.2.4:**

**Clarifications:**
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

GENERAL Course Information and Notes

**INTERNATIONAL NOTES**

International Relations – The grade 9-12 International Relations course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content emphasis for this course pertains to the study of the functions of the global community, the nature of the modern national state, national goals, and how nations communicate and negotiate to facilitate these goals. Content should include, but is not limited to, the origins of the nation-state system, the role of power politics in the nuclear age, factors that influence relations among nations, such as world population growth, food and other resources, environment, human rights, terrorism, cultural differences, world trade, and technology, ways in which governments conduct foreign policy, the role of international organizations in promoting world peace, the role of women and diverse cultural groups within and among nations, and career opportunities available in international relations.

Mathematics Benchmark Guidance – Social Studies instruction should include opportunities for students to interpret and create representations of historical events and
Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students’ content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td><strong>Clari</strong> <strong>fications:</strong></td>
<td>Examples of primary and secondary sources may be found on websites such as the site for The Kinsey Collection.</td>
</tr>
<tr>
<td>SS.912.A.1.2</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</td>
</tr>
<tr>
<td>SS.912.A.1.3</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.4</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</td>
</tr>
<tr>
<td>SS.912.A.1.5</td>
<td>Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score). Florida’s research process model accessible at: <a href="http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf">http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf</a></td>
</tr>
<tr>
<td>SS.912.A.1.6</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.A.1.7</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td>SS.912.A.3.10</td>
<td>Review different economic and philosophic ideologies.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchism.</td>
</tr>
<tr>
<td>SS.912.A.7.11</td>
<td>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</td>
</tr>
<tr>
<td>SS.912.A.7.12</td>
<td>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</td>
</tr>
<tr>
<td>SS.912.A.7.14</td>
<td>Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples may include, but are not limited to, NAFTA, World Trade Organization.</td>
</tr>
<tr>
<td>SS.912.A.7.15</td>
<td>Analyze the effects of foreign and domestic terrorism on the American people.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples may include, but are not limited to, Oklahoma City bombing, attack of September 11, 2001, Patriot Act, wars in Afghanistan and Iraq.</td>
</tr>
<tr>
<td>SS.912.A.7.16</td>
<td>Examine changes in immigration policy and attitudes toward immigration since 1950.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.C.4.1</td>
<td>Explain how the world’s nations are governed differently.</td>
</tr>
<tr>
<td>SS.912.C.4.2</td>
<td>Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.</td>
</tr>
<tr>
<td>SS.912.C.4.3</td>
<td>Assess human rights policies of the United States and other countries.</td>
</tr>
</tbody>
</table>

| SS.912.E.3.1 | Demonstrate the impact of inflation on world economies. |
| SS.912.E.3.2 | Assess the economic impact of negative and positive externalities on the international environment. |
| SS.912.E.3.3 | Compare the current United States economy with other developed and developing nations. |

| SS.912.G.1.1 | Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions. |
| SS.912.G.1.2 | Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place. |
| SS.912.G.1.3 | Employ applicable units of measurement and scale to solve simple locational problems using maps and globes. |
| SS.912.G.1.4 | Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. |

| SS.912.G.2.1 | Identify the physical characteristics and the human characteristics that define and differentiate regions. |
| SS.912.G.2.2 | Describe the factors and processes that contribute to the differences between developing and developed regions of the world. |
| SS.912.G.2.3 | Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. |

| SS.912.G.4.1 | Interpret population growth and other demographic data for any given place. |
| SS.912.G.4.2 | Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places. |
| SS.912.G.4.3 | Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas. |

| SS.912.G.4.4 | Use geographic terms and tools to analyze case studies of issues in globalization. |
| SS.912.G.4.5 | Use political maps to describe the change in boundaries and governments within continents over time. |

| SS.912.H.1.1 | Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created. |
| SS.912.H.1.2 | Describe how historical events, social context, and culture impact forms, techniques, and purposes of works in the arts, including the relationship between a government and its citizens. |

| SS.912.H.1.3 | Relate works in the arts to various cultures. |
| SS.912.H.1.4 | Explain philosophical beliefs as they relate to works in the arts. |
| SS.912.H.1.5 | Examine artistic response to social issues and new ideas in various cultures. |

| SS.912.H.1.6 | Analyze how current events are explained by artistic and cultural trends of the past. |
| SS.912.H.3.1 | Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture. |
| SS.912.W.1.1 | Use timelines to establish cause and effect relationships of historical events. |
| SS.912.W.1.2 | Compare time measurement systems used by different cultures. |
| SS.912.W.1.3 | Interpret and evaluate primary and secondary sources. |
SS.912.W.1.3: Clarifications: Examples are artifacts, images, auditory and written sources.

SS.912.W.1.4: Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.

SS.912.W.1.5: Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).

SS.912.W.1.6: Evaluate the role of history in shaping identity and character.

SS.912.W.8.1: Identify the United States and Soviet aligned states of Europe, and contrast their political and economic characteristics.

SS.912.W.8.2: Describe characteristics of the early Cold War.

SS.912.W.8.3: Summarize key developments in post-war China.

SS.912.W.8.4: Summarize the causes and effects of the arms race and proxy wars in Africa, Asia, Latin America, and the Middle East.

SS.912.W.8.5: Identify the factors that led to the decline and fall of communism in the Soviet Union and Eastern Europe.

SS.912.W.8.6: Explain the 20th century background for the establishment of the modern state of Israel in 1948, including the Zionist movement led by Theodor Herzl, and the ongoing military and political conflicts between Israel and the Arab-Muslim world.

SS.912.W.8.7: Describe post-war independence movements in African, Asian, and Caribbean countries.

SS.912.W.8.8: Compare the rise and goals of nationalist leaders in the post-war era and the impact of their rule on their societies.

SS.912.W.8.9: Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.

SS.912.W.8.10: Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

SS.912.W.9.1: Describe the causes and effects of post-World War II economic and demographic changes.

SS.912.W.9.2: Explain cultural, historical, and economic factors and governmental policies that created the opportunities for ethnic cleansing or genocide in Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them.

SS.912.W.9.3: Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

SS.912.W.9.4: Describe the causes and effects of twentieth century nationalist conflicts.

SS.912.W.9.5: Assess the social and economic impact of pandemics on a global scale, particularly within the developing and under-developed world.

SS.912.W.9.6: Analyze the rise of regional trade blocs such as the European Union and NAFTA, and predict the impact of increased globalization in the 20th and 21st centuries.

SS.912.W.9.7: Describe the impact of and global response to international terrorism.

Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students’ ability to analyze and problem solve.
- Recognize students’ effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:
### MA.K12.MTR.2.1

Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

**Clarifications:**
- Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
  - Help students make connections between concepts and representations.
  - Provide opportunities for students to use manipulatives when investigating concepts.
  - Guide students from concrete to pictorial to abstract representations as understanding progresses.
  - Show students that various representations can have different purposes and can be useful in different situations.

### MA.K12.MTR.3.1

Complete tasks with mathematical fluency.
- Mathematicians who complete tasks with mathematical fluency:
  - Select efficient and appropriate methods for solving problems within the given context.
  - Maintain flexibility and accuracy while performing procedures and mental calculations.
  - Complete tasks accurately and with confidence.
  - Adapt procedures to apply them to a new context.
  - Use feedback to improve efficiency when performing calculations.

**Clarifications:**
- Teachers who encourage students to complete tasks with mathematical fluency:
  - Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
  - Offer multiple opportunities for students to practice efficient and generalizable methods.
  - Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

### MA.K12.MTR.4.1

Engage in discussions that reflect on the mathematical thinking of self and others.
- Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
  - Communicate mathematical ideas, vocabulary and methods effectively.
  - Analyze the mathematical thinking of others.
  - Compare the efficiency of a method to those expressed by others.
  - Recognize errors and suggest how to correctly solve the task.
  - Justify results by explaining methods and processes.
  - Construct possible arguments based on evidence.

**Clarifications:**
- Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
  - Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
  - Create opportunities for students to discuss their thinking with peers.
  - Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
  - Develop students’ ability to justify methods and compare their responses to the responses of their peers.

### MA.K12.MTR.5.1

Use patterns and structure to help understand and connect mathematical concepts.
- Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
  - Focus on relevant details within a problem.
  - Create plans and procedures to logically order events, steps or ideas to solve problems.
  - Decompose a complex problem into manageable parts.
  - Relate previously learned concepts to new concepts.
  - Look for similarities among problems.
  - Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**
- Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
  - Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
  - Support students to develop generalizations based on the similarities found among problems.
  - Provide opportunities for students to create plans and procedures to solve problems.
  - Develop students’ ability to construct relationships between their current understanding and more sophisticated ways of thinking.

### MA.K12.MTR.6.1

Assess the reasonableness of solutions.
- Mathematicians who assess the reasonableness of solutions:
  - Estimate to discover possible solutions.
  - Use benchmark quantities to determine if a solution makes sense.
  - Check calculations when solving problems.
  - Verify possible solutions by explaining the methods used.
  - Evaluate results based on the given context.

**Clarifications:**
- Teachers who encourage students to assess the reasonableness of solutions:
  - Have students estimate or predict solutions prior to solving.
  - Prompt students to continually ask, “Does this solution make sense? How do you know?”
  - Reinforce that students check their work as they progress within and after a task.
  - Strengthen students’ ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
- Mathematicians who apply mathematics to real-world contexts:
General Course Information and Notes

**International Relations** - The grade 9-12 International Relations course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content emphasis for this course pertains to the study of the functions of the global community, the nature of the modern national state, national goals, and how nations communicate and negotiate to facilitate these goals. Content should include, but is not limited to, the origins of the nation-state system, the role of power politics in the nuclear age, factors that influence relations among nations, such as world population growth, food and other resources, environment, human rights, terrorism, cultural differences, world trade, and technology, ways in which governments conduct foreign policy, the role of international organizations in promoting world peace, the role of women and diverse cultural groups within and among nations, and career opportunities available in international relations.
Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

</tbody>
</table>
Analyze how liberty and economic freedom generate broad-based opportunity and prosperity in the United States.

- Students will differentiate between government systems (e.g., autocracy, democracy, monarchy, oligarchy, republic, theocracy).
- Students will analyze the disadvantages of authoritarian control over the economy (e.g., communism and socialism) in generating broad-based economic prosperity for their population.

SS.912.CG.4.2:

Explain how the United States uses foreign policy to influence other nations.

- Students will explain how the policies of other nations influence U.S. policy and society.
- Students will identify agencies of the U.S. government that contribute to its foreign policy agenda (e.g., National Security Agency, Central Intelligence Agency).
- Students will explain the advantages and disadvantages of how nongovernmental organizations (NGOs) influence foreign policy (e.g., United States Agency for International Development, Red Cross, American Woman Suffrage Association, Amnesty International).
- Students will explain how the U.S. trade policy influences its relationships with other nations (e.g., China, Saudi Arabia).
- Students will explain why the use of embargos and economic sanctions by the United States has affected other nations (e.g., Cuba, Iran, Syria).
- Students will explain why the U.S. response to international conflicts.

SS.912.CG.4.3:

Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.

- Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.

SS.912.E.3.1:

Demonstrate the impact of inflation on world economies.

- Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.

SS.912.E.3.4:

Assess the economic impact of negative and positive externalities on the international environment.

- Clarifications: Examples are negative: pollution, global warming. Examples are positive: pure water, better air quality.

SS.912.E.3.5:

Compare the current United States economy with other developed and developing nations.

- Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.

SS.912.G.4.1:

Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.

SS.912.G.4.2:

Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

SS.912.G.4.3:

Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.

SS.912.G.4.4:

Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

- Clarifications: Examples are thematic, contour, and dot-density.

SS.912.G.4.5:

Identify the physical characteristics and the human characteristics that define and differentiate regions.

- Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.

SS.912.G.2.2:

Describe the factors and processes that contribute to the differences between developing and developed regions of the world.

SS.912.G.2.3:

Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, political, or social ramifications.

- Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.

SS.912.G.4.1:

Interpret population growth and other demographic data for any given place.

SS.912.G.4.2:

Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.

SS.912.G.4.3:

Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.

- Clarifications: Examples are cultural imperialism, outsourcing.

SS.912.G.4.4:

Use geographic terms and tools to analyze case studies of issues in globalization.

SS.912.G.4.5:

Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.

SS.912.G.4.6:

Use political maps to describe the change in boundaries and governments within continents over time.

- Clarifications: Examples are Bronze Age, Ming Dynasty, Classical, Renaissance, Modern, and Contemporary.

SS.912.H.1.1:

Explain how historical events, social context, and culture impact forms, techniques, and purposes of works in the arts, including the relationship between a government and its citizens.

- Clarifications: Examples are imperial Roman sculpture; Palace of Versailles; Picasso's Guernica; layout of Washington, DC.

SS.912.H.1.2:

Discuss how works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created.

- Clarifications: Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman.

SS.912.H.1.3:

Explain philosophical beliefs as they relate to works in the arts.
SS.912.H.1.4: Clarifications:
- Examples are classical architecture, protest music, Native American dance, Japanese Noh.

SS.912.H.1.5: Clarifications:
- Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.

SS.912.H.1.6: Clarifications:
- Analyze how current events are explained by artistic and cultural trends of the past.

SS.912.H.3.1: Clarifications:
- Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.

SS.912.W.1.1: Clarifications:
- Use timelines to establish cause and effect relationships of historical events.

SS.912.W.1.2: Clarifications:
- Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.

SS.912.W.1.3: Clarifications:
- Examples are artifacts, images, auditory and written sources.

SS.912.W.1.4: Clarifications:
- Explain how historians use historical inquiry and other sciences to understand the past.

SS.912.W.1.5:Clarifications:
- Examples are archaeology, economics, geography, forensic chemistry, political science, physics.

SS.912.W.1.6: Clarifications:
- Examples are ethnic, cultural, personal, national, religious.

SS.912.W.8.1: Clarifications:
- Describe characteristics of the early Cold War.

SS.912.W.8.2: Clarifications:

SS.912.W.8.3: Clarifications:
- Examples are Chinese Civil War, communist victory, Great Leap Forward, Cultural Revolution, China's subsequent rise as a world power.

SS.912.W.8.4: Clarifications:
- Summarize the causes and effects of the arms race and proxy wars in Asia, Africa, and the Middle East.

SS.912.W.8.5: Clarifications:
- Identify the factors that led to the decline and fall of communism in the Soviet Union and Eastern Europe.

SS.912.W.8.6: Clarifications:
- Explain the 20th century background for the establishment of the modern state of Israel in 1948, including the Zionist movement led by Theodor Herzl, and the ongoing military and political conflicts between Israel and the Arab-Muslim world.

SS.912.W.8.7: Clarifications:
- Compare post-war independence movements in African, Asian, and Caribbean countries.

SS.912.W.8.8: Clarifications:
- Describe the rise and goals of nationalist leaders in the post-war era and the impact of their rule on their societies.

SS.912.W.8.9: Clarifications:
- Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.

SS.912.W.8.10: Clarifications:
- Examples are Iranian Revolution, Mujahideen in Afghanistan, Persian Gulf War.

SS.912.W.9.1: Clarifications:
- Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

SS.912.W.9.2: Clarifications:
- Examples are Marie Curie, Albert Einstein, Enrico Fermi, Sigmund Freud, Wright Brothers, Charles R. Drew, mass vaccination, atomic energy, transistor, microchip, space exploration, Internet, discovery of DNA, Human Genome Project.

SS.912.W.9.3: Clarifications:
- Describe the causes and effects of post-World War II economic and demographic changes.

SS.912.W.9.4: Clarifications:
- Explain cultural, historical, and economic factors and governmental policies that created the opportunities for ethnic cleansing or genocide in Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them.

SS.912.W.9.5: Clarifications:
- Examples are prejudice, racism, stereotyping, economic competition.

SS.912.W.9.6: Clarifications:
- Examples are Cyprus, Kashmir, Tibet, Northern Ireland.

SS.912.W.9.7: Clarifications:
- Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

**MA.K12.MTR.1.1:**

**Clarifications:**

- Teachers who encourage students to participate actively in effortful learning both individually and with others:
  - Cultivate a community of growth mindset learners.
  - Foster perseverance in students by choosing tasks that are challenging.
  - Develop students' ability to analyze and problem solve.
  - Recognize students' effort when solving challenging problems.

**MA.K12.MTR.2.1:**

- Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
  - Build understanding through modeling and using manipulatives.
  - Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
  - Progress from modeling problems with objects and drawings to using algorithms and equations.
  - Express connections between concepts and representations.
  - Choose a representation based on the given context or purpose.

**Clarifications:**

- Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
  - Help students make connections between concepts and representations.
  - Provide opportunities for students to use manipulatives when investigating concepts.
  - Guide students from concrete to pictorial to abstract representations as understanding progresses.
  - Show students that various representations can have different purposes and can be useful in different situations.

**MA.K12.MTR.3.1:**

- Teachers who encourage students to complete tasks with mathematical fluency:
  - Select efficient and appropriate methods for solving problems within the given context.
  - Maintain flexibility and accuracy while performing procedures and mental calculations.
  - Complete tasks accurately and with confidence.
  - Adapt procedures to apply them to a new context.
  - Use feedback to improve efficiency when performing calculations.

**Clarifications:**

- Teachers who encourage students to complete tasks with mathematical fluency:
  - Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
  - Offer multiple opportunities for students to practice efficient and generalizable methods.
  - Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

**MA.K12.MTR.4.1:**

- Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
  - Communicate mathematical ideas, vocabulary and methods effectively.
  - Analyze the mathematical thinking of others.
  - Compare the efficiency of a method to those expressed by others.
  - Recognize errors and suggest how to correctly solve the task.
  - Justify results by explaining methods and processes.
  - Construct possible arguments based on evidence.

**Clarifications:**

- Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
  - Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
  - Create opportunities for students to discuss their thinking with peers.
  - Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
  - Develop students' ability to analyze and problem solve.

**MA.K12.MTR.5.1:**

- Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
  - Focus on relevant details within a problem.
  - Create plans and procedures to logically order events, steps or ideas to solve problems.
  - Decompose a complex problem into manageable parts.
  - Relate previously learned concepts to new concepts.
  - Look for similarities among problems.
  - Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**

- Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
  - Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
  - Support students to develop generalizations based on the similarities found among problems.
  - Provide opportunities for students to create plans and procedures to solve problems.
  - Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

**Assess the reasonableness of solutions.**

- Mathematicians who assess the reasonableness of solutions:
English language learners communicate for social and instructional purposes within the school setting.

**MA.K12.MTR.6.1:**
Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**Clarifications:**
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

**MA.K12.MTR.7.1:**

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

**Clarifications:**
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

**Clarifications:**
See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

**Clarifications:**
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clarifications:**
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _______." The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

Use the accepted rules governing a specific format to create quality work.

**Clarifications:**
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

Use appropriate voice and tone when speaking or writing.

**Clarifications:**
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

English language learners communicate for social and instructional purposes within the school setting.

**ELD.K12.ELL.SI.1:**
English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

**HE.912.C.2.4:**
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.
GENERAL NOTES

International Relations - The grade 9-12 International Relations course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content emphasis for this course pertains to the study of the functions of the global community, the nature of the modern national state, national goals, and how nations communicate and negotiate to facilitate these goals. Content should include, but is not limited to, the origins of the nation-state system, the role of power politics in the nuclear age, factors that influence relations among nations, such as world population growth, food and other resources, environment, human rights, terrorism, cultural differences, world trade, and technology, ways in which governments conduct foreign policy, the role of international organizations in promoting world peace, the role of women and diverse cultural groups within and among nations, and career opportunities available in international relations.

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

GENERAL INFORMATION

Course Path: Section: Grades PreK to 12 Education
Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Political Sciences
Abbreviated Title: INTL RLS
Course Length: Year (Y)
Course Level: 2

Educator Certifications
Political Science (Grades 6-12)
Social Science (Grades 6-12)
### Course Standards

<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.2:</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</td>
</tr>
<tr>
<td>SS.912.A.1.3:</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.4:</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</td>
</tr>
<tr>
<td>SS.912.A.1.5:</td>
<td>Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: <a href="http://www.fldoe.org/bi/library_media/pdf/12totalfinds.pdf">http://www.fldoe.org/bi/library_media/pdf/12totalfinds.pdf</a></td>
</tr>
<tr>
<td>SS.912.A.1.6:</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.A.1.7:</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Review different economic and philosophic ideologies.</td>
</tr>
<tr>
<td>SS.912.A.3.10:</td>
<td>Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophical examples are capitalism, socialism, communism, anarchy.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. </tr>
<tr>
<td>SS.912.A.7.15:</td>
<td>Analyze the effects of foreign and domestic terrorism on the American people.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples may include, but are not limited to, Oklahoma City bombing, attack of September 11, 2001, Patriot Act, wars in Afghanistan and Iraq.</td>
</tr>
</tbody>
</table>
Examine changes in immigration policy and attitudes toward immigration since 1950.

**Clarifications:**
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

| SS.912.A.7.16: | **Clarifications:** This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. |
| SS.912.C.4.1: | Explain how the world's nations are governed differently. |
| SS.912.C.4.2: | Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society. |
| SS.912.C.4.3: | Assess human rights policies of the United States and other countries. |

**Clarifications:**

| SS.912.E.3.1: | **Clarifications:** Examples are oil prices, 1973 oil crisis, Great Depression, World War II. |
| SS.912.E.3.4: | **Clarifications:** Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality. |
| SS.912.E.3.5: | **Clarifications:** Examples are standard of living, exchange rates, productivity, gross domestic product. |
| SS.912.G.1.1: | Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions. |
| SS.912.G.1.2: | Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place. |
| SS.912.G.1.3: | Employ applicable units of measurement and scale to solve simple locational problems using maps and globes. |
| SS.912.G.1.4: | **Clarifications:** Examples are thematic, contour, and dot-density. Identify the physical characteristics and the human characteristics that define and differentiate regions. |

| SS.912.G.2.1: | **Clarifications:** Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography. |
| SS.912.G.2.2: | Describe the factors and processes that contribute to the differences between developing and developed regions of the world. |
| SS.912.G.2.3: | Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. |
| SS.912.G.4.1: | **Clarifications:** Examples are desertification, global warming, cataclysmic natural disasters. |
| SS.912.G.4.2: | Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places. |
| SS.912.G.4.3: | Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas. |
| SS.912.G.4.4: | **Clarifications:** Examples are cultural imperialism, outsourcing. |
| SS.912.G.4.7: | Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world. |
| SS.912.G.4.9: | Use political maps to describe the change in boundaries and governments within continents over time. |
| SS.912.H.1.1: | **Clarifications:** Examples are Bronze Age, Ming Dynasty, Classical, Renaissance, Modern, and Contemporary. |
| SS.912.H.1.2: | Describe how historical events, social context, and culture impact forms, techniques, and purposes of works in the arts, including the relationship between a government and its citizens. |
| SS.912.H.1.3: | **Clarifications:** Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman. |
| SS.912.H.1.4: | Explain philosophical beliefs as they relate to works in the arts. |
| SS.912.H.1.5: | **Clarifications:** Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home. |
Analyze how current events are explained by artistic and cultural trends of the past.

Identify the United States and Soviet aligned states of Europe, and contrast their political and economic characteristics.

Analyze the rise of regional trade blocs such as the European Union and NAFTA, and predict the impact of increased globalization in the 20th and 21st centuries.

Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.

Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.

Describe the causes and effects of twentieth century nationalist conflicts.

Describe the causes and effects of post-World War II economic and demographic changes.

Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.

Summarize key developments in post-war China.

Compare conflict interpretations or schools of thought about world events and individual contributions to history (historiography).

Evaluate the role of history in shaping identity and character.

Compare post-war independence movements in African, Asian, and Caribbean countries.

Identify the United States and Soviet aligned states of Europe, and contrast their political and economic characteristics.

Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.

Use timelines to establish cause and effect relationships of historical events.

Describe the rise and goals of nationalist leaders in the post-war era and the impact of their rule on their societies.

Describe the causes and effects of the arms race and proxy wars in Africa, Asia, Latin America, and the Middle East.

Identify the factors that led to the decline and fall of communism in the Soviet Union and Eastern Europe.

Summarize key developments in post-war China.

Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.

Identify the factors that led to the decline and fall of communism in the Soviet Union and Eastern Europe.

Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.

Summarize key developments in post-war China.

Compare conflict interpretations or schools of thought about world events and individual contributions to history (historiography).

Evaluate the role of history in shaping identity and character.

Compare post-war independence movements in African, Asian, and Caribbean countries.

Identify the United States and Soviet aligned states of Europe, and contrast their political and economic characteristics.
In grades 6–8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

**MAFS.912.S-ID.1.1:** Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★

**Clarifications:**
- In grades 6–8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

**MAFS.912.S-ID.1.2:** Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★

**Clarifications:**
- In grades 6–8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

**MAFS.912.S-ID.1.3:** Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★

**MAFS.912.S-ID.1.4:** Make sense of problems and persevere in solving them.

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

**MAFS.K12.MP.1.1:** Use appropriate tools strategically.

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

**MAFS.K12.MP.3.1:** Construct viable arguments and critique the reasoning of others.

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and— if there is a flaw in an argument— explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

**MAFS.K12.MP.5.1:** Attend to precision.

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

**MAFS.K12.MP.6.1:** Clarifications:
- Mathematically proficient students communicate for social and instructional purposes within the school setting.
- English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
- Evaluate how public health policies and government regulations can influence health promotion and disease prevention.
- Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

**MAFS.K12.MP.6.1:** English language learners communicate for social and instructional purposes within the school setting.

**MAFS.K12.MP.6.1:** English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

**HE.912.C.2.4:** Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

**HE.912.C.2.4:** Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.
International Relations 2 - The grade 9-12 International Relations 2 course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content emphasis for this course pertains to the analysis of major approaches to the study of international relations with particular emphasis on key concepts, such as balance of power, collective agreements, and sovereignty and the application of these concepts to major issues of international security, economics, and diplomacy. Content should include, but is not limited to, an analysis and evaluation of contemporary international trade agreements, the role of the United Nations, aligned national groups, and Non-Governmental Organizations in global affairs, a comparison of current political ideologies, foreign policy, and power politics in the post nuclear age, factors that influence relations among nations, such as resources, preservation of the environment, human rights abuses, state sponsored terrorism, ethnic, religious and cultural differences, and access to technology, an analysis of contemporary issues and challenges from a global perspective, an analysis and evaluation of the policy goals and challenges confronting the world's democratic governments, and an investigation of career opportunities available in international relations.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies
Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.2:</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</td>
</tr>
<tr>
<td>SS.912.A.1.3:</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.4:</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</td>
</tr>
<tr>
<td>SS.912.A.1.5:</td>
<td>Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: <a href="http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf">http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf</a></td>
</tr>
<tr>
<td>SS.912.A.1.6:</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.A.1.7:</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td>SS.912.A.3.10:</td>
<td>Review different economic and philosophic ideologies.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.</td>
</tr>
<tr>
<td>SS.912.A.6.9:</td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.7.10:</td>
<td>Describe the rationale for the formation of the United Nations, including the contribution of Mary McLeod Bethune.</td>
</tr>
<tr>
<td>SS.912.A.7.11:</td>
<td>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples may include, but are not limited to, the Declaration of Human Rights.</td>
</tr>
<tr>
<td>SS.912.A.7.12:</td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.7.13:</td>
<td>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</td>
</tr>
<tr>
<td>SS.912.A.7.14:</td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.7.15:</td>
<td>Analyze the effects of foreign and domestic terrorism on the American people.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples may include, but are not limited to, Oklahoma City bombing, attack of September 11, 2001, Patriot Act, wars in Afghanistan and Iraq.</td>
</tr>
<tr>
<td>SS.912.A.7.16:</td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.A.7.17:</td>
<td>Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples may include, but are not limited to, NAFTA, World Trade Organization.</td>
</tr>

This page is part of a larger document, and the content continues beyond what is shown here. The above snippet represents a portion of the course standards for International Relations 2 Honors, detailing various benchmarks and their descriptions and clarifications.
Examine changes in immigration policy and attitudes toward immigration since 1950.

**SS.912.A.7.16:**
- **Clarifications:**
  - This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

**SS.912.C.4.1:**
- **Clarifications:**
  - Explain how the world's nations are governed differently.

**SS.912.C.4.2:**
- **Clarifications:**
  - Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.

**SS.912.C.4.3:**
- **Clarifications:**
  - Assess human rights policies of the United States and other countries.

**SS.912.E.3.1:**
- **Clarifications:**
  - Demonstrate the impact of inflation on world economies.

**SS.912.E.3.4:**
- **Clarifications:**
  - Assess the economic impact of negative and positive externalities on the international environment.

**SS.912.E.3.5:**
- **Clarifications:**
  - Compare the current United States economy with other developed and developing nations.

**SS.912.G.1.1:**
- **Clarifications:**
  - Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.

**SS.912.G.1.2:**
- **Clarifications:**
  - Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

**SS.912.G.1.3:**
- **Clarifications:**
  - Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.

**SS.912.G.1.4:**
- **Clarifications:**
  - Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.

- **Clarifications:**
  - Identify the physical characteristics and the human characteristics that define and differentiate regions.

**SS.912.G.2.1:**
- **Clarifications:**
  - Examples of physical characteristics are climate, terrain, resources.

**SS.912.G.2.2:**
- **Clarifications:**
  - Examples of human characteristics are religion, government, economy, demography.

**SS.912.G.2.3:**
- **Clarifications:**
  - Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.

**SS.912.G.4.1:**
- **Clarifications:**
  - Interpret population growth and other demographic data for any given place.

**SS.912.G.4.2:**
- **Clarifications:**
  - Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.

**SS.912.G.4.3:**
- **Clarifications:**
  - Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.

**SS.912.G.4.4:**
- **Clarifications:**
  - Use geographic terms and tools to analyze case studies of issues in globalization.

**SS.912.G.4.7:**
- **Clarifications:**
  - Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.

**SS.912.G.4.9:**
- **Clarifications:**
  - Use political maps to describe the change in boundaries and governments within continents over time.

**SS.912.H.1.11:**
- **Clarifications:**
  - Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created.

**SS.912.H.1.12:**
- **Clarifications:**
  - Describe how historical events, social context, and culture impact forms, techniques, and purposes of works in the arts, including the relationship between a government and its citizens.

**SS.912.H.1.13:**
- **Clarifications:**
  - Relate works in the arts to various cultures.

**SS.912.H.1.14:**
- **Clarifications:**
  - Explain philosophical beliefs as they relate to works in the arts.

**SS.912.H.1.15:**
- **Clarifications:**
  - Examine artistic response to social issues and new ideas in various cultures.

**SS.912.H.1.16:**
- **Clarifications:**
  - Analyze how current events are explained by artistic and cultural trends of the past.
SS.912.H.3.1: Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.

SS.912.W.1.1: Use timelines to establish cause and effect relationships of historical events.

SS.912.W.1.2: Interpret and evaluate primary and secondary sources.

SS.912.W.1.3: Explain how historians use historical inquiry and other sciences to understand the past.

SS.912.W.1.4: Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).

SS.912.W.1.5: Evaluate the role of history in shaping identity and character.

SS.912.W.1.6: Identify the United States and Soviet aligned states of Europe, and contrast their political and economic characteristics.

SS.912.W.8.1: Identify the United States and Soviet aligned states of Europe, and contrast their political and economic characteristics.

SS.912.W.8.2: Describe the causes and effects of the arms race and proxy wars in Africa, Asia, Latin America, and the Middle East.

SS.912.W.8.3: Summarize key developments in post-war China.

SS.912.W.8.4: Summarize the causes and effects of the arms race and proxy wars in Africa, Asia, Latin America, and the Middle East.

SS.912.W.8.5: Identify the factors that led to the decline and fall of communism in the Soviet Union and Eastern Europe.

SS.912.W.8.6: Summarize the causes and effects of the arms race and proxy wars in Africa, Asia, Latin America, and the Middle East.

SS.912.W.8.7: Summarize key developments in post-war China.

SS.912.W.8.8: Summarize key developments in post-war China.

SS.912.W.8.9: Summarize key developments in post-war China.

SS.912.W.8.10: Summarize key developments in post-war China.

SS.912.W.9.1: Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

SS.912.W.9.2: Describe the causes and effects of twentieth century nationalist conflicts.

SS.912.W.9.3: Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.

SS.912.W.9.4: Describe the causes and effects of post-World War II economic and demographic changes.

SS.912.W.9.5: Describe the causes and effects of post-World War II economic and demographic changes.

SS.912.W.9.6: Describe the causes and effects of post-World War II economic and demographic changes.

SS.912.W.9.7: Describe the causes and effects of post-World War II economic and demographic changes.

Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Clarifications:

- Clarifications:

- Clarifications:

- Clarifications:

- Clarifications:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students’ ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:
Read and comprehend grade-level complex texts proficiently.

Clarifications:
See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.3.1:
Make inferences to support comprehension.

Clarifications:
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.4.1:
Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _____ because _____.” The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.5.1:
Use the accepted rules governing a specific format to create quality work.

Clarifications:
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.6.1:
Use appropriate voice and tone when speaking or writing.

Clarifications:
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

ELD.K12.ELL.SI.1:
English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SS.1:
English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

HE.912.C.2.4:
Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

Clarifications:
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES
International Relations 2 - The grade 9-12 International Relations 2 course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content emphasis for this course pertains to the analysis of major approaches to the study of international relations with particular emphasis on key concepts, such as balance of power, collective agreements, and sovereignty and the application of these concepts to major issues of international security, economics, and diplomacy. Content should include, but is not limited to, an analysis and evaluation of contemporary international trade agreements, the role of the United Nations, aligned national groups, and Non-Governmental Organizations in global affairs, a comparison of current political ideologies, foreign policy, and power politics in the post nuclear age, factors that influence relations among nations, such as resources, preservation of the environment, human rights abuses, state sponsored terrorism, ethnic, religious and cultural differences, and access to technology, an analysis of contemporary issues and challenges from a global perspective, an analysis and evaluation of the policy goals and challenges confronting the world's democratic governments, and an investigation of career opportunities available in international relations.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EE and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL Supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

### SS.912.A.7.16:
#### Clarifications:
This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Analyze how liberty and economic freedom generate broad-based opportunity and prosperity in the United States.
- Students will differentiate between government systems (e.g., autocracy, democracy, monarchy, oligarchy, theocracy).
- Students will differentiate between economic systems (e.g., capitalism, communism, mixed market, socialism).
- Students will analyze the disadvantages of authoritarian control over the economy (e.g., communism and socialism) in generating broad-based economic prosperity for their population.

### SS.912.CG.4.1:
#### Clarifications:
Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.

**Demonstrate the impact of inflation on world economies.**

**Assess the economic impact of negative and positive externalities on the international environment.**

**Compare the current United States economy with other developed and developing nations.**

**Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.**

**Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.**

**Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.**

**Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.**

**Identify the physical characteristics and the human characteristics that define and differentiate regions.**

### SS.912.G.2.1:
#### Clarifications:
Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.

**Describe the factors and processes that contribute to the differences between developing and developed regions of the world.**

**Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.**

**Interpret population growth and other demographic data for any given place.**

**Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.**

**Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.**

### SS.912.G.4.4:
#### Clarifications:
Examples are cultural imperialism, outsourcing.

**Use geographic terms and tools to analyze case studies of issues in globalization.**

**Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.**

**Use political maps to describe the change in boundaries and governments within continents over time.**

**Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created.**

### SS.912.H.1.1:
#### Clarifications:
Examples are Bronze Age, Ming Dynasty, Classical, Renaissance, Modern, and Contemporary.

Describe how historical events, social context, and culture impact forms, techniques, and purposes of works in the arts, including the relationship
| SS.912.H.1.2: | Analyze how current events are explained by artistic and cultural trends of the past. |
| SS.912.H.1.3: | Relate works in the arts to various cultures. |
| SS.912.H.1.4: | Explain philosophical beliefs as they relate to works in the arts. |
| SS.912.H.1.5: | Examine artistic response to social issues and new ideas in various cultures. |
| SS.912.H.1.6: | Analyze how current events are explained by artistic and cultural trends of the past. |
| SS.912.H.3.1: | Use timelines to establish cause and effect relationships of historical events. |
| SS.912.W.8.1: | Identify the United States and Soviet aligned states of Europe, and contrast their political and economic characteristics. |
| SS.912.W.8.2: | Describe characteristics of the early Cold War. |
| SS.912.W.8.3: | Summarize key developments in post-war China. |
| SS.912.W.8.4: | Summarize the causes and effects of the arms race and proxy wars in Africa, Asia, Latin America, and the Middle East. |
| SS.912.W.8.5: | Identify the factors that led to the decline and fall of communism in the Soviet Union and Eastern Europe. |
| SS.912.W.8.6: | Explain the 20th century background for the establishment of the modern state of Israel in 1948, including the Zionist movement led by Theodor Herzl, and the ongoing military and political conflicts between Israel and the Arab-Muslim world. |
| SS.912.W.8.7: | Compare post-war independence movements in African, Asian, and Caribbean countries. |
| SS.912.W.8.8: | Describe the rise and goals of nationalist leaders in the post-war era and the impact of their rule on their societies. |
| SS.912.W.8.9: | Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America. |
| SS.912.W.8.10: | Explain the impact of religious fundamentalism in the last half of the 20th century, and identify related events and forces in the Middle East over the last several decades. |
| SS.912.W.9.1: | Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life. |
| SS.912.W.9.2: | Describe the causes and effects of post-World War II economic and demographic changes. |
| SS.912.W.9.3: | Explain cultural, historical, and economic factors and governmental policies that created the opportunities for ethnic cleansing or genocide in Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them. |
| SS.912.W.9.4 | Assess the social and economic impact of pandemics on a global scale, particularly within the developing and under-developed world. |
| SS.912.W.9.5 | Analyze the rise of regional trade blocs such as the European Union and NAFTA, and predict the impact of increased globalization in the 20th and 21st centuries. |
| SS.912.W.9.6 | Describe the impact of and global response to international terrorism. |
| SS.912.W.9.7 | Describe the causes and effects of twentieth century nationalist conflicts. |

### SS.912.W.9.4 Clarifications:
- Examples are Cyprus, Kashmir, Tibet, Northern Ireland.

### SS.912.W.9.5 Clarifications:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

### SS.912.W.9.6 Clarifications:
- Construct possible arguments based on evidence.
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.

### SS.912.W.9.7 Clarifications:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

### MA.K12.MTR.1.1 Clarifications:
- Teachers who encourage students to engage actively in effortful learning both individually and with others:
  - Cultivate a community of growth mindset learners.
  - Foster perseverance in students by choosing tasks that are challenging.
  - Develop students' ability to analyze and problem solve.
  - Recognize students' effort when solving challenging problems.

### MA.K12.MTR.2.1 Clarifications:
- Demonstrate understanding by representing problems in multiple ways.
  - Build understanding through modeling and using manipulatives.
  - Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
  - Progress from modeling problems with objects and drawings to using algorithms and equations.
  - Express connections between concepts and representations.
  - Choose a representation based on the given context or purpose.

### MA.K12.MTR.3.1 Clarifications:
- Complete tasks with mathematical fluency.
  - Select efficient and appropriate methods for solving problems within the given context.
  - Maintain flexibility and accuracy while performing procedures and mental calculations.
  - Complete tasks accurately and with confidence.
  - Adapt procedures to apply them to a new context.
  - Use feedback to improve efficiency when performing calculations.

### MA.K12.MTR.4.1 Clarifications:
- Engage in discussions that reflect on the mathematical thinking of self and others.
  - Communicate mathematical ideas, vocabulary and methods effectively.
  - Analyze the mathematical thinking of others.
  - Compare the efficiency of a method to those expressed by others.
  - Recognize errors and suggest how to correctly solve the task.
  - Justify results by explaining methods and processes.
  - Construct possible arguments based on evidence.

### MA.K12.MTR.5.1 Clarifications:
- Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
  - Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
  - Create opportunities for students to discuss their thinking with peers.
  - Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
  - Develop students' ability to justify methods and compare their responses to the responses of their peers.

### MA.K12.MTR.6.1 Clarifications:
- Use patterns and structure to help understand and connect mathematical concepts.
  - Focus on relevant details within a problem.
  - Create plans and procedures to logically order events, steps or ideas to solve problems.
  - Decompose a complex problem into manageable parts.
  - Relate previously learned concepts to new concepts.
  - Look for similarities among problems.
  - Connect solutions of problems to more complicated large-scale situations.
### Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

### Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

### Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

### Cite evidence to explain and justify reasoning.
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

### Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _______ because _______." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

### Use the accepted rules governing a specific format to create quality work.
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

### Use appropriate voice and tone when speaking or writing.

General Course Information and Notes

**GENERAL NOTES**

**International Relations 2** - The grade 9-12 International Relations 2 course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content emphasis for this course pertains to the analysis of major approaches to the study of international relations with particular emphasis on key concepts, such as balance of power, collective agreements, and sovereignty and the application of these concepts to major issues of international security, economics, and diplomacy. Content should include, but is not limited to, an analysis and evaluation of contemporary international trade agreements, the role of the United Nations, aligned national groups, and Non-Governmental Organizations in global affairs, a comparison of current political ideologies, foreign policy, and power politics in the post nuclear age, factors that influence relations among nations, such as resources, preservation of the environment, human rights abuses, state sponsored terrorism, ethnic, religious and cultural differences, and access to technology, an analysis of contemporary issues and challenges from a global perspective, an analysis and evaluation of the policy goals and challenges confronting the world’s democratic governments, and an investigation of career opportunities available in international relations.

**Honors and Advanced Level Course Note:** Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students’ content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EE and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

Examining the constitutional principles of representative government, analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution. Identify the impact of independent regulatory agencies in the federal bureaucracy.

Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution. Examine constitutional powers (expressed, implied, concurrent, reserved).

Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution. Describe the role of judicial review in American constitutional government. Clarifications: Examples are Federal Reserve, Food and Drug Administration, Federal Communications Commission.

Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them. Evaluate the significance and outcomes of landmark Supreme Court cases. Clarifications: Examples are decisions based on the law vs. will of the majority.

Evaluate the role of history in shaping identity and character. Examine how historians use historical inquiry and other sciences to understand the past. Clarifications: Examples are youth voter turnout, issue-based voting.

Compare and contrast the roles of judges on the federal and state level with other elected officials. Clarifications: Examples are decisions based on the law vs. will of the majority.

Interpret and evaluate primary and secondary sources. Analyze and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.

Evaluate the role of history in shaping identity and character. Clarifications: Examples are education, transportation, crime prevention, funding of services.

Explain how historians use historical inquiry and other sciences to understand the past. Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.

Evaluate the role of history in shaping identity and character. Clarifications: Examples are ethnic, cultural, personal, national, religious.

Cite specific textual evidence to support analysis of primary and secondary sources, connecting insights gained from specific details to an understanding of the text as a whole. Interpreted and evaluated primary and secondary sources. Determine the central ideas or information of a primary or secondary source; provide an accurate summary that makes clear the relationships among the key details and ideas.

Determine various explanations for actions or events and determine which explanation best accords with textual evidence, acknowledging where the text leaves matters uncertain. Evaluate various explanations for actions or events and determine which explanation best accords with textual evidence, acknowledging where the text leaves matters uncertain.

Determine the meaning of words and phrases as they are used in a text, including analyzing how an author uses and refines the meaning of a key term over the course of a text (e.g., how Madison defines faction in Federalist No. 10). Analyze in detail how a primary source is structured, including how key sentences, paragraphs, and larger portions of the text contribute to the whole. Clarifications: Examples are Gideon v. Wainwright, Miranda v. Arizona, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, Roe v. Wade, Bush v. Gore, Texas v. Johnson, Mapp v. Ohio, McCulloch v. Maryland, District of Columbia v. Heller.

Evaluate authors' differing points of view on the same historical event or issue by assessing the authors' claims, reasoning, and evidence. Analyze in detail how a primary source is structured, including how key sentences, paragraphs, and larger portions of the text contribute to the whole. Clarifications: Examples are education, transportation, crime prevention, funding of services.

Integrate and evaluate multiple sources of information presented in diverse forms and media (e.g., visually, quantitatively, as well as in words) in order to address a question or solve a problem. Evaluate an author's premises, claims, and evidence by corroborating or challenging them with other information.

Integrate information from diverse sources, both primary and secondary, into a coherent understanding of an idea or event, noting discrepancies among sources. Integrate information from diverse sources, both primary and secondary, into a coherent understanding of an idea or event, noting discrepancies among sources.

Identify the impact of independent regulatory agencies in the federal bureaucracy. Clarifications: Examples are Federal Reserve, Food and Drug Administration, Federal Communications Commission.

Identify the impact of independent regulatory agencies in the federal bureaucracy. Clarifications: Examples are Federal Reserve, Food and Drug Administration, Federal Communications Commission.
Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.

Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.

Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.

Write arguments focused on discipline-specific content.
   a. Introduce precise, knowledgeable claim(s), establish the significance of the claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that logically sequences the claim(s), counterclaims, reasons, and evidence.
   b. Develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form that anticipates the audience's knowledge level, concerns, values, and possible biases.
   c. Use words, phrases, and clauses as well as varied syntax to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.
   d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.
   e. Provide a concluding statement or section that follows from or supports the argument presented.

Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes.
   a. Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which preceded it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.
   b. Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.
   c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts.
   d. Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers.
   e. Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.

Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the specific task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.

Draw evidence from informational texts to support analysis, reflection, and research.

Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each.

Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling.

Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant.

Evaluate reports based on data.

Represent data with plots on the real number line (dot plots, histograms, and box plots).

In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.
General Course Information and Notes

GENERAL NOTES

The American Political System: Process and Power Honors - The grade 9-12 The American Political System: Process and Power Honors course consists of the following content area strands: American History, Geography, Civics and Government. The primary content for the course pertains to the study of the political system in America and the dynamics of political issues. Content should include, but is not limited to, the nature of political behavior, power acquisition, maintenance, and extension, classical and modern political theorists, comparison of political systems, evolution of democratic political systems, functions of the three branches of government at the local, state and national levels, Florida government, including the Florida Constitution, municipal and county government, constitutional framework, federalism, and separation of power, including study of the Declaration of Independence, the U.S. Constitution, and the Federalist Papers, evolving role of political parties and interest groups in determining government policy, political decision-making process, the role of women and diverse cultural groups in the development of our political system, and career opportunities available in the government system.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and construction of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing test complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and
concepts using mathematical tables, charts, and graphs.

Special Notes: Students earning credit in this course may not earn credit in American Government (2106310), American Government Honors (2106320), or The American Political System: Process and Power (2106450). Additional content that may be included in the Grade 12 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- United States, major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at: http://www.nagb.org/publications/frameworks/civicsframework.pdf

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

GENERAL INFORMATION

Course Number: 2106460
Number of Credits: Half credit (.5)
Course Type: Core Academic Course
Course Status: Course Approved
Grade Level(s): 9,10,11,12
Graduation Requirement: United States Government

Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Political Sciences
Abbreviated Title: AMER POLIT SYSS HON
Course Length: Semester (S)
Course Attributes:
- Honors
Course Level: 3

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.2:</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</td>
</tr>
<tr>
<td>SS.912.A.1.3:</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.4:</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past. Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: <a href="http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf">http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf</a></td>
</tr>
<tr>
<td>SS.912.A.1.5:</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.C.1.1:</td>
<td>Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.1.2:</td>
<td>Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.1.3:</td>
<td>Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.</td>
</tr>
<tr>
<td>SS.912.C.1.4:</td>
<td>Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights.</td>
</tr>
<tr>
<td>SS.912.C.1.5:</td>
<td>Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.</td>
</tr>
<tr>
<td>SS.912.C.1.6:</td>
<td>Experience the responsibilities of citizens at the local, state, or federal levels.</td>
</tr>
<tr>
<td>SS.912.C.2.3:</td>
<td>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock-election.</td>
</tr>
<tr>
<td>SS.912.C.2.4:</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.6:</td>
<td>Evaluate, take, and defend positions about rights protected by the Constitution and Bill of Rights.</td>
</tr>
<tr>
<td>SS.912.C.2.7:</td>
<td>Clarifications: Examples are speech, search and seizure, religion, gun possession.</td>
</tr>
<tr>
<td>SS.912.C.2.8:</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change.</td>
</tr>
<tr>
<td>SS.912.C.2.9:</td>
<td>Clarifications: Examples are e-mail campaigns, boycotts, blogs, podcasts, protests, demonstrations, letters to editors.</td>
</tr>
<tr>
<td>SS.912.C.2.10:</td>
<td>Monitor current public issues in Florida.</td>
</tr>
<tr>
<td>SS.912.C.2.11:</td>
<td>Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.</td>
</tr>
<tr>
<td>SS.912.C.2.12:</td>
<td>Explain the changing roles of television, radio, press, and Internet in political communication.</td>
</tr>
<tr>
<td>SS.912.C.2.13:</td>
<td>Clarifications: Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media.</td>
</tr>
<tr>
<td>SS.912.C.2.14:</td>
<td>Evaluate the processes and results of an election at the state or federal level.</td>
</tr>
<tr>
<td>SS.912.C.2.15:</td>
<td>Evaluate the origins and roles of political parties, interest groups, media, and individuals in determining and shaping public policy.</td>
</tr>
<tr>
<td>SS.912.C.2.16:</td>
<td>Analyze trends in voter turnout.</td>
</tr>
<tr>
<td>SS.912.C.3.1:</td>
<td>Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.3.2:</td>
<td>Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.</td>
</tr>
<tr>
<td>SS.912.C.3.3:</td>
<td>Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.3.4:</td>
<td>Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.3.5:</td>
<td>Identify the impact of independent regulatory agencies in the federal bureaucracy.</td>
</tr>
<tr>
<td>SS.912.C.3.6:</td>
<td>Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.3.7:</td>
<td>Describe the role of judicial review in American constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.3.8:</td>
<td>Compare the role of judges on the state and federal level with other elected officials.</td>
</tr>
<tr>
<td>SS.912.C.3.9:</td>
<td>Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them.</td>
</tr>
<tr>
<td>SS.912.C.3.10:</td>
<td>Evaluate the significance and outcomes of landmark Supreme Court cases.</td>
</tr>
<tr>
<td>SS.912.C.3.11:</td>
<td>Contrast how the Constitution safeguards and limits individual rights.</td>
</tr>
<tr>
<td>SS.912.C.3.12:</td>
<td>Illustrate examples of how government affects the daily lives of citizens at the local, state, and national levels.</td>
</tr>
<tr>
<td>SS.912.C.3.14:</td>
<td>Examine constitutional powers (expressed, implied, concurrent, reserved).</td>
</tr>
<tr>
<td>SS.912.C.3.15:</td>
<td>Examine how power and responsibility are distributed, shared, and limited by the Constitution.</td>
</tr>
<tr>
<td>SS.912.C.3.16:</td>
<td>Explain how the world's nations are governed differently.</td>
</tr>
<tr>
<td>SS.912.C.3.17:</td>
<td>Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.</td>
</tr>
<tr>
<td>SS.912.C.3.18:</td>
<td>Compare indicators of democratization in multiple countries.</td>
</tr>
<tr>
<td>SS.912.G.4.1:</td>
<td>Interpret population growth and other demographic data for any given place.</td>
</tr>
<tr>
<td>SS.912.G.5.5:</td>
<td>Use geographic terms and tools to analyze case studies of policies and programs for resource use and management.</td>
</tr>
<tr>
<td>SS.912.W.1.1:</td>
<td>Use timelines to establish cause and effect relationships of historical events.</td>
</tr>
<tr>
<td>SS.912.W.1.2:</td>
<td>Explain how historians use historical inquiry and other sciences to understand the past.</td>
</tr>
<tr>
<td>SS.912.W.1.3:</td>
<td>Mathematics who demonstrate understanding by representing problems in multiple ways.</td>
</tr>
<tr>
<td>SS.912.W.1.4:</td>
<td>Teachers who encourage students to participate actively in effortful learning both individually and with others:</td>
</tr>
<tr>
<td>SS.912.W.1.5:</td>
<td>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</td>
</tr>
<tr>
<td>MA.K12.MTR.1.1:</td>
<td>Help and support each other when attempting a new method or approach.</td>
</tr>
<tr>
<td>MA.K12.MTR.2.1:</td>
<td>Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</td>
</tr>
</tbody>
</table>
Guide students from concrete to pictorial to abstract representations as understanding progresses.

Show students that various representations can have different purposes and can be useful in different situations.

### Complete tasks with mathematical fluency

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

**Clarifications:**

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

### Engage in discussions that reflect on the mathematical thinking of self and others

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

**Clarifications:**

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

### Use patterns and structure to help understand and connect mathematical concepts

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

**Clarifications:**

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

### Assess the reasonableness of solutions

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

**Clarifications:**

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

### Apply mathematics to real-world contexts

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
• Support students as they validate conclusions by comparing them to the given situation.
• Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

**Clarifications:**
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

**ELA.K12.EE.1.1:**
Read and comprehend grade-level complex texts proficiently.

**Clarifications:**
See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

**ELA.K12.EE.3.1:**
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**ELA.K12.EE.4.1:**
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _____ because ______.” The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills.
Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

Use the accepted rules governing a specific format to create quality work.

**ELA.K12.EE.5.1:**
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

Use appropriate voice and tone when speaking or writing.

**ELA.K12.EE.6.1:**
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

**ELD.K12.ELL.SL.1:**
English language learners communicate for social and instructional purposes within the school setting.

**ELD.K12.ELL.SS.1:**
English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

**HE.912.C.2.4:**
Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

**Clarifications:**
Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

---

**General Course Information and Notes**

**GENERAL NOTES**

**The American Political System: Process and Power Honors** - The grade 9-12 The American Political System: Process and Power Honors course consists of the following content area strands: American History, Geography, Civics and Government. The primary content for the course pertains to the study of the political system in America and the dynamics of political issues. Content should include, but is not limited to, the nature of political behavior, power acquisition, maintenance, and extension, classical and modern political theorists, comparison of political systems, evolution of democratic political systems, functions of the three branches of government at the local, state and national levels, Florida government, including the Florida Constitution, municipal and county government, constitutional framework, federalism, and separation of power, including study of the Declaration of Independence, the U.S. Constitution, and the Federalist Papers, evolving role of political parties and interest groups in determining government policy, political decision-making process, the role of women and diverse cultural groups in the development of our political system, and career opportunities available in the government system.

**Honors and Advanced Level Course Note:** Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

**Special Notes:** Students earning credit in this course may not earn credit in American Government (2106310), American Government Honors (2106320), or The American Political System: Process and Power (2106450). Additional content that may be included in the Grade 12 NAEP Civics assessment includes:
Distinctive characteristics of American society
Unity/diversity in American society
Civil society; nongovernmental associations, groups
Nation-states
Interaction among nation-states
United States, major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at: http://www.nagb.org/publications/frameworks/civicsframework.pdf

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students’ content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida’s Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida’s B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

GENERAL INFORMATION

Course Number: 2106460
Course Path: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Political Sciences > Abbreviated Title: AMER POLIT SYSS HON

Number of Credits: Half credit (.5)
Course Type: Core Academic Course
Course Status: Course Approved
Grade Level(s): 9,10,11,12
Graduation Requirement: United States Government
Course Attributes:
- Honors
Course Level: 3

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.2:</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</td>
</tr>
<tr>
<td>SS.912.A.1.3:</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.4:</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.</td>
</tr>
<tr>
<td>SS.912.A.1.5:</td>
<td>Explain the responsibilities of citizens at the local, state and national levels.</td>
</tr>
<tr>
<td>SS.912.A.1.6:</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.CG.1.1:</td>
<td>Examine how intellectual influences in primary documents contributed to the ideas in the Declaration of Independence, the U.S. Constitution and the Bill of Rights.</td>
</tr>
<tr>
<td>SS.912.CG.1.2:</td>
<td>Explain the influence of Enlightenment ideas on the Declaration of Independence.</td>
</tr>
<tr>
<td>SS.912.CG.1.3:</td>
<td>Analyze how the ideals and principles expressed in the founding documents shape America as a constitutional republic.</td>
</tr>
<tr>
<td>SS.912.CG.1.4:</td>
<td>Explain how the U.S. Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers.</td>
</tr>
<tr>
<td>SS.912.CG.1.5:</td>
<td>Explain the constitutional provisions that establish and affect citizenship.</td>
</tr>
<tr>
<td>SS.912.CG.2.1:</td>
<td>Explain the importance of political and civic participation to the success of the United States' constitutional republic.</td>
</tr>
<tr>
<td>SS.912.CG.2.2:</td>
<td>Explain the responsibilities of citizens at the local, state and national levels.</td>
</tr>
</tbody>
</table>
Students will identify various responsibilities held by citizens (e.g., voting, volunteering and being informed, respecting laws).

Students will understand the process of registering or preregistering to vote and how to complete a ballot in Florida (e.g., uniform primary and general election ballot).

Students will discuss appropriate methods of communication with public officials (e.g., corresponding, attending public meetings, requesting a meeting and providing information).

Students will participate in classroom activities that simulate exercising the responsibilities of citizenship.

Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the public good.

Students will examine situations when individuals’ rights have been restricted for the public good (e.g., limits on speech or rationing of goods during wartime, enactment of the Patriot Act).

Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good.

Students will explain different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response).

Analyze contemporary and historical examples of government-imposed restrictions on rights.

Students will identify historical examples of government-imposed restrictions on rights (e.g., suspension of habeas corpus, rationing during wartime and limitations on speech).

Students will examine the rationale for government-imposed restrictions on rights (e.g., inciting a crime, campaign contributions, defamation, military secrets).

Students will explain the role founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights.

Analyze the impact of civic engagement as a means of preserving or reforming institutions.

Students will identify legal methods that citizens can use to promote social and political change (e.g., voting, peaceful protests, petitioning, demonstrations, contacting government offices).

Students will identify historical examples of citizens achieving or preventing political and social change through civic engagement (e.g., the Abolitionist Movement).

Analyze factors that contribute to voter turnout in local, state and national elections.

Students will explain trends in voter turnout.

Students will explain how governmental action has affected voter participation (e.g., 15th, 19th and 26th Amendments; Jim Crow laws; poll tax; efforts to suppress voters).

Evaluate political communication for bias, factual accuracy, omission and emotional appeal.

Students will compare and contrast how the free press influenced politics at major points in U.S. history (e.g., Vietnam War Era, Civil Rights Era).

Students will identify various forms of propaganda (e.g., plain folks, glittering generalities, testimonial, fear, logical fallacies).

Students will discuss the different methods used to tabulate election results in state and national elections (i.e., electronic voting, punch cards, fill-in ballots).

Students will explain the role of debates in elections.

Analyze the process and procedures of elections at the state and national levels.

Students will examine the rationale for the different primary formats and how political parties nominate candidates using primaries.

Students will analyze how the methods of political communication may include, but are not limited to, political cartoons, propaganda, campaign advertisements, political speeches, bumper stickers, blogs, press and social media.

Students will discuss attempts to increase voter turnout (e.g., get out the vote campaigns, social movements).

Students will explain how the principles contained in foundational documents contributed to the expansion of civil rights and liberties over time.

Students will explain how different groups of people (e.g., African Americans, immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman’s desegregation of the army, Lincoln’s Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault).

Students will explain how the principles of checks and balances, consent of the people and separation of power contribute to the nation’s longevity.

Students will explain historical examples of citizens achieving or preventing political and social change through civic engagement (e.g., the Abolitionist Movement).

Students will explain how different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response).

Students will evaluate the role of debates in elections.

Students will examine the relationship and responsibilities of both the state and national governments regarding these public issues.

Students will explain how the principles of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers contribute to the nation’s longevity and its ability to overcome challenges, and distinguish the United States’ constitutional republic from authoritarian and totalitarian nations.

Analyze how the U.S. Constitution safeguards and limits individual rights.

Students will identify the individual rights protected by the U.S. Constitution, the Bill of Rights and other constitutional amendments.
- Students will describe the role of the Supreme Court in further defining the safeguards and limits of constitutional rights.

<table>
<thead>
<tr>
<th>SS.912.CG.3.3:</th>
<th>Analyze the structures, functions and processes of the legislative branch as described in Article I of the U.S. Constitution.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Students will explain why Article I of the U.S. Constitution established a bicameral legislative body and how the House of Representatives functions differently from the Senate.</td>
</tr>
<tr>
<td></td>
<td>Students will identify the methods for determining the number of members in the House of Representatives and the Senate.</td>
</tr>
<tr>
<td></td>
<td>Students will identify and describe the &quot;enumerated powers&quot; delegated to Congress (e.g., assess taxes, borrow money, declare war, make laws).</td>
</tr>
<tr>
<td></td>
<td>Students will analyze the role of the legislative branch in terms of its relationship with the judicial and executive branch of the government.</td>
</tr>
<tr>
<td></td>
<td>Students will describe constitutional amendments that changed the role of Congress from its original description in Article I of the U.S. Constitution (i.e., 10th, 14th, 16th, 17th and 27th Amendments).</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.3.4:</th>
<th>Analyze the structures, functions and processes of the executive branch as described in Article II of the U.S. Constitution.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Students will explain the qualifications one must have to seek the office of president and the process of presidential elections.</td>
</tr>
<tr>
<td></td>
<td>Students will explain different presidential responsibilities outlined in Article II (e.g., receiving foreign heads of state, delivering the State of the Union address, carrying out faithful execution of the law).</td>
</tr>
<tr>
<td></td>
<td>Students will examine the role of the executive branch in terms of its relationship with the judicial and legislative branches of the government.</td>
</tr>
<tr>
<td></td>
<td>Students will describe constitutional amendments (i.e., 12th, 20th, 22nd and 25th) that have changed the role of the executive branch from its original description in Article II.</td>
</tr>
<tr>
<td></td>
<td>Students will describe the impeachment process.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.3.5:</th>
<th>Describe how independent regulatory agencies interact with the three branches of government and with citizens.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Students will identify independent regulatory agencies (e.g., Federal Communications Commission, Federal Election Commission, National Labor Relations Board) and explain their purpose and effect.</td>
</tr>
<tr>
<td></td>
<td>Students will describe the advantages and disadvantages of delegating power to independent regulatory agencies.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.3.6:</th>
<th>Explain expressed, implied, concurrent and reserved powers in the U.S. Constitution.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Students will identify powers that are expressed in the U.S. Constitution to Congress (e.g., coin money, declare war, assess taxes, citizenship).</td>
</tr>
<tr>
<td></td>
<td>Students will identify that expressed powers are also known as enumerated powers found in Article I of the U.S. Constitution.</td>
</tr>
<tr>
<td></td>
<td>Students will analyze the role of the &quot;general welfare clause&quot; and &quot;necessary and proper clause&quot; in granting Congress implied powers.</td>
</tr>
<tr>
<td></td>
<td>Students will describe examples of concurrent powers as those powers shared by both state and national governments (e.g., build roads, tax citizens, make laws).</td>
</tr>
<tr>
<td></td>
<td>Students will explain how reserved powers define issues as matters for the people or the state governments.</td>
</tr>
<tr>
<td></td>
<td>Students will compare the roles of expressed, implied, concurrent and reserved powers in United States' federalism.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.3.7:</th>
<th>Analyze the structures, functions and processes of the judicial branch as described in Article III of the U.S. Constitution.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Students will examine the role of district courts, the courts of appeals and the Supreme Court in the judicial review process.</td>
</tr>
<tr>
<td></td>
<td>Students will explain the relationship between the concept of judicial review and the language of the Supremacy Clause in Article VI of the U.S. Constitution.</td>
</tr>
<tr>
<td></td>
<td>Students will describe the powers delegated to the courts by Article III including, but not limited to, treason, jurisdiction and trial by jury.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.3.8:</th>
<th>Describe the purpose and function of judicial review in the American constitutional government.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Students will examine the role of district courts, the courts of appeals and the Supreme Court in the judicial review process.</td>
</tr>
<tr>
<td></td>
<td>Students will explain the relationship between the concept of judicial review and the language of the Supremacy Clause in Article VI of the U.S. Constitution.</td>
</tr>
<tr>
<td></td>
<td>Students will compare the role of state and federal judges with other elected officials.</td>
</tr>
<tr>
<td></td>
<td>Students will compare the ways state and federal judges are appointed compared to other elected officials.</td>
</tr>
<tr>
<td></td>
<td>Students will distinguish the qualifications needed for a judge at the state or federal level versus other elected officials.</td>
</tr>
<tr>
<td></td>
<td>Students will compare the decision-making process of judges compared to other political figures.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.3.9:</th>
<th>Analyze the levels and responsibilities of state and federal courts.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Students will describe what Article III of the U.S. Constitution states about the relationship between state and federal courts.</td>
</tr>
<tr>
<td></td>
<td>Students will recognize the role of the Federal Judiciary Act of 1789 in establishing the structure and jurisdiction of the federal court system.</td>
</tr>
<tr>
<td></td>
<td>Students will contrast the differences among civil trials and criminal trials at the state level.</td>
</tr>
<tr>
<td></td>
<td>Students will describe the relationship among the Supreme Court, federal appellate courts and federal district courts (e.g., Erie Doctrine, Rooker-Feldman Doctrine).</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.3.10:</th>
<th>Evaluate how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; McCulloch v. Maryland; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; Korematsu v. United States; Mapp v. Ohio; In re Gault; United States v. Nixon; Regents of the University of California v. Bakke; Hazelwood v. Kuhlmeier; District of Columbia v. Heller).</td>
</tr>
<tr>
<td></td>
<td>Students will explain the foundational constitutional issues underlying landmark Supreme Court decisions related to the Bill of Rights and other amendments.</td>
</tr>
<tr>
<td></td>
<td>Students will explain the outcomes of landmark Supreme Court cases related to the Bill of Rights and other amendments.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.3.11:</th>
<th>Analyze the concept of federalism in the United States and its role in establishing the relationship between the state and national governments.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Students will identify examples of the powers reserved and shared among state and the national governments in the American federal system of government.</td>
</tr>
<tr>
<td></td>
<td>Students will examine the role the Great Compromise had on the eventual establishment of a federal system of fifty equal states.</td>
</tr>
<tr>
<td></td>
<td>Students will explain specific rights that are granted to the states in the language of the U.S. Constitution and its amendments (e.g., 10th Amendment, defense and extradition).</td>
</tr>
<tr>
<td></td>
<td>Students will analyze how states have challenged the national government regarding states’ rights (e.g., Civil War, the New Deal, No Child Left Behind, Affordable Health Care Act, Civil Rights Movement).</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SS.912.CG.3.12:</th>
<th>Explain how issues between Florida, other states and the national government are resolved.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Students will explain the concept of federalism as it applies to each issue.</td>
</tr>
<tr>
<td></td>
<td>Students will use historical and issue-based scenarios to demonstrate understanding of how disputes between Florida, other states and the national government are resolved (e.g., water rights arguments between Florida and Georgia, national and state conflict over rights to adjacent waters and seabeds, civil rights).</td>
</tr>
<tr>
<td></td>
<td>Explain the judicial decision-making process in interpreting law at the state and national levels.</td>
</tr>
</tbody>
</table>
### SS.912.CG.3.14:
- Students will explain the role of the U.S. Constitution in interpreting law at the state and national levels.
- Students will explain the process used by judges at the state and national levels when making a decision or writing summary opinions.
- Students will incorporate language from the U.S. Constitution or court briefs to justify a legal decision when interpreting state or national law.

### SS.912.CG.3.15:
- Explain how citizens are affected by the local, state and national governments.
  - Students will identify local government officials and employees who affect the daily lives of citizens.
  - Students will identify the role of state governmental officials and employees who affect the daily lives of citizens.
  - Students will identify the role of national governmental officials and employees who affect the daily lives of citizens.
  - Students will explain how government at all levels impacts the daily lives of citizens.

### SS.912.CG.4.1:
- Analyze how liberty and economic freedom generate broad-based opportunity and prosperity in the United States.
  - Students will differentiate between government systems (e.g., autocracy, democracy, monarchy, oligarchy, republic, theocracy).
  - Students will differentiate between economic systems (e.g., capitalism, communism, mixed market, socialism).
  - Students will analyze the disadvantages of authoritarian control over the economy (e.g., communism and socialism) in generating broad-based economic prosperity for their population.

### SS.912.CG.4.2:
- Explain how the United States uses foreign policy to influence other nations.
  - Students will explain how the policies of other nations influence U.S. policy and society.
  - Students will identify agencies of the U.S. government that contribute to its foreign policy agenda (e.g., National Security Agency, Central Intelligence Agency).
  - Students will explain the advantages and disadvantages of how nongovernmental organizations (NGOs) influence foreign policy (e.g., United States Agency for International Development, Red Cross, American Woman Suffrage Association, Amnesty International).
  - Students will explain how U.S. trade policy influences its relationships with other nations (e.g., China, Saudi Arabia).
  - Students will explain how the use of embargos and economic sanctions by the United States has affected other nations (e.g., Cuba, Iran, Syria).
  - Students will explain the U.S. response to international conflicts.

### SS.912.CG.4.3:
- Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.
  - Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.

### SS.912.CG.4.4:
- Identify indicators of democratization in foreign countries.
  - Students will recognize indicators of democratization as a system of free and fair elections, active civic participation, the protection of human rights, and the rule of law.

### SS.912.G.4.1:
- Interpret population growth and other demographic data for any given place.

### SS.912.G.5.5:
- Use geographic terms and tools to analyze case studies of policies and programs for resource use and management.

### SS.912.W.1.1:
- Use timelines to establish cause and effect relationships of historical events.

### SS.912.W.1.3:
- Clarifications:
  - Examples are artifacts, images, auditory and written sources.

### SS.912.W.1.4:
- Clarifications:
  - Examples are archaeology, economics, geography, forensic chemistry, political science, physics.

### SS.912.W.1.6:
- Clarifications:
  - Examples are ethnic, cultural, personal, national, religious.

### MA.K12.MTR.1.1:
- Clarifications:
  - Teachers who encourage students to participate actively in effortful learning both individually and with others:
    - Analyze the problem in a way that makes sense given the task.
    - Ask questions that will help with solving the task.
    - Build perseverance by modifying methods as needed while solving a challenging task.
    - Stay engaged and maintain a positive mindset when working to solve tasks.
    - Help and support each other when attempting a new method or approach.

### MA.K12.MTR.2.1:
- Clarifications:
  - Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
    - Help students make connections between concepts and representations.
    - Provide opportunities for students to use manipulatives when investigating concepts.
    - Guide students from concrete to pictorial to abstract representations as understanding progresses.
    - Show students that various representations can have different purposes and can be useful in different situations.

### Complete tasks with mathematical fluency:
- Mathematicians who complete tasks with mathematical fluency:
| MA.K12.MTR.3.1: | Select efficient and appropriate methods for solving problems within the given context.  
|              | Maintain flexibility and accuracy while performing procedures and mental calculations.  
|              | Complete tasks accurately and with confidence.  
|              | Adapt procedures to apply them to a new context.  
|              | Use feedback to improve efficiency when performing calculations.  

**Clarifications:**  
Teachers who encourage students to complete tasks with mathematical fluency:  
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.  
- Offer multiple opportunities for students to practice efficient and generalizable methods.  
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

| MA.K12.MTR.4.1: | Engage in discussions that reflect on the mathematical thinking of self and others.  
|                | Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:  
|                | Communicate mathematical ideas, vocabulary and methods effectively.  
|                | Analyze the mathematical thinking of others.  
|                | Compare the efficiency of a method to those expressed by others.  
|                | Recognize errors and suggest how to correctly solve the task.  
|                | Justify results by explaining methods and processes.  
|                | Construct possible arguments based on evidence.  

**Clarifications:**  
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:  
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.  
- Create opportunities for students to discuss their thinking with peers.  
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.  
- Develop students’ ability to justify methods and compare their responses to the responses of their peers.

| MA.K12.MTR.5.1: | Use patterns and structure to help understand and connect mathematical concepts.  
|                | Mathematicians who use patterns and structure to help understand and connect mathematical concepts:  
|                | Focus on relevant details within a problem.  
|                | Create plans and procedures to logically order events, steps or ideas to solve problems.  
|                | Decompose a complex problem into manageable parts.  
|                | Relate previously learned concepts to new concepts.  
|                | Look for similarities among problems.  
|                | Connect solutions of problems to more complicated large-scale situations.  

**Clarifications:**  
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:  
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.  
- Support students to develop generalizations based on the similarities found among problems.  
- Provide opportunities for students to create plans and procedures to solve problems.  
- Develop students’ ability to construct relationships between their current understanding and more sophisticated ways of thinking.

|                | Mathematicians who assess the reasonableness of solutions:  
|                | Estimate to discover possible solutions.  
|                | Use benchmark quantities to determine if a solution makes sense.  
|                | Check calculations when solving problems.  
|                | Verify possible solutions by explaining the methods used.  
|                | Evaluate results based on the given context.  

**Clarifications:**  
Teachers who encourage students to assess the reasonableness of solutions:  
- Have students estimate or predict solutions prior to solving.  
- Prompt students to continually ask, “Does this solution make sense? How do you know?”  
- Reinforce that students check their work as they progress within and after a task.  
- Strengthen students’ ability to verify solutions through justifications.

| MA.K12.MTR.7.1: | Apply mathematics to real-world contexts.  
|                | Mathematicians who apply mathematics to real-world contexts:  
|                | Connect mathematical concepts to everyday experiences.  
|                | Use models and methods to understand, represent and solve problems.  
|                | Perform investigations to gather data or determine if a method is appropriate.  
|                | Redesign models and methods to improve accuracy or efficiency.  

**Clarifications:**  
Teachers who encourage students to apply mathematics to real-world contexts:  
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.  
- Challenge students to question the accuracy of their models and methods.  
- Support students as they validate conclusions by comparing them to the given situation.  
- Indicate how various concepts can be applied to other disciplines.

| MA.K12.MTR.8.1: | Cite evidence to explain and justify reasoning.  

**Clarifications:**
ELA.K12.EE.1.1: Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

ELA.K12.EE.2.1: Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

ELA.K12.EE.3.1: Students continue with previous skills and use a style guide to create a proper citation.

ELA.K12.EE.4.1: Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.5.1: Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

ELA.K12.EE.6.1: Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

ELA.K12.EE.7.1: Students continue with previous skills and use a style guide to create a proper citation.

ELA.K12.EE.8.1: Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELD.K12.ELL.SI.1: English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SS.1: English language learners communicate information, ideas, and concepts necessary for academic success in the content area of Social Studies.

HE.912.C.2.4: Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

ELD.K12.ELL.SI.1: Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

ELD.K12.ELL.SS.1: Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

GENERAL COURSE INFORMATION AND NOTES

VERSION DESCRIPTION

Civic education is essential in the development of informed citizenry who are equipped to participate in civic life and preserve a government of the people, by the people, and for the people. The Civics and Government (CG) standards in this class were revised in 2021 as a result of the House Bill (2019) civics standards review and reflect the following priorities for K-12 Civics and Government teaching and learning in Florida schools.

- Students study primary source documents to understand the philosophical underpinnings of the American Republic and the root cause of American exceptionalism.
- Students compare the success of the United States and the success or failure of other nations' governing philosophies to evaluate their past, present, and likely future effects.
- Students have a sense of civic pride and participate regularly in all levels of government.
- Students reflect upon United States civic history, so they understand their rights and responsibilities as citizens, including the process of advocating properly with government officials.

This course must include a comparative discussion of political ideologies, such as communism and totalitarianism, that conflict with the principles of freedom and democracy essential to the founding principles of the United States.

GENERAL NOTES

The American Political System: Process and Power Honors – The grade 9-12 The American Political System: Process and Power Honors course consists of the following content area strands: American History, Geography, Civics and Government. The primary content for the course pertains to the study of the political system in America and the dynamics of political issues. Content should include, but is not limited to, the nature of political behavior, power acquisition, maintenance, and extension, classical and modern political theorists, comparison of political systems, evolution of democratic political systems, functions of the three branches of government at the local, state and
national levels, Florida government, including the Florida Constitution, municipal and county government, constitutional framework, federalism, and separation of power, including study of the Declaration of Independence, the U.S. Constitution, and the Federalist Papers, evolving political parties and interest groups in determining government policy, political decision-making process, the role of women and diverse cultural groups in the development of our political system, and career opportunities available in the government system.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes: Students earning credit in this course may not earn credit in American Government (2106310), American Government Honors (2106320), or The American Political System: Process and Power (2106450). Additional content that may be included in the Grade 12 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- United States, major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at: http://www.nagb.org/publications/frameworks/civicsframework.pdf

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

<tbody>
<tr>
<td>SS.912.A.1.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.1.2:</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</td>
</tr>
<tr>
<td>SS.912.A.1.3:</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.1.4:</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</td>
</tr>
<tr>
<td>SS.912.A.1.5:</td>
<td>Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: <a href="http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf">http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf</a></td>
</tr>
<tr>
<td>SS.912.A.1.6:</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.A.1.7:</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td>SS.912.A.2.4:</td>
<td>Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection.</td>
</tr>
<tr>
<td>SS.912.A.2.5:</td>
<td>Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.C.1.1:</td>
<td>Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.1.2:</td>
<td>Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.1.3:</td>
<td>Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.</td>
</tr>
<tr>
<td>SS.912.C.1.4:</td>
<td>Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights.</td>
</tr>
<tr>
<td>SS.912.C.1.5:</td>
<td>Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.</td>
</tr>
<tr>
<td>SS.912.C.2.1:</td>
<td>Evaluate the constitutional provisions establishing citizenship, and assess the criteria among citizens by birth, naturalized citizens, and non-citizens.</td>
</tr>
<tr>
<td>SS.912.C.2.4:</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.6:</td>
<td>Evaluate, take, and defend positions about rights protected by the Constitution and Bill of Rights.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Explain why rights have limits and are not absolute.</td>
</tr>
<tr>
<td>SS.912.C.2.7:</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are e-mail campaigns, boycotts, blogs, podcasts, protests, demonstrations, letters to editors.</td>
</tr>
<tr>
<td>SS.912.C.2.8:</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are Preamble, Declaration of Independence, Constitution, Emancipation Proclamation, 13th, 14th, 15th, 19th, 24th, and 26th Amendments, Voting Rights Act of 1965.</td>
</tr>
<tr>
<td>SS.912.C.2.9:</td>
<td>Monitor current public issues in Florida.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.</td>
</tr>
<tr>
<td>SS.912.C.2.11:</td>
<td>Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.</td>
</tr>
<tr>
<td><strong>Clarifications:</strong></td>
<td>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.</td>
</tr>
<tr>
<td>SS.912.C.2.13:</td>
<td>Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media.</td>
</tr>
</tbody>
</table>
LA.FS.910.SL.1.1: a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.
b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.
c. Propose conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.
d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

LA.FS.910.SL.1.2: Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.

LA.FS.910.SL.1.3: Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.

LA.FS.910.SL.2.4: Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.

LA.FS.910.WHST.1.1: Write arguments focused on discipline-specific content.

a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaim(s), reasons, and evidence.
b. Develop claim(s) and counterclaim(s) fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaim(s) in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns.
c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaim(s).
d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.
e. Provide a concluding statement or section that follows from or supports the argument presented.

LA.FS.910.WHST.1.2: Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes.

a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.
b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.
c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts.
d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers.
e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.
f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).

LA.FS.910.WHST.2.4: Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

LA.FS.910.WHST.2.5: Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

LA.FS.910.WHST.2.6: Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.

LA.FS.910.WHST.3.7: Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

LA.FS.910.WHST.3.8: Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.

LA.FS.910.WHST.3.9: Draw evidence from informational texts to support analysis, reflection, and research.

LA.FS.910.WHST.4.10: Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

MA.FS.912.S-ID.1.1: Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★

Standard Relation to Course: Supporting

MA.FS.912.S-ID.1.2: Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling; ★

Standard Relation to Course: Supporting

MA.FS.912.S-ID.1.3: Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★

Standard Relation to Course: Supporting

MA.FS.912.S-ID.1.4: Evaluate reports based on data. ★

Standard Relation to Course: Supporting

MA.FS.912.S-ID.1.1: Represent data with plots on the real number line (dot plots, histograms, and box plots). ★

Clariﬁcations:
In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

Standard Relation to Course: Supporting

MA.FS.912.S-ID.1.2: Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★

Clariﬁcations:
In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

Standard Relation to Course: Supporting
Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers).

**Clarifications:**
In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

**Standard Relation to Course: Supporting**

MAFS.912.S-ID.1.3: Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve.

**Standard Relation to Course: Supporting**

MAFS.912.S-ID.1.4: Make sense of problems and persevere in solving them.
Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

MAFS.K12.MP.1.1: Construct viable arguments and critique the reasoning of others.
Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

MAFS.K12.MP.3.1: Use appropriate tools strategically.
Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

MAFS.K12.MP.5.1: Attend to precision.
Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

MAFS.K12.MP.6.1: General Course Information and Notes

**GENERAL NOTES**

**Constitutional Law** – The grade 9-12 Constitutional Law course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content for the course pertains to the study of major legal precedents and evolving judicial interpretations associated with the United States Constitution. Content should include, but is not limited to, the evaluation of historical and contemporary constitutional dilemmas through an analysis of legal documents, processes and cases; an examination of the evolution of constitutional government from ancient times to the present; a historical review of the British legal system and its role as a framework for the U.S. Constitution; the arguments in support of our republican form of government, as they are embodied in the the Federalist Papers; an examination of the constitution of the state of Florida, its current amendment process, and recent amendments approved by Florida voters; a comparison between the constitutional frameworks of other nations with that of the United States; a review and application of major Supreme Court decisions and the impact of both majority and minority opinions; the understanding of constitutional concepts and provisions establishing the power of the courts including separation of powers, checks and balances, the rule of law, an independent judiciary, and judicial review; and appellate processes and procedures to address constitutional questions.
This course will incorporate the development of a written appellate brief addressing a contemporary constitutional question and the presentation of oral arguments to defend their position legally. This course is designed to provide an in-depth study of this topic to students who are interested in pursuing post secondary careers in law, law enforcement, governmental service, or a law related field.

**Honors and Advanced Level Course Note:** Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

**Mathematics Benchmark Guidance - Social Studies** instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Literacy Standards in Social Studies**

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SS.912.A.1:</td>
<td>Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.</td>
</tr>
<tr>
<td>SS.912.A.2:</td>
<td>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. <strong>Clarifications:</strong> Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</td>
</tr>
<tr>
<td>SS.912.A.3:</td>
<td>Utilize timelines to identify the time sequence of historical data.</td>
</tr>
<tr>
<td>SS.912.A.4:</td>
<td>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past. <strong>Clarifications:</strong> Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</td>
</tr>
<tr>
<td>SS.912.A.5:</td>
<td>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal. <strong>Clarifications:</strong> Speeches, search and seizure, religion, gun possession.</td>
</tr>
<tr>
<td>SS.912.A.6:</td>
<td>Use case studies to explore social, political, legal, and economic relationships in history.</td>
</tr>
<tr>
<td>SS.912.A.7:</td>
<td>Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.</td>
</tr>
<tr>
<td>SS.912.A.2.4:</td>
<td>Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. <strong>Clarifications:</strong> Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection.</td>
</tr>
<tr>
<td>SS.912.A.2.5:</td>
<td>Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. <strong>Clarifications:</strong> This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</td>
</tr>
<tr>
<td>SS.912.C.1.1:</td>
<td>Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government.</td>
</tr>
<tr>
<td>SS.912.C.1.2:</td>
<td>Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights.</td>
</tr>
<tr>
<td>SS.912.C.1.3:</td>
<td>Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.</td>
</tr>
<tr>
<td>SS.912.C.1.4:</td>
<td>Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights.</td>
</tr>
<tr>
<td>SS.912.C.1.5:</td>
<td>Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.</td>
</tr>
<tr>
<td>SS.912.C.2.1:</td>
<td>Evaluate the constitutional provisions establishing citizenship, and assess the criteria among citizens by birth, naturalized citizens, and non-citizens.</td>
</tr>
<tr>
<td>SS.912.C.2.4:</td>
<td>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</td>
</tr>
<tr>
<td>SS.912.C.2.6:</td>
<td>Evaluate, take, and defend positions about rights protected by the Constitution and Bill of Rights. <strong>Clarifications:</strong> Examples are speech, search and seizure, religion, gun possession.</td>
</tr>
<tr>
<td>SS.912.C.2.7:</td>
<td>Analyze the impact of citizen participation as a means of achieving political and social change. <strong>Clarifications:</strong> Examples are e-mail campaigns, boycotts, blogs, podcasts, protests, demonstrations, letters to editors.</td>
</tr>
<tr>
<td>SS.912.C.2.9:</td>
<td>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents. <strong>Clarifications:</strong> Examples are Preamble, Declaration of Independence, Constitution, Emancipation Proclamation, 13th, 14th, 15th, 19th, 24th, and 26th Amendments, Voting Rights Act of 1965.</td>
</tr>
<tr>
<td>SS.912.C.2.10:</td>
<td>Monitor current public issues in Florida. <strong>Clarifications:</strong> Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.</td>
</tr>
<tr>
<td>SS.912.C.2.11:</td>
<td>Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.</td>
</tr>
<tr>
<td>SS.912.C.2.13:</td>
<td>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal. <strong>Clarifications:</strong> Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media.</td>
</tr>
</tbody>
</table>
SS.912.C.3.1: Examine the constitutional principles of representative government, limited government, consent of the governed, rule of law, and individual rights.

SS.912.C.3.2: Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.

SS.912.C.3.3: Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.

SS.912.C.3.4: Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.

SS.912.C.3.5: Clarifications:
Examples are Federal Reserve, Food and Drug Administration, Federal Communications Commission.

SS.912.C.3.6: Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.

SS.912.C.3.7: Describe the role of judicial review in American constitutional government.

SS.912.C.3.8: Clarifications:
Examples are decisions based on the law vs. will of the majority.

SS.912.C.3.9: Analyze the various levels and responsibilities of courts in the federal and state judicial system and the relationships among them.

SS.912.C.3.10: Clarifications:

SS.912.C.3.11: Contrast how the Constitution safeguards and limits individual rights.

SS.912.C.3.12: Simulate the judicial decision-making process in interpreting law at the state and federal level.

SS.912.C.3.14: Examine constitutional powers (expressed, implied, concurrent, reserved).

SS.912.C.3.15: Examine how power and responsibility are distributed, shared, and limited by the Constitution.

SS.912.E.2.2: Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.

SS.912.G.1.2: Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

SS.912.G.1.4: Clarifications:
Examples are thematic, contour, and dot-density.

SS.912.G.4.1: Interpret population growth and other demographic data for any given place.

SS.912.H.1.6: Analyze how current events are explained by artistic and cultural trends of the past.

SS.912.W.1.1: Use timelines to establish cause and effect relationships of historical events.

SS.912.W.1.2: Clarifications:
Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.

SS.912.W.1.3: Clarifications:
Examples are artifacts, images, auditory and written sources.

SS.912.W.1.4: Clarifications:
Examples are archaeology, economics, geography, forensic chemistry, political science, physics.

SS.912.W.1.6: Clarifications:
Examples are ethnic, cultural, personal, national, religious.

SS.912.W.2.18: Clarifications:
Examples are Magna Carta, parliament, habeas corpus.

SS.912.W.5.4: Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.

Mathematicians who participate in effortful learning both individually and with others:
- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

MA.K12.MTR.1.1:

Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:
- Build understanding through modeling and using manipulatives.
### MA.K12.MTR.2.1
Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

#### Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

### MA.K12.MTR.3.1
Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:
- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

#### Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

### MA.K12.MTR.4.1
Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

#### Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

### MA.K12.MTR.5.1
Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:
- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

#### Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

### MA.K12.MTR.6.1
Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:
- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

#### Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:
- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

### MA.K12.MTR.6.2
Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:
### MA.K12.MTR.7.1:
- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

**Clarifications:**
Teachers who encourage students to apply mathematics to real-world contexts:
- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

**Cite evidence to explain and justify reasoning.**

- K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
- 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
- 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
- 6-8 Students continue with previous skills and use a style guide to create a proper citation.
- 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

### ELA.K12.EE.1.1:
Read and comprehend grade-level complex texts proficiently.

**Clarifications:**
See Text Complexity for grade-level complexity bands and a text complexity rubric.

### ELA.K12.EE.2.1:
Make inferences to support comprehension.

**Clarifications:**

### ELA.K12.EE.3.1:
Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

**Clarifications:**

### ELA.K12.EE.4.1:
Use the accepted rules governing a specific format to create quality work.

**Clarifications:**

### ELA.K12.EE.5.1:
Use appropriate voice and tone when speaking or writing.

**Clarifications:**

### ELA.K12.EE.6.1:
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

**Clarifications:**

### ELD.K12.ELL.SL.1:
English language learners communicate for social and instructional purposes within the school setting.

### ELD.K12.ELL.SS.1:
English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

### HE.912.C.2.4:
Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

**Clarifications:**
- Sea-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

---

**General Course Information and Notes**

**GENERAL NOTES**

**Constitutional Law** – The grade 9-12 Constitutional Law course consists of the following content area strands: American History, World History, Geography, Humanities, Economics, and Civics and Government. The primary content for the course pertains to the study of major legal precedents and evolving judicial interpretations associated with the United States Constitution. Content should include, but is not limited to, the evaluation of historical and contemporary constitutional dilemmas through an analysis of legal documents, processes and cases; an examination of the evolution of constitutional government from ancient times to the present; a historical review of the British legal system and its role as a framework for the U.S. Constitution; the arguments in support of our republican form of government, as they are embodied in the the Federalist Papers; an examination of the constitution of the state of Florida, its current amendment process, and recent amendments approved by Florida voters; a comparison between the constitutional frameworks of other nations with that of the United States; a review and application of major Supreme Court decisions and the impact of both majority and minority opinions; the understanding of constitutional concepts and provisions establishing the power of the courts including separation of power.
powers, checks and balances, the rule of law, an independent judiciary, and judicial review; and appellate processes and procedures to address constitutional questions.

This course will incorporate the development of a written appellate brief addressing a contemporary constitutional question and the presentation of oral arguments to defend their position legally. This course is designed to provide an in-depth study of this topic to students who are interested in pursuing post secondary careers in law, law enforcement, governmental service, or a law related field.

**Honors and Advanced Level Course Note:** Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

**Instructional Practices**

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

**Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

**English Language Development ELD Standards Special Notes Section:**

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf

**GENERAL INFORMATION**

**Course Number:** 2106468  
**Course Path:** Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: Political Sciences >  
**Abbreviated Title:** CONST LAW HON  
**Number of Credits:** One (1) credit  
**Course Type:** Elective Course  
**Course Status:** State Board Approved  
**Grade Level(s):** 9,10,11,12

**Educator Certifications**

<tr>
<td>SS.912.CG.1.2:</td>
<td>Explain the influence of Enlightenment ideas on the Declaration of Independence.</td>
</tr>
<tr>
<td>- Students will identify...</td>
<td>- Students will identify grievances listed in the Declaration of Independence in terms of due process of law, individual rights, natural rights, popular sovereignty and social contract.</td>
</tr>
<tr>
<td>- Students will explain...</td>
<td>- Students will explain national sovereignty, natural law, self-evident truth, equality of all persons, due process of law, limited government, popular sovereignty, and unalienable rights of life, liberty and property as they relate to Enlightenment ideas in the Declaration of Independence.</td>
</tr>
<tr>
<td>- Students will recognize...</td>
<td>- Students will recognize that national sovereignty, due process of law, natural law, self-evident truth, equality of all persons, limited government, popular sovereignty, and unalienable rights of life, liberty and property form the philosophical foundation of our government.</td>
</tr>
<tr>
<td>SS.912.CG.1.3:</td>
<td>Explain arguments presented in the Federalist Papers in support of ratifying the U.S. Constitution and a republican form of government.</td>
</tr>
<tr>
<td>- Students will recognize...</td>
<td>- Students will recognize that the Federalist Papers argued for a federal system of government, separation of powers and a representative form of government that is accountable to its citizens.</td>
</tr>
<tr>
<td>- Students will analyze...</td>
<td>- Students will analyze Federalist and Anti-Federalist arguments concerning ratification of the U.S. Constitution and inclusion of a bill of rights.</td>
</tr>
<tr>
<td>SS.912.CG.1.4:</td>
<td>Analyze how the ideals and principles expressed in the founding documents shape America as a constitutional republic.</td>
</tr>
<tr>
<td>- Students will differentiate...</td>
<td>- Students will differentiate among the documents and determine how each one was individually significant to the founding of the United States.</td>
</tr>
<tr>
<td>- Students will evaluate...</td>
<td>- Students will evaluate how the documents are connected to one another.</td>
</tr>
<tr>
<td>- Documents include, but are not limited to, the Declaration of Independence, Articles of Confederation, Federalist Papers (e.g., No. 10. No. 14, No. 31, No. 39, No. 51) and the U.S. Constitution.</td>
<td>- Documents include, but are not limited to, the Declaration of Independence, Articles of Confederation, Federalist Papers (e.g., No. 10. No. 14, No. 31, No. 39, No. 51) and the U.S. Constitution.</td>
</tr>
<tr>
<td>- Students will identify key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason).</td>
<td>- Students will identify key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason).</td>
</tr>
<tr>
<td>SS.912.CG.1.5:</td>
<td>Explain how the U.S. Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers.</td>
</tr>
<tr>
<td>- Students will explain...</td>
<td>- Students will explain how the structure and function of the U.S. government reflects these political principles.</td>
</tr>
<tr>
<td>- Students will differentiate...</td>
<td>- Students will differentiate between republicanism and democracy, and discuss how the United States reflects both.</td>
</tr>
<tr>
<td>- Students will describe...</td>
<td>- Students will describe compromises made during the Constitutional Convention (e.g., the Great Compromise, the Three-Fifths Compromise, the Electoral College).</td>
</tr>
<tr>
<td>SS.912.CG.2.1:</td>
<td>Explain the constitutional provisions that establish and affect citizenship.</td>
</tr>
<tr>
<td>- Students will explain...</td>
<td>- Students will explain how the concept of citizenship in the United States has changed over the course of history (i.e., 13th, 14th, 15th and 19th Amendments).</td>
</tr>
<tr>
<td>- Students will compare...</td>
<td>- Students will compare birthright citizenship, permanent residency and naturalization in the United States.</td>
</tr>
<tr>
<td>- Students will differentiate...</td>
<td>- Students will differentiate the rights held by native-born citizens, permanent residents and naturalized citizens (e.g., running for public office).</td>
</tr>
</tbody>
</table>

Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the
SS.912.CG.2.4:
Analyze contemporary and historical examples of government-imposed restrictions on rights.
- Students will examine situations when individuals’ rights have been restricted for the public good (e.g., limits on speech or rationing of goods during wartime, enactment of the Patriot Act).
- Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good.
- Students will explain different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response).

SS.912.CG.2.5:
Analyze the structures, functions and processes of the judicial branch as described in Article III of the U.S. Constitution.
- Students will explain how reserved powers define issues as matters for the people or the state governments.
- Students will describe examples of concurrent powers as those powers shared by the state and national governments regarding these public issues.
- Students will objectively discuss current public issues in Florida and use both the U.S. and Florida Constitutions to justify pro and con positions.
- Students will analyze the role of the "general welfare clause" and "necessary and proper clause" in granting Congress implied powers.
- Students will analyze the role of the executive branch in terms of its relationship with the judicial and executive branch of the government.
- Students will objectively discuss current public issues in Florida and use both the U.S. and Florida Constitutions to justify pro and con positions.
- Students will discuss the impeachment process.
- Students will analyze how the Supreme Court in further defining the safeguards and limits of constitutional rights.

SS.912.CG.3.1:
Analyze how the principles contained in foundational documents contributed to the expansion of civil rights and liberties over time.
- Students will analyze the role of the legislative branch in terms of its relationship with the judicial and executive branch of the government.
- Students will describe how independent regulatory agencies interact with the three branches of government and with citizens.
- Students will identify independent regulatory agencies (e.g., Federal Communications Commission, Federal Election Commission, National Labor Relations Board) and explain their purpose and effect.
- Students will explain how reserved powers define issues as matters for the people or the state governments.
- Students will identify legal methods that citizens can use to promote social and political change through civic engagement (e.g., the Abolitionist Movement).
- Students will identify historical examples of citizens achieving or preventing political and social change through civic engagement (e.g., the Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault).

SS.912.CG.3.2:
Evaluate political communication for bias, factual accuracy, omission and emotional appeal.
- Students will examine the rationale for government-imposed restrictions on rights (e.g., inciting a crime, campaign contributions, defamation, military secrets).
- Students will compare the reporting on the same political event or issue from multiple perspectives.
- Students will identify various forms of propaganda (e.g., plain folks, glittering generalities, testimonial, fear, logical fallacies).
- Students will analyze the role of the executive branch in terms of its relationship with the judicial and executive branch of the government.
- Students will identify historical examples of citizens achieving or preventing political and social change through civic engagement (e.g., the Abolitionist Movement).
- Students will examine the role of the Supreme Court in further defining the safeguards and limits of constitutional rights.

SS.912.CG.3.3:
Analyze the impact of civic engagement as a means of preserving or reforming institutions.
- Students will analyze the structures, functions and processes of the legislative branch as described in Article I of the U.S. Constitution.
- Students will identify the “enumerated powers” delegated to Congress by the U.S. Constitution and the role of the Supreme Court in defining powers.
- Students will identify the individual rights protected by the U.S. Constitution, including the Bill of Rights and other constitutional amendments.
- Students will analyze how the U.S. Constitution safeguards and limits individual rights.
