

# Career and Professional Education Act Enrollment and Performance Report, 2012-13

Florida Department of Education  
Division of Career and Adult Education  
Rod Duckworth, Chancellor

December 2013

## ***At a Glance***

In academic year 2012-13, the sixth year of implementation of the Florida Career and Professional Education (CAPE) Act, school districts registered 1,729 high school and 186 middle school career and professional academies, representing 66 of Florida's school districts as well as the Florida State University Laboratory School. In addition, the Career and Professional Education Act was amended to include career-themed courses. School districts registered 1,635 career-themed courses, representing all 67 of Florida's school districts, as well as the Florida Virtual School and Florida State University Laboratory School. This study found the following regarding enrollment patterns and student performance.

- The most frequent career cluster represented by academies was Information Technology with 346 registered high school and middle school academies followed by Health Sciences with 226 academies.
- High school CAPE participants were most likely to be ninth-graders and middle school CAPE participants were most likely to be eighth graders.
- The distribution of students by race and gender among CAPE Participants was similar to that of non-academy students.
- In the 2012-13 school year, 45,277 CAPE participants earned 50,576 certifications with a pass rate of 78.8 percent.
- Middle school and high school CAPE participants had higher average GPAs than their non-CAPE counterparts.
- Middle school and high school CAPE participants were less likely to have been chronically absent than their non-CAPE counterparts.
- There was no clear pattern indicating that CAPE participants were more or less likely to have been subjected to disciplinary action than non-CAPE students.
- High school CAPE participants were less likely to have dropped out of school than non-CAPE students.
- High school academy students were more likely to take Advanced Placement or dual enrollment courses than their non-academy counterparts.
- Academy participation and the earning of industry certifications are correlated with higher student performance among high school students.
- Industry certification earner graduates outperformed the overall average high school population with a higher placement rate in employment or postsecondary education.
- Over the course of three years, the 2009-10 graduate cohort of industry certification earners showed higher earnings than the average high school graduate.

## ***Introduction***

According to Section 1003.492(3), Florida Statutes (F.S.), the Florida Department of Education (FDOE) shall conduct an annual analysis of student participation and performance in industry certified secondary career and technical programs authorized by the Career and Professional Education Act. Performance indicators for students enrolled in career and professional academies (also referred to as *CAPE academies* or simply *academies* in this report) and students enrolled in career-themed courses include, but are not limited to, graduation rates, retention rates, Florida

Bright Futures Scholarship awards, additional educational attainment, employment records, earnings, industry certification and employer satisfaction. The results of this study shall be submitted to the president of the Senate and the speaker of the House of Representatives annually by December 31.

## ***Background***

In 2007 the Florida Legislature passed the Career and Professional Education Act. The purpose of the act was to provide a statewide planning partnership between the business and education communities in order to attract, expand and retain targeted, high-value industry and to sustain a strong, knowledge-based economy. The objectives of the act are as follows:

- To improve middle and high school academic performance by providing rigorous and relevant curriculum opportunities;
- To provide rigorous and relevant career-themed courses that articulate to postsecondary-level coursework and lead to industry certification;
- To support local and regional economic development;
- To respond to Florida's critical workforce needs; and
- To provide state residents with access to high-wage and high-demand careers.

To implement the legislation, the act created statewide partnerships among the Florida Department of Education (FDOE), the Florida Department of Economic Opportunity (DEO), and Workforce Florida, Inc. (WFI). S. 1003.491(2), F.S., requires that each district school board develop a three-year strategic plan to address and meet local and regional workforce demands. This plan must be developed in collaboration with a district's local workforce board and local postsecondary institutions. A required element in this plan was the provision for at least one operational career and professional academy per school district, pursuant to s. 1003.492(2), F.S., by the beginning of the 2008-09 school year. Beginning with the 2012-13 school year, the academy requirement was replaced with a requirement that each school district shall offer at least two career-themed courses.

### Career and Professional Academies and Career-themed Courses

A career and professional academy is a research-based program that integrates a rigorous academic curriculum with an industry-specific curriculum aligned directly to priority workforce needs established by regional workforce boards or the Florida Department of Economic Opportunity.

A career-themed course is a course or a course in a series of courses, that leads to an industry certification on the Industry Certification Funding List. They are designed to have an industry specific curriculum aligned to priority workforce needs established by regional workforce boards or the Florida Department of Economic Opportunity.

According to s. 1003.493(4), F.S., each career and professional academy and secondary school providing a career-themed course must:

- 1) Provide a rigorous standards-based academic curriculum integrated with a career curriculum;
- 2) Include one or more partnerships with postsecondary institutions, businesses, industry, employers, economic development organizations or other appropriate partners from the local community;
- 3) Promote and provide opportunities for students to earn, at a minimum, the Florida Gold Seal Vocational Scholars award pursuant to s. 1009.536, F.S.;
- 4) Provide instruction in careers designated as high skill, high wage, and high demand by the regional workforce development board, the chamber of commerce, economic development agencies or the Florida Department of Economic Opportunity;
- 5) Deliver instruction relevant to the applicable career, including intensive reading and mathematics intervention;
- 6) Offer applied courses that combine academic content with technical skills; and
- 7) Provide instruction resulting in competency, certification or credentials in workplace skills.

Districts are required to annually register with the FDOE career and professional academies and career-themed courses that meet the requirements of s. 1003.493, F.S., during registration windows. Superintendents certify that each registered academy and career-themed course meets all of the requirements in statute.<sup>1</sup>

### Industry Certifications

A key component of this act is a focus on industry certifications that are critical to Florida's employers. The legislation tasked the DEO with defining "Industry Certification." The department's definition was the following:

*"A voluntary process, through which individuals are assessed by an independent, third-party certifying entity using predetermined standards for knowledge, skills and competencies, resulting in the award of a time-limited credential that is nationally recognized and applicable to an occupation that is included in the workforce system's targeted occupation list or determined to be an occupation that is critical, emerging or addresses a local need."*

The act required that FDOE "develop and adopt rules for implementing an industry certification process" as an essential element of implementing the new law. The process described in Rule 6A-6.0573, Florida Administrative Code, has two stages. In the first stage, Workforce Florida, Inc. (WFI) produces an annually updated list of industry certifications that ensure skill proficiency, address emerging labor market and industry needs, and are based on the highest available national standards. This list is reviewed and approved by the WFI board and must be annually published according to the requirements of s. 1003.492(2), F.S. This list is known as the "Comprehensive Industry Certification List" and is published annually on March 1.

---

<sup>1</sup> 6A-6.0573 (9), Florida Administrative Code

From this comprehensive list, the Florida Department of Education develops the Industry Certification Funding List in the second stage of the process. This list is a subset of items on the Comprehensive Industry Certification List, based on the following criteria.

- 1) The certification must be achievable by a secondary student.
- 2) The certification must require a minimum of 150 hours of instruction.
- 3) The certification must have been offered for at least one year in a school district. The commissioner of education may waive the one-year requirement when failure to do so would inhibit preparation of students for emerging workforce opportunities.

The 2012 Florida Legislature amended the Career and Professional Education Act to include a list of industry certifications in science, technology, engineering and mathematics appropriate for middle school students.<sup>2</sup> Certifications on this list would be eligible for the add-on Florida Education Finance Program (FEFP) calculation and would be worth a weight of 0.1. The Florida Department of Education developed a Middle School STEM Industry Certification List using the administrative process and the following criteria identified in Rule 6A-6.0573.<sup>3</sup>

- 1) Be achievable by students enrolled in sixth grade, seventh grade or eighth grade.
- 2) Require a minimum of 75 hours of instruction.
- 3) Demonstrate skills for progression in a STEM career pathway or demonstrates introductory skills that prepare for a certification designated as STEM on the “2012-2013 Industry Certification Funding List.”
- 4) Be a proctored examination that is assessed by an independent, third party certifying entity using predetermined standards for knowledge, skills and competencies.
- 5) Not be a certification on the “2012-13 Industry Certification Funding List.”

Note: The 2013 Florida Legislature amended the law to remove the language on middle school STEM certifications and they were subsequently removed from the Rule.

### Funding Incentives

For each student enrolled in a registered career and professional academy or a registered career-themed course who earns a certification on the “Industry Certification Funding List,” the district of instruction may earn add-on full-time equivalent (FTE) student membership for the following year’s funding calculation in the FEFP.<sup>4</sup> Certifications earned through dual enrollment are not eligible for additional FTE. Prior to the 2012-13 school year, students were required to graduate with a high school diploma to be eligible for the add-on funding. The maximum additional FTE is capped at 0.3 per high school student. Add-on FEFP generated for certifications earned by students in grades 6-8 is not counted towards the 0.3 cap.

For certification earned prior to July 1, 2011, the eligible funding weight was 0.3. The law was amended in 2011 to require the State Board of Education to adopt annual weights for each industry certification that would yield 0.1, 0.2, or 0.3 add-on FTE. The criteria are based equally

---

<sup>2</sup> Section 1003.4935(4), Florida Statutes

<sup>3</sup> 6A-6.0573 (7), Florida Administrative Code

<sup>4</sup> Section 1011.62(1)(o), Florida Statutes

on rigor and employment value. By rule, rigor is defined as the number of instructional hours, plus work experience hours, with a bonus for certifications with a statewide articulation agreement. Employment value is based on average annual openings, growth rate and entry wage for the primary occupation linked to the certification. These new weights will be implemented for the 2012-13 FEFP calculation. The funding weight for a certification is based on the year in which the certification was earned. The maximum add-on FTE generated for students in grades 9-12 remained 0.3. (Note: The 2013 Florida Legislature amended the weighting process for industry certifications. For certifications earned in 2013-14 and later, the weight is 0.2 for certifications with a Gold Standard Articulation Agreement and 0.1 for all others.)

Data reported for 2011-12 was used for the 2012-13 FEFP calculation. For the 2012-13 FEFP, CAPE participants who graduated in 2011-12 generated 3,376.42 additional FTE in the K-12 funding formula. The estimated value of this FTE in the FEFP calculation is about \$12.1 million.

### Accountability

An accountability mechanism included in the act requires that the three-year strategic plan must be amended to include specific strategies to improve the passage rate, if 50 percent of students taking industry certification exams in a career and professional academy or career-themed course do not pass the exam. The law was amended in 2012, striking requirements related to specific pass rates required to enroll new students in existing courses.

### Middle School Academies and Career-themed Courses

Changes to the law in 2012 required each school district to plan the development of at least one middle school CAPE academy or career-themed course.<sup>5</sup> Middle school academies and career-themed courses must

- 1) Be aligned with at least one high school CAPE academy or career-themed course offered in the district and maintain partnerships with local business and industry and economic development boards;
- 2) Provide instruction in courses leading to careers in occupations designated as high skill, high demand and high wage;
- 3) Integrate content from core subjects;
- 4) Integrate career content with intensive reading and mathematics;
- 5) Maximize opportunities for students to earn high school credit;
- 6) Provide access to virtual instruction courses;
- 7) Provide instruction from teachers certified in the career subject matter;
- 8) Offer externships; and
- 9) Provide personalized student advisement.

---

<sup>5</sup> Section 1003.4935, Florida Statutes

## ***Scope***

With the introduction of career-themed courses, it is possible for a student to only be enrolled in an academy, only enrolled in a career-themed course or to be enrolled in an academy and career-themed course. For the purposes of this report, CAPE participants include all students who met the criteria above. This analysis addresses the following questions.

- 1) How many career and professional academies and career-themed courses are there, and where are they located?
- 2) What are the characteristics of CAPE participants?
- 3) How many and what type of industry certifications have CAPE participants earned?
- 4) How did CAPE participants perform academically compared to other students?
- 5) What were the postsecondary and employment placement outcomes for CAPE participant graduates?

## ***Method***

Data were extracted from the FDOE Student Information System for academic year 2012-13 (Survey 5 as of November 15, 2013).<sup>6</sup> Data on career and professional academy characteristics are from the FDOE academy registration database. Data on schools housing academies and career-themed courses was obtained from the Florida School Indicators Report. Data on employment and postsecondary enrollment were obtained from the Florida Education and Training Placement Information Program (FETPIP).

## ***Findings***

### **Profile of Career and Professional Academies and Career-themed Courses**

In academic year 2012-13, 1,729 high school career and professional academies were registered in Florida, and 1,571 (90.9 percent) of these academies reported student enrollments. In 2012-13, there were 186 registered middle school academies, and 130 (69.9 percent) of these academies reported student enrollments. All but one of Florida's 67 school districts registered at least one career and professional academy with FDOE. The five districts with the most registered academies (high school and middle school) were Hillsborough (374 academies), Miami-Dade (200), Broward (130), Palm Beach (115) and Sarasota (72).

In academic year 2012-13, 1,635 career-themed courses were registered in Florida. And 1,423 (87.0 percent) of these courses had student enrollment reported. All of Florida's 67 school districts registered at least one career-themed course with FDOE. The five districts with the most registered courses were Sarasota (219), Charlotte (147), Brevard (130), Clay (85) and Gadsden (69). Table 1 shows the distribution trend of Florida's registered career and professional academies and career-themed courses and enrollment by school district.

---

<sup>6</sup> Career and professional academy students were identified using the *Career and Professional Academy Identifier* data element (#107775). Career-themed courses were identified using Appendix FF.

### Characteristics of Schools that House Academies

When compared on other indicators, schools with CAPE participation were very similar to those with no CAPE participation. The percentage of students who were economically disadvantaged<sup>10</sup> was 55.3 percent among CAPE participation schools and 53.8 percent among schools with no CAPE participation. The percentage of chronically absent students was higher in CAPE participation schools (13.8 percent) than non-CAPE schools (8.8 percent).<sup>11</sup> The percentage of students who were English language learners among CAPE schools (4.3 percent) was lower than non-CAPE schools (6.2 percent).<sup>12</sup> For a listing of indicators for each school with CAPE participation, see Appendix A.

### Academy Curriculum

The curricular foci of registered academies fall under specific career clusters. A career cluster is a broad group of related occupations based on commonalities in knowledge and skills required to perform job tasks. The most frequent career cluster represented by academies registered in academic year 2012-13 was information technology with 274 high school and 72 middle school academies (see Table 2). The second most frequent cluster represented was health sciences with 221 high school and 5 middle school registered academies. Because of the limited registration information collected, curricular foci for career-themed courses could not be determined.

<sup>10</sup> Defined as students eligible for free or reduced price lunch. Data source: Florida School Indicators Report, 2012-13 data.

<sup>11</sup> Chronically absent is defined as 21 or more unexcused absences for the academic year. Data source: Florida School Indicators Report, 2012-13 data.

<sup>12</sup> Data source: Florida School Indicators Report, 2012-13 data.

In academic year 2012-13, there were 249,726 CAPE participants in grades 9-12, representing 28.7 percent of the entire high school population.<sup>13</sup> There were 28,228 CAPE participants in grades 6-8 representing 4.3 percent of the middle school population. High school CAPE participants were most likely to be ninth graders and middle school CAPE participants were most likely to be eighth graders (see Table 3).

<sup>13</sup> Based on data from the FDOE Student Information System as of November 15, 2013.

<sup>14</sup> Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

<sup>15</sup> Includes students who were not reported enrolled in a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

## Demographic Profile

Table 4 shows that the distribution of CAPE participants (high school and middle school) by race/ethnicity and gender categories was similar to that of non-CAPE participants. Among CAPE participants, slightly more were male (52.5 percent) than female (47.5 percent). Forty eight percent of CAPE participants were White, and the largest minority populations were Hispanics (26.0 percent) and African-Americans (20.5 percent). Compared to CAPE participants, a slightly lower percentage of non-CAPE participants were White (41.9 percent), and a slightly higher percentage were Hispanic (28.7 percent) and African-American (23.6 percent).

Table 4  
Distribution of CAPE Participants<sup>16</sup> and Non-CAPE Participants<sup>17</sup> by Gender and Race/Ethnicity, 2012-13

CAPE Status	Gender		Race/Ethnicity

## Performance

This section addresses the performance of students enrolled in career and professional academies and career-themed courses. The indicators addressed include the following:

- 1) The number and percentage of CAPE participants obtaining industry certifications;
- 2) Cumulative grade point average of CAPE and non-CAPE participants;
- 3) Student engagement indicators of CAPE and non-CAPE participants, including chronic absenteeism, disciplinary actions and dropout rates; and
- 4) Postsecondary readiness as indicated by the percentage of CAPE and non-CAPE participation in Advanced Placement and dual enrollment courses and eligibility for Florida Bright Futures Scholarships.<sup>18</sup>

<sup>16</sup> Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

<sup>17</sup> Includes students who were not reported enrolled in a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

<sup>18</sup> Data was not available at the time this report was published.

Performance levels on these indicators are reported at the aggregate state-level, summing up all CAPE and non-CAPE participants statewide. Performance levels for schools with CAPE participants can be found in Appendix B.

Industry Certification

In academic year 2012-13, industry certifications on the Industry Certification Funding List, as well as industry certifications on the Middle School STEM Industry Certification List were eligible for the add-on FEFP funding. Only students in grades 6-8 were eligible to earn certifications on the Middle School STEM Industry Certification List. Among the 277,954 CAPE participants, a total of 64,149 assessments were attempted by CAPE participants in 2012-13, of which 50,576 were passed, resulting in a pass rate of 78.8 percent. Of the total attempted certifications, 59,907 were on the Industry Certification Funding List and 4,242 were on the Middle School STEM Industry Certification List. Of the total earned certifications, 47,034 were on the Industry Certification Funding List and 3,542 were on the Middle School STEM Industry Certification List. Among the 122 different certifications attempted by CAPE participants there were 116 on the Industry Certification Funding List, and six on the Middle School STEM Industry Certification List. In 2012-13, the top three were Adobe Certified Associate (Photoshop), Adobe Certified Associate (Dreamweaver) and Microsoft Office Specialist (MOS) Bundle (see Table 5).

Among the 64,149 certification attempts by CAPE participants, 1,594 or 2.5 percent were weight-level 0.3. Certifications weighted 0.1 was most commonly attempted representing 54.9 percent of attempts followed by weight-level 0.2, which represented 42.6 percent of all certification attempts by CAPE participants.

Table 5  
Industry Certifications Attempted and Earned by CAPE Participants<sup>19</sup> in 2012-13

Industry Certification Title	Funding Weight	Certifications Attempted	Certifications Passed	Pass Rate
<b>Industry Certification Funding List</b>				
Adobe Certified Associate (ACA) - Photoshop	0.1	16,767	13,206	78.8%
Microsoft Office Specialist (MOS) Bundle Certification (3 out of 5 - Word, Excel, PowerPoint, Access, Outlook)	0.2	8,862	7,324	82.6%
Adobe Certified Associate (ACA) - Dreamweaver	0.2	7,750	6,596	85.1%
Certified Food Protection Manager (ServSafe)	0.1	4,703	3,614	76.8%
Certified Medical Administrative Assistant (CMAA)	0.1	3,197	1,932	60.4%

The higher the grade level of academy students, the greater the number of industry certifications earned. Thirty-two percent of industry certifications earned by CAPE participants were awarded to 12<sup>th</sup> graders (see Table 6). Among ninth-graders, 8,415 certifications were earned, representing 16.6 percent of total certifications reported. The progression in the number of certifications as grade level increases is expected given the time and training required to earn industry certifications.

Table 6  
Industry Certifications Earned by Grade Level of CAPE Participants<sup>20</sup>, 2012-13

<sup>20</sup> Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

Table 7 shows the distribution of earned certifications by school district. Miami-Dade reported the highest number of reported certifications with 8,645, which represented 17.1 percent of all certifications reported in the state for CAPE participants. Second highest was Broward with 4,846 certifications, or 9.6 percent; followed by Palm Beach with 4,431 certifications, or 8.8 percent.

The 50,576 industry certifications earned by CAPE participants represent 81.9 percent of the 61,730 certifications earned in 2012-13. In addition, 11,154 industry certifications were reported as earned by non-CAPE participants representing 18.1 percent of the total number of certifications earned.

## Grade Point Average

Middle school CAPE participants in 2012-13 had a higher average cumulative GPA compared to the non-CAPE middle school population (see Table 8). High school CAPE participants had a higher average GPA than non-CAPE participants across all grade levels 9 through 12.

Table 8  
Average Cumulative Grade Point Average of CAPE Participants<sup>22</sup> and Non-CAPE Participants<sup>23</sup>  
by Grade Level, 2012-13

School Level	Grade Level	CAPE Participants: GPA	Non-CAPE Participants: GPA
Middle School	6	2.80	2.98
	7	3.17	3.00
	8	3.03	2.96
High School	9	2.65	2.52
	10	2.71	2.54
	11	2.76	2.63
	12	2.86	2.78
All Grades		2.75	2.68

---

<sup>22</sup> Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

<sup>23</sup> Includes students who were not reported enrolled in a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

## Student Engagement

Career and professional academies and career-themed courses were conceived as a way to offer a relevant curriculum to students. Student engagement can be measured through rates of absenteeism, disciplinary actions, graduation and dropping out of school. Middle school CAPE participants were less likely to be chronically absent than non-CAPE middle school participants (see Table 9).<sup>24</sup> Among high schools students, which represents the vast majority of CAPE participants, chronic absenteeism was less prevalent than among non-CAPE participants across grades 9 through 12.

Table 9  
Percentage of CAPE Participants<sup>25</sup> and Non-CAPE Participants<sup>26</sup> Chronically Absent by Grade Level, 2012-13

School Level	Grade Level	CAPE Participants: Chronically Absent	Non-CAPE Participants: Chronically Absent
Middle School	6	6.7%	7.6%
	7	8.5%	9.8%
	8	10.6%	11.1%
High School	9	11.0%	13.6%
	10	12.2%	15.9%
	11	15.3%	18.2%
	12	18.2%	20.9%
All Grades		13.5%	13.2%

Source: FDOE Student Information System

<sup>24</sup> Chronically absent is defined as 21 or more unexcused absences for the academic year.

<sup>25</sup> Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

<sup>26</sup> Includes students who were not reported enrolled in a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

There is no consistent pattern when comparing the incidence of disciplinary actions between CAPE participants and non-CAPE students across grade levels. With the exception of 8<sup>th</sup> and 12<sup>th</sup> graders, CAPE participants were slightly less likely than non-CAPE students to have had disciplinary actions taken against them.

Table 10  
 Percentage of CAPE Participants<sup>27</sup> and Non-CAPE Participants<sup>28</sup> with Reported Disciplinary Actions by Grade Level, 2012-13

School Level	Grade Level	CAPE Participants: At Least One Disciplinary Action	Non-CAPE Participants: At Least One Disciplinary Action
Middle School	6	15.9%	16.8%
	7	19.0%	19.3%
	8	19.5%	19.1%
High School	9	18.4%	19.7%
	10	17.2%	19.5%
	11	16.4%	16.5%
	12	14.8%	12.5%
All Grades		16.9%	17.8%

Source: FDOE Student Information System

<sup>27</sup> Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

<sup>28</sup> Includes students who were not reported enrolled in a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

CAPE participants were less likely to drop out than non-CAPE students, and CAPE participant seniors were more likely to graduate with a standard diploma than non-CAPE seniors. Among CAPE participant 12<sup>th</sup> graders, 88.7 percent graduated with a standard diploma compared to 72.5 percent among non-CAPE 12<sup>th</sup> graders. The one-year dropout rate for academy students in grades 9-12 (0.8 percent) was 1.6 percentage points lower than that of non-CAPE students (see Table 11) and was lower across all grade levels.

Table 11  
 Percentage of CAPE Participants<sup>29</sup> and Non-CAPE Participants<sup>30</sup> Who Dropped out by Grade Level, 2012-13

School Level	Grade Level	CAPE Participants: Dropout Rate	Non-CAPE Participants: Dropout Rate
<b>High School</b>	9	0.5%	1.8%
	10	0.6%	2.1%
	11	0.9%	2.6%
	12	1.0%	3.2%
All Grades		0.8%	2.4%

### Postsecondary Readiness and Employment

An important goal of the Career and Professional Education Act is to prepare students for postsecondary education by making them ready for the academic and technical work and giving them opportunities to earn postsecondary credit while in high school. One indicator of readiness for success in postsecondary education is eligibility for the Florida Bright Futures Scholarship. The 2012-13 data were not available at the time this report was published.

An indicator of postsecondary readiness is enrollment in accelerated courses (i.e., Advanced Placement, dual enrollment, International Baccalaureate and Advanced International Certificate of Education courses). Among CAPE participant high school students, 32.7 percent took one or more accelerated courses during the 2012-13 academic year. In comparison, the percentage for non-CAPE participant high school students was 29.8 percent.

<sup>29</sup> Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

<sup>30</sup> Includes students who were not reported enrolled in a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

## Post-Graduation Outcomes

Placement data for the 2009-10, 2010-11 and 2011-12 graduate cohorts indicate that CAPE participant graduates are more likely than the average high school graduate to be found either employed or enrolled in postsecondary education and, in turn, graduates who were CAPE participants and earned industry certifications are more likely to have been placed than the average CAPE participant graduate (see Table 12).<sup>31</sup> Because industry certification earners appear in the CAPE participant cohort and vice versa, firm conclusions cannot be drawn through this analysis alone, but the data do suggest that CAPE participation and, more clearly, industry certification, are correlated with and possibly influence positive post-graduation placement.

Table 12  
Placement Rates of Three Cohorts of CAPE Participants<sup>32</sup> and Industry Certification Earner Graduates Compared to All High School Graduates

Year	High School Graduate Cohort	Found Employed or Enrolled in Postsecondary Education		
		Fall 2010	Fall 2011	Fall 2012
2009-10	All High School Graduates	79.8%	79.4%	77.4%
	CAPE Academy, No Certification	79.9%	79.9%	78.0%
	Academy with Industry Certification	83.5%	82.4%	80.8%
2010-11	All High School Graduates		80.1%	79.4%
	CAPE Academy, No Certification		80.3%	79.9%
	Academy with Industry Certification		84.2%	83.4%
2011-12	All High School Graduates			79.4%
	CAPE Academy, No Certification			80.3%
	Academy with Industry Certification			83.9%

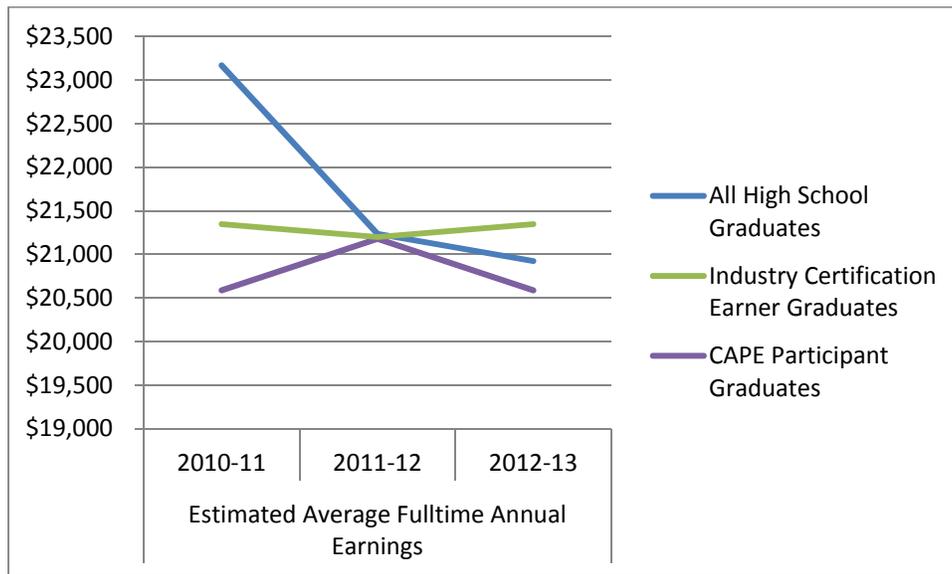

Sources: FDOE Student Information System and Florida Education & Training Placement Information System

<sup>31</sup> The outcome data have limitations. Regarding employment data, graduates employed outside the state of Florida would not be found unless they are in the military or working for the federal government. Some types of workers, e.g. self-employed, are not in the database. No assumptions can be made regarding occupation or wages. Regarding postsecondary placement, graduates enrolled outside the state would not be found.

<sup>32</sup> Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

Data on average earnings over time of high school graduates indicates that industry certification may be correlated with higher earnings than those of the overall high school population. Exhibit 1 below shows the average estimated earnings (based on one quarter of data) of 2009-10 high school graduates found employed and earning a total dollar amount greater than the equivalent of working 40 hours a week, for the full quarter earning the minimum wage. While academy and industry certification graduates initially earned less, on average, than the general high school population, by the third year industry certification earners surpassed the overall average.

Comparison of CAPE Participants to Industry Certification Earners

In Table 14 below, CAPE participants and their comparison group peers are disaggregated by industry certification attainment to isolate the characteristics of CAPE participants and industry certification earners independently. The table includes high school students only because four of the indicators are not relevant for middle school students (dropout, graduation, acceleration and Bright Futures eligibility). The table shows a general trend that, as one moves from the leftmost column (non-CAPE student without certification) to the rightmost column (CAPE student with certification), the performance indicators tend to improve with few exceptions. Both CAPE participants and non-CAPE students who earn certifications performed at a higher level than their non-certified peers.

Table 14  
Performance by CAPE Participation<sup>34</sup> and Industry Certification Attainment, 2012-13, Grades 9-12 Only

<b>Performance Indicator</b>	<b>Non-CAPE, No Certification</b>	<b>CAPE, No Certification</b>	<b>Non-CAPE + Certification</b>	<b>CAPE + Certification</b>
Average GPA	2.64	2.72	2.88	2.98
Chronically Absent	18.3%	16.3%	16.2%	11.3%
At Least One Disciplinary Action	16.4%	17.8%	10.3%	9.9%
Dropout Rate	2.7%	1.0%	0.6%	0.3%
12th Graders Earning Standard Diploma	71.9%	86.1%	92.1%	94.9%
At Least One Accelerated Course	29.6%	30.2%	40.8%	43.3%

<sup>34</sup> Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

<sup>35</sup> Data was not available at the time this report was published.

## Five-Year Trends

The number of registered career and professional academies grew from 246 in 2007-08 to 1,915 in 2012-13 (see Table 15). The percentage of Florida high school students enrolled in career and professional academies and career-themed courses grew from 2.2 percent to 28.7 percent. The number of CAPE participants earning industry certifications grew from 803 in 2007-08 to 45,277 in 2012-13. As CAPE participation increased, the pass rate of academy students taking certification exams dropped considerably from 85.7 percent in 2007-08 to 59.6 percent in 2009-10, but rose to 78.8 percent by 2012-13.

Table 15  
Five-Year Trends in Career and Professional Participation<sup>36</sup> Data

Indicator	2007-08	2008-09	2009-10	2010-11	2011-12	2012-13
Academies Registered	246	490	838	1,298	1,567	1,915

Certification Pass Rate	85.7%	80.4%	59.6%	73.6%	84.3%	78.8%

Source: FDOE Student Information System

## Conclusion

In the sixth year of implementation, the number of career and professional academies, career-themed courses and enrolled students continued to grow across the state, and a change to the law opened two new frontiers: middle schools and career-themed courses. CAPE participants on average performed better than non-CAPE students on most indicators, and students with industry certifications clearly performed better on all the indicators in this report than non-certified students. Placement data of CAPE participant and industry certification earner graduates indicate that CAPE participant graduates were slightly more likely to be found employed or in postsecondary education and were earning, on average, about the same as the average high school graduate. Graduates earning industry certifications showed consistently higher performance in their placement rate and earnings over time.

<sup>36</sup> Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

<sup>1</sup> A number sign (#) indicates there were less than 10 students represented in the demographic subgroup or total membership.

<sup>2</sup> Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district, school and student. Students are counted more than once if they are reported in more than one school of instruction during the academic year.

<sup>3</sup> “Fall 2012 Membership” is reported using school of enrollment and “CAPE Participant Headcount” is reported using school of instruction. Therefore, “Percent in Academy and/or Career-Themed Course” may exceed 100 percent due to students receiving instruction at a school at which they are not enrolled.

<sup>1</sup> Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district, school of instruction, and student. Students are counted more than once if they are reported in an academy or career-themed course in more than one district or school of instruction during the academic year.

<sup>2</sup> Data was not available at the time this report was published.
