

## District Career Dual Enrollment: 2009-10 Enrollment Report

Florida Department of Education Division of Career and Adult Education Loretta Costin, Chancellor

## District Career Dual Enrollment: 2009-10 Enrollment Report

## Definition of Career Dual Enrollment

Florida Statutes define dual enrollment as one of several articulated acceleration mechanisms (early admission, advanced placement, credit by examination, International Baccalaureate, and other postsecondary early entrance opportunities) where students enroll in postsecondary instruction and receive both postsecondary and secondary credit. The intent is to broaden curricular options, increase depth of study options available to students, and shorten the time necessary for completing the requirements for earning a high school diploma and a postsecondary certificate or degree.

Through dual enrollment, public, private, and home education secondary students may enroll in postsecondary courses creditable toward both high school graduation and a career certificate or an associate or baccalaureate degree. There are two curricular avenues for students to participate in dual enrollment: early college (college credit) and career dual enrollment. Early college dual enrollment refers to academic or college credit coursework at the postsecondary level that leads to a college credit certificate or degree. Early college dual enrollment is available through Florida colleges and universities.

Career dual enrollment is a curricular option of elective credits toward earning the high school diploma and completing a career-preparatory certificate program and is available through district career centers and Florida colleges. Career dual enrollment is not intended to enable students to take isolated courses unrelated to a program. School districts must inform all students of the option and eligibility criteria. Students participating in dual enrollment are exempt from the payment of registration, tuition, laboratory fees, and other fees, such as technology fees and parking decal fees, typically assessed with tuition.

The key feature of dual enrollment is the award of both secondary and postsecondary credit, not the location of instruction. Applied Academics for Adult Education, college preparatory instruction, developmental courses, and other pre-collegiate instruction are ineligible for dual enrollment credit because they are not receiving postsecondary credit.<sup>2</sup> Physical education skills courses are also ineligible for dual enrollment.

## Career Dual Enrollment Data

In 2009-10, seventy-seven percent (77%) of career dual enrollment took place in district career centers and twenty-three percent (23%) took place in colleges. District career dual enrollment has decreased from 5,401 students in 2008-09 to 4,795 students in 2009-10. Several districts experienced declines in their total headcount while others reported modest increases. For example, Osceola School District, which accounted for eight percent (8%) of the total headcount of dual enrollment of students for the 2008-09 school year, reported a sixty-five percent (65%) decline in dual enrollment headcount for the 2009-10 school year. In contrast, Broward School District reported a thirty-one percent (31%) increase in dual enrollment headcount for the 2009-10 school year.

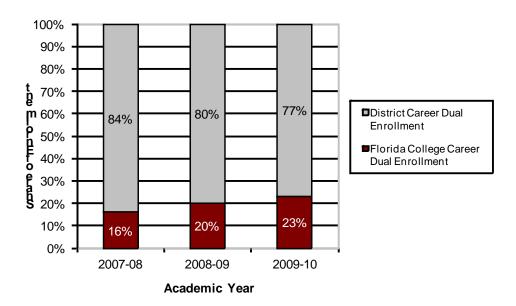

\_

<sup>&</sup>lt;sup>1</sup> Section 1007.271, F.S.

<sup>&</sup>lt;sup>2</sup> Career preparatory instruction was renamed "Applied Academics for Adult Education" effective July 2011.

Fifty-eight percent of district career dual enrollment students in 2009-10 were male and the majority of the total population (62%) was identified as a minority. In 2009-10, Orange and Miami-Dade school districts reported the highest career dual enrollment headcount and also reported the highest career dual enrollment FTE. The district career dual enrollment programs with the highest headcounts were Aviation Airframe Mechanics, Commercial Foods and Culinary Arts, Criminal Justice Operations, Cosmetology, and Building Construction Technologies.
