Welcome to Florida's PK-20 Education Information Portal

Florida's PK-20 Education Information Portal connects people with reports and statistical information about PK-12, college, career and adult education and employment outcomes for Florida students, staff and schools. The links for each area below provides access to standard and interactive reports that provide overall and demographic information in a variety of formats including graphs, tables, maps and custom reports based on your interests in education-related data. The goal of this Portal is to increase the advancement of Florida students and schools by providing access to information that will facilitate important decisions about education in Florida.

An alternate version of the Florida PK-20 Education Information Portal is also available that presents the same information in plain text and tables designed to be readily accessible and usable by individuals using screen readers.

System Requirements:

- 1) How to add this site to your favorites: "[Bookmark this site](#)."
- 2) This website is best viewed using Internet Explorer. You may need to add this website to your "trusted sites" to successfully download files.
- 3) The browser's Back button is not supported. Please use the navigation links provided within the interactive reports.
- 4) Your session will time out after five minutes of inactivity.

The following interactive environment is configured for one-thousand concurrent users. If you experience delays, please try again at a later time.

## Fine Arts Enrollment

Section 1003.4995, Florida Statutes, requires the Commissioner of Education to publish an annual report that describes student access and participation in fine arts courses and provides information about educators who instruct fine arts; facilities where the instruction is taking place; and the manner in which the curricular content is provided.

The Fine Arts interactive reports include data reported by districts in the Fall of each year and provide information about:

- Students who enroll in fine arts courses;
- Educators who instruct fine arts courses;
- Classroom facilities where fine arts instruction is delivered; and
- Fine arts content delivery methods.

The Fine Arts report demonstrates that over 50 percent of all Florida public school students are enrolled in at least one fine arts class. In addition, over 90 percent of all fine arts teachers are both highly qualified and teaching in-field. Delivery methods for the fine arts content vary across districts and schools in Florida.

**User Tips:**

- 1) The browser's Back button is not supported. Please use the navigation links provided within the interactive reports.
- 2) Your session will time out after five minutes of inactivity.

Note:  
1) The "# Total Students Enrolled" data represents the number of Florida public school students who were enrolled in any course during the October survey period. If a student was enrolled in a course at different schools during the October survey, they are counted multiple times. Therefore, these data may differ slightly from other enrollment counts that represent a single student.  
2) To protect the privacy of individual students, data are not reported when the total number of students in a group is fewer than 10. Double asterisks (\*\*) will appear when data are suppressed. When there are no students reported in a category, a dot (.) will appear in the table.

User Tips:  
1) To select a new district, select Data > Refresh Data.  
2) To export data: > right click on the graph/table > select export graph/table data > select the file type > click ok.

**Fine Arts Students of Total Students by Subgroup**

This section is used to select two districts to compare arts enrollment data over a four-year period.
