**SUBJECT:** Reopening Campuses Plans

---

As I mentioned on the webinar yesterday, a number of you have sent to me your current plans for delivery of educational and other services for the remainder of summer and for the fall (“campus reopening plans”). I have appreciated the discussions and the opportunities for my team and me to review what you’re doing and thoughtful approaches you are implementing.

For any institutions that have not provided me with a plan (or if you would like to send me a revised version of your plan), please do so by Friday, June 19. I do realize that the plans are living documents and will likely be updated and modified as time goes on, conditions change and lessons are learned. So, I consider these “as of June 19” plans, and you may submit them in any format you wish. I am collecting them so that the Commissioner can have an idea of what you all have planned. As was stated by the governor, commissioner and on our webinars yesterday, we have provided recommendations and guidance, and the final decisions and implementation are local decisions based on your circumstances and in consultation with local health authorities.

I hope the information in the slide deck will assist you with decisions you are making. We know that there are many students, communities, and employers of first responders and others that are depending on you, so any way that we can support you, please do not hesitate to let us know.

Sincerely,

Kathryn S. Hebda
