*The intent of the Volusia County School District Digital Classroom Plan (DCP) is to provide a perspective on what the district considers being vital and critically important in relation digital learning implementation, the improvement of student performance outcomes, and how this progress will be measured. This plan meets the unique needs of students, schools and personnel in the district as required by s.1011.62(12)(b), F.S.*

## **Part I. DIGITAL CLASSROOMS PLAN - OVERVIEW**

### **A. District Mission and Vision**

*Through the individual commitment of all, our students will graduate with the knowledge, skills, and values necessary to be successful contributors to our democratic society.*

Volusia's mission is to provide our schools with the technology tools, digital materials and professional development necessary to support a fundamental redesign of instruction with the goal of creating a student-centric public school system that accelerates learning toward college and career readiness. The implementation of blended learning models will create multiple paths to personalize student learning to achieve academic outcomes. This includes, but is not limited to, an interdisciplinary approach to learning through real-world STEM applications. Our vision is to unify the way of work for all district stakeholders to contribute to the shift toward online assessments, digital instructional materials and acceleration toward graduation for the next generation learner. By establishing a clear vision for all, the mission of higher student achievement will be realized. A unified district vision will provide the opportunity to develop schools that are more productive for students and teachers by personalizing education, ensuring that the right resources and interventions reach the right students at the right time.

*Volusia's operational definition of blended learning is "a formal education program in which a student learns in part through online delivery of content and instruction with some element of student control over time, place, path, and/or pace; and at least in part at a supervised brick and mortar location away from home; and, the modalities along each student's learning path within a course or subject are connected to provide an integrated teaching experience" (Clayton Christensen Institute for Disruptive Innovation).*

Compared to high-access environments, which simply provide devices for every student, our District aims to transform teaching to support the innovative and active use of technology to improve student outcomes, enhance overall system productivity and enable next generation learners to compete in the new economy.

**B. District Profile**

Volusia County, Florida, is bordered on the west by the historic St. Johns River and by the Atlantic Ocean to the east. Roughly the size of Rhode Island, Volusia is situated 50 miles northeast of Orlando, 60 miles north of the Kennedy Space Center, and 89 miles south of Jacksonville.

With a population of approximately 500,000 people (2014 estimate), Volusia County is ranked the 11th largest county in Florida. Volusia is home to a diverse range of ages with approximately 21.5% of the population age 65 or older and 18% under 18 (2012). The median age is 45.3 years. According to the U.S. Census Bureau (2010), there are over 197,382 households throughout the county with a median income (2012) of \$44,169 and a per capita income (2011) of \$24,536. Among Volusia residents age 25 or older, 87.5% graduated from high school (2007-2011) and 20.8% have obtained a bachelor's degree (2007-2011). As the largest employer in the county, Volusia County Schools employs approximately 7,300 full and part-time personnel, including more than 4,400 teachers who are highly skilled professionals, with nearly 42% having a master's degree or higher. Although tourism is a significant contributor to Volusia County's economy, services, including education and health care are the primary industry.

The School District of Volusia County enjoys a state and national reputation for providing commendable and competitive educational opportunities for its students. The district's proactive commitment to excellence is illustrated by its early implementation of a distinguished array of rigorous academic programs that are recognized locally and nationally for the early and continuous use of instructional technology.

The District continues to form significant partnerships with entities that promote the enhancement of student achievement. Examples include Professional Development Schools in partnership with local universities such as Embry Riddle Aeronautical University, Bethune-Cookman University, the University of Central Florida, Stetson, and the Career Connection with Daytona State. An example of a strong industry partnership is one with the Ford Foundation.

In October 2012, the Volusia County Economic Development Department estimated Volusia's unemployment rate to be 8.4%, slightly above the national average of 7.5%. However, the unemployment rate fell to 5.7 percent in April of 2014, showing some improvement with positive changes in the economy.

## Volusia County School District: 2014-2015 Digital Classroom Plan

Volusia County Schools is the 13th largest school district in the state (by enrollment) with 89 schools and more than 61,000 full-time equivalent students. Two area superintendents supervise principals and schools across the District. Volusia County Schools offer a wide variety of educational programs to all ages. In addition to the many programs offered in traditional school settings, the District also operates several alternative education sites for students with behavioral and/or special needs and physical or emotional limitations. The English for Speakers of Other Languages (ESOL) program imparts specialized instructional techniques for students who speak a foreign language. Volusia earned district accreditation from the Southern Association of Colleges and schools in 2004 and again in 2010.

In summary, the School Board of Volusia County offers a comprehensive and rigorous K-12 curriculum designed to meet the needs of all students. This comprehensive curriculum includes both core and specialized programs and services, and is aligned with state standards. In addition, Volusia County provides certified art, music, guidance, media and physical education teachers at all schools. Additional demographics and statistics can be found on [Volusia's Statistic's website](#).

### C. District Steering Team

Title/Role	Name:	Email/Phone:
Deputy Superintendent, Instructional Services	Jim Tager	<a href="mailto:jrtager@volusia.k12.fl.us">jrtager@volusia.k12.fl.us</a> (386) 734-7190 ext. 20697
Executive Director, Technology Services	Dr. Don Boulware	<a href="mailto:dpboulwa@volusia.k12.fl.us">dpboulwa@volusia.k12.fl.us</a> (386) 734-7190 ext. 20114
Director, K-12 Curriculum Services and School Improvement	Barbara Head	<a href="mailto:BHead@volusia.k12.fl.us">BHead@volusia.k12.fl.us</a> (386) 734-7190 ext. 20657
Coordinator, Learning Technologies	Jessica Levene	<a href="mailto:JLLevene@volusia.k12.fl.us">JLLevene@volusia.k12.fl.us</a> (386) 734-7190 ext. 20451
Coordinator, Secondary Curriculum Services and School Improvement	Dr. Kati Dyer	<a href="mailto:kbdyer@volusia.k12.fl.us">kbdyer@volusia.k12.fl.us</a> (386) 734-7190 ext. 20529
Coordinator, Career and Technical Education	Kelly Amy	<a href="mailto:KLAMY@volusia.k12.fl.us">KLAMY@volusia.k12.fl.us</a> (386) 734-7190 ext. 20641
Coordinator, Volusia Online Learning	Dr. Melissa Carr	<a href="mailto:mcarr@volusia.k12.fl.us">mcarr@volusia.k12.fl.us</a> (386) 734-7190 ext. 38393
Coordinator, K-5 Curriculum Services	Lyndi Geopfert	<a href="mailto:lgoepfe@volusia.k12.fl.us">lgoepfe@volusia.k12.fl.us</a> (386) 734-7190 ext. 20670
Coordinator, Race To The Top	Chris Yahn	<a href="mailto:clyahn@volusia.k12.fl.us">clyahn@volusia.k12.fl.us</a> (386) 734-7190 ext. 20655
Coordinator, Office of Professional Development and Support	Dr. Karen Beattie	<a href="mailto:klbeatti@volusia.k12.fl.us">klbeatti@volusia.k12.fl.us</a> (386) 734-7190 ext. 20547

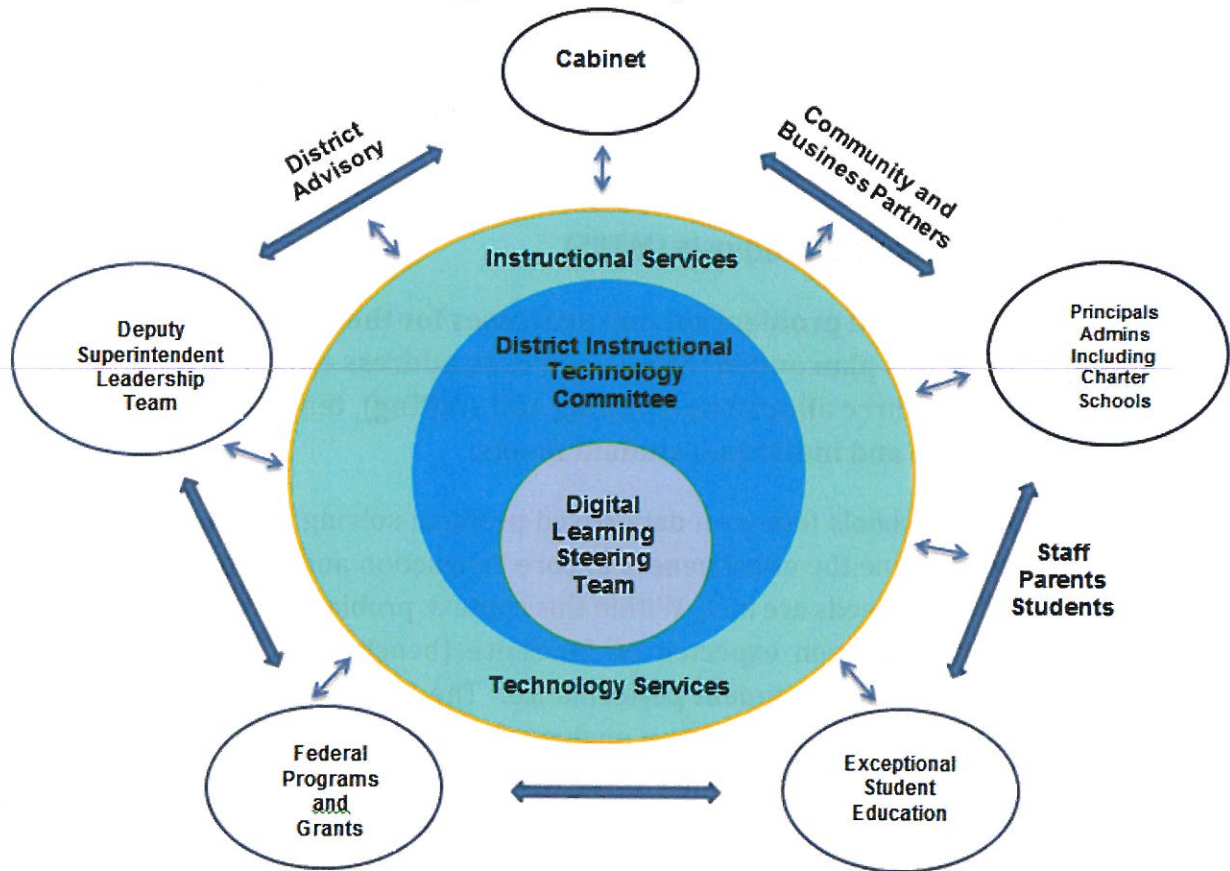

#### D. Planning Process

The District steering team, listed above and jointly headed by Jim Tager, Deputy Superintendent, and Dr. Don Boulware, Executive Director, Technology Services, meets bimonthly to collaborate and develop the process and implement implementation of this plan. All members were responsible to extend communications for input to their respective departments and staff.

The extended team is the District Instructional Technology Committee (DITC), comprised of representatives from each curriculum services department, ESE, learning technologies, Title 1, and professional development. This team, headed by Dr. Karen Beattie, gathers input from the school administrators, providing communications through the monthly principal and assistant principal PLCs. School administrators communicate with staff and parents through online discussion boards, newsletters, surveys and parent-school meetings and workshops.

Rhonda McPherson, Manager, Charter Schools, coordinated the feedback and support of the District's charter schools.

Charter schools were first notified of the Digital Classroom Plan requirements on August 16<sup>th</sup>, and participated in a break-out session of the Principal's Meeting on September 4<sup>th</sup>. The draft was sent to principals on September 15<sup>th</sup> for input and feedback. Several Q&A sessions were held and charter schools had an option to support the District DPC or create their own plan for funding based on FTE.

Throughout the development of the plan, members accessed formal and informal surveys from parents, community members, business partners and staff, to understand the identified needs. Examples of surveys include: Parent Climate Surveys, Staff Climate Surveys, PD teacher surveys, and CTE business and Community surveys. [Link to District Advisory Council.](#)

Volusia has recently passed the half-cent sales tax referendum. A Citizen Oversight Committee is already formed to assist with the technology acquisitions and the Volusia Tech Council and the Daytona Chamber will provide guidance throughout the process.

The team reviewed current research and best practices that include the integration of technology in all areas of the curriculum, ESOL and special needs including students with disabilities. [Link to Volusia's Communication Plan](#)

#### **E. Multi-Tiered System of Supports (MTSS)**

**Volusia's data-based problem solving processes for the implementation and monitoring of this plan and MTSS structures to address effectiveness of core instruction, resource allocation (funding and staffing), teacher support systems, and small group and individual student needs:**

Volusia County Schools follows a data-based problem solving model which enables the District to determine the effectiveness of core instruction and to ensure that individual and group student needs are met. Within this context, problem identification determines the discrepancy between expected performance (benchmarks, standards, behavioral expectations) and actual student performance. The District utilizes a decision making rubric as the foundation for problem analysis that guides educators to determine if the academic or behavioral discrepancy is likely a result of ineffective core instruction or if curricular, environment or learner variables are causal factors. Intervention implementation is based on both a standard protocol approach coupled with more individualized supports as needed. Response- to intervention ensures that data demonstrate effectiveness and level of supports needed to sustain growth. The District's MTSS framework is predicated on this problem solving model. Data derived from problem solving determine what resources (i.e., personnel, programs materials, digital

tools and technology, professional development, funding) are needed to meet the needs of students.

Increasingly, digital resources are utilized for both core instruction and for tiered interventions and supports in order to meet the unique needs of individual students as well as groups of students as identified through data-based problem solving.

**Leadership systems in place to monitor the District's MTSS and Digital Classroom Plan (DCP):**

The District MTSS leadership team is comprised of representation from Instructional Services, ESE/Student Services, Professional Development, Technology Services, Testing and Accountability, and other departments as needed.

Problem solving, which has been facilitated by DAPPS (District Action Planning and Problem Solving), has served to identify areas of specific need. A focus of this process has been the identification of existing resources to ensure a match between resources and student need as identified by data trends. Inherent in this system of strategic resource mapping are the identification of digital resources. In addition, program evaluation of blended learning is conducted to ensure that the appropriate digital supports are matched to student need.

Professional development and other infrastructure and implementation issues are also identified and monitored. Furthermore, a leadership team specific to the development and monitoring of the DCP has been identified and addresses the needs of the plan within a framework of tiered supports.

**The data sources and management systems used to access and analyze data to monitor the effectiveness of supports being offered to each tier:**

Effectiveness of core instruction (i.e., Tier 1) is identified as 80% of students meeting academic expectations. Data sources used for determination included prior state data (i.e., FCAT, EOC and FAIR) as well as district level data sources (e.g., interim assessments). The eduphoria! system is being utilized as the data system to manage student data with reports being disaggregated to determine patterns of need.

Furthermore, the District screens all elementary students for behavioral indicators through the electronic report card. Data is disaggregated at the class, school, district, race and gender levels to determine intervention needs at the group and individual level for Tier 2 and 3 supports.

The electronic Problem Solving Team system is a platform for determining how many students by teacher and grade level at each school need targeted supports, further indicating effectiveness of core instruction and need for tiered supports.

Lastly, the Volusia's Early Warning System provides school based data in Excel which enables Volusia and school leaders to identify both school trends and individual students in need of targeted supports and interventions. Data gleaned from the Early Warning System identify those students who may benefit from student engagement strategies and credit retrieval which in many cases would involve digital learning opportunities.

**Plan to support staff's understanding of MTSS and build capacity in data-based problem solving which will assist with the implementation of the DCP:**

Various means are used to support educators in their understanding of MTSS and data-based problem solving:

- ❖ Annual training and follow-up support has been provided to teachers by school psychologists on data-based problem solving.
- ❖ Training modules, which convey a consistent message, are available to all educators through the Volusia's webpage.
- ❖ An internet site dedicated to MTSS has been developed and contains district specific training modules, student engagement strategies, academic and behavioral interventions.
- ❖ Early Warning System support links to the state MTSS site, and will include information regarding blended learning within a multi-tiered system of supports. This site will be updated regularly to provide teachers with the most updated empirical resources regarding MTSS and digital tools to support positive student outcomes.
- ❖ Volusia support is provided to schools through the Differentiated Accountability liaisons who respond to specific questions and needs including data-based problem solving, MTSS and digital learning.

**Part II. DIGITAL CLASSROOMS PLAN –STRATEGY**

**STEP 1 – Need Analysis:**

[Volusia County School District's Strategic Plan](#) represents a commitment to the students of Volusia County Schools and supports five broad goals with action steps under each goal.

## Volusia County School District: 2014-2015 Digital Classroom Plan

Data based on the Indicators of Progress is used to determine success in meeting each goal.

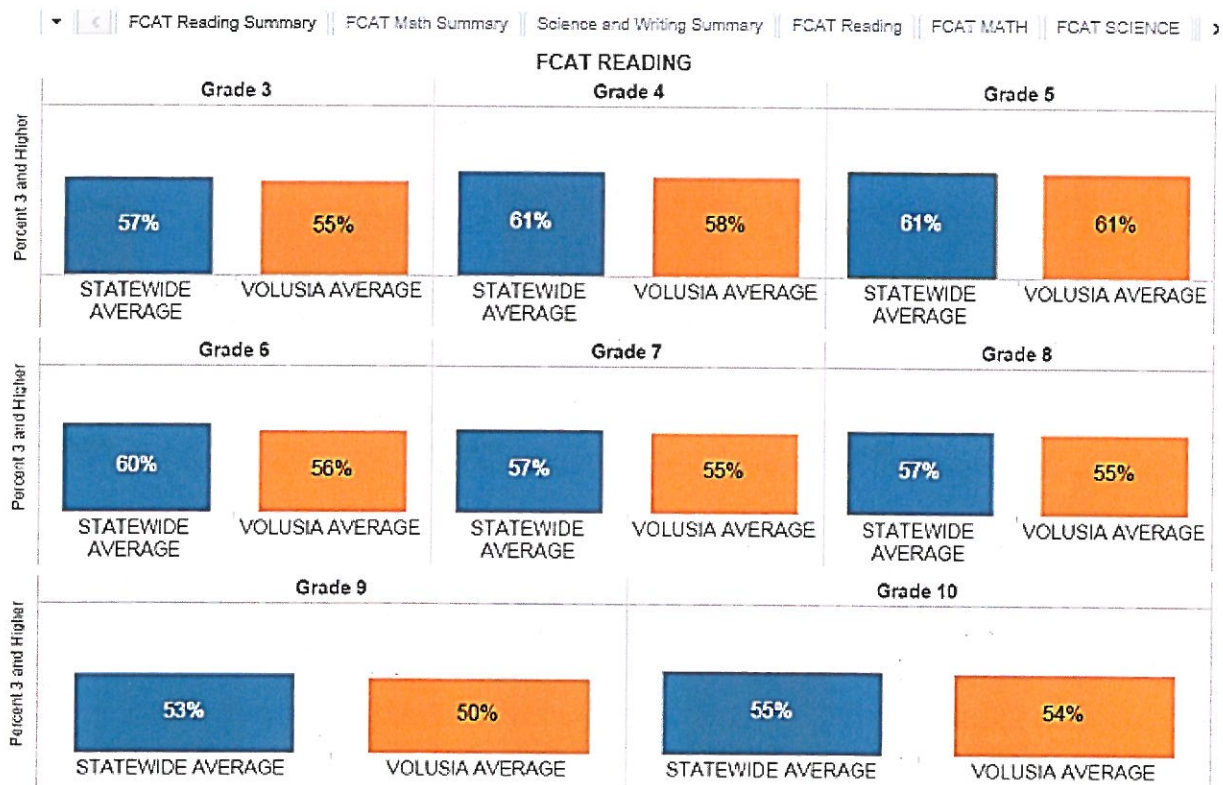

As Volusia developed the strategic plan, stakeholder groups asked for fewer, more focused goals with specific actions for each one. The plan was moved from a 5-year plan to a 3-year plan in order to focus on more immediate action and change. This digital plan is intentionally aligned to the goals of Volusia's Strategic Plan.

### A. Student Performance Outcomes

Volusia County School District shall improve classroom teaching and learning to enable all students to be digital learners with access to digital tools and resources for the full integration of the Florida Standards.

The Volusia Assessment and Accountability Department maintains a website that simplifies the results of the Spring 2014 FCAT data:

<http://myvolusiaschools.org/assessment-accountability/Pages/FCAT.aspx>

## Volusia County School District: 2014-2015 Digital Classroom Plan

### Additional Performance Data

Targets for Florida's Race to the Top Project and the data verified by the Florida DOE on Volusia's progress.

## Volusia County School District: 2014-2015 Digital Classroom Plan

### State Goals for the Class of 2015:

For the every 100 incoming high school freshmen in 2011-12

- 85 will graduate from high school in 2015
- Of the 85 students who graduate, 63 (or 74%) will go on to college by 2017
- Of the 63 students who went on to college, 44 (or 70%) will earn at least a year's worth of college credit by 2019

High School Graduating Class of:	2005 Baseline	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015
Graduation Rate	59	59	60	63	66	68	69	72	76	80	85
College Going Rate	58	58	60	61	62	63	64	65	67	71	74
College Credit Earning Rate	63	63	64	64	64	65	65	66	67	68	70
Percent of 9 <sup>th</sup> Graders Who Eventually Earn at Least a Year's Worth of College Credit	22	22	23	25	26	27	29	31	34	39	44

Volusia's Targets and Actual Data in highlighted in Red.

Students with disabilities	37%	25%	No	43%
Economically disadvantaged	51%	47%	No	56%

Volusia is creating a systematized process for increasing engagement in learning, and expects that student achievement and graduation rates will increase in all subgroups.

### Resources Available to Support the Goal

- **Personnel:** Community Assessment Team; Volusia Leadership Team; Instructional Services Specialists; Title 1 TOAs, School-Based Coaches; Area Superintendents; Office of Professional Development & Support Specialists; ESOL Coordinator; Differentiated Accountability Region 2 Team; School Administration; Title I Intervention Teachers; Behavioral Support Staff
- **Funds:** SAI Funds; Reading FEFP Funds; Volusia Budgets; Title I Funds; Title II Funds; Title III Funds; Race to the Top (5th year amendment); SIG 1003(g)

### **B. Digital Learning and Technology Infrastructure**

Volusia County School District will create a digital learning infrastructure with the appropriate levels of bandwidth, devices, hardware and software.

The data in the following table is taken from the Technology Readiness Inventory (TRI). [Link to 2013-2014 District Technology Resource Inventory](#)

<b>Technology Infrastructure</b>				
<b>Infrastructure Needs Analysis (Required)</b>		<b>Baseline</b>	<b>Target</b>	<b>Date for Target to be Achieved (year)</b>
1.	Student to Computer Device Ratio	5.12:1	2:1	2018-19
2.	Count of student instructional desktop computers meeting specifications	7191	14,000	2018-19
3.	Count of student instructional mobile computers (laptops) meeting specifications	4741	9,500	2018-19
4.	Count of student web-thin client computers meeting specifications	0	10,000	2018-19
5.	Count of student large screen tablets meeting specifications	3521	15,000	2018-19
6.	Percent of schools meeting recommended bandwidth standard	100	100	2014-15
7.	Percent of wireless classrooms (802.11n or higher)	98	100	2014-15

### **C. Professional Development**

Instructional personnel and will have access to opportunities and training to assist with the integration of technology into classroom teaching.

- Professional Development will be evaluated based on the level of current technology integration by teachers into classrooms. This measures the impact of the professional development for digital learning into the classrooms. The Technology Integration Matrix (TIM) is found at: <http://fcit.usf.edu/matrix/matrix.php>. This was recently purchased through RTTT funds Year 5.
- Average integration is recorded as the percent of teachers at each of the 5 categories of the TIM for the levels of technology integration into the classroom curriculum: Entry, adoption, adaptation, infusion, and transformation.

<b>Professional Development</b>				
<b>Professional Development Needs Analysis (Required)</b>		<b>Baseline</b> (Estimated until baseline data – Fall, 2014)	<b>Target</b>	<b>Date for Target to be Achieved (year)</b>
1.	Average Teacher technology integration via the TIM	Entry (25) Adoption (40) Adaption (20) Infusion (10) Transform (5)	Entry (15) Adoption (20) Adaption (30) Infusion (20) Transform (15)	2017-2018
2.	Average Teacher technology integration via the TIM (Elementary Schools)	Entry (25) Adoption (40) Adaption (20) Infusion (10) Transform (5)	Entry (15) Adoption (20) Adaption (30) Infusion (20) Transform (15)	2017-2018
3.	Average Teacher technology integration via the TIM (Middle Schools)	Entry (25) Adoption (40) Adaption (20) Infusion (10) Transform (5)	Entry (15) Adoption (20) Adaption (30) Infusion (20) Transform (15)	2017-2018
4.	Average Teacher technology integration via the TIM (High Schools)	Entry (25) Adoption (40) Adaption (20) Infusion (10) Transform (5)	Entry (15) Adoption (20) Adaption (30) Infusion (20) Transform (15)	2017-2018
5.	Average Teacher technology integration via the TIM (Combination Schools)	Entry (25) Adoption (40) Adaption (20) Infusion (10) Transform (5)	Entry (15) Adoption (20) Adaption (30) Infusion (20) Transform (15)	2017-2018
6.	Purchase (TIM) Tools and provide training for administrators and teachers; use as diagnostic and needs analysis for 2015-16 year.	Establish Districtwide Baseline	Administer Tools	2014-2015

**D. Digital Tools**

Volusia County School District will continue to implement and support a digital tools system that assists instructional personnel and staff in the management, assessment and monitoring of student learning and performance.

A key component to digital tools is the implementation and integration of a digital tool system that assists instructional personnel and staff in the management, assessment and monitoring of student learning and performance.

<b>Digital Tools</b>				
<b>Digital Tools Needs Analysis (Required)</b>		<b>Baseline</b>	<b>Target</b>	<b>Date for Target to be Achieved (year)</b>
1.	Implementation status on systems that enables teachers and administrators to access information about benchmarks and use it to create aligned curriculum guides. ( <a href="#">eduphoria!</a> )	Partially implemented	Will work to implement and employ	2015-2016
2.	Implementation status of a system that provides teachers and administrators the ability to create instructional materials and/or resources and lesson plans. ( <a href="#">eduphoria!</a> )	Partially implemented	Will work to implement and employ	2015-2016
3.	Implementation status of a system that supports the assessment lifecycle from item creation, to assessment authoring and administration, and scoring. ( <a href="#">eduphoria!</a> )	Partially implemented	Will work to implement and employ	2015-2016
4.	Implementation status of a system that includes district staff information combined with the ability to create and manage professional development offerings and plans. ( <a href="#">MyPGS</a> )	Fully implemented	Will continue to support and employ in classrooms	2012-2013

## Volusia County School District: 2014-2015 Digital Classroom Plan

Digital Tools Needs Analysis (Required)		Baseline	Target	Date for Target to be Achieved (year)
5.	Implementation status of a system that includes comprehensive student information that is used to inform instructional decisions in the classroom, for analysis and for communicating to students and parents about classroom activities and progress. ( <a href="#">eduphoria!</a> )	Partially implemented	Will work to implement and employ	2015-2016
6.	Implementation status of a system that leverages the availability of data about students, district staff, benchmarks, courses, assessments and instructional resources to provide new ways of viewing and analyzing data. ( <a href="#">eduphoria!</a> )	Partially implemented	Will work to implement and employ	2015-2016
7.	Implementation status of a system that houses documents, videos, and information for teachers, students, parents, district administrators and technical support to access when they have questions about how to use or support the system. ( <a href="#">Volusia Sharepoint</a> )	Partially implemented	Will work to implement and employ	2015-2016
8.	Implementation status of a system that includes or seamlessly shares information about students, district staff, benchmarks, courses, assessments and instructional resources to enable teachers, students, parents, and district administrators to use data to inform instruction and operational practices. ( <a href="#">VIMS / Parent Portal</a> )	Partially implemented	Will work to implement and employ	2015-2016
9.	Implementation status of a system that provides secure, role-based access to its features and data for teachers, students, parents, district administrators and technical support. ( <a href="#">eduphoria!</a> )	Partially implemented	Will work to implement and employ	2015-2016

These are the added metrics for the measurement of CAPE (Career and Professional Education) digital tools.

**Volusia County School District: 2014-2015 Digital Classroom Plan**

<b>CAPE Digital Tools</b>				
<b>CAPE Digital Tools Needs Analysis</b>		<b>Baseline</b>	<b>Target</b>	<b>Date for Target to be Achieved (year)</b>
1.	Elementary – CAPE Digital Tool Certificates	Partially implemented	Will work to implement and employ	2015-2016
2.	Middle School – CAPE Digital Tool Certificates and Industry Certifications	Partially implemented	Will work to implement and employ	2015- 2016
3.	High School – CAPE Industry Certifications	Fully implemented	Expand industry certification opportunities	2015-2016
			Increase student achievement on industry certification exams to 75% pass rate	2015-2016

**E. Online Assessment Readiness**

Volusia County School District will work to reduce the amount of time used for the administration of computer-based assessments. Online assessment (or computer-based testing) is measured by the computer-based testing certification tool and the number of devices available and used for each assessment window.

<b>Online Assessment Readiness</b>				
<b>Online Assessments Needs Analysis (Required)</b>		<b>Baseline</b>	<b>Target</b>	<b>Date for Target to be Achieved (year)</b>
1.	Computer-Based Assessment Certification Tool completion rate for schools in the district (Spring 2014)	Fully implemented	Will continue to support and employ in classrooms	2013-2014
2.	Computers/devices required for assessments (based on schedule constraints)	Fully implemented	Will continue to support and employ in classrooms	2013-2014
3.	Continue to follow DOE guidelines and procedures to support the state-wide assessment	Partially implemented	Will work to implement and employ	2015-2016

**STEP 2 – Goal Setting:**

The goals listed below are taken from the District's Strategic Plan.

- **GOAL 1:** Implement a comprehensive curriculum driven by Florida Standards.
- **GOAL 2:** Increase achievement for each and every student by ensuring access to rigorous programs, addressing diverse educational needs, and providing access to technology.
- **GOAL 3:** Promote an emotionally, intellectually and physically safe environment for all students and staff.
- **GOAL 4:** Foster an environment that promotes ongoing professional development and improved job performance for all teachers and staff.
- **GOAL 5:** Communicate with all stakeholders through various media to promote collaboration, parent involvement and community partnerships.

The following Volusia data sources, Volusia plans, and documents were used to ensure that all goals, objectives, and strategies are strategically aligned to the Volusia Digital Classroom Plan and the Volusia Strategic Plan.

**A. Student Performance Outcomes (Volusia Goal Areas 1, 2)**

- Volusia Assessment Site - [myvolusiaschools.org/assessment-accountability/](http://myvolusiaschools.org/assessment-accountability/)
- District/School Accountability Reports - [schoolgrades.fldoe.org](http://schoolgrades.fldoe.org)
- Florida School Improvement Plans - <https://www.floridacims.org/>

**B. Digital Learning and Technology Infrastructure (Volusia Areas 1, 2, 3, 4, 5)**

- A tight integration of technology goals (District Technology Plan)
- Volusia Technology Sharepoint - [myvolusiaschools.org/technology-services/](http://myvolusiaschools.org/technology-services/)
- Florida Innovates – Surveys - <http://www.flinnovates.org/>
- Technology Integration Matrix (TIM) is found at: [fcit.usf.edu/matrix](http://fcit.usf.edu/matrix)

**C. Professional Development (Volusia Goal Area 4)**

- PD Online System – MyPGS - <https://volusia.truenorthlogic.com/>
- Volusia Professional Development Manual – 2013-2014
- Professional Development for Digital Learning – Grant
- Volusia Master Inservice – Components – 2013 – 2014

**D. Digital Tools (Volusia Goal Areas 1, 2, 5)**

- Volusia Instructional Management System - [VIMS / Parent Portal](#)
- Role-based online access to instructional applications, Office 365 with web sharing and storage, online texts for teachers and students, and links to Volusia-approved resources – VPOTAL (single-sign-on) - <https://vportal.volusia.k12.fl.us/>
- Career and Technical Connection - <http://www.career-connection.org/>
- Industry Certification - <http://www.certiport.com/portal/>

**E. Online Assessments (Volusia Goal Areas 1, 2)**

- Volusia Online Assessment System - [eduphoria!](#)
- Volusia Online Learning - [volusiaonlinelearning.com/](http://volusiaonlinelearning.com/)

**STEP 3 – Strategy Setting**

Volusia County School District has outlined high-level digital learning and technology strategies that will help achieve Volusia’s goals.

District Strategies			
Goal Addressed	Strategy	Measurement	Timeline
<b>A. Student Performance Outcomes</b>	Revise the curriculum to include the ISTE technology literacy standards:	Access to curriculum maps online and technology-based lessons linked in eduphoria!	2014-2015
	Year 1 – Grades 4,5 Year 2 – Gr 2-3, 6-8 Year 3 – All grades		2014-2015 2015-2016 2017-2018
	Track student progress of technology standards embedded in project-based instruction	Manage reporting of student performance on technology literacy assessment in grades 4-5 and at Atlantic High, documenting best practices	2014-2015
	Provide rigorous and relevant technology-based lessons linked to FL Standards and ISTE Standards	Florida state assessments and Volusia local assessments	2014-2017

**Volusia County School District: 2014-2015 Digital Classroom Plan**

<b>Goal Addressed</b>	<b>Strategy</b>	<b>Measurement</b>	<b>Timeline</b>
<b>B. Digital Learning and Technology Infrastructure</b>	Continue BYOT implementation to all schools, evaluating and updating wireless access to all classrooms	Evaluation of Technology Infrastructure and Resources through FL Innovates Reporting	2014-2015
	Continue implementation of blended learning verified classrooms	Annual fulfillment of online graduation requirement for each high school graduate	2014-2016
	Increase the student to computer ratio, starting with grades 4-5, and Atlantic High (through SIG grant)	Completion of yearly Technology Resources Survey – district and all schools	2014-2017
	Monitor the Atlantic High SIG Grant for best practices of digital learning and technology infrastructure	Collaboration with Atlantic High on grant goals, activities and evaluation	2014-2016
<b>C. Professional Development</b>	Train teachers on curriculum map revisions (FL Digital Learning PD grant)	TIM Tool Reporting of Teacher Technology Skills	2014-2016
	Train staff in blended learning as an instructional shift and technical training related to online platforms and technology	Blended Learning Verification tool	2014-2017
	Support school-based PLCs, online courses, and subscriptions, focused to increase knowledge and technology skills	Based on results of TIM reporting, PD reports of courses, sections, and rosters	2014-2016
	Use DOE resources through <a href="#">FL School Leaders - Learning Links</a>	PLCs – documentation, Deliberate Practice Plans (DPPs)	2014-2016

## Volusia County School District: 2014-2015 Digital Classroom Plan

Goal Addressed	Strategy	Measurement	Timeline
<b>D. Digital Tools</b>	Provide 5 <sup>th</sup> grade teachers and students with access to IC <sup>3</sup> certification coursework, integrated in the curriculum	Certiport rosters and reports	2014-2015
		TIM Tools (to be implemented this year)	2014-2015
	Encourage coursework through Lynda.com	Lynda.com reports	2014-2015
	Manage CAPE Digital Assessments	IC <sup>3</sup> and CAPE Industry Certifications	2014-2017
<b>E. Online Assessments</b>	Continue to monitor state assessment requirements in relation to the student to computer ratio of workstations meeting the assessment specifications.	Florida assessments	2014-2017
		Technology Infrastructure and Resources Surveys	2014-2017

In addition, Atlantic High School, Volusia County, was awarded a School Improvement FFY13 SIG COHORT 3 Grant. Volusia commits to implementing the Transformation model fully for three years starting in 2014-15.

### Areas of Focus

Volusia used the 8-step planning and problem-solving process in the District Improvement and Assistance Plan (DIAP) to address the needs of the SIG-targeted schools in the five Areas of Focus.

Goals that contain strategies that Volusia has identified are:

- **Area of Focus 1:** Design and implement school wide a multi-tiered system of supports
- **Area of Focus 2:** Identify and implement a Florida Standards-based instructional program
- **Area of Focus 3:** Determine how to promote the continuous use of student data to inform and differentiate instruction to meet the academic needs of individual students
- **Area of Focus 4:** Establish schedules and implement strategies that provide increased learning time
- **Area of Focus 5:** Provide staff ongoing, high quality, job-embedded professional development as well as ongoing, intensive technical assistance

## Volusia County School District: 2014-2015 Digital Classroom Plan

School	Indicator	Annual Targets		
		2014-15	2015-16	2016-17
4941 - Atlantic High School	Reading Proficiency - FCAT 2.0 (%)	60.0	65.0	70.0
4941 - Atlantic High School	Math Proficiency - FCAT 2.0 (%)	60.0	65.0	70.0
4941 - Atlantic High School	4-Year Federal Uniform Graduation Rate (%)	73.0	76.0	80.0

### Part III. DIGITAL CLASSROOMS PLAN - ALLOCATION PROPOSAL

The Digital Classroom Plan allocation includes the five key components as required by s.1011.62(12)(b), F.S. In this section of the DCP, Volusia outlines specific deliverables that will be implemented in the current year that are funded from the DCP Allocation. The five components that are included are:

- A. Student Performance Outcomes (Volusia Goal Areas 1, 2)
- B. Digital Learning and Technology Infrastructure (Volusia Areas 1, 2, 3, 4, 5)
- C. Professional Development (Volusia Goal Area 4)
- D. Digital Tools (Volusia Goal Areas 1, 2, 5)
- E. Online Assessments (Volusia Goal Areas 1, 2)

Volusia County School District's funding allocation is **\$743,467**. The District has included charter schools in the DCP deliverables and allocations ( s. 1011.62(12)(c), F.S., - charter schools are eligible for a proportionate share of the DCP Allocation as required for categorical programs in s. 1002.33(17)(b) ) The charter schools were given an option to collaborate on the Volusia DCP or submit their own plan for an equitable allocation based on FTE funding. (One charter submitted a plan for funding based on the approved allocation formula and the plan was approved. All other charter schools are submitting under the district DCP plan.)

Funds for this DCP allocation will be used to purchase the Universal District License Model for Volusia County, participating at a Level 2, which is total eligibility for all middle and high school students. This also includes the IC3 Program for all 5<sup>th</sup> graders, which is very exciting. This program is described in Appendix C. The cost of this license is \$185,083. (Appendix B.)

The remainder of the funds is allocated to purchase workstations for use in all 4<sup>th</sup> and 5<sup>th</sup> grade classrooms district-wide, distributed per FTE. The distribution spreadsheet, which includes charter schools, is found in Appendix D.

**A. Student Performance Outcomes**

Volusia determined specific student performance outcomes based on Volusia needs and goals that are directly impacted by the DCP Allocation. These outcomes are the specific goals that Volusia plans to improve through the implementation of the deliverables funded by the DCP Allocation for the 2014-15 school year.

Student Performance Outcomes			
Student Performance Outcomes		Baseline	Target
1.	Increase the percentage of students achieving learning gains in reading by 3%	56%	59%
2.	Increase the percentage of students achieving learning gains in math by 3%	59%	62%
3.	Increase the ELA Learning Gains of the Lowest 25% by 5%	64%	69%
4.	Increase the ELA Learning Gains of the Lowest 25% by 5%	59%	64%
5.	Increase the industry certification rate	67%	75%
6.	Increase the Overall, 4-year Graduation Rate	68%	85%

**B. Digital Learning and Technology Infrastructure**

**Implementation Plan for Digital Learning and Technology Infrastructure:**

Digital Learning / Infrastructure Implementation					
	Deliverable	Estimated Completion Date	Estimated Cost	School/District	Outcome from Section A)
B.1	Purchase and deploy mobile devices for student use in grade 4 and 5 classrooms	12/01/14	\$558,384.00	All elementary schools, including charter schools	Outcomes 1,2,3,4
	Purchase courseware to Improve digital literacy skills, including on keyboarding skills.	12/01/14	Instruction Funds		Outcomes 1,2,3,4
B.2	Professional and Technical Services for Installation	12/01/15	\$30,000	All elementary schools	

**Evaluation and Success Criteria for Digital Learning and Technology Infrastructure:**

This evaluation process will enable the district to monitor progress toward the specific goals and targets of each deliverable and make mid-course (i.e. mid-year) corrections in response to new developments and opportunities as they arise.

<b>Infrastructure Evaluation and Success Criteria</b>		
<b>Deliverable (from above)</b>	<b>Monitoring and Evaluation and Process(es)</b>	<b>Success Criteria</b>
B.1.	Administrator and staff surveys	100% of the administrators and teachers will respond that the laptops and carts were successfully configured and are now scheduled and used by students.

Volusia County School District intends to use a portion of the DCP allocation for the technology and infrastructure needs area B. s.1011.62(12)(b), F.S. requires a third-party evaluation of the results of the District's technology inventory and infrastructure needs.

A third party initial evaluation was completed through contracted services, paid for through the Race to the Top Project, Year 5, Q1, MOU 14. The evaluation is included in Appendix E.

**C. Professional Development**

**Implementation Plan for Professional Development:**

This plan includes a process for scheduling the delivery of the Volusia's Master Inservice Plan (MIP) components on digital learning, and identifies other school-based processes that will provide on-going support for professional development on digital learning.

**Volusia's professional development plan will have as its foundation the teacher training for CAPE Digital Tool Certifications via IC3 Spark and IC3 as part of the District Universal License.** <http://www.certiport.com/PORTAL/>

## Volusia County School District: 2014-2015 Digital Classroom Plan

Professional Development Implementation					
	Deliverable	Estimated Completion Date	Estimated Cost	School/District	Outcome from Section A
C.1.	School teams will participate in professional development to revise curriculum maps to include Digital Literacy standards – Grades 4, 5	December 31, 2014	\$48,622. (FL DOE PDAP Grant)	Volusia	Outcomes, 1,2,3,4
C.2.	School teams will participate in professional development (school-based facilitators) on the implementation of revised curriculum maps and the Digital Literacy standards, including specific use on instructional technology.	January 31, 2015			Outcomes, 1,2,3,4
C.3.	Teachers of grades 4 - 5 will participate in professional development on the revised curriculum maps, Digital Literacy tools, including specific use of instructional technology and the Digital Tool Certificates as purchased through the Universal License, specifically IC <sup>3</sup> Spark.	March 1, 2015	\$12,658. (FL DOE PDAP Grant)	Volusia	Outcomes, 1,2,3,4, 5
C.4.	Teachers of grades 6 – 8 will participate in professional development on the revised curriculum maps Digital Literacy tools, including specific use of instructional technology and the Digital Tool Certificates as purchased through the Universal License, specifically IC <sup>3</sup> Spark (grade 6), IC <sup>3</sup> (grades 7-8)	Grade 6 – 8 June 30, 2015	6 – 8 Perkins DOE PDI	Volusia	Outcomes, 1,2,3,4, 5
C.5.	Teachers of grades 8 – 12 will participate in professional development on the implementation of Industry Certifications as purchased through the Universal License	Grades 8 – 12, June 2015	Perkins DOE PDI	Volusia	Outcomes, 1,2,3,4, 5, 6

**Other funding sources:**

Brief description of other activities	Other funding source
Teachers of grades 4 - 5 will participate in professional development aligned with MIP specific to the implementation of Digital Tool Certificates as purchased through the Universal License	DOE Professional Development for Digital Learning

**Evaluation and Success Criteria for Professional Development:**

This evaluation process will enable the Volusia to monitor progress toward the specific goals and targets of each deliverable and make mid-course (i.e. mid-year) corrections in response to new developments and opportunities as they arise.

Professional Development Evaluation and Success Criteria		
Deliverable (from above)	Monitoring and Evaluation and Process(es)	Success Criteria
Other fund source	Revised Curriculum Maps with embedded digital literacy, grades 4 - 5 Calendar of PD Walk-throughs Volusia's PD Implementation and Evaluation Evidence	Establishment of a baseline of student success on Digital Tool Certificate for the 2014-2015 school year
C.1.	Revised Curriculum Maps with embedded digital literacy, grades 4 - 5 Calendar of PD Walk-throughs Volusia's PD Implementation and Evaluation Evidence	Establishment of a baseline of student success on Digital Tool Certificate for the 2014-2015 school year
C.2.	Calendar of PD Walk-throughs Volusia's PD Implementation and Evaluation Evidence	Industry Certification reporting which is submitted to DOE annually

**D. Digital Tools**

Digital Tools include a comprehensive digital tool system for the improvement of digital learning. Volusia will maintain a digital tools system that is intended to support and assist district and school instructional personnel and staff in the management, assessment and monitoring of student learning and performance.

## Volusia County School District: 2014-2015 Digital Classroom Plan

Digital tools will include purchases and activities to support CAPE digital tools opportunities and courses. A list of currently recommended certificates and credentials can be found at: <http://www.fldoe.org/workforce/fcpea/> A link to the Volusia Career and Technical information can be found at: <http://www.career-connection.org/>

Industry Certification: <http://www.certipoint.com/Portal/>

### Implementation Plan for Digital Tools:

Digital Tools Implementation					
	Deliverable	Estimated Completion Date	Estimated Cost	School/District	Outcome from Section A)
D.1.	Provide keyboarding to support curriculum in grades 3-5	December, 2014		Ele Schools	Outcomes 1,2,3,4
D.2.	Offer CAPE digital tool certifications via IC3 Spark and IC3 as part of the district Universal License	June 30, 2015	Included in district licensing for 1 year	Volusia	Outcome 5
D.3.	Offer expanded CAPE industry certification opportunities as part of the district Universal License	June 30, 2015	\$185,083	Volusia	Outcome 5

### Evaluation and Success Criteria for Digital Tools:

This evaluation process enables Volusia's CTE Department to monitor progress toward the specific goals and targets and make mid-course (i.e. mid-year) corrections in response to new developments and opportunities as they arise.

Digital Tools Evaluation and Success Criteria		
Deliverable	Monitoring and Evaluation and Processes	Success Criteria
D.1.	Reporting completed through Certipoint to look at progress toward earning Digital Tool Certificates and Industry Certifications	Increase from 67% to 75% passing rate for students to earn either Digital Tool Certificates or Industry Certifications

**E. Online Assessments**

Technology infrastructure and devices required for successful implementation of local and statewide assessments are considered in this section. The analysis of readiness for computer-based testing includes an analysis of the network, bandwidth, and wireless needs that coincide with an increased number of workstations and devices.

The district reviewed current technology specifications for statewide assessments ([www.FSAssessments.com/](http://www.FSAssessments.com/)) and schedule information distributed from the K-12 Student Assessment Bureau.

<b>Online Assessment Implementation</b>					
	<b>Deliverable</b>	<b>Estimated Completion Date</b>	<b>Estimated Cost</b>	<b>School/ District</b>	<b>Outcome from Section A)</b>
E.1.	Review assessment schedule and analysis of network logs to determine strategies to ensure appropriate bandwidth during testing windows	December, 2014	Established contracts	Volusia	Outcome 1,2,3,4,5
E.2.	Increase the student to computer (meeting assessment specs) ratio in grades 4-5	December, 2014	\$558,384	Elementary schools, including charters	Outcome 1,2,3,4

<b>Online Assessment Implementation</b>	
<b>Brief description of other activities</b>	<b>Other funding source</b>
Increase the student to computer ratio (computers meeting assessment specifications)	Capital Outlay, SIG Grant – Atlantic High

**Evaluation and Success Criteria for Online Assessments:**

This evaluation process will enable the district to monitor progress toward the specific goals and targets of each deliverable and make mid-course (i.e. mid-year) corrections in response to new developments and opportunities as they arise.

## Volusia County School District: 2014-2015 Digital Classroom Plan

Online Assessment Evaluation and Success Criteria		
Deliverable (from above)	Monitoring and Evaluation and Process(es)	Success Criteria
E.1.	Monitor Technology Infrastructure and Resources Surveys	Increase student to computer ratio to meet goal of 2:1 computing districtwide

**Certiport and FACTE Special Offer Intent to Participate**  
**Effective August 1, 2014 – August 31, 2014**

**New Certiport District Universal License Offer**

(Customized Pricing – All Programs for All Schools – See your Territory Manager)

Certiport has announced a new District Universal License. This license is being rolled out as a pilot program for the FY14-15 school year. While all districts may apply to participate, not every district will be selected to participate in the license program this year. Pricing to participate in the new District Universal License is customized to each district and based on their historical utilization of Certiport products, the current amount the district is spending today, and the number of students the district wants to serve in the next school year. To learn more about the license and related pricing please visit our Certiport FACTE Sessions and meet with your Certiport Territory Manager.

**The Complete Microsoft MOS Certification Solution Offer**

Microsoft IT Academy + Microsoft MOS Cert License (500 Pack) + GMetrix Site License

We, Volusia County Schools would like to participate in the following program:

x	New Certiport District Universal License Offer
	The Complete Microsoft MOS Certification Solution Offer # of ITA Sites _____
x	Universal Voucher With Microsoft IT Academy Program, # of IT Academy Sites <u>17</u>
	Microsoft IT Academy Program Only , # IT Academy Sites _____

**Important Note:** A school or district may only access these offerings and related pricing through FACTE. Schools or Districts must notify both FACTE and Certiport in writing by August 31, 2014 of their interest to participate in these offers.

**IMPORTANT EXAM RETAKE/REFRESH NOTICE:** At the request of state leadership in Florida, Certiport has changed its retake policies and has removed the unlimited exam refresh on all licensing and voucher products. Please discuss this with your authorized Certiport Territory Manager at the Certiport Booth.

Signature: \_\_\_\_\_

Date: 8/26/14

Title: CTE Specialist

Demand for computer and database professionals is expected to increase much faster than all other occupations (37%) through 2016. Fueling this demand is the growth of information networking, the expansion of client-server environments, and the need for computer specialists to use their knowledge and skills in a problem-solving capacity.

(Source: Bureau of Labor Statistics)

## Key Applications

The IC<sup>3</sup> Global Standard 4 Certification is comprised of three individual examinations:

- Computing Fundamentals
- Key Applications
- Living Online.

The Key Applications examination covers popular word processing, spreadsheet and presentation applications and the common features of all applications to help you learn faster, work smarter, and present yourself better.

## OBJECTIVES

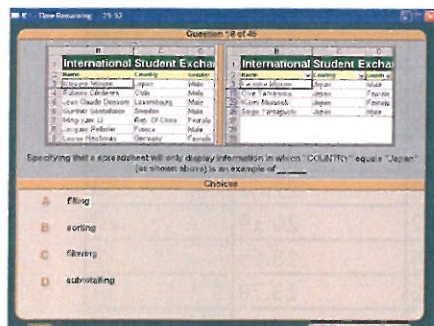

### Common Program Functions.

Today's programs have many common functions to help you learn faster and get more out of them. This domain helps you understand those common functions as well as ways you can use various programs to accomplish common tasks. You'll learn how to start and exit an application, modify interface elements, and utilize various sources of online help. You'll also discover how to perform common functions for file-management, editing and formatting, and printing and outputting.

- Be able to start and exit an application, identify and modify interface elements and utilize sources of online help
- Perform common file-management functions
- Perform common editing and formatting functions

## Sample question:

"Specify that a spreadsheet will only display information in which "COUNTRY" equals "Japan" (as shown above) is an example of \_\_\_\_\_"

- Perform common printing/outputting functions

## Word Processing Functions.

Modern word processors let you do more than create informative documents. They enable you to create live data, collaborate with others, and control access to your valuable information. This domain focuses on the elements of a well-organized document; formatting text and documents, and the ability to use word-processing tools to automate processes such as document review, security and collaboration.

- Be able to format text and documents including the ability to use automatic formatting tools
- Be able to use word-processing tools to automate processes such as document review, security and collaboration

## Spreadsheet Features.

Today's spreadsheets effectively capture, organize, and display data from budgets to statistics to inventory and so on. They also include a wide array of formulas and functions that automatically calculate, sort, and process information. This domain teaches you how to build and use a spreadsheet efficiently. Among other valuable skills, you'll learn how to sort and manipulate data using formulas and functions, create simple but effective charts, and draw conclusions based on tabular data and charts.

- Be able to modify worksheet data, structure and formatting
- Be able to sort data, manipulate data using formulas and functions, and create simple charts

## Communicating with Presentation Software.

In the past, presentation software was only used for large audiences. Now, laptops, inexpensive projectors, and Internet technology advances have made presentation software a staple of modern communication in the classroom and at work and around the world. In this domain, you'll learn how to design, manage and modify presentations and identify different ways presentations are distributed.

- Be able to create and format simple presentations

*Winter Springs, FL 32708*

# Volusia County School District

## Initial Technology Infrastructure and Resources Evaluation

---

Volusia County School District requested an initial technology infrastructure and resources evaluation, concluding on September 1, 2014.

The documents and resources evaluated included:

- 2014-2015 Volusia County School District Technology Plan, approved by the Volusia School Board on June 24, 2014
- 2013 District Technology Resources Inventory Statistical Report – All schools in Volusia County – Summary Information
- 2013-2014 Technology Resources Inventory Statistical Report – Individual Schools
- 2014 Technology Resources – Raw Data – Comparison of Volusia against State Average
- Inventory of Teacher Technology Skills
- Student Tools for Technology Literacy, ST2L Regional and State Summary Data

Commendations:

- ✓ Volusia County School District schools, including charter schools and learning centers, completed the 2013 technology resources inventory requested by the Florida Department of Education. (only one charter school did not submit)
- ✓ Volusia County School District leases a private fiber network consists of a 10 GB redundant ring with four network aggregation points, one at the district data center, where there is currently a 2 GB connection to the Internet. The network aggregation points are geographically placed through the district with point-to-point 1 GB connections to over 70 locations.
- ✓ 98% of all Volusia County School District classrooms meet the Florida DOE specifications for wireless access.
- ✓ The district overall student per instructional computer ratio meeting device specifications (modern computers) is 1 computer for every 5 students (5.12)
  - Elementary Ratio – 6.35
  - Middle School Ratio – 9.52
  - High School Ratio – 3.11

# Volusia County School District

## Initial Technology Infrastructure and Resources Evaluation

---

- ✓ Volusia County Schools maintains a comprehensive list of approved software, easily accessible by teachers and students.
- ✓ Volusia has an aggressive BYOT (Bring Your Own Technology) program in over 60% of the schools, with an aggressive goal to be in 100% of the school by December 2015.

### Recommendations:

- ❖ The Florida Department of Education promotes the TIM (Technology Integration Matrix) supported through the Florida Center for Instructional Technology (FCIT). This system includes a variety of different data collection tools, quantitative and qualitative, designed to inform decision-making and alignment of resources at the classroom, school, and district levels. The implementation of these tools would provide valuable feedback to the district and would support the monitoring of successful technology integration. These tools include:
  - Technology Uses and Perceptions Survey (TUPS) - This survey is designed to gain a better understanding of how educators use technology in their teaching, their level of experience with technology, and their comfort with and attitudes toward technology. Results from this survey help identify professional development needs at the teacher, school, or larger aggregate levels. Survey sections include: Technology Access and Support; Preparation for Technology Use; Perceptions of Technology Use; Confidence and Comfort Using Technology; Technology Integration; Teacher & Student Use of Technology; and Technology Skills and Usefulness.
  - The Technology Integration Matrix Observation Tool (TIM-O) - This tool is designed to guide principals, teachers, and others through the process of evaluating the level of technology integration within a particular lesson. When completed, the tool indicates a profile for the observed lesson in terms of the Technology Integration Matrix. With multiple observations, the TIM-O helps evaluators get a clear picture of the professional development needs of the teacher to support further technology integration.
  - The TIM Administrative Center gives administrators the ability to upload lists of schools and members, assign observers, administer member passwords, and generate reports. The Administrative Center provides great flexibility in how the TIM-O is used. Reports of all completed observations can be viewed in the Administrative Center or downloaded as a spreadsheet.

## Inventory Management

[About](#)  
[Help](#)  
[Logout](#)

From the district menu a district administrator can review and approve inventory data from their schools for final submission to the Department of Education. Downloading a comma separated value(csv) file will give the district a record of their school's inventory responses and will allow the district to utilize the data for their own purposes. [Click here for help on how to use this page.](#)

[Click here to add/delete schools or change their passwords.](#)

## 2013 Technology Resources Inventory Statistical Report All schools in Volusia County

This report contains data from all school types  
including Charter & Special schools

[Click here to display the schools used in this report](#)

[Click here to return to the Statistical Report Menu](#)

### Statistical Terms & Abbreviations

**N:** Number of respondents in the sample

**Mean:** Mean value for the sample

**Med:** Median value for the sample

**Std Dev:** Standard Deviation for the sample

**Total:** Sum of the values for the sample

**N/A:** "Not Applicable". Items with this abbreviation had no respondents within the specified scope.

**Please note:** Percentages are displayed for some response options. The displayed percentage is the percentage of the population that selected that particular option. The population is given for each response because some questions would only have been asked due to responses given to other questions.

1. Indicate the number of desktop and mobile computers available for students using the technical specifications below.

[TRI Reference Sheet \(Opens in new window\)](#)

#### Specifications\*

##### Platform - PC - Windows

- 1 GHZ or faster processor
- 1 GB RAM or greater memory
- 1024 x 768 screen resolution
- 9.5 inch (10 inch class) or larger screen size measured diagonally
- Windows 7 or higher

##### Platform - Apple

- 1 GHZ or faster processor
- 1 GB RAM or greater memory
- 1024 x 768 screen resolution
- 9.5 inch (10 inch class) or larger screen size measured diagonally
- Mac OS X 10.7 or higher

\* These technical specifications conform to Department of Education technology guidelines ([http://www.fldoe.org/BII/Instruct\\_Tech/pdf/Device-BandwidthTechSpecs.pdf](http://www.fldoe.org/BII/Instruct_Tech/pdf/Device-BandwidthTechSpecs.pdf)). To be counted as meeting the minimum technical specifications, a computer must meet all hardware requirements and be able to upgrade their operating systems to either Windows 7 or Mac OS 10.7. Computers must be able to connect to the Internet via wired or wireless networks.

### 1.1 Student Desktop Computers

	Total number of desktops which do not meet the specifications?	Total number of desktops which meet or exceed the specifications?
Library media center	<b>Total: 1159</b> Mean: 15.05 Med: 9.5 Std Dev: 16.19	<b>Total: 892</b> Mean: 11.58 Med: 0 Std Dev: 23.65

N: 77

## 3. Indicate the number of teacher or administrative (non-instructional) computers that meet the specifications for each category:

## Specifications\*

## Platform - PC - Windows

- 1 GHZ or faster processor
- 1 GB RAM or greater memory
- 1024 x 768 screen resolution
- 9.5 inch (10 inch class) or larger screen size measured diagonally
- Windows 7 or higher

## Platform - Apple

- 1 GHZ or faster processor
- 1 GB RAM or greater memory
- 1024 x 768 screen resolution
- 9.5 inch (10 inch class) or larger screen size measured diagonally
- Mac OS X 10.7 or higher

\* These technical specifications conform to Department of Education technology guidelines ([http://www.fldoe.org/BII/Instruct\\_Tech/pdf/Device-BandwidthTechSpecs.pdf](http://www.fldoe.org/BII/Instruct_Tech/pdf/Device-BandwidthTechSpecs.pdf)). To be counted as meeting the minimum technical specifications, a computer must meet all hardware requirements and be able to upgrade their operating systems to either Windows 7 or Mac OS 10.7.

These are computers that students do not have access to.  
(Enter "0" if none.)

[TRI Reference Sheet \(Opens in new window\)](#)

### 3. NEEDS ASSESSMENT/GOALS

The Volusia County School District has fostered a technology-oriented culture with a high expectation for quality services.

#### 3.1 Needs Assessment

Needs assessment is an ongoing process and involves a variety of strategies. Formal and informal evaluations include district and school program reviews, outside program evaluations with consultants, data analysis, surveys, observations, interviews, case studies, and assessment tools such as The Florida Technology Resources Survey: [www.flinnovates.org/survey](http://www.flinnovates.org/survey).

The Technology Resources Survey solicits responses from K-12 principals about technology and its utilization at their respective schools.

Software and hardware is and will continue to be distributed across the district through a standard distribution methodology. These standards are developed through periodic review and normal evaluation and selection processes.

The software/hardware evaluation/selection and end-user training/support processes are collaborative endeavors by the Instructional Services and School Improvement Services Division and the Technology Services division of the school district. Shared budgetary responsibilities ensure coordination between these divisions in the selection of appropriate and compatible products. These evaluation processes involve representatives from the intended end-user community as well as others who may be affected by the selection process, such as the Facilities Division, if it involves additional services such as electrical or wiring enhancements.

To ensure that all instructional software is appropriate for the intended audience and that the software can be supported by the district, it must be approved using the process displayed in Exhibit E.

Once a product has been approved for purchase or use, it is placed on the "District Approved Software List." The District Approved Software list is located on the Volusia County Website.

Software consists of three levels of support:

- Level 1 - Approved District Strategic Software (supported software)
- Level 2 - Non-Strategic District Recommended Software (supported hardware and compatibility of software)
- Level 3 - Non-Strategic Software - (approved software to be run on current platforms only, no support of software functionality or upgrade paths)

The deployment and day-to-day technical/operational support of the product is provided by the Technology Services division in collaboration with the Professional Development

and the Instructional Services areas of the district. If a product is designated as a core requirement, planning will be undertaken to deliver the product to the target audience.

### 3.2 Network, Systems, and Data Center Infrastructure

The Volusia County School District has been very progressive in the use of technology and has developed an infrastructure to deliver services equitably to every classroom in the district. Volusia was one of the first districts in the state and nation to initiate a district-

wide wiring project that provided network services to every classroom in the district. All classroom teachers, administrators, and appropriate support personnel have access to E-mail and Internet services, the latter of which is secured with a CIPA-compliant web filtering system. Approximately 7,500 active E-mail accounts demonstrate the scope of network availability, and their near-100% uptime demonstrates their reliability.

Additionally, every user has

access to a variety of administrative and instructional applications such as the Microsoft Office Suite of products. The development of curriculum resources on the Internet has changed the way educators research and gain access to materials to be used in the classroom. Additionally, the district utilizes cellular services to address special and mobile communication requirements.

To support these endeavors, the school district currently leases a private fiber network. This network consists of a 10 GB redundant ring with four network aggregation points, one of which is at the district data center, where there is currently a 2 GB connection to the Internet. The network aggregation points are geographically placed through the district with point-to-point 1 GB connections to 70+ locations.

Today, the district utilizes a variety of commercially available communications services to provide data, voice and video capability across the wide area network. These services include approximately 753 lines of local voice service, a minimum of 76 1-Gbps Ethernet point-to-point connections to remote sites, and two 10-Gbps full duplex Ethernet connections between four cluster sites.

Volusia County Schools has deployed wireless access points to provide Wi-Fi network coverage in all district locations to support the connectivity of laptops and mobile devices. Local and cross-district calls are supported by 100-Mbps and 50-Mbps Ethernet connections and 14 trunks with 322 lines.

For many years the school district has utilized a centralized “Copy Center” for all schools and departments. This service is available as an extension of the wide area network and provides for any user’s desktop print requirements. This capability is designed to complement the infusion of electronic media into regular classroom activities and support the conversion of that material, when necessary, into hardcopy. All data center large print jobs are routed to the Copy Center, reducing the need for high speed printing in the data center into an efficient and economical centralized model.

### **Application Development and Implementation**

The Volusia County School District plans to continue to develop and implement software solutions that increase access to student achievement data. Data Warehousing tools and applications are provided on curriculum resources, human capital management, and student services to enhance decision-making at both the school and district levels.

As previously mentioned, a standard distribution methodology is used to distribute software and hardware across the district.

While printers and scanners are not being replaced at the same rate as previously, centralized scanning and printing has been implemented at the school level in order to enhance and support local and district standardized testing initiatives. Scanners and printers are available in media centers or other faculty-accessible high-traffic areas to enhance ease of use and convenience.

#### **Software:**

Volusia County Schools maintains a comprehensive list of approved software. The software list covers titles used in K-12 schools, district sites, and all other facilities. The software list is updated with new titles on an ongoing basis as they are approved through the software acquisition process. The list is maintained on the Technology Services website:

<http://myvolusiaschools.org/learn-tech/Pages/Approved-Software-and-Apps.aspx>

### **3.3 District Technology Goals**

District technology goals are aligned with the U.S. and Florida Department of Education technology plan goals. There are five broad national goals and twelve state goals. The supportive district goals are:

#### **Strategic Long-Term Goals**

1. Improve learning opportunities for students through integration of technology into curriculum and instructional practices to increase achievement.
2. Develop and implement strategies to improve communication with parents and community members.
3. Develop applications, processes, and support structures for Race to the Top Initiatives.
4. Support and implement Florida Department of Education computer-based testing initiatives.

5. Enhance district level formative and summative assessment initiatives.
6. Enhance data analysis and reporting capabilities through analytical and data warehousing additions.
7. Develop/provide technology integration training and professional development and enhance access to electronic services.
8. Support, evaluate and coordinate the district's robust technology infrastructure to ensure effective utilization of available services and promote equitable access to technology.
9. Utilize technology to improve business processes and district services in all operational areas.

Short-Term Strategies	 National Goals	 State Goals	 VCS Goals
<b>1.0 LEARNING</b> <ul style="list-style-type: none"> <li>• Provide individual student accounts</li> <li>• Provide electronic grade book services</li> <li>• Provide web-based collaboration tools for student-student and student-teacher interaction</li> <li>• Support virtual school initiatives</li> </ul>	<p>All learners will have engaging and empowering learning experiences both in and outside of school that prepare them to be active, creative, knowledgeable, and ethical participants in our globally networked society.</p>	<p>1. Strengthen student Information and Communication Technology (ICT) skills.</p> <p>3. Enable opportunities to personalize and extend student learning.</p>	<p>1. Improve learning opportunities for students through integration of technology into the curriculum to increase achievement.</p> <p>3. Develop and implement strategies to improve communication with parents and community members.</p>
<b>2.0 ASSESSMENT</b> <ul style="list-style-type: none"> <li>• Implement Florida Department of Education computer-based testing initiatives.</li> <li>• Improve local formative and summative assessment capabilities through</li> </ul>	<p>Our education system at all levels will leverage the power of technology to measure what matters and use assessment data for continuous improvement.</p>	<p>4. Ensure utilization of technology based assessments.</p>	<p>3. Support Florida Department of Education computer-based testing initiatives.</p> <p>4. Enhance district level formative and</p>

utilization of assessment software. <ul style="list-style-type: none"> <li>Review assessment and data analysis services to select district standard product.</li> <li>Implement selected products/services.</li> </ul>		8. Enhance access to student data.	summative assessment initiatives.  5. Enhance data analysis capabilities.
<b>3.0 TEACHING</b> <ul style="list-style-type: none"> <li>Develop the District Instructional Technology Committee (DITC) to plan district-wide instructional technology learning opportunities.</li> <li>Select a learning management system for virtual school.</li> <li>Collaborate with school-based technology teams.</li> <li>Continue to introduce district and school instructional staff to Local Instructional Improvement System (LIIS) to support classroom instructional activities.</li> <li>District instructional technology staff attends conferences (FETC) and membership with professional organizations (FCITL).</li> </ul>	Professional educators will be supported individually and in teams by technology that connects them to data, content, resources, expertise, and learning experiences that enable and inspire more effective teaching for all learners.  2. Enhance the integration of technology in curricula.  9. Ensure trained instructional technology staff.	11. Enable Technology Leadership.  12. Support ICT training for educators to enhance instruction.	6. Develop/provide technology integration training and professional development for teachers and enhance access to electronic services.
<b>4.0 INFRASTRUCTURE</b> <ul style="list-style-type: none"> <li>Expand the Bring Your Own Technology (BYOT) program as an option to schools to increase access to technology.</li> <li>Enhance centralized data storage capabilities.</li> </ul>	All students and educators will have access to a comprehensive infrastructure for learning when and where they need it.	5. Increase access to digital tools.  6. Provide access to reliable infrastructure.	7. Support, evaluate and coordinate the district robust technology infrastructure to ensure effective utilization of available services

<ul style="list-style-type: none"> <li>• Pilot cloud computing for web-based access to productivity tools (word processing, spreadsheets, presentations).</li> <li>• Continue to evaluate new products and modify classroom standard configurations.</li> <li>• Continue working with textbook companies for student data loads to provide access to digital materials available with textbook adoptions.</li> </ul>		7. Improve opportunities to access digital content.	and promote equitable access to technology.
<b>5.0 PRODUCTIVITY</b> <ul style="list-style-type: none"> <li>• Continue to improve access through utilization of the vPortal capabilities.</li> <li>• Continue efforts to deliver district information through electronic and form management tools to improve business processes and workflows (i.e., Intranet, Cherwell ticketing system).</li> <li>• Provide updates via the website to communicate with community (i.e., videos created by MultiMedia Services division, BoardDocs, etc.)</li> </ul>	Our education system at all levels will redesign processes and structures to take advantage of the power of technology to improve learning outcomes while making more efficient use of time, money, and staff.	8. Enhance access to student data.  10. Improve community involvement.	8. Use technology to improve district services in all operational areas.

## The Technology Integration Matrix

### Table of Summary Descriptors

This table contains summary descriptors for each cell of the Technology Integration Matrix (TIM). Other available resources include a tables detailing student activity, teacher activity, and instructional settings for each TIM cell.

Levels of Technology Integration into the Curriculum

	Entry	Adoption	Adaptation	Infusion	Transformation	
Characteristics of the Learning Environment	Active	Information passively received	Conventional, procedural use of tools	Conventional independent use of tools; some student choice and exploration	Choice of tools and regular, self-directed use	Extensive and unconventional use of tools
	Collaborative	Individual student use of tools	Collaborative use of tools in conventional ways	Collaborative use of tools; some student choice and exploration	Choice of tools and regular use for collaboration	Collaboration with peers and outside resources in ways not possible without technology
	Constructive	Information delivered to students	Guided, conventional use for building knowledge	Independent use for building knowledge; some student choice and exploration	Choice and regular use for building knowledge	Extensive and unconventional use of technology tools to build knowledge
	Authentic	Use unrelated to the world outside of the instructional setting	Guided use in activities with some meaningful context	Independent use in activities connected to students' lives; some student choice and exploration	Choice of tools and regular use in meaningful activities	Innovative use for higher order learning activities in a local or global context
	Goal-Directed	Directions given, step-by-step task monitoring	Conventional and procedural use of tools to plan or monitor	Purposeful use of tools to plan and monitor; some student choice and exploration	Flexible and seamless use of tools to plan and monitor	Extensive and higher order use of tools to plan and monitor

The Technology Integration Matrix was developed by the Florida Center for Instructional Technology at the University of South Florida College of Education and funded with grants from the Florida Department of Education. For more information, visit <http://mytechmatrix.org>.

## The Technology Integration Matrix

### Table of Instructional Setting Descriptors

This table contains instructional setting descriptors for each cell of the Technology Integration Matrix (TIM). Other available resources include a tables detailing student activity, teacher activity, and a table of summary indicators for each TIM cell.

Levels of Technology Integration into the Curriculum

Characteristics of the Learning Environment					
	Entry	Adoption	Adaptation	Infusion	Transformation
	<b>Active</b> The setting is arranged for direct instruction and individual seat work. The students may have very limited and regulated access to the technology resources.	The setting is arranged for direct instruction and individual seat work. The students may have very limited and regulated access to the technology resources.	Technology tools are available on a regular basis.	Multiple technology tools are available in quantities sufficient to meet the needs of all students.	The arrangement of the setting is flexible and varied, allowing different kinds of self-directed learning activities supported by various technologies, including robust access to online resources for all students simultaneously.
	<b>Collaborative</b> The setting is arranged for direct instruction and individual seat work.	The setting allows for the possibility of group work, and at least some collaborative technology tools are available.	Desks and workstations are arranged so that multiple students can access technology tools simultaneously.	Technology tools that allow for collaboration are permanently located in the setting and are available in sufficient quantities to meet the needs of all students.	Technology tools in this setting connect to text, voice, and video chat applications and network access has sufficient bandwidth to support the use of these technologies for all students simultaneously.
	<b>Constructive</b> The setting is arranged so that all students can view the teacher's presentation.	Technology tools that allow for building knowledge are available to students for conventional uses on a limited basis.	Technology tools that facilitate the construction of meaning are available to students for conventional uses.	The setting includes a variety of technology tools and access to rich online resources that are available in sufficient quantities to meet the needs of all students.	The setting includes robust access to a wide variety of technology tools, robust access to online resources and communities, and the ability to publish new content online.

## Levels of Technology Integration into the Curriculum

	Entry	Adoption	Adaptation	Infusion	Transformation
Authentic	Resources available via technology in the instructional setting include primarily textbook supplementary material and reference books or websites, such as encyclopedias.	The setting includes access to information about community and world events and primary source materials.	The setting includes access to information outside of school and primary source materials.	The setting provides a variety of technology tools and access to rich online resources, including information outside of the school and primary source materials, that are available in sufficient quantities to meet the needs of all students.	The setting includes technology tools and online resources that allow for student engagement with the local or global communities. A variety of technology tools are available with robust access for all students simultaneously to information outside of the school and primary source materials.
Goal-Directed	The setting includes access to skill building websites and applications, including the ability to track student progress across levels.	The setting includes access to technology tools that allow students to plan, monitor, and evaluate their work.	The setting includes access to technology tools (such as graphic organizers, calendars, spreadsheet software, and timeline software) for planning, monitoring progress, and evaluating outcomes.	The setting includes access to a variety of technology tools for planning in sufficient quantities to meet the needs of all students.	The setting includes access to a wide variety of technology tools and robust access to online resources for all students simultaneously.

The Technology Integration Matrix was developed by the Florida Center for Instructional Technology at the University of South Florida College of Education and funded with grants from the Florida Department of Education. For more information, visit <http://mytechmatrix.org>.

## The Technology Integration Matrix

### Table of Teacher Descriptors

This table contains teacher descriptors for each cell of the Technology Integration Matrix (TIM). Other available resources include a tables detailing student activity, instructional settings, and a table of summary indicators for each TIM cell.

#### Levels of Technology Integration into the Curriculum

		Entry	Adoption	Adaptation	Infusion	Transformation
Characteristics of the Learning Environment	Active	The teacher may be the only one actively using technology. This may include using presentation software to support delivery of a lecture. The teacher may also have the students complete "drill and practice" activities on computers to practice basic skills, such as typing.	The teacher controls the type of technology and how it is used. The teacher may be pacing the students through a project, making sure that they each complete each step in the same sequence with the same tool. Although the students are more active than students at the Entry level in their use of technology, the teacher still strongly regulates activities.	The teacher chooses which technology tools to use and when to use them. Because the students are developing a conceptual and procedural knowledge of the technology tools, the teacher does not need to guide students step by step through activities. Instead, the teacher acts as a facilitator toward learning, allowing for greater student engagement with technology tools.	The teacher guides, informs, and contextualizes student choices of technology tools and is flexible and open to student ideas. Lessons are structured so that student use of technology is self-directed.	The teacher serves as a guide, mentor, and model in the use of technology. The teacher encourages and supports the active engagement of students with technology resources. The teacher facilitates lessons in which students are engaged in higher order learning activities that may not have been possible without the use of technology tools. The teacher helps students locate appropriate resources to support student choices.
	Collaborative	The teacher directs students to work alone on tasks involving technology.	The teacher directs students in the conventional use of technology tools for working with others.	The teacher provides opportunities for students to use technology to work with others. The teacher selects and provides technology tools for students to use in collaborative ways, and encourages students to begin exploring the use of these tools.	Teacher encourages students to use technology tools collaboratively.	The teacher seeks partnerships outside of the setting to allow students to access experts and peers in other locations, and encourages students to extend the use of collaborative technology tools in higher order learning activities that may not have been possible without the use of technology tools.

## Levels of Technology Integration into the Curriculum

	Entry	Adoption	Adaptation	Infusion	Transformation
Constructive	The teacher uses technology to deliver information to students.	The teacher provides some opportunities for students to use technology in conventional ways to build knowledge and experience. The students are constructing meaning about the relationships between prior knowledge and new learning, but the teacher is making the choices regarding technology use.	The teacher has designed a lesson in which students' use of technology tools is integral to building an understanding of a concept. The teacher gives the students access to technology tools and guides them to appropriate resources.	The teacher consistently allows students to select technology tools to use in building an understanding of a concept. The teacher provides a context in which technology tools are seamlessly integrated into a lesson, and is supportive of student autonomy in choosing the tools and when they can best be used to accomplish the desired outcomes.	The teacher facilitates higher order learning opportunities in which students regularly engage in activities that may have been impossible to achieve without the use of technology tools. The teacher encourages students to explore the use of technology tools in unconventional ways and to use the full capacity of multiple tools in order to build knowledge.
Authentic	The teacher assigns work based on a predetermined curriculum unrelated to the students or issues beyond the instructional setting.	The teacher directs students in the conventional use of technology tools for learning activities that are sometimes related to the students or issues beyond the instructional setting.	The teacher creates instruction that purposefully integrates technology tools and provides access to information on community and world problems. The teacher directs the choice of technology tools but students use the tools on their own, and may begin to explore other capabilities of the tools.	The teacher encourages students to use technology tools to make connections to the world outside of the instructional setting and to their lives and interests. The teacher provides a learning context in which students regularly use technology tools and have the freedom to choose the tools that, for each student, best match the task.	The teacher encourages innovative use of technology tools in higher order learning activities that support connections to the lives of the students and the world beyond the instructional setting.
Goal-Directed	The teacher uses technology to give students directions and monitor step-by-step completion of tasks. The teacher monitors the students' progress and sets goals for each student.	The teacher directs students step by step in the conventional use of technology tools to either plan, monitor, or evaluate an activity. For example, the teacher may lead the class step by step through the creation of a KWL chart using concept mapping software.	The teacher selects the technology tools and clearly integrates them into the lesson. The teacher facilitates students independent use of the technology tools to set goals, plan, monitor progress, and evaluate outcomes. For example, in a given project, the teacher may select a spreadsheet program that students use independently to plan and monitor progress. The teacher may provide guidance in breaking down tasks.	The teacher creates a learning context in which students regularly use technology tools for planning, monitoring, and evaluating learning activities. The teacher facilitates students' selection of technology tools.	The teacher creates a rich learning environment in which students regularly engage in higher order planning activities that may have been impossible to achieve without technology. The teacher sets a context in which students are encouraged to use technology tools in unconventional ways that best enable them to monitor their own learning.

The Technology Integration Matrix was developed by the Florida Center for Instructional Technology at the University of South Florida College of Education and funded with grants from the Florida Department of Education. For more information, visit <http://mytechmatrix.org>.

## The Technology Integration Matrix

### Table of Student Descriptors

This table contains student descriptors for each cell of the Technology Integration Matrix (TIM). Other available resources include a tables detailing teacher activity, instructional settings, and a table of summary indicators for each TIM cell.

#### Levels of Technology Integration into the Curriculum

Characteristics of the Learning Environment					
	Entry	Adoption	Adaptation	Infusion	Transformation
	<b>Active</b> Students receive information from the teacher or from other sources. Students may be watching an instructional video on a website or using a computer program for "drill and practice" activities.	Students are using technology in conventional ways and the locus of control is on the teacher.	Students work independently with technology tools in conventional ways. Students are developing a conceptual understanding of technology tools and begin to engage with these tools.	Students understand how to use many types of technology tools, are able to select tools for specific purposes, and use them regularly.	Students have options on how and why to use different technology tools, and often extend the use of tools in unconventional ways. Students are focused on what they are able to do with the technology. The technology tools become an invisible part of the learning.
	<b>Collaborative</b> Students primarily work alone when using technology. Students may collaborate without using technology tools.	Students have opportunities to use collaborative tools, such as email, in conventional ways. These opportunities for collaboration with others through technology or in using technology are limited, and are not a regular part of their learning.	Students have a beginning level of conceptual knowledge of using technology tools for working with others.	Technology use for collaboration by students is regular and normal in this setting. Students choose the best tools to use to accomplish their work.	Students regularly use technology tools for collaboration, to work with peers and experts irrespective of time zone or physical distances.
	<b>Constructive</b> Students receive information from the teacher via technology.	Students begin to utilize technology tools (such as graphic organizers) to build on prior knowledge and construct meaning.	Students begin to use technology tools independently to facilitate construction of meaning. With their growing conceptual understanding of the technology tools, students can explore the use of these tools as they are building knowledge.	Students consistently have opportunities to select technology tools and use them in the way that best facilitates their construction of understanding.	Students use technology to construct and share knowledge in ways that may have been impossible without technology. They have a deep understanding of the technology tools that allows them to explore and extend the use of the tools to construct meaning.

## Levels of Technology Integration into the Curriculum

	Entry	Adoption	Adaptation	Infusion	Transformation
Authentic	Students use technology to complete assigned activities that are generally unrelated to the world beyond the instructional setting.	Students have opportunities to apply technology tools to some content-specific activities that are related to the students or issues beyond the instructional setting.	Students begin to use technology tools on their own in activities that have meaning beyond the instructional setting.	Students select appropriate technology tools to complete activities that have a meaningful context beyond the instructional setting. Students regularly use technology tools, and are comfortable in choosing and using the tools in the most meaningful way for each activity.	Students explore and extend the use of technology tools to participate in projects and higher order learning activities that have meaning outside of school. Students regularly engage in these types of activities that may have been impossible to achieve without technology.
Goal-Directed	Students receive directions, guidance, and feedback via technology. For example, students may work through levels of an application that provides progressively more difficult practice activities.	Students follow procedural instructions to use technology to either plan, monitor, or evaluate an activity. For example, students may begin a K-W-L chart using concept mapping application.	Students have opportunities to independently use technology tools to facilitate goal-setting, planning, monitoring, and evaluating specific activities. Students explore the use of the technology tools for these purposes.	Students regularly use technology tools to set goals, plan activities, monitor progress, and evaluate results. The students know how to use, and have access to, a variety of technologies from which they choose. For example, students may choose to write a blog for peer mentoring toward self-selected writing goals.	Students engage in ongoing metacognitive activities at a level that may have been unattainable without the support of technology tools. Students are empowered to extend the use of technology tools and have greater ownership and responsibility for learning.

The Technology Integration Matrix was developed by the Florida Center for Instructional Technology at the University of South Florida College of Education and funded with grants from the Florida Department of Education. For more information, visit <http://mytechmatrix.org>.
