The Role of EET in Florida’s Perkins V State Plan

• Florida's Perkins V State Plan commits to strengthening CTE programs and pathways to develop a robust ecosystem of innovation, entrepreneurship and cross-sector partnerships.

• Efforts towards scaling innovation in CTE must consider the role of an entrepreneurial mindset.

• Given the demand for an innovative and adaptable workforce, a thoughtful strategy that considers the possibilities around entrepreneurship education and start-up/scale-up incubation and acceleration is now critical to not just the health of the state economy but the relevancy of CTE for 21st century professional success.
Building upon Florida’s proud tradition of entrepreneurship education, Florida endeavors to study and develop practical solutions to the following guiding questions:

1. How does Florida promote self-employment, value creation and business start-ups as a viable career option for students?

2. How can CTE help cultivate entrepreneurial-related competencies and skills in students for a lifetime of meaningful employment?

3. How can CTE support interdisciplinary and entrepreneurial ways of thinking and acting across all career pathways?
The Role of EET in Florida’s Perkins V State Plan (continued)

• This grant program aims to answer those very questions and help execute Florida’s vision of Strengthening Career and Technical Education for the 21st Century Act (Perkins V), which committed to creating a robust entrepreneurial ecosystem for the state’s career and technical education (CTE) students.

• The Department has committed to an initial investment of $2,000,000 from its Perkins V Set-Aside to fund innovative secondary and postsecondary projects that not only cultivate entrepreneurial mindsets and capabilities in CTE students, but also helps students with growing or expanding an existing business.
EET RFP
Programmatic Overview

MarLinda Monroe-Johnson
Career and Technical Education Program Specialist
EET Request for Proposal (RFP) Programmatic Overview

• **Entrepreneurial mindsets** - i.e., the skills and overall awareness of “what it takes” to become a successful entrepreneur (e.g., self-confidence, leadership, creativity, risk propensity, motivation, critical thinking, high degrees of empathy, resilience and self-efficacy).

• **Entrepreneurial capabilities** - i.e., the capacity for successful business management and venturing (e.g., knowledge of marketing, accounting, financial modeling, the sources of capital, evidencing the ability to de-risk an idea, successfully pivot, and value-create).

• **Growing or expanding an existing business** i.e., finding ways to generate and sustain revenue by providing stability and opportunity for growth (e.g., knowledge of community resources, investors, incubators, accelerators and mentorships for guiding support.)
This competitive grant program seeks to fund innovative EET projects that cultivate entrepreneurial skills and entrepreneurial capabilities in CTE students.

EET funds must be exclusively used to support activities associated with CTE programs, students and teachers/faculty.

EET funds may only be used to support CTE programs that meet the size, scope and quality of state standards as part of the comprehensive local needs assessment (CLNA).
Funding Investments:

**High Impact:** $100,000 grant option must include minimum of 3 initiatives/activities related to EET.

- A high impact project is one that includes collaboration among multiple stakeholders, (i.e. a project that partners secondary (school district) and postsecondary (school district and/FCS institution) with area business and industry or CareerSource Workforce Board.
- A high impact project also requires that a high number of students and/or faculty (50+) will not just be exposed to said EET initiatives, but provide evidence for increased entrepreneurial capabilities and (for students) demonstrate potential for a future as a small business owner or (for faculty) demonstrate the ability to effectively teach entrepreneurship.
Sample Project Initiatives and Activities:
EET project options for development may include but not be limited to:
• Integration of EET curriculum into existing CTE programs and programs of study.
• Develop or scale EET co-curricular activities (speaker series, angel investor pitch nights, student organizations, workshops, conferences, training seminars, etc.).
• Develop or scale EET-related professional development opportunities for teachers and faculty.
• Advance teacher and faculty EET Community of Practice, and teacher externship opportunities.
• Create student-centered EET maker spaces for an existing CTE program(s).
• Create mentoring opportunities for students.
• Develop incubators or accelerators to help students grow or expand existing business.
Sample Project Initiatives and Activities:
EET project options for development may include but not be limited to:
• Build and launch a CTE-related school-based enterprise (client digital app development, digital design services, or other goods or services activity for community clients).
• Start-up CTE student boot camps.
• Pitch competitions, entrepreneurship competitions or experiences that challenge students to develop innovative solutions for environmental, social or community issues.
• Expand existing EET programs that encourage growth and innovation.
• Launch a student-centered accelerator/incubator that moves products from bench to market.
• Develop a mentorship pipeline for students growing or expanding an existing business.
EET RFP Programmatic Overview (continued)

- Support non-traditional and special population access.
  - Economically disadvantaged students
  - Military dependents
  - Foster care students
  - Veterans

- Develop collaborative partnerships with not-for-profit organizations, community-based organizations, student organizations, et al that provide curricular and extra-curricular experiences for students in grades 6-12 or postsecondary students.

- Provide mentoring opportunities for students who are growing or expanding an existing business. FDOE is committed to providing mentorship training and support through a collaboration with the Florida Association of Career and Technical Education (FACTE) and the Venture Mentoring Team (VMT).
• Applicants may submit more than one grant proposal for consideration; Local Eligible Agency (LEA) will only be funded for a single project to ensure equal distribution of projects across the state.
• To receive a grant award through the EET funding (under section 112), eligible recipients must have approved Secondary or Postsecondary Four-Year Plan Applications with FDOE.
• The Commissioner may recommend an amount greater or less than the amount requested in the proposed project and will prioritize awarding projects that:
  o Ensure minimum number of secondary CTE grant recipients are funded.
  o Demonstrate partnerships with secondary and postsecondary collaborative project proposals.
EET RFP Programmatic Overview (continued)

• EET grant recipients are required to participate in an end-of-year, statewide, in-person convening to discuss their results and share best practices.

• Statewide convening will be supported by an assemblage of partners, such as the chosen host facility, FACTE, Network for Teaching Entrepreneurship (NFTE), The Entrepreneurial Learning Initiative (ELI), Global Innovation and Management Institute (GIMI), Venture Mentoring Team (VMT), Veterans Florida and Uncharted Learning.

• Grant orientation provided by FDOE.
EET RFP Programmatic Overview (continued)

• Materials (guides, lesson plans, took kits, curriculum) developed through the EET grant funds will be made available to other agencies and shared electronically statewide.

• EET grant recipients may be asked to serve as a demonstration site and host (in-person or virtual) school districts and FCS institutions interested in project replication.
