PreK-5 LITERACY INSTRUCTION PRACTICE PROFILE

Philosophy, Values and Guiding Principles:
PreK-5 Literacy Instruction includes the continuum of literacy development from emergent literacy to early literacy and reading. Based on Section 1002.67, F.S., curriculum and instruction used in prekindergarten classrooms (specifically VPK programs) is developmentally appropriate¹ and designed to prepare learners for kindergarten through the use of the Florida Early Learning and Developmental Standards: 4 Years Old to Kindergarten. These standards specify skills in the Language and Literacy Domain (listening and understanding, speaking, vocabulary, sentences and structure, conversation, emergent reading, emergent writing).

According to Rule 6A -6.053, F.A.C., K-12 Comprehensive Evidence-Based Reading Plan, reading instruction for kindergarten through fifth grade focuses on and builds learner capacity in the six components of reading (oral language, phonological awareness, phonics, fluency, vocabulary and comprehension) as appropriate to the age/grade level. According to the rule, reading instruction:
- provides print-rich, explicit, systematic, scaffolded and differentiated instruction;
- builds background and content knowledge; and
- incorporates appropriate writing in response to reading.

Additionally, early literacy and reading instruction in prekindergarten through fifth grade must be:
- aligned to the Florida Early Learning and Developmental Standards for Language and Literacy and the B.E.S.T. Standards for English Language Arts and
- informed by four types of classroom assessment (screening, progress monitoring/formative assessment, diagnosis and summative assessment) to guide differentiation of instruction and the use of corrective feedback.

Early literacy and reading instruction are to be inclusive of all learners, incorporating the principles of Universal Design for Learning and providing appropriate accommodations for students with a disability, students with an Individual Educational Plan, and students who are English language learners. Finally, high-quality early literacy and reading instruction are guided by careful planning of appropriate instructional goals, content, methods/routines, use of materials and text selection, including quality texts, such as the sample texts by grade and standard included in the B.E.S.T. Standards for English Language Arts and domain-related books included in the Florida Early Learning and Developmental Standards Educator’s Guide.

Inclusion/Exclusion Criteria: Includes instruction provided to all prekindergarten through fifth grade students.

Desired Outcomes:
1. Increase the percentage of students ready to learn when entering kindergarten.
2. Increase the percentage of students reading on grade level by the end of third grade by 3%–4% per year to reach the goal of 90% of third grade students performing at or above grade level on Florida’s state summative assessment for reading/ELA.
3. Close the achievement gap for Florida’s most vulnerable students.
4. Rank #1 nationally in fourth grade reading on the National Assessment of Educational Progress.

<tr>
<th>Core Component</th>
<th>Contribution to the Desired Outcomes</th>
<th>Accomplished Use</th>
<th>Ineffective Use</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Description of the component</strong></td>
<td>An explanation of how the components contribute to the desired outcome</td>
<td>Activities &amp; behaviors that exemplify adult practitioners who are able to generalize required skills &amp; abilities to a wide range of settings and contexts; skills are used consistently and independently – skills are sustained over time while continuing to grow</td>
<td>Activities and behaviors that exemplify adult practitioners who are not yet able to implement the required skills or abilities in context</td>
</tr>
<tr>
<td><strong>EXPLICIT INSTRUCTION</strong> is intentional teaching with a clear and direct presentation of new information to learners, which does not require student inferencing during the introduction of new or previously taught content, concepts or skills. One example is the gradual release model.</td>
<td>Explicit instruction contributes to the learner’s: 1) clear understanding of newly introduced or previously taught content, concepts and skills; 2) positive engagement in relating to the new learning; and 3) strong early literacy progress.</td>
<td>1. Introduces the new or previously taught content, concept or skill clearly and directly. 2. Models or demonstrates use of the new or previously taught content, concept or skill. 3. Provides clear visual and/or auditory examples (and non-examples when needed) to illustrate specific application of content, concept or skill. 4. Provides learners frequent opportunities for guided and independent practice of new or previously taught content, concept or skill.</td>
<td>1. Introduces new or previously taught content, concept or skill indirectly, relying upon student inferencing; does not provide clear and concise explanation. 2. Provides instruction without modeling or demonstrating new or previously taught content, concepts or skills; does not clarify potential misconceptions. 3. Provides instruction without visual and/or auditory examples and non-examples; does not illustrate specific application of new or previously taught content, concepts or skills. 4. Provides instruction without follow-up opportunity for learners to practice new or previously taught content, concepts or skills; does not guide learners toward independence as soon as possible.</td>
</tr>
<tr>
<td><strong>SYSTEMATIC INSTRUCTION</strong> is a planned sequence that includes a logical progression of content, concepts and skills, from simple to complex, with cumulative teaching/review, and practice to enable learners to achieve learning goals.</td>
<td>Systematic instruction contributes to the learner’s continuous acquisition of increasingly complex content, concepts and skills in order to become a confident reader. It decreases the prospect of a learner developing a reading difficulty over time.</td>
<td>1. Uses a logical progression of content, concept and skill, proceeding from simple to more complex. 2. Conducts a cumulative review, enabling learners to make connections to previously learned material. 3. Provides opportunities for students to practice previously taught content, concepts and skills to progress toward learning goals.</td>
<td>1. Teaches content, concepts or skills that do not proceed from simple to more complex. 2. Does not provide cumulative reviews for learners to build content, concepts and skills or make connections to new and previously learned material. 3. Does not provide opportunities for learners to practice new and previously taught content, concepts and skills in order to progress toward learning goals.</td>

</table>
| SCAFFOLDED INSTRUCTION       | Scaffolding instruction contributes toward the quality of a learner’s efforts in relating to new or unfamiliar content, concepts and skills that fortify the development of language and literacy skills orally and in written form.                                                                                                                                                                                                                                                                                                                                                                                                     | 1. Identifies learners who are having difficulty carrying out a task or solving a problem on their own.  
2. Provides intentional support matched to the learner’s need, such as asking an open-ended question, providing prompts and cues, breaking down the problem into smaller steps, using visual aids, providing an example or offering encouragement.  
3. Monitors the learner’s response to the scaffold and provides the next level of support needed on a scale from intense to moderate, gradually releasing ownership of learning to the student until they are able to perform the task independently. | 1. Overlooks learners having difficulty carrying out a task or solving a problem on their own.  
2. Does not provide appropriate support that relates to the needs of the learner.  
3. Does not monitor learner response to scaffolding; does not identify next level of requisite support for further learning; does not empower the learner to perform the task independently.                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| CORRECTIVE FEEDBACK           | Corrective feedback contributes to a learner’s awareness of errors and increases self-correction and self-regulation, the quality of a learner’s literacy engagement, motivation and independence for improved performance, behavior and academic achievement.                                                                                                                                                                                                                                                                                                                                                                                   | 1. Identifies learner’s misunderstanding/error relative to the target instructional goal.  
3. Provides the learner the opportunity for timely self-correction.  
4. Repeats the process as needed or confirms accuracy based on learner response. | 1. Overlooks learner’s misunderstanding/error relative to the target instructional goal.  
2. Provides no feedback to learner response.  
3. Provides the learner no opportunity for self-correction.  
4. Provides no confirmation or follow-up correction of the learner’s accurate or inaccurate response.                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

GLOSSARY OF TERMS:

**Cumulative Review**: Frequently reviewing concepts that have been taught previously over time. Lessons build on previous knowledge, moving from simple concepts to more difficult concepts.

**Developmentally Appropriate Practice**: Teaching young children (birth through age 8) in ways that: meet children where they are, as individuals and as a group; and help each child reach challenging and achievable goals that contribute to their ongoing development and learning. It includes intentionally planned instruction, clearly defined learning goals, thoughtful instructional decisions to support children to meet those goals, continually assessing children’s progress and adjusting instruction accordingly. Additionally, developmentally appropriate practice emphasizes curricular goals that build knowledge and attend to learning progressions in curriculum and teaching methods, and child-guided and teacher-guided experiences.

**Gradual Release Model**: Strategic transfer of responsibility in the learning process from the teacher to the student.

**Inferencing**: Process of drawing conclusions based on information provided, plus prior knowledge and experience.

**Intense Support**: Directs the student’s thinking but does not provide the answer.

**Moderate Support**: Encourages a student to utilize their own thinking without stretching the student beyond their capacity.

CITATION OF RESEARCH USED:

**Corrective Feedback**

**Differentiated Instruction**

Explicit and Systematic Instruction

**Scaffolded Instruction**
