FCAT Question Symbols

This symbol appears next to questions that require short written answers. Use about 5 minutes to answer these questions.

A complete and correct answer to each of these questions is worth 2 points.
A partially correct answer is worth 1 point.

This symbol appears next to questions that require longer written answers. Use about 10–15 minutes to answer these questions.

A complete and correct answer to each of these questions is worth 4 points.
A partially complete answer is worth 1, 2, or 3 points.

This symbol appears next to questions that require you to fill in your answer on a grid. Answers may be gridded using several correct formats. You **MUST** fill in the bubbles accurately to receive credit for your answer.

Directions for Completing the Response Grid

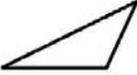

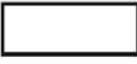

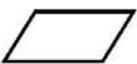

1. Work the problem and find an answer.
2. Write your answer in the answer boxes at the top of the grid.
 - Print your answer with the first digit in the left answer box, or with the last digit in the right answer box.
 - Print only one digit or symbol in each answer box. Do NOT leave a blank answer box in the middle of an answer.
3. Fill in a bubble under each box in which you wrote your answer.
 - Fill in one and **ONLY** one bubble for each answer box. Do NOT fill in a bubble under an unused answer box.
 - Fill in each bubble by making a solid black mark that completely fills the circle.
 - You **MUST** fill in the bubbles accurately to receive credit for your answer.

Fold and Tear Carefully Along Dotted Line.
This FCAT Mathematics Reference Sheet is for use only on the SSS FCAT Mathematics Test.

		Area
	Triangle	$A = \frac{1}{2}bh$
	Rectangle	$A = lw$
	Trapezoid	$A = \frac{1}{2}h(b_1 + b_2)$
	Parallelogram	$A = bh$
	Circle	$A = \pi r^2$

KEY	
b = base	d = diameter
h = height	r = radius
l = length	A = area
w = width	C = circumference
ℓ = slant height	V = volume
$S.A.$ = surface area	
Use 3.14 or $\frac{22}{7}$ for π .	

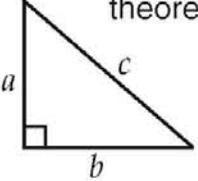

Circumference
 $C = \pi d = 2\pi r$

		Volume	Total Surface Area
	Right Circular Cone	$V = \frac{1}{3}\pi r^2 h$	$S.A. = \frac{1}{2}(2\pi r)\ell + \pi r^2 = \pi r\ell + \pi r^2$
	Square Pyramid	$V = \frac{1}{3}lwh$	$S.A. = 4(\frac{1}{2}l\ell) + l^2 = 2l\ell + l^2$
	Sphere	$V = \frac{4}{3}\pi r^3$	$S.A. = 4\pi r^2$
	Right Circular Cylinder	$V = \pi r^2 h$	$S.A. = 2\pi r h + 2\pi r^2$
	Rectangular Solid	$V = lwh$	$S.A. = 2(lw) + 2(hw) + 2(lh)$

In the following formulas, n represents the number of sides.
 In a polygon, the sum of the measures of the interior angles is equal to $180(n - 2)$.
 In a regular polygon, the measure of an interior angle is equal to $\frac{180(n - 2)}{n}$.

This page is as it appeared for the Spring 2004 test administration.
It has since been modified for all subsequent administrations.

Grades FCAT Mathematics SSS Reference Sheet

 <p>Pythagorean theorem: $c^2 = a^2 + b^2$</p>	<p>Distance between two points $P_1(x_1, y_1)$ and $P_2(x_2, y_2)$:</p> $\sqrt{(x_2 - x_1)^2 + (y_2 - y_1)^2}$

Conversions

1 yard = 3 feet = 36 inches
1 mile = 1,760 yards = 5,280 feet
1 acre = 43,560 square feet
1 hour = 60 minutes
1 minute = 60 seconds

1 cup = 8 fluid ounces
1 pint = 2 cups
1 quart = 2 pints
1 gallon = 4 quarts

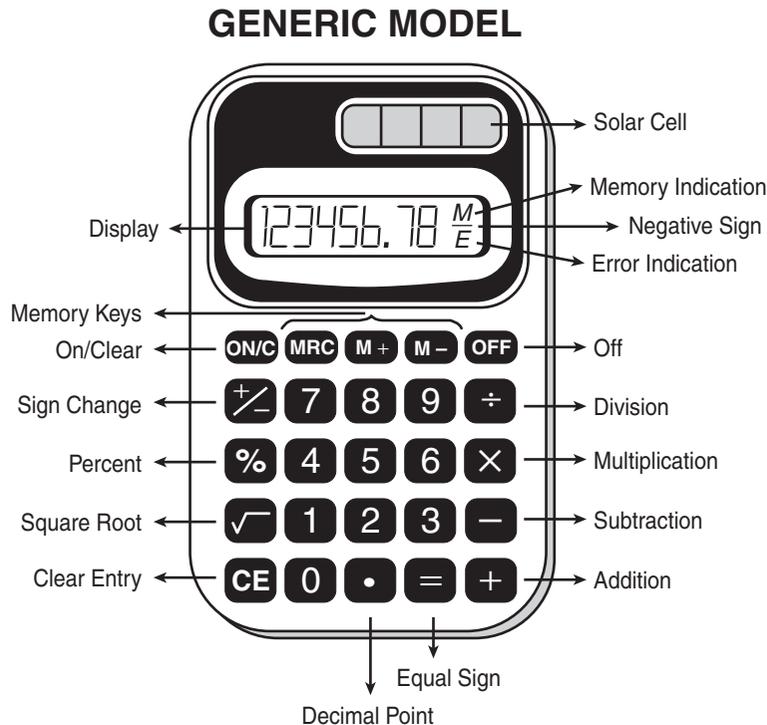

1 liter = 1000 milliliters = 1000 cubic centimeters
1 meter = 100 centimeters = 1000 millimeters
1 kilometer = 1000 meters
1 gram = 1000 milligrams
1 kilogram = 1000 grams

1 pound = 16 ounces
1 ton = 2,000 pounds

Metric numbers with four digits are presented without a comma (e.g., 9960 kilometers).
For metric numbers greater than four digits, a space is used instead of a comma (e.g., 12 500 liters).

This page is as it appeared for the Spring 2004 test administration. It has since been modified for all subsequent administrations.

This is a picture of a generic calculator and its parts.

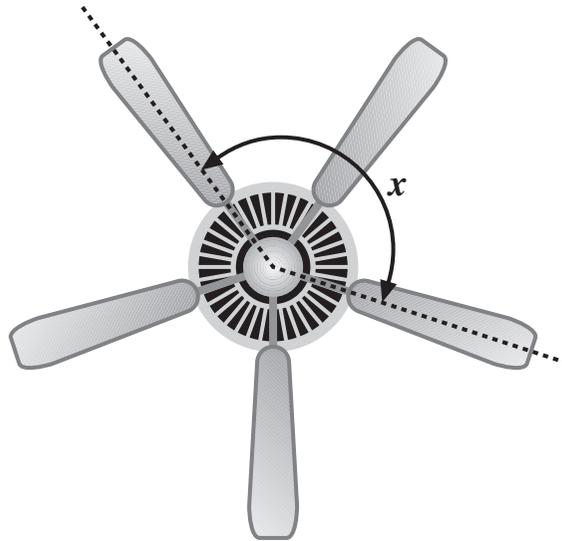

HELPFUL HINTS FOR TAKING THE FCAT MATHEMATICS SSS TEST

1. Read the problem very carefully. Then decide whether or not you need the calculator to help you solve the problem.
2. When starting a new problem, always clear your calculator by pressing the clear key.
3. If you see an **E** in the display, clear the error before you begin.
4. If you see an **M** in the display, clear the memory and the calculator before you begin.
5. If the number in the display is not one of the answer choices, check your work. Remember that when computing with certain types of fractions, you may have to round the number in the display.
6. Remember, your calculator will NOT automatically perform the algebraic order of operations.
7. Calculators might display an incorrect answer if you press the keys too quickly. When working with calculators, use careful and deliberate keystrokes, and always remember to check your answer to make sure that it is reasonable.
8. The negative sign may appear either to the left or to the right of the number.

Use the space in the Test Book to do your work. Then mark your Test Book for the answer you have chosen. If you change your answer, be sure to erase completely.

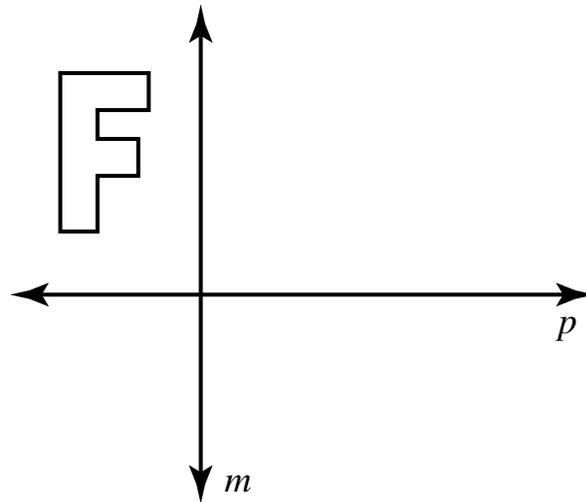

- 1 A ceiling fan with five equally-spaced blades is shown below.

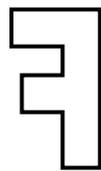

What is the degree measure of angle x ?

- A. 36°
 - B. 72°
 - C. 108°
 - D. 144°
- 2 Tanisha and some friends from her bicycle club went on a training ride from West Palm Beach to Miami. They planned to ride 45 miles from West Palm Beach to Fort Lauderdale, another 10 miles to Hollywood, and finally 15 miles to Miami. Tanisha's bicycle got a flat tire north of Miami, and she was unable to complete the training ride. Her odometer showed she had traveled 60 miles. Approximately what percent of the training ride did Tanisha complete?
- F. 14%
 - G. 75%
 - H. 86%
 - I. 116%

- 3 In the figure, the letter "F" is to be first reflected over the vertical line m and then again reflected over the horizontal line p .

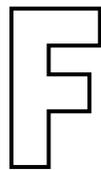

Which of these figures would be the correct orientation of the letter "F" after the two transformations described?

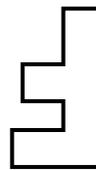

A.

C.

B.

D.

- 4 Krista has decided to enter a local marathon. As part of her training, she is going to increase the number of miles she runs every week by 3 miles. If Krista runs 12 miles in the first week, how many miles will she run during the ninth week?

- 6 A rectangular piece of window screen has a width of 1.75 feet. The packaging label says the screen is 42 square feet. What is the length of the screen?
- F. 24.0 feet
 - G. 43.75 feet
 - H. 73.5 feet
 - I. 101.0 feet

- 7 Raul was taking a tour of the Kennedy Space Center. He could see a space shuttle being prepared for launch a distance, d , away. He held one of his keys out at arm's length and noticed that, at this distance, the shuttle appeared to be about the same size as his key.

(Not to Scale)

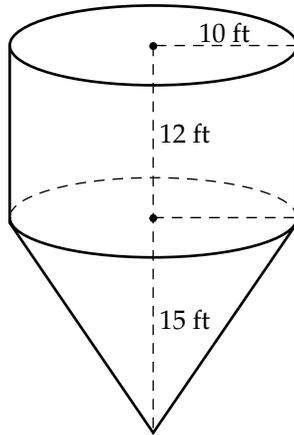

Raul knows that the shuttle is really about 120 feet in length and that his key is about 2 inches long. He is holding the key 24 inches away from his eyes. Using this information, which is closest to the distance, d , between Raul and the space shuttle?

- A. 240 feet
- B. 1440 feet
- C. 2880 feet
- D. 5760 feet

8

The drawing below shows an empty sand hopper at a construction site. The upper part is in the shape of a right circular cylinder with a height of 12 feet (ft) and radius of 10 feet. The lower part is in the shape of a right circular cone with a height of 15 feet.

THINK
SOLVE
EXPLAIN

Determine the volume of sand, in cubic feet, that will completely fill the sand hopper. Show all work necessary to justify your answer.

Volume of sand _____

9

At the close of the stock market on Monday, the value of a certain stock was \$12.00 per share. By the close on Tuesday, the value of the stock went up 50% per share. At close on Wednesday, the value of the stock was down 5% per share from Tuesday's closing value.

THINK
SOLVE
EXPLAIN

Complete Parts A, B, and C.

Part A Determine the value of the stock at closing on Tuesday and Wednesday. Show all work necessary to justify your answer.

Value on Tuesday _____ *Value on Wednesday* _____

Part B Determine the total percent change in the value of the stock from Monday to Wednesday. Show all work necessary to justify your answer.

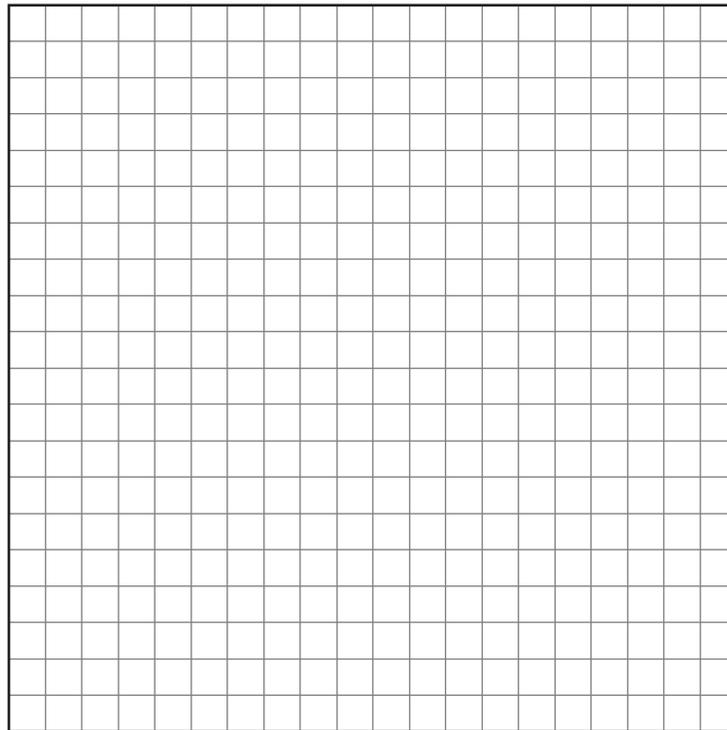

Work Space

Total percent change _____

Part C Make a line graph that shows the trend in the value of the stock at the close of the stock market on Monday, Tuesday, and Wednesday.

Be sure to include:

- a title for the graph
- labels for the axes
- appropriate and consistent scales
- accurately graphed data

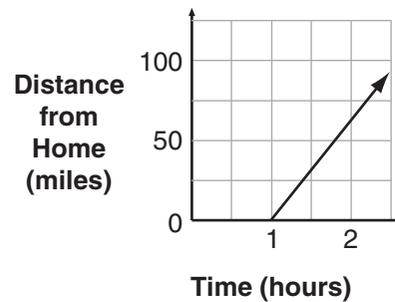

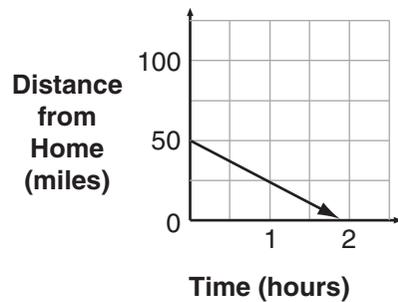

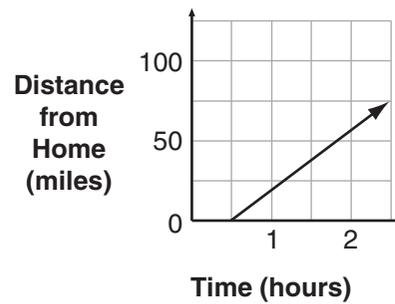

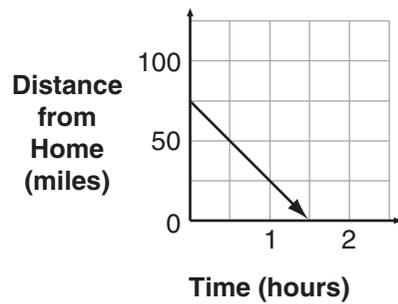

- 10** Each ship that passes through the Panama Canal requires about 52 million gallons of water to move the ship through the canal from the Atlantic Ocean to the Pacific Ocean.

If 36 ships passed through the canal, moving from the Atlantic Ocean to the Pacific Ocean, which is closest to the number of gallons of water that was required?

- F. 1.9×10^8 gallons
- G. 1.9×10^9 gallons
- H. 8.8×10^8 gallons
- I. 8.8×10^9 gallons

- 11** It took Myron 90 minutes, at an average rate of 50 miles per hour, to drive home from a business trip. Which of these graphs best represents Myron's drive home?

- 12** Louella runs a messenger service and must keep track of the gas mileage of each car. When she filled the gas tank of one car, she used a calculator to find the gas mileage. The calculator display read “23.355178.”

Which of these numbers most closely represents the gas mileage in miles per gallon?

F. 2.335×10^2

G. $\frac{24}{3}$

H. $23\frac{1}{3}$

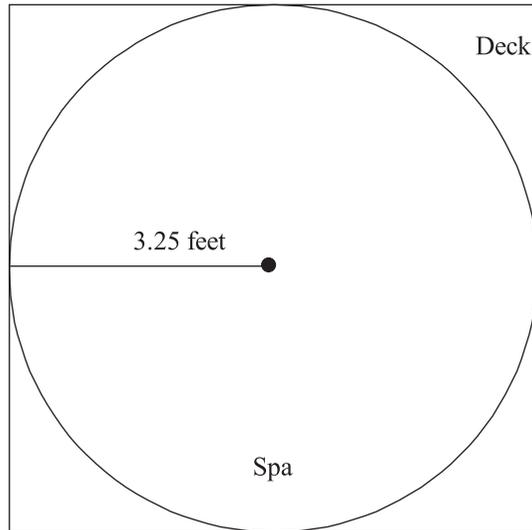

I. $\frac{2335}{1000}$

- 13** The sun travels along the Milky Way’s spiral arm at a rate of 250 kilometers per second. How far, in kilometers, will the sun travel in $3\frac{1}{2}$ minutes?

- 16** The Regal High Debate Club qualified for the state meet. How many possible two-member debate teams can be formed from a pool of six students in the Regal High Debate Club?

- A. 720
- B. 360
- C. 30
- D. 15

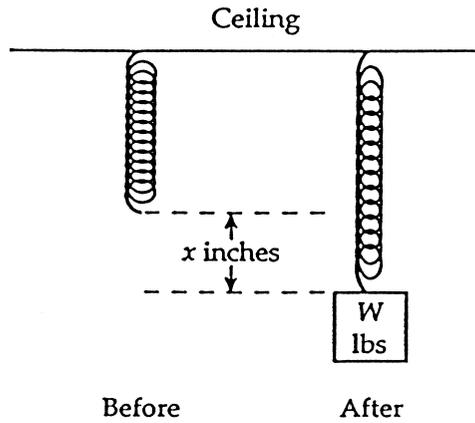

- 17 The four members of an a cappella singing group, two men and two women, always stand in a row when they sing. If they line up in random order, what is the probability that a woman will be at each end of the row?
- F. $\frac{1}{2}$
- G. $\frac{1}{6}$
- H. $\frac{1}{12}$
- I. $\frac{1}{24}$

- 18 Artists have traditionally studied human proportions to draw human figures realistically. When drawing a female figure like the one in this picture, the realistic ratio of the distance from the hip to the toe (x) to the height of the woman (y) is 0.613. An artist is creating a 9-inch-high drawing of a woman. What should be the approximate distance in inches from the hip to the toe?

- A. 0.07 inch
- B. 3.5 inches
- C. 5.5 inches
- D. 14.7 inches

- 19 When an object that weighs W pounds is hung from a spring, the spring stretches x inches, as shown in the picture below.

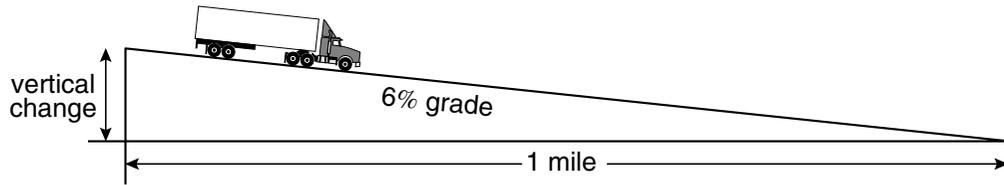

Use the equation below to determine how many inches the spring will stretch if an object weighing 5 pounds is attached to the end of the spring.

$$W = \frac{2}{3}x$$

- 22 An orange juice company sells a can of frozen orange juice that measures 9.4 centimeters in height and 5.2 centimeters in diameter.

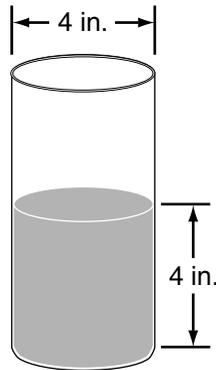

The company wants to sell a larger can of juice. The height of the can is kept at 9.4 cm, but the diameter is increased to 8.5 cm. About how many times more juice will the new can hold?

- F. 1.6 times as much
- G. 1.7 times as much
- H. 2.7 times as much
- I. 3.3 times as much

- 23 Frank plans to set up a fruit juice stand at the state fair. He will purchase 500 cans of juice for \$135, and he will charge \$2 for each can he sells. In addition to the cost of the juice, Frank will need to pay \$20 to set up the stand. Which of the following expressions could Frank use to find out how much money he could make, after expenses, for selling j cans of juice?

- A. $500j - 135 - 20$
- B. $135j - 500 - 20$
- C. $2j - 500 - 20$
- D. $2j - 135 - 20$

- 24 A scientist studying global warming conducted an experiment in her lab. She poured 4 inches of water into a cylinder as shown below.

According to her study, the volume of water in the cylinder should rise by 0.1% when she raises the water temperature by 10 degrees. Which of these is closest to the volume of water in the cylinder **after** the temperature is raised 10 degrees?

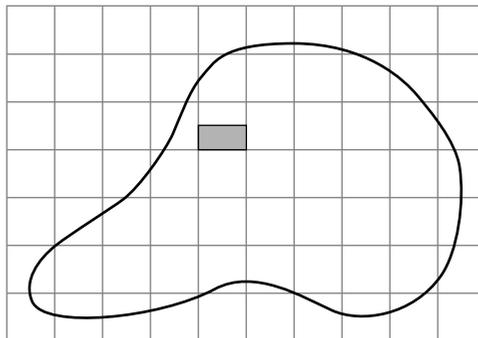

- F. 50.29 cubic inches
- G. 55.26 cubic inches
- H. 200.96 cubic inches
- I. 201.16 cubic inches

25 For the following problem, you will be required to use ESTIMATION strategies.

THINK
SOLVE
EXPLAIN

Luisa, a ranger at a desert preserve, is estimating the number of snakes in the preserve. She counted 25 snakes in a 0.5-square kilometer area as represented by the shaded area on the grid below. The total area of the preserve is also outlined on the grid.

DESERT PRESERVE MAP

 = 1 km²

If Luisa assumes the snakes are evenly distributed throughout the preserve, how many snakes should she ESTIMATE are in the entire preserve?

Show your work or explain in words how to make an estimate.

Estimate _____

- 26** Becky's 16th birthday is on September 4th. On the last day of February, she calculates how many more days there will be until her birthday by making the table below.

NUMBER OF DAYS UNTIL 16TH BIRTHDAY

Month	Number of Days
March	31
April	30
May	31
June	30
July	31
August	31
September	3

Which of the following expressions could Becky use to calculate the number of days there will be until her 16th birthday?

- A. $3 \times 31 + 3 \times 30 + 3$
- B. $3 \times 31 + 4 \times 30 + 3$
- C. $4 \times 31 + 2 \times 30 + 3$
- D. $4 \times 31 + 3 \times 30 + 3$

- 27 A geneticist studying twins read that fraternal twins occur in 1 out of every 80 births. In a sample of 560 mothers-to-be, how many would be expected to give birth to fraternal twins?

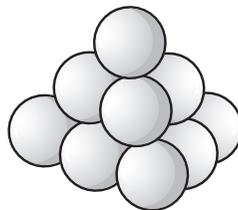

F. $\frac{1}{7}$

G. $\frac{1}{70}$

H. 7

I. 70

- 28 The pirates who plundered ships in the Caribbean Sea used cannons in their attacks. Cannonballs were stacked on the deck in a square pyramid like the one shown below. The top layer had 1 ball, the second layer had 4 balls, and the third layer had 9 balls.

If the pyramid were 5 layers high, how many cannonballs would be in the **fifth** layer?

A. 25

B. 39

C. 44

D. 55

29

At the surface of the ocean, a scuba diver's pressure gauge reads zero pounds per square inch (psi). At 33 feet below the surface of the ocean, the pressure is 14.7 psi. At 66 feet below the surface, the pressure is 29.4 psi. The table below shows the relationship between depth and pressure.

PRESSURE AT GIVEN DEPTHS

Depth (in feet)	Pressure (in psi)
0	0
33	14.7
66	29.4
99	

If the pressure increases at a constant rate, what will be the pressure in psi at 99 feet?

- 30 A fishing boat captain organized his fishing records in the table below.

APRIL FISHING RECORDS

Type of Fish	Cost per Pound	Pounds Sold	Total Dollars Earned
Snapper	\$5.50	s	\$8,250.00
Grouper	\$4.75	g	
Total		2,600	\$13,475.00

The following equations represent the information in the table, where s is the number of pounds of snapper and g is the number of pounds of grouper.

$$s + g = 2,600$$

$$5.50s + 4.75g = 13,475$$

The captain used these equations to determine that \$8,250.00 was received from the sale of the snapper. How many pounds of grouper, g , were sold in April?

31

The drama club plans to sell cans of orange soda and lemon-lime soda at its annual theater event. The club has enough money to buy a total of 288 cans of soda and has decided to buy twice as many cans of lemon-lime soda as orange soda.

THINK
SOLVE
EXPLAIN

Determine the number of cans of each flavor of soda the drama club will buy for the event. Show your work.

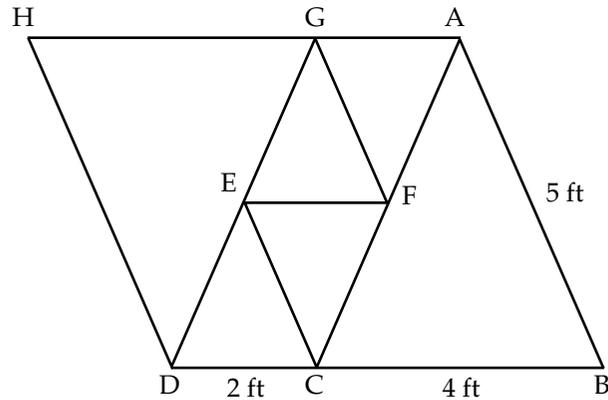

Number of cans of orange soda _____

Number of cans of lemon-lime soda _____

32

THINK
SOLVE
EXPLAIN

An architect is using **isosceles triangles** in the design of a bridge. In the diagram below, all line segments represent the steel beams needed to build this section of the bridge. Line segment \overline{HA} is parallel to line segment \overline{DB} . $\triangle DEC$ is similar to $\triangle CAB$ and congruent to $\triangle AFG$.

Part A Write and solve a proportion to determine the length, in feet, of \overline{EC} . Show your work.

Proportion _____

Length, in feet, of \overline{EC} _____

Part B In the diagram, all the smaller triangles are congruent, and all the larger triangles are congruent. Determine the total length, in feet, of all the steel beams needed to build the section of the bridge shown. Show all of the work needed to determine the total length of the beams.

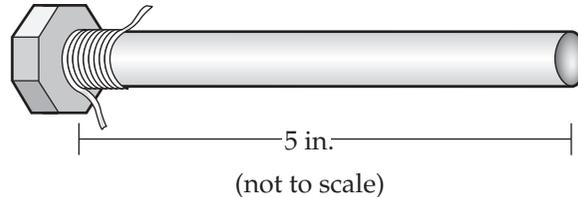

Total length in feet _____

- 33** On December 17, 1903, Wilbur and Orville Wright flew their first powered airplane near Kitty Hawk, North Carolina. They flew the plane a distance of 852 feet in 59 seconds.

If the Wrights' plane had continued at the same rate of speed, about how many **minutes** would it have taken them to fly 1 mile?

- F. 6 minutes
- G. 9 minutes
- H. 14 minutes
- I. 90 minutes

- 34** Jenny is making an electromagnet by wrapping wire around an iron bolt, as shown in the picture below.

The wire is 0.1 inch in diameter so each wrap is 0.1 inch wide. If Jenny makes one wrap every 3 seconds, how many **seconds** will it take to wrap the 5-inch bolt?

- A. 16.7 seconds
- B. 30.0 seconds
- C. 150.0 seconds
- D. 166.7 seconds

- 35 The table lists 4 stars and their approximate distances from Earth.

APPROXIMATE DISTANCE FROM EARTH

Star	Distance (in km)
Star Q	4.2×10^{15}
Star R	3.9×10^{15}
Star S	1.2×10^{16}
Star T	9.0×10^{14}

Which star is the greatest distance from Earth?

- F. Star Q
- G. Star R
- H. Star S
- I. Star T

- 36 Arturo was evaluating some formulas as part of a science experiment.

What is the value of the following expression?

$$(-2.1)^2 + (-0.5)^3$$

A nutritionist has a female client who has been inactive, but plans to begin swimming one hour each day. This change in her level of activity will result in her daily energy requirement increasing by the same amount she expends swimming. According to the information below, what will be the woman's new daily energy requirement in kilojoules (kJ) after she begins swimming one hour each day?

AVERAGE DAILY ENERGY REQUIREMENT

Subject	kJ/day
Infant, 9–12 months	4200
Child, 8 years	8770
Boy, 15 years	12 560
Girl, 15 years	9560
Woman (inactive)	7950
Man (inactive)	10 460

ENERGY EXPENDED DURING CERTAIN ACTIVITIES (in kJ per hour)

39 A graphic artist is creating a brochure according to the following specifications.

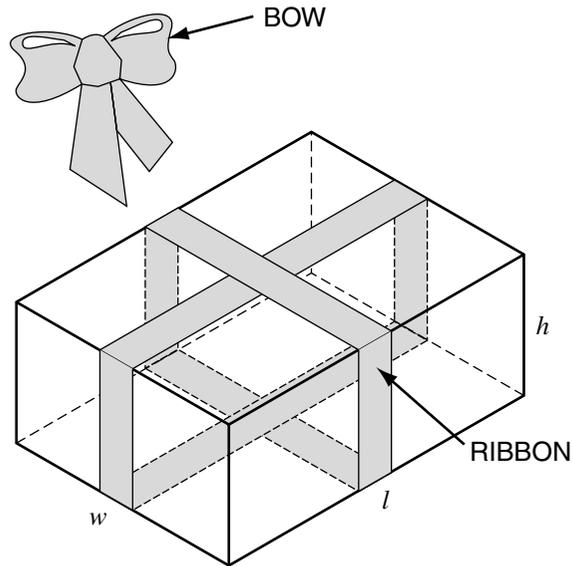

- The length of the brochure is 21 centimeters.
- The text must start 3 centimeters from the top of the brochure.
- The total amount of space the text occupies must not exceed one-third of the total length of the brochure.

What is the maximum distance in centimeters (cm) between the top of the brochure and the end of the text?

- 40 Sonya needs to buy ribbon to wrap around the rectangular-shaped present shown.

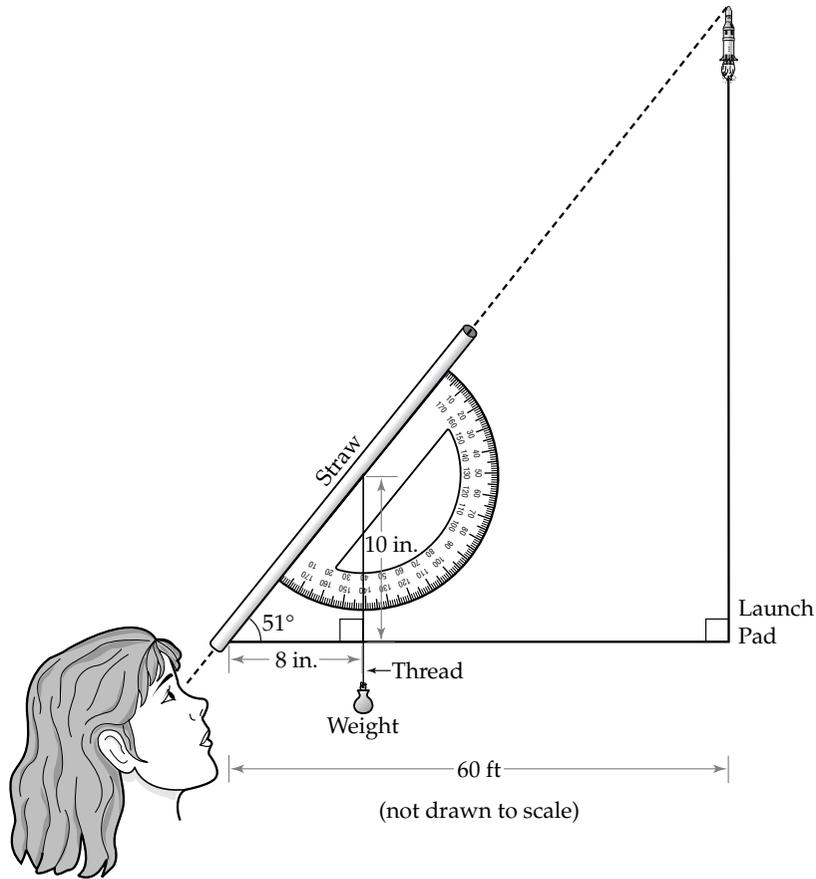

She also needs 25 inches of ribbon to make a bow. Which expression represents the minimum amount of ribbon Sonya needs to buy?

- A. $l + w + h + 25$
- B. $l \times w \times h + 25$
- C. $2l + 2w + 2h + 25$
- D. $2l + 2w + 4h + 25$

- 41** Rita designs and tests model rockets. She made a device that allows her to measure the angle of the rocket's elevation at the peak of its path.

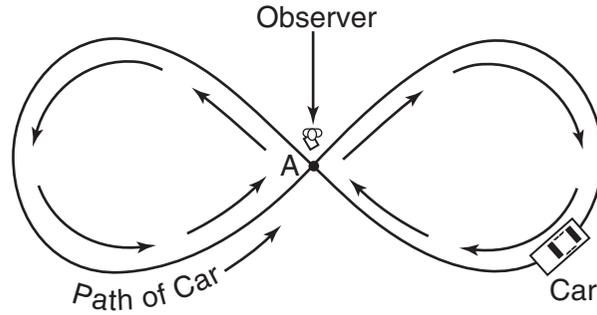

During one test, she used the device at a point 60 feet from the launch pad. When the rocket reached the peak of its path, the measurements on Rita's device were as shown in the diagram below.

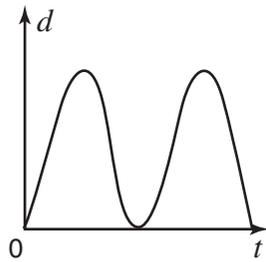

Based on Rita's measurements, what was the approximate height, in feet, that the rocket reached at the peak of its path?

- F. 48 feet
- G. 75 feet
- H. 96 feet
- I. 128 feet

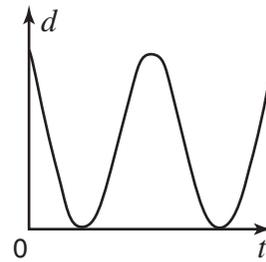

- 42 An observer stood at the intersection of a figure-eight racetrack. The diagram shows the observer and a single car as it started at point A next to the observer and traveled once around the track and returned to point A .

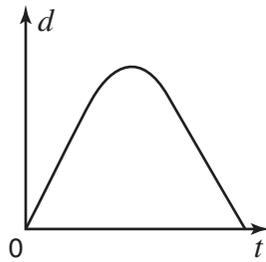

Which graph best shows d , the distance of the car from the observer as it traveled t seconds around the track?

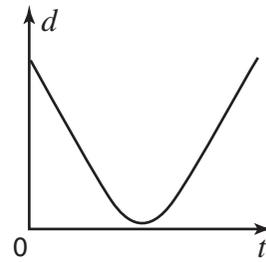

A.

C.

B.

D.

The course of the monorail at an amusement park must be changed to make room for a new parking lot. Engineers have decided that only the main supporting column located at point C on the grid below should be relocated. They have also decided that the rebuilt course should be in the shape of a parallelogram.

Part A Plot the new location of the supporting column and write its coordinates. Label the new location C'.

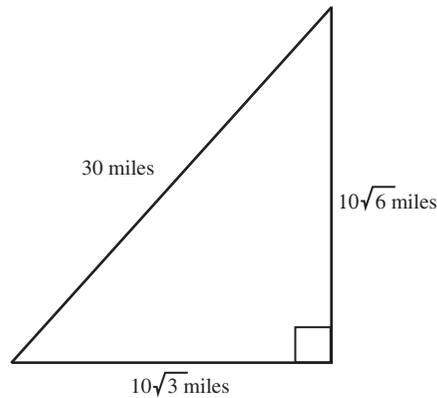

Part B Use the definition or properties of a parallelogram to verify that the new monorail course is a parallelogram. You must use the slopes of the sides, the lengths of the sides, or both, to help verify your answer.

- 46 The dimensions and shape of a volleyball court are shown in this picture. What is the approximate distance of a serve that is hit diagonally from one corner of the court to the other?

- 47 The dimensions of a right triangle are shown below.

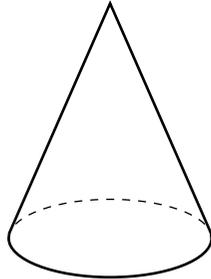

The ratio of the base of the triangle to its height is $\frac{10\sqrt{3}}{10\sqrt{6}}$.

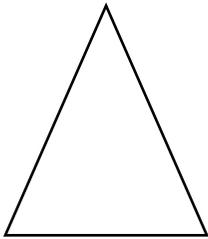

Which of the following is equivalent to $\frac{10\sqrt{3}}{10\sqrt{6}}$?

- A. $\frac{1}{2}$
- B. $\frac{\sqrt{2}}{2}$
- C. $\sqrt{2}$
- D. $\frac{2}{\sqrt{2}}$

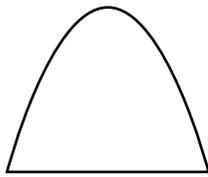

- 48 The figure below is a right circular cone.

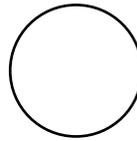

Which of the following is NOT a planar cross-section from the right circular cone?

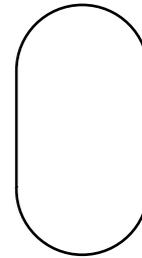

F.

G.

H.

I.

- 49 A salesperson's total salary includes a base pay of \$500 per month plus 8.5% of the monthly sales. If x = sales per month and y = total salary, which of the following shows how to determine the total salary for any month?

- A. $500 - y = 0.085x$
- B. $y = 500 + 0.085x$
- C. $y = -500 - 0.085x$
- D. $-0.085x + y = -500$

- 50 Every year in the Chinese calendar is named for an animal. Each year in the table below has been designated as a “Year of the Ox.”

SOME CHINESE CALENDAR
YEARS OF THE OX

Year
1973
1985
1997
2009

If n represents any “Year of the Ox,” which of the following expressions represents the **previous** “Year of the Ox”?

- F. $n - 12$
G. $n + 12$
H. $12n$
I. $\frac{n}{12}$
