MEMORANDUM

TO: Selected Occupational Education Deans Electronics Engineering Technology

FROM: Loretta Costin, Chancellor 

SUBJECT: Electronics Engineering Technology AAS/AS Framework Update

Section 1004.92, Florida Statutes, defines the Florida Department of Education's responsibility for career education as, "The development of program standards and industry-driven benchmarks for career, adult, and community education programs, which must be updated every 3 years."

Pursuant to this statute a Program Review Committee, comprised of members from industry and education, has reviewed the Electronics Engineering Technology degree framework and recommended certain changes which will align the educational program with today's industry standards.

The attached document is the revised Electronics Engineering Technology framework with the suggested changes noted in red. Comments concerning the proposed changes should be sent to eric.owens@fldoe.org and will be accepted through November 8, 2010. All comments received will be addressed prior to submitting the framework to the State Board of Education for final approval in March 2011.

Thank you for your participation in this program review and revision process.
