Career and Professional Education Act Enrollment and Performance Report, 2014-15

Florida Department of Education
Division of Career and Adult Education
Rod Duckworth, Chancellor

December 2015

At a Glance

In academic year 2014-15, the eighth year of implementation of the Florida Career and Professional Education (CAPE) Act, school districts registered 1,662 high school and 216 middle school career and professional academies, representing 61 of Florida's school districts as well as the Florida Virtual School, Florida State University School and Florida A&M University School. In addition, the CAPE Act was amended in 2012-13 to include career-themed courses. School districts registered 954 unique career-themed courses, representing all 67 of Florida's school districts, as well as the Florida Virtual School, Florida A&M University Laboratory School and Florida State University Laboratory School. This study found the following regarding enrollment patterns and student performance.

- The most frequent career cluster represented by academies was Information Technology with 289 registered high school and middle school academies followed by Arts, A/V Technology and Communication with 260 academies.
- High school CAPE participants were most likely to be ninth-graders and middle school CAPE participants were most likely to be eighth graders.
- The distribution of students by race and gender among CAPE participants was similar to that of non-academy students.
- In the 2014-15 school year, 58,576 CAPE participants earned 62,534 certifications with a passing rate of 69.7 percent.
- In the 2014-15 school year, 3,730 students earned 3,952 CAPE digital tools with a passing rate of 67.9 percent.
- Middle school and high school CAPE participants had higher average GPAs than their non-CAPE counterparts.
- Middle school and high school CAPE participants were less likely to have been chronically absent than their non-CAPE counterparts.
- There was no clear pattern indicating that CAPE participants were more or less likely to have been subjected to disciplinary action than non-CAPE students.
- High school CAPE participants were less likely to have dropped out of school than non-CAPE students.
- Students who earned a certification were more likely to take Advanced Placement or dual enrollment courses than students who did not earn a certification.
- The earning of industry certifications and, in some instances, CAPE participation are correlated with higher student performance among high school students.
- Academy students who graduate with an industry certification outperform the academy students who graduate without an industry certification, with a higher placement rate in employment or postsecondary education.

Introduction

According to section 1003.492(5), Florida Statutes (F.S.), the Florida Department of Education (FDOE) shall conduct an annual analysis of student participation and performance in industry certified secondary career and technical education programs authorized by the CAPE Act. Performance indicators for students enrolled in career and professional academies (also referred to as CAPE academies or simply academies in this report) and students enrolled in career-themed

courses include, but are not limited to, graduation rates, retention rates, Florida Bright Futures Scholarship awards, additional educational attainment, employment records, earnings, industry certification, return on investment and employer satisfaction. The results of this study shall be submitted to the President of the Senate, the Speaker of the House of Representatives, and the Governor annually by December 31.

Background

In 2007 the Florida Legislature passed the CAPE Act. The purpose of the act was to provide a statewide planning partnership between the business and education communities in order to attract, expand and retain targeted, high-value industry and to sustain a strong, knowledge-based economy. The objectives of the act are as follows:

- To improve middle and high school academic performance by providing rigorous and relevant curriculum opportunities;
- To provide rigorous and relevant career-themed courses that articulate to postsecondary-level coursework and lead to industry certification;
- To support local and regional economic development;
- To respond to Florida's critical workforce needs; and
- To provide state residents with access to high-wage and high-demand careers.

To implement the legislation, the CAPE Act created statewide partnerships among the FDOE, the Florida Department of Economic Opportunity (FDEO) and CareerSource Florida. Section 1003.491(2), F.S., requires that each district school board develops a three-year strategic plan to address and meet local and regional workforce demands. This plan must be developed in collaboration with a district's local workforce board and local postsecondary institutions. A required element in this plan was the provision for at least one operational career and professional academy per school district, pursuant to s. 1003.492(2), F.S., by the beginning of the 2008-09 school year. Beginning with the 2012-13 school year, the academy requirement was replaced with a requirement that each school district shall offer at least two career-themed courses.

Career and Professional Academies and Career-themed Courses

A career and professional academy is a research-based program that integrates a rigorous academic curriculum with an industry-specific curriculum aligned directly to priority workforce needs established by regional workforce boards or FDEO.

A career-themed course is a course or a course in a series of courses that leads to an industry certification on the Industry Certification Funding List. A career-themed course is designed to have an industry specific curriculum aligned to priority workforce needs established by regional workforce boards or FDEO.

According to s. 1003.493(4), F.S., each career and professional academy and secondary school providing a career-themed course must:

- 1) Provide a rigorous standards-based academic curriculum integrated with a career

- curriculum;
- 2) Include one or more partnerships with postsecondary institutions, businesses, industry, employers, economic development organizations or other appropriate partners from the local community;
 - 3) Promote and provide opportunities for students to earn, at a minimum, the Florida Gold Seal Vocational Scholars award pursuant to s. 1009.536, F.S.;
 - 4) Provide instruction in careers designated as high skill, high wage, and high demand by the regional workforce development board, the chamber of commerce, economic development agencies or the FDEO;
 - 5) Deliver academic context through instruction relevant to the applicable career, including intensive reading and mathematics intervention;
 - 6) Offer applied courses that combine academic content with technical skills; and
 - 7) Provide instruction resulting in competency, certification or credentials in workplace skills.

Districts are required to annually register with FDOE career and professional academies and career-themed courses that meet the requirements of s. 1003.493, F.S., during registration windows. Superintendents certify that each registered academy and career-themed course meets all of the requirements in statute.¹

Industry Certifications

A key component of this act is a focus on industry certifications that are critical to Florida's employers. Industry certification is defined in Florida Statutes as follows:

Industry certification as used in this section is a voluntary process through which students are assessed by an independent, third-party certifying entity using predetermined standards for knowledge, skills, and competencies, resulting in the award of a credential that is nationally recognized and must be at least one of the following: within an industry that addresses a critical local or statewide economic need; linked to an occupation that is included in the workforce system's targeted occupation list; or linked to an occupation that is identified as emerging.²

The act required that FDOE "develop and adopt rules for implementing an industry certification process" as an essential element of implementing the new law. For the 2014-15 year, the process described in Rule 6A-6.0573, Florida Administrative Code, included two stages. In the first stage, CareerSource Florida produces a list of recommended industry certifications that ensure skill proficiency, address emerging labor market and industry needs, and are based on the highest available national standards. This list is reviewed and approved by the CareerSource Florida board and must be annually published according to the requirements of s. 1003.492(2), F.S. This list is published annually on March 1.

¹ 6A-6.0573 (14), Florida Administrative Code

² Section 1003.492 (2), Florida Statutes

From this list of recommended industry certifications, FDOE develops the CAPE Industry Certification Funding List in the second stage of the process. This list is a subset of the CareerSource Florida Board recommendations and is based on the following criteria.

- 1) The certification must be achievable by a secondary student.
- 2) The certification must require a minimum of 150 hours of instruction.

Additionally, the Florida Department of Agriculture and Consumer Services (DOACS) may recommend industry certifications for farm occupations.

Funding Incentives

For each student enrolled in a registered career-themed course who earns a certification on the Industry Certification Funding List, the district of instruction may earn add-on full-time equivalent (FTE) student membership for the following year's funding calculation in the FEFP.³ Certifications earned through dual enrollment are not eligible for additional FTE. For 2014-15, amendments to the statutes resulted in several types of fundable certificates, certifications, or courses. The following table provides a summary of these fundable activities:

Type of Certification/ Certificate/Course	Description	Funding Weight
CAPE Digital Tool Certificates	These are assessments of digital skills in the following areas: word processing; spreadsheets; sound, motion, and color presentations; digital arts; cybersecurity. The certificates are available to students in elementary school and middle school grades.	0.025 FTE
CAPE Industry Certifications	These are industry certifications that do not articulate for college credit or do articulate for up to 14 college credits based on a statewide articulation agreement. ⁴ The certifications are available to students in grades 6 through 12.	0.1 FTE, OR 0.2 FTE for those with 1-14 articulated credits
CAPE Acceleration Industry Certifications	These are industry certifications that articulate for 15 or more college credit credits based on a statewide articulation agreement.	0.5 FTE for certifications with 15- 29 articulation credits, 1.0 FTE for certifications with 30 or more articulated credits
CAPE Innovation Courses	These courses combine academic and career performance outcomes with embedded industry certifications.	0.3 FTE

³ Section 1011.62(1)(o), Florida Statutes

⁴ Gold standard articulation agreements are approved by the State Board of Education in Rule 6A-10.0401, F.A.C. A gold standard articulation agreement provides articulated course credit towards specific Associate in Applied Science (AAS), Associate in Science (AS) and College Credit Certificate (CCC) programs.

CAPE Industry Certifications and CAPE Acceleration Industry Certifications must be earned in career-themed courses to be eligible for funding. Funding for CAPE Digital Tool Certificates is not dependent upon enrollment in a career-themed course or academy. For CAPE Innovation Courses, funding is based upon successful completion of the industry certification exam and earning college credit from academic exam (Advanced Placement for the courses implemented to date).

Elementary and middle school students are capped at 0.1 FTE per fiscal year for the CAPE additional FTE calculation. The 2014-15 activity will be funded with above categories and funding weights in the 2015-16 FEFP.

The 2014-15 FEFP calculation for add-on FTE for industry certifications was based upon 2013-14 data reporting and was funded based upon the funding categories and weights on the 2013-14 Industry Certification Funding List. For 2014-15, students enrolled in career-themed courses who earned industry certification generated 9,487.10 additional FTE in the K-12 funding formula. The estimated value of this FTE in the FEFP calculation is about \$38.3 million.

Accountability

An accountability mechanism included in the act requires that the three-year strategic plan must be amended to include specific strategies to improve the passage rate if 50 percent of students taking industry certification exams in a career and professional academy or career-themed course do not pass the exam. The law was amended in 2012, striking requirements related to specific pass rates required to enroll new students in existing courses.

Rule 6A-6.0573, F.A.C., Industry Certification Process, was amended and approved by the State Board of Education in September 2014 to include new test administration procedures. The rule was further amended and approved by the State Board of Education in August 2015 which reduced the minimum number of days between test administrations from 30 days to 20 days.

To report industry certifications, the following procedures must be followed for all written examinations:

- Exam is not proctored by the individual providing the direct instruction for the industry certification or certificate, except under extremely limited conditions.
 - If only one individual is approved by the certifying agency as a proctor, the teacher may proctor the exams and must be independently monitored by a second individual who does not provide direct instruction for the industry certification content to the individuals taking the test(s).
- Exam questions are delivered in a secure manner and paper-based tests are not available to the proctor for an extended period of time.
- Exam is scored by certifying agency (cannot be scored by anyone at the district).
- Exam is administered in accordance with the certifying agency procedures.
- Exam must not have been administered more than 3 times during the academic year with a minimum of 20 days between test administrations.

Middle School Academies and Career-themed Courses

Changes to the law in 2012 required each school district to plan the development of at least one middle school CAPE academy or career-themed course.⁵ Middle school academies and career-themed courses must

- 1) Be aligned with at least one high school CAPE academy or career-themed course offered in the district and maintain partnerships with local business and industry and economic development boards;
- 2) Provide instruction in courses leading to careers in occupations designated as high skill, high demand and high wage;
- 3) Integrate content from core subjects;
- 4) Integrate career content with intensive reading and mathematics;
- 5) Maximize opportunities for students to earn high school credit;
- 6) Provide access to virtual instruction courses;
- 7) Provide instruction from teachers certified in the career subject matter;
- 8) Offer externships; and
- 9) Provide personalized student advisement.

CAPE Digital Tool Certificates

Sections 1003.4203 and 1008.44, F.S., authorized a new type of certificate, called CAPE Digital Tool Certificates, available to students in elementary and middle grades. These certificates are eligible for an additional 0.025 full-time equivalency (FTE) membership in the Florida Education Finance Program (FEFP). CAPE Digital Tool Certificates are described in s. 1003.4203, F.S., as “targeted skills to be mastered for the certificate include digital skills that are necessary to the student’s academic work and skills the student may need in future employment.” FDOE is responsible for identifying up to 15 CAPE Digital Tool Certificates for the CAPE Industry Certification Funding List in the areas of word processing; spreadsheets; sound, motion, and color presentations; digital arts; cyber security; and coding each academic year.

For the 2014-15 CAPE Industry Certification Funding List, the State Board of Education approved 13 certificates, of which nine of these certificates were attempted and earned. These certificates will be included in the FEFP calculation in 2015-16.

CAPE Innovation Courses

Sections 1003.4203 and 1008.44, F.S., authorized a new type of course which combines academic and career content with performance expectations that will result in college credit and industry certification attainment. According to the statutory framework, each approved CAPE Innovation Course must have at least two third-party assessments, one of which must be associated with an industry certification on the CAPE Industry Certification Funding List. These courses are eligible for an additional 0.3 FTE membership in the FEFP.

⁵ Section 1003.4935, Florida Statutes

For the 2014-15 academic year, FDOE identified a single CAPE Innovation Course for pilot implementation with select districts. This course paired the Microsoft Office Specialist Excel certification with the Advanced Placement (AP) course in Microeconomics. All CAPE Innovation Courses that are partnered with AP course content use the current College Board AP course descriptions and require AP teachers to deliver a series of activities that emphasize applied learning of the AP content. The goal of this unique instructional approach is to prepare students for success on AP exams while learning new knowledge and skills associated with CAPE Industry Certifications. Three additional CAPE Innovation Courses were developed in 2014-15 for implementation in 2015-16.

Scope

With the introduction of career-themed courses, it is possible for a student to exclusively be enrolled in an academy, exclusively enrolled in a career-themed course or to be enrolled in an academy and career-themed course. Beginning with the 2013-14 year, only students enrolled in career-themed courses are eligible for add-on full-time equivalent (FTE) student membership for certifications earned. For this reason, in the majority of instances, students are found enrolled in at least one career-themed course. For the purposes of this report, CAPE participants include all students who met the criteria above. This analysis addresses the following questions.

- 1) How many career and professional academies and career-themed courses are there, and where are they located?
- 2) What are the characteristics of CAPE participants?
- 3) How many and what type of industry certifications have CAPE participants earned?
- 4) How did CAPE participants perform academically compared to other students?
- 5) What were the postsecondary and employment placement outcomes for CAPE participant graduates?

Method

Data were extracted from FDOE Student Information System for academic year 2014-15 (Survey 5 as of October 12, 2015).⁶ Data on career and professional academy characteristics are from FDOE academy registration database. Data on schools housing academies and career-themed courses was obtained from the Florida School Indicators Report. Data on employment and postsecondary enrollment were obtained from the Florida Education and Training Placement Information Program (FETPIP). For the purposes of this report, a CAPE participant is a student who was enrolled in a registered career-themed course or an academy. Students reported earning CAPE Digital Tool Certificates were not included as CAPE participants.

⁶ Career and professional academy students were identified using the *Career and Professional Academy Identifier* data element (#107775). Career-themed courses were identified using Appendix FF.

Findings

Profile of Career and Professional Academies and Career-themed Courses

In academic year 2014-15, 1,662 high school career and professional academies were registered in Florida, and 1,254 (75.5 percent) of these academies reported student enrollments. In 2014-15, there were 216 registered middle school academies, and 131 (60.6 percent) of these academies reported student enrollments. All but six of Florida's 67 school districts registered at least one career and professional academy with FDOE. The five districts with the most registered academies (high school and middle school) were Hillsborough (242 academies), Miami-Dade (213), Broward (167), Palm Beach (112) and Polk (105).

In academic year 2014-15, 954 unique career-themed courses were registered in Florida. All of Florida's 67 school districts registered at least one career-themed course with FDOE and there were 345,847 students who were enrolled in at least one career-themed course. The five districts with the most registered courses were Miami Dade (369), Palm Beach (352), Pinellas (320), Manatee (300) and Polk (277). Tables 1a and 1b show the distribution trend of Florida's registered career and professional academies and career-themed courses and enrollment by school district.

⁷ Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

⁸ Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

⁹ Unduplicated count of registered courses by district. Courses were reported at the school of instruction level. If the same course was registered at more than one school in a district, it was only included once.

¹⁰ Unduplicated count of students enrolled in at least one career-themed course. If the district of instruction and the district of enrollment were different, students are reported in their district of enrollment.

¹¹ Unduplicated count of students enrolled in at least one registered academy.

¹² Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the student and district. Students are counted more than once if they are reported in more than one district during the academic year.

Of the 406,343 participants, eighty-four percent are enrolled in at least one career-themed course. Thirty-eight percent of participants enrolled in a career-themed course are also enrolled in at least one academy. Sixteen percent of CAPE participants are only found enrolled in an academy.

Academy Curriculum

The curricular foci of registered academies fall under specific career clusters. A career cluster is a broad group of related occupations based on commonalities in knowledge and skills required to perform job tasks. The most frequent career cluster represented by academies registered in academic year 2014-15 was information technology with 237 high school and 26 middle school academies (see Table 2). The second most frequent cluster represented was health sciences with 210 high school and four middle school registered academies.

¹³ Unduplicated count of students enrolled in at least one career-themed course and enrolled in no academies.

¹⁴ Unduplicated count of students enrolled in at least one registered academy and enrolled in no career-themed courses.

¹⁵ Unduplicated count of students enrolled in at least one registered academy and at least one career-themed course.

¹⁶ Unduplicated count of students enrolled in either a registered academy or career-themed course. Students are counted more than once if they are reported in more than one district during the academic year.

Source: Career and Professional Academy Registration Database

In academic year 2014-15, there were 345,847 CAPE participants in grades 9-12, representing 38.7 percent of the entire high school population.¹⁷ There were 60,209 CAPE participants in grades 6-8 representing 9.1 percent of the middle school population. The distribution of high school CAPE participants was relatively similar among all grade levels with the highest population in ninth grade. Compared with high school participants, middle school CAPE participants represented less than 14.9 percent of the overall CAPE participants with the highest enrollment in eighth grade (see Table 3).

¹⁷ Based on data from the FDOE Student Information System as of October 12, 2015.

Table 3
Headcount by Grade Level of CAPE Participants¹⁸ and Non-CAPE Participants¹⁹, 2014-15

Demographic Profile

Table 4 shows that the distribution of CAPE participants (high school and middle school) by race/ethnicity and gender categories was similar to that of non-CAPE participants. Among CAPE participants, slightly more were male (53.7 percent) than female (46.3 percent). Over forty-five percent of CAPE participants were White, and the largest minority populations were Hispanics (27.6 percent) and Black (20.8 percent). Compared to CAPE participants, a slightly lower percentage of non-CAPE participants were White (39.9 percent), and a slightly higher percentage were Hispanic (30.7 percent) and Black (23.3 percent).

¹⁸ Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

¹⁹ Includes students who were not reported enrolled in a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

Table 4
Distribution of CAPE Participants²⁰ and Non-CAPE Participants²¹ by Gender and Race/Ethnicity, 2014-15

Performance

This section addresses the performance of students enrolled in career and professional academies and career-themed courses. The indicators addressed include the following:

- 1) The number and percentage of CAPE participants obtaining industry certifications;
- 2) Cumulative grade point average of CAPE and non-CAPE participants;
- 3) Student engagement indicators of CAPE and non-CAPE participants, including chronic absenteeism, disciplinary actions and dropout rates; and
- 4) Postsecondary readiness as indicated by the percentage of CAPE and non-CAPE participation in Advanced Placement and dual enrollment courses and eligibility for Florida Bright Futures Scholarships.²²

Performance levels on these indicators are reported at the aggregate state-level, summing up all CAPE and non-CAPE participants statewide. Performance levels for schools with CAPE participants can be found in Appendix B.

Industry Certification

Among the 406,056 CAPE participants, a total of 89,750 industry certifications on the Industry Certification Funding List were attempted by CAPE participants in 2014-15, of which 62,534 were passed, resulting in a pass rate of 69.7 percent. Among the 131 different certifications earned by CAPE participants, the top three were Adobe Certified Associate (Photoshop), Microsoft Office Specialist (MOS) Bundle and Adobe Certified Associate (Dreamweaver) (see Table 5a).

²⁰ Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

²¹ Includes students who were not reported enrolled in a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

²² Data was not available at the time this report was published.

Among the 89,750 certification attempts by CAPE participants, certifications weighted 0.1 was most commonly attempted representing 54.3 percent of attempts followed by weight-level 0.2, which represented 45.5 percent of all certification attempts by CAPE participants.

The higher the grade level of CAPE participants, the greater the number of industry certifications earned. The majority of certifications (53.6 percent) were earned by eleventh and twelfth grade students. Twenty-nine percent of industry certifications earned by CAPE participants were awarded to twelfth graders (see Table 6). Among ninth-graders, 12,629 certifications were earned, representing 20.2 percent of total certifications reported. The progression in the number of certifications as grade level increases is expected given the time and training required to earn industry certifications.

Table 6
Industry Certifications Earned by Grade Level of CAPE Participants²⁴, 2014-15

Grade Level	CAPE Industry Certifications Earned	CAPE Acceleration Industry Certifications Earned	Total CAPE Certifications Earned	Percent
6	90	0	90	0.1%

Table 7a shows the distribution of earned certifications by school district. Palm Beach reported the highest number of reported certifications with 7,307, which represented 11.7 percent of all certifications reported in the state for CAPE participants. Second highest was Miami Dade with 6,764 certifications, or 10.8 percent; followed by Broward with 4,399 certifications, or 7.0 percent.

Table 7b shows the distribution of earned digital tool certificates by school district. St. Johns reported the highest number of reported digital tools with 1,029, which represented 26.0 percent of all digital tool certificates reported. Second highest was Polk with 606 digital tool certificates, or 15.3 percent; followed by Orange with 354 digital tool certificates, or 9.0 percent.

The 62,534 industry certifications earned by CAPE participants represent 95.3 percent of the 65,623 certifications earned in 2014-15. In addition, 3,089 industry certifications were reported as earned by non-CAPE participants representing 4.7 percent of the total number of certifications earned.

Grade Point Average (GPA)

Middle school CAPE participants in 2014-15 had a higher average cumulative GPA compared to the non-CAPE middle school population (see Table 8). High school CAPE participants had a higher average GPA than non-CAPE participants across all grade levels 9 through 12.

Table 8
Average Cumulative Grade Point Average of CAPE Participants²⁶ and Non-CAPE Participants²⁷ by Grade Level, 2014-15

School Level	Grade Level	CAPE Participants: GPA	Non-CAPE Participants: GPA
Middle School	6	3.32	2.97
	7	3.19	3.00
	8	3.09	2.92
High School	9	2.74	2.67
	10	2.76	2.64
	11	2.79	2.70
	12	2.87	2.82
All Grades		2.80	2.76

Source: FDOE Student Information System

²⁶ Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

²⁷ Includes students who were not reported enrolled in a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

Student Engagement

Career and professional academies and career-themed courses were conceived as a way to offer a relevant curriculum to students. Student engagement can be measured through rates of absenteeism, disciplinary actions, graduation and dropping out of school. Middle school CAPE participants were less likely to be chronically absent than non-CAPE middle school participants (see Table 9).²⁸ Among high schools students, which represents the vast majority of CAPE participants, chronic absenteeism was less prevalent than among non-CAPE participants across grades 9 through 12.

Table 9
Percentage of CAPE Participants²⁹ and Non-CAPE Participants³⁰ Chronically Absent by Grade Level, 2014-15

School Level	Grade Level	CAPE Participants: Chronically Absent	Non-CAPE Participants: Chronically Absent
Middle School	6	6.5%	7.4%
	7	8.4%	9.0%
	8	9.5%	10.7%
High School	9	10.6%	12.3%
	10	12.3%	15.0%
	11	14.6%	16.7%
	12	18.5%	21.5%

Source: FDOE Student Information System

²⁸ Chronically absent is defined as 21 or more unexcused absences for the academic year.

²⁹ Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

³⁰ Includes students who were not reported enrolled in a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

There is no consistent pattern when comparing the incidence of disciplinary actions between CAPE participants and non-CAPE students across grade levels. Overall CAPE participants were slightly less likely than non-CAPE students to have had disciplinary actions taken against them.

Table 10
Percentage of CAPE Participants³¹ and Non-CAPE Participants³² with Reported Disciplinary Actions by Grade Level, 2014-15

School Level	Grade Level	CAPE Participants: At Least One Disciplinary Action	Non-CAPE Participants: At Least One Disciplinary Action
Middle School	6	16.9%	15.6%
	7	18.1%	17.1%
	8	16.7%	17.5%
High School	9	17.4%	17.9%
	10	16.4%	17.5%
	11	15.0%	14.5%
	12	13.5%	10.3%

Source: FDOE Student Information System

³¹ Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

³² Includes students who were not reported enrolled in a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

CAPE participants were less likely to drop out than non-CAPE students, and CAPE participating seniors were more likely to graduate with a standard diploma than non-CAPE seniors. Among CAPE participating twelfth graders, 86.1 percent graduated with a standard diploma compared to 66.0 percent among non-CAPE 12th graders. The one-year dropout rate for academy students in grades 9-12 (0.8 percent) was 1.6 percentage points lower than that of non-CAPE students (see Table 11) and was lower across all grade levels.

Table 11
Percentage of CAPE Participants³³ and Non-CAPE Participants³⁴ Who Dropped out by Grade Level, 2014-15

School Level	Grade Level	CAPE Participants: Dropout Rate	Non-CAPE Participants: Dropout Rate
High School	9	0.5%	1.8%
	10	0.7%	1.9%
	11	0.8%	2.4%
	12	1.2%	3.6%
All Grades		0.8%	2.4%

Postsecondary Readiness and Employment

An important goal of the CAPE Act is to prepare students for postsecondary education by making them ready for the academic and technical work and giving them opportunities to earn postsecondary credit while in high school. An indicator of postsecondary readiness is enrollment in accelerated courses (i.e., Advanced Placement, dual enrollment, International Baccalaureate, and Advanced International Certificate of Education courses). Among CAPE participating high school students, 33.7 percent took one or more accelerated courses during the 2014-15 academic year. In comparison, the percentage for non-CAPE participant high school students was 30.8 percent.

Another indicator of readiness for success in postsecondary education is eligibility for the Florida Bright Futures Scholarship. The 2014-15 data were not available at the time this report was published.

³³ Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

³⁴ Includes students who were not reported enrolled in a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

Post-Graduation Outcomes

Placement data for the 2009-10, 2010-11, 2011-12 and 2012-13 graduate cohorts of CAPE participants and industry certification earners was available. These cohorts indicate that graduates who were CAPE participants and earned industry certifications are more likely to have been placed than the average CAPE participant graduate (see Table 12).³⁵ Because industry certification earners appear in the CAPE participant cohort and vice versa, firm conclusions cannot be drawn through this analysis alone, but the data do suggest that CAPE participation and, more clearly, industry certification, are correlated with and possibly influence positive post-graduation placement. Data for all high school graduates was not available at the time this report was published.

Table 12
Placement Rates of Three Cohorts of CAPE Participants³⁶ and Industry Certification Earner Graduates Compared to All High School Graduates

Year	High School Graduate Cohort	Found Employed or Enrolled in Postsecondary Education				
		Fall 2010	Fall 2011	Fall 2012	Fall 2013	Fall 2014
2009-10	All High School Graduates	79.8%	79.4%	77.4%	Not Available	Not Available
	CAPE Academy, No Certification	79.9%	79.9%	78.0%	76.8%	74.6%
	Academy with Industry Certification	83.5%	82.4%	80.8%	80.0%	75.7%
2010-11	All High School Graduates		80.1%	79.4%	78.0%	Not Available
	CAPE Academy, No Certification		80.3%	79.9%	78.6%	77.4%
	Academy with Industry Certification		84.2%	83.4%	82.3%	80.0%
2011-12	All High School Graduates			79.4%	79.1%	Not Available
	CAPE Academy, No Certification			80.3%	80.2%	79.0%
	Academy with Industry Certification			83.9%	82.9%	82.0%

	CAPE Academy, No Certification				80.9%	81.2%
	Academy with Industry Certification				83.5%	83.6%
2013-14	All High School Graduates					Not Available
	CAPE Academy, No Certification					81.6%
	Academy with Industry Certification					83.6%
	CTC, No Certification					80.3%
	CTC with Certification					82.8%

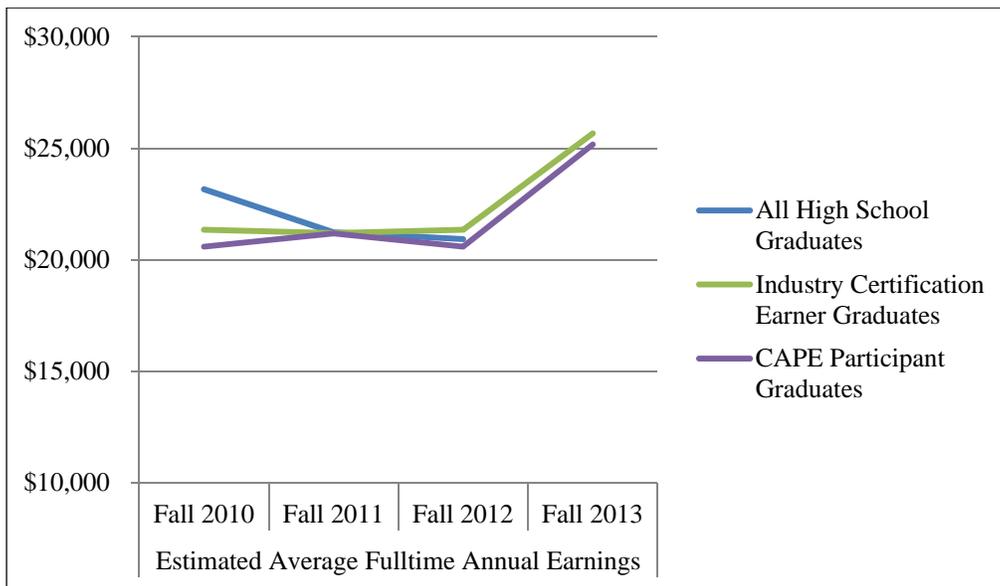

Sources: FDOE Student Information System and Florida Education & Training Placement Information System

³⁵ The outcome data have limitations. Regarding employment data, graduates employed outside the state of Florida would not be found unless they are in the military or working for the federal government. Some types of workers, e.g. self-employed, are not in the database. No assumptions can be made regarding occupation or wages. Regarding postsecondary placement, graduates enrolled outside the state would not be found.

³⁶ Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

Data on average earnings over time of high school graduates indicates that industry certification may be correlated with higher earnings than those of the overall high school population. Exhibit 1 below shows the average estimated earnings (based on one quarter of data) of 2009-10 high school graduates found employed and earning a total dollar amount greater than the equivalent of working 40 hours a week, for the full quarter earning the minimum wage. While academy and industry certification graduates initially earned less, on average, than the general high school population, by the third year industry certification earners surpassed the overall average.

Exhibit 1
Average Estimated Annual Fulltime Earnings of CAPE Participants³⁷, Industry Certification Earner, and All High School Graduates, 2009-10 Cohort³⁸

Sources: FDOE Student Information System and Florida Education & Training Placement Information System

³⁷ Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

³⁸ Data for the 2013 All High School Graduates follow-up was not available at the time this report was published.

Placement rates for 2013-14 graduates who had earned at least one industry certification are shown by certification earned in Table 13 below. This table includes all graduates who earned certifications regardless of whether they were a CAPE participant. The attached Appendix B includes a detailed table showing placement rates by the identified industry certification.

Table 13
Placement Rates of Industry Certification Earner High School Graduates by Certification Funding Weight, 2013-14 Cohort

Certification Funding Weight	Industry Certification Earner Graduates with Valid SSN	Number Found Employed or Enrolled in Postsecondary	Percent Found Employed or Enrolled in Postsecondary
0.1	16,160	13,599	84.15%
0.2	14,841	12,189	82.13%

Comparison of CAPE Participants to Industry Certification Earners

In Table 14 below, CAPE participants and their comparison group peers are disaggregated by industry certification attainment to isolate the characteristics of CAPE participants and industry certification earners independently. The table includes high school students only because four of the indicators are not relevant for middle school students (dropout, graduation, acceleration and Bright Futures eligibility). The table shows a general trend that, as one moves from the leftmost column (non-CAPE student without certification) to the rightmost column (CAPE student with certification), the performance indicators tend to improve with few exceptions. Both CAPE participants and non-CAPE students who earn certifications performed at a higher level than their non-certified peers.

Table 14
Performance by CAPE Participation³⁹ and Industry Certification Attainment, 2014-15,
Grades 9-12 Only

Performance Indicator	Non-CAPE, No Certification	CAPE, No Certification	Non-CAPE + Certification	CAPE + Certification	All High School Students + Certification	All High School Students, No Certification
Average GPA	2.72	2.74	3.04	3.09	3.08	2.73
Chronically Absent	17.8%	16.8%	9.1%	8.9%	8.9%	17.5%

Five-Year Trends

The number of registered career and professional academies grew from 246 in 2007-08 to 1,878 in 2014-15 (see Table 15). The percentage of Florida high school students enrolled in career and professional academies and career-themed courses grew from 2.2 percent to 38.7 percent. The number of CAPE participants earning industry certifications grew from 803 in 2007-08 to 58,576 in 2014-15. As CAPE participation increased, the pass rate of academy students taking certification exams dropped considerably from 85.7 percent in 2007-08 to 59.6 percent in 2009-10, but rose to 69.7 percent by 2014-15.

³⁹ Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

⁴⁰ Data was not available at the time this report was published.

Table 15
Five-Year Trends in Career and Professional Participation⁴¹ Data

Indicator	2007-08	2008-09	2009-10	2010-11	2011-12	2012-13	2013-14	2014-15

Return on Investment

As of the 2014-15 year, there were 109 industry certifications with State Board Approved Gold Standard Articulation Agreements of which 79 appear on the 2014-15 CAPE Industry Certification Funding List.⁴² A gold standard articulation agreement provides articulated course credit towards specific Associate in Applied Science (AAS), Associate in Science (AS) and College Credit Certificate (CCC) programs. For the certifications on the current CAPE Industry Certification Funding List, the available articulated credit ranged from one credit hour to 36 depending on the industry certification and the degree program to which it articulated. The majority of certifications articulated to three credit hours. Seventeen of the certifications on the funding list had more than one articulation agreement. Students who earned one of these would have the option of receiving articulated credit in more than one degree program. In 2014-15 CAPE participants earned 28,584 industry certifications with at least one articulation agreement. Two of the industry certifications earned, Manufacturing Skill Standards Council (MSSC) - Certified Production Technician (CPT) and CompTIA A+ articulated to more than one program. Table 16 shows the potential value of the college credit obtained through earning the certification.

⁴¹ Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district and student. Students are counted more than once if they are reported in more than one district during the academic year.

⁴² Includes articulation agreements for industry certifications that are no longer available from the certifying agency.

Table 16
Return on Investment- Industry Certifications and College Credit

Certification Title	Number of Certifications Earned	Potential College Credit Through Articulation	Value of College Credit Obtained through Articulation ⁴³
Microsoft Office Specialist (MOS) Bundle Certification (3 out of 6 - Word, Excel, PowerPoint, Access, Outlook, SharePoint)	10,637	3	\$215.94

Conclusion

In the seventh year of implementation, the number of career and professional academies, career-themed courses and students enrolled in CAPE courses continues to grow across the state, and a change to the law opened two new frontiers: middle schools and career-themed courses. CAPE participants on average performed better than non-CAPE students on most indicators, and students with industry certifications clearly performed better on all the indicators in this report than non-certified students. Placement data of CAPE participant and industry certification earner graduates indicate that CAPE participant graduates were slightly more likely to be found employed or in postsecondary education and were earning, on average, about the same as the average high school graduate. Graduates earning industry certifications showed consistently higher performance in their placement rate and earnings over time.

¹ Includes students enrolled in either a registered academy or career-themed course. Enrollment is unduplicated to the district, school, and student. Students are counted more than once if they are reported in more than one school of instruction during the year.

² Does not include CAPE Digital Tool Certificates.

³ An * sign indicates there were less than 10 CAPE participants earning a standard diploma.
