## Overview of Changes

1. Literacy completion points will be replaced with more appropriate program-specific data collection to more adequately collect information related to the expected outcomes for the students in the programs.
2. New data elements and data linkages to assessments must be established in the reporting structure for school districts, Florida College System institutions, corrections programs, and community-based providers with adult education programs.
3. Information to identify the adult test score used for the Initial and Final Educational Functioning Level (EFL) for each course should be reported by the agency. All adult tests delivered to a student should be reported and, if used for EFL assignments, be linked to the course record. These records will be used to determine the EFL for federal reporting at the state level.
4. For GED preparation, information on GED Tests Passed may be reported by agency to supplement records found with matching to the GED Testing database.
5. Adult high school information should be enhanced to include information on:
  - a) Number of high school credits creditable toward high school graduation that were earned at the time of entry.
  - b) Number of high school credits earned while enrolled in the adult high school program (e.g., collecting credits awarded in the course, in lieu of the LCP).
  - c) Mandatory assessments passed while enrolled in the program.
