Edit Specifications

Revised: October 7, 2024

When a request or response is transmitted through the FASTER System, the data are edited for validity. What follows in this appendix are the specific edit criteria.

All records must be 100% error free. That is, any error detected will cause the header record and all of its associated records (if any) to be rejected. A few edits remain that will cause rejection only for out-of-state records. These are still labeled as -OS Reject- edits. Also note that some fields are not edited depending on the context of the data. For example, Diploma Date is not edited when the record type is I01 (edit 51 for the I/S01 format).

Edits

- 2) Must be S00-S05, S07-S08, P00-P07, OR G99. (This applies to a non-district sending an invalid record type).
- 3) Out-of-state (addressed) institution is not in production mode.
- 4) Sender not in production for Out-of-state.

Header record edits (types I00, P00, and S00)

The Header format is applicable to the Inter-district, Postsecondary/Technical Center , Secondary Transcripts.

- 1) Record Type I00 is valid for school districts only. Record Types S00 and P00 may be used by both school districts and postsecondary/technical institutions. Record Type P00 is invalid if the addressed institution is 95 (Bright Futures).
- 1.5) Primary Student Identifier must be a Social Security Number (and comply with edit #2, below) if Record Type is P00, otherwise, it must be a Student Number Identifier, Florida (and comply with edit #9, below).
- 2) If SSN is not blank, it must be numeric and greater than or equal to zero. If SSN is not all zeroes, the first three digits cannot be all zeroes. Nine-digit SSN's should be left justified with blank fill. For SSN s generated by postsecondary institutions, the SSN can be nine digits followed by "G".
- 2.5) If addressed institution code identifies a SPEEDE/ExPRESS institution, i.e., either 99 (with school code 0000) or 10002, then either a Primary Student Identifier or an Institutional Student Identifier is required.
- 2.8) Non-displayable characters cannot be sent in data with the exception of Unique Institutional Identifier, item 14, and Filler Reserved for Local Use, item 39.
- 3) Addressed Institution (all 11 characters, including school/campus number) cannot contain nonnumeric characters.

- 4) Addressed Institution (the first 7 characters) must be a valid institution that is participating in the Student Record Transfer System.
- 5) Addressed Institution must be a school district or "99" (MSIX Migrant Student Record) if Record Type is I00.
- 5.5) If the record is addressed to a school district (first 7 characters of Addressed Institution), then the school number (last 4 characters of Addressed Institution) must be a valid ID from the Florida Public Schools Master School ID File (see [Appendix B](#)). A school number of 0000 is valid only if Message Type is S01-S17 unless addressed to Talented Twenty, in which case school number must be 0000.
- 5.6) If the record is addressed to a postsecondary institution (first 7 characters of Addressed Institution), then the campus number (last 4 characters of Addressed Institution) must be a valid campus ID (see [Appendix C](#)) or 0000. If the Addressed Institution is Bright Futures District 95, then the first two characters must be numeric and represent a year (without century) not less than 2004 nor greater than 2009, the third character must be either 7 or 8, and the fourth character must be 0 or 1.
- 5.7) Former edit is deleted.
- 6) Sending Institution (all 11 characters, including school/campus number) cannot contain nonnumeric characters.

If the sending institution is a district, Message Types R03, R04, S05, S20-S22, and S30-S32 are invalid. Message Type X01 is only valid when sent by the FASTER system itself to indicate a failed attempt to send a student record.
