I/S/P00 Header Record Format

Revised: July 8, 2024

1. The presence of binary zeroes in data fields causes significant problems for several institutions in the receipt of student records. A transaction will be rejected if non-displayable characters are sent in the data unless found in Unique Institutional Identifier or in Filler Reserved for Local Use. Please use some other appropriate character (e.g., SPACES) with which to initialize your records before sending them.
2. Districts requesting a transcript from a postsecondary institution should use record type P00.
3. Special characters, tilde (~), caret (^), and grave accent (`), are used as delimiters in the translation of FASTER to SPEEDE/ExPRESS. They are reserved symbols and as such cannot be included in data sent through FASTER to a SPEEDE/ExPRESS institution.
4. Required fields are indicated by an asterisk (*) next to the field name.

In Item 3 and Item 4, added new state assigned district number 83.

				SECTION A (Items 2-16c)
2	4-13	10	A/N/L	**Primary Student Identifier** This is the main identification number for this student/applicant. Depending on the type of transmission, this will be the student's Social Security Number or the

				student's Student Number Identifier, Florida (which, in many cases, will contain the student's Social Security Number). NOTE: This field is not required on a Request record. However, this field must be filled in by a responding institution unless no match was found.
				Postsecondary Request/Response Formats For these formats, the Primary Student Identifier is coded as follows:
	4-12	9	N	**Social Security Number** The student's Social Security Number
	13-13	1	A/N	Filler Spaces or the letter "G" indicating a generated identifier.
				Interdistrict and Secondary to Postsecondary Request/Response Formats For these formats, the Primary Student Identifier is coded as follows:
	4-13	10	A/N	**Student Number Identifier, Florida** If the student has a social security number and provided this number to the school district, the Student Number Identifier, Florida , will have the following format: First 9 digits: the student's Social Security Number; and The 10th digit: the letter "X". If a SPEEDE/ExPRESS institution does not provide a valid social security number or high school student number identifier, the value will be "999999999G". If the student does not provide a Social Security Number to the school district, the school district will assign a Student Number Identifier, Florida , to the student, formatted as follows: First 2 digits NN For any student entering a Florida school district for the first time, the first 2 digits will represent the district of initial entry into the Florida School System. Last 8 digits NNNNNNNN The last digits are district-defined in such a way as to result in a unique student number within the district in which the number is originally assigned.
3	14-24	11	A/N/R	**Addressed Institution*** The institution to which this request or response is addressed

Header and Generic Records Formats

16a	215-223	9	A/N	**SPEEDE/ExPRESS Transaction Control ID** This field uniquely identifies this record and serves the same purpose for SPEEDE/ExPRESS (the national electronic transcript transfer system) that our **Unique Institutional Identifier** (item 14) serves for FASTER. The system handles this field automatically, so institutions should not put anything in it when preparing records for transmission unless the institution is responding to a request, in which case the data that was originally sent in this field must be returned in the response.
16b	224-238	15	A/N/L	**SPEEDE/ExPRESS Institution ID** This field is the institution ID as defined by SPEEDE/ExPRESS, and is used only when communicating with non-FASTER institutions. When sending records to a non-FASTER institution, fill this field with the corresponding **SPEEDE/ExPRESS Institution ID** from the SPEEDE Institution ID Crosswalk Report (See Institution Crosswalk); otherwise this field is spaces. Then put 00000990000 into the **Addressed Institution** field (item 3 of this record type), if the addressee is a PK-12 institution, or put 00100020000 in the **Addressed Institution** field if the addressee is a postsecondary institution. Similarly, incoming transmissions from non-FASTER institutions are identified by the presence of 00000990000 or 00100020000 in the **Sending Institution** field. The **SPEEDE/ExPRESS Institution ID** uniquely identifies the non-FASTER sender.
16c	239-256	18	A/N	**Post Date, Time, Sequence Number** This element uniquely identifies the transmission. It is to be left blank when the record is submitted and the data will be supplied by the system.

18	371-380	10	A/N/L	**Primary Student Identifier** SECTION B (Items 18-32c) NOTE: The subsequent fields are used only by responding institutions. The responding institution will move the data from Items 2-16c on the original request header record to Items 18-32c on the response header record. Items 2-16c on the response header record should contain the student identifying information as it appears on the responding institution's files.

Example: FLxxxxxxxxxxxx Florida Education Identifier (FLEID) standard. ***NOTE: FASTER collects and forwards the FLEID but does not validate or process it.**

33b	638	1	A	**Postsecondary Institution World Language Requirement Indicator** This code indicates whether the student has met the requirements of BOG Regulation 6.002(1)(h) having demonstrated competency of foreign language or American Sign Language equivalent to the second high school level or higher. This indicator is set by FASTER when the transcript is posted. A code of "Y" is set if the student is awarded a minimum of one full credit in a high school second level, IB or AICE or college level foreign or American Sign language. Code Description Y Requirement is met N Requirement is not met Z Not applicable

37	1004-1007	4	A/N	**Fatal Error Count** This element should be left blank by the sending institution. It is returned to the sending institution by the edit program (requests and responses) and represents the total number of fatal errors detected for this student's records. If Fatal Error Count is greater than zero then the student's record was not sent to the Addressed Institution identified in Item 3 and the transaction must be resubmitted.

Generic Record Format (G99)

Effective: August 1, 2015

1. Record Type: G99 - This record is used to transfer data not specifically detailed in the three approved FASTER formats (Interdistrict, Secondary, or Postsecondary). The sending and receiving institutions must define the data to be sent in columns 4 through 1011. Note that columns 1-3 must be 'G99' and data found in columns 1012-1020 will be ignored.
2. The presence of LOW-VALUES in data fields causes significant problems for several institutions in the receipt of student records. A transaction will be rejected if non-displayable characters are sent in the data unless found in Filler Reserved for Local Use. Please use some other appropriate character (e.g., SPACES) with which to initialize your records before sending them.
3. Special characters, tilde (~), caret (^), and grave accent (`), are used as delimiters in the translation of FASTER to SPEEDE/ExPRESS. They are reserved symbols and as such cannot be included in data sent through FASTER to a SPEEDE/ExPRESS institution.

SPEEDE/ExPRESS Generic Health Screening Record Format (G99HS)

Effective: August 1, 2015

1. Record Type: G99 - This record would be sent with transactions that do not strictly adhere to any of the three approved FASTER formats (Interdistrict, Secondary, Postsecondary/Technical Center).
2. National Record Type: HS - This record is used to provide the receiving institution with information concerning health screening activities.
3. The presence of LOW-VALUES in data fields causes significant problems for several institutions in the receipt of student records. SPEEDE/ExPRESS Activities and Awards (G99ATV) Record Format

Effective: August 1, 2015

1. Record Type: G99ATV - This record would be sent with transactions that do not strictly adhere to any of the three approved FASTER formats (Interdistrict, Secondary, Postsecondary/Technical Center).
2. National Record Type: ATV - This record is used to provide the receiving institution with information concerning the student's activities and awards.
3. The presence of LOW-VALUES in data fields causes significant problems for several institutions in the receipt of student records. A transaction will be rejected if non-displayable characters are sent in the data unless found in Filler Reserved for Local Use. Please use some other appropriate character (e.g., SPACES) with which to initialize your records before sending them.
4. Special characters, tilde (~), caret (^), and grave accent (`), are used as delimiters in the translation of FASTER to SPEEDE/ExPRESS. They are reserved symbols and as such cannot be included in data sent through FASTER to a SPEEDE/ExPRESS institution.
