

Identification of High Demand Teacher Needs Areas for 2026-27

Recommended High Demand Teacher Needs Areas

This report identifies which certification areas represent the greatest need among teachers statewide. Using the information provided below, the recommended High Demand Teacher Needs Areas for the 2026-27 school year are as follows:

- Exceptional Student Education (ESE)
- Math
- English
- Science - General
- Science - Physical
- Science - Earth & Space
- English for Speakers of Other Languages (ESOL)

The high-demand areas above represent certification areas where larger than typical proportions of teachers who are not certified in the appropriate field are being hired to teach courses where significant vacancies exist and where postsecondary institutions do not produce enough graduates to meet the needs of Florida's K-12 student population. This information can be used to determine the projected needs for specific subject area coverages in the upcoming school year. It should be noted that it is **not** a direct measure of the number of new teachers needed to staff Florida's schools. The process used to determine these High Demand Teacher Needs Areas is presented below.

Background

Section (s.) 1012.07, Florida Statutes (F.S.), requires the State Board of Education (SBE) to annually identify High Demand Teacher Needs Areas based on the recommendations of the Commissioner of Education. This statute, promulgated in SBE Rule 6A-20.0131, Florida Administrative Code (F.A.C.), specifies that the list of high-demand areas identify high-need content areas and high-priority location areas using the following information:

1. The number and percentage of positions in each discipline filled by teachers not certified in the appropriate field;
2. The annual supply of graduates of state-approved Florida teacher education programs for each discipline;
3. The number and percentage of vacant positions in each teaching discipline; and
4. High Demand Teacher Needs Areas which may be identified pursuant to rules adopted by district school boards. These areas shall be identified based on consideration of at least the information specified in items one through three above and submitted to the Department of Education no later than June 1st of each year.

Additionally, ss. 1012.22(1)(c)4.b. and 1012.22(1)(c)5.c.(III), F.S., include provisions requiring local school districts to incorporate High Demand Teacher Needs Areas into both their grandfathered and performance salary schedules.

Determining High-Demand Areas

The High Demand Teacher Needs Areas for 2026-27 were determined using information provided in Exhibits 3 through 5. The Department used the information in each of the exhibits to create rankings for each measure in Exhibit 1.¹ Rankings were then averaged across all measures to produce the final rankings.

In Exhibit 1 below, the shaded and bolded subject fields indicate the recommended 2026-27 High Demand Teacher Needs Areas. The final column in Exhibit 1, “Final Rank,” shows that ESE was in first place with an average rank of 4.33, followed by Math, English, Science - General, Science - Physical, Science - Earth & Space and ESOL as High Demand Teacher Needs Areas. Please note that the percentage of courses taught by teachers not certified in the appropriate field for the course and the projected vacancies are based on data reported by school districts while the ratio of completers to vacancies utilize data reported by teacher preparation programs.

¹ The rankings order the data with 1 being the subject area that shows the most need for additional teachers. In the case of a tie, all subject areas in the tie are assigned the rank indicating a higher need for additional teachers. For example, if three subject areas tie for third place (i.e., there is no way to distinguish between third, fourth and fifth place), they would all be assigned third place.

Notes: Certification areas that were missing data in one or more of the measures examined were not ranked and were excluded from the exhibit. Bolded and italicized subject fields indicate 2026-27 High Demand Teacher Needs Areas. Science - General includes Science and General Science; Science - Physical includes Chemistry and Physics; ESE includes Exceptional Student Education, Speech Correction, Emotionally Handicapped, Hearing Impaired, Mentally Handicapped, Physically Impaired, Specific Learning Disabilities, Speech-Language Impaired, Varying Exceptionalities, Visually Impaired, Autism Spectrum Disorders endorsement, Adaptive Physical Education, and Orientation and Mobility endorsement; and Reading and ESOL include both the certification and the endorsement.

Information on High Demand Teacher Needs Areas

Data on teachers currently in the workforce and their areas of certification are presented below to provide context for the recommended High Demand Teacher Needs Areas. This information covers the following: certification areas in which the majority of teachers are currently certified; the number of courses taught by teachers who were not appropriately certified for the courses they were teaching; the projected number of teacher vacancies as reported by school districts; and the number of recent completers of state-approved teacher preparation programs in Florida. Additional information is provided on the number of courses being taught by teachers who were not certified in the appropriate field for the courses they were teaching in high-priority locations.² The following exhibits provide information on teacher supply and demand:

- Exhibit 2 – Number of Teacher Certifications Held by Certification Area – Top Areas for 2024-25 School Year
- Exhibit 3 – Number of Courses Taught by Teachers Not Certified in the Appropriate Field by Certification Area During 2024-25
- Exhibit 4 – Number of Students Completing Teacher Education Programs During 2023-24
- Exhibit 5 – Number of 2026-27 Projected Vacancies by Certification Area
- Exhibit 6 – High-Priority School Locations and Courses Taught by Appropriately Certified Teachers Among Schools that Received a School Grade in 2024-25

It is important to note and emphasize that all data are as reported by school districts or teacher preparation programs.

Exhibit 2 provides the total number of certifications held by teachers in 2024-25 by certification area. If a teacher held a certification in multiple subject areas, the certification is counted once for each subject area. The most common teacher certification area for the 2024-25 school year was Elementary Education, making up 18.31% of all certifications. This was closely followed by ESOL at 18.08%. High-demand areas for 2026-27 are shaded and bolded in Exhibit 2. Following Elementary Education and ESOL, the numbers drop off with Reading making up 14.29% of certifications and ESE making up 9.03% of certifications. The seven recommended High Demand Teacher Needs Areas account for about 36.99% of all certifications (n=170,675). The complete crosswalk of “Certification Subject Codes to Certification Areas” can be found in Appendix C.

² Section 1012.07, F.S., defines high-priority locations as high-density, low-economic urban schools; low-density, low-economic urban schools; low-density, low-economic rural schools; and schools that earned a grade of “F” or three consecutive grades of “D” or below pursuant to s. 1008.34, F.S.

It is best practice for school districts to hire teachers certified in the appropriate field(s) for the courses they teach, to ensure students receive instruction based on Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards. In some cases, this is not possible and in order to staff classrooms and offer certain courses, school districts must hire teachers who are out-of-field. Exhibit 3 is ranked based on the degree to which a particular subject area is more prevalent among the courses being taught out-of-field than it is among the courses being offered in the state. **Though this is an important metric used to identify subject areas experiencing the greatest need, it is important to keep in mind that fewer than 16.6% of courses statewide across all subject areas were taught by teachers who were not certified in the subject area (94,038 out of 567,078 courses).** While the teachers are not certified in the subject area, this does not mean that the teachers are not certified in another subject area. The difference is calculated between the percentage of total courses reported and the percentage of total courses taught out-of-field. A large and negative difference indicates that the certification area represents a larger share of the courses taught by out-of-field teachers than it does of the overall courses offered. Students taking courses requiring certification in these areas are more likely to receive instruction from an out-of-field teacher. Certification areas are ranked in Exhibit 3 based on this difference indicating a proportionally greater need for in-field teachers.

This information provides detail on the certification areas that are currently in demand across all school districts based on how frequently courses are being taught by teachers without the required certification relative to those courses' prevalence among course offerings in Florida. ESE had the highest percentage of courses taught by teachers without the required certification relative to its prevalence among course offerings in Florida.

The number of postsecondary students earning a certification in a particular content area in Florida is one indicator of new teachers available to fill vacancies in the state. Exhibit 4 presents the most recent information on new completers reported by teacher education programs across Florida.

Most of the recommended High Demand Teacher Needs Areas for 2026-27 are among those with the highest projected vacancies. Exhibit 5 provides the total number of vacancies school districts project they will need to fill before the start of the next school year. However, it is important to keep in mind that each of these vacancies does not necessarily represent a teacher vacancy, since one teacher may teach courses in multiple subject areas. For example, a school district could report two projected vacancies by subject area, one in chemistry and one in biology, but fill both needs by hiring one science teacher to cover both subject areas. Therefore, because these counts are designed to identify subject area needs, they will be higher than the actual number of teachers that school districts need to hire. This information is collected from each school district and is

typically used to plan recruitment efforts, including The Great Florida Teach-In held annually. This highlights the anticipated subject areas of teacher demand seen across all school districts.

Note: Certification areas that were missing data in one or more of the measures examined were not ranked and were excluded from final rankings in Exhibit 1. Bolded and italicized subject fields indicate 2026-27 High Demand Teacher Needs Areas. Counts reflect the school district reported projected vacancies by certification area. Each of these vacancies does not necessarily represent a teacher vacancy, since one teacher may teach courses in multiple subject areas (e.g., a need for a Biology and a Chemistry teacher may be filled by hiring one science teacher certified to teach both subject areas). Science - General includes Science and General Science; Science - Physical includes Chemistry and Physics; ESE includes Exceptional Student Education, Speech Correction, Emotionally Handicapped, Hearing Impaired, Mentally Handicapped, Physically Impaired, Specific Learning Disabilities, Speech-Language Impaired, Varying Exceptionalities, Visually Impaired, Autism Spectrum Disorders endorsement, Adaptive Physical Education, and Orientation and Mobility endorsement; and Reading and ESOL include both the certification and the endorsement.

Consistent with s. 1012.07, F.S., high-priority locations are identified as high-density, low-economic urban schools; low-density, low-economic rural schools; and schools that earned a 2024-25 school grade of “F” or three consecutive grades of “D” or below, pursuant to s. 1008.34, F.S. Low-economic schools are those that have 75% or more students who qualify for free or reduced-price lunch. Urban and rural school distinctions are based on the 2023-24 National Center for Education Statistics (NCES) locale codes which are a measure of geographic status on an urban continuum that ranges from “large city” to “rural” based on the standards used by the Census. The list of high-priority school locations can be found in Appendix A.

Exhibit 6 provides information on the number of high-priority school locations and the proportion of courses at those locations being taught by teachers who were not certified in the appropriate field for the courses they taught (out-of-field) and teachers who were certified in the appropriate field for the courses they taught (in-field). The statewide percentage of courses taught by out-of-field teachers for all schools with at least one school grade component is 14.69%. Additionally, 15.78% of courses at urban/low-economic schools and 10.03% of courses at rural/low-economic schools are being taught out-of-field. Additionally, Exhibit 6 provides comparative data for other types of school locations (e.g. charter, non-charter schools, etc.). Though this information does not contribute to the identification of High Demand Teacher Needs Areas, it is provided for context when reviewing high-priority school locations designated as such pursuant to Rule 6A-20.0131, F.A.C., and ss. 1012.07 and 1008.34, F.S.
