Standard Report Descriptions

Program Completer Outcomes Reports

The Program Completer Outcomes Reports provide insight into the post-completion status of Florida College System students who have earned a degree, diploma, or certificate. These reports include data on employment outcomes, earnings, and continuing education, helping users understand how students transition from education to the workforce or continuation of their educational studies.

Outcomes are reported at both the college and program levels and are compiled using data submitted by individual Florida College System institutions. This structure allows users to view results by credential type, field of study, and institution.

The reports include outcomes for students who completed the following credentials:

- Bachelor's degrees
- Associate of Science degrees
- Associate of Applied Science degrees
- Career Certificates
- College Credit Certificates
- Advanced Technical Certificates
- Applied Technology Diplomas

Statewide Program Completer Outcomes Reports

The Statewide Program Completer Outcomes Reports provide aggregated, statewide information on the post-completion outcomes of Florida College System students. These reports present employment, earnings, and continuing education outcomes summarized by academic program, rather than by individual institution, offering a system-wide view of how completers perform after exiting education.

Outcomes are reported for students completing a range of credentials, including bachelor's degrees, associate degrees, diplomas, and certificates. By organizing results at the program level across all Florida College System institutions, reports allow for comparisons of workforce and education outcomes by field of study on a statewide basis.

The collection includes statewide outcomes for:

- Bachelor's degrees
- Associate of Science degrees
- Associate of Applied Science degrees
- Career Certificates
- College Credit Certificates
- Advanced Technical Certificates
- Applied Technology Diplomas
- Educator Preparation Institutes
