

# Florida Assessment of Student Thinking & B.E.S.T. End-of-Course Assessments

## English Language Arts and Mathematics Grades 3 and Higher

Students enrolled in the voluntary prekindergarten (VPK) program through grade 10 participate in progress monitoring in English Language Arts (ELA) and Mathematics, aligned with the Benchmarks for Excellent Student Thinking (B.E.S.T.) for kindergarten through grade 10 and with the Florida Early Learning and Developmental Standards for children 4 years old to kindergarten. First administered in 2022-23, the Florida Assessment of Student Thinking (FAST), which includes VPK through grade 10 ELA and VPK through grade 8 Mathematics, is a progress monitoring assessment administered three times per year:

- The first (PM1) occurs at the beginning of the year;
- The second (PM2) occurs in the middle of the school year; and
- The third (PM3) occurs at the end of the school year.

The first and second administrations (PM1 and PM2) are for informational purposes only, providing teachers and families information to help guide instruction and support throughout the school year based on a student’s strengths and weaknesses. The third administration (PM3) for grades 3 through 10, which occurs at the end of the school year, is the statewide, standardized assessment in ELA and Mathematics administered pursuant to Section (s.) 1008.22, Florida Statutes (F.S.), for state and federal accountability purposes. In grades 3-10, each FAST progress monitoring assessment (PM1, PM2 and PM3) covers the full-year content expectations for a particular grade level and subject. Therefore, at the beginning of the school year (PM1) and at the middle of the school year (PM2), students may not yet be at grade level. **However**, this does not necessarily indicate that a student is not on track to succeed by the end of the school year (PM3).

Students who completed Algebra 1 and Geometry courses take statewide, standardized end-of-course (EOC) assessments aligned to the B.E.S.T. Standards. The B.E.S.T. Algebra 1 and Geometry EOCs were administered for the first time in Winter 2022. Each EOC assessment is administered in spring, summer, fall and winter.

### Achievement Levels

The achievement level definitions that apply to the FAST and B.E.S.T.-aligned EOC assessments, as well as the cut scores that define each level are in the following tables.

Level 1	Level 2	Level 3	Level 4	Level 5
<b>Well Below Grade Level:</b> Highly likely to need substantial support for the next grade/course	<b>Below Grade Level:</b> Likely to need substantial support for the next grade/course	<b>On Grade Level:</b> May need additional support for the next grade/course	<b>Proficient:</b> Likely to excel in the next grade/course for the next grade/course	<b>Exemplary:</b> Highly likely to excel in the next grade/course

## FAST ELA/Reading Achievement Levels

Grade	Scale Scores (140 to 308)				
	Level 1	Level 2	Level 3	Level 4	Level 5
3	140–185	186–200	201–212	213–224	225–260
4	154–198	199–212	213–223	224–236	237–270
5	160–205	206–221	222–231	232–245	246–279
6	161–208	209–224	225–236	237–249	250–284
7	165–214	215–231	232–241	242–256	257–292
8	169–219	220–237	238–250	251–261	262–300
9	174–223	224–241	242–253	254–266	267–303
10	179–229	230–246	247–257	258–270	271–308

## FAST Mathematics Achievement Levels

Grade	Scale Scores (140 to 291)				
	Level 1	Level 2	Level 3	Level 4	Level 5
3	140–182	183–197	198–208	209–224	225–260
4	155–199	200–210	211–220	221–237	238–273
5	158–206	207–221	222–233	234–245	246–285
6	168–212	213–228	229–238	239–253	254–287
7	175–222	223–234	235–246	247–257	258–288
8	183–226	227–243	244–253	254–262	263–291

## B.E.S.T. EOC Assessment Achievement Levels

Course	Scale Scores (325 to 475)				
	Level 1	Level 2	Level 3	Level 4	Level 5
Algebra 1	325–378	379–399	400–417	418–434	435–475
Geometry	325–384	385–403	404–422	423–431	432–475

## Overview of Results

In 2025-26, FAST progress monitoring provided important, actionable information allowing teachers to target instruction to their students that resulted in continuous growth from the beginning to the middle and ultimately to the end of the school year. Results below represent student performance on the FAST and EOC assessments at the end of the 2025-26 school year or course.

### Percentage At or Above Achievement Level 3

## English Language Arts

### Grades 3 – 10

#### Summary of Results

##### FAST ELA/Reading Progress Monitoring Results (PM1 to PM3)

###### *Grades 3-10*

- Grades 3-10 ELA/Reading performance increased 22 percentage points from the beginning of the school year (PM1) to the end of the school year (PM3) (39% scoring Level 3 or above compared to 61% scoring Level 3 or above).
  - Grades 3-10 ELA/Reading performance improved by 10 percentage points from PM1 to PM2 (39% to 49%).
  - Grades 3-10 ELA/Reading performance improved by 12 percentage points from PM2 to PM3 (49% to 61%).
- For Grades 3-10 ELA/Reading, larger improvements were seen among the elementary grade levels (grades 3-5) compared to middle and high school grade levels (grades 6-10). For example, whereas third grade performance improved by 35 percentage points from PM1 to PM3, sixth grade performance improved by 15 percentage points from PM1 to PM3.
- Compared to previous years, Grades 3-10 ELA/Reading performance had a greater increase from the beginning (PM1) to the end (PM3) of the school year (22 percentage points vs. 21 percentage points in 2024-25, 20 percentage points in 2023-24, and 17 percentage points in 2022-23).
- Charter schools outperformed traditional public schools in terms of the amount of increase from PM1 to PM3 (23 percentage points vs. 22 percentage points) in Grades 3-10 ELA/Reading.
- African American, Hispanic and White students all showed double-digit increases in the percentage of students scoring at or above grade level (Level 3) from PM1 to PM3 in Grades 3-10 ELA/Reading:
  - African American students increased their performance by 22 percentage points (28% to 50%).
  - Hispanic students increased their performance by 22 percentage points (35% to 57%).
  - White students increased their performance by 22 percentage points (48% to 70%).
- Students with disabilities increased performance from PM1 to PM3 by 17 percentage points in Grades 3-10 ELA/Reading (15% to 32%).
- English language learners increased performance from PM1 to PM3 by 18 percentage points in Grades 3-10 ELA/Reading (4% to 22%).
- Students from economically disadvantaged families increased performance from PM1 to PM3 by 23 percentage points in Grades 3-10 ELA/Reading (29% to 52%).

## FAST ELA/Reading Statewide Assessment Results (PM3)

### Grades 3-10

- Overall, performance at Level 3 or above in Grades 3-10 ELA/Reading increased by 4 percentage points (57% to 61%) from 2025 to 2026. Since the test was first administered, overall performance has increased by 12 percentage points (49% in 2023 to 61% in 2026).
- All subgroups increased the percentage of students scoring at Level 3 or above from 2025 to 2026.
- Charter schools outperformed non-charter schools in Grades 3-10 ELA/Reading by having a higher percentage of students performing at Level 3 or above (66% vs. 60%).
- African American, Hispanic and White students all increased performance at Level 3 or above in Grades 3-10 ELA/Reading compared to 2025:
  - African American students increased by 5 percentage points (45% to 50%).
  - Hispanic students increased by 5 percentage points (52% to 57%).
  - White students increased by 3 percentage points (67% to 70%).
- Students with disabilities increased performance by 3 percentage points (29% to 32%) in Grades 3-10 ELA/Reading compared to 2025.
- English language learners increased performance by 5 percentage points (17% to 22%) in Grades 3-10 ELA/Reading compared to 2025.
- Students from economically disadvantaged families increased performance by 5 percentage points (47% to 52%) in Grades 3-10 ELA/Reading compared to 2025.

### Grade 3

- Overall, performance at Level 3 or above in Grade 3 ELA/Reading increased by 3 percentage points (57% to 60%) from 2025 to 2026.
- Section 1008.25(5)(c), F.S., requires any third-grade student who does not score at Level 2 or higher on the statewide, standardized Grade 3 ELA assessment (PM3) to be retained, unless the student qualifies for one of six good cause exemptions provided under s. 1008.25(7)(b), F.S.
  - In 2025-26, 19% of grade 3 students scored Level 1, a decline from 22% in 2024-25. This means that fewer grade 3 students face potential retention based on the results of this year compared to last year.
  - Historically, a majority of students who score Level 1 on the Grade 3 ELA statewide assessment satisfy a good cause exemption, and fewer than half of students who score Level 1 have been retained (e.g., in 2024-25, while 22% of Grade 3 students scored Level 1, 7% of those students were retained in the 2025-26 school year).

## English Language Arts

### Grades 3 – 10

#### Progress Monitoring and Longitudinal Results

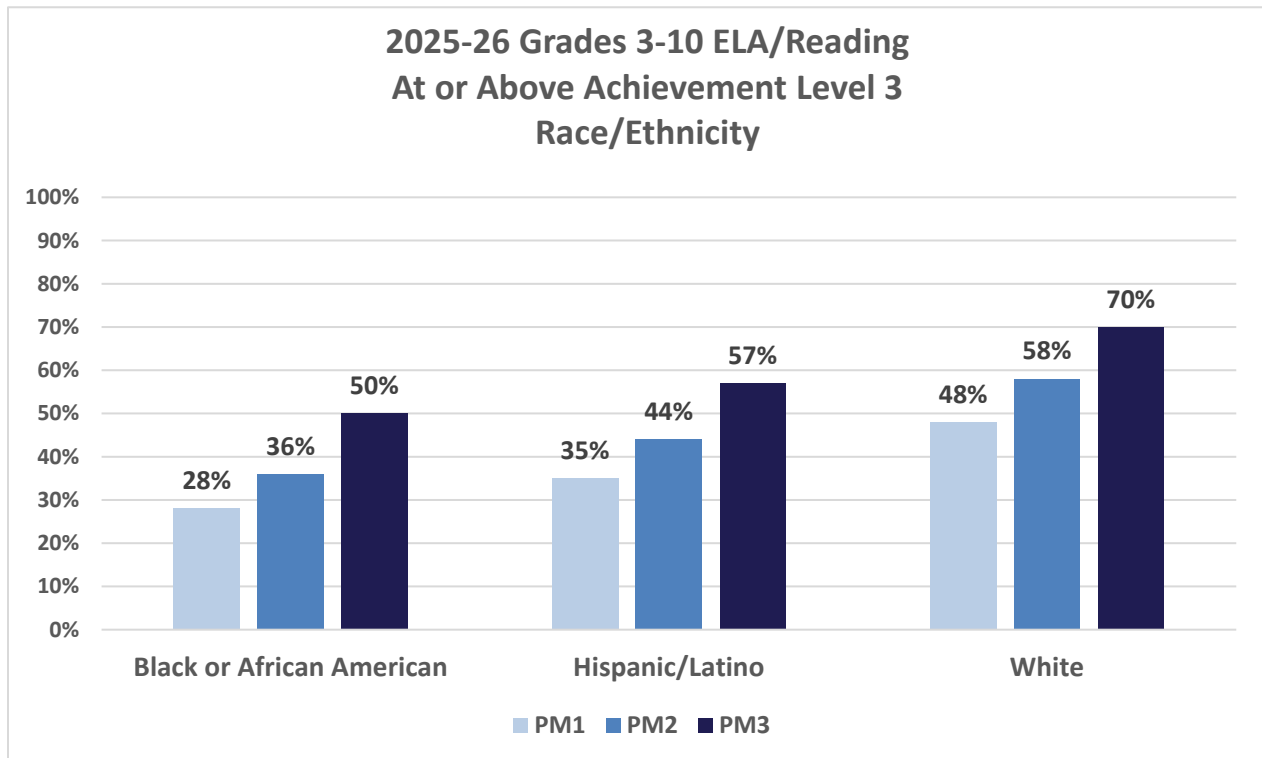

##### NOTES:

- 1) Student performance on the FAST ELA/Reading presented in this document is reported using the Achievement Levels established by the State Board of Education in October 2023. The results reported prior to standard setting were retrofitted to the established score scale and Achievement Levels so stakeholders can compare school years and see how students would have performed if the Achievement Levels had been established at that time.
- 2) Each PM event measures the full-year content expectations, therefore, as students are more exposed to the content and instruction is adjusted to meet student needs, progress should continue to be made and seen by the end of the year.
- 3) Percentages displayed in this document for previous years may reflect minor differences from percentages published previously. This is because of the inclusion of additional assessment records reported after the initial publication of data.
- 4) The grade level reported reflects the grade level of the test. Pursuant to s. 1002.3105, F.S., schools must offer accelerated options to eligible students, such as subject-matter acceleration, and such students may test above their enrolled grade level in order to take the assessment aligned to their instruction. For example, students who are enrolled in Grade 7, but are receiving instruction in Grade 8 content, may take the Grade 8 assessment for that subject area.

# Florida Assessment of Student Thinking & B.E.S.T. End-of-Course Assessments

## Mathematics Grades 3-8, Algebra 1 and Geometry

### Summary of Results

#### FAST Mathematics Progress Monitoring Results (PM1 to PM3)

##### *Grades 3-8*

- Grades 3-8 Mathematics performance increased 46 percentage points from the beginning of the school year (PM1) to the end of the school year (PM3) (16% scoring Level 3 or above to 62% scoring Level 3 or above).
  - Grades 3-8 Mathematics performance improved by 18 percentage points from PM1 to PM2 (16% to 34%).
  - Grades 3-8 Mathematics performance improved by 28 percentage points from PM2 to PM3 (34% to 62%).
- For Grades 3-8 Mathematics, larger improvements were generally seen among the elementary grade levels compared to the middle school grade levels. However, all improvements in mathematics were substantially larger than the improvements in ELA. This is likely a product of the higher level of performance seen in PM1 for ELA compared to mathematics and a product of students learning new concepts in mathematics throughout the school year.
- Compared to previous years, Grades 3-8 Mathematics performance had a greater increase from the beginning (PM1) to the end (PM3) of the school year (46 percentage points vs. 44 percentage points in 2024-25, 42 percentage points in 2023-24, and 41 percentage points in 2022-23).
- Charter schools and traditional public schools had the same increase from PM1 to PM3 in Grades 3-8 Mathematics performance (46 percentage points).
- African American, Hispanic and White students all showed double-digit increases in the percentage of students scoring at or above grade level from PM1 to PM3 in Grades 3-8 Mathematics.
  - African American students increased their performance by 40 percentage points (8% to 48%).
  - Hispanic students increased their performance by 46 percentage points (14% to 60%).
  - White students increased their performance by 50 percentage points (21% to 71%).
- Students with disabilities increased their performance from PM1 to PM3 by 31 percentage points in Grades 3-8 Mathematics (6% to 37%).
- English language learners increased their performance from PM1 to PM3 by 38 percentage points in Grades 3-8 Mathematics (3% to 41%).
- Students from economically disadvantaged families increased their performance from PM1 to PM3 by 43% percentage points in Grades 3-8 Mathematics (10% to 53%).

## **FAST Mathematics Statewide Assessment Results (PM3)**

### ***Grades 3-8***

- Overall, performance at Level 3 or above in Grades 3-8 Mathematics increased by 3 percentage points (59% to 62%) from 2025 to 2026. Since the test was first administered, overall performance has increased by 9 percentage points (53% in 2023 to 62% in 2026).
- All subgroups increased the percentage of students scoring at Level 3 or above from 2025 to 2026.
- Charter schools outperformed non-charter schools in Grades 3-8 Mathematics by having a higher percentage of students performing at Level 3 or above (65% vs. 61%).
- African American, Hispanic and White students all increased performance at Level 3 or above in Grades 3-8 Mathematics compared to 2025:
  - African American students increased by 3 percentage points (45% to 48%).
  - Hispanic students increased by 4 percentage points (56% to 60%).
  - White students increased by 2 percentage points (69% to 71%).
- Students with disabilities increased performance by 2 percentage points (35% to 37%) in Grades 3-8 Mathematics compared to 2025.
- English language learners increased performance by 6 percentage points (35% to 41%) in Grades 3-8 Mathematics compared to 2025.
- Students from economically disadvantaged families increased performance by 3 percentage points (50% to 53%) in Grades 3-8 Mathematics compared to 2025.

## **B.E.S.T. End-of-Course Assessment Results**

### ***Algebra 1 EOC***

- Overall, performance at Level 3 or above on the Algebra 1 EOC increased by 4 percentage points (57% to 61%) from 2025 to 2026. Since the test was first administered, Algebra 1 EOC performance has increased by 11 percentage points (50% in 2023 to 61% in 2026).
- All subgroups increased the percentage of students scoring at Level 3 or above on the Algebra 1 EOC from 2025 to 2026, with most subgroups having significant increases in performance.
- Charter schools outperformed non-charter schools on the Algebra 1 EOC by having a higher percentage of students performing at Level 3 or above (67% vs. 59%).
- African American, Hispanic and White students all increased performance at Level 3 or above on the Algebra 1 EOC compared to 2025:
  - African American students increased by 4 percentage points (46% to 50%).
  - Hispanic students increased by 4 percentage points (54% to 58%).
  - White students increased by 3 percentage points (66% to 69%).
- Students with disabilities increased performance by 2 percentage points (32% to 34%) on the Algebra 1 EOC compared to 2025.
- English language learners increased performance by 4 percentage points (33% to 37%) on the Algebra 1 EOC compared to 2025.
- Students from economically disadvantaged families increased performance by 3 percentage points (49% to 52%) on the Algebra 1 EOC compared to 2025.

- Forty-six percent of Algebra 1 EOC test takers were in grades lower than high school; 87% of students in grades lower than high school scored at Level 3 or above, while 38% of high school students scored at Level 3 or above.

### **Geometry EOC**

- Overall, performance at Level 3 or above on the Geometry EOC increased by 1 percentage point (54% to 55%) from 2025 to 2026. Since the test was first administered, Geometry EOC performance has increased by 9 percentage points (46% in 2023 to 55% in 2026).
- Charter schools outperformed non-charter schools on the Geometry EOC by having a higher percentage of students performing at Level 3 or above (58% vs. 55%).
- African American, Hispanic and White students increased performance at Level 3 or above on the Geometry EOC compared to 2025:
  - African American students increased by 2 percentage points (42% to 44%).
  - Hispanic students increased by 2 percentage points (50% to 52%).
  - White students increased by 2 percentage points (63% to 65%).
- Students with disabilities increased performance by 1 percentage point (28% to 29%) on the Geometry EOC compared to 2025.
- English language learners decreased performance by 1 percentage point (34% to 33%) on the Geometry EOC compared to 2025.
- Students from economically disadvantaged families increased performance by 1 percentage point (45% to 46%) on the Geometry EOC compared to 2025.

### **FAST Mathematics Statewide Assessment (PM3) and B.E.S.T. End-of-Course Assessment Results**

#### **Grades 3-8 and High School (PM3 and EOCs)**

- Overall, performance at Level 3 or above in Mathematics (Grades 3-8 and EOCs) increased by 3 percentage points (58% to 61%) from 2025 to 2026. Since the tests were first administered, overall performance has increased by 10 percentage points (51% in 2023 to 61% in 2026).
- All subgroups increased the percentage of students scoring at Level 3 or above in Mathematics (Grades 3-8 and EOCs) from 2025 to 2026.
- Charter schools outperformed non-charter schools in Mathematics (Grades 3-8 and EOCs) by having a higher percentage of students performing at Level 3 or above (65% vs. 60%).
- African American, Hispanic and White students all increased performance at Level 3 or above in Mathematics (Grades 3-8 and EOCs) compared to 2025:
  - African American students increased by 4 percentage points (44% to 48%).
  - Hispanic students increased by 3 percentage points (55% to 58%).
  - White students increased by 2 percentage points (68% to 70%).
- Students with disabilities increased performance by 2 percentage points (34% to 36%) in Mathematics (Grades 3-8 and EOCs) compared to 2025.
- English language learners increased performance by 4 percentage points (35% to 39%) in Mathematics (Grades 3-8 and EOCs) compared to 2025.
- Students from economically disadvantaged families increased performance by 3 percentage points (49% to 52%) in Mathematics (Grades 3-8 and EOCs) compared to 2025.

# Florida Assessment of Student Thinking

## Mathematics

### Grades 3 – 8

### Progress Monitoring

#### NOTES:

- 1) Student performance on FAST Mathematics presented in this document is reported using the Achievement Levels established by the State Board of Education in October 2023. The results reported prior to standard setting were retrofitted to the established score scale and Achievement Levels so stakeholders can compare school years and see how students would have performed if the Achievement Levels had been established at that time.
- 2) Each PM event measures the full-year content expectations, therefore, as students are more exposed to the content and instruction is adjusted to meet student needs, progress should continue to be made and seen by the end of the year.
- 3) Percentages displayed in this document for previous years may reflect minor differences from percentages published previously. This is because of the inclusion of additional assessment records reported after the initial publication of data.
- 4) The grade level reported reflects the grade level of the test. Pursuant to s. 1002.3105, F.S., schools must offer accelerated options to eligible students, such as subject-matter acceleration, and such students may test above their enrolled grade level in order to take the assessment aligned to their instruction. For example, students who are enrolled in Grade 7, but are receiving instruction in Grade 8 content, may take the Grade 8 assessment for that subject area.

# Florida Assessment of Student Thinking & B.E.S.T. End-of-Course Assessments

## Mathematics Grades 3-8 and High School Courses Longitudinal Results

**NOTES:**

- 1) Student performance on the FAST Mathematics and the Algebra 1 and Geometry B.E.S.T. EOCs presented in this document is reported using the Achievement Levels established by the State Board of Education in October 2023. The results reported prior to standard setting were retrofitted to the established score scale and Achievement Levels so stakeholders can compare school years and see how students would have performed if the Achievement Levels had been established at that time.
- 2) Percentages displayed in this document for previous years may reflect minor differences from percentages published previously. This is because of the inclusion of additional assessment records reported after the initial publication of data.
- 3) Algebra 1 and Geometry EOC performance in this document includes only student results for all **first-time testers** for each B.E.S.T. EOC administration during the school year.

School Year	B.E.S.T. Algebra 1 and Geometry EOC Administrations
<b>2022-23</b>	Winter 2022, Spring 2023, Summer 2023
<b>2023-24</b>	Fall 2023, Winter 2023, Spring 2024, Summer 2024
<b>2024-25</b>	Fall 2024, Winter 2024, Spring 2025, Summer 2025
<b>2025-26</b>	Fall 2025, Winter 2025, Spring 2026 (Summer not yet administered)

- 4) The grade level reported reflects the grade level of the test. Pursuant to s. 1002.3105, F.S., schools must offer accelerated options to eligible students, such as subject-matter acceleration, and such students may test above their enrolled grade level in order to take the assessment aligned to their instruction. For example, students who are enrolled in Grade 7, but are receiving instruction in Grade 8 content, may take the Grade 8 assessment for that subject area.
